Weiterhin Konjunkturabschwächung in der Industrie

Der Produktionsindex wird für Februar 1991 für die **Europäische Gemeinschaft** (EUR12) derzeit auf 118,7 geschätzt (1985=100); dies entspricht einer Steigerung von 1,3 % gegenüber Februar 1990.

In den Vereinigten Staaten war im gleichen Monat eine Änderungsrate von -2,7 % zu beobachten, in Japan +7,3 %. Somit ist in Japan nach wie vor erhebliches industrielles Wachstum zu beobachten, während sich in den USA der Abwärtstrend der Industriekonjunktur deutlich fortsetzt.

Nach **Saisonbereinigung** beträgt der geschätzte Index im Februar 114,7 für die Europäische Gemeinschaft (Januar: 115,2), 112,0 für die USA (Vormonat 112,9) und 129,8 für Japan (Vormonat 129,5).

Für die letzten drei Monate Dezember 1990 bis Februar 1991 beläuft sich die Steigerung des Produktionsindex für EUR12 gegenüber dem **gleichen Vorjahreszeitraum** auf 0,6 %. Betrachtet man die letzten drei verfügbaren Monate des saisonbereinigten Produktionsindex und vergleicht diese mit den drei davor liegenden Herbstmonaten, so kann man einen Stillstand des Produktionsniveaus konstatieren (0,1 %).

Aufgegliedert nach Verwendungszwecken sind für die Europäische Gemeinschaft in den letzten drei Monaten (Dezember 1990 bis Februar 1991) folgende Veränderungen gegenüber den **drei davor liegenden Monaten** festzustellen:

- 0,1 % bei Grundstoffen und Produktionsgütern (USA: -2,1 %, Japan 0,4 %),
- 0,4 % bei Investitionsgütern (USA: -2,7 %, Japan 1,4 %),
- 0,3 % bei Verbrauchsgütern (USA: -2,6 %, Japan -0,1 %).

Somit muß für die Europäische Gemeinschaft nach wie vor für alle Güterbereiche eine **stagnierende Produktionsentwicklung** festgestellt werden. Dabei findet im Vergleich zu den Herbstmonaten noch Wachstum statt in Bereichen wie der Energie- und Wasserversorgung (3 %) und der Nahrungsmittelindustrie (1 %). Nullwachstum herrscht in der elektrotechnischen Industrie (-0,6 %). Sinkende Produktionsentwicklungen sind dagegen zu beobachten in der chemischen Industrie (-1,3 %), im Bereich der Metallerzeugnisse (-1,6 %), des Maschinenbaus (-3,0 %), der Automobilindustrie (-3,6 %) und der Textilindustrie (-2,7 %).

Für den Produktionsindex der gesamten Industrie (NACE 1-4) ist im Vergleich zum Herbst 1990 nur in den Niederlanden (+4,8 %), in Irland (+1,5 %) und in Spanien (+0,7 %) Wachstum zu verzeichnen. Stagnation ist zu beobachten in Deutschland (0,5 %), Dänemark (0,1 %), Italien (-0,1 %) und Frankreich (-0,1 %). Nach wie vor stark ausgeprägt ist die Rezession im Vereinigten Königreich mit -1,1 % (Investitionsgüterindustrie -2,3 %).

Im **Jahresvergleich 1990 mit 1989** ist bei einer Analyse der Wachstumsraten für die drei großen Gütergruppen Grundstoffproduktion, Investitionsgüterproduktion und Konsumgüterproduktion festzustellen, daß sehr häufig die **Konsumgüterindustrie** den Motor des Produktionswachstums darstellte: Deutschland 7,2 %, Luxemburg 6,8 %, Niederlande 5,3 %. Spanien 2,6 %, Dänemark 2,4 %, Frankreich 2,0 % (jeweils Jahreswachstumsraten). In allen genannten Ländern ist die Wachstumsrate der Konsumgüterindustrie die höchste der drei großen Gütergruppen. Ein weiteres sehr häufig auftretendes Wachstumsmuster ist für die Industrie der Grundstoffe und Produktionsgüter zu beobachten: In allen EC Mitgliedstaaten (außer Spanien) war hier das Wachstum 1990 am geringsten, häufig sogar negativ. Dieser Bereich verlor demnach weiter an Bedeutung.

