

# INDUSTRIAL SHORT-TERM TRENDS

Monthly

## INDEX OF INDUSTRIAL PRODUCTION

### No signs of improvement in July 1982

The first figures for July 1982 cover only five countries (the FR of Germany, Italy, Luxembourg, the United Kingdom and Denmark) and are bound to give no more than an incomplete picture of trends in July. However, an initial analysis of the indices indicates that production remained weak in July, thus continuing a trend which first became evident in June. A fairly substantial fall in the level of production compared with July 1981 was recorded in the FR of Germany (-3.2%), Italy (-4.5%), Luxembourg (-4.6%) and Denmark (-4.5%), the United Kingdom being the only one of the five reporting countries to record an increase in production (+1.2%). For the five countries together, the fall in production over July 1981 was of the order of 2.3%.

Quite apart from the fact that these figures are too incomplete for the purposes of analysis at Community level (the total weighting of the five reporting countries amounting only to about 70%), it must be remembered that the month of July traditionally sees lots of works closing for annual holidays, with a resultant substantial loss of production, the magnitude of these losses depending also on the holiday timetable, which may vary from one year to the next. This is particularly true of the FR of Germany, where the 3.2% loss in production in July compared with the same month in 1981 is probably due to more works holidays falling in July this year than last year.

It is therefore an extremely tricky matter to try to assess short-term economic trends on the basis of July alone, and one shall certainly have to wait for the August results to become available before a more detailed analysis can be made.

### Note for the reader

Retrospective series of the index of production for a list of industries which were included in the bulletins up to n° 12-1981 are appended to this bulletin (page 53 ff):mining and quarrying,of which NACE 11,NACE 21 and NACE 23;NACE 16;manufacturing industries, of which:NACE 33,NACE 411/23,NACE 424/28,NACE 429,NACE 471/2 and NACE 473.

<u>APPENDIX</u> : retrospective series of the index of production .....	53

**1. NOMENCLATURE OF INDUSTRIAL ACTIVITIES**

The indices included in this bulletin cover industry as it is defined in divisions 1 to 4 of the General Industrial Classification of Economic Activities within the European Communities (NACE). In part III of the bulletin there are also some indicators relating to NACE division 5 (building and civil engineering). An extract of divisions 1 to 4 of NACE can be found in appendix I to issue n° 5-1982.

**2. INDICES OF PRODUCTION**

2.a The index of production reflects changes in the volume of production. For industry as a whole, it also indicates changes in volume (at constant prices) in the gross added value created by industry, the branch indices being aggregated (like the aggregation at Community level for a given industrial branch) by means of a system of weighting according to gross added value (in principle, at factor costs). The indices are adjusted in two stages: first they are adjusted to take account of the varying number of working days in the month and this is followed by seasonal adjustment according to EUROSTAT's own particular method.

Further information on the index of production may be obtained from supplement 01.1978 of this bulletin.

**2.b Meaning of %A and %B:****2.b.1 indices of production per working day:**

- %A: the last twelve months as compared with the previous twelve months;
- %B: the last month as compared with the corresponding month of the previous year.

**2.b.2 seasonally adjusted indices of production:**

- %A (short-term growth): the last three months as compared with the previous three months;
- %B: the last month as compared with the previous month.

2.c The descriptions and definitions in 2.a and 2.b above are also applicable to the indices of production for building and civil engineering.

2.d The indices of production for non-Member States (Spain, Portugal, the United States and Japan) are taken from OECD sources. The indices for Spain and Japan are not adjusted for differences in the number of working days.

3. Unlike the index of production (see 2.a above), the other indices (turnover, orders, exports, imports, number of employees, gross wages and salaries) are not adjusted to allow for differences in the number of working days in each period before they are seasonally adjusted.

**4. INDICES OF TURNOVER AND ORDERS RECEIVED**

These reflect changes in turnover (overall sales, including sales for export) and orders received at current prices. For detailed definitions, see also supplement N° 12-1980 to this bulletin.

**5. INDICES OF IMPORTS AND EXPORTS BY INDUSTRIAL BRANCHES**

These are indices of imports or exports (special trade), at current prices (respectively c.i.f. or f.o.b.), of industrial products classified according to the industrial branches to which they belong. It should be emphasized that this classification implies the need to make certain choices in allocating external trade products to overall groups of products according to a nomenclature of industrial activities, and that even comparability between the indices for imports and those for exports is limited.

The indices for the EEC as a whole refer only to trade with non-Member States.

**NOTE**

For the time being the indices are based on the external trade of the Community of Nine, excluding Greece, which became a full member of the Community with effect from 01.01.1981.

**6. INDICES OF THE NUMBER OF EMPLOYEES AND OF GROSS WAGES AND SALARIES**

6.1 The number of employees includes all persons employed by the firm (manual workers and salaried employees on the company's payroll).

6.2 Gross wages and salaries cover all sums paid out to persons employed by the company in remuneration for the work they do, including taxes and social security contributions payable by the employee and deducted by the employer, but excluding social security and other contributions payable by the employer. A methodological note on these two indices is being prepared and will be published as a supplement to a future issue of this bulletin.

**7. BUILDING AND CIVIL ENGINEERING (PART III)**

For information on the index of production and its layout, and on the index of the number of employees, see sections 2 and 6.1 above.

The indices for authorised dwellings and dwelling starts and completions only give a picture of activity in the residential building sector, whereas the other two types of indices also cover non-residential building and civil engineering.

**8. GRAPHS**

The graphs cover the trend in production and/or employment, whereby the trend is defined as the moving average over three months (after seasonal adjustment) in the case of the index of production; in the case of employment, for which the indices are quarterly, a monthly series is obtained by linear interpolation (without seasonal adjustment).

**9. ADDITIONAL INFORMATION**

The information included in this bulletin has been taken from the CRONOS data bank, which may be accessed via the EURONET network. Information on CRONOS-EURONET or on the information given in this bulletin may be obtained from EUROSTAT in Luxembourg (tel. 4301-3521 or 4301-3208).

**10. SYMBOLS AND ABBREVIATIONS:**

- : data not available;
- non-existent series;
- ADJ seasonally adjusted.
