VORWORT

Das Statistische Amt der Europäischen Gemeinschaften veröffentlicht im Rahmen der „Agrarstatistischen Hausmitteilungen“ in der Reihe „Monatliche Fleischstatistik“ die verfügbaren kurzfristigen Statistiken der Mitgliedstaaten über die Erzeugung von Vieh und Fleisch.

Das SAEG entspricht damit dem Wunsch der Benutzer der Reihe „Agrarstatistik“ die dort veröffentlichten jährlichen Angaben über die Vieh- und Fleischerzeugung zu aktualisieren und die jahreszeitliche Entwicklung aufzuzeigen.

Die Zusammenstellung und laufende Verbesserung der Statistiken wird in Zusammenarbeit mit den zuständigen Vertretern der Mitgliedstaaten im Rahmen der Arbeitsgruppe „Statistik der tierischen Erzeugnisse“ beraten. Die Angaben werden von den zuständigen nationalen Dienststellen übermittelt. Das SAEG dankt allen Beteiligten für ihre unermüdliche Mitarbeit.

Teil I zeigt die monatliche Entwicklung der Schlachtungen, den Austausch des Aussenhandels aller Länder von lebenden Tieren nach Tierarten: Rinder-Kälber-Schweine-Schafe und Ziegen-Einhufer. Es könnte sein, dass die nationalen Statistiken nicht vollständig oder nur vorläufig sind (siehe die Anmerkungen der Länder), so sind die Angaben nicht immer vergleichbar und können nicht ohne weiteres auf EG-Niveau addiert werden.

Um einen Eindruck von der Gesamterzeugung der EG zu geben, hat das SAEG eine Schätzung der EUR-9 Summen vorgenommen, bei der die fehlenden Angaben einiger Länder ergänzt worden sind.

Teil II zeigt in Gewicht die gleichen monatlichen Informationen wie Teil I. Anmerkungen mit denselben Einschränkungen wie Teil I.

Teil III. Der Inhalt von Teil III kann verschieden sein, je nach Aktualität und Anfragen; Ergebnisse der Viehbestände, kurzfristige Produktionsvorschau, Struktur der Aufzucht, Durchschnittsgewicht der geschlachteten Tiere usw.... in Anwendung der Richtlinien 68/161/EWG v. 27.3.68 und 73/132/EWG v. 15.5.1973.

Hinweis

Die methodischen Anmerkungen im einzelnen sowie das Quellenverzeichnis sind auf den Seiten Y-YI der Einleitung zu finden und erscheinen nicht in den statistischen Tabellen.

AVANT-PROPOS

L'Office Statistique des Communautés Européennes publie dans le cadre des «Informations internes de la statistique agricole» dans la série «Statistique mensuelle de la viande» les statistiques des États membres disponibles concernant le bétail et la viande.

L'O.S.C.E. répond ainsi aux vœux exprimés par les utilisateurs d'actualiser les données annuelles sur la production de bétail et de viande de la série «Statistique agricole» et de dégager les variations saisonnières.

Les données de cette publication sont élaborées et constamment améliorées en collaboration avec les responsables des États membres dans le cadre du Groupe de travail «Statistique des produits animaux». Elles sont transmises par les services nationaux compétents. L'O.S.C.E. remercie tous ceux qui apportent leur concours à l'élaboration de cette publication.

La Partie I retrace l'évolution mensuelle du nombre des abattages totaux, des échanges du Commerce extérieur, tous pays, en animaux vivants par catégories d'animaux: Gros bovins-veaux-porcs-moutons et chèvres-chevaux. Quelquefois les données nationales sont partielles ou provisoires (voir les remarques par pays), en conséquence les données ne sont pas toujours comparables ou additionnables directement au niveau de la Communauté.

Afin de donner un aperçu de la production totale au niveau de la CEE, l'O.S.C.E. publie une estimation de l'ensemble des abattages EUR-9.

La Partie II retrace en poids les mêmes informations mensuelles que la partie I. Noter les mêmes restrictions.

Partie III. Le contenu de la partie III sera variable selon l'actualité et la demande: résultats d'enquêtes sur le cheptel, prévisions de production à court terme, structure des élevages, poids moyen des animaux abattus etc.... en application des directives 68/161/CEE du 27.3.68 et 73/132/CEE du 15.5.1973.

Avertissement

Le lecteur voudra bien consulter les pages V-VI de l'introduction pour les notes méthodologiques et les indications de sources qui ne figurent pas dans les tableaux statistiques.

METHODISCHE ANMERKUNGEN

FLEISCH -

Schätzung EUR-9 und EUR-6

Die EUR-Summen für die Schlachtungen insgesamt enthalten bei den Haupttierarten eine Schätzung des Anteils derjenigen Schlachtungen, die in bestimmten Ländern nicht erfasst werden. In diesen Ländern schätzen die zuständigen Dienststellen die monatlichen Angaben.