HINWEISE

1. SYSTEMATIK DER INDUSTRIEZWEIGE

Die in der vorliegenden Veröffentlichung ausgedruckten Indizes beziehen sich auf die Industriezweige gemäß der harmonisierten Systematik der Wirtschaftszweige in den Europäischen Gemeinschaften (NACE - Fassung von 1970) - Abteilung 1 bis 4. Im letzten Teil der Veröffentlichung befinden sich auch einige Indikatoren zu der NACE-Abteilung 5 "Baugewerbe". (Ein Auszug der Abteilungen 1 bis 4 ist als Teil des Glossars veröffentlicht.)

2. PRODUKTIONSINDIZES

- 2.a Der Produktionsindex misst die mengenmäßige Entwicklung der Bruttowertschöpfung (d.h. die Entwicklung zu konstanten Preisen) in der Industrie, wobei zu bedenken ist, daß die Zusammenfassung der Produktionsbereiche bei der Indexbildung (ebenso wie die Zusammenfassung für einen bestimmten Industriezweig auf Gemeinschaftsebene) durch Gewichtung mit Hilfe der Bruttowertschöpfung erfolgt (im Prinzip zu Faktorkosten). Die Indizes werden in zwei Etappen berichtet: eine erste Berichtigung wird unter Berücksichtigung der ungleichen Zahl der Arbeitstage pro Monat durchgeführt (ausgenommen Spanien und Japan). Daran anschließend erfolgt für EUR-12 und die Mitgliedstaaten eine Saisonbereinigung aufgrund eines EUROSTAT-Versfahrens (mit Ausnahme des Vereinigten Königreichs und Irlands, für die die Indizes durch das nationale statistische Amt saisonbereinigt werden).
- 2.b **Bedeutung von %A und %B:**
 Arbeitstäglich bereinigte Produktionsindizes:
 • %A: die letzten 12 Monate gegenüber den vorhergehenden 12 Monaten;
 • %B: letzte 3 Monate gegenüber dem entsprechenden Vorjahreszeitraum.
 Saisonbereinigte Produktionsindizes:
 • %A: die letzten 3 Monate gegenüber den vorhergehenden 3 Monaten;
 • %B: der letzte Monat gegenüber dem Vormonat.
- 2.c Die Ausführungen zu 2.a und 2.b gelten auch für die Produktionsindizes des Baugewerbes.
- 2.d Die Produktionsindizes von Drittländern (USA und Japan) entstammen OECD-Quellen: ihre Nomenklatur sowie ihre Berechnungsweise und Saisonbereinigung entsprechen der Methodik der Quelle. Wurde jedoch die Serie durch die OECD nicht saisonbereinigt, so ist die Saisonbereinigung mit Hilfe der EUROSTAT-Methode durchgeführt worden.

3. ARBEITSTÄGLICHE BEREINIGUNG

Im Gegensatz zum Produktionsindex (siehe 2.a) werden die übrigen Indizes (Umsatz, Auftragseingang, Ein- und Ausfuhr, abhängig Beschäftigte, Bruttolöhne und -gehälter) vor Saisonbereinigung nicht in bezug auf die ungleiche Zahl der Arbeitstage berichtet.

4. UMSATZ- UND AUFRAGSEINGANGSINDIZES

Diese Indizes erfassen die Entwicklung des Umsatzes (Gesamtumsatz einschließlich Exportabsatz) bzw. des Auftragseingangs zu laufenden Werten. Für Griechenland, Spanien und Portugal werden zur Zeit keine Umsatzindizes geliefert. Der Auftragseingangsindex wird darüber hinaus auch von Frankreich nicht berechnet.

