## ARBEJDSLØSHED : LANGSOMMERE STIGNING I 1978

Ved udgangen af december var der i Fællesskabet 6,1 mio. arbejdsløse, dvs. 5,7 % af den erhvervsaktive del af befolkningen. Den kendsgerning, at antallet af arbejdsløse i gennemsnit har ligget på omkring 6 mio., markerer en tydeligt langsommere stigning i arbejdsløsheden, som har holdt sig siden midten af 1977. Dette gennemsnitsniveau svarer til en stigning på 3,9 % i forhold til gennemsnittet i 1977, mod 9,4 % fra 1976-1977.

I nogle af medlemslandene er stigningen i arbejdsløsheden fortsat (Luxembourg, Danmark, Italien, Frankrig, Belgien), mens der i andre lande er registreret en nedgang (Irland, Forbundsrepublikken Tyskland og i mindre grad i Nederlandene og Det forenede Kongerige).

## FÆLLESSKABETS SAMHANDEL MED TREDJELANDE : NETTONEDGANG I UNDERSKUDET

For 1978 har Fællesskabet haft et underskud på omkring 4 Mrd ERE i samhandelen med tredjelande, hvilket er en tydelig forbedring i forhold til 1977, hvor underskuddet var på 7,1 Mrd ERE. Forbundsrepublikken Tyskland er det eneste land, der har et handelsbalanceoverskud, som endda er stærkt stigende (1977 : 11,8 Mrd ERE og 1978 : 13,0 Mrd ERE).

Alle øvrige medlemslande har underskud på handelsbalancen. Medens underskuddet for visse landes vedkommende er faldet betydeligt (Frankrig fra +3,6 Mrd ERE i 1977 til +2,6 Mrd ERE i 1978 og Italien fra +2,6 Mrd ERE i 1977 til +1,7 Mrd ERE i 1978) er det for andres vedkommende blevet endnu større (Det forenede Kongerige fra +2,3 Mrd ERE i 1977 til +3,2 Mrd ERE i 1978).

Forbedringen på handelsbalancen skyldes en mindre stigning i importen til 179 Mrd ERE — en stigning på 5 % i løbende priser. Eksporten steg en smule mere, nemlig med 7 % til 175 Mrd ERE i løbende priser.

## SAMHANDELEN INDEN FOR FÆLLESSKABET : SVAG KVANTITATIV STIGNING

Samhandelen mellem medlemslandene (på grundlag af importværdier i ERE) var i 1978 omkring 7 % højere end i 1977, stigningen var fra 168 Mrd ERE til 180 Mrd ERE. De lande, der har forøget eksporten til sine handelspartnere mest, er Irland (+17 %), Det forenede Kongerige (+15 %) og Danmark (+14 %), og de lande, der har øget sin import mest, er Irland (+19 %), Forbundsrepublikken Tyskland (+11 %) og Det forenede Kongerige (+10 %).

## INDUSTRIPRODUKTIONEN : FORTSAT LET STIGNING

I oktober 1978 fortsatte væksten i Fællesskabets industriproduktion (+0,4 % i sæsonkorrigerede tal i forhold til september).

Tendensen til en forbedring af stigningen i industriproduktionen begyndte i Tyskland og fortsatte til Frankrig og Belgien og på det seneste til Italien, mens man i Nederlandene og Det forenede Kongerige for øjeblikket oplever en svækkelse af stigningen af produktionen.

I de seneste måneder har den stigende tendens været særlig markant i de brancher, der producerer investeringsgoder og en smule mindre usltalt i de industrier, der producerer mellemprodukter. Tendensen inden for forbrugsgodeindustrien har været mere usikker.

## FORBRUGERPRISER : FORTSAT STIGNING

EF's forbrugerprisindeks steg med 0,6 % i november i forhold til den foregående måned.

I Italien er der stadig væk tale om betydelige stigninger (+1,0 % i november), mens de i Det forenede Kongerige (+0,7 %), Danmark (+0,6 %), Irland og Frankrig (+0,5 %) har været moderate.

Stigningen har været endnu mindre i Tyskland, Belgien og Luxembourg (+0,3 %) og i Nederlandene (+0,1 %).

I forhold til november 1977 var stigninger for EUR 9 på 7,2 %; i den samme periode registreredes i De forenede Stater en stigning på 8,8 %.

