3 □ 1992

Eurostat hat die Aufgabe, den Informationsbedarf der Kommission und aller am Aufbau des Binnenmarktes Beteiligten mit Hilfe des europäischen statistischen Systems zu decken.

Um der Öffentlichkeit die große Menge an verfügbaren Daten zugänglich zu machen und Benutzern die Orientierung zu erleichtern, werden zwei Arten von Publikationen angeboten: Statistische Dokumente und Veröffentlichungen.

Statistische Dokumente sind für den Fachmann konzipiert und enthalten das ausführliche Datenmaterial: Bezugsdaten, bei denen die Konzepte allgemein bekannt, standardisiert und wissenschaftlich fundiert sind. Diese Daten werden in einer sehr tiefen Gliederung dargeboten. Die Statistischen Dokumente wenden sich an Fachleute, die in der Lage sind, selbständig die benötigten Daten aus der Fülle des dargebotenen Materials auszuwählen. Diese Daten sind in gedruckter Form und/oder auf Diskette, Magnetband, CD-ROM verfügbar. Statistische Dokumente unterscheiden sich auch optisch von anderen Veröffentlichungen durch den mit einer stilisierten Graphik versehenen weißen Einband.

Die zweite Publikationsart, die Veröffentlichungen, wenden sich an eine ganz bestimmte Zielgruppe, wie zum Beispiel an den Bildungsbereich oder an Entscheidungsträger in Politik und Verwaltung. Sie enthalten ausgewählte und auf die Bedürfnisse einer Zielgruppe abgestellte und kommentierte Informationen. Eurostat übernimmt hier also eine Art Beraterrolle.

Für einen breiteren Benutzerkreis gibt Eurostat Jahrbücher und periodische Veröffentlichungen heraus. Diese enthalten statistische Ergebnisse für eine erste Analyse sowie Hinweise auf weiteres Datenmaterial für vertiefende Untersuchungen. Diese Veröffentlichungen werden in gedruckter Form und in Datenbanken angeboten, die in Menütechnik zugänglich sind.

Um Benutzern die Datensuche zu erleichtern, hat Eurostat Themenkreise, d. h. eine Untergliederung nach Sachgebieten, eingeführt. Daneben sind sowohl die Statistischen Dokumente als auch die Veröffentlichungen in bestimmte Reihen, wie zum Beispiel „Jahrbücher“, „Konjunktur“, „Methoden“, untergliedert, um den Zugriff auf die statistischen Informationen zu erleichtern.

Y. Franchet  
Generaldirektor

It is Eurostat's responsibility to use the European statistical system to meet the requirements of the Commission and all parties involved in the development of the single market.

To ensure that the vast quantity of accessible data is made widely available, and to help each user make proper use of this information, Eurostat has set up two main categories of document: statistical documents and publications.

The statistical document is aimed at specialists and provides the most complete sets of data: reference data where the methodology is well established, standardized, uniform and scientific. These data are presented in great detail. The statistical document is intended for experts who are capable of using their own means to seek out what they require. The information is provided on paper and/or on diskette, magnetic tape, CD-ROM. The white cover sheet bears a stylized motif which distinguishes the statistical document from other publications.

The publications proper tend to be compiled for a well-defined and targeted public, such as educational circles or political and administrative decision-makers. The information in these documents is selected, sorted and annotated to suit the target public. In this instance, therefore, Eurostat works in an advisory capacity.

Where the readership is wider and less well defined, Eurostat provides the information required for an initial analysis, such as yearbooks and periodicals which contain data permitting more in-depth studies. These publications are available on paper or in Videotext databases.

To help the user focus his research, Eurostat has created 'themes', i.e. a subject classification. The statistical documents and publications are listed by series: e.g. yearbooks, short-term trends or methodology in order to facilitate access to the statistical data.

Y. Franchet  
Director-General

Pour établir, évaluer ou apprécier les différentes politiques communautaires, la Commission des Communautés européennes a besoin d'informations.

Eurostat a pour mission, à travers le système statistique européen, de répondre aux besoins de la Commission et de l'ensemble des personnes impliquées dans le développement du marché unique.

Pour mettre à la disposition de tous l'importante quantité de données accessibles et faire en sorte que chacun puisse s'orienter correctement dans cet ensemble, deux grandes catégories de documents ont été créées: les documents statistiques et les publications.

Le document statistique s'adresse aux spécialistes. Il fournit les données les plus complètes: données de référence où la méthodologie est bien connue, standardisée, normalisée et scientifique. Ces données sont présentées à un niveau très détaillé. Le document statistique est destiné aux experts capables de rechercher, par leurs propres moyens, les données requises. Les informations sont alors disponibles sur papier et/ou sur disquette, bande magnétique, CD-ROM. La couverture blanche ornée d'un graphisme stylisé démarque le document statistique des autres publications.

Les publications proprement dites peuvent, elles, être réalisées pour un public bien déterminé, ciblé, par exemple l'enseignement ou les décideurs politiques ou administratifs. Des informations sélectionnées, triées et commentées en fonction de ce public lui sont apportées. Eurostat joue, dès lors, le rôle de conseiller.

Dans le cas d'un public plus large, moins défini, Eurostat procure des éléments nécessaires à une première analyse, les annuaires et les périodiques, dans lesquels figurent les renseignements adéquats pour approfondir l'étude. Ces publications sont présentées sur papier ou dans des banques de données de type vidéotex.

Pour aider l'utilisateur à s'orienter dans ses recherches, Eurostat a créé les thèmes, c'est-à-dire une classification par sujet. Les documents statistiques et les publications sont répertoriés par série — par exemple, annuaire, conjoncture, méthodologie — afin de faciliter l'accès aux informations statistiques.

