

## ECU-EMS information

12 □ 1989      Monthly

### ECU MARKET RELATIVELY ACTIVE IN NOVEMBER

The market for international ecu issues held up relatively well during November 1989: 14 international bond subscriptions opened, for a total of 1 425 million ecus. It would seem that the ecu euromarket benefited from the nervousness of the euromark market, which was fuelled by fears of inflation in the wake of developments in the Eastern bloc countries.

On 22 November, the Italian Treasury launched a new CTE ("Certificati del tesoro in Euroscudi") at 10.70% over 5 years, for a total value of 1 000 million ecus. This stock was intended for both the national and international markets, but it was placed on the Italian market with some difficulty and the announcement of the issue did not spark off the launch of a series of 5-year ecu bonds on the international market, as such announcements usually do.

On 14 November, UK Treasury bills totalling 900 million ecus were allotted in three tranches of 300 million, payable in 1, 3 and 6 months, with average rates of return on issue of 10.31%, 10.43% and 10.39% respectively.

After the launch by the LIFFE of a 3-month ecu interest rates futures contract on 25 October last, the markets expect the French MATIF to launch a long term ecu futures interest rate contract in 1990.

On the foreign exchange markets, the gap between the peseta's market rate and central rate narrowed considerably during November 1989, but, although it lost 1.1% in relation to the ecu, the Spanish currency remained the strongest in the exchange rate mechanism of the European Monetary System. At the end of November, the Italian lira was the weakest currency. In November, there appeared to be some relaxing of the previous few months' tension between the Danish krone and the German mark.

Outside the ERM, the pound sterling lost 2.7% against the ecu during November alone. At the same time, the ecu appreciated 2.6% against the dollar and 1.9% against the yen.

In the political field, the Community Heads of State and Government, meeting in Strasbourg at the beginning of December, decided to convene the intergovernmental conference to draw up the new treaty for economic and monetary union at the end of 1990. On 1 January 1990, France will abolish all exchange controls 6 months ahead of schedule, and the Italians announced that by July 1990 they would reduce the fluctuation margin of the lira in the EMS (currently 6%) to 2.25% (standard rate).

