HINWEIS: Das SAEG erfasst eine grosse Zahl von monatlichen und jährlichen Agrarpreisreihen für die 10 Mitgliedstaaten der Gemeinschaft. Es handelt sich dabei um Verkaufspreise pflanzlicher und tierischer Produkte und Einkaufspreise landwirtschaftlicher Betriebsmittel. Diese Reihen sind in der Regel - aber nicht in jedem Falle - für den jeweiligen Mitgliedstaat repräsentativ und innerhalb der Gemeinschaft harmonisiert. Die Reihen der Verkaufspreise pflanzlicher und tierischer Produkte umfassen die Preise der wichtigsten Agrarprodukte auf der landwirtschaftlichen Erzeugerstufe sowie die Preise einiger verarbeiteter Erzeugnisse der Nahrungsmittelindustrie. Die Einkaufspreise landwirtschaftlicher Betriebsmittel beziehen sich auf die von den Landwirten bezahlten Preise für den Erwerb von Futtermitteln, Düngemitteln, Treib- und Heizstoffen, Saatgut und Pflanzenschutzmitteln. Die Preise sind in nationaler Währung und in ECU ausgedrückt und in der CRONOS-Datenbank des SAEG (Bereich "PACO") im allgemeinen für die Jahre ab 1969 gespeichert. Einzelheiten über diese in CRONOS gespeicherten Preisreihen (Liste der erfassten Produkte mit ihren Codenummern etc.) enthält das CRONOS-Handbuch "Bl PACO, Teil: Agrarpreise und Agrarpreisindizes", das auf Anfrage zur Verfügung gestellt wird.

Ab 1983 werden die monatlichen Agrarpreisreihen jeweils für die letzten zwei Jahre vierteljährlich auf Mikrofiches unter dem Titel "Agrarpreise" und eine Auswahl der wichtigsten Reihen davon (vgl. Anlage) vierteljährlich in der Form eines Schnellberichts veröffentlicht. Die jährlichen Agrarpreise werden jeweils für die letzten 12 Jahre in der jährlichen Veröffentlichungreihe "Agrarpreisstatistik" herausgebracht. Daneben steht das vorhandene Datenmaterial auch über EURONET oder auf Anfrage an das SAEG auf Magnetbändern und Computerausdrucken zur Verfügung.

Eine Neufassung der Merkmalskataloge zu den in CRONOS gespeicherten Agrarpreisreihen, in denen die preisbestimmenden Merkmale wie Produktdefinition, Handelsstufe, Handelsbedingungen etc. beschrieben werden, ist in Vorbereitung und soll im Jahr 1984 zur Verfügung stehen. Eine Kurzbeschreibung dieser preisbestimmenden Merkmale enthält das jährlich erscheinende Heft "Agrarpreisstatistik".

NOTE: The SOEC records a large number of monthly and annual agricultural price series for the 10 member States of the Community covering the selling prices of crop products, the selling prices of animal products and the purchase prices of the means of agricultural production. These series are mostly (but not always) representative for each country and harmonised across the Community. The series of selling prices of crop and animal products comprise the prices at the producer level of the major agricultural products; prices of some processed products supplied by the food industry are also available. The purchase prices of the means of agricultural production relate to the prices paid by farmers for feedingstuffs, fertilizers, fuel for equipment and heating, seeds and plant protection products. The prices are expressed in national currency and in ECU and are stored in the SOEC's CRONOS databank ("PACO" domain), usually from 1969 onwards. Details of these price series (list of products covered with their code numbers etc.) are given in the CRONOS manual "Bl PACO, section : Agricultural prices and price indices", which is available on request.

From 1983 onwards, the monthly agricultural price series covering the preceding two years are being published quarterly on microfiches under the title "Agricultural prices" and a selection of the most important of these (see annex) is being published quarterly in the form of this rapid information note. The annual agricultural prices for the last 12 years are published in the annual publication "Agricultural price statistics". In addition, all the available material can be obtained via EURONET or, on request to the SOEC, on magnetic tape and computer printouts.

A new version of the catalogues of characteristics of the agricultural price series stored in CRONOS, which describe price-determining characteristics such as product definition, trading stage and conditions etc., is currently being prepared and should be available in 1984. A brief description of these price-determining characteristics is given in the annual publication "Agricultural price statistics".