Definitionen

Schlachtungen insgesamt: Anzahl und Schlachtmengen der innerhalb des Landes vorgenommenen Schlachtungen von Tieren inländischer und ausländischer Herkunft.

Die Schlachtmengen werden in Schlachtgewicht ausgedrückt, worunter das Gewicht des geschlachteten und ausgeweideten Tieres einschliesslich Knochen zu verstehen ist, von dem nur einige Teile wie z.B. Kopf (ausser bei Schweinen) Haut, ein Teil der Glieder usw. abgezogen sind.

Dieser Definition entsprechend sind die essbaren Innereien nicht einbegriffen, wohl aber die Schlachtfette innerhalb des Schlachtkörpers.

- Ein- und Ausfuhr lebender Schlachttiere, achlacht-reif.

Bei der Berechnung des EG-Ausserhandels insgesamt wird der EG-Binnenaustausch von der Summe des Aussenhandels der Länder abgezogen, um Doppelzählungen zu vermeiden. Zur Berechnung des EG-Binnenaustausches wird die Einfuhrstatistik zugrunde gelegt.

- Bruttoeigenerzeugung an Fleisch: Angebot an schlachtreifen Tieren inländischer Herkunft (= Schlachtungen insgesamt + Ausfuhr lebender Schlachttiere - Einfuhr lebender Schlachttiere).

NOTE METHODOLOGIQUE

VIANDE

Estimation EUR-9 et EUR-6

Les totaux EUR des "abattages totaux" des espèces principales contiennent une estimation de la partie des abattages non relevée dans certains pays. Pour ces pays, les services compétents estiment les données mensuelles.

Définition de base

Abattages totaux: le nombre et les quantités des animaux abattus à l'intérieur d'un pays qu'ils soient d'origine indigène ou étrangère.

Les quantités abattues sont estimées en poids en carcasse, on entend par là le poids de l'animal abattu et dépeigné, déduction faite de certaines parties telles que la tête (à l'exception des têtes de porcs), la peau, une partie des membres, les viscères, les intestins, etc.

Par conséquent, on ne tient pas compte des abats comestibles tandis que les graisses comprises dans le poids en carcasse sont incluses.

- Importations et exportations des animaux vivants de boucherie prêts à l'abattage.

Pour le calcul du Commerce extérieur total de la CE, on déduit du total du Commerce extérieur des pays, les échanges intra-CE afin d'éviter les doubles emplois. Ces échanges ont été fixés sur la base du chiffre des importations.

- Production indigène brute: viande: offre des animaux d'origine indigène prêts à l'abattage (= abattages totaux + Exportations animaux vivants de boucherie - Importations animaux vivants de boucherie).

ANMERKUNGEN ZU LÄNDERANGABEN

BR DEUTSCHLAND

Die Angaben für Berlin-West sind eingeschlossen.
Die Statistiken werden als vollständig angesehen.
Der Außenhandel mit der DDR ist einbegriffen.

FRANKREICH - ITALIEN - BELGIEN

Die Hausschlachtungen und die Schlachtungen die der Kontrolle entgehen, sind in den Schlachtungen insgesamt enthalten.

Schweinesektor Frankreich: die nationalen Angaben, die den Kopf nicht miteinbeziehen, sind mit einem Koeffizienten von 1,10 umgerechnet worden.

NIEDERLANDE

Die Statistiken werden als vollständig angesehen.

Die Ziegenschlachtungen sind unbedeutend und werden nicht erhoben.

LUXEMBURG

Die Angaben betreffen alle Schlachtungen, die im Lande vorgenommen werden.

Die Schlachtungen von Schafen, Ziegen und Einhufern werden nicht erhoben.

VEREINIGTES KÖNIGREICH **

Die Angaben werden bei den öffentlichen und lizenzierten Schlachthöfen einschliesslich der Baconfabriken eingeholt. Hausschlachtungen, die nicht erfasst werden, sind nicht einbegriffen, sie sind unbedeutend.

Die Einfuhren lebender Schweine und Kälber sind geringfügig und werden nicht gesondert nachgewiesen.

Die Schlachtungen von Pferden werden nicht erhoben.

IRLAND

Kälberschlachtungen sind unbedeutend und werden nicht nachgewiesen.

Für Schweine wird die Gesamtzahl der Schlachtungen geschätzt, indem zu den in den Baconfabriken erhobenen monatlichen Angaben die sonstigen Schlachtungen dazugeschätzt werden.

DÄNEMARK

Im Gegensatz zu den nationalen Statistiken sind in der Gemeinschaftsstatistik die Inneren ausgeschlossen.

*) Italien, Schlachtungen insgesamt nach vorläufig in 1973-74-75.

