Eurostat hat die Aufgabe, den Informationsbedarf der Kommission und aller am Aufbau des Binnenmarktes Beteiligten mit Hilfe des europäischen statistischen Systems zu decken.

Um der Öffentlichkeit die große Menge an verfügbaren Daten zugänglich zu machen und Benutzern die Orientierung zu erleichtern, werden zwei Arten von Publikationen angeboten: Statistische Dokumente und Veröffentlichungen.

Statistische Dokumente sind für den Fachmann konzipiert und enthalten das ausführliche Datenmaterial: Bezugsdaten, bei denen die Konzepte allgemein bekannt, standardisiert und wissenschaftlich fundiert sind. Diese Daten werden in einer sehr tiefen Gliederung dargeboten. Die Statistischen Dokumente wenden sich an Fachleute, die in der Lage sind, selbständig die benötigten Daten aus der Fülle des dargebotenen Materials auszuwählen. Diese Daten sind in gedruckter Form und/oder auf Diskette, Magnetband, CD-ROM verfügbar. Statistische Dokumente unterscheiden sich auch optisch von anderen Veröffentlichungen durch den mit einer stilisierten Graphik versehenen weißen Einband.

Veröffentlichungen wenden sich an eine ganz bestimmte Zielgruppe, wie zum Beispiel an den Bildungsbereich oder an Entscheidungsträger in Politik und Verwaltung. Sie enthalten ausgewählte und auf die Bedürfnisse einer Zielgruppe abgestellte und kommentierte Informationen. Eurostat übernimmt hier also eine Art Beraterrolle.

Für einen breiteren Benutzerkreis gibt Eurostat Jahrbücher und periodische Veröffentlichungen heraus. Diese enthalten statistische Ergebnisse für eine erste Analyse sowie Hinweise auf weiteres Datenmaterial für vertiefende Untersuchungen. Diese Veröffentlichungen werden in gedruckter Form und in Datenbanken angeboten, die in Menütechnik zugänglich sind.

Um Benutzern die Datensuche zu erleichtern, hat Eurostat Themenkreise, d. h. eine Untergliederung nach Sachgebieten, eingeführt. Daneben sind sowohl die Statistischen Dokumente als auch die Veröffentlichungen in bestimmte Reihen, wie zum Beispiel „Jahrbücher“, „Konjunktur“, „Methoden“, untergliedert, um den Zugriff auf die statistischen Informationen zu erleichtern.

Y. Franchet
Generaldirektor

It is Eurostat's responsibility to use the European statistical system to meet the requirements of the Commission and all parties involved in the development of the single market.

To ensure that the vast quantity of accessible data is made widely available, and to help each user make proper use of this information, Eurostat has set up two main categories of document: statistical documents and publications.

The statistical document is aimed at specialists and provides the most complete sets of data: reference data where the methodology is well-established, standardized, uniform and scientific. These data are presented in great detail. The statistical document is intended for experts who are capable of using their own means to seek out what they require. The information is provided on paper and/or on diskette, magnetic tape, CD-ROM. The white cover sheet bears a stylized motif which distinguishes the statistical document from other publications.

The publications proper tend to be compiled for a well-defined and targeted public, such as educational circles or political and administrative decision-makers. The information in these documents is selected, sorted and annotated to suit the target public. In this instance, therefore, Eurostat works in an advisory capacity.

Where the readership is wider and less well-defined, Eurostat provides the information required for an initial analysis, such as yearbooks and periodicals which contain data permitting more in-depth studies. These publications are available on paper or in videotext databases.

To help the user focus his research, Eurostat has created 'themes', i.e. subject classifications. The statistical documents and publications are listed by series: e.g. yearbooks, short-term trends or methodology in order to facilitate access to the statistical data.

Y. Franchet
Director-General

Pour établir, évaluer ou apprécier les différentes politiques communautaires, la Commission européenne a besoin d'informations.

Eurostat a pour mission, à travers le système statistique européen, de répondre aux besoins de la Commission et de l'ensemble des personnes impliquées dans le développement du marché unique.

Pour mettre à la disposition de tous l'importante quantité de données accessibles et faire en sorte que chacun puisse s'orienter correctement dans cet ensemble, deux grandes catégories de documents ont été créées: les documents statistiques et les publications.