For hele 1978 kan man ifølge EUROSTAT's estimationer udskille tre grupper af lande : de lande, hvor inflationsraten er lig med eller mindre end 4 % (Forbundsrepublikken Tyskland 2,3 %, Luxembourg 3,2 %, Belgien og Nederlandene 4 %), de lande, hvor raten ligger tæt på EF-gennemsnittet (Danmark 7 %, Det forenede Kongerige og Irland 8 %) og endelig de lande, hvor den ligger omkring 10 % (Frankrig 9,5 % og Italien 11,5 %).

## VALUTAMARKEDET : VEDVARENDE ULIGEVEGT

Usikkerheden på valutamarkedene holdt sig i december måned. Grunden hertil er bl.a., at EMS, som følge af vanskeligheder i forbindelse med den fælles landbrugspolitik, ikke som planlagt trådte i kraft den 1. januar 1979. Desuden har den beslutning, som OPEC-landene traf i midten af december om at forhøje prisen på olie med 10 %, skabt et nyt pres på dollaren. Alene i løbet af december måned faldt dollaren med ca. 5 % i forhold til de europæiske slangevalutaer (DM, HFL, BFR, DKR) og med 4 % over for de europæiske valutaer, der ikke er med i denne valutaaftale (FF, LIT, UK, IRL); i slutningen af oktober nærmede den amerikanske valuta sig endog årets laveste kurs.

## ENERGI : STIGNING I BENZINFORBRUGET

I perioden januar-september 1978 var der for de fleste EF-landes vedkommende tale om større leverancer af alle former for olieprodukter end i den tilsvarende periode i 1977. Stigningen i efterspørgslen efter benzin til biler var især stærk i forbundsrepublikken Tyskland (+5,2 %), Italien (+5,8 %) og Det forenede Kongerige (+6,4 %), og markedet for brændselsolie var fast i Forbundsrepublikken (+7,2 %), Frankrig (+4,4 %) og Italien (+5,9 %).

## UNEMPLOYMENT : lower rate of increase in 1978

At the end of December the number of unemployed in the Community was 6.1 Mio, i.e. 5.7 % of the working population. The fact that the average number of unemployed has remained in the neighbourhood of 6 Mio dearly indicates a lower rate of increase in unemployment, which has been apparent since mid-1977.

This average level of unemployment in fact represents an increase of 3.9 % over the 1977 average, whereas the difference between 1977 and 1976 has been 9.4 %. While unemployment continued to increase in certain Community countries (Luxembourg, Denmark, Italy, France, Belgium), it decreased in others (Ireland, F.R. of Germany and to a lesser extent the Netherlands and the United Kingdom).

## INDUSTRIAL PRODUCTION : CONTINUATION OF A SLIGHT RECOVERY

Industrial production in the Community continued to increase in October 1978 (+0.4 % after seasonal adjustment as compared with September).

The upward trend in industrial production began in Germany, spread to France and Belgium and recently became apparent in Italy, while the rate of growth has slackened for the time being in the Netherlands and the United Kingdom.

In the past few months the upward trend in production has been particularly marked in the capital goods branches and has been a little less pronounced in the intermediate sector. The upward trend of consumer goods production is more uncertain.

## INTRA-COMMUNITY TRADE : INCREASE IN VALUE OF 7 %

Trade between member states (based on imports valued in EUA) was, in 1978, around 7 % higher than in 1977, rising from 168 Mrd EUA to 180 Mrd EUA. The countries which achieved the greatest increase in their exports to other member states were Ireland (+17 %), the United Kingdom (+15 %) and Denmark (+14 %), while those whose imports shared the largest increase were Ireland (+19 %), F.R. Germany (+11 %) and the United Kingdom (+10 %).

## COMMUNITY EXTERNAL TRADE : SHARP REDUCTION IN THE DEFICIT

The deficit in the Community trade balance with non-Community countries in 1978 was about 4 Mrd EUA — a marked improvement as compared with 1977 when the deficit was 7.1 Mrd EUA. F.R. Germany was the only country whose trade balance was in surplus and, moreover, increasing rapidly (1978 : 13.0 Mrd, 1977 : 11.8 Mrd EUA). All other Member States has a deficit. However, while this deficit had been considerably reduced in certain countries (France from -3.6 Mrd EUA in 1977 to -2.6 in 1978 and Italy from -2.6 Mrd EUA in 1977 to -1.7 in 1978) it had further increased in others (United Kingdom from -2.3 Mrd EUA in 1977 to -3.2 in 1978).