## KOMMENTAR

### Abschwung jetzt auch in Deutschland

Im Dezember 1991 zeigte die Industrieproduktion der Europäischen Gemeinschaft (EUR12) kein Anzeichen einer Erholung, im Gegenteil, auch in Deutschland (West), das als grösstes Mitgliedsland 28 Prozent der EG Produktion erstellt, setzte nun Stagnation ein. Der arbeitstäglich bereinigte **Produktionsindex** wird für Dezember für EUR12 derzeit auf 112,0 geschätzt (1985=100). Dies entspricht einer Wachstumsrate des Index gegenüber Dezember 1990 von -1,1 %. Nach **Saisonbereinigung** beträgt der geschätzte Index im Dezember 1991 112,9, im Vormonat war er bei 114,8. Verglichen mit dem kumulierten Wert des dritten Quartals **stieg die saisonbereinigte EUR12 Produktion** im vierten Quartal 1991 um 0,2 % (Investitionsgüterindustrie -1,1 %) für die einzelnen **Mitgliedstaaten der EG** betragen (soweit verfügbar) die entsprechenden Wachstumsraten des vierten Quartals 1991 gegenüber dem dritten Quartal: Niederlande 3,6 %, Irland 2,2 % (geschätzt), Frankreich 0,7 %, Italien 0,4 %, Luxemburg -0,1 % (geschätzt), Vereinigtes Königreich -0,2 %, Deutschland (West) -1,0 %, Dänemark -3,3 %. **Die Stagnation der Industrieproduktion setzt sich somit fort.**

In den **USA** stagniert nach wie vor die Industrieproduktion bei -0,1 % (Wachstumsrate des vierten gegenüber dem dritten Quartal); in **Japan** ist mit -0,8 % ein Abschwung der Industrieproduktion zu beobachten.

Die industriellen **Erzeugerpreise** steigen zur Zeit (Dezember 1991) in der Europäischen Gemeinschaft nur noch mit einer Jahresrate von 2,1 %. Dies ist weniger als zum gleichen Zeitraum ein Jahr zuvor. Etwaige Folgen des letzten Nahost-Krieges sind damit mittlerweile vererbt.

. . .

Zur Zeit wird die **Jahreswachstumsrate** 1991 gegenüber 1990 für die **Industrieproduktion** (NACE 1-4) für die einzelnen Mitgliedsstaaten und die EG wie folgt angegeben: **EUR12: -0,3 %**, Irland +3,8 %, Niederlande +3,7 %, Deutschland +2,8 %, Dänemark +2,0 %, Luxemburg 0,4 %, Spanien -0,2 %, Frankreich -0,7 %, Italien -2,1 %, Vereinigtes Königreich -2,9 %.

Die Grafiken auf den Seiten 40 und 41 zeigen für die vier grossen Mitgliedsstaaten das differenzierte Bild der Wachstumsraten der Produktion 1991 in verschiedenen Industriebranchen. Dabei zeigt sich, dass in den einzelnen Ländern die Entwicklungen teilweise sehr unterschiedlich waren: Die Holzverarbeitende Industrie beispielsweise boomte in Deutschland, während im Vereinigten Königreich die Produktion deutlich sank. Ähnliches gilt für die Papierindustrie. Die chemische Industrie stagnierte dagegen in allen vier grossen EG Mitgliedsstaaten, während die Kunststoff- und Gummiindustrie in Deutschland und Frankreich eher positive Zuwachsraten zeigte. Besondere Zeichen eines Abschwungs sind für Italien und das Vereinigte Königreich im Bereich der Metallerzeugnisse und des Maschinenbaus zu beobachten. Die Elektroindustrie und die Automobilbranche dagegen zeigen für alle Mitgliedsstaaten eher Abschwung bzw. Stagnation an. Dies gilt auch für die Textil- und die Schuhindustrie. Im Bekleidungsgebiet zeigt vor allem das Vereinigte Königreich starke Einbrüche in 1991.

Luxemburg, 12.03.1992

# HINWEISE

## 1. SYSTEMATIK DER INDUSTRIEZWEIGE

Die in der vorliegenden Veröffentlichung ausgedruckten Indizes beziehen sich auf die Industriezweige gemäß der harmonisierten Systematik der Wirtschaftszweige in den Europäischen Gemeinschaften (NACE - Fassung von 1970) - Abteilung 1 bis 4. Im letzten Teil der Veröffentlichung befinden sich auch einige Indikatoren zu der NACE-Abteilung 5 "Baugewerbe". (Ein Auszug der Abteilungen 1 bis 4 ist als Teil des Glossars veröffentlicht.)

## 2. PRODUKTIONSINDIZES

2.a Der Produktionsindex mißt die mengenmäßige Entwicklung der Bruttowertschöpfung (d.h. die Entwicklung zu konstanten Preisen) in der Industrie, wobei zu bedenken ist, daß die Zusammenfassung der Produktionsbereiche bei der Indexbildung (ebenso wie die Zusammenfassung für einen bestimmten Industriezweig auf Gemeinschaftsebene) durch Gewichtung mit Hilfe der Bruttowertschöpfung erfolgt (im Prinzip zu Faktorkosten). Die Indizes werden in zwei Etappen berichtigt: eine erste Berichtigung wird unter Berücksichtigung der ungleichen Zahl der Arbeitstage pro Monat durchgeführt (ausgenommen Spanien und Japan). Daran anschließend erfolgt für EUR 12 und neun der Mitgliedstaaten eine Saisonbereinigung aufgrund eines EUROSTAT-Verfahrens. Für Deutschland, Irland und das Vereinigte Königreich werden die Indizes durch das nationale statistische Amt saisonbereinigt.

### 2.b Bedeutung von %A und %B:

Arbeitstäglich bereinigte Produktionsindizes:

- %A: die letzten 12 Monate gegenüber den vorhergehenden 12 Monaten;
- %B: letzte 3 Monate gegenüber dem entsprechenden Vorjahreszeitraum.

Saisonbereinigte Produktionsindizes:

- %A: die letzten 3 Monate gegenüber den vorhergehenden 3 Monaten;
- %B: der letzte Monat gegenüber dem Vormonat.

2.c Die Ausführungen zu 2.a und 2.b gelten auch für die Produktionsindizes des Baugewerbes.

