eurostat

Eurostat hat die Aufgabe, den Informationsbedarf der Kommission und aller am Aufbau des Binnenmarktes Beteiligten mit Hilfe des europäischen statistischen Systems zu decken.

Um der Öffentlichkeit die große Menge an verfügbaren Daten zugänglich zu machen und Benutzern die Orientierung zu erleichtern, werden zwei Arten von Publikationen angeboten: Statistische Dokumente und Veröffentlichungen.

Statistische Dokumente sind für den Fachmann konzipiert und enthalten das ausführliche Datenmaterial: Bezugsdaten, bei denen die Konzepte allgemein bekannt, standardisiert und wissenschaftlich fundiert sind. Diese Daten werden in einer sehr tiefen Gliederung dargeboten. Die Statistischen Dokumente wenden sich an Fachleute, die in der Lage sind, selbständig die benötigten Daten aus der Fülle des dargebotenen Materials auszuwählen. Diese Daten sind in gedruckter Form und/oder auf Diskette, Magnetband, CD-ROM verfügbar. Statistische Dokumente unterscheiden sich auch optisch von anderen Veröffentlichungen durch den mit einer stilisierten Graphik versehenen weißen Einband.

Die zweite Publikationsart, die Veröffentlichungen, wenden sich an eine ganz bestimmte Zielgruppe, wie zum Beispiel an den Bildungsbereich oder an Entscheidungsträger in Politik und Verwaltung. Sie enthalten ausgewählte und auf die Bedürfnisse einer Zielgruppe abgestellte und kommentierte Informationen. Eurostat übernimmt hier also eine Art Beraterrolle.

Für einen breiteren Benutzerkreis gibt Eurostat Jahrbücher und periodische Veröffentlichungen heraus. Diese enthalten statistische Ergebnisse für eine erste Analyse sowie Hinweise auf weiteres Datenmaterial für vertiefende Untersuchungen. Diese Veröffentlichungen werden in gedruckter Form und in Datenbanken angeboten, die in Menütechnik zugänglich sind.

Um Benutzern die Datensuche zu erleichtern, hat Eurostat Themenkreise, d. h. eine Untergliederung nach Sachgebieten, eingeführt. Daneben sind sowohl die Statistischen Dokumente als auch die Veröffentlichungen in bestimmte Reihen, wie zum Beispiel „Jahrbücher“, „Konjunktur“, „Methoden“, untergliedert, um den Zugriff auf die statistischen Informationen zu erleichtern.

Y. Franchet
Generaldirektor

It is Eurostat's responsibility to use the European statistical system to meet the requirements of the Commission and all parties involved in the development of the single market.

To ensure that the vast quantity of accessible data is made widely available, and to help each user make proper use of this information, Eurostat has set up two main categories of document: statistical documents and publications.

The statistical document is aimed at specialists and provides the most complete sets of data: reference data where the methodology is well established, standardized, uniform and scientific. These data are presented in great detail. The statistical document is intended for experts who are capable of using their own means to seek out what they require. The information is provided on paper and/or on diskette, magnetic tape, CD-ROM. The white cover sheet bears a stylized motif which distinguishes the statistical document from other publications.

The publications proper tend to be compiled for a well-defined and targeted public, such as educational circles or political and administrative decision-makers. The information in these documents is selected, sorted and annotated to suit the target public. In this instance, therefore, Eurostat works in an advisory capacity.

Where the readership is wider and less well defined, Eurostat provides the information required for an initial analysis, such as yearbooks and periodicals which contain data permitting more in-depth studies. These publications are available on paper or in Videotext databases.

To help the user focus his research, Eurostat has created 'themes', i.e. a subject classification. The statistical documents and publications are listed by series: e.g. yearbooks, short-term trends or methodology in order to facilitate access to the statistical data.

Y. Franchet
Director-General

Pour établir, évaluer ou apprécier les différentes politiques communautaires, la Commission des Communautés européennes a besoin d'informations.

Eurostat a pour mission, à travers le système statistique européen, de répondre aux besoins de la Commission et de l'ensemble des personnes impliquées dans le développement du marché unique.

Pour mettre à la disposition de tous l'importante quantité de données accessibles et faire en sorte que chacun puisse s'orienter correctement dans cet ensemble, deux grandes catégories de documents ont été créées: les documents statistiques et les publications.