Le document statistique s'adresse aux spécialistes. Il fournit les données les plus complètes: données de référence où la méthodologie est bien connue, standardisée, normalisée et scientifique. Ces données sont présentées à un niveau très détaillé. Le document statistique est destiné aux experts capables de rechercher, par leurs propres moyens, les données requises. Les informations sont alors disponibles sur papier et/ou sur disquette, bande magnétique, CD-ROM. La couverture blanche ornée d'un graphisme stylisé démarque le document statistique des autres publications.

Les publications proprement dites peuvent, être réalisées pour un public bien déterminé, ciblé, par exemple l'enseignement ou les décideurs politiques ou administratifs. Des informations sélectionnées, triées et commentées en fonction de ce public lui sont apportées. Eurostat joue, dès lors, le rôle de conseiller.

Dans le cas d'un public plus large, moins défini, Eurostat procure des éléments nécessaires à une première analyse, les annuaires et les périodiques, dans lesquels figurent les renseignements adéquats pour approfondir l'étude. Ces publications sont présentées sur papier ou dans des banques de données de type vidéotex.

Pour aider l'utilisateur à s'orienter dans ses recherches, Eurostat a créé les thèmes, c'est-à-dire une classification par sujet. Les documents statistiques et les publications sont répertoriés par série — par exemple, annuaire, conjoncture, méthodologie — afin de faciliter l'accès aux informations statistiques.

EINLEITUNG

In der vorliegenden Reihe veröffentlicht das Statistische Amt der Europäischen Gemeinschaften in regelmäßigen Abständen die detaillierten Ergebnisse der harmonisierten Statistiken der Verdienste der Arbeiter und der Angestellten in der Industrie und im Dienstleistungsbereich.

Die für die Interpretation der Ergebnisse erforderlichen Informationen über Methoden und Definitionen sowie eine Darstellung der Methodik der nationalen Erhebungen, auf denen die harmonisierte Verdienstatistik basiert, sind in der 1992 erschienenen Eurostat-Veröffentlichung: Harmonisierte Verdienstatistik, Methodologie der nationalen Erhebungen enthalten. Diese Veröffentlichung soll die bei den nationalen Erhebungen angewandten Verfahren verdeutlichen und so eine genauere Bewertung der Vergleichbarkeit der veröffentlichten Daten ermöglichen.

Die harmonisierte Verdienstatistik enthält Angaben über den Bruttostundenverdienst, der den Arbeitern in der Industrie tatsächlich gewährt wird, sowie Angaben über den Bruttomonatsverdienst der Angestellten in der Industrie und im Dienstleistungsgewerbe (Groß- und Einzelhandel, Kreditwesen, Versicherungsgewerbe, Gaststätten und Beherbergungsgewerbe, Verkehr und Nachrichtenübermittlung). Die Daten zum Dienstleistungsgewerbe liegen jedoch nicht für alle Länder vor.

Die Daten sind nach der NACE (Allgemeine Systematik der Wirtschaftszweige in den Europäischen Gemeinschaften) gegliedert; es werden systematisch alle zweistelligen NACE-Positionen sowie bestimmte weitergehende Untergliederungen, auf deren Berücksichtigung sich die Mitgliedstaaten geeinigt haben.

Auf der Basis dieser Angaben ist es außerdem möglich, die kurzfristige Entwicklung in den verschiedenen Ländern auf einheitlicher Basis zu vergleichen.

Außerdem enthält die vorliegende Veröffentlichung Angaben für jeweils vier Hauptbereiche der Industrie und der Dienstleistungen sowie Angaben über die Monatsverdienste der Angestellten in der Industrie und im Dienstleistungsbereich. Diese Daten werden in Ecu und in Kaufkraftstandards (KKS) umgerechnet, was einen unmittelbaren Vergleich der Verdienstniveaus in den einzelnen Mitgliedstaaten ermöglicht (siehe Erläuterung zu Tabelle I/1/c).

Die Ergebnisse der Statistiken werden ferner in ausführlicher Darstellung nach Mitgliedstaaten (B, D, I, NL, UK auch nach Regionen), aufgeführt. In den Tabellen I/1 bis I/4 sind die Bruttostundenverdienste der Arbeiter in der Industrie ausgewiesen. Die Bruttomonatsverdienste der Angestellten in der Industrie sind in den Tabellen II/1 bis II/3 aufgeführt. Die Tabellen III/1 bis III/3 geben die Bruttomonatsverdienste der Angestellten im Dienstleistungsbereich wieder.