2.d Die Produktionsindizes von Drittländern (USA und Japan) entstammen OECD-Quellen.

## 3. ARBEITSTÄGLICHE BEREINIGUNG

Im Gegensatz zum Produktionsindex (siehe 2.a) werden die übrigen Indizes (Umsatz, Auftragseingang, Ein- und Ausfuhr, abhängig Beschäftigte, Bruttolöhne und -gehälter) vor Saisonbereinigung nicht in bezug auf die ungleiche Zahl der Arbeitstage berichtigt.

## 4. UMSATZ- UND AUFTRAGSEINGANGSINDIZES

Diese Indizes erfassen die Entwicklung des Umsatzes (Gesamtabsatz einschließlich Exportabsatz) bzw. des Auftragseingangs zu laufenden Werten. Für Griechenland, Spanien und Portugal werden zur Zeit keine Umsatzindizes geliefert. Der Auftragseingangsindex wird darüber hinaus auch von Frankreich nicht berechnet.

## 5. EIN- UND AUSFUHRINDIZES NACH INDUSTRIEZWEIGEN

Für die Ein- und Ausfuhrindizes wurden Außenhandelsdaten industrieller Erzeugnisse (gemäß der Systematik des Harmonisierten Systems) den NACE-Industriezweigen zugeordnet. Bei dieser Zuordnung sind gewisse Ungenauigkeiten unvermeidlich, die die Vergleichbarkeit der Ein- und Ausfuhrindizes mit den anderen Indikatoren begrenzen.

Alle Außenhandelsindikatoren sind von Eurostat saisonbereinigt. Die Indizes für EUR 12 geben ausschließlich den außergemeinschaftlichen Handel wieder, die Indizes der Mitgliedsstaaten auch den Außenhandel mit anderen EG Staaten.

## 6. ERZEUGERPREISINDEX DER INDUSTRIELLEN PRODUKTION

Dieser Index erfaßt (in der Landeswährung der einzelnen Staaten) die Entwicklung der Verkaufspreise ab Werk für alle Erzeugnisse, die auf den Inlandsmärkten der Mitgliedsstaaten verkauft werden. Die Indizes für die Gemeinschaft (EUR 11, Portugal verfügt zur Zeit über keine Erzeugerpreisindizes) beziehen sich auf die gewichtete Gesamtheit dieser Preisentwicklung.

Die Erzeugerpreisindizes für die einzelnen Mitgliedsstaaten (und die Gemeinschaft) werden auch in ECU angegeben. Hierzu werden die nationalen Indizes mit dem jeweiligen für diesen Monat geltenden Wechselkurs gegenüber dem ECU multipliziert und neu auf 1985 = 100 umbasiert.

## 7. INDIZES DER ABHÄNGIG BESCHÄFTIGTEN SOWIE DER BRUTTOLÖHNE UND -GEHÄLTER

Die Beschäftigtenzahlen umfassen sämtliche beschäftigte Personen (auf der Lohnliste stehende Arbeiter und Angestellte). Die Bruttolöhne und -gehälter umfassen die Zahlungen an alle Arbeitslohnempfänger einschließlich der auf die Beschäftigten entfallenden und vom Arbeitgeber einbehaltenen Steuern und Sozialabgaben, jedoch ohne die Arbeitgeberbeiträge zur Sozialversicherung sowie sonstige vom Arbeitgeber zu zahlende Beiträge.

## 8. SCHAUBILDER

Die Schaubilder zeigen jeweils elektronisch errechnete Trends, d.h. stark geglättete saisonbereinigte Werte, um Extremwerte zu unterdrücken; die vierteljährlichen Beschäftigungsindizes werden mit Hilfe linearer Interpolation auf Monatsbasis umgerechnet. Der Maßstab der Schaubilder ist halb-logarithmisch.

## 9. WEITERE METHODISCHE ERLÄUTERUNGEN

Genauere Angaben bezüglich der Definitionen einzelner Indikatoren und der angewandten Methodologie können einer aktualisierten Fassung der "Methodologie der Konjunkturindikatoren" von 1991 entnommen werden.

## COMMENTARY

### Downturn in Germany too

In December 1991 industrial output in the European Community (EUR12) showed no sign of recovery; on the contrary, it stagnated even in Germany, which as the largest Member State accounts for 28 % of EC output. The December **production index** for EUR12, adjusted for the number of working days, is currently estimated at 112.0 (1985 = 100). This represents a rate of increase of -1.1 % compared with December 1990. After **seasonal adjustment**, the estimated index stood at 112.9 in December 1991, as against 114.8 in the previous month. Compared with the cumulative figure for the third quarter, **seasonally adjusted EC output** rose by only 0.2 % (investment goods industry -1.1 %) in the fourth quarter of 1991. The corresponding rates of increase (where available) for the individual **Member States** were as follows: Netherlands 3.6 %, Ireland 2.2 % (estimated), France 0.7 %, Italy 0.4 %, Luxembourg -0.1 % (estimated), United Kingdom -0.2 %, Germany -1.0 %, Denmark -3.3 %. **Industrial output thus continues to stagnate.**

In the **USA** industrial output is still stagnating at -0.1 % (rate of increase for the fourth quarter compared with the third); in **Japan** it fell by 0.6 %.

Industrial **producer prices** in the European Community are rising at present (December 1991) at an annual rate of only 2.1 %, which is lower than in the same period of the previous year. Any effects of the recent Middle East war have thus abated in the meantime.

\*\*\*\*\*

The **annual rate of increase** (1991 compared with 1990) in **industrial output** (NACE 1-4) for the individual Member States and the EC as a whole is currently as follows: **EUR12: -0.3 %**, Ireland +3.8 %, Netherlands +3.7 %, Germany +2.8 %, Denmark +2.0 %, Luxembourg +0.4 %, Spain -0.2 %, France -0.7 %, Italy -2.1 %, United Kingdom -2.9 %.