* * *

AVERTISSEMENT: Dans les dix Etats membres de la Communauté, l'OSCE recense un nombre important de séries mensuelles et annuelles de prix agricoles concernant les prix de vente de produits végétaux, les prix de vente de produits animaux et les prix d'achat des moyens de production agricole. Le plus souvent (mais pas toujours), ces séries sont représentatives pour chacun des pays et harmonisées au niveau de la Communauté. Les prix de vente de produits végétaux et animaux englobent les prix des principaux produits au stade de la production agricole ainsi que les prix de quelques produits transformés issus de l'industrie alimentaire. Les prix d'achat des moyens de production agricole se réfèrent aux prix payés par les agriculteurs pour l'achat d'aliments du bétail, d'engrais, de carburants et de combustibles, de semences et de produits de protection des cultures. Les prix sont exprimés en monnaie nationale et en ECU. En général, ces données sont mémorisées depuis 1969 dans la banque de données CRONOS de l'OSCE (domaine "PACO"). Des détails sur ces séries de prix (liste des produits recensés avec leur numéro de code, etc.) sont contenus dans le manuel CRONOS "Supplément Bl PACO, section: Prix et indices de prix agricoles" qui est fourni sur demande.

A partir de 1983, les séries de prix agricoles mensuels des deux dernières années sont publiées trimestriellement sur microfiches sous le titre "Prix agricoles" et une sélection des plus importantes d'entre-elles (voir annexe) est publiée trimestriellement sous la forme de la présente note d'information rapide. Les prix agricoles annuels paraissent pour les douze dernières années dans la publication annuelle "Statistiques des prix agricoles". En outre, les données existantes sont disponibles par l'intermédiaire d'EURONET ou, sur demande adressée à l'OSCE, sur bande magnétique ou sous forme de listages.

Une nouvelle version des catalogues des caractéristiques des séries de prix agricoles stockées dans CRONOS, dans lesquelles sont décrites les caractéristiques déterminantes des prix telles que définition du produit, stade d'échange, conditions commerciales etc., est en cours de préparation et sera disponible en 1984. La publication annuelle "Statistiques des prix agricoles" contient une brève description de ces caractéristiques déterminantes des prix.

NOTA: L'ISCE rileva per i 10 Stati membri della Comunità un numero cospicuo di serie di prezzi agricoli mensili ed annuali: si tratta delle serie relative ai prezzi di vendita dei prodotti vegetali, ai prezzi di vendita dei prodotti animali e ai prezzi d'acquisto dei mezzi di produzione agricola. Dette serie sono per lo più (non sempre) rappresentative dei vari paesi e sono armonizzate a livello comunitario. Le serie dei prezzi di vendita dei prodotti vegetali e animali comprendono i prezzi dei principali prodotti allo stadio di produzione agricola; sono altresì disponibili quelle relative ad alcuni prodotti trasformati dell'industria alimentare. I prezzi di acquisto dei mezzi di produzione agricola si riferiscono ai prezzi pagati dagli agricoltori per l'acquisto di mangimi, fertilizzanti, carburanti e combustibili, semi e prodotti fitosanitari. I prezzi sono espressi in valuta nazionale e in ECU e si trovano memorizzati, in genere a partire dal 1969, nella banca di dati CRONOS dell'ISCE (settore "PACO"). I particolari circa queste serie dei prezzi (elenco dei prodotti rilevati con relativi numeri di codice, ecc.) sono riportati nell'apposito manuale - CRONOS "Bl PACO, sezione prezzi agricoli e indici dei prezzi", disponibile su richiesta.

A partire dal 1983, saranno pubblicate trimestralmente su microschede le serie dei prezzi agricoli mensili degli ultimi due anni con il titolo "Prezzi agricoli", nonché una selezione delle serie più importanti di prezzi agricoli (cfr. allegato) sotto forma di "Nota rapida" (pure trimestrale). I prezzi agricoli annuali degli ultimi 12 anni figureranno invece nella pubblicazione annuale "Statistica dei prezzi agricoli". Tali informazioni restano inoltre disponibili tramite l'EURONET e presso l'ISCE che li fornirà, su richiesta, sotto forma di nastri magnetici e tabulati.

E' attualmente in fase di messa a punto una nuova versione dei cataloghi delle caratteristiche relative alle serie di prezzi agricoli memorizzate nella banca di dati CRONOS, contenenti le caratteristiche determinanti del prezzo, quali la definizione del prodotto, lo stadio commerciale, le condizioni commerciali, ecc., che dovrebbe essere disponibile nel 1984. Una breve descrizione delle suddette caratteristiche è contenuta nella pubblicazione annuale "Statistica dei prezzi agricoli".