5. ERZEUGERPREISINDEX DER INDUSTRIELLEN PRODUKTION

Dieser Index erfaßt (in der Landeswährung der einzelnen Staaten) die Entwicklung der Verkaufspreise ab Werk für alle Erzeugnisse, die auf den Inlandsmärkten der Mitgliedsstaaten verkauft werden. Die Indizes für die Gemeinschaft (EUR-11, Portugal verfügt zur Zeit über keine Erzeugerpreisindizes) beziehen sich auf die gewichtete Gesamtheit dieser Preisentwicklung.

Die Erzeugerpreisindizes für die einzelnen Mitgliedsstaaten (und die Gemeinschaft) werden auch in ECU angegeben. Hierzu werden die nationalen Indizes mit dem jeweiligen für diesen Monat geltenden Wechselkurs gegenüber dem ECU multipliziert und neu auf 1985 = 100 umbasiert.

6. INDIZES DER ABHÄNGIG BESCHÄFTIGTEN SOWIE DER BRUTTOLÖHNE UND -GEHÄLTER

Die Beschäftigtenzahlen umfassen sämtliche beschäftigte Personen (auf der Lohnliste stehende Arbeiter und Angestellte). Die Bruttolöhne und -gehälter umfassen die Zahlungen an alle Arbeitslohnempfänger einschließlich der auf die Beschäftigten entfallenden und vom Arbeitgeber einbehaltenen Steuern und Sozialabgaben, jedoch ohne die Arbeitgeberbeiträge zur Sozialversicherung sowie sonstige vom Arbeitgeber zu zahlende Beiträge.

7. BAUGEWERBE

Was den Produktionsindex und seine Darstellung sowie den Index der abhängig Beschäftigten angeht, verweisen wir auf die unter Ziffer 2 und 6 gegebenen Erläuterungen.

8. SCHAUBILDER

Die Schaubilder zeigen für die Produktionsindizes nach Saisonbereinigung jeweils gleitende Dreimonats-Durchschnitte (Zur Unterdrückung von Extremwerten); die vierteljährlichen Beschäftigungsindizes werden mit Hilfe linearer Interpolation auf Monatsbasis umgerechnet. Der Maßstab der Schaubilder ist halb-logarithmisch.

9. WEITERE METHODISCHE ERLÄUTERUNGEN

Genauere Angaben bezüglich der Definitionen einzelner Indikatoren und der angewandten Methodologie können einer aktualisierten Fassung der "Methodologie der Konjunkturindikatoren" von 1991 entnommen werden.

Continuing slowdown in industry

The production index for the **European Community** (EUR12) for February 1991 is currently estimated at 118,7 (1985=100) which represents a 1,3 % increase on February 1990.

In the United States and Japan, the figures for the same month were -2,7 % and +7,3 % respectively. This indicates that whilst industrial growth in Japan remains strong, the downward trend in the USA is clearly continuing.

After seasonal adjustment, the estimated February index is 114,7 for the European Community (January: 115,2), 112,0 for the USA (previous month 112,9) and 129,8 for Japan (previous month 129,5).

For the three-month period from December 1990 to February 1991, the **year-on-year** increase in the production index for EUR12 was 0,6 %. Comparing the last three months of the seasonally adjusted production index for which data are available with the preceding three autumn months shows a zero increase in the level of production (0,1 %).

Broken down by types of goods, changes in the European Community for the last three months (December 1990 to February 1991) compared with the **three previous months** are as follows:

- 0,1 % for commodities and intermediate goods (USA: -2,1 %, Japan 0,4 %).
- 0,4 % for capital goods (USA: -2,7 %, Japan 1,4 %).
- 0,3 % for consumer goods (USA: -2,6 %, Japan -0,1 %).

Production in the European Community thus continues to **stagnate**, although there is still some growth in sectors such as energy and water (3 %) and food industries (1 %) compared with the autumn months. There is a zero growth in the electrical industry (-0,6 %) and production has fallen in the chemical industry (-1,3 %), the metal products sector (-1,6 %), mechanical engineering (-3,0 %), the motor vehicle industry (-3,6 %) and the textile industry (-2,7 %).