The improvement in the trade balance was due to a slower growth of Community imports which amounted to 179 Mrd EUA increasing by 5 % in current prices. Exports increased slightly more; by 7 % to 175 Mrd EUA in current prices.

There were even smaller increases in Germany, Belgium and Luxembourg (+0.3 %) and the Netherlands (+0.1 %).

The rate of increase for EUR-9 as compared with November 1977 was 7.2 % : the rise over the same period in the United States was 8.8 %.

EUROSTAT estimates indicate that for 1978 as a whole three groups of countries can be distinguished : those with an inflation rate of 4 % or less (F.R. of Germany 2.3 %, Luxembourg 3.2 %, Belgium and the Netherlands 4 %), those whose inflation rate is close to the Community average (Denmark 7 %, United Kingdom and Ireland 8 %), and those having an inflation rate in the neighbourhood of 10 % (France 9.5 % and Italy 11.5 %).

## FINANCE : CONTINUING INSTABILITY

The foreign exchange market remained unsettled throughout December.

Primarily because of the difficulties which arose in connection with the Common Agricultural Policy, the EMS did not become operational as scheduled on 1 January 1979.

A factor contributing to further pressure on the dollar was the decision to increase oil prices by 10 %, taken by the OPEC countries in mid-December. In December alone, the dollar fell by about 5 % against the currencies belonging to the European 'snake' (DM, HFL, BFR, DKR) and by 4 % against the European currencies not covered by this monetary arrangement (FF, LIT, UKL, IRL); at the end of October the exchange rate of the American currency approached the lowest levels of the year.

## ENERGY : INCREASE IN PETROL CONSUMPTION

In most Community countries deliveries of all petroleum products were higher in the period January-September 1978 than in the corresponding period in 1977. Demand for petrol was particularly heavy in the F.R. of Germany (+5.2 %), Italy (+5.8 %) and the United Kingdom (+6.4 %), while the market for gas oil was buoyant in the F.R. of Germany (+7.2 %), France (+4.4 %) and Italy (+5.9 %).

## DISOCCUPAZIONE : INCREMENTO PIÙ LENTO NEL 1978

A fine dicembre i disoccupati nella Comunità erano 6,1 milioni, pari al 5,7 % della popolazione attiva. Il fatto che mediamente il numero dei disoccupati si sia attestato su un livello di circa 6 milioni indica un netto rallentamento del progresso della disoccupazione : tale rallentamento si mantiene ormai dalla metà del 1977. L'attuale livello medio di disoccupazione rappresenta infatti un aumento del 3,9 % rispetto alla media del 1977, contro un aumento del 9,4 % osservato tra il 1977 e il 1976.

L'evoluzione diverge peraltro da un paese all'altro : mentre la disoccupazione ha continuato a salire in alcuni paesi membri (Lussemburgo, Danimarca, Italia, Francia, Belgio), negli altri paesi si osserva invece una diminuzione (Irlanda, Repubblica federale di Germania e, in minor misura, Paesi Bassi e Regno Unito).

## PRODUZIONE INDUSTRIALE : CONTINUA UN LIEVE MIGLIORAMENTO

Nell'ottobre del 1978 la produzione industriale della Comunità continua il suo progresso : al netto delle variazioni stagionali, l'incremento rispetto al mese di settembre è dello 0,4 %.

La tendenza alla ripresa delle produzioni industriali si è manifestata dapprima in Germania, estendendosi poi alla Francia e al Belgio e, recentemente, anche all'Italia, mentre nei Paesi Bassi e nel Regno Unito si osserva per il momento un rallentamento dello sviluppo della produzione.

Negli ultimi mesi la tendenza al miglioramento della produzione appare particolarmente netta nelle branche produttrici di beni d'investimento e un po' meno marcata nelle industrie produttrici di beni intermedi. La tendenza al miglioramento della produzione di beni di consumo è invece più esitante.

## COMMERCIO INTRACOMUNITARIO : AUMENTO IN VALORE DEL 7 %

Gli scambi in valore corrente (sulla base delle importazioni in unità di conto europea) tra gli stati membri della Comunità sono aumentati del 7 % tra il 1978 e l'anno precedente passando da 168 a 180 miliardi di uce. I paesi che hanno realizzato il più forte incremento delle esportazioni verso i partners europei sono l'Irlanda (+17 %), il Regno Unito (+15 %) e la Danimarca (+14 %). Quelli verso i quali si è verificata la più forte crescita delle importazioni sono l'Irlanda (+19 %), la R.F. de Germania (+11 %) e il Regno Unito (+10 %).

