Indledning

I serien »Månedstatistik for kød« offentliggør De europæiske Fællesskabers statistiske Kontor medlemsstaternes statistiske oplysninger om kvæg og kød.

EUROSTAT tilgodeser således brugernes ønske om at aktualisere de årlige oplysninger om kvæg- og kødproduktionen i serien »Landbrugsstatistik« og konstatere de sæsonbestemte variationer.

Oplysningerne i denne publikation udarbejdes og er genstand for en løbende ajourføring i samarbejde med de ansvarlige fra de forskellige medlemslande inden for rammerne af arbejdsgruppen »Statistik over animalske produkter«. De fremsendes af de pågældende nationale statistiske kontorer. De europæiske Fællesskabers statistiske Kontor takker alle dem, som medvirker til udarbejdelse af denne publikation.

Første del skildrer den månedlige udvikling i det samlede antal slagtninger, udenrigshandelen med levende slagtekvæg, alle lande: voksen-kvæg-kalvesvin-får og geder-hest. Undertiden er de nationale tal foreløbige.

Anden del indeholder samme månedlige oplysninger som første del, men udtrykt i vægt.

Indholdet af tredje del varierer alt efter, hvad der har øjeblikkelig interesse og efter ønske: resultater af undersøgelser vedrørende kvægbestanden, produktionsudsigter på kort sigt, husdyravlens struktur, gennemsnitsvægt for de slagtede dyr etc...

Bemærkninger til fremgangsmåden: Basisdefinitioner

Slagtninger i alt: (nettoproduktion) antallet og mængden af slagtede dyr inden for et land, hvad enten der er tale om dyr af indenlandsk eller udenlandsk oprindelse.

Den slagtede mængde angives i slagtevægt, det vil sige dyrets vægt, når det er slagtet og afhudet, med fradrag af visse dele, f.eks. hovedet (undtagen hoveder af svin), skindet, en del af lemmerne, indvoldene, tarmene etc...

Man tager derfor ikke hensyn til spiseligt slagteaffald, hvorimod fedt, som er medregnet i slagtevægten, er inkluderet.

– *Indførsel og udførsel af levende slagtekvæg* klar til slagtning.

Ved udregningen af EF's samlede handel med tredjelande trækker man fra landenes samlede udenrigshandel den handel, som foregår mellem EF-landene indbyrdes, for at undgå at tallene opføres to gange. Denne handel er fastsat på grundlag af importtallene.

– *Indenlandsk bruttoproduktion — kød*:

Udbuddet af dyr med indenlandsk oprindelse, klar til slagtning (= slagtninger i alt + udførsel af levende slagtekvæg — indførsel af levende slagtekvæg).

– *Indenlandsk bruttoproduktion — kvæg*:
(se supplerende oplysninger).

Den indenlandske bruttoproduktion af kvæg omfatter den samlede nationale produktion af kvæg mellem to på hinanden følgende undersøgelser vedrørende kvægbestanden; den indenlandske bruttoproduktion af kvæg = den indenlandske bruttoproduktion (kød) — indførsel + udførsel (andre levende dyr, herunder racerene dyr), eller den indenlandske bruttoproduktion = nettoproduktionen forøjet med saldoen i udenrigshandelen for alle dyr af den pågældende art.

Bemærk: For yderligere oplysninger se »Kvægbestand og produktion 1976« udgivet af Eurostat.

Bemærkninger vedrørende enkelte lande

Forbundsrepublikken Tyskland:

Tallene for Vestberlin er medregnet.

De statistiske oplysninger betragtes som udtømmende.

Udenrigshandelen med DDR er medregnet.

Irland:

I månedsstatistikkerne er medregnet »beslaglagt« kød.

Danmark:

I modsætning til, hvad der er tilfældet for de nationale statistikker, er spiseligt slagteaffald ikke medregnet i fællesskabsstatistikken.

Vorwort

Das Statistische Amt der Europäischen Gemeinschaften veröffentlicht in der Reihe „Monatliche Fleischstatistik“ die verfügbaren Statistiken der Mitgliedstaaten über die Erzeugung von Vieh und Fleisch.

