

CONSUMER PRICE INDEX

RAPID INFORMATION

THE CONSUMER PRICE INDEX IN FEBRUARY 1985

The consumer price index for the EC as a whole rose by 0.6 % between January and February 1985. This was the second consecutive month in which the increase was higher than the monthly average increase during 1984.

These increases are largely attributable to higher prices for fresh fruit and vegetables, caused by the weather in these two months and to rises in prices of oil products invoiced in Dollars, for which the exchange rates went up sharply during this period.

The rates of increase by country in February are as follows: Netherlands 0.3 %, Germany (FR) 0.4 %, France 0.5 %, Luxembourg 0.6 %, Denmark 0.7 %, United Kingdom 0.8 %, Belgium 1.0 %, Italy 1.0 %.

Only Greece reported a slight decrease (-0.2 %), resulting entirely from the winter sales of clothing and footwear.

The quarterly index for Ireland went up by 1.9 % between mid-November 1984 and mid-February 1985, which means an average increase of about 0.6 % per month.

The inflation rate for this country over 12 months (February 1985 compared to February 1984) is 6.2 %, whereas this figure was 10.2 % in February 1984, 12.5 % in February 1983 and 18.9 % in February 1982.

For the Community as a whole, the inflation over-the-year as measured by comparing the CPI for February 1985 with that for February 1984 stood at 5.6 %, remaining thus the same as the average rate for 1984.

For the individual countries these rates are as follows: Germany (FR) 2.3 %, Netherlands 2.3 %; United Kingdom 5.4 %, Belgium 5.4 %, Denmark 5.4 %, Ireland 6.2 %, France 6.4 %, Italy 9.0 %, Greece 18.6 %.

N.B. The revised index for Luxembourg is not yet available at base 1980=100
