

Lib

Strategic aspects of programmes -
Technology watch - Relations with Eurêka

Note for the attention of Mr FAYL
EEC Delegation, Washington D.C.

Curriculum Vitae

Michel CATINAT is a graduate of the Ecole Polytechnique. From 1975 to 1985, he worked with the Ministry of Finance in France. His field of activity first concerned economic research then economic modelisation. He contributed to the prospective and strategic reflections for the pluriannual programming of the French economic policy.

In 1986, he joined the Commission of the European Communities as Economic Advisor to the Director General of Economic and Financial Affairs. He contributed to the definition and analysis of the economic consequences of the completion of the European internal market.

Since March 1989, he is responsible of a strategic unit "Strategic Aspects of Programmes, Technology Watch, Relations with Eureka", directly attached to the Director General of Telecommunications, Information Industries and Innovation (DG XIII) of the Commission of the European Communities. The objective of this unit is to help the Director General analyse any strategic issues in the field of telecommunications, information technology and audiovisual industries: public R&D policies in Europe and abroad, company strategies, forecast of new enabling technologies and market opportunities.
