## UNEMPLOYMENT IN THE COMMUNITY

October 1991

**Based on the most recent results of the Community Labour Force Survey, the seasonally-adjusted unemployment rate in the European Community is estimated by Eurostat at 9.3% for the month of October 1991. This represents an increase of 0.2 percentage points in relation to the previous month. This rate is estimated after correction of the differences between national methods of recording unemployment.**

Between September and October 1991, there was a particularly significant rise in unemployment rates in Spain (+0.4 percentage points) and in Italy (+0.3 percentage points), two countries where rates of unemployment had remained stable over the previous 12 months.

Unemployment increased slightly over the last month in Ireland and the United Kingdom (+0.1 percentage points), continuing a trend that began in early 1990.

The rate of unemployment has also increased significantly among young persons (+0.3 percentage points to 17.6%). Unemployment among persons aged under 25 is rising in the majority of Members States, particularly in Italy (+1.0 percentage point) and in Spain (+0.6 percentage points).

**Due to a lack of sufficient statistical data, the unemployment rates used for comparisons between Member States continue to relate to the territory of the Community and the Federal Republic of Germany according to their frontiers before 3rd October 1990. Further information can be found on page 10.**

### Method of estimating unemployment rates for comparison between Member States

1. The unemployment rates for comparison between Member States are calculated according to the recommendations of the 13th International Conference of Labour Statisticians organised by the International Labour Office (ILO) in 1982.  
In the Community labour force survey, a person is considered as unemployed if he/she is aged 14 or over, without work, actively seeking work and immediately available for work.  
The unemployment rate is the number of unemployed as a percentage of the working population (armed forces excluded). Working population includes both those in employment and unemployed persons.
2. The Community labour force survey is carried out in the spring of each year(1). The monthly estimates are made using the best available national indicator of unemployment.  
The number of persons registered at employment offices, and the number of unemployed (ILO definition) taken from the quarterly labour force surveys carried out in Spain and Portugal, are considered to be the best national indicators of unemployment. No such reliable monthly indicator exists for Greece.
3. The estimate is made separately for each sex, for persons under 25 years of age and those aged 25 years and over. Totals are obtained by the addition of these categories.
4. Both seasonally adjusted and non-adjusted rates are published. The seasonal adjustment is carried out using the X-11 method of the US Bureau of the Census.
5. For a more detailed explanation of the method of calculation, see: UNEMPLOYMENT RATES FOR COMPARISON BETWEEN MEMBER STATES : Methods and definitions (EUROSTAT, published soon) and COMMUNITY LABOUR FORCE SURVEY : Methods and definitions (EUROSTAT, 1988).

(1) The most recent results are based on the 1990 surveys, except for Federal Republic of Germany, Netherlands and Ireland (1989).

## **Definition of the number of persons registered at employment offices**

The tables on page 8 contain national series of the number of persons registered at employment offices. The data given are standardized to the greatest extent possible at the present time and may differ in some cases from those normally used by the individual countries. Differing national legislation and administrative procedures in the Member States prevent the establishment of comparable figures. The data should therefore be used only for the identification of trends. They are not suitable for inter-country comparisons of absolute levels.

In principle, persons registered at employment offices are those without a job who are seeking work as employees and are immediately available for work. Workers on short time for economic or meteorological reasons are excluded.

The following national series are used:

### **BELGIUM**

All persons in the following categories registered at employment offices: wholly unemployed persons in receipt of benefit, other unemployed persons compulsorily registered and voluntarily registered persons without work; series provided by the Office National de l'Emploi.

### **DENMARK**

Persons seeking full-time or part-time employment, whether or not they are members of an unemployment insurance fund; series provided by Danmarks Statistik.

### **FEDERAL REPUBLIC OF GERMANY**

Unemployed persons registered at public employment offices and seeking work as employees for at least 18 hours per week; series provided by the Bundesanstalt für Arbeit.

### **GREECE**

Persons registered at employment offices (OAED); series provided by the Ministry of Labour. The Greek registration and benefit system for unemployed persons differs considerably from that in other Community countries so that, even if the different employment structure in Greece is taken into account, the number of persons registered as unemployed does not reflect the true level of unemployment.

### **SPAIN**

Unemployed persons registered at public employment offices and seeking work as employees for 20 hours or more per week; series provided by the Ministerio de Trabajo y Seguridad Social.

### **FRANCE**

Unemployed persons registered at the Agence de l'Emploi and seeking permanent full-time employment (demeureurs de catégorie 1); series provided by the Ministère du Travail, de l'Emploi et de la Formation Professionnelle.

### **IRELAND**

Claimants for unemployment benefit, applicants for unemployment assistance and others seeking work who are registered with the employment services of the Department of Social Welfare. Excluded are persons seeking part-time employment; series provided by the Central Statistics Office.

### **ITALY**

Persons without work, persons seeking their first job, persons working part-time for less than 20 hours per week and workers on a fixed-term contract of not more than 4 months in any 12-month period, who are looking for a different job; series provided by the Ministero del Lavoro e della Previdenza Sociale.

### **LUXEMBOURG**

Unemployed persons registered at employment offices and seeking work as employees for at least 20 hours per week; series provided by the Administration de l'Emploi.

### **NETHERLANDS**

Persons registered at employment offices, between the ages of 16 and 64 years, without work and immediately available for paid employment for at least 20 hours a week; series provided by the Centraal Bureau voor Statistiek. Since 1988, the figures are based on a combination of registration data provided by the public employment offices and data from the monthly labour force survey. Before 1988, the figures were based on the registration only.

### **PORUGAL**

Persons registered at employment offices who are available for work within 30 days after registration; series provided by the Instituto de Emprego e Formação Profissional.

### **UNITED KINGDOM**

Persons seeking full-time work and claiming unemployment benefit because they are out of work; series provided by the Department of Employment.

## **Federal Republic of Germany Unemployment in the five new Länder and East Berlin**

### **Unemployment rates for comparison between Member States**

The five new Länder and East Berlin, being part of the Federal Republic of Germany (and therefore of the Community) since 3rd October 1990, will be included in the estimation of unemployment rates according to the ILO definition, as soon as the results of the first Community labour force survey for these territories are available. These new territories will be included for the first time in the survey of spring 1991.

### **Persons registered at unemployment offices**

The system of registration at unemployment offices has been applied in the five new Länder and East Berlin according to the norms and practices already in use in the other Länder of the Federal Republic of Germany. The following table shows the relevant data by sex:

### **Number of persons registered at unemployment offices in the five new Länder and East Berlin**