Le document statistique s'adresse aux spécialistes. Il fournit les données les plus complètes: données de référence où la méthodologie est bien connue, standardisée, normalisée et scientifique. Ces données sont présentées à un niveau très détaillé. Le document statistique est destiné aux experts capables de rechercher, par leurs propres moyens, les données requises. Les informations sont alors disponibles sur papier et/ou sur disquette, bande magnétique, CD-ROM. La couverture blanche ornée d'un graphisme stylisé démarque le document statistique des autres publications.

Les publications proprement dites peuvent, elles, être réalisées pour un public bien déterminé, ciblé, par exemple l'enseignement ou les décideurs politiques ou administratifs. Des informations sélectionnées, triées et commentées en fonction de ce public lui sont apportées. Eurostat joue, dès lors, le rôle de conseiller.

Dans le cas d'un public plus large, moins défini, Eurostat procure des éléments nécessaires à une première analyse, les annuaires et les périodiques, dans lesquels figurent les renseignements adéquats pour approfondir l'étude. Ces publications sont présentées sur papier ou dans des banques de données de type vidéotex.

Pour aider l'utilisateur à s'orienter dans ses recherches, Eurostat a créé les thèmes, c'est-à-dire une classification par sujet. Les documents statistiques et les publications sont répertoriés par série — par exemple, annuaire, conjoncture, méthodologie — afin de faciliter l'accès aux informations statistiques.

KOMMENTAR

Stillstand der Industrieproduktion im ersten Halbjahr 1991

In den ersten sechs Monaten 1991 verharrt die Industrieproduktion der Europäischen Gemeinschaft auf **gleichbleibendem Niveau**. Anzeichen eines nahen Endes der Rezession sind nicht zu erkennen. Für Juni 1991 wird der arbeitstäglich bereinigte **Produktionsindex** derzeit für EUR 12 auf 117,8 geschätzt (1985 = 100); dies entspricht einer Veränderung des Index gegenüber Juni 1990 von 0,7 %. Nach Saisonbereinigung beträgt der geschätzte Index im Juni 115,3 %, im Januar war er bei 115,9 %. Die Wachstumsrate der kumulierten letzten drei Monate April bis Juni gegenüber den drei Monaten davor (Januar bis März) beträgt für den saisonbereinigten Produktionsindex -0,4 %, die Diagnose lautet demnach: **Stillstand der Industrieproduktion**.

In den **USA** ist der Abwärtstrend der Industrieproduktion anscheinend gestoppt (Wachstumsrate der letzten drei Monate gegenüber den davorliegenden Monaten 0,0 %); in **Japan** ist kein Produktionswachstum mehr zu beobachten (-0,4 % der entsprechenden Wachstumsrate).

Bezüglich der Produktion **verschiedener Güterarten** sind dabei in der Europäischen Gemeinschaft ausgeprägte Unterschiede feststellbar, wenn mit dem **2. Quartal 1990** verglichen wird. So ist für die Produktion von Verbrauchsgütern Wachstum zu beobachten, nicht zuletzt induziert durch den starken Produktionsanstieg dieser Güterart in Deutschland. Die Investitionsgüterproduktion geht dagegen zurück, hervorgerufen durch sinkende Produktion in Frankreich, Italien und dem Vereinigten Königreich. Die Veränderungsdaten der kumulierten letzten drei Monate gegenüber dem gleichen Zeitraum 1990 für EUR 12 betragen:

- 0,8 % bei Grundstoffen und Produktionsgütern,
- 1,9 % bei Investitionsgütern (Frankreich -5,2 %, Italien -5,9 %, Vereinigtes Königreich -7,2 %),
- +2,3 % bei Verbrauchsgütern (Deutschland 10,0 %).

Betrachtet man die Wachstumsrate der letzten drei Monate (April bis Juni) gegenüber den drei Monaten davor (Januar bis März), so sind für die einzelnen **Mitgliedstaaten der EG** für den saisonbereinigten Produktionsindex der gesamten Industrie zwar Unterschiede zu verzeichnen, doch deutet die generelle Tendenz auch in den einzelnen Staaten auf **Abschwung** hin: Dänemark 1,5 %, Deutschland (altes Bundesgebiet) 1,1 % [Deutschland nach der Vereinigung: 0,8 % (Schätzung Eurostat)], Griechenland 0,3 %, Frankreich -0,4 %, die Niederlande -1,2 %, Italien -1,3 %, Vereinigtes Königreich -1,3 %, Irland -2,9.

