Monthly Bulletin

CONSUMER PRICE INDEX : MAY 1983

The Consumer Price Index for the European Community increased by 0.7% from April to May 1983. There were significant increases in Greece (1.8%), Denmark (1.1%) and Italy (1.0%). All the other member countries recorded increases below the Community average : the Netherlands (0.2%), Germany (FR) and the United Kingdom (0.4%), Belgium and Luxembourg (0.5%) and France (0.6%).

The increase over twelve months measured by comparing the May 1983 index with that of May 1982 for the Community as a whole was 8.6%. For the individual EC countries the increases over the twelve months to May 1983 were as follows :

Netherlands	2.5%	Luxembourg	8.6%
Germany	3.0%	France	8.9%
United Kingdom	3.7%	Ireland	12.5% *
Belgium	7.6%	Italy	16.2%
Denmark	7.7%	Greece	22.1%

* Mid-February 1983 compared with mid-February 1982

The increase for the Community of 8.6% compared with a year earlier represents a marked deceleration compared with the 11.4% recorded between May 1981 and May 1982.

The increases over the 12 months to May 1983 for the applicant Member States, Spain and Portugal, are about 12.5% and 20.4% respectively.

For the other countries for which EUROSTAT publishes regularly consumer price indices, the order of increase between April 1982 and April 1983 was : Japan 1.9%, Switzerland 3.0%, U.S.A. 3.9%, Austria 4.5%, Canada 6.6%, Sweden 8.5%, Norway 9.1%.

Methodological Note

1. The consumer price indices presented here are national indices which may appear under different titles in some of the countries. The development of the general index published by EUROSTAT is equivalent to that published by the country.
2. The components of this general index correspond to groupings of the national indices aggregated according to a harmonized classification of the ESA (European System of Integrated Economic Accounts). The price development of these components is equal to the price development of the national indices for the same components of the classification.
3. The scope of the general index differs according to each country. This can be due to population differences (specific income classes, certain socio-occupational categories, or all households); differences in geographic zones (capital, urban areas, rural areas); or differences in the concepts of expenditure on rent, health, etc. Finally methods of seasonal correction differ from country to country.
4. A fixed base system is used in some countries, while others use a chain system (variable weights). Base years may also differ between countries. For better comparison EUROSTAT has taken 1975 as the base year for all countries.
5. The EUR 10 indices are obtained from the arithmetic average of the national indices weighted by the relative share of each country in real values, as obtained for final household consumption and its components from the comparison in real values of the aggregates for 1975 (1975 has been derived from the new 1980 results).

Note méthodologique

1. Les indices de prix à la consommation présentés ici sont les indices nationaux. Ces indices portent des noms différents dans les différents pays. L'indice général publié par l'EUROSTAT correspond toujours, en évolution, à l'indice général publié par le pays.
2. Les composantes de cet indice général correspondent à des regroupements des indices nationaux agrégés selon une classification harmonisée conforme au SEC (Système Européen des Comptes nationaux). Les évolutions de prix correspondent pour ces regroupements aux évolutions constatées par les indices nationaux pour le même champ de classification.
3. Le champ couvert par l'indice général est différent selon les pays, aussi bien concernant la population concernée (tranche de revenu spécifique, certaines catégories socio-professionnelles, ou l'ensemble des ménages) que en ce qui concerne les zones géographiques concernées (capitale, zones urbaines, ensemble des pays, etc.) ou encore concernant les concepts de dépense pour les loyers, la santé, etc. Enfin les traitements statistiques concernant les corrections des variations saisonnières sont aussi différents selon les pays.
4. Un système de base fixe est utilisé dans certains pays, dans d'autres un système en chaîne est mis en oeuvre (pondérations variables). Les années de référence utilisées au niveau national pour présenter les indices, sont différentes selon les pays. Pour faciliter la comparaison l'EUROSTAT a choisi l'année 1975 comme année commune pour la présentation de ces indices.
5. Les indices EUR 10 sont obtenus comme moyenne arithmétique des indices nationaux pondérés par les parts relatives des différents pays en valeurs réelles, telles qu'elles ont été obtenues pour la consommation finale des ménages et ses composantes, lors de la comparaison en valeurs réelles des agrégats du SEC-1975 (1975 a été dérivé des nouveaux résultats pour 1980).
