

CONSUMER PRICE INDEX

Monthly Bulletin

Consumer price indices in May 1984

The consumer price index for the EC as a whole rose by 0.5% between April and May 1984.

The increase over the year as measured by comparing the index for May 1984 with that for May 1983 is 7.5%.

This figure shows the slowing down of inflation for the EC countries as a whole for more than two years. The rate decreased from 11.4% in May 1982 to 8.6% in May 1983 to 7.5% in May 1984. (See graph on page 3). The corresponding figures for the Member States still vary considerably both for the over-the-year increase as well as for the monthly increase (see table A).

The most important rises in May 1984 were recorded in Greece (1.5%) and in Denmark which is estimated at 1.1%, largely attributable to the half-yearly increase of rents.

The Italian index is estimated to rise by 0.8%, whereas moderate increases are reported from France (0.5%), the United Kingdom (0.4%) and Luxembourg (0.4%).

Prices increased only slightly in Belgium (0.2%), in the FR of Germany (0.1%) and remained unchanged in the Netherlands.

The quarterly index for Ireland went up by 2.3% between mid-February and mid-May 1984, which means a monthly increase of about 0.8%. The rates of increase for some important other countries are: Switzerland -0.2%, Sweden 0.7%, Canada +0.2%, United States 0.3% and Japan 0.4%.

N.B. The May figures for Italy and Denmark have been estimated by EUROSTAT, whereas those for France and the Netherlands are provisional.

Latest date: June 25

Also available in FR.