## COMMERCIO ESTERO DELLA COMUNITA' : NETTA RIDUZIONE DEL DISAVANZO

La bilancia commerciale della Comunità con i paesi terzi presenta nel 1978 un disavanzo di circa 4 miliardi di uce, il che rappresenta un netto miglioramento rispetto all'anno precedente, quando il disavanzo fu di 7,1 miliardi. La R.F. de Germania è il solo paese con una bilancia commerciale attiva e, per di più in forte ascesa (1978 : +13 miliardi di uce, 1977 : 11,8 miliardi di uce). Tutti gli altri stati membri registrano un passivo. Peraltro mentre in alcuni paesi il disavanzo è considerevolmente diminuito (Francia da -3,6 miliardi nel 1977 a -2,6 miliardi nel 1978 e l'Italia da -2,6 a -1,4 miliardi), in altri esso è ulteriormente aumentato (Regno Unito : 1978 : -3,2, 1977 : -2,3).

Il miglioramento della bilancia commerciale dipende dal fatto che l'aumento delle importazioni della Comunità è stato minore di quello delle esportazioni. Le importazioni sono state nel 1978 di 179 miliardi di uce con un incremento in valore corrente di circa il 5 %, mentre le esportazioni hanno raggiunto una cifra di 175 miliardi di uce, pari ad un aumento, in valore corrente, rispetto all'anno precedente, del 7 %.

## PREZZI AL CONSUMO : AUMENTO CONTENUTO

L'indice dei prezzi al consumo per la CEE è salito in novembre dello 0,6 % rispetto al mese precedente. L'Italia continua a registrare aumenti rilevanti (+1,0 % in novembre), mentre il Regno Unito (+0,7 %), la Danimarca (+0,6 %), l'Irlanda e la Francia (+0,5 %) hanno conosciuto aumenti moderati. L'aumento è stato ancora più basso in Germania, in Belgio e nel Lussemburgo (+0,3 %), e minimo nei Paesi Bassi (+0,1 %).

Rispetto al novembre 1977, il tasso di aumento dei prezzi per l'EUR 9 risulta del 7,2 %; per lo stesso periodo gli Stati Uniti registrano un aumento dell'8,8 %. Per l'intero 1978, in base alle stime dell'EUROSTAT, si possono distinguere the gruppi di paesi caratterizzati, rispettivamente, da un tasso d'inflazione inferiore o uguale al 4 % (Repubblica federale di Germania 2,3 %, Lussemburgo 3,2 %, Belgio e Paesi Bassi 4 %), vicino alla media comunitaria (Danimarca 7 %, Regno Unito e Irlanda 8 %), o intorno al 10 % (Francia 9,5 %, e Italia 11,5 %).

## FINANZE : PERSISTENTE INSTABILITÀ

L'incertezza sul mercato dei cambi si è mantenuta nel mese di dicembre. Anzitutto, per difficoltà intervenute nella politica agraria comune, lo SME no è entrato in vigore, come era invece previsto, il 1° gennaio 1979. D'altra parte, la decisione presa a metà dicembre dai paesi dell'OPEP, di aumentare del 10 % i prezzi del petrolio, contribuisce ad una nuova pressione sul dollaro. Nel solo mese di dicembre, il dollaro scende all'incirca del 5 % rispetto alle monete del serpente europeo (DM, HFL, BFR, DKR) e del 4 % rispetto alle monete europee che non partecipano a tale accordo monetario (FF, LIT, UKL, IRL). A fine ottobre la valuta americana si avvicina anzi ai corsi più bassi dell'intero anno.

## ENERGIA : AUMENTO DEL CONSUMO DI BENZINA

Da gennaio a settembre 1978, nella maggior parte dei paesi della Comunità le consegne della totalità dei prodotti petroliferi sono superiori a quelle del periodo corrispondente del 1977. La domanda di benzina auto è particolarmente forte nella Repubblica federale di Germania, (+5,2 %), in Italia (+5,8 %) e nel Regno Unito (+6,4 %), mentre il mercato del gasolio è sostenuto nella Repubblica federale di Germania (+7,2 %), in Francia (+4,4 %) e in Italia (+5,9 %).

Denne publikation omfatter to dele, den ene indeholder « fællesskabstabeller » og den anden « tabeller efter lande ».