***) 1973, die Angaben für Kühe und Bullen sind zusammengefasst.

REMARQUES PAR PAYS

ALLEMAGNE (RF)

Les données de Berlin-Ouest sont comprises.
Les statistiques sont considérées comme exhaustives.
Le Commerce extérieur avec la RDA est compris.

FRANCE - ITALIE - BELGIQUE

Les abattages à la ferme et les abattages échappant au contrôle sont compris dans les abattages totaux.

Secteur porcs pour la France: les données nationales, qui ne comprennent pas la tête ont été recalculées avec un coefficient de 1,10.

PAYS-BAS

Les statistiques sont considérées comme exhaustives.

Les abattages de chèvres sont négligeables et ne sont pas relevés.

LUXEMBOURG

Les données concernent l'ensemble des abattages dans le pays.

Les abattages de moutons, de chèvres et d'équidés ne sont pas relevés.

ROYAUME-UNI **

Les données sont relevées auprès des abattoirs publics et licenciés y compris les usines à bacon. Les abattages à domicile, qui ne sont pas enregistrés ne sont pas compris dans les données, ils sont négligeables.

Les importations des porcs et des veaux vivants sont négligeables et ne sont pas distinguées.

Les abattages d'équidés ne sont pas relevés.

IRLANDE

Les abattages de veaux sont négligeables.

Le nombre total des abattages de porcs est estimé en ajoutant les "autres abattages" à ceux relevés dans les usines à bacon.

DANMARK

Contrairement aux statistiques nationales, les abats comestibles sont exclus de la statistique communautaire.

*) Italie, abattages totaux encore provisoires en 1973-74-75.

***) 1973, les données pour les vaches et les taureaux sont regroupées.

Abweichungen in den Summen durch Runden der Zahlen.

Die Zahlen des jeweils letzten Monats sind nur vorläufig und werden, wenn notwendig, in späteren Ausgaben abgeändert.

Les différences dans les totaux proviennent du fait d'avoir arrondi les chiffres.

On notera que les chiffres de rapportant au dernier mois sont provisoires et susceptibles d'être corrigés dans les numéros suivants.

PART I

MEAT PRODUCTION BY CATEGORIES – 1 000 head

All slaughterings – Import and Export of live animals
Gross indigenous production
Cattle excluding calves/calves/pigs/sheep and goats/horses
All slaughterings: bullocks/bulls/heifers/cows

PARTIE I

PRODUCTION DE VIANDE PAR CATEGORIES – 1 000 têtes

Abattages totaux – Importation et Exportation d'animaux vivants
Production indigène brute
Gros bovins/veaux/porcs/moutons et chèvres/equidés
Abattages totaux: boeufs/taureaux/génisses/vaches

TEIL I

FLEISCHERZEUGUNG NACH ARTEN – 1 000 Stück

Schlachtungen insgesamt – Einfuhr und Ausfuhr lebender Tiere
Bruttoeigenerzeugung
Rinder ohne Kälber/Kälber/Schweine/Schafe und Ziegen/Einhufer
Schlachtungen insgesamt: Ochsen/Bullen/Kühe/Färsen

PART II

MEAT PRODUCTION BY CATEGORIES – 1000 tonnes

All slaughterings – Import and Export of live animals

Gross indigenous production

Cattle excluding calves/calves/pigs/sheep and goats/horses

All slaughterings: bullocks/bulls/heifers/cows

PARTIE II

PRODUCTION DE VIANDE PAR CATEGORIES – 1000 tonnes

Abattages totaux – Importation et Exportation d'animaux vivants

Production indigène brute

Gros bovins/veaux/porcs/moutons et chèvres/équidés

Abattages totaux: boeufs/taureaux/génisses/vaches

TEIL II

FLEISCHERZEUGUNG NACH ARTEN – 1000 Tonnen

Schlachtungen insgesamt – Einfuhr und Ausfuhr lebender Tiere

Bruttoeigenerzeugung

Rinder ohne Kälber/Kälber/Schweine/Schafe und Ziegen/Einhufer

Schlachtungen insgesamt: Ochsen/Bullen/Kühe/Färsen

Countries: Data from monthly statistics.

EUR: total estimate

Pays: Résultats des relevés mensuels.

EUR: Estimation totale

Länder: Ergebnisse der monatlichen Erhebungen.

