Eurostat hat die Aufgabe, den Informationsbedarf der Kommission und aller am Aufbau des Binnenmarktes Beteiligten mit Hilfe des europäischen statistischen Systems zu decken.

Um der Öffentlichkeit die große Menge an verfügbaren Daten zugänglich zu machen und Benutzern die Orientierung zu erleichtern, werden zwei Arten von Publikationen angeboten: Statistische Dokumente und Veröffentlichungen.

Statistische Dokumente sind für den Fachmann konzipiert und enthalten das ausführliche Datenmaterial: Bezugsdaten, bei denen die Konzepte allgemein bekannt, standardisiert und wissenschaftlich fundiert sind. Diese Daten werden in einer sehr tiefen Gliederung dargeboten. Die Statistischen Dokumente wenden sich an Fachleute, die in der Lage sind, selbständig die benötigten Daten aus der Fülle des dargebotenen Materials auszuwählen. Diese Daten sind in gedruckter Form und/oder auf Diskette, Magnetband, CD-ROM verfügbar. Statistische Dokumente unterscheiden sich auch optisch von anderen Veröffentlichungen durch den mit einer stilisierten Graphik versehenen weißen Einband.

Die zweite Publikationsart, die Veröffentlichungen, wenden sich an eine ganz bestimmte Zielgruppe, wie zum Beispiel an den Bildungsbereich oder an Entscheidungsträger in Politik und Verwaltung. Sie enthalten ausgewählte und auf die Bedürfnisse einer Zielgruppe abgestellte und kommentierte Informationen. Eurostat übernimmt hier also eine Art Beraterrolle.

Für einen breiteren Benutzerkreis gibt Eurostat Jahrbücher und periodische Veröffentlichungen heraus. Diese enthalten statistische Ergebnisse für eine erste Analyse sowie Hinweise auf weiteres Datenmaterial für vertiefende Untersuchungen. Diese Veröffentlichungen werden in gedruckter Form und in Datenbanken angeboten, die in Menütechnik zugänglich sind.

Um Benutzern die Datensuche zu erleichtern, hat Eurostat Themenkreise, d. h. eine Untergliederung nach Sachgebieten, eingeführt. Daneben sind sowohl die Statistischen Dokumente als auch die Veröffentlichungen in bestimmte Reihen, wie zum Beispiel „Jahrbücher“, „Konjunktur“, „Methoden“, untergliedert, um den Zugriff auf die statistischen Informationen zu erleichtern.

Y. Franchet
Generaldirektor

It is Eurostat's responsibility to use the European statistical system to meet the requirements of the Commission and all parties involved in the development of the single market.

To ensure that the vast quantity of accessible data is made widely available, and to help each user make proper use of this information, Eurostat has set up two main categories of document: statistical documents and publications.

The statistical document is aimed at specialists and provides the most complete sets of data: reference data where the methodology is well established, standardized, uniform and scientific. These data are presented in great detail. The statistical document is intended for experts who are capable of using their own means to seek out what they require. The information is provided on paper and/or on diskette, magnetic tape, CD-ROM. The white cover sheet bears a stylized motif which distinguishes the statistical document from other publications.

The publications proper tend to be compiled for a well-defined and targeted public, such as educational circles or political and administrative decision-makers. The information in these documents is selected, sorted and annotated to suit the target public. In this instance, therefore, Eurostat works in an advisory capacity.

Where the readership is wider and less well defined, Eurostat provides the information required for an initial analysis, such as yearbooks and periodicals which contain data permitting more in-depth studies. These publications are available on paper or in Videotext databases.

To help the user focus his research, Eurostat has created 'themes', i.e. a subject classification. The statistical documents and publications are listed by series: e.g. yearbooks, short-term trends or methodology in order to facilitate access to the statistical data.

Y. Franchet
Director-General

Pour établir, évaluer ou apprécier les différentes politiques communautaires, la Commission des Communautés européennes a besoin d'informations.

Eurostat a pour mission, à travers le système statistique européen, de répondre aux besoins de la Commission et de l'ensemble des personnes impliquées dans le développement du marché unique.

Pour mettre à la disposition de tous l'importante quantité de données accessibles et faire en sorte que chacun puisse s'orienter correctement dans cet ensemble, deux grandes catégories de documents ont été créées: les documents statistiques et les publications.

Le document statistique s'adresse aux spécialistes. Il fournit les données les plus complètes: données de référence où la méthodologie est bien connue, standardisée, normalisée et scientifique. Ces données sont présentées à un niveau très détaillé. Le document statistique est destiné aux experts capables de rechercher, par leurs propres moyens, les données requises. Les informations sont alors disponibles sur papier et/ou sur disquette, bande magnétique, CD-ROM. La couverture blanche ornée d'un graphisme stylisé démarque le document statistique des autres publications.

Les publications proprement dites peuvent, elles, être réalisées pour un public bien déterminé, ciblé, par exemple l'enseignement ou les décideurs politiques ou administratifs. Des informations sélectionnées, triées et commentées en fonction de ce public lui sont apportées. Eurostat joue, dès lors, le rôle de conseiller.