Compared with autumn 1990, there was growth in the production index for industry as a whole (NACE 1-4) only in the Netherlands (+4,8 %), Ireland (+1,5 %) and Spain (+0,7 %). Production stagnated in the Federal Republic of Germany (0,5 %), Denmark (0,1 %), Italy (-0,1 %) and France (-0,1 %). The marked recession in the United Kingdom continued, with production down -1,1 % (-2,3 % for capital goods).

Comparison of 1989 and 1990 production indices for the three major groups of goods (production of commodities, capital goods and consumer goods) shows that the **consumer goods industry** is very often driving force in production: Federal Republic of Germany 7,2 %, Luxembourg 6,8 %, Netherlands 5,3 %, Spain 2,6 %, Denmark 2,4 %, France 2,0 % (in each case annual growth rates 1990/1989). In each of these countries, the growth rate for the consumer goods industry was the highest of the three major groups of goods. A different common pattern of growth is discernible in the commodities and intermediate goods industries: in all EC Member States (apart from Spain), growth in 1990 was slowest in this sector, and was often negative. The significance of this sector thus continued to decline.

Luxembourg, 13.05.1991

NOTES

EN

1. CLASSIFICATION OF INDUSTRIAL ACTIVITIES

The indices in this bulletin cover industry as it is defined in Divisions 1 to 4 of the General Industrial Classification of Economic Activities within the European Communities (NACE - 1970 version). In the last part of the bulletin there are also some indicators relating to NACE Division 5, "Building and civil engineering". (Divisions 1 to 4 of the NACE have been reproduced as part of the glossary.)

2. INDICES OF PRODUCTION

- 2.a The index of production measures changes in the volume (at constant prices) of the gross value added created by industry, the branch indices being aggregated (like the aggregation at Community level for a given industrial branch) by means of a system of weighing according to gross value added (in principle, at factor cost). The indices are adjusted in two stages: firstly to take account of the varying number of working days in the month (except for Spain and Japan) and secondly by seasonal adjustment according to Eurostat's own method for EUR 12 and the Member States (with the exception of the United Kingdom and Ireland, the indices for which are adjusted by the national statistical offices).
- 2.b Meaning of %A and %B:
Indices of production adjusted by the number of working days:
● %A: the last twelve months as compared with the preceding twelve months;
● %B: the last three months as compared with the corresponding months of the previous year.
Seasonally adjusted indices of production:
● %A: the last three months as compared with the preceding three months;
● %B: the last month as compared with the month before that.
- 2.c The descriptions and definitions in 2.a and 2.b above also apply to the indices of production for building and civil engineering.
- 2.d The indices of production for non-Member States (the United States and Japan) are taken from OECD sources: they have been classified, calculated and seasonally adjusted as in the source publication. Any series not seasonally adjusted by the OECD is adjusted by the Eurostat method.

3. ADJUSTMENT FOR NUMBER OF WORKING DAYS

Unlike the index of production (see 2.a above), the other indices (turnover, orders received, imports, exports, number of employees, gross wages and salaries) are not adjusted to allow for differences in the number of working days in each period before they are seasonally adjusted.

4. INDICES OF TURNOVER AND ORDERS RECEIVED

These reflect changes in turnover (overall sales, including sales for export) and orders received at current prices. No turnover indices are supplied at present for Greece, Spain or Portugal, and France does not calculate any index of orders received.

5. INDEX OF PRODUCER PRICES OF INDUSTRIAL PRODUCTION

This index shows (in the national currency of the Member State in question) changes in the ex-works selling prices of all products sold on the domestic markets of the various countries. The Community indices (EUR 11, since there are no producer price indices for Portugal) refer to overall weighted price changes.

The producer price indices for the individual Member States (and the Community) are shown in ecus as well. The national indices are multiplied by the exchange rate for the national currency against the ecu for the month in question and rebased to 1985 = 100.