EUROSTAT entspricht damit dem Wunsch der Benutzer der Reihe „Agrarstatistik“, die dort veröffentlichten jährlichen Angaben über die Vieh- und Fleischerzeugung zu aktualisieren und die jahreszeitlichen Entwicklungen aufzuzeigen.

Die Zusammenstellung und laufende Verbesserung der Statistiken wird in Zusammenarbeit mit den zuständigen Vertretern der Mitgliedstaaten im Rahmen der Arbeitsgruppe „Statistik der tierischen Erzeugnisse“ beraten. Die Angaben werden von den zuständigen nationalen Dienststellen übermittelt. Das SAEG dankt hiermit allen Beteiligten für ihre Mitarbeit an dieser Veröffentlichung.

Teil I zeigt die monatliche Entwicklung der Schlachtungen insgesamt, sowie die Entwicklung des Außenhandels aller Länder mit lebenden Schlachttieren: Rinder-Kälber-Schweine-Schafe und Ziegen-Einhufer. In manchen Fällen handelt es sich um vorläufige Angaben.

Teil II gibt — in Gewicht — die gleichen monatlichen Informationen wie Teil I.

Der Inhalt von Teil III kann verschieden sein, je nach Aktualität und Nachfrage; Ergebnisse von Erhebungen über Viehbestände, kurzfristige Produktionsvorschau, Struktur der Aufzucht, Durchschnittsgewicht der geschlachteten Tiere usw.

Methodologische Anmerkungen: Definitionen

Schlachtungen insgesamt (Nettoerzeugung, p.n.) Anzahl und Mengen der innerhalb des Landes vorgenommenen Schlachtungen von Tieren inländischer und ausländischer Herkunft.

Die Schlachtmengen werden in Schlachtgewicht ausgedrückt, worunter das Gewicht des geschlachteten und ausgeweideten Tieres einschließlich Knochen zu verstehen ist, von dem nur einige Teile wie z.B. Kopf (außer bei Schweinen), Haut, ein Teil der Gliedmaßen, Eingeweide usw. abgezogen sind.

Dieser Definition entsprechend sind die eßbaren Innereien nicht einbegriffen, wohl aber die im Schlachtgewicht enthaltenen Fette.

— *Ein- und Ausfuhr lebender Schlachttiere*, schlachtreif.

Bei der Berechnung des EG-Außenhandels insgesamt wird der EG-Binnenaustausch von der Summe des Außenhandels der Länder abgezogen, um Doppelzählungen zu vermeiden. Für die Berechnung des EG-Binnenhandels werden die Einfuhrzahlen zugrunde gelegt.

— *Bruttoeigenerzeugung an Fleisch:*

Angebot an schlachtreifen Tieren inländischer Herkunft (= Schlachtungen insgesamt + Ausfuhr lebender Schlachttiere — Einfuhren lebender Schlachttiere).

— *Bruttoeigenerzeugung an Vieh:* (siehe Zusatzinformationen).

Die Bruttoeigenerzeugung an Vieh stellt die Gesamterzeugung des nationalen Viehbestandes zwischen zwei aufeinanderfolgenden Erhebungen über den Viehbestand dar; p.i.b.-Vieh = Bruttoeigenerzeugung (Fleisch) — Einfuhren + Ausfuhren (sonstige lebende Tiere einschließlich der reinrassigen Tiere), oder aber p.i.b.-Vieh = Nettoerzeugung, erhöht um den Saldo des Außenhandels sämtlicher Tierarten.

Anmerkung: Für weitere Einzelheiten wird auf „Statistik der Tiererzeugung 1976“ von Eurostat verwiesen.

Anmerkungen zu den Länderangaben

BR Deutschland:

Die Angaben für Berlin-West sind mit eingeschlossen.
Die Statistiken werden als vollständig angesehen.
Der Außenhandel mit der DDR ist einbegriffen.

Irland:

Die Monatsstatistiken enthalten das „erfaßte“ Fleisch.

Dänemark:

Im Gegensatz zu den nationalen Statistiken sind in der Gemeinschaftsstatistik die genießbaren Innereien nicht enthalten.