Der **Erzeugerpreisindex** weist im Juni 1991 eine jährliche Wachstumsrate von 3,2 % auf, die Erzeugerpreise steigen demnach eher etwas stärker als zu Anfang des Jahres 1991.

Luxemburg, den 09.09.1991

HINWEISE

1. SYSTEMATIK DER INDUSTRIEZWEIGE

Die in der vorliegenden Veröffentlichung ausgedruckten Indizes beziehen sich auf die Industriezweige gemäß der harmonisierten Systematik der Wirtschaftszweige in den Europäischen Gemeinschaften (NACE - Fassung von 1970) - Abteilung 1 bis 4. Im letzten Teil der Veröffentlichung befinden sich auch einige Indikatoren zu der NACE-Abteilung 5 "Baugewerbe". (Ein Auszug der Abteilungen 1 bis 4 ist als Teil des Glossars veröffentlicht.)

2. PRODUKTIONSINDIZES

2.a Der Produktionsindex mißt die mengenmäßige Entwicklung der Bruttowertschöpfung (d.h. die Entwicklung zu konstanten Preisen) in der Industrie, wobei zu bedenken ist, daß die Zusammenfassung der Produktionsbereiche bei der Indexbildung (ebenso wie die Zusammenfassung für einen bestimmten Industriezweig auf Gemeinschaftsebene) durch Gewichtung mit Hilfe der Bruttowertschöpfung erfolgt (im Prinzip zu Faktorkosten). Die Indizes werden in zwei Etappen berichtigt: eine erste Berichtigung wird unter Berücksichtigung der ungleichen Zahl der Arbeitstage pro Monat durchgeführt (ausgenommen Spanien und Japan). Daran anschließend erfolgt für EUR-12 und die Mitgliedstaaten eine Saisonbereinigung aufgrund eines EUROSTAT-Verfahrens (mit Ausnahme des Vereinigten Königreichs und Irlands, für die die Indizes durch das nationale statistische Amt saisonbereinigt werden).

2.b Bedeutung von %A und %B:

Arbeitstäglich bereinigte Produktionsindizes:

- %A: die letzten 12 Monate gegenüber den vorhergehenden 12 Monaten;
- %B: letzte 3 Monate gegenüber dem entsprechenden Vorjahreszeitraum.

Saisonbereinigte Produktionsindizes:

- %A: die letzten 3 Monate gegenüber den vorhergehenden 3 Monaten;
- %B: der letzte Monat gegenüber dem Vormonat.

2.c Die Ausführungen zu 2.a und 2.b gelten auch für die Produktionsindizes des Baugewerbes.

2.d Die Produktionsindizes von Drittländern (USA und Japan) entstammen OECD-Quellen: ihre Nomenklatur sowie ihre Berechnungsweise und Saisonbereinigung entsprechen der Methodik der Quelle. Wurde jedoch die Serie durch die OECD nicht saisonbereinigt, so ist die Saisonbereinigung mit Hilfe der EUROSTAT-Methode durchgeführt worden.

3. ARBEITSTÄGLICHE BEREINIGUNG

Im Gegensatz zum Produktionsindex (siehe 2.a) werden die übrigen Indizes (Umsatz, Auftragseingang, Ein- und Ausfuhr, abhängig Beschäftigte, Bruttolöhne und -gehälter) vor Saisonbereinigung nicht in bezug auf die ungleiche Zahl der Arbeitstage berichtigt.

4. UMSATZ- UND AUFTRAGSEINGANGSINDIZES

Diese Indizes erfassen die Entwicklung des Umsatzes (Gesamtabsatz einschließlich Exportabsatz) bzw. des Auftragseingangs zu laufenden Werten. Für Griechenland, Spanien und Portugal werden zur Zeit keine Umsatzindizes geliefert. Der Auftragseingangindex wird darüber hinaus auch von Frankreich nicht berechnet.