The graphs on pages 40 and 41 show the differing rates of increase in output in 1991 in various branches of industry for the four largest Member States. It is clear that in some cases the trends differed considerably in the individual countries: for example, the timber processing industry boomed in Germany, whereas output fell sharply in the United Kingdom. The same applies to the paper industry. On the other hand, the chemical industry stagnated in all four Member States, while the plastics and rubber industry in Germany and France showed rather positive growth rates. There were definite signs of a downturn in the metal products and mechanical engineering sectors in Italy and the United Kingdom. On the other hand, the electrical engineering and car industries showed a downturn or stagnation in all four Member States, as did the textile and footwear industries. The United Kingdom in particular showed clear signs of recession in the clothing industry in 1991.

Luxembourg, 12.03.1992

# NOTES

## 1. CLASSIFICATION OF INDUSTRIAL ACTIVITIES

The indices in this bulletin cover industry as it is defined in Divisions 1 to 4 of the General Industrial Classification of Economic Activities within the European Communities (NACE - 1970 version). In the last part of the bulletin there are also some indicators relating to NACE Division 5, "Building and civil engineering". (Divisions 1 to 4 of the NACE have been reproduced as part of the glossary.)

## 2. INDICES OF PRODUCTION

2.a The index of production measures changes in the volume (at constant prices) of the gross value added created by industry, the branch indices being aggregated (like the aggregation at Community level for a given industrial branch) by means of a system of weighing according to gross value added (in principle, at factor cost). The indices are adjusted in two stages: firstly to take account of the varying number of working days in the month (except for Spain and Japan) and secondly by seasonal adjustment according to Eurostat's own method for EUR 12 and nine of the Member States. For Germany, Ireland and the United Kingdom, the indices are adjusted by the national statistical office.

### 2.b Meaning of %A and %B:

Indices of production adjusted by the number of working days:

- %A: the last twelve months as compared with the preceding twelve months;
- %B: the last three months as compared with the corresponding months of the previous year.

Seasonally adjusted indices of production:

- %A: the last three months as compared with the preceding three months;
- %B: the last month as compared with the month before that.

2.c The descriptions and definitions in 2.a and 2.b above also apply to the indices of production for building and civil engineering.

2.d The indices of production for non-Member States (the United States and Japan) are taken from OECD sources.

## 3. ADJUSTMENT FOR NUMBER OF WORKING DAYS

Unlike the index of production (see 2.a above), the other indices (turnover, orders received, imports, exports, number of employees, gross wages and salaries) are not adjusted to allow for differences in the number of working days in each period before they are seasonally adjusted.

## 4. INDICES OF TURNOVER AND ORDERS RECEIVED

These reflect changes in turnover (overall sales, including sales for export) and orders received at current prices. No turnover indices are supplied at present for Greece, Spain or Portugal, and France does not calculate any index of orders received.

## 5. INDICES OF IMPORTS AND EXPORTS BY INDUSTRIAL BRANCH

For the indices of imports and exports, foreign trade data of industrial products (following the nomenclature of the Harmonized System) were grouped according to the industrial NACE-branch to which they belong. This grouping of products causes inevitably certain inaccuracies, so that the comparability of the indices of imports and exports with other indicators is limited.

All foreign trade indices are seasonally adjusted by Eurostat. The indices for EUR 12 refer only to extra-Community trade, the indices for Member States reflect also intra-Community trade.

## 6. INDEX OF PRODUCER PRICES OF INDUSTRIAL PRODUCTION

This index shows (in the national currency of the Member State in question) changes in the ex-works selling prices of all products sold on the domestic markets of the various countries. The Community indices (EUR 11, since there are no producer price indices for Portugal) refer to overall weighted price changes.

The producer price indices for the individual Member States (and the Community) are shown in ecus as well. The national indices are multiplied by the exchange rate for the national currency against the ecu for the month in question and rebased to 1985 = 100.

## 7. INDICES OF THE NUMBER OF EMPLOYEES AND OF GROSS WAGES AND SALARIES

Figures showing the number of employees include all persons employed by the firm (manual workers and salaried employees on the firm's payroll). Gross wages and salaries cover all payments to persons employed by the firm in remuneration for the work they do, including taxes and social security contributions payable by employees and deducted by the employer, but excluding social security and other contributions payable by the employer.

## 8. GRAPHS

The graphs show electronically derived trends, i.e. strongly smoothed seasonally adjusted series in order to offset extreme values; in the case of quarterly employment, a monthly series is obtained by linear interpolation. The graphs are on a semi-logarithmic scale.

## 9. FURTHER EXPLANATIONS ON METHODOLOGY

Further details on the definitions of the various indicators and the methodology used are given in the updated version of the "Methodology of Short-Term Indicators" 1991.

## COMMENTAIRE

### La récession touche désormais l'Allemagne également

En décembre 1991, la production industrielle de la Communauté européenne (EUR12) n'a donné aucun signe de redressement, bien au contraire car la stagnation a commencé à s'installer en Allemagne (de l'ouest), le plus gros producteur de la Communauté, avec 28 % du total. L'indice de production corrigé du nombre de jours ouvrables pour le mois de décembre est donc actuellement estimé pour EUR12 à 112,0 (1985=100). Cela signifie que par rapport à décembre 1990, l'indice a enregistré une croissance négative de -1,1 %. En données corrigées des variations saisonnières l'indice était estimé en décembre 1991 à 112,9 contre 114,8 pour le mois précédent. Comparée à la valeur cumulée du troisième trimestre, la production EUR12 corrigée des variations saisonnières a augmenté de 0,2 % au cours du quatrième trimestre 1991 (industrie des biens d'investissement -1,1 %). Pour les différents Etats membres des CE, les taux de croissance (dans la mesure de leur disponibilité) du quatrième trimestre 1991 par rapport au troisième trimestre étaient les suivants : Pays-Bas 3,6 %, Irlande 2,2 % (estimation), France 0,7 %, Italie 0,4 %, Luxembourg -0,1 % (estimation), Royaume-Uni -0,2 %, Allemagne (ouest) -1,0 %, Danemark -3,3 %. On constate donc que la stagnation de la production industrielle se poursuit.