Dans le cas d'un public plus large, moins défini, Eurostat procure des éléments nécessaires à une première analyse, les annuaires et les périodiques, dans lesquels figurent les renseignements adéquats pour approfondir l'étude. Ces publications sont présentées sur papier ou dans des banques de données de type vidéotex.

Pour aider l'utilisateur à s'orienter dans ses recherches, Eurostat a créé les thèmes, c'est-à-dire une classification par sujet. Les documents statistiques et les publications sont répertoriés par série — par exemple, annuaire, conjoncture, méthodologie — afin de faciliter l'accès aux informations statistiques.

Y. Franchet

VORWORT

Gegenstand dieser Veröffentlichung sind die zusammengefassten Energiebilanzen 1990 und 1991, nach Mitgliedstaaten und für die Gemeinschaft insgesamt, ausgedrückt in spezifischen Einheiten und in Tonnen Rohöleinheiten. Die Bilanzen wurden gemäss der "Endenergiemethode" aufgestellt, wonach sämtliche Ströme aufgrund des tatsächlichen Energiegehalts jedes Energieträgers gemessen werden, und zwar ohne Substitutionshypothese und ohne Äquivalenzberechnung.

Nähere Hinweise über die Berechnungsmethode : siehe Veröffentlichung "Energiebilanzen : Prinzipien und Methoden" des SAEG.

FOREWORD

The current publication, which is exclusively devoted to the global energy balance sheets, presents, for the years 1990 and 1991, the balance sheets expressed in specific units and in tonnes of oil equivalent, for each of the member State and for the Community as a whole. The balance sheets have been constructed according to the methodology for "Supplied Energy", where all the operations are harmonized on the basis of the energy content of each source and form of energy, without any hypothetical substitutions, nor any calculation of equivalence.

Users wishing to know more about the methodology of the balance sheets may refer to the publication "Principles and Methods of Energy Balance Sheets" of SOEC.

AVANT-PROPOS

La présente publication, consacrée exclusivement aux bilans globaux de l'énergie, présente pour les années 1990 et 1991 les bilans exprimés en unités spécifiques et en tonnes d'équivalent pétrole pour chacun des Etats membres et pour la Communauté dans son ensemble. Les bilans ont été élaborés selon la méthodologie dite de l'"Energie finale", où toutes les opérations sont comptabilisées sur la base du contenu énergétique de chaque source et forme d'énergie, sans aucune hypothèse de substitution ni aucun calcul d'équivalence.

Les utilisateurs qui désirent en savoir plus sur la méthodologie des bilans sont priés de se référer à la publication "Principes et méthodes des bilans de l'énergie" de l'OSCE.

Blast-furnace gas	"	1 000	0,0239	"	Gaz de hauts fourneaux
Works gas	"	900	0,0215	"	Gaz d'usines
Electrical energy	1 kWh	3 600	0,086	1 kWh	Energie électrique

(*) The tonne of oil equivalent is a conventional standardized unit defined on the basis of a tonne of oil with a net calorific value of 41 860 kilojoules/kg.
The conversion coefficients from the specific units to the kgoe (kilogramme of oil equivalent) are thus computed by dividing the conversion coefficients to the kilojoules by 41 868.

(*) La tonne d'équivalent pétrole est une unité conventionnelle standardisée définie sur la base d'une tonne de pétrole ayant un pouvoir calorifique inférieur de 41 860 kilojoules/kg.
Les coefficients de conversion des unités spécifiques vers le kgep (kilogramme d'équivalent pétrole) sont de ce fait calculés en divisant les coefficients de conversion vers les kilojoules par 41 868

Diese mittels EDV erstellte Veröffentlichung enthält zusammengefaßte Energiebilanzen nach Mitgliedstaaten und für die Gemeinschaft insgesamt, ausgedrückt in spezifischen Einheiten und in Tonnen Rohöleinheit. Die Bilanzaufstellung fußt auf der „Endenergiemethode“, wonach sämtliche Ströme aufgrund des Energiegehaltes jedes Energieträgers gemessen werden, ohne Substitutionshypothese und ohne Äquivalenzberechnung.

Die Darstellung der Daten in Form von aggregierten Bilanzen und Erzeugnisbilanzen bezieht sich auf die Jahre 1990 und 1991.

This computer-produced publication contains the overall energy balance sheets for the Community and each Member State, expressed in specific units and in tonnes of oil equivalent and based on the 'energy supplied' methodology, in which all operations are evaluated by the energy content of each source and form of energy without the need for substitution or equivalence calculations.

The data refer to 1990 and 1991 and are given in aggregated form and by product.

Cette publication, établie par voie informatique, est consacrée aux bilans globaux de l'énergie de la Communauté et de chacun des États membres. Les bilans exprimés en unités spécifiques et en tonnes d'équivalent pétrole sont élaborés selon la méthodologie dite de l'«Énergie finale», où toutes les opérations sont comptabilisées sur la base du contenu énergétique de chaque source et forme d'énergie, sans aucune hypothèse de substitution ni aucun calcul d'équivalence.

La présentation sous forme de bilans agrégés et de bilans ventilés par produit concerne les années 1990 et 1991.
