

EMPLOYMENT AND UNEMPLOYMENT

17.8.1981

EMPLOYEES IN INDUSTRY IN THE COMMUNITY (BY NACE CLASSES)

April 1975 - April 1980

Harmonised statistics on the numbers of employees are established each year with reference to the situation end March/beginning April. The following tables show the figures available for Industry (NACE 1-5) and up-date previous publications taking account of revisions in the series. The total for EUR 9 in 1980 has been estimated by EUROSTAT.

<u>LIST OF TABLES</u>	page
TAB 1 : EVOLUTION IN CERTAIN INDUSTRIAL ACTIVITIES % (compared with the previous year)	2
TAB 2 : PERCENTAGE IN CERTAIN INDUSTRIAL ACTIVITIES (as a proportion of total employees in industry)	4
TAB 3 : PERCENTAGE OF FEMALE EMPLOYEES IN EACH INDUSTRIAL ACTIVITY (as a proportion of total employees in each activity)	6
TAB 4 : NUMBER OF EMPLOYEES BY CLASS OF INDUSTRIAL ACTIVITY (in thousand)	9
Source of data	12

The presentation of the tables is conditioned by the computer. Only EUR 9 estimates based on less than nine countries are shown an asterisk.

SOURCE OF DATA

EMPLOYEES IN EMPLOYMENT BY NACE CLASSES

Harmonized statistics on employees in employment according to General Industrial Classification of Economic Activities within the European Communities (NACE) classes are drawn up annually on the basis of national surveys and processed applying Community concepts of both the definition of employees in employment and breakdown by activity. It refers to the situation at the end of March/beginning of April and covers all employees in employment on the territory of each Member State whatever the size of the establishment employing them.

Employees in employment consists of persons who work for an employer, whether public or private, and who receive compensation in the form of wages, salaries, fees, gratuities, payment by results or payment in kind.

The basic data were arrived at in each country as follows :

FR of Germany

Estimates by the Statistisches Bundesamt, based on the results of returns from employed persons subject to social security (Beschäftigtenstatistiken der Bundesanstalt für Arbeit). The statistics include civil servants and other persons not subject to social security.

France

INSEE estimates, based on the results of the general censuses of the population, updated by means of statements from employers to the National Union for Employment in Industry and Commerce (UNEDIC), and current statistics from the Ministry of Labour.

Italy

Estimates by the Ministry of Labour and Social Security, based on the results of quarterly surveys of employment in industrial undertakings with 10 or more employees, supplemented, in order to take small undertakings into account, by the results of the ISTAT labour force sample surveys.

Netherlands

Results of the survey on employed persons (werkzame personen) carried out by the CBS among a sample of undertakings with at least one employee.

Belgium

Results compiled by the Ministry of Labour for estimates of the number of workers subject to social security payments carried out by the National Social Security Office (ONSS).

Luxembourg

Estimates by STATEC on the basis of industrial surveys.

United Kingdom

Estimates by the Department of Employment using the results of the annual survey of employment conducted within all undertakings (Annual Census of Employment).

Ireland

The data are compiled in the new quarterly series, employment earnings and hours worked, where the NACE-classification has been introduced. The new series is linked to the annual Census of Industrial Production and carries revisions following on the availability of the final results of the 1975 Census of Production and other data.

Denmark

Estimates by the Danmarks Statistik based on current industrial statistics. The figures include employees in undertakings with less than six employees.