Preface

In the series 'Monthly meat statistics', the Statistical Office of the European Communities publishes the statistics on meat and livestock which are available for the Member States.

In this way EUROSTAT is complying with consumers' wishes by updating the annual data from the 'Agricultural statistics' series on meat and livestock production and pinpointing seasonal variations.

The data in this publication are calculated and regularly improved in collaboration with the relevant members of the Working Party on animal product statistics from the various Member States. They are transmitted by the responsible national departments. The SOEC thanks all those who help produce this publication.

Part I retraces the monthly development of total slaughterings and external trade statistics (all countries) in live animals for slaughter: fully-grown bovines, calves, pigs, sheep and goats, horses. Sometimes the national data are provisional.

Part II presents the same monthly information as part I, but in terms of weight.

The contents of part III vary according to demand, e.g. results of livestock surveys, short-term production forecasts, structure of stock farming, average weight of slaughtered animals.

Methodological note: Basic definitions

Total slaughterings: (net production = p.n.) the number and quantities of animals slaughtered within a country, whether of domestic or foreign origin.

Quantities slaughtered are estimated in 'carcasse weight', i.e. the weight of the animal slaughtered and skinned, excluding certain parts such as the head (except for pigs' heads), the skin, parts of the limbs, the viscera, the intestines, etc.

Edible meat offals are therefore not taken into account, whereas fats included in the carcass weight are.

— *Imports and exports of live animals ready for slaughter.*

In order to calculate total EC external trade, EC internal trade is deducted from the total external trade figures for all the countries, thus avoiding duplication. These statistics are established on the basis of import figures.

— *Gross indigenous production — meat:*

Supplies of animals of indigenous origin, ready for slaughter (= total slaughterings + exports of live animals for slaughter — imports of live animals for slaughter).

— *Gross indigenous production — livestock:* (see supplementary information).

The gross indigenous production of livestock represents the total production of the full herd kept by each Member State between two successive surveys; p.i.b. livestock = gross indigenous production (meat) — imports + exports (other live animals, including pure breed animals), or the p.i.b. livestock = net production increased by the external trade balance for all animals of the species.

Note: For further details see 'Statistics of animal production 1976' in Eurostats.

Remarks by country

FR of Germany:

The data for West Berlin are included.
The statistics are considered exhaustive.
External trade with the GDR is included.

Ireland:

The monthly statistics include 'sealed' meat.

Denmark:

In contrast to the national statistics, the Community statistics do not include edible offal.

Avant-propos

L'Office Statistique des Communautés Européennes publie dans la série « Statistiques mensuelles de la viande » les statistiques des États membres disponibles concernant le bétail et la viande.

L'EUROSTAT répond ainsi aux vœux exprimés par les utilisateurs d'actualiser les données annuelles sur la production de bétail et de viande de la série « Statistique agricole » et de dégager les variations saisonnières.

Les données de cette publication sont élaborées et constamment améliorées en collaboration avec les responsables des États membres dans le cadre du Groupe de travail « Statistique des produits animaux ». Elles sont transmises par les services nationaux compétents. L'OSCE remercie tous ceux qui apportent leur concours à l'élaboration de cette publication.

La Partie I retrace l'évolution mensuelle du nombre des abattages totaux, des échanges du Commerce extérieur, tous pays, en animaux vivants de boucherie: Gros bovins-veaux-porcs-moutons et chèvres-chevaux. Quelquefois les données nationales sont provisoires.

La Partie II retrace en poids les mêmes informations mensuelles que la partie I.

Le contenu de la partie III est variable selon l'actualité et la demande: résultats d'enquêtes sur le cheptel, visions de production à court terme, structure des élevages, poids moyen des animaux abattus etc....

Note méthodologique: Définitions de base

Abattages totaux: (production nette, p.n.) le nombre et les quantités des animaux abattus à l'intérieur d'un pays qu'ils soient d'origine indigène ou étrangère.

Les quantités abattues sont estimées en poids en carcasse, on entend par là le poids de l'animal abattu et dépouillé, déduction faite de certaines parties telles que la tête (à l'exception des têtes de porcs), la peau, une partie des membres, les viscères, les intestins, etc....