EUR: Gesamtschätzung

ERZEUGUNG UND VERBRAUCH "ALLER FLEISCHSORTEN" IN DER GEMEINSCHAFT 1975

Diese Mitteilung beschreibt die Merkmale, die die Situation der Erzeugung und des menschlichen Verbrauchs "aller Fleischsorten" in der Gemeinschaft der Neun auf der Grundlage der endgültigen statistischen Angaben für 1975 kennzeichnen. Unter "allen Fleischsorten" versteht man Fleisch in ganzen Tierkörpern und genießbare Schlachtabfälle aus der landwirtschaftlichen Tierzucht :

Zur Erinnerung : Die Bezeichnung "alle Fleischsorten" umfasst Rind-, Schweine-, Schaf-, und Ziegenfleisch, Pferdefleisch, Geflügel, die "anderen Fleischsorten" (Kaninchen, Haustauben und Wild) sowie genießbare Schlachtabfälle. Diese Statistik resultiert im wesentlichen aus Erhebungen bei den Züchtern, aus Verbrauchserhebungen oder systematischen Erfassungen an bestimmten Punkten der Handelskreisläufe, z.B. bei den Schlachthöfen; bei fehlender Aufgliederung beruhen die Angaben auf Schätzungen, die stets für die Jahresaufstellung der landwirtschaftlichen Einkommen in den einzelnen Mitgliedstaaten erforderlich sind.

A. Gesamtentwicklung des Sektors "Fleisch" von 1971 bis 1975

Aufgrund der ihm von den Mitgliedstaaten übermittelten Fleischversorgungsbilanzen für das Jahr 1975 war es dem Eurostat möglich, für die neun Länder der Gemeinschaft insgesamt die Entwicklung der Fleischerzeugung und des Fleischverbrauchs für 1971 bis 1975 darzustellen (Tabelle I).

Tabelle I : Entwicklung der Erzeugung und Nahrungsverbrauch an Fleisch

(1) Varies from previous year / Variation par rapport à l'année précédente.

*) Estimation Eurostat/
Estimation Eurostat.

1975 blieb die Fleischerzeugung der Gemeinschaft auf dem 1974 erreichten Stand : eine Zunahme bei der Erzeugung von Rindfleisch (+ 2,0 %) und Schaffleisch (+ 3,2 %) gleicht den Rückgang bei der Erzeugung von Schweinefleisch (- 1,6 %) aus. Der menschliche Verbrauch hat um weitere 1,1 % zugenommen und beträgt 81,8 kg Fleisch pro Kopf. Die Inlandsverwendung (menschlicher Verbrauch + sonstige Verwendungen) lag um 760 000 Tonnen oder 3,6 % über der Bruttoeigenerzeugung der Gemeinschaft.

B. Gleichgewicht des Sektors "Fleisch" 1975

Tabelle II enthält die Bilanzmerkmale des Sektors "Fleisch" im Jahre 1975, aufgliedert nach Fleischarten, für die Gemeinschaft insgesamt, in Anlage II sind sie nach Mitgliedstaaten aufgeschlüsselt.

Tabelle II : Bilanz des Sektor Fleisch in 1975 - EUR-9

*) Estimation Eurostat / Estimation Eurostat.

1975 war der Rindfleischsektor ausgeglichen; der Schweinefleischsektor wies ein leichtes Defizit auf und der Geflügelfleischsektor hatte einen leichten Ueberschuss; mit einem Selbstversorgungsgrad von 63 und 22% besteht für die Gemeinschaft bei Schaf- und Pferdefleisch weiterhin ein erheblicher Defizit. Zur Fleischerzeugung insgesamt trugen der Schweinefleischsektor mit 40,7%, der Rindfleischsektor mit 32,3%, das Geflügel mit 15,5% und der Schaffleischsektor mit 2,5% bei.

- Rindfleisch: im Vereinigten Königreich (+13%) und in Irland (+ 32%) hat die Erzeugung erheblich zugenommen; in Italien (- 12%), in der BR Deutschland und der BLWU (- 3%) sowie in Frankreich (- 1%) war sie dagegen rückläufig. Der menschliche Verbrauch an Rindfleisch hat in den drei neuen Mitgliedstaaten weiter zugenommen: er betrug 1973 1.302 000 Tonnen (20,3 kg pro Kopf), 1974 1.489 000 Tonnen und 1975 1.585 000 Tonnen (24,7 kg pro Kopf), das ist eine Steigerung um mehr als 21% in zwei Jahren. Bezogen auf die Gemeinschaft betrug der menschliche Verbrauch 25,2 kg pro Kopf (menschlicher Verbrauch 6.525 000 Tonnen, Inlandsverwendung 6.531 000 Tonnen). In Italien (58%), dem Vereinigten Königreich (80%), BR Deutschland (93%) und der BLWU (95%) wies der Rindfleischsektor ein Defizit auf.

- Schweinefleisch: im Gegensatz zur Entwicklung des Rindfleischsektors ist die Schweinefleischerzeugung im Vereinigten Königreich (- 17%) und Irland (- 22%) spürbar zurückgegangen und hat sich in Italien (+ 8%), den Niederlanden, Frankreich und der BR Deutschland (+ 1 bis 2%) erhöht, während der menschliche Verbrauch im Vereinigten Königreich und Irland um etwa 12% abgenommen hat. Bezogen auf die Gemeinschaft betrug der Verbrauch 32,4 kg pro Kopf und das Schweinefleischdefizit belief sich 89.000 Tonnen (1,1%). Der Schweinefleischsektor weist weiterhin in Dänemark, den Beneluxstaaten und - in etwas geringerem Masse - in Irland einen grossen Ueberschuss auf; in den vier grössten Mitgliedstaaten (Selbstversorgungsgrad unter 90%) besteht ein Defizit.

