

INDUSTRIAL SHORT-TERM TRENDS

Monthly

INDEX OF INDUSTRIAL PRODUCTION

Slight rise in Community industrial production during the first quarter of 1982;
production high in April 1982

The provisional index of industrial production in the Community for April 1982 stood at 120.2 (1975=100), representing a rise of 1.2% compared with April 1981. The rise followed a first quarter in which production did not, as previously announced, stagnate but, according to the final figures, rose by an average 0.3% over the first quarter of 1981.

The seasonally adjusted April index stood at 115.2 (1975=100), as against 114.8 in January and February and only 113.8 in March 1982 (the latter figure has been re-evaluated upwards, in particular as a result of a correction to the German index). This has produced an improvement in the short-term growth indicator (cf. the adjusted indices, %A: ratio of the last three months to the previous three months) which in April was indicating a quarterly growth of 0.3%. It should be observed, in addition, that this increase is the same as that recorded, using the revised figures, between the fourth quarter of 1981 and the first quarter of 1982.

The rise in the seasonally-adjusted April index was related to improvements noted in the R.F. of Germany (+1.4 percentage points compared with March), in France (+1 point) and the United Kingdom (+1.2 points), whilst production has remained stable in Italy (+0.1 point). This has meant growth indicators (cf. adjusted indices, %A) on the upturn everywhere: +1.6% in the R.F. of Germany (compared with +1.5% in March); -1.1% in France (compared with -1.8% in March), +0.6% in Italy (compared with +0.4%) and -0.2% in the United Kingdom (compared with -0.4%).

As for the growth trends of the other Member States, a significant upturn was noted only in Denmark (+5.6% in April). Elsewhere there were no signs of economic revival and the growth indicators were as follows: in the Netherlands, Ireland and Greece respectively -2.1%, -0.2% and -0.6% (for March); in Luxembourg 0% (for April) and in Belgium, as a result of the unconsolidated January rise +1.5% (for March).

Where the three major industrial product groups were concerned, the trend was for production of intermediate goods to remain at the level reached since production recovered in the second half-year of 1981 (see graph); as for production of capital and consumer goods, their upward trend, measured by their respective growth indicators of 1.5% and 0.7% for April, is exerting some upward pressure on overall industrial activity.

Textile industry	44
Footwear and clothing industry	46
III BUILDING & CIVIL ENGINEERING	49

1. NOMENCLATURE OF INDUSTRIAL ACTIVITIES

The indices included in this bulletin cover industry as it is defined in divisions 1 to 4 of the General Industrial Classification of Economic Activities within the European Communities (NACE). In part III of the bulletin there are also some indicators relating to NACE division 5 (building and civil engineering). An extract of divisions 1 to 4 of NACE can be found in appendix I to issue n° 5-1982.

2. INDICES OF PRODUCTION

2.a The index of production reflects changes in the volume of production. For industry as a whole, it also indicates changes in volume (at constant prices) in the gross added value created by industry, the branch indices being aggregated (like the aggregation at Community level for a given industrial branch) by means of a system of weighting according to gross added value (in principle, at factor costs). The indices are adjusted in two stages: first they are adjusted to take account of the varying number of working days in the month and this is followed by seasonal adjustment according to EUROSTAT's own particular method. Further information on the index of production may be obtained from supplement 01.1978 of this bulletin.

2.b Meaning of %A and %B:

2.b.1 indices of production per working day:

- %A: the last twelve months as compared with the previous twelve months;
- %B: the last month as compared with the corresponding month of the previous year.

2.b.2 seasonally adjusted indices of production:

- %A (short-term growth): the last three months as compared with the previous three months;
- %B: the last month as compared with the previous month.

2.c The descriptions and definitions in 2.a and 2.b above are also applicable to the indices of production for building and civil engineering.

2.d The indices of production for non-Member States (Spain, Portugal, the United States and Japan) are taken from OECD sources. The indices for Spain and Japan are not adjusted for differences in the number of working days.

3. Unlike the index of production (see 2.a above), the other indices (turnover, orders, exports, imports, number of employees, gross wages and salaries) are not adjusted to allow for differences in the number of working days in each period before they are seasonally adjusted.

4. INDICES OF TURNOVER AND ORDERS RECEIVED

These reflect changes in turnover (overall sales, including sales for export) and orders received at current prices. For detailed definitions, see also supplement N° 12-1980 to this bulletin.

5. INDICES OF IMPORTS AND EXPORTS BY INDUSTRIAL BRANCHES

These are indices of imports or exports (special trade), at current prices (respectively c.i.f. or f.o.b.), of industrial products classified according to the industrial branches to which they belong. It should be emphasized that this classification implies the need to make certain choices in allocating external trade products to overall groups of products according to a nomenclature of industrial activities, and that even comparability between the indices for imports and those for exports is limited.

The indices for the EEC as a whole refer only to trade with non-Member States.

NOTE

For the time being the indices are based on the external trade of the Community of Nine, excluding Greece, which became a full member of the Community with effect from 01.01.1981.

6. INDICES OF THE NUMBER OF EMPLOYEES AND OF GROSS WAGES AND SALARIES

6.1 The number of employees includes all persons employed by the firm (manual workers and salaried employees on the company's payroll).

6.2 Gross wages and salaries cover all sums paid out to persons employed by the company in remuneration for the work they do, including taxes and social security contributions payable by the employee and deducted by the employer, but excluding social security and other contributions payable by the employer. A methodological note on these two indices is being prepared and will be published as a supplement to a future issue of this bulletin.

7. BUILDING AND CIVIL ENGINEERING (PART III)

For information on the index of production and its layout, and on the index of the number of employees, see sections 2 and 6.1 above.

The indices for authorised dwellings and dwelling starts and completions only give a picture of activity in the residential building sector, whereas the other two types of indices also cover non-residential building and civil engineering.

8. GRAPHS

The graphs cover the trend in production and/or employment, whereby the trend is defined as the moving average over three months (after seasonal adjustment) in the case of the index of production; in the case of employment, for which the indices are quarterly, a monthly series is obtained by linear interpolation (without seasonal adjustment).

9. ADDITIONAL INFORMATION

The information included in this bulletin has been taken from the CRONOS data bank, which may be accessed via the EURONET network. Information on CRONOS-EURONET or on the information given in this bulletin may be obtained from EUROSTAT in Luxembourg, tel. 4301-3208 (Mr. VANDERSEYPEN).