I « fællesskabstabellerne » er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder kun af EUROSTAT på grundlag af fælles kriterier harmoniserede tal, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's « Dainties »-metode. *DE AKTUELLESTE TAL ER FORELØBIGE OG I VISSE TILFÆLDE DIREKTE SKØNNED E AF EUROSTAT.*

Som indikator for verdenskonjunkturudviklingen indeholder « fællesskabstabellerne » en søjle for USA.

I « tabellerne efter lande » er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier

og sæsonkorrigerede efter nationale metoder. I denne del er der ud over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlige, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af « EUROSTATISTIK », hvori de statistiske angivelseres definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af « EUROSTATISTIK » hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de aktuelleste tal til disposition den dag leveringen til trykning finder sted.

## PREFACE

EN

This bulletin is in two parts: "Community Tables" and "Country Tables".

The *Community Tables* contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, "Dainties". *THE MOST RECENT DATA ARE PROVISIONAL AND IN SOME CASES ESTIMATED BY EUROSTAT.*

Finally the *Community Tables* include a column for the USA as an indicator of changes in the world economy.

The *Country Tables* contain a selection of the economic indicators most often used in each country. They are national series

based on the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, *historical data* (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of *methodological notes*. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of "Eurostatistics".

Two versions of "EUROSTATISTICS" come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

## AVVERTENZA

IT

Il presente bollettino consta di 2 parti: l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » de l'EUROSTAT. *I DATI PIU' RECENTI SONO PROVVISORI E, A VOLTE DIRETTAMENTE STIMATI DA EUROSTAT.*

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese, e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa

# THE CHEMICAL INDUSTRY IN THE EEC 1960-1976 (1)

## Situation in 1977/1978

The chemical industry (2) does not make economic headlines either as a result of dramatic crises or on account of a dynamism which places it at the forefront of industry. It would therefore seem of interest to present a brief analysis of a sector which has avoided major upheavals in the past — but which could experience some difficulties in the future — in order to examine how it has borne up throughout the period under consideration.

### 1. The facts

In terms of volume the average annual rate of increase in the chemical industry's value added at 1970 market prices has passed through three distinct phases :

- 1960/70 : — very rapid and sustained growth (between 9-14 %) throughout the period; however, the rate was lower in the United Kingdom, where it attained a level of only 6.5 %;
  - these rates were always considerably higher than those for all manufacturing industry;
  - growth was accompanied by the creation of a large number of jobs (except in the United Kingdom), with employment increasing at a rate of 1.5 % p.a. in the chemical industry, and 0.5 % p.a. in manufacturing industry as a whole;
- 1970/73 : — marked slowing-down of the rates of growth in the chemical industry's value added, except in Belgium where the rate increased and in the United Kingdom where it remained stable;
  - however, in all the countries the rates were still considerably higher than those for all manufacturing industry;
  - the growth in the chemical industry's value added was accompanied in Germany, the United Kingdom and the Netherlands, as in all manufacturing industry, by a relatively large net reduction in employment : the number of jobs lost in the chemical industry represented between 4 and 8 % of the reduction in employment in manufacturing industry as a whole; in France, Italy and Belgium, on the other hand, more jobs were created during this period;
- 1973/76 : — a further slowing-down in the growth of the industry's value added, notably in Belgium and the United Kingdom;
  - however, the rates were still higher than those for all manufacturing industry, except in France and Belgium;
  - the decrease in the growth rate was accompanied by a further net loss of jobs which was distinctly less marked than in manufacturing industry as a whole, except in Belgium and Italy where there was a net increase in employment.

### 2. The causes

The growth of an industry can be attributed in general terms to final user demand, i.e. the combined effects of the final consumption of households and Government, gross fixed capital formation (GFCF), changes in stocks and exports. It is possible to measure the breakdown of the direct uses of an industry's products : thus, in 1970 in Germany, 23.2 % of the chemical industry's total resources (domestic output + imports) were consumed by exports. For an industry like the chemical industry, which produces primarily intermediate goods (50-70 % of the chemical industry's output is used for intermediate consumption i.e. goods which will be used in the manufacture of other products) it would appear to be more significant to analyse the sector's direct and indirect contribution to final uses, i.e. not only the final uses of chemical products by themselves but also the proportion of chemical product used in goods manufactured by other branches of industry (e.g. the input of chemical product in a plastic bucket manufactured by the rubber and plastics industry). To this end, particular attention will be paid to the final consumption of households and to exports.