- Schaffleisch: die Erzeugung des Vereinigten Königreichs und Irlands hat 1975 weiter zugenommen (+ 12% in zwei Jahren) und macht über 60% der Gemeinschaftserzeugung aus; die französische und italienische Erzeugung (25% und 6% der Gemeinschaftserzeugung sind gleichbleibend; in der BR Deutschland und den Niederlanden ist im Schaffleischsektor ein Aufschwung zu verzeichnen. Der Verbrauch an Schaffleisch macht in Irland und dem Vereinigten Königreich 11 bis 11,5% des gesamten Fleischverbrauchs aus, in Frankreich nur 3,6% und in den übrigen Mitgliedstaaten weniger als 2%. Der Selbstversorgungsgrad der Gemeinschaft betrug 1975 63%.

- Pferdefleisch: Mit 50.000 Tonnen (wovon 42% auf Frankreich und 22% auf Italien entfallen) blieb die Pferdefleischerzeugung der Gemeinschaft auf dem gleichen Stand wie 1974. Der menschliche Verbrauch ist in Deutschland und den drei neuen Mitgliedstaaten (unter 0,2 kg je Einwohner) gering; in den anderen Mitgliedstaaten der Gemeinschaft liegt er weit über der Inlandserzeugung; der Selbstversorgungsgrad beträgt in Frankreich 24%, in Italien 18% und in den Beneluxstaaten weniger als 10%.

- Geflügelfleisch: 1975 belief sich die Gemeinschaftserzeugung auf 3.171 000 Tonnen, wovon 28,4% auf Italien, 26,0% auf Frankreich, 19,3% auf das Vereinigte Königreich, 13,4% auf die Benelux-Staaten und weniger als 9% auf die BR Deutschland entfallen. Die Zuwachsrate der Erzeugung hat sich, nachdem sie von 8,4% im Jahre 1972 auf 6,3% im Jahre 1973 und auf 0,2% im Jahre 1974 zurückgegangen war, wieder verbessert und beträgt 1975 0,9%. Eine parallele Entwicklung ist für den menschlichen Verbrauch kennzeichnend, der im Vergleich zum Vorjahr um 2,5 % zugenommen hat und damit über 12 kg pro Kopf beträgt und etwa 15 % des Fleischverbrauchs ausmacht. Der Selbstversorgungsgrad der Gemeinschaft beträgt 101,2% (im Vergleich zu 102,8% im Jahre 1974 und 103,6% im Jahre 1973); seit 1973 ist der Deckungsgrad des Inlandsbedarfs durch die Erzeugung der jeweiligen Mitgliedstaaten überall ausser in Frankreich rückläufig; trotzdem haben die Benelux-Staaten und Dänemark noch einen erheblichen Ueberschuss; die BR Deutschland dagegen erzeugt nur etwas über die Hälfte ihres Bedarfs.

- Andere Fleischsorten: Die Gemeinschaftserzeugung an anderen Fleischsorten (insbesondere Hauskaninchen und Wild) belief sich 1975 auf 496 000 Tonnen; Frankreich (63%), Italien (25%) und Deutschland (8%) sind die wichtigsten Erzeugerländer in der Gemeinschaft. Der Verbrauch dieser Fleischsorte betrug 2,2 kg pro Kopf; die Gemeinschaft hat davon über 75.000 Tonnen importiert.

- Geniessbare Schlachtabfälle: Die Erzeugung geniessbarer Schlachtabfälle, die auf 1.287 000 Tonnen oder 6,3% der gesamten Fleischerzeugung geschätzt wird, entwickelt sich mehr oder weniger parallel zur Fleischerzeugung insgesamt. Die Gemeinschaft hatte 1975 eine Nettoeinfuhr von 203.000 Tonnen geniessbarer Schlachtabfälle zu verzeichnen.

PRODUCTION AND FOOD CONSUMPTION 'TOTAL MEAT' IN THE COMMUNITY IN 1975

This communiqué describes the situation with regard to 'total meat' production and human consumption in the Community of Nine on the basis of the finalized statistical data available for 1975. By 'total meat' is understood all carcass meat and edible offals resulting from stock farming.

Note : The term 'total meat' includes beef and veal, pigmeat, sheepmeat and goatsflesh, horsemeat, poultrymeat, 'other meat' (rabbit, domestic pigeon and game) and edible offals. These statistics are mainly derived from surveys of stock farms, consumption surveys or systematic records kept in certain commercial establishments such as slaughterhouses; if the material available from these sources does not coincide with the information required, the data are taken from the estimates which are necessary for the annual calculation of agricultural income in each Member State.