Par conséquent, on ne tient pas compte des abats comestibles tandis que les graisses comprises dans le poids en carcasse sont incluses.

– *Importations et exportations des animaux vivants de boucherie* prêts à l'abattage.

Pour le calcul du Commerce extérieur total de la CE, on déduit du total du Commerce extérieur des pays, les échanges intra-CE afin d'éviter les doubles emplois. Ces échanges ont été fixés sur la base du chiffre des importations.

– *Production indigène brute — viande:*

Offre des animaux d'origine indigène prêts à l'abattage (= abattages totaux + exportations animaux vivants de boucherie — importations animaux vivants de boucherie).

– *Production indigène brute — bétail:* (voir informations complémentaires).

La production indigène brute de bétail représente la production totale du troupeau national entre deux enquêtes successives sur le cheptel; p.i.b.-bétail = Production indigène brute (viande) — Importations + Exportations (autres animaux vivants, y compris les animaux de race pure), ou encore la p.i.b.-bétail est égale à la production nette augmentée du solde du Commerce extérieur de tous les animaux de l'espèce.

Note: Pour de plus amples détails se reporter à « Statistique de la production animale 1976 » de l'Eurostat.

Remarques par pays

RF d'Allemagne:

Les données de Berlin-Ouest sont comprises.
Les statistiques sont considérées comme exhaustives.
Le Commerce extérieur avec la RDA est compris.

Irlande:

Les statistiques mensuelles comprennent les viandes « saisies ».

Danemark:

Contrairement aux statistiques nationales, les abats comestibles sont exclus de la statistique communautaire.

Prefazione

L'Istituto statistico delle Comunità europee pubblica nella serie «Statistiche mensili della carne» le statistiche disponibili degli Stati membri sul bestiame e sulla carne.

L'EUROSTAT viene incontro in tal modo ai desideri, espressi dagli utilizzatori, di informazioni che permettano di aggiornare i dati annui sulla produzione di bestiame e di carne della serie «Statistica agraria» e di evidenziare le variazioni stagionali.

I dati di questa pubblicazione sono elaborati e costantemente migliorati in collaborazione con i responsabili degli Stati membri nel quadro del Gruppo di lavoro «Statistica dei prodotti animali». Essi vengono trasmessi dai servizi nazionali competenti. L'ISCE ringrazia tutti coloro che collaborano all'elaborazione di questa pubblicazione.

La parte prima descrive l'evoluzione mensile del numero delle macellazioni totali e degli scambi del commercio estero, per tutti i paesi, di animali vivi da macello: bovini adulti, vitelli, suini, ovini, caprini, equini. Talvolta i dati nazionali sono provvisori.

La Parte seconda fornisce le medesime informazioni mensili della prima, ma espresse in peso.

Il contenuto della parte III varia secondo l'attualità e la richiesta: risultati di indagini sul patrimonio zootecnico, prospettive di produzione a breve termine, struttura degli allevamenti, peso medio degli animali macellati ecc....

Nota metodologica: Definizioni di base

Macellazioni totali: (produzione netta, p.n.) numero e quantità dei capi macellati all'interno di un paese, siano essi di origine interna o estera.

Le quantità macellate sono valutate in peso morto, vale a dire in peso dell'animale macellato e scuoiato, tolte talune parti come la testa (tranne che per i suini), la pelle, una parte degli arti, le viscere, gli intestini, ecc.

Di conseguenza non si tiene conto delle frattaglie commestibili, mentre è incluso il grasso compreso nel peso morto.

— *Importazioni ed esportazioni degli animali vivi da macello, pronti per la macellazione.*

Per il calcolo del commercio estero totale della CEE, si sottraggono, dal totale del commercio estero dei vari paesi, gli scambi intracomunitari per evitare i doppi computi. Questi scambi sono stati fissati sulla base della cifra delle importazioni.

— *Produzione interna lorda — carne:*

Offerta degli animali di origine interna pronti per la macellazione (= macellazioni totali + esportazioni di animali vivi da macello — importazioni di animali vivi da macello).

— *Produzione interna lorda — bestiame:*
(Cfr. informazioni complementari).