Aux Etats-Unis, la production industrielle continue toujours de stagner avec un taux de croissance en hausse de -0,1 % au cours du quatrième trimestre par rapport aux trimestres précédents et au Japon on observe une récession de la production industrielle de -0,8 %.

Les prix à la production des produits industriels n'ont augmenté pour l'instant (décembre 1991) dans la Communauté européenne que de 2,1 % en taux annuel soit moins qu'à la même période de l'année précédente. Les éventuelles conséquences de la guerre du Golfe se sont donc entre-temps estompées.

\*\*\*

Actuellement le taux annuel de croissance de 1991 par rapport à 1990 de la production industrielle (NACE 1-4) des différents Etats membres de la CE est le suivant : EUR12: -0,3 %, Irlande +3,8 %, Pays-Bas +3,7 %, Allemagne +2,8 %, Danemark +2,0 %, Luxembourg 0,4 %, Espagne -0,2 %, France -0,7 %, Italie -2,1 %, Royaume-Uni -2,9 %.

Les graphiques des pages 40 et 41 indiquent pour les quatre grands Etats membres les différences d'évolution des taux de croissance de la production en 1991 pour diverses branches d'activité industrielle. On observe que les évolutions ont parfois été très différentes d'un pays à l'autre : c'est ainsi, par exemple, que l'industrie du bois a connu une expansion en Allemagne tandis que sa production a nettement diminué au Royaume-Uni. Il en va de même pour l'industrie du papier. L'industrie chimique a par contre stagné dans chacun des quatre grands Etats membres de la CE alors que l'industrie des matières plastiques et du caoutchouc laissent apparaître des taux de croissance plutôt positifs en Allemagne et en France. Des symptômes particuliers de récession s'observent en Italie et au Royaume-Uni en ce qui concerne la métallurgie et la construction mécanique. L'industrie électrique et la construction automobile tendent plutôt vers la récession ou la stagnation dans l'ensemble des Etats membres. Il en va de même pour l'industrie textile et l'industrie de la chaussure. En ce qui concerne l'habillement, c'est principalement le Royaume-Uni qui a subi de fortes pertes en 1991.

# NOTES

## 1. NOMENCLATURE D'ACTIVITES INDUSTRIELLES

Les indices repris dans la présente publication portent sur les activités industrielles telles que définies dans la Nomenclature générale des activités économiques dans les Communautés européennes (NACE - version de 1970) aux divisions 1 à 4. Dans la dernière partie de la présente publication, on trouvera également quelques indicateurs relatifs à la division 5 "Bâtiment et génie civil" de la NACE (un extrait de la NACE 1 à 4 est repris dans le glossarium).

## 2. INDICES DE PRODUCTION

2.a L'indice de production mesure l'évolution en volume (à prix constants) de la valeur ajoutée brute générée dans l'industrie, l'agrégation des indices de branches (comme l'agrégation au niveau communautaire pour une branche donnée) étant effectuée par pondération à l'aide de la valeur ajoutée brute (en principe au coût des facteurs). Les indices sont corrigés en deux étapes. Une première correction est effectuée pour tenir compte des différences en matière de nombre de jours ouvrables par mois (sauf pour l'Espagne et le Japon). La deuxième étape consiste, selon une méthode propre à Eurostat, à corriger des variations saisonnières les séries pour EUR 12 et pour neuf des Etats membres. Pour l'Allemagne, l'Irlande et le Royaume-Uni, les indices sont désaisonnalisés par les offices statistiques nationaux.

### 2.b Signification des %A et des %B

Indices de production après correction pour jours ouvrables:

- %A: les 12 derniers mois par rapport aux 12 mois précédents;
- %B: les 3 derniers mois par rapport aux mois correspondants de l'année précédente.

Indices de production désaisonnalisés:

- %A: les 3 derniers mois par rapport aux 3 mois précédents;
- %B: le dernier mois par rapport au mois précédent.

2.c Les explications données sous 2.a et 2.b ci-dessus s'appliquent également aux indices de production pour le bâtiment et le génie civil.

2.d Les indices de production de pays tiers (Etats-Unis et Japon) proviennent de source OCDE.

## 3. CORRECTION POUR JOURS OUVRABLES

Contrairement à l'indice de production (voir 2.a), les autres indices (chiffre d'affaires, entrées de commande, importations et exportations, nombre de salariés, salaires et traitement bruts) ne subissent pas - avant la désaisonnalisation - de corrections pour les différences constatées en matière de nombre de jours ouvrables.

## 4. INDICES DU CHIFFRE D'AFFAIRES ET DES ENTREES DE COMMANDES

Ces indices rendent compte de l'évolution du chiffre d'affaires (ventes totales, y compris les ventes à l'exportation) et des entrées de commandes en valeur courante. Aucun indice du chiffre d'affaires n'est disponible actuellement pour la Grèce, l'Espagne et le Portugal. La France ne calcule pas non plus cet indice.

## 5. INDICES DES IMPORTATIONS ET EXPORTATIONS PAR BRANCHES INDUSTRIELLES

Pour les indices d'importations et d'exportations, les produits industriels (selon la nomenclature du Système Harmonisé) ont été classés selon leur appartenance aux branches industrielles de la NACE. Ce regroupement des produits cause inévitablement des imprécisions; la comparabilité des indices d'importations et d'exportations avec les autres indicateurs reste donc limitée.

Tous les indices du commerce extérieur sont désaisonnalisés par Eurostat. Les indices EUR 12 montrent seulement le commerce extra-communautaire, tandis que les indices des Etats membres reflètent aussi le commerce intra CE.

## 6. INDICE DES PRIX A LA PRODUCTION INDUSTRIELLE

Cet indice rend compte (dans la monnaie nationale de l'Etat membre concerné) de l'évolution des prix de vente départ-usine de tous les produits qui sont vendus sur les marchés intérieurs des Etats membres. L'indice communautaire (EUR 11, le Portugal ne calculant pas actuellement d'indices des prix à la production) est une moyenne pondérée des différents indices nationaux.