#### Note

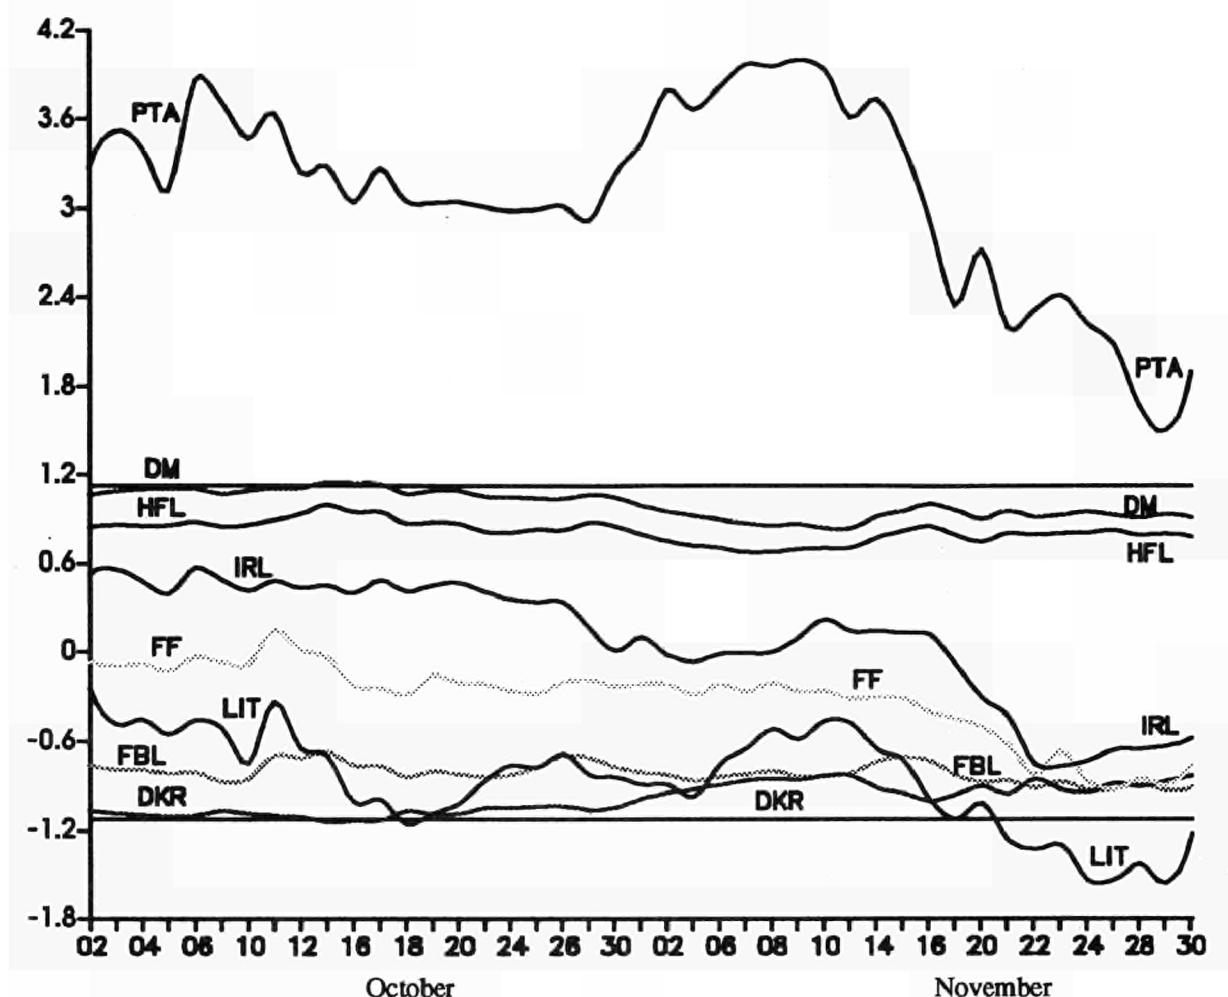

For any information on the statistics in this bulletin contact Luxembourg:

TEL:	4301-4785	T. MATHISSE
	4301-3288	G. THOUVENIN
	4301-4770	S. ANSION

#### Contents

- I. A graph of the bilateral fluctuations of the EMS currencies.
- II. Yearly and monthly issues of ecu bonds.
- III. Interest rates on ecu deposits and yields on ecu bonds.
- IV. Latest month's ecu bond issues.
- V. Consumer price indices in national currencies.
- VI. Consumer price indices in ecus.
- VII. Yearly, monthly and daily ecu exchange rates.

**TABLE I**  
**BILATERAL FLUCTUATIONS OF THE EMS CURRENCIES**

#### How to read the graph

1. The various curves should be compared in pairs. To find the differential between two currencies, subtract the (positive or negative) values along the y-axis corresponding to each currency.
2. The graph is drawn with the curve of the strongest currency above that of the weakest. It shows therefore the relative position of each currency vis-à-vis the other currencies.
3. When two curves intersect or merge over a period of time there is no differential between the two currencies and their market exchange rate equals their bilateral central rate.

#### Construction of the graph

1. The graph is drawn within a horizontal band corresponding to the maximum 2.25% margin of fluctuation applying at any given moment to market exchange rates and the bilateral central rates of the EMS currencies, with the exception of the LIT and the PTA, which have a maximum authorized fluctuation of 6%. This band is divided symmetrically by a horizontal axis along which the points would be plotted if all currencies were at their bilateral central rate and there were therefore no fluctuations.
2. The daily market exchange rates of all currencies are compared with the relevant bilateral central rates and the differentials between the two calculated.
3. The maximum fluctuation between two currencies (with the exception of the LIT and the PTA) is shown within the band, symmetrical with the horizontal axis. The fluctuations of the other currencies in relation to either of the two currencies in question are shown within the maximum permissible fluctuation.
4. The curves are drawn by linking daily the points showing the relative positions of each currency.

## EXPLANATORY NOTES

### **Ecu exchange rates.**

The exchange rates for the ecu against the national currencies of the Member States of the Community, the USD and yen are shown as annual averages, monthly averages (for the current year), and daily rates (for the latest available month).