6. INDICES OF THE NUMBER OF EMPLOYEES AND OF GROSS WAGES AND SALARIES

Figures showing the number of employees include all persons employed by the firm (manual workers and salaried employees on the firm's payroll). Gross wages and salaries cover all payments to persons employed by the firm in remuneration for the work they do, including taxes and social security contributions payable by employees and deducted by the employer, but excluding social security and other contributions payable by the employer.

7. BUILDING AND CIVIL ENGINEERING

For information on the index of production and its layout, and on the index of the number of employees, see sections 2 and 6 above.

8. GRAPHS

The graphs of the indices of production after seasonal adjustment show the quarterly moving average (to offset extreme values); in the case of quarterly employment, a monthly series is obtained by linear interpolation. The graphs are on a semi-logarithmic scale.

9. FURTHER EXPLANATIONS ON METHODOLOGY

Further details on the definitions of the various indicators and the methodology used are given in the updated version of the "Methodology of Short-Term Indicators" 1991.

C O M M E N T A I R E

L'affaiblissement conjoncturel dans l'industrie se poursuit

Pour la **Communauté européenne** (EUR12), l'**indice de production** de février 1991 est actuellement estimé à 118,7 (1985=100); ce qui correspond à une progression de 1,3 % par rapport à février 1990.

Aux Etats-Unis, on observe pour le même mois un taux de variation de -2,7 %, au Japon +7,3 %. La croissance industrielle reste donc forte au Japon comme précédemment alors qu'aux Etats-Unis, la nette tendance à la baisse de la conjoncture industrielle se poursuit.

Après **correction des variations saisonnières**, l'indice estimé s'élève à 114,7 en février pour la Communauté européenne (janvier: 115,2), 112,0 pour les Etats-Unis (mois précédent 112,9) et à 129,8 pour le Japon (mois précédent 129,5).

Pour les trois derniers mois, décembre 1990 à février 1991, la progression de l'indice de production pour EUR12 est de 0,6 % par rapport à la **même période de l'année précédente**. Si l'on considère les trois derniers mois disponibles de l'indice désaisonnalisé et si on les compare avec l'automne précédent, on constate une stagnation du niveau de la production (0,1 %).

Ventilées par emplois, les variations pour la Communauté européenne au cours des trois derniers mois (décembre 1990 à février 1991) par rapport aux **trois mois précédents** se décomposent ainsi:

- 0,1 % pour les matières premières et les biens de production (USA: -2,1 %, Japon 0,4 %),
- 0,4 % pour les biens d'investissement (USA: -2,7 %, Japon 1,4 %),
- 0,3 % pour les biens de consommation (USA: -2,6 %, Japon -0,1 %).

Pour la Communauté européenne, il faut donc à nouveau constater une **stagnation de l'évolution de la production** dans tous les secteurs de biens. Par rapport à l'automne, on note encore un accroissement dans les secteurs de l'énergie et de l'eau (3 %) et dans celui de l'industrie des produits alimentaires (1 %). Le secteur de l'industrie électrotechnique (-0,6 %) se caractérise par une croissance nulle. Dans le secteur de l'industrie chimique (-1,3 %), des produits métalliques (-1,6 %), de la construction métallique (-3,0 %), de l'industrie automobile (-3,6 %) et de l'industrie textile (-2,7 %), la tendance est en revanche à la baisse.

Pour l'indice de production de l'ensemble de l'industrie (NACE 1-4), seuls les Pays-Bas (+4,8 %), l'Irlande (+1,5 %) et l'Espagne (+0,7 %) enregistrent encore un accroissement par rapport à l'automne 1990. On note une stagnation en Allemagne (0,5 %), au Danemark (0,1 %), en Italie (-0,1 %) et en France (-0,1 %). Comme précédemment, la récession au Royaume-Uni de -1,6% (industrie des biens d'investissement: -2,3 %) demeure prononcée.