5. ERZEUGERPREISINDEX DER INDUSTRIELLEN PRODUKTION

Dieser Index erfaßt (in der Landeswährung der einzelnen Staaten) die Entwicklung der Verkaufspreise ab Werk für alle Erzeugnisse, die auf den Inlandsmärkten der Mitgliedsstaaten verkauft werden. Die Indizes für die Gemeinschaft (EUR-11, Portugal verfügt zur Zeit über keine Erzeugerpreisindizes) beziehen sich auf die gewichtete Gesamtheit dieser Preisentwicklung.

Die Erzeugerpreisindizes für die einzelnen Mitgliedsstaaten (und die Gemeinschaft) werden auch in ECU angegeben. Hierzu werden die nationalen Indizes mit dem jeweiligen für diesen Monat geltenden Wechselkurs gegenüber dem ECU multipliziert und neu auf 1985 = 100 umbasiert.

6. INDIZES DER ABHÄNGIG BESCHÄFTIGTEN SOWIE DER BRUTTOLÖHNE UND -GEHÄLTER

Die Beschäftigtenzahlen umfassen sämtliche beschäftigte Personen (auf der Lohnliste stehende Arbeiter und Angestellte). Die Bruttolöhne und -gehälter umfassen die Zahlungen an alle Arbeitslohnempfänger einschließlich der auf die Beschäftigten entfallenden und vom Arbeitgeber einbehaltenen Steuern und Sozialabgaben, jedoch ohne die Arbeitgeberbeiträge zur Sozialversicherung sowie sonstige vom Arbeitgeber zu zahlende Beiträge.

7. SCHAUBILDER

Die Schaubilder zeigen jeweils elektronisch errechnete Trends, d.h. stark geglättete saisonbereinigte Werte, um Extremwerte zu unterdrücken; die vierteljährlichen Beschäftigungsindizes werden mit Hilfe linearer Interpolation auf Monatsbasis umgerechnet. Der Maßstab der Schaubilder ist halb-logarithmisch.

8. WEITERE METHODISCHE ERLÄUTERUNGEN

Genauere Angaben bezüglich der Definitionen einzelner Indikatoren und der angewandten Methodologie können einer aktualisierten Fassung der "Methodologie der Konjunkturindikatoren" von 1991 entnommen werden.

COMMENTARY

Stagnation of industrial production in first half of 1991

In the first six months of 1991 industrial production in the European Community remained **broadly unchanged**. There are no signs that the recession is nearing its end. The **production index** for EUR 12 in June 1991, adjusted for the number of working days, is estimated at 117.8 (1985 = 100), a change of 0.7% compared with June 1990. The seasonally adjusted index for June was 115.3%, compared with 115.9% in January. The seasonally adjusted production index fell by 0.4% between the first and second quarters of 1991. There has therefore been a **stagnation of industrial production**.

In the **USA**, the downward trend in industrial production seems to have been halted (quarter-on-quarter growth rate of 0.0%), whereas in **Japan** production does not grow any longer (-0.4% over the same period).

There are wide differences in the production of **various types of goods** in the European Community compared with the **2nd quarter of 1990**: the production of consumer goods grew, not least because of the considerable increase in production in Germany, whereas the production of capital goods fell in the wake of a decline in France, Italy and the United Kingdom. The cumulative rates of change between the second quarters of 1990 and 1991 for EUR 12 were:

- 0.8% for commodities and intermediate goods;
- 1.9% for capital goods (France: -5.2%, Italy: -5.9%, UK: -7.2%);
- +2.3% for consumer goods (Germany: +10%).

A comparison of changes of the last three months (April to June) with the preceding three months (January to March) in the seasonally adjusted production indices for all industries reveals some differences between individual **Member States of the EC**, but the overall trend is one of **downturn**: Denmark: +1.5%, Germany (pre-unification FRG): +1.1% [post-unification FRG: 0.8% (Eurostat estimate)], Greece: +0.3%, France: -0.4%, the Netherlands: -1.2%, Italy: -1.3%, UK: -1.3%, Ireland: -2.9%.

The **producer price index** for June 1991 rose by 3.2% on a year-on-year basis, which means that producer prices are rising somewhat faster than at the beginning of the year.