From 21 September 1989, the ecu basket was made up as follows:

1 ecu =	DM	FF	HFL	BFR	LFR	LIT	DKR	IRL	PTA	UKL *	DRA *	ESC *
	0,6242 +	1,332 +	0,2198 +	3,301 +	0,13 +	151,8 +	0,1976 +	0,008552 +	6,885 +	0,08784 +	1,44 +	1,393

### **Ecu central rates from 21 September 1989:**

DM	FF	HFL	B/LFR	LIT	DKR	IRL	PTA	UKL *	DRA *	ESC *
2,05853	6,90403	2,31943	42,4582	1483,58	7,85212	0,768411	133,804	0,728627	150,792	172,085

Weights of currencies on 21/09/89, calculated on the basis of current central rates, expressed in %.

100 =	DM	FF	HFL	B/LFR	LIT	DKR	IRL	PTA	UKL *	DRA *	ESC *
	30,10	19,00	9,40	7,90	10,15	2,45	1,10	5,30	13,00	0,80	0,80

\* = Does not participate in the exchange rate mechanism

The data included in ECU-SME information only take account of these new characteristics of the ecu from October 1989.

### **Consumer price indices in national currency**

The consumer price indices in the national currency of each country measure changes in the purchasing power of one unit of national currency spent in the country concerned.

Two composite indices are calculated, covering all the Member States of the Community (EUR 12) and the eight Member States with currencies participating in the European Monetary System exchange rate mechanism (EMS). (Although the peseta has been participating in the exchange rate mechanism since 19/06/89 and has been included in the calculation of the ecu since 21/09/89, it is only taken into account in the indices relating to the EMS which are included in this bulletin for data after 30/09/89.)

These indices are calculated as weighted arithmetic means (chain indices) of the national indices, the weighting for each Member State being its relative share in the final consumption of households of the group of countries in question (EUR 12, EMS), expressed in purchasing power standards, at current prices and purchasing power parities.

At the foot of the table, the average weighted fluctuations around the mean and the minimum are given for the same groups of countries, with the same weightings. (These are calculated as weighted averages of the absolute fluctuations in relation to the mean and the minimum respectively). They show the degree to which price movements in the Member States in the Community converge.

### **Consumer price indices in ecus**

For each country the index of consumer prices in ecus is calculated by dividing the national consumer price index by the average movement of the national currency in relation to the ecu during the month. It measures the change in the purchasing power of one ecu in the country concerned.

Three composite indices are calculated, covering all the Member States of the Community (EUR 12), the eight Member States participating in the European Monetary System exchange rate mechanism (EMS) and the ten Member States whose currencies go to make up the ecu (ECU). These indices are calculated as weighted arithmetic means (chain indices) of the consumer price indices expressed in ecus as mentioned above. Although the peseta has been participating in the exchange rate mechanism since 19/06/89, and the peseta and the escudo have been included in the calculation of the ecu since 21/09/89, these two currencies are only taken into account in the indices contained in this bulletin for data after 30/09/89.)

These three indices are calculated as weighted arithmetic means (chain-indices). The weightings are defined as follows: for the EUR 12 and EMS indices, the relative share of each Member State in the final consumption of households for the group of countries in question (EUR 12 or EMS), expressed in ecus at current prices and exchange rates (annual weighting). For the ecu index, the relative share of each Member State's currency in the calculation of the ecu (monthly weighting).

## Ecu bond issues

The issues are recorded as at the payment date. All ecu-denominated bond issues, both national and international, (till 1986) or just international (from 1987) are covered, together with ecu issues offering the option of conversion into other currencies. Main source: International Financing Review

Table II shows, under the headings:

- Business sector and Governments: national issuers, both private and public.
- Institutions: the European Investment Bank and the Commission of the European Communities (EEC, ECSC, Euratom).
- Organizations: the specialist institutions of the United Nations, the World Bank, the Council of Europe, etc.....

## Interest rates and yields on ecu investments

The interest rates for 1, 3 and 6 month and 1 year deposits are calculated on the basis of the Friday London market rates (source: Financial Times, London Money Rates, ECU Linked Deposit Bid).

The bonds are classified according to three types of terms: under 5 years, from 5 to 7 years and more than 7 years. The redemption yields of ecu bonds are calculated each Wednesday from a sample of fixed interest bonds, denominated in ecus and listed on the Luxembourg Stock Exchange. These yields are weighted by amounts in circulation. (source: Luxembourg Stock Exchange).

The monthly and yearly averages are the arithmetic means of these weekly interest rates and bond yields.