Dans la **comparaison annuelle 1990 et 1989**, il résulte de l'analyse des taux de croissance des trois grands groupes de biens, à savoir production de matières premières, production de biens d'investissement et production de biens de consommation, que, très souvent, l'**industrie des biens de consommation** a été le moteur de la croissance de la production: Allemagne 7,2 %, Luxembourg 6,8 %, Pays-Bas 5,3 %, Espagne 2,6 %, Danemark 2,4 %, France 2,0 % (taux de croissance annuels). Dans tous ces pays, le taux de croissance de l'industrie des biens de consommation est le plus élevé parmi les trois grands groupes de biens. Un autre type de croissance très fréquent peut être observé pour l'industrie des matières premières et des biens de production: en 1990, le taux de croissance a été le plus faible, voire souvent négatif dans tous les Etats membres de la Communauté (à l'exception de l'Espagne). Par conséquent, ce secteur a encore perdu de l'importance.

NOTES

1. NOMENCLATURE D'ACTIVITES INDUSTRIELLES

Les indices repris dans la présente publication portent sur les activités industrielles telles que définies dans la Nomenclature générale des activités économiques dans les Communautés européennes (NACE - version de 1970) aux divisions 1 à 4. Dans la dernière partie de la présente publication, on trouvera également quelques indicateurs relatifs à la division 5 "Bâtiment et génie civil" de la NACE (un extrait des divisions 1 à 4 de la NACE est repris dans le glossarium).

2. INDICES DE PRODUCTION

2.a L'indice de production mesure l'évolution en volume (à prix constants) de la valeur ajoutée brute générée dans l'industrie, l'agrégation des indices de branches (comme l'agrégation au niveau communautaire pour une branche donnée) étant effectuée par pondération à l'aide de la valeur ajoutée brute (en principe au coût des facteurs). Les indices sont corrigés en deux étapes. Une première correction est effectuée pour tenir compte des différences en matière de nombre de jours ouvrables par mois (sauf pour l'Espagne et le Japon). La deuxième étape consiste, selon une méthode propre à Eurostat, à corriger des variations saisonnières les séries pour EUR-12 et pour les Etats membres (à l'exception du Royaume-Uni et de l'Irlande, dont les indices sont désaisonnalisés par les offices statistiques nationaux).

2.b Signification des %A et des %B

Indices de production après correction pour jours ouvrables:

- %A: les 12 derniers mois par rapport aux 12 mois précédents;
- %B: les 3 derniers mois par rapport aux mois correspondants de l'année précédente.

Indices de production désaisonnalisés:

- %A: les 3 derniers mois par rapport aux 3 mois précédents;
- %B: le dernier mois par rapport au mois précédent.

2.c Les explications données sous 2.a et 2.b ci-dessus s'appliquent également aux indices de production pour le bâtiment et le génie civil.

2.d Les indices de production de pays tiers (Etats-Unis et Japon) proviennent de source OCDE. Leur nomenclature, la méthode d'établissement et le mode de désaisonnement suivent ceux de la source. Toutefois, si la série n'est pas désaisonnalisée par l'OCDE, elle l'est selon la méthode Eurostat.

3. CORRECTION POUR JOURS OUVRABLES

Contrairement à l'indice de production (voir 2.a), les autres indices (chiffre d'affaires, entrées de commande, importations et exportations, nombre de salariés, salaires et traitement bruts) ne subissent pas - avant la désaisonnement - de corrections pour les différences constatées en matière de nombre de jours ouvrables.

4. INDICES DU CHIFFRE D'AFFAIRES ET DES ENTREES DE COMMANDES

Ces indices rendent compte de l'évolution du chiffre d'affaires (ventes totales, y compris les ventes à l'exportation) et des entrées de commandes en valeur courante. Aucun indice du chiffre d'affaires n'est disponible actuellement pour la Grèce, l'Espagne et le Portugal. La France ne calcule pas non plus cet indice.

5. INDICE DES PRIX A LA PRODUCTION INDUSTRIELLE

Cet indice rend compte (dans la monnaie nationale de l'Etat membre concerné) de l'évolution des prix de vente départ-usine de tous les produits qui sont vendus sur les marchés intérieurs des Etats membres. L'indice communautaire (EUR-11, le Portugal ne calculant pas actuellement d'indices des prix à la production) est une moyenne pondérée des différents indices nationaux.