Les indices des prix à la production des différents Etats membres (et de la Communauté) sont également indiqués en écus. A cet effet, les indices nationaux sont multipliés chaque mois par le taux de change de la monnaie nationale vis-à-vis de l'écu et convertis en base 1985 = 100.

## 7. INDICES DU NOMBRE DE SALARIES ET DES SALAIRES ET TRAITEMENTS BRUTS

Le nombre de salariés inclut l'ensemble des personnes occupées (ouvriers et employés) figurant sur la feuille de paie. Les salaires et traitements bruts portent sur les sommes versées à tous les salariés en rémunération de leur travail, y compris les impôts et cotisations de sécurité sociale dus par ceux-ci et retenus par l'employeur, mais à l'exclusion des cotisations de sécurité sociale et autres supportées par l'employeur.

## 8. GRAPHIQUES

Les graphiques présentent toujours des tendances calculées par moyen électronique, c'est-à-dire des séries désaisonnalisées fortement lissées, pour éliminer les valeurs extrêmes. Les indices de l'emploi - dont la fréquence est trimestrielle - sont mensualisés par interpolation linéaire. Les échelles des graphiques sont semi-logarithmiques.

## 9. AUTRES EXPLICATIONS METHODOLOGIQUES

Des informations plus détaillées au sujet des définitions des différents indicateurs et de la méthodologie appliquée peuvent être obtenues dans la version actualisée (1991) de la "Méthodologie des indicateurs conjoncturels".