La produzione interna lorda di bestiame rappresenta la produzione totale fornita dal patrimonio zootecnico nazionale tra due indagini successive sulla consistenza del bestiame; P.i.l.-bestiame = Produzione interna lorda (carne) — importazioni + esportazioni (altri animali vivi, compresi gli animali di razza pura); o ancora: la P.i.l. — bestiame è uguale alla produzione netta + il saldo del commercio estero di tutti gli animali della specie.

Nota: Per maggiori particolari si rimanda al «Statistica della produzione animale 1976» dell'Eurostat.

Osservazioni per paese

Rf di Germania:

I dati relativi a Berlino Ovest sono inclusi.

Le statistiche sono considerate complete.

È incluso il commercio estero con la Repubblica democratica tedesca.

Irlanda:

Le statistiche mensili comprendono le carni «sequestrate» perchè non idonee al consumo.

Danimarca:

Contrariamente alle statistiche nazionali, sono state escluse, per la statistica comunitaria, le frattaglie commestibili.

Voorbericht

Het Bureau voor de Statistiek der Europese Gemeenschappen publiceert in de reeks „Maandelijks vleesstatistieken” de statistieken inzake vee en vlees waarover de Lid-Staten beschikken.

EUROSTAT komt hiermee tegemoet aan de door de gebruikers geuite wens de jaargegevens over de productie van vee en vlees uit de reeks „Landbouwstatistiek” bij te werken en de seizoenschommelingen goed te laten uitkomen.

De in de onderhavige publikatie vervatte gegevens worden in samenwerking met de vertegenwoordigers van de Lid-Staten in het kader van de Werkgroep „Statistiek van de dierlijke produkten” uitgewerkt en voortdurend bijgewerkt. De gegevens worden door de bevoegde nationale diensten doorgegeven. Het BSEG dankt iedereen voor de medewerking aan de totstandkoming van deze publikatie.

Deel I geeft het maandelijks verloop weer van het totaal slachtingen, en de invoer en uitvoer, voor alle landen, van levend slachtvee: runder-kalveren-varkenschapen en geiten-paarden. In sommige gevallen zijn de nationale gegevens voorlopige schattingen.

In deel II wordt dezelfde maandelijks informatie van deel I in gewicht weergegeven.

De inhoud van deel III varieert al naar gelang de actualiteit en de behoeften: resultaten van veetellingen, produktieramingen op korte termijn, structuur van de veeteelt, gemiddeld geslacht gewicht, enz.

Methodologische opmerkingen: Voornaamste definities

Totaal slachtingen (nettoproductie, n.p.) aantal geslacht gewicht van de in een bepaald land geslachte dieren, van binnenlandse en buitenlandse herkomst.

Het geslacht gewicht komt overeen met het gewicht van de romp, m.a.w. het gewicht van het geslachte en gestroopte dier, ontdaan van bepaalde delen, zoals kop (met uitzondering van varkenskoppen), de huid, een deel van de ledematen, de ingewanden, de darmen, enz....

Er wordt derhalve geen rekening gehouden met de eetbare afvallen, maar wel met de vetten die bij het gewicht van de romp zijn inbegrepen.

— *Invoer en uitvoer van levende slachtdieren*, gereed voor de slacht.

Voor de berekening van de totale buitenlandse handel van de E.G. wordt van het totaal van de buitenlandse handel van de landen van het handelsverkeer tussen de Lid-Staten van de E.G. afgetrokken om overlapping te voorkomen. Dit handelsverkeer wordt vastgesteld aan de hand van het invoercijfer.

— *Bruto binnenlandse productie — vlees:*

Aanbod van dieren van binnenlandse herkomst, gereed voor de slacht (= totaal slachtingen + uitvoer levende slachtdieren — invoer levende slachtdieren).

— *Bruto binnenlandse productie — vee:*
(zie aanvullende informatie).

De bruto binnenlandse veeproductie bestaat uit de totale productie van de nationale veestapel tussen twee opeenvolgende veetellingen; b.b.p. — vee = bruto binnenlandse productie (vlees) — invoer + uitvoer (andere levende dieren, met inbegrip van stamboekvee), m.a.w. de b.b.p.-vee is gelijk aan de nettoproductie plus het saldo van de buitenlandse handel van alle dieren in kwestie.