Luxembourg, 09.09.1991

NOTES

EN

1. CLASSIFICATION OF INDUSTRIAL ACTIVITIES

The indices in this bulletin cover industry as it is defined in Divisions 1 to 4 of the General Industrial Classification of Economic Activities within the European Communities (NACE - 1970 version). In the last part of the bulletin there are also some indicators relating to NACE Division 5, "Building and civil engineering". (Divisions 1 to 4 of the NACE have been reproduced as part of the glossary.)

2. INDICES OF PRODUCTION

2.a The index of production measures changes in the volume (at constant prices) of the gross value added created by industry, the branch indices being aggregated (like the aggregation at Community level for a given industrial branch) by means of a system of weighing according to gross value added (in principle, at factor cost). The indices are adjusted in two stages: firstly to take account of the varying number of working days in the month (except for Spain and Japan) and secondly by seasonal adjustment according to Eurostat's own method for EUR 12 and the Member States (with the exception of the United Kingdom and Ireland, the indices for which are adjusted by the national statistical offices).

2.b Meaning of %A and %B:

Indices of production adjusted by the number of working days:

● %A: the last twelve months as compared with the preceding twelve months;

● %B: the last three months as compared with the corresponding months of the previous year.

Seasonally adjusted indices of production:

● %A: the last three months as compared with the preceding three months;

● %B: the last month as compared with the month before that.

2.c The descriptions and definitions in 2.a and 2.b above also apply to the indices of production for building and civil engineering.

2.d The indices of production for non-Member States (the United States and Japan) are taken from OECD sources: they have been classified, calculated and seasonally adjusted as in the source publication. Any series not seasonally adjusted by the OECD is adjusted by the Eurostat method.

3. ADJUSTMENT FOR NUMBER OF WORKING DAYS

Unlike the index of production (see 2.a above), the other indices (turnover, orders received, imports, exports, number of employees, gross wages and salaries) are not adjusted to allow for differences in the number of working days in each period before they are seasonally adjusted.

4. INDICES OF TURNOVER AND ORDERS RECEIVED

These reflect changes in turnover (overall sales, including sales for export) and orders received at current prices. No turnover indices are supplied at present for Greece, Spain or Portugal, and France does not calculate any index of orders received.

5. INDEX OF PRODUCER PRICES OF INDUSTRIAL PRODUCTION

This index shows (in the national currency of the Member State in question) changes in the ex-works selling prices of all products sold on the domestic markets of the various countries. The Community indices (EUR 11, since there are no producer price indices for Portugal) refer to overall weighted price changes.

The producer price indices for the individual Member States (and the Community) are shown in ecus as well. The national indices are multiplied by the exchange rate for the national currency against the ecu for the month in question and rebased to 1985 = 100.

6. INDICES OF THE NUMBER OF EMPLOYEES AND OF GROSS WAGES AND SALARIES

Figures showing the number of employees include all persons employed by the firm (manual workers and salaried employees on the firm's payroll). Gross wages and salaries cover all payments to persons employed by the firm in remuneration for the work they do, including taxes and social security contributions payable by employees and deducted by the employer, but excluding social security and other contributions payable by the employer.

7. GRAPHS

The graphs show electronically derived trends, i.e. strongly smoothed seasonally adjusted series in order to offset extreme values; in the case of quarterly employment, a monthly series is obtained by linear interpolation. The graphs are on a semi-logarithmic scale.

8. FURTHER EXPLANATIONS ON METHODOLOGY

Further details on the definitions of the various indicators and the methodology used are given in the updated version of the "Methodology of Short-Term Indicators" 1991.

COMMENTAIRE

Stagnation de la production industrielle au cours du premier semestre 1991

Au cours des six premiers mois de 1991, la production industrielle de la Communauté européenne est restée au même niveau et aucun signe ne semble annoncer que la fin de la récession est proche. Pour juin 1991, l'indice de production corrigé du nombre de jours ouvrables est actuellement estimé pour EUR 12 à 117,8 (1985=100), ce qui correspond à une variation de 0,7% de l'indice par rapport à juin 1990. Après correction des variations saisonnières, l'indice estimé est de 115,3% en juin contre 115,9% en janvier. Pour les trois derniers mois (avril, mai, juin) par rapport aux trois mois précédents (janvier, février, mars), le taux d'accroissement cumulé de l'indice désaisonnalisé de la production est de -0,4% et le diagnostic est donc: **stagnation de la production industrielle.**

Aux **Etats-Unis**, la tendance à la baisse de la production industrielle semble être arrêtée (taux d'accroissement des trois derniers mois par rapport aux mois précédents 0,0%) tandis qu'au **Japon**, la production n'a plus augmenté (-0,4%).