## Growth rate of Production 1991 compared to 1990

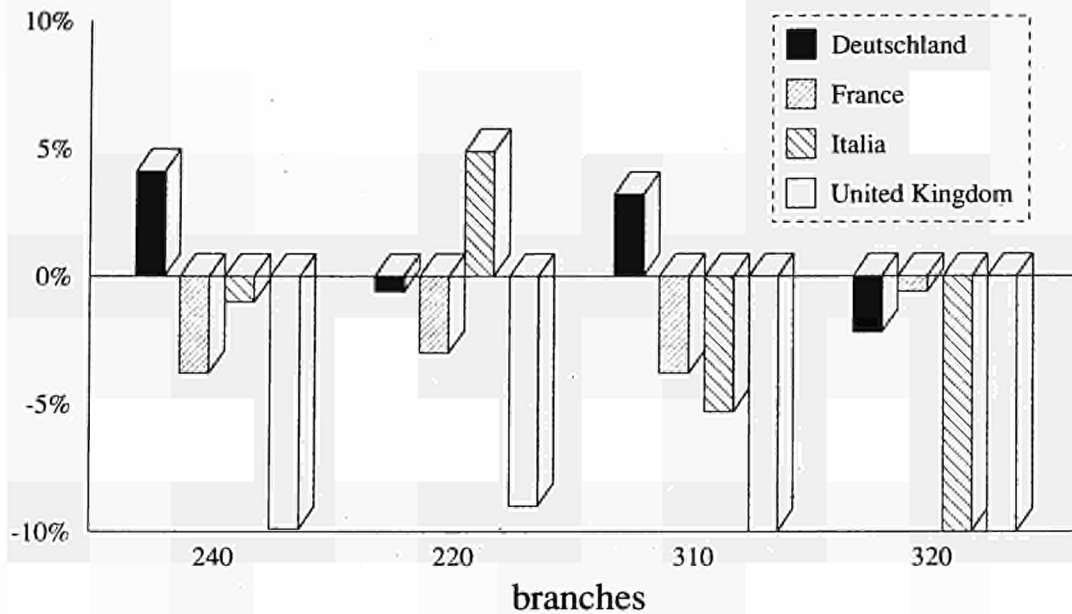

## Wachstumsrate der Produktion 1991 im Vergleich zu 1990

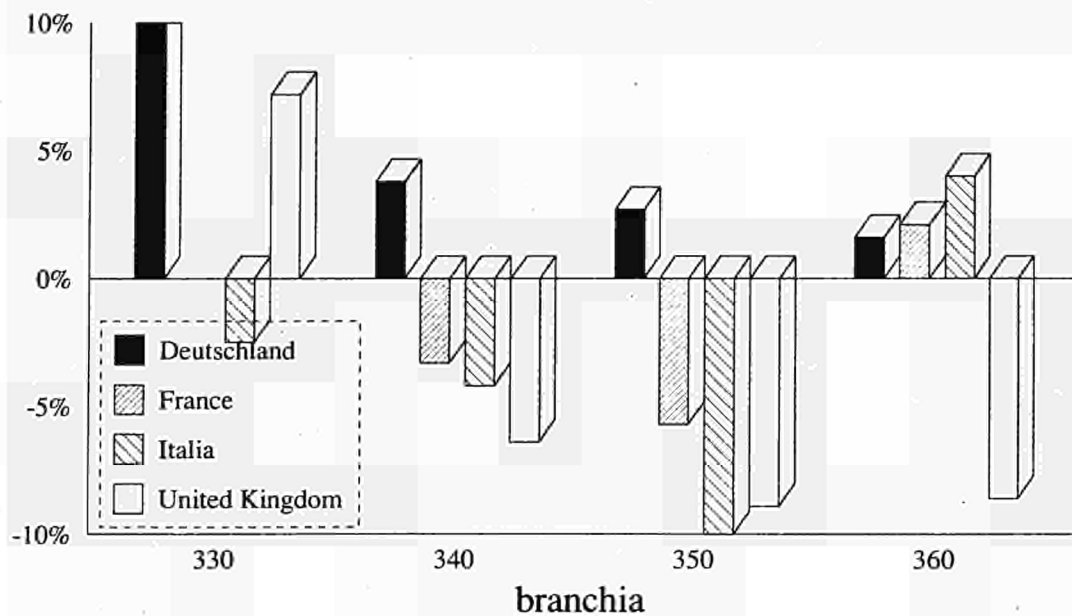

410	Nahrungs- u. Genussmittelgewerbe	Food, drink and tobacco industry	Ind. alimentaire, boissons et tabac
430	Textilindustrie	Textile industry	Industrie textile
448	Schuhindustrie	Footwear industry	Industrie de la chaussure
459	Bekleidungsindustrie	Clothing industry	Industrie de l'habillement
460	Be- und Verarbeitung von Holz	Timber and wooden furniture ind.	Ind. du bois et du meuble en bois
470	Papierind., Druckerei, Verlagsgewerbe	Paper ind., printing, publishing	Ind. du papier, imprimerie et édition
269	Chem. Industrie einschl. Chemiefasern	Chem. industry incl. man made fibre	Ind. chimique et fibres artificielles
480	Verarb. v. Gummi und Kunststoffen	Industry of rubber and plastics	Ind. caoutchouc et transf. mat. plastique

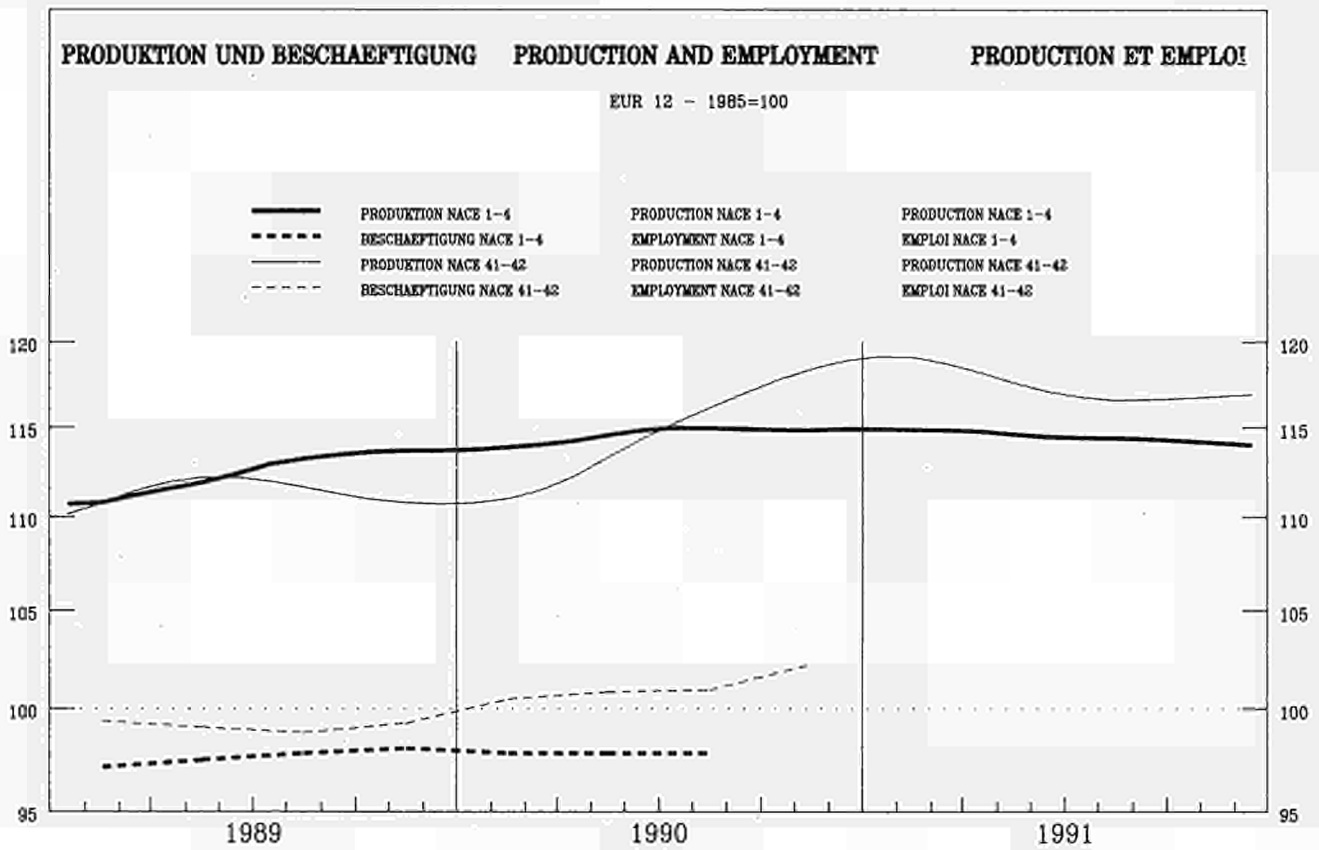

## Taux de croissance de la production 1991 comparé à 1990

## Tasso di crescita della produzione 1991 rispetto al 1990

240	Ind. Steine u. Erden, Glasindustrie	Ind. of non-metallic mineral products	Industrie des minéraux non métalliques
220	Erzeugg. u. erste Bearbeitg v. Metallen	Prod., basic processing of metals	Product., première transf. des métaux
310	Herstel. von Metallerzeugnissen	Manufact. of metallic articles	Fabrication d'ouvrages en métal
320	Maschinenbau	Mechanical engineering	Construction de machines
330	Herst. v. Büromaschinen, EDV-Geräten	Manuf. of office mach. and computers	Constr. mach. de bureau et matér. informat.
340	Elektrotechnik	Electrical engineering	Constr. électrique et électronique
350	Bau v. Kraftwagen u. Einzelteilen	Man. of motor vehicles and their parts	Constr. automobile et pièces détachées
360	Fahrzeugbau ohne Kraftwagen	Manuf. of other means of transport	Constr. matér. transport autre qu'automob.

## Regelmäßig herausgegebene Veröffentlichungen des Statistischen Amtes zum Thema Industrie

### - **Industriekonjunktur – Monatliche Statistiken und Beilagen**

Diese Veröffentlichung enthält die Indizes von industrieller Produktion, Umsatz, Auftragseingang, abhängig Beschäftigten, Löhnen und Gehältern, nach Industriezweigen, ferner Indizes des Werts von Ein- und Ausfuhren. Ein separates kurzes Kapitel ist den Konjunkturindikatoren für das Baugewerbe vorbehalten.