Zur Beachtung:

Neue Daten für Deutschland

In diesem Band veröffentlicht Eurostat Angaben über die Verdienste der Arbeiter und Angestellten in der Bundesrepublik Deutschland nach dem Gebietsstand vor dem 3. Oktober 1990 sowie - neben regionalen Daten für das frühere Bundesgebiet - erstmals Angaben über die Arbeiterverdienste in den neuen Ländern und Berlin-Ost. Die Angaben über die Angestelltenverdienste in den neuen Ländern und Berlin-Ost werden in dieser Veröffentlichung nicht ausgewiesen, liegen aber in den Eurostat-Datenbanken vor.

Änderungen in der Methodik in den Niederlanden

Seit 1991 werden auch die Daten berücksichtigt, die abhängig Beschäftigte betreffen, die unter das Gesetz über die Beschäftigung körperlich oder geistig Behinderter fallen.

Die niederländische Erhebung (Jaarlijks Onderzoek naar Werkgelegenheid en Lonen) besteht aus einem Teil Beschäftigung (der sich auf 70 000 Unternehmen erstreckt) und einem Teil Verdienste (20 000 Unternehmen). Früher basierte die Verdienstatistik ausschließlich auf den Ergebnissen des Erhebungsteils Verdienste. Nach der neuen Methodik werden die Ergebnisse des Teils Verdienste mit Hilfe der genaueren Beschäftigungsinformationen des Erhebungsteils Beschäftigung und der Arbeitskonten (Arbeidsrekeningen) gewichtet. Die hier veröffentlichten Daten für 1991 und 1992 basieren auf der neuen Methodik.

Überarbeitete Reihen für das Vereinigte Königreich

Die jährliche Oktobererhebung über die Verdienste der Arbeiter im Vereinigten Königreich ist eingestellt worden. Bisher hat Eurostat für seine harmonisierte Verdienstatistik die Daten über die Stundenverdienste der Arbeiter im Vereinigten Königreich dieser vom Arbeitsministerium durchgeführten Erhebung entnommen. Seit 1991 ist der im April durchgeführte New Earnings Survey (NES) die Quelle für diese Daten.

Um die Kohärenz der in Tabelle I/3 aufgeführten Reihen für die vergangenen Jahre zu gewährleisten, werden NES-Daten über die Stundenverdienste der Arbeiter ab April 1982 aufgeführt. Angaben, die sich auf einen früheren Zeitpunkt beziehen, basieren weiterhin auf der Oktobererhebung. Zwischen Oktober 1981 und April 1982 liegt ein Bruch in den Reihen vor. Da sich die NES-Daten auf den April eines jeden Jahres beziehen, werden die Schätzungen für Oktober anhand der Veränderungen der entsprechenden Größen des monatlichen Index der Durchschnittsverdienste vorgenommen.

Was die Regionaldaten über die Stundenverdienste der Arbeiter (Tabelle I/4) angeht, so wurden die bisherigen Angaben ab April 1989 durch die NES-Daten ersetzt. Alle Daten, die sich auf einen früheren Zeitraum beziehen, basieren auf der Oktobererhebung und sind nicht uneingeschränkt mit den NES-Angaben vergleichbar.

Für alle das Vereinigte Königreich betreffenden Reihen wurde bei den Daten, die sich auf die Zeit vor April 1991 beziehen, eine Anpassung vorgenommen, da sich zwischen 1990 und 1991 aufgrund einer Änderung in der Berufsklassifikation die Definition von Arbeitern und Angestellten geändert hat.

INTRODUCTION

This publication, issued regularly by the Statistical Office of the European Communities, gives detailed results of the harmonised statistics on the earnings of manual and non-manual workers in industry and certain activity groups in the services sector.

The description of the methods and definitions, necessary for the interpretation of these statistics, as well as the methodology of the national surveys on which the harmonised statistics of earnings published by Eurostat in 1992 are outlined in: Harmonised statistics of earnings, methodology of national surveys.

With the publication of this methodology, Eurostat aims to make accessible the methods used in the national surveys, thus allowing a better evaluation of the comparability of the published data.

The harmonized statistics of earnings provide information on the hourly gross amounts actually paid to industrial manual workers and the gross monthly earnings of non-manual workers in industry and services (wholesale and retail distribution, credit institutions and insurance, hotels and catering, transports and communications).

The data are broken down according to NACE (General industrial classification of economic activities within the European Communities); they include all two-digit headings plus a number of more detailed subdivisions agreed by the countries.