En ce qui concerne la production des différents types de produits dans la Communauté européenne, des différences marquées apparaissent par rapport au deuxième trimestre 1990. Par exemple, pour la production de biens de consommation, la tendance est à la hausse, notamment en raison de la forte augmentation de la production de ces biens en Allemagne. En revanche, la production de biens d'investissement est en régression en raison d'une baisse de production en France, en Italie et au Royaume-Uni. Les taux de variation cumulés des trois derniers mois par rapport à la même période 1990 sont les suivants:

- 0,8% pour les matières premières et les biens de production,
- 1,9% pour les biens d'investissement (France -5,2%, Italie -5,9%, Royaume-Uni -7,2%),
- +2,3% pour les biens de consommation (Allemagne 10,0%).

Si l'on compare les taux d'accroissement des trois derniers mois (avril, mai, juin) par rapport aux trois mois précédents (janvier, février, mars), des différences apparaissent entre les différents Etats membres de la CE pour l'indice désaisonnalisé de la production de l'ensemble de l'industrie, mais la tendance générale dans les différents Etats est au **fléchissement**: Danemark 1,5%, Allemagne (ancienne RFA) 1,1% [Allemagne après l'unification: 0,8% (estimation Eurostat)], Grèce 0,3%, France -0,4%, Pays-Bas -1,2%, Italie 1,3%, Royaume-Uni -1,3%, Irlande -2,9%.

L'indice des prix à la production accuse en juin 1991, un taux d'accroissement annuel de 3,2%, les prix à la production augmentent donc un peu plus fortement qu'au début de l'année 1991.

NOTES

1. NOMENCLATURE D'ACTIVITES INDUSTRIELLES

Les indices repris dans la présente publication portent sur les activités industrielles telles que définies dans la Nomenclature générale des activités économiques dans les Communautés européennes (NACE - version de 1970) aux divisions 1 à 4. Dans la dernière partie de la présente publication, on trouvera également quelques indicateurs relatifs à la division 5 "Bâtiment et génie civil" de la NACE (un extrait de la NACE 1 à 4 est repris dans le glossarium).

2. INDICES DE PRODUCTION

2.a L'indice de production mesure l'évolution en volume (à prix constants) de la valeur ajoutée brute générée dans l'industrie, l'agrégation des indices de branches (comme l'agrégation au niveau communautaire pour une branche donnée) étant effectuée par pondération à l'aide de la valeur ajoutée brute (en principe au coût des facteurs). Les indices sont corrigés en deux étapes. Une première correction est effectuée pour tenir compte des différences en matière de nombre de jours ouvrables par mois (sauf pour l'Espagne et le Japon). La deuxième étape consiste, selon une méthode propre à Eurostat, à corriger des variations saisonnières les séries pour EUR-12 et pour les Etats membres (à l'exception du Royaume-Uni et de l'Irlande, dont les indices sont désaisonnalisés par les offices statistiques nationaux).

2.b Signification des %A et des %B

Indices de production après correction pour jours ouvrables:

- %A: les 12 derniers mois par rapport aux 12 mois précédents;
- %B: les 3 derniers mois par rapport aux mois correspondants de l'année précédente.

Indices de production désaisonnalisés:

- %A: les 3 derniers mois par rapport aux 3 mois précédents;
- %B: le dernier mois par rapport au mois précédent.

2.c Les explications données sous 2.a et 2.b ci-dessus s'appliquent également aux indices de production pour le bâtiment et le génie civil.

2.d Les indices de production de pays tiers (Etats-Unis et Japon) proviennent de source OCDE. Leur nomenclature, la méthode d'établissement et le mode de désaisonnalisation suivent ceux de la source. Toutefois, si la série n'est pas désaisonnalisée par l'OCDE, elle l'est selon la méthode Eurostat.