Les indices des prix à la production des différents Etats membres (et de la Communauté) sont également indiqués en écus. A cet effet, les indices nationaux sont multipliés chaque mois par le taux de change de la monnaie nationale vis-à-vis de l'écu et convertis en base 1985 = 100.

6. INDICES DU NOMBRE DE SALARIES ET DES SALAIRES ET TRAITEMENTS BRUTS

Le nombre de salariés inclut l'ensemble des personnes occupées (ouvriers et employés) figurant sur la feuille de paie. Les salaires et traitements bruts portent sur les sommes versées à tous les salariés en rémunération de leur travail, y compris les impôts et cotisations de sécurité sociale dus par ceux-ci et retenus par l'employeur, mais à l'exclusion des cotisations de sécurité sociale et autres supportées par l'employeur.

7. BATIMENT ET GENIE CIVIL

En ce qui concerne l'indice de production et sa présentation, ainsi que l'indice du nombre de salariés, nous renvoyons aux points 2 et 6 ci-dessus.

8. GRAPHIQUES

Dans le cas des indices de production, les graphiques présentent toujours la moyenne mobile sur trois mois après désaisonnement (de façon à éliminer les valeurs extrêmes). Les indices de l'emploi - dont la fréquence est trimestrielle - sont mensualisés par interpolation linéaire. Les échelles des graphiques sont semi-logarithmiques.

9. AUTRES EXPLICATIONS METHODOLOGIQUES

Des informations plus détaillées au sujet des définitions des différents indicateurs et de la méthodologie appliquée peuvent être obtenues dans la version actualisée (1991) de la "Méthodologie des indicateurs conjoncturels".

Regelmäßig herausgegebene Veröffentlichungen des Statistischen Amtes zum Thema Industrie

- Industriekonjunktur – Monatliche Statistiken und Beilagen

Diese Veröffentlichung enthält die Indizes von industrieller Produktion, Umsatz, Auftragseingang, abhängig Beschäftigten, Löhnen und Gehältern, nach Industriezweigen, ferner Indizes des Werts von Ein- und Ausfuhren. Ein separates kurzes Kapitel ist den Konjunkturindikatoren für das Baugewerbe vorbehalten.

Beilagen mit Angaben zur Methodik und/oder mit retrospektiven Reihen vervollständigen die laufende Veröffentlichung.

Abonnement (VUI): ECU 59

- Industrielle Produktion – Vierteljährliche Statistiken

Statistische Daten über die industrielle Produktion nach Erzeugnissen. Jährliche und vierteljährige Angaben über die Produktion von industriellen Erzeugnissen in den Mitgliedstaaten der EG.

Abonnement (VGI): ECU 38

- Industrie – Statistisches Jahrbuch

Diese Veröffentlichung enthält eine Auswahl der wichtigsten statistischen Angaben über die Industrie (Struktur, Tätigkeit, Investitionen, nach Unternehmensgröße, industrielle Erzeugnisse, Konjunkturindikatoren und Außenhandel), ferner vergleichbare Tabellen für die EG, die Vereinigten Staaten und Japan sowie Tabellen über die Industrie in Spanien und Portugal.

Preis: ECU 32

- Struktur und Tätigkeit der Industrie – Jahreserhebung – Wichtigste Ergebnisse

Diese Veröffentlichung enthält die wichtigsten Ergebnisse der von den Mitgliedstaaten in Übereinstimmung mit einer Ratsrichtlinie vom 6. Juni 1972 durchgeführten koordinierten Jahreserhebung über die Tätigkeit der Industrie. Sie weist jährlich die Angaben über die wichtigsten wirtschaftlichen Tatbestände dieser Erhebung (Beschäftigung, Produktionswert, Wertschöpfung usw.) aus.

Preis: ECU 21

- Struktur und Tätigkeit der Industrie – Ergebnisse nach Unternehmensgröße

Dieser Band, der alle zwei Jahre herausgegeben wird, enthält die Ergebnisse der koordinierten Jahreserhebung über die Tätigkeit der Industrie für die fünf wichtigsten Tatbestände, gegliedert nach drei Größenklassen von Unternehmen.

