Introduction

This catalogue of documents lists the COM Documents of the Commission of the European Communities, the Reports of the European Parliament and the Opinions and Reports of the Economic and Social Committee prepared during the reference period by the Office for Official Publications of the European Communities for distribution to the public on paper and microfiche.

This version of the catalogue takes account only of documents of which English language texts have been prepared. There are parallel catalogues covering documents in each of the eight other official languages of the European Community.

Presentation

The catalogue is divided into three parts.

Part I — **The classified index** provides a classification by subject, of the titles, under 19 headings (see 'List of Headings' on page 6). This list is largely based on that used for the *Directory of Community legislation in force*.

Each complete entry is preceded by a sequence number, which appears only once for each document title. The title of a document, however, may sometimes appear under more than one heading by virtue of the subject matter, and in this case the sequence number is given on the right-hand side of these secondary entries but there is no bibliographic reference (see detailed explanation on page 3).

Part II — **The alphabetical index** comprises all the keywords or key expressions appearing in the document. The list, compiled using the Eurovoc thesaurus (multilingual list of Community terminology), is based mainly on analysis and subsequent redefinition of the document using keywords or key expressions contained in the Eurovoc thesaurus. This thesaurus will be supplied to subscribers or users on request.

The index contains from one to five keywords for each document, set out in alphabetical order with as

many permutations as there are keywords. This makes for easier searches. The keywords are followed by two reference numbers. The first relates to the catalogue in which the document is found (3 indicates the quarterly catalogue for January-March, 6 indicates the quarterly catalogue for April-June and 9 indicates the catalogue for July-September). The second reference number shows the sequential position of the document in that catalogue (see detailed explanation on page 3).

Part III — **The numerical index** comprises all the documents in ascending numerical order, with the corresponding microfiche number.

Frequency and cumulation

Cumulative catalogues are published every three months. These, together with an annual catalogue, complement the monthly lists which only contain the thematic index.