Short-term trends in the various countries can therefore be compared on the same basis from this information.

The publication also gives the hourly earnings of manual workers in industry and the monthly earnings of non-manual workers in industry and in services converted into ecus and purchasing power standards (PPS) for major groups of economic activities; this means that the level of earnings in the various countries can be compared directly (see explanatory note to Table I/1/c).

The results of the statistics are given in detail by country and, for some countries (B, D, I, NL, UK), by region. Tables I/1 to I/4 cover the gross hourly earnings of industrial manual workers. The gross monthly earnings of non-manual workers in industry are given in Tables II/1 to II/3. Tables III/1 to III/3 show the gross monthly earnings of non-manual workers in services.

Warning:

New data for Germany

In this volume Eurostat is publishing data on the earnings of manual and non-manual workers in the Federal Republic of Germany, including West-Berlin, as constituted prior to 3 October 1990, as well as - alongside the regional data for that territory - data on the earnings of manual workers for the new Landers, including East Berlin.

The data on the earnings of non-manual workers for the new Landers, including East Berlin, have not been included in this publication but are available in Eurostat's databases.

Methodological changes in the Netherlands

From 1991 onwards, the data concerning employees who are covered by the law on the employment of physically or mentally disabled persons are also taken into account.

The Dutch survey (Jaarlijks Onderzoek naar Werkgelegenheid en Lonen) comprises an employment section (covering 70 000 enterprises) and an earnings section (20 000 enterprises).

Formerly, the statistics concerning earnings were exclusively based on the results of the earnings section. In the new methodology, the earnings sections results are weighted according to the more precise employment-information from the employment section and the Labour Accounts (Arbeidsrekeningen). The data published here for 1991 and 1992 follow the new methodology.

Revised series for United Kingdom

The annual October survey of the earnings of manual employees in United Kingdom has been discontinued. This survey, conducted by the Department of Employment, has been the traditional source of data on hourly earnings of manual workers in United Kingdom for Eurostat's harmonized statistics of earnings. From 1991 onwards, figures will be taken from the results of the April New Earnings Survey (NES).

In order to provide a consistent retrospective series for hourly earnings of manual workers in Table I/3, NES figures going back to April 1982 are presented. Before that date figures will remain based on the October survey, so there is a discontinuity in the series between October 1981 and April 1982. As the NES figures relate to April of each year, estimates for October are calculated based on movements in appropriate components of the monthly Average Earnings Index.

Regional data on hourly earnings of manual workers (table I/4) have been replaced with NES figures back to April 1989. Before that period all figures are based on the October survey and are not fully comparable with the NES.

For all the United Kingdom series, pre-April 1991 data have been adjusted for a discontinuity occurring between 1990 and 1991 in the definition of manual and non-manual workers due to a change in the occupational classification.

INTRODUCTION

Dans cette publication, l'Office Statistique des Communautés Européennes présente régulièrement les résultats détaillés des statistiques harmonisées des gains des ouvriers et des employés dans l'industrie et dans certains groupes d'activité des services.

La description des méthodes et définitions, nécessaires à l'interprétation de ces statistiques, ainsi que la méthodologie des enquêtes nationales à la base de la statistique harmonisée des gains a fait objet d'une publication d'Eurostat en 1992: Statistique harmonisée des gains, méthodologie des enquêtes nationales. Avec la publication de cette méthodologie, Eurostat vise à rendre accessibles les méthodes utilisées dans les enquêtes nationales, permettant ainsi une meilleure évaluation de la comparabilité des données publiées.

La statistique harmonisée des gains donne des information sur le montant horaire des gains bruts effectivement versés aux ouvriers de l'industrie ainsi que sur les gains mensuels bruts des employés de l'industrie et des services (commerce de gros et de détail, institutions de crédit, assurances, restauration et hébergement, transports et communications). Néanmoins, les données relatives aux activités des services ne sont pas disponibles pour tous les pays.

Les données sont ventilées selon la NACE (Nomenclature générale des activités économiques dans les Communautés Européennes); elles présentent de manière systématique toutes les positions à deux chiffres, ainsi que certaines subdivisions plus détaillées, arrêtées de commun accord entre les pays.

Ces informations permettent, notamment, de comparer l'évolution à court terme dans les différents pays, sur des bases identiques.