A. Overall development of the meat sector from 1971 to 1975

As the 1975 supplies statements for meat have now been received from the Member States, the SOEC is able to provide figures (Table I) for the development of meat production and consumption in the Community of Nine as a whole between 1971 and 1975.

Table I : Entwicklung der Erzeugung und Nahrungsverbrauch an Fleisch
Table I : Development of production and consumption of meat
Tableau I : Evolution de la production et de la consommation de viande

| Year Année | Gross indigenous production Production indigène brute | | Human consumption Consommation humaine | | | Self-sufficiency Autoapprovisionnement |

| 1974 | 20 370 | + 8,2 | 20 898 | + 3,1 | 81,1 | 97,4 |
| 1975 | 20 430 * | + 0,3 | 21 136 | + 1,1 | 81,8 | 96,4 |

(1) Varies from previous year / Variation par rapport à l'année précédente. *) Estimation Eurostat / Estimation Eurostat.

In 1975 Community meat production remained at the same level as in 1974, as increased production of beef and veal (+ 2,0%) and sheepmeat and goatsflesh (+ 3,2%) compensated for the decline in pigmeat production (- 1,6%). Human consumption of meat further increased by 1.1%, reaching the level of 81.8 kg per head of population. Utilization on the domestic market (human consumption + other uses) exceeded the gross indigenous production of the Community by 760 thousand tonnes i.e. 3.6%.

B. State of the meat sector in 1975

The 1975 figures for the meat sector by type of meat are given in Table II for the Community as a whole and in Annex I for each Member State.

Table II : Bilanz des Sektor Fleisch in 1975 - EUR-9

*) Estimation Eurostat / Estimation Eurostat.

In 1975 the beef and veal sector was in balance; consumption slightly exceeded production in the pigmeat sector and was slightly less than production in the poultrymeat sector; in the sheepmeat and goatsflesh sector and in horsemeat the degree of Community self-sufficiency was 63% and 22% respectively, consumption being considerably higher than production. The pigmeat sector accounted for 40.7% of total meat production, the beef and veal sector for 32.3%, poultrymeat for 15.5% and sheepmeat and goatsflesh for 2.5%.

- Beef and veal : Production expanded considerably in the United Kingdom (+ 13%) and in Ireland (+ 32%) but declined in Italy (- 12%), Germany and the BLEU (- 3%) and in France (- 1%). Human consumption of beef and veal continued to rise in the three new Member States, increasing from 1 302 thousand tonnes in 1973 (20.3 kg per head of population) to 1 489 thousand tonnes in 1974 and 1 585 thousand tonnes in 1975 (24.7 kg per head of population) i.e. an increase of over 21% in two years. At Community level human consumption was 25.2 kg per head of population (human consumption 6 525 thousand tonnes, indigenous utilization 6 531 thousand tonnes). In the beef and veal sector production was less than consumption in Italy (58%), the United Kingdom (80%), Germany (93%) and the BLEU (95%).

- Pigmeat : In contrast to the beef and veal sector, pigmeat production declined substantially in the United Kingdom (- 17%) and Ireland (- 22%) while increasing in Italy (+ 8%), the Netherlands, France and Germany (+ 1 to 2%). Human consumption declined in the United Kingdom and Ireland by about 12%. Consumption per head of population for the Community as a whole was 32.4 kg and the shortfall of pigmeat was 89 thousand tonnes (1.1%). Production of pigmeat is considerably greater than consumption in Denmark, Benelux and to a lesser extent Ireland and is less than consumption in the four largest Member States (degree of self-sufficiency less than 90%).

- Sheepmeat and goatsflesh : Production in the United Kingdom and Ireland further increased in 1975 (+ 12% in two years) accounting for over 60% of Community production. Production in France and Italy (25% and 6% of Community production) is stable, while this sector is expanding in Germany and the Netherlands. Consumption of sheepmeat and goatsflesh is 11 to 11.5% of total meat consumption in Ireland and the United Kingdom, only 3.6% in France and under 2% in the other Member States. The degree of Community self-sufficiency in 1975 was of the order of 63%.

- Horsemeat : Community production of horsemeat remained at the same level as in 1974, amounting to 50 thousand tonnes (of which 42% was produced in France and 22% in Italy). In Germany and the three new Member States human consumption is very low (less than 0.2 kg per head of population), while it considerably exceeds domestic production in the other Member States, the degree of self-sufficiency being 24% in France, 18% in Italy and under 10% in Benelux.