Subscription system

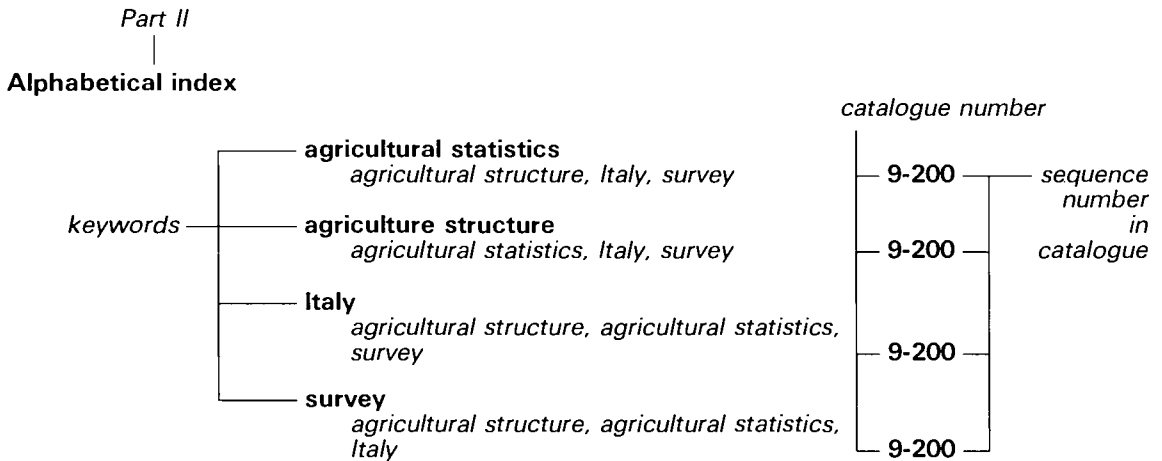

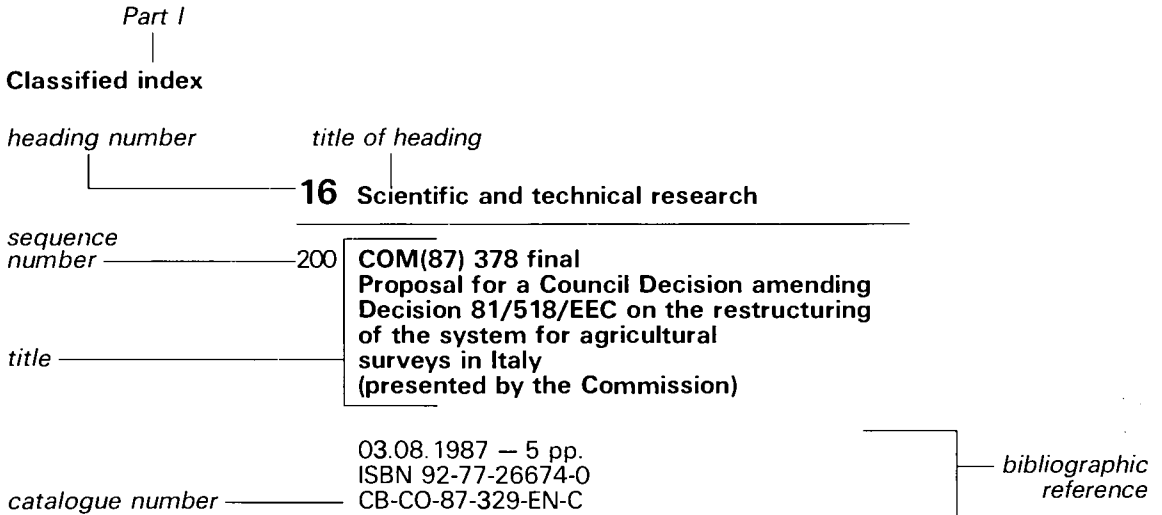

An attractive system of selective subscriptions is on offer for the paper versions of the three series of documents covered by this catalogue either individually or in combination.

Microfiche subscriptions are also available, but only for entire series, either individually or in combination.

More information can be obtained from the sales offices whose addresses are given on the inside back cover.

Other publications

Other European Community monographs — whether classed as publications or documents — as well as periodicals are listed in the catalogue *Publications of the European Communities*.

Note :

Each series of documents has an ISSN number :

- COM Documents: 0254-1475
- EP Reports: 0256-2375
- CES Opinions: 0255-0717

COMMISSION OF THE EUROPEAN COMMUNITIES

EUROPEAN CUSTOMS INVENTORY OF CHEMICALS

A guide to the tariff classification of chemicals in the combined nomenclature
(English version)

This work includes:

- 32 000 chemical names (internationally accepted common names, systematic names and synonyms).
- Nine languages: Danish, German, English, Greek, Spanish, French, Italian, Dutch and Portuguese.

Features of this publication are:

- The classification (heading and subheading) of a chemical in the new customs tariff of the European Communities can be ascertained immediately from its name in any one of the nine languages.
- The nomenclature in this new tariff (combined nomenclature) is based on the nomenclature of the 'harmonized commodity description and coding system' which entered into force on 1 January 1988.
- The equivalent names in all nine languages (multilingual glossary) obtainable by means of a common key-number (CUS No).
- A means of finding the CAS number (chemical abstracts registry number).

NEW TECHNOLOGY IN MANUFACTURING INDUSTRY

This information brochure is based on 26 case-studies conducted in Belgium, the Federal Republic of Germany, France, Italy and the United Kingdom on behalf of the European Foundation. The studies concentrate on the following areas:

- technological state of development of CNC machines, CAD/CAM systems and the degree of integration of design, planning and manufacturing;
- extent of introduction of integrated CAD/CAM systems;
- potential impact on manufacturing industry in economic and organizational terms;
- impact on the interaction between man, machine and work organization;
- development of a dynamic staff policy within the company, and its connection with training, skills and career development;
- impact on the 'users' of the system, and the interaction between those users;
- impact on employment in manufacturing industry.