N.B.: Voor nadere informatie wordt verwezen naar „Statistieken van de dierlijke productie 1976” van Eurostat.

Opmerkingen per land

BR Duitsland:

Met inbegrip van de gegevens van W. Berlijn.
De statistieken worden volledig geacht.
Met inbegrip van het handelsverkeer met de DDR.

Ierland:

De maandstatistieken omvatten het „aangebraden” vlees.

Denemarken:

In tegenstelling tot de nationale statistieken zijn de eetbare afvallen niet in de communautaire statistiek opgenomen.

PART I

MEAT PRODUCTION BY CATEGORIES — 1 000 head

All slaughterings — Import and Export of live animals

Gross indigenous production

Cattle excluding calves/calves/pigs/sheep and goats/horses

All slaughterings: bullocks/bulls/heifers/cows

PARTIE I

PRODUCTION DE VIANDE PAR CATÉGORIES — 1 000 têtes

Abattages totaux — Importation et Exportation d'animaux vivants

Production indigène brute

Gros bovins/veaux/porcs/moutons et chèvres/équidés

Abattages totaux: bœufs/taureaux/génisses/vaches

TEIL I

FLEISCHERZEUGUNG NACH ARTEN — 1 000 Stück

Schlachtungen insgesamt — Einfuhr und Ausfuhr lebender Tiere

Bruttoeigenerzeugung

Rinder ohne Kälber/Kälber/Schweine/Schafe und Ziegen/Einhufer

Schlachtungen insgesamt: Ochsen/Bullen/Kühe/Färsen