- Poultrymeat : Community production in 1975 was 3 171 thousand tonnes of which 28.4% was produced in Italy, 26.0% in France, 19.3% in the United Kingdom, 13.4% in Benelux and less than 9% in Germany. The rate of growth in production had declined from 8.4% in 1972 to 6.3% in 1973 and 0.2% in 1974. This downward tendency has now been reversed and the rate of growth was 0.9% in 1975. Human consumption exhibited a similar trend, increasing by 2.5% over the previous year, and exceeding 12 kg per head of population, i.e. almost 15% of meat consumption. The degree of Community self-sufficiency was 101.2% (as opposed to 102.8% in 1974 and 103.6% in 1973). Since 1973 the proportion of domestic needs covered by home production has decreased in all the Member States except France, though production in Benelux and Denmark is still considerably greater than consumption. Germany, on the other hand, produced little more than half its needs.

- Other meat : Community production of other meat (mainly domestic rabbit and game) amounted to 496 thousand tonnes in 1975. France (63%), Italy (25%) and Germany (8%) are the main Community producers. Consumption of this type of meat has increased to 2.2 kg per head of population, and the Community has imported over 75 000 tonnes.

- Edible offals : Production of edible offals is estimated at 1 287 thousand tonnes i.e. 6.3% of total meat production, and is more or less in line with the overall meat production trend. In 1975 net Community imports of edible offals amounted to 203 thousand tonnes.

PRODUCTION ET CONSOMMATION "TOUTES VIANDES" DANS LA COMMUNAUTE EN 1975

Ce communiqué donne les caractéristiques de la situation de la production et de la consommation humaine "toutes viandes" dans la Communauté à neuf sur la base des données statistiques définitives disponibles pour 1975. On entend par "toutes viandes", l'ensemble de la viande en carcasse et des abats comestibles provenant de l'élevage d'animaux en agriculture :

Rappel : La dénomination "toutes viandes" inclut la viande de boeuf, de porc, de mouton et de chèvre, de cheval, de volaille, les "autres viandes" (lapin, pigeon domestique et gibier) et les abats comestibles. L'essentiel de cette statistique résulte d'enquêtes auprès des élevages, d'enquêtes de consommation ou d'enregistrements systématiques dans certains circuits commerciaux tels que les abattoirs; en l'absence de recoupement, les données proviennent d'estimations nécessaires pour l'établissement annuel des revenus de l'Agriculture dans chaque Etat membre.

A. Evolution globale du secteur "viande" de 1971 à 1975

Suite à la communication par les Etats membres de leurs bilans d'approvisionnement en viande relatifs à l'année 1975, l'Eurostat est en mesure de présenter (tableau I), pour l'ensemble des neuf pays de la Communauté, l'évolution de la production et de la consommation de viande de 1971 à 1975.

Tabelle I : Entwicklung der Erzeugung und Nahrungsverbrauch an Fleisch
Table I : Development of production and consumption of meat
Tableau I : Evolution de la production et de la consommation de viande

| Year Année | Gross indigenous production Production indigène brute | | Human consumption Consommation humaine | | | Self-sufficiency Autoapprovisionnement |
|---------------|--|-------|---|-------|--------------------|---|
| | 1 000 m. tons 1 000 tonnes | % (1) | 1 000 m. tons 1 000 tonnes | % (1) | kg/head kg/tête | % |
| 1971 | 18 816 | | 19 957 | | 78,5 | 94,3 |
| 1972 | 18 505 | - 1,7 | 20 221 | + 1,3 | 79,0 | 91,5 |
| 1973 | 18 826 | + 1,7 | 20 276 | + 0,3 | 79,0 | 92,8 |
| 1974 | 20 370 | + 8,2 | 20 898 | + 3,1 | 81,1 | 97,4 |
| 1975 | 20 430 * | + 0,3 | 21 136 | + 1,1 | 81,8 | 96,4 |

(1) Varies from previous year / Variation par rapport à l'année précédente. *) Estimation Eurostat / Estimation Eurostat.

En 1975, la production communautaire de viande est restée au niveau atteint en 1974, un accroissement de production de viande bovine (+ 2,0 %) et ovine (+ 3,2 %) compensant la baisse de la production de viande porcine (- 1,6 %). La consommation humaine a encore augmenté de 1,1 %, atteignant 81,8 kg de viande par habitant. L'utilisation intérieure (consommation humaine + autres utilisations) a dépassé de 760 milliers de tonnes, soit 3,6 %, la production indigène brute de la Communauté.

B. Equilibre du secteur "viande" en 1975

Les caractéristiques du secteur "viande" en 1975 sont présentées, selon le type de viande, au tableau II pour la Communauté dans son ensemble, en annexe I pour chacun des Etats membres.

Tabelle II : Bilanz des Sektor Fleisch in 1975 - EUR-9
Table II : State of the meat sector in 1975 - EUR-9

*) Estimation Eurostat / Estimation Eurostat.

En 1975, le secteur bovin a été équilibré; le secteur porcin fut légèrement déficitaire, et le secteur de la volaille légèrement excédentaire; avec des degrés d'autoapprovisionnement de 63% et 22 %, la Communauté est restée largement déficitaire en viandes ovine et chevaline. Le secteur porcin a assuré 40,7 % de la production totale de viande, le secteur bovin 32,3 %, la volaille 15,5 % et le secteur ovin 2,5 %.