3. CORRECTION POUR JOURS OUVRABLES

Contrairement à l'indice de production (voir 2.a), les autres indices (chiffre d'affaires, entrées de commande, importations et exportations, nombre de salariés, salaires et traitement bruts) ne subissent pas - avant la désaisonnalisation - de corrections pour les différences constatées en matière de nombre de jours ouvrables.

4. INDICES DU CHIFFRE D'AFFAIRES ET DES ENTREES DE COMMANDES

Ces indices rendent compte de l'évolution du chiffre d'affaires (ventes totales, y compris les ventes à l'exportation) et des entrées de commandes en valeur courante. Aucun indice du chiffre d'affaires n'est disponible actuellement pour la Grèce, l'Espagne et le Portugal. La France ne calcule pas non plus cet indice.

5. INDICE DES PRIX A LA PRODUCTION INDUSTRIELLE

Cet indice rend compte (dans la monnaie nationale de l'Etat membre concerné) de l'évolution des prix de vente départ-usine de tous les produits qui sont vendus sur les marchés intérieurs des Etats membres. L'indice communautaire (EUR-11, le Portugal ne calculant pas actuellement d'indices des prix à la production) est une moyenne pondérée des différents indices nationaux.

Les indices des prix à la production des différents Etats membres (et de la Communauté) sont également indiqués en écus. A cet effet, les indices nationaux sont multipliés chaque mois par le taux de change de la monnaie nationale vis-à-vis de l'écu et convertis en base 1985 = 100.

6. INDICES DU NOMBRE DE SALARIES ET DES SALAIRES ET TRAITEMENTS BRUTS

Le nombre de salariés inclut l'ensemble des personnes occupées (ouvriers et employés) figurant sur la feuille de paie. Les salaires et traitements bruts portent sur les sommes versées à tous les salariés en rémunération de leur travail, y compris les impôts et cotisations de sécurité sociale dus par ceux-ci et retenus par l'employeur, mais à l'exclusion des cotisations de sécurité sociale et autres supportées par l'employeur.

7. GRAPHIQUES

Les graphiques présentent toujours des tendances calculées par moyen électronique, c'est-à-dire des séries désaisonnalisées fortement lissées, pour éliminer les valeurs extrêmes. Les indices de l'emploi - dont la fréquence est trimestrielle - sont mensualisés par interpolation linéaire. Les échelles des graphiques sont semi-logarithmiques.

8. AUTRES EXPLICATIONS METHODOLOGIQUES

Des informations plus détaillées au sujet des définitions des différents indicateurs et de la méthodologie appliquée peuvent être obtenues dans la version actualisée (1991) de la "Méthodologie des indicateurs conjoncturels".

Regelmäßig herausgegebene Veröffentlichungen des Statistischen Amtes zum Thema Industrie

– Industriekonjunktur – Monatliche Statistiken und Beilagen

Diese Veröffentlichung enthält die Indizes von industrieller Produktion, Umsatz, Auftragseingang, abhängig Beschäftigten, Löhnen und Gehältern, nach Industriezweigen, ferner Indizes des Werts von Ein- und Ausfuhren. Ein separates kurzes Kapitel ist den Konjunkturindikatoren für das Baugewerbe vorbehalten.

Beilagen mit Angaben zur Methodik und/oder mit retrospektiven Reihen vervollständigen die laufende Veröffentlichung.
Abonnement (VUI): ECU 59

– Industrielle Produktion – Vierteljährliche Statistiken

Statistische Daten über die industrielle Produktion nach Erzeugnissen. Jährliche und vierteljährliche Angaben über die Produktion von industriellen Erzeugnissen in den Mitgliedstaaten der EG.

Abonnement (VGI): ECU 38

– Industrie – Statistisches Jahrbuch

Diese Veröffentlichung enthält eine Auswahl der wichtigsten statistischen Angaben über die Industrie (Struktur, Tätigkeit, Investitionen, nach Unternehmensgröße, industrielle Erzeugnisse, Konjunkturindikatoren und Außenhandel), ferner vergleichbare Tabellen für die EG, die Vereinigten Staaten und Japan sowie Tabellen über die Industrie in Spanien und Portugal.