Preis: ECU 11

Die aufgeführten Veröffentlichungen sind auch bei den auf der dritten Umschlagseite aufgeführten Vertriebsbüros erhältlich.

The periodicals of the Statistical Office on industry

- Industrial trends – Monthly statistics and supplements

This publication contains the indices of industrial production, turnover, orders received, number of employees, gross wages and salaries by branch of industry as well as indices of the value of imports and exports. A special chapter is devoted to indicators for the building and civil engineering sector.

Supplements on methodology and/or containing retrospective series complete the ordinary publication.

Subscription (VUI): ECU 59

- Industrial production – Quarterly statistics

Statistics of industrial production by product. Annual and quarterly data on production of industrial products in the Member States of the EC.

Subscription (VGI): ECU 38

- Industry – Statistical yearbook

This publication contains a selection of the most important statistics about industry concerning structure, activity, investments, size of enterprises, industrial products, short-term indicators and external trade as well as comparative tables between the EC, United States and Japan and tables about the industry in Spain and Portugal.

Price: ECU 32

- Structure and activity of industry – Annual inquiry – Main results

This publication contains the main results of the coordinated annual inquiry into industrial activity, carried out by the Member States pursuant to a Council Directive of 6 June 1972. It gives annually the results for the most important economic variables of this inquiry: employment, production value, value-added, etc.

Price: ECU 21

- Structure and activity of industry – Data by size of enterprise

This volume, which is published every two years, gives the results of the coordinated annual inquiry into industry for the five most important variables by three classes of size of enterprise.

Price: ECU 11

ORDER FORM

To send to: Office for Official Publications
of the European Communities
L-2985 Luxembourg

Please send mecopy(ies)

- Subscription to industrial trends – Monthly statistics & supplements
- Subscription to industrial production – Quarterly statistics
- Industry – Statistical yearbook
- Structure and activity of industry – Main results
- Structure and activity of industry – Data by size of enterprise

Payment is due on receipt of invoice

These publications are also available from the sales offices (see inside back cover).

Les périodiques de l'Office statistique sur l'industrie

- Conjoncture industrielle – Statistiques mensuelles et suppléments

Cette publication contient les indices de production industrielle, chiffre d'affaires, entrées de commandes des personnes employées, des salaires et des traitements par branche industrielle ainsi que des indices de valeur des importations et des exportations. Un bref chapitre est réservé aux indicateurs conjoncturels du secteur du bâtiment et du génie civil.

Des **suppléments** de caractère méthodologique et/ou contenant des séries rétrospectives complètent la publication courante.

Abonnement (VUI): ECU 59

- Production industrielle – Statistiques trimestrielles

Statistiques de la production industrielle par produit. Données annuelles et trimestrielles sur la production des produits industriels dans les États membres des CE.

Abonnement (VGI): ECU 38

- Industrie – Annuaire statistique

La publication contient une sélection des principales statistiques industrielles: structure, activités, investissements, taille des entreprises, produits industriels, indicateurs conjoncturels et commerce extérieur ainsi que des tableaux comparatifs entre la CE, les États-Unis et le Japon et des tableaux sur l'industrie.

Prix: ECU 32

- Structure et activité de l'industrie – Enquête annuelle – Principaux résultats

Cette publication comporte les principaux résultats de l'enquête annuelle coordonnée sur l'activité industrielle, exécutée par les États membres en conformité d'une directive du Conseil du 6 juin 1972. Elle donne annuellement les résultats pour les variables économiques les plus importantes de cette enquête: emploi, valeur de la production, valeur ajoutée, etc.

Prix: ECU 21

- Structure et activité de l'industrie – Données selon la taille des entreprises

Dans ce volume qui paraît à un rythme bisannuel, les résultats de l'enquête annuelle coordonnée sur l'activité de l'industrie sont ventilés pour cinq variables importantes, selon trois classes de taille des entreprises.

Prix: ECU 11