- Viande bovine : la production s'est considérablement accrue au Royaume-Uni (+ 13 %) et en Irlande (+ 32 %); par contre, elle a fléchi en Italie (- 12 %), en Allemagne et dans l'U.E.B.L. (- 3 %), et en France (- 1 %). La consommation humaine de viande bovine a poursuivi son expansion dans les trois nouveaux Etats membres, passant de 1 302 milliers de tonnes en 1973 (20,3 kg par habitant) à 1 489 milliers de tonnes en 1974 et 1 585 milliers de tonnes en 1975 (24,7 kg par habitant), soit un accroissement de plus de 21 % en deux ans. Au niveau communautaire, la consommation humaine a atteint 25,2 kg par habitant (consommation humaine de 6 525 milliers de tonnes, utilisation intérieure de 6 531 milliers de tonnes). Le secteur bovin a été déficitaire en Italie (58 %), au Royaume-Uni (80 %), en Allemagne (93 %) et dans l'U.E.B.L. (95 %).

- Viande porcine : contrairement à l'évolution du secteur bovin, la production de viande de porc a diminué sensiblement au Royaume-Uni (- 17 %) et en Irlande (- 22 %) pour augmenter en Italie (+ 8 %), aux Pays-Bas, en France et en Allemagne (+ 1 à 2 %), tandis que la consommation humaine régressait au Royaume-Uni et en Irlande d'environ 12 %. Au niveau communautaire, la consommation par habitant a atteint 32,4 kg, et le déficit en viande porcine a été de 89 milliers de tonnes (1,1 %). Le secteur porcin reste largement excédentaire au Danemark, au Benelux et, dans une moindre mesure, en Irlande; il est déficitaire (degré d'autoapprovisionnement inférieur à 90 %) dans les quatre plus grands Etats membres.

- Viande ovine : la production du Royaume-Uni et de l'Irlande a encore augmenté en 1975 (+ 12 % en deux ans), représentant plus de 60 % de la production communautaire; les productions française et italienne (25% et 6 % de la production communautaire) sont stables; le secteur ovin est en expansion en Allemagne et aux Pays-Bas. La consommation de viande ovine représente 11 à 11,5 % de la consommation totale de viande en Irlande et au Royaume-Uni, seulement 3,6 % en France et moins de 2 % dans les autres Etats membres. L'autoapprovisionnement de la Communauté a été de l'ordre de 63 % en 1975.

- Viande chevaline : atteignant 50 milliers de tonnes (dont 42 % en France et 22 % en Italie), la production communautaire de viande de cheval est restée au niveau de 1974. La consommation humaine est très faible (moins de 0,2 kg par habitant) en Allemagne et dans les trois nouveaux Etats membres; elle excède largement la production intérieure dans les autres Etats de la Communauté, où le degré d'autoapprovisionnement est de 24 % en France, 18 % en Italie, inférieur à 10 % au Benelux.

- Viande de volaille : en 1975, la production communautaire s'est élevée à 3 171 milliers de tonnes, dont 28,4 % en Italie, 26,0% en France, 19,3 % au Royaume-Uni, 13,4 % au Benelux, moins de 9 % en Allemagne. Après être tombé de 8,4 % en 1972 à 6,3 % en 1973 et à 0,2 % en 1974, le taux de croissance de la production s'est redressé et a atteint 0,9 % en 1975. Une évolution parallèle a caractérisé la consommation humaine qui a progressé de 2,5 % par rapport à l'année précédente, dépassant 12 kg par habitant soit près de 15 % de la consommation de viande. Le degré d'autoapprovisionnement de la Communauté s'est situé à 101,2 % (contre 102,8 % en 1974 et 103,6 % en 1973); depuis 1973, le taux de couverture des besoins intérieurs par la production nationale a diminué dans tous les Etats membres sauf en France; le Benelux et le Danemark restent néanmoins largement excédentaires; au contraire, l'Allemagne n'a produit qu'à peine plus de la moitié de ses besoins.

- Autres viandes : la production communautaire d'autres viandes (lapin domestique et gibier principalement) a représenté 496 milliers de tonnes en 1975; la France (63 %), l'Italie (25 %) et l'Allemagne (8 %) sont les principaux producteurs de la Communauté. La consommation de ce type de viande s'est élevée à 2,2 kg par habitant; la Communauté en a importé plus de 75 000 tonnes.

- Abats comestibles : la production d'abats comestibles, estimée à 1 287 milliers de tonnes, soit 6,3 % de la production totale de viande, suit plus ou moins l'évolution constatée au niveau de l'ensemble de la production de viande. La Communauté a enregistré en 1975, une importation nette de 203 milliers de tonnes d'abats comestibles.