Preis: ECU 32

– Struktur und Tätigkeit der Industrie – Jahresehebung – Wichtigste Ergebnisse

Diese Veröffentlichung enthält die wichtigsten Ergebnisse der von den Mitgliedstaaten in Übereinstimmung mit einer Ratsrichtlinie vom 6. Juni 1972 durchgeführten koordinierten Jahresehebung über die Tätigkeit der Industrie. Sie weist jährlich die Angaben über die wichtigsten wirtschaftlichen Tatbestände dieser Erhebung (Beschäftigung, Produktionswert, Wertschöpfung usw.) aus.

Preis: ECU 21

– Struktur und Tätigkeit der Industrie – Ergebnisse nach Unternehmensgröße

Dieser Band, der alle zwei Jahre herausgegeben wird, enthält die Ergebnisse der koordinierten Jahresehebung über die Tätigkeit der Industrie für die fünf wichtigsten Tatbestände, gegliedert nach drei Größenklassen von Unternehmen.

Preis: ECU 11

Die aufgeführten Veröffentlichungen sind auch bei den auf der dritten Umschlagseite aufgeführten Vertriebsbüros erhältlich.

The periodicals of the Statistical Office on industry

- Industrial trends – Monthly statistics and supplements

This publication contains the indices of industrial production, turnover, orders received, number of employees, gross wages and salaries by branch of industry as well as indices of the value of imports and exports. A special chapter is devoted to indicators for the building and civil engineering sector.

Supplements on methodology and/or containing retrospective series complete the ordinary publication.

Subscription (VUI): ECU 59

- Industrial production – Quarterly statistics

Statistics of industrial production by product. Annual and quarterly data on production of industrial products in the Member States of the EC.

Subscription (VGI): ECU 38

- Industry – Statistical yearbook

This publication contains a selection of the most important statistics about industry concerning structure, activity, investments, size of enterprises, industrial products, short-term indicators and external trade as well as comparative tables between the EC, United States and Japan and tables about the industry in Spain and Portugal.

Price: ECU 32

- Structure and activity of industry – Annual inquiry – Main results

This publication contains the main results of the coordinated annual inquiry into industrial activity, carried out by the Member States pursuant to a Council Directive of 6 June 1972. It gives annually the results for the most important economic variables of this inquiry: employment, production value, value-added, etc.

Price: ECU 21

- Structure and activity of industry – Data by size of enterprise

This volume, which is published every two years, gives the results of the coordinated annual inquiry into industry for the five most important variables by three classes of size of enterprise.

Price: ECU 11

Les périodiques de l'Office statistique sur l'industrie

– Conjoncture industrielle – Statistiques mensuelles et suppléments

Cette publication contient les indices de production industrielle, chiffre d'affaires, entrées de commandes des personnes employées, des salaires et des traitements par branche industrielle ainsi que des indices de valeur des importations et des exportations. Un bref chapitre est réservé aux indicateurs conjoncturels du secteur du bâtiment et du génie civil.

Des **suppléments** de caractère méthodologique et/ou contenant des séries rétrospectives complètent la publication courante.

Abonnement (VUI): ECU 59

– Production industrielle – Statistiques trimestrielles

Statistiques de la production industrielle par produit. Données annuelles et trimestrielles sur la production des produits industriels dans les États membres des CE.

Abonnement (VGI): ECU 38

– Industrie – Annuaire statistique

La publication contient une sélection des principales statistiques industrielles: structure, activités, investissements, taille des entreprises, produits industriels, indicateurs conjoncturels et commerce extérieur ainsi que des tableaux comparatifs entre la CE, les États-Unis et le Japon et des tableaux sur l'industrie.

Prix: ECU 32

– Structure et activité de l'industrie – Enquête annuelle – Principaux résultats

Cette publication comporte les principaux résultats de l'enquête annuelle coordonnée sur l'activité industrielle, exécutée par les États membres en conformité d'une directive du Conseil du 6 juin 1972. Elle donne annuellement les résultats pour les variables économiques les plus importantes de cette enquête: emploi, valeur de la production, valeur ajoutée, etc.

Prix: ECU 21

– Structure et activité de l'industrie – Données selon la taille des entreprises

Dans ce volume qui paraît à un rythme bisannuel, les résultats de l'enquête annuelle coordonnée sur l'activité de l'industrie sont ventilés pour cinq variables importantes, selon trois classes de taille des entreprises.

Prix: ECU 11