Countries: Data from monthly statistics,

EUR: total estimate

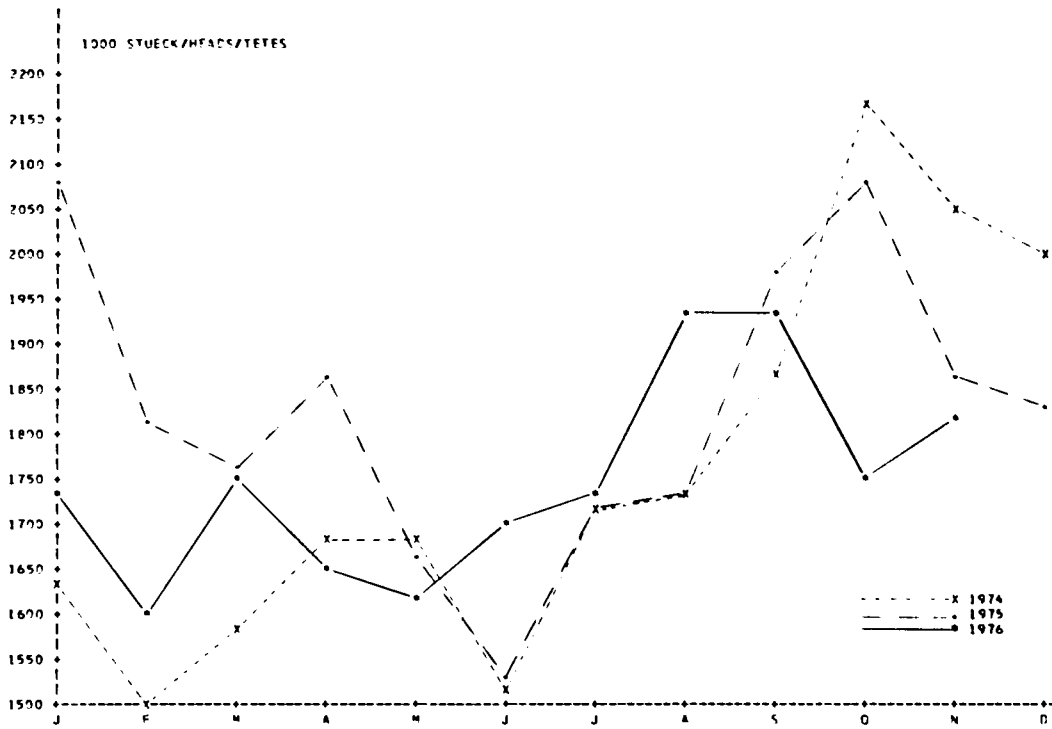

Pays: Résultats des relevés mensuels,

EUR: Estimation totale

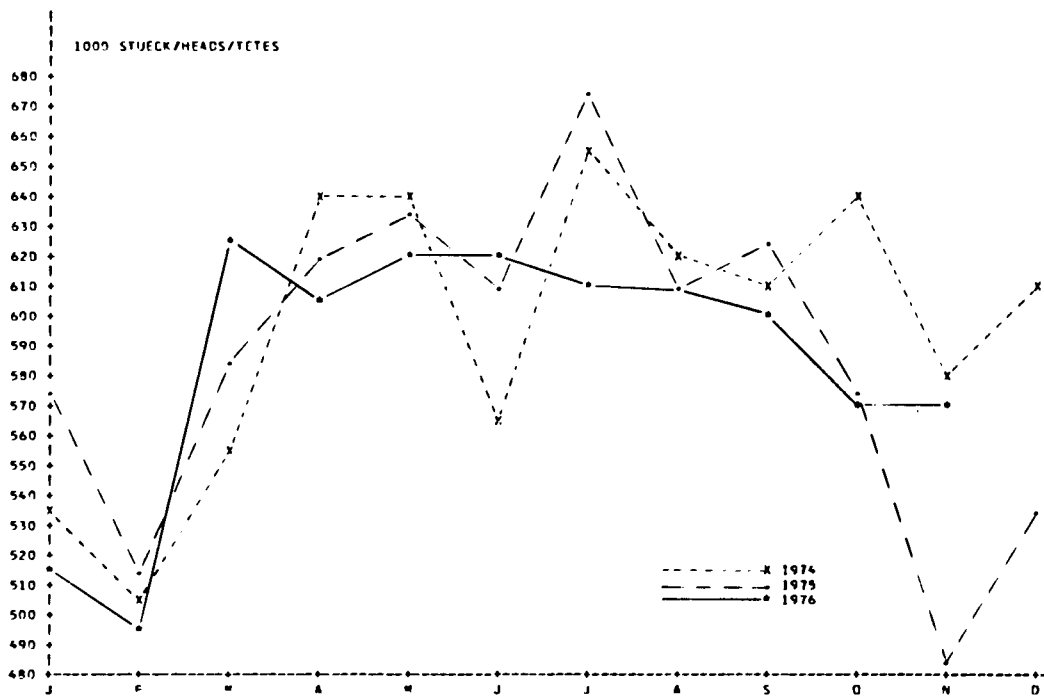

Länder: Ergebnisse der monatlichen Erhebungen,

EUR: Gesamtschätzung

PART II

MEAT PRODUCTION BY CATEGORIES — 1 000 tonnes

All slaughterings — Import and Export of live animals

Gross indigenous production

Cattle excluding calves/calves/pigs/sheep and goats/horses

Alle slaughterings: bullocks/bulls/heifers/cows

PARTIE II

PRODUCTION DE VIANDE PAR CATÉGORIES — 1 000 tonnes

Abattages totaux — Importation et Exportation d'animaux vivants

Production indigène brute

Gros bovins/veaux/porcs/moutons et chèvres/équidés

Abattages totaux: bœufs/taureaux/génisses/vaches

TEIL II

FLEISCHERZEUGUNG NACH ARTEN — 1 000 Tonnen

Schlachtungen insgesamt — Einfuhr und Ausfuhr lebender Tiere

Bruttoeigenerzeugung

Rinder ohne Kälber/Kälber/Schweine/Schafe und Ziegen/Einhufer

Schlachtungen insgesamt: Ochsen/Bullen/Kühe/Färsen

Countries: Data from monthly statistics,
EUR: total estimate
Pays: Résultats des relevés mensuels,
EUR: Estimation totale
Länder: Ergebnisse der monatlichen Erhebungen,
EUR: Gesamtschätzung