Par ailleurs, cette publication présente, pour les grands groupe d'activité, les gains horaires des ouvriers dans l'industrie et les gains mensuels des employés dans l'industrie et les services convertis en ECU et en standards de pouvoir d'achat (SPA), permettant ainsi une comparaison directe du niveau des gains entre pays (voir note explicative du tableau I/1C).

Les résultats des statistiques sont présentés de façon détaillée par pays et, pour certains pays (B, D, I, NL, UK), par région. Les tableaux I/1 à I/4 concernent les gains horaires bruts des ouvriers dans l'industrie. Les gains mensuels bruts des employés dans l'industrie sont donnés aux tableaux II/1 à II/3. Les tableaux III/1 à III/3 se rapportent aux gains mensuels bruts des employés dans les services.

Avertissements:

République Fédérale d'Allemagne

Dans ce volume, Eurostat publie des données des gains des ouvriers et des employés de la République fédérale d'Allemagne dans sa situation territoriale avant le 3 octobre 1990 ainsi que, jointes aux données régionales pour ce territoire, des données des gains des ouvriers pour le territoire des nouveaux Landers, Berlin Est inclus. Les données concernant les gains des employés pour les nouveaux Landers, Berlin Est inclus ne sont pas présentées dans cette publication mais sont disponibles dans les bases de données d'Eurostat.

Changements méthodologiques aux Pays-Bas

Depuis 1991, les données concernant les personnes relevant de la loi relative à l'emploi des handicapés physiques et sociaux sont également prises en compte.

L'enquête annuelle (Jaarlijks Onderzoek naar Werkgelegenheid en Lonen - JWL) comprend deux volets, à savoir un volet "emploi" (concernant 70 000 entreprises) et un volet "salaire" (20 000 entreprises).

Auparavant, les statistiques des gains étaient basées exclusivement sur les résultats du volet "gains". Dans la nouvelle méthodologie, les résultats des gains sont pondérés suivant l'information emploi plus précise en provenance du volet "emploi" de la JWL et des comptes du travail (Arbeidsrekeningen).

Séries révisées pour le Royaume-Uni

L'enquête annuelle d'octobre sur les gains des ouvriers au Royaume-Uni a été arrêtée. Cette enquête, dirigée par le ministère de l'Emploi, a constitué la source traditionnelle de données sur les gains horaires des ouvriers au Royaume-Uni pour les statistiques harmonisées des gains d'Eurostat. A partir de 1991, les données proviennent des résultats de la nouvelle enquête sur les gains d'avril (New Earnings Survey, NES).

Afin de fournir une série rétrospective cohérente pour les gains horaires des ouvriers dans le tableau I/3, on a fait figurer les chiffres NES remontant à avril 1982. Avant cette date, les chiffres resteront basés sur l'enquête d'octobre, ce qui fait apparaître une discontinuité dans les séries entre octobre 1981 et avril 1982. Etant donné que les chiffres NES font référence à avril de chaque année, les estimations pour octobre sont calculées sur base des évolutions de l'indice mensuel des gains moyens.

Les données régionales sur les gains horaires des travailleurs manuels (tableau 1/4) ont été remplacées par des chiffres NES jusqu'en avril 1989. Avant cette période, tous les chiffres sont basés sur l'enquête d'octobre et ne sont pas entièrement comparables avec ceux de la NES.

Pour toutes les séries du Royaume-Uni, les données d'avant avril 1991 ont été ajustées en raison de la discontinuité apparaissant entre 1990 et 1991 dans la définition des ouvriers et employés due à une modification dans la classification des occupations.

¹⁾Séries révisées depuis avril 1982 avec des données provenant de la "nouvelle enquête sur les gains" (New Earnings Survey). Les données sont ajustées d'après la nouvelle classification des occupations de 1991. Ces données concernent les ouvriers à temps complet dont les gains ne sont pas affectés par des absences.

In der vorliegenden Reihe veröffentlicht das Statistische Amt der Europäischen Gemeinschaften in regelmäßigen Abständen die detaillierten Ergebnisse der harmonisierten Statistiken der Verdienste der Arbeiter und der Angestellten in der Industrie und im Dienstleistungsbereich.

This publication, issued regularly by the Statistical Office of the European Communities, gives detailed results of the harmonized statistics on the earnings of manual and non-manual workers in industry and certain activity groups in the services sector.

Dans cette publication, l'Office statistique des Communautés européennes présente régulièrement les résultats détaillés des statistiques harmonisées des gains des ouvriers et des employés dans l'industrie et dans certains groupes d'activité des services.
