

CONSUMER PRICE INDEX

Monthly Bulletin

Consumer price index in November 1983

The consumer price index for the European Community rose by 0.6% between October and November 1983. Important increases were recorded in Greece (1.3%), Italy (1.0%) and Denmark (0.7%).

Ireland reported an increase of 1.8% between mid-August and mid-November 1983, which means an average increase of \pm 0.6% during the last three months. Increases were under the EC average in all the other member countries: 0.5% in France, Belgium and Luxembourg, 0.4 in the United Kingdom, 0.3% in the Netherlands and 0.2% in Germany (FR).

The increase over 12 months by comparing the November 1983 index with the one for November 1982 is 8.1% for the Community as a whole.

Given that increases for December are normally moderate, it can be estimated at present that the figure for the whole year 1983 will also be about 8.0%.

On the base of figures for 11 months Eurostat estimates that the rates of increase for the year 1983 will be as follows in the individual countries (rounded to the nearest 0.5%):

Germany (FR)	2.5%	France	10.0%
Netherlands	3.0%	Ireland	10.0%
United Kingdom	4.5%	Italy	12.5%
Denmark	5.5%	Greece	20.0%
Belgium	7.0%	Spain	12.0%
Luxembourg	8.0%	Portugal	30.0%

For the other countries for which Eurostat regularly publishes consumer price indices the rates of increase during the year 1983 will be as follows:

U S A	2.5%	Switzerland	2.0%
Canada	5.0%	Austria	3.5%
Japan	2.0%	Norway	7.5%
		Sweden	8.5%

Latest data at: 19 December 1983

METHODOLOGICAL NOTES

1. The consumer price indices presented here are national indices which may appear under different titles in some of the countries. The development of the general index published by EUROSTAT is equivalent to that published by the country.
2. The components of this general index correspond to groupings of the national indices aggregated according to a harmonized classification of the ESA (European System of Integrated Economic Accounts). The price development of these components is equal to the price development of the national indices for the same components of the classification.
3. The scope of the general index differs according to each country. This can be due to population differences (specific income classes, certain socio-occupational categories, or all households), differences in geographic zones (capital, urban areas, rural areas), or differences in the concepts of expenditure on rent, health, etc.. Finally methods of seasonal correction differ from country to country.
4. A fixed base system is used in some countries, while others use a chain system (variable weights). Base years may also differ between countries. For better comparison EUROSTAT has taken 1975 as the base year for all countries.
5. The EUR 10 indices are obtained from the arithmetic average of the national indices weighted by the relative share of each country in real values, as obtained for final household consumption in real values of the aggregates for 1975 (1975 has been derived from the new 1980 results).

NOTE METHODOLOGIQUE

1. Les indices de prix à la consommation présentée ici sont les indices nationaux. Ces indices portent des noms différents dans les différents pays. L'indice général publié par l'EUROSTAT correspond toujours, en évolution, à l'indice général publié par le pays.
2. Les composantes de cet indice général correspondent à des regroupements des indices nationaux agrégés selon une classification harmonisée conforme au SEC (Système européen des Comptes nationaux). Les évolutions de prix correspondent pour ces regroupements aux évolutions constatées par les indices nationaux pour le même champ de classification.
3. Le champ couvert par l'indice général est différent selon les pays, aussi bien concernant la population concernée (tranche de revenu spécifique, certaines catégories socio-professionnelles ou l'ensemble des ménages) que en ce qui concerne les zones géographiques concernées (capitale, zones urbaines, ensemble du pays, etc.) ou encore concernant les concepts de dépense pour les loyers, la santé, etc.. Enfin les traitements statistiques concernant les corrections des variations saisonnières sont aussi différents selon les pays.
4. Un système de base fixe est utilisé dans certains pays, dans d'autres un système en chaîne est mis en œuvre (pondérations variables). Les années de référence utilisées au niveau national pour présenter les indices, sont différentes selon les pays. Pour faciliter la comparaison l'EUROSTAT a choisi l'année 1975 comme année commune pour la présentation de ces indices.
5. Les indices EUR 10 sont obtenus comme moyenne arithmétique des indices nationaux pondérés par les parts relatives des différents pays en valeurs réelles, telles qu'elles ont été obtenues pour la consommation finale des ménages et ses composantes, lors de la comparaison en valeurs réelles des agrégats du SEC-1975 (1975 a été dérivé des nouveaux résultats pour 1980).