- Households' consumption

The growth of the chemical industry depends to a large extent on this type of user demand (40 % on average). In periods of sustained growth in consumption (1970-73), the increase in the chemical industry's value added was likewise sustained. Conversely, during the period 1973-76 when the rates of increase in consumption were distinctly lower, the chemical industry's value added increased at a similarly slower rate. In Italy, however, the slowing-down in the growth of the chemical industry's production (value added) was tempered by a marked increase in consumption.

- period 1960-70 : Data base on sectoral trends in the European economies from 1960 to the recession;
- period 1970-77 : ESA National Accounts : detailed tables and EUROSTAT estimates.

(2) For the purposes of this study, the chemical industry comprises all primary chemical industry (including, therefore, the coal by-products, and petrochemical industries but excluding oil refining), the pharmaceuticals and cleaning materials industries, and the man-made fibres industry.

## — External trade

The expansion of the chemical industry is also dependent to a great extent on export demand (60 % on average). Some countries (Belgium, the Netherlands) have a very high level of dependence on export orders (70 %) with the consequence that falls in the rates of increase in value added are all the greater when export growth declines.

In the Community as a whole, the chemical industry is, and has always been a sector with a large trade surplus; this is even more pronounced when intra-Community trade (70 % of total chemical imports) is not taken into consideration. Trade in chemical products accounts for a considerable proportion of total EC trade, i.e. 12-13 % of exports and 8-9 % of imports. Despite all the changes which occurred during the period 1970-76, the chemical industry's share of Community external trade remained extremely stable, whereas there was a fairly substantial change in other industries' shares between 1973 and 1976. Overall, external trade follows closely trends in the growth of world trade, which slowed considerably during the period 1973-76.

### 3. The consequences

The growth performance of the chemical industry has had direct consequences — analysed above — on employment. It is also interesting to examine its effects on productivity and gross fixed capital formation.

#### a) Productivity (value added per person employed) :

— During the period 1960-70, the average annual rate of increase in productivity in the chemical industry was between 6.3 and 10 % and was at all times higher than that of manufacturing industry as a whole.

— In the 1970's, the chemical industry improved its productivity either by cutting the number of jobs through rationalisation — (Germany, United Kingdom, the Netherlands) or by stepping up the rate of increase in value added on account of external trade growth (Belgium). In the other countries, the industry's productivity continued to rise, although at a slower rate than in the previous period owing to the combined effects of declines in the rate of increase in value added and a net increase in employment. However, the chemical industry's productivity still increased at a faster rate than that of all manufacturing industry.

— During the period 1973-76, the situation developed differently from country to country : although the chemical industry's productivity continued to improve, it was at distinctly lower rates (0.8-4.9 %); the rates were lowest in the countries where few jobs were cut (United Kingdom) and even where the number of jobs continued to rise (Italy, Belgium). In three countries (United Kingdom, Italy, the Netherlands) the chemical industry's productivity continued to increase at a faster rate than that of manufacturing industry as a whole.

#### b) Gross fixed capital formation.

During the period 1965-70, capital investment in the chemical industry increased at a steady and generally higher rate than that of manufacturing industry as a whole.

In the years 1970-73, the rate fell and in some cases became negative. The proportion of the chemical industry's value added devoted to capital investment fell substantially from 1971/72 onwards (1); this paralleled the trend in value added in this industry.

All the final figures for the period 1973-76 are not yet available. However, in the case of four countries (United Kingdom, Belgium, Netherlands, Italy), capital investment in the chemical industry seems to have regained some impetus from 1975 onwards (probably in anticipation of an improvement in productivity as a result of a reduction in persons employed). In Germany and France, the chemical industry seems to be in a less favourable position, since there are few signs of investment demand regaining some upward momentum.

It is difficult to draw conclusions about the profitability of the various factors of production, since there are few comparable data on trends in industrial prices.

An analysis in terms of average annual growth rates conceals developments since 1973. The pattern of chemical industry output growth is very spasmodic : a substantial increase was recorded up to the third quarter of 1974, but it was followed by a fall to the 1971 level in the third quarter of 1975; thereafter there was a strong recovery until the second quarter of 1977, followed by a further downturn during the remainder of that year : finally, some recovery has been evident in 1978. The level of production at the end of the second quarter of 1978 was slightly higher than the all-time record level prior to the 1975 recession.

Employment followed the same general trend as output up to the end of 1976, albeit with a three month time lag, but changes were much more moderate in size. Since 1977, the trends have ceased to parallel each other; employment has stagnated at a low level and even began to fall at the end of 1977.

(1) A more detailed analysis of capital investment could be made only in comparison with data production capacities.