**Beilagen** mit Angaben zur Methodik und/oder mit retrospektiven Reihen vervollständigen die laufende Veröffentlichung.  
Abonnement (VUI): ECU 77

### - **Industrielle Produktion – Vierteljährliche Statistiken**

Statistische Daten über die industrielle Produktion nach Erzeugnissen. Jährliche und vierteljährliche Angaben über die Produktion von industriellen Erzeugnissen in den Mitgliedstaaten der EG.

Abonnement (VGI): ECU 54

### - **Struktur und Tätigkeit der Industrie – Jahreserhebung – Wichtigste Ergebnisse**

Diese Veröffentlichung enthält die wichtigsten Ergebnisse der von den Mitgliedstaaten in Übereinstimmung mit einer Ratsrichtlinie vom 6. Juni 1972 durchgeführten koordinierten Jahreserhebung über die Tätigkeit der Industrie. Sie weist jährlich die Angaben über die wichtigsten wirtschaftlichen Tatbestände dieser Erhebung (Beschäftigung, Produktionswert, Wertschöpfung usw.) aus.

Preis: ECU 25

### - **Struktur und Tätigkeit der Industrie – Ergebnisse nach Unternehmensgröße**

Dieser Band, der alle zwei Jahre herausgegeben wird, enthält die Ergebnisse der koordinierten Jahreserhebung über die Tätigkeit der Industrie für die fünf wichtigsten Tatbestände, gegliedert nach drei Größenklassen von Unternehmen.

Preis: ECU 11

## BESTELLSCHEIN

Zu senden an: **Amt für amtliche Veröffentlichungen  
der Europäischen Gemeinschaften**  
L-2985 Luxemburg

Bitte senden Sie mir .....Exemplar(e) der folgenden Veröffentlichung(en)

- Industriekonjunktur – Monatliche Statistiken und Beilagen (Abonnement)
- Industrielle Produktion – Vierteljährliche Statistiken (Abonnement)
- Struktur und Tätigkeit der Industrie – Wichtigste Ergebnisse
- Struktur und Tätigkeit der Industrie – Ergebnisse nach Unternehmensgröße

Zahlung nach Erhalt der Rechnung

Name: .....

Anschrift: .....

Datum: ..... Unterschrift: .....

Die aufgeführten Veröffentlichungen sind auch bei den auf der dritten Umschlagseite aufgeführten Vertriebsbüros erhältlich.

## The periodicals of the Statistical Office on industry

### - Industrial trends – Monthly statistics and supplements

This publication contains the indices of industrial production, turnover, orders received, number of employees, gross wages and salaries by branch of industry as well as indices of the value of imports and exports. A special chapter is devoted to indicators for the building and civil engineering sector.

**Supplements** on methodology and/or containing retrospective series complete the ordinary publication.

Subscription (VUI): ECU 77

### - Industrial production – Quarterly statistics

Statistics of industrial production by product. Annual and quarterly data on production of industrial products in the Member States of the EC.

Subscription (VGI): ECU 54

### - Structure and activity of industry – Annual inquiry – Main results

This publication contains the main results of the coordinated annual inquiry into industrial activity, carried out by the Member States pursuant to a Council Directive of 6 June 1972. It gives annually the results for the most important economic variables of this inquiry: employment, production value, value-added, etc.

Price: ECU 25

### - Structure and activity of industry – Data by size of enterprise

This volume, which is published every two years, gives the results of the coordinated annual inquiry into industry for the five most important variables by three classes of size of enterprise.

Price: ECU 11

---

## ORDER FORM

To send to: **Office for Official Publications  
of the European Communities**  
L-2985 Luxembourg

Please send me .....copy(ies)

- Subscription to industrial trends – Monthly statistics & supplements
- Subscription to industrial production – Quarterly statistics
- Structure and activity of industry – Main results
- Structure and activity of industry – Data by size of enterprise

Payment is due on receipt of invoice

Name: .....

Address: .....

Date: ..... Signature:.....

These publications are also available from the sales offices (see inside back cover).

## Les périodiques de l'Office statistique sur l'industrie

### - Conjoncture industrielle - Statistiques mensuelles et suppléments

Cette publication contient les indices de production industrielle, chiffre d'affaires, entrées de commandes des personnes employées, des salaires et des traitements par branche industrielle ainsi que des indices de valeur des importations et des exportations. Un bref chapitre est réservé aux indicateurs conjoncturels du secteur du bâtiment et du génie civil.

Des **suppléments** de caractère méthodologique et/ou contenant des séries rétrospectives complètent la publication courante.  
Abonnement (VUI): ECU 77

### - Production industrielle - Statistiques trimestrielles

Statistiques de la production industrielle par produit. Données annuelles et trimestrielles sur la production des produits industriels dans les États membres des CE.

Abonnement (VGI): ECU 54

### - Structure et activité de l'industrie - Enquête annuelle - Principaux résultats

Cette publication comporte les principaux résultats de l'enquête annuelle coordonnée sur l'activité industrielle, exécutée par les États membres en conformité d'une directive du Conseil du 6 juin 1972. Elle donne annuellement les résultats pour les variables économiques les plus importantes de cette enquête: emploi, valeur de la production, valeur ajoutée, etc.

Prix: ECU 25

### - Structure et activité de l'industrie - Données selon la taille des entreprises

Dans ce volume qui paraît à un rythme bisannuel, les résultats de l'enquête annuelle coordonnée sur l'activité de l'industrie sont ventilés pour cinq variables importantes, selon trois classes de taille des entreprises.

Prix: ECU 11

## BON DE COMMANDE

A renvoyer à: **Office des publications officielles  
des Communautés européennes**  
L-2985 Luxembourg

Veuillez m'envoyer .....copie(s)
