DATI PER L'ANALISI DELLA CONGIUNTURA

Manuskript afsluttet den 26. marts 1979

Manuscript completed 26 March 1979

Manoscritto terminato il 26 marzo 1979

**Nationalregnskaber 1978 : kvantitativ stigning på 3%**

I 1978 var væksten i bruttonationalproduktet 2,9% og i det private konsum 3,4%. For bruttonationalproduktets vedkommende lå stigningen mellem 6% i Irland og 1% i Danmark, mens den i Tyskland, Frankrig og Det forenede Kongerige lå på fællesskabsgennemsnittet. Investeringerne udviste en kvantitativ stigning på 2,6% for EUR 9. Stigningen var meget kraftig i Tyskland (+6,2%) og i Irland (+10,4%), mens den lå under fællesskabsgennemsnittet i Frankrig (+0,3%) og Danmark (+0,6%) og var negativ i Italien (-1,6%).

**Arbejdsløshed: usikker tendens**

Arbejdsløsheden i Fællesskabet udviste i februar et hovedsagelig sæsonbetinget fald på 1,4%, idet de sæsonkorrigerede tal steg med 0,2%. Arbejdsløshedssituationen i de første to måneder af 1979 er karakteriseret ved en svag stigning, mens der i sidste kvartal af 1978 var tale om en stabilisering.

**Stål: forbedring af saldoen for udenrigshandelen**

I forhold til det foregående år udviser tallene for udenrigshandelen i 1978 en tilbagegang på ca. 18% for importen fra tredjelande og en stigning på ca. 20% for eksporten til tredjelande, hvilket resulterer i en forbedring af saldoen. Samhandelen inden for Fællesskabet steg i den samme periode med næsten 4%.

**Fællesskabets samhandel med tredjelande: forringelse af balancen**

I løbende priser var importen fra tredjelande i januar måned 1979 på 15,5 milliarder ERE, dvs. en nedgang på 7% i forhold til december 1978 og en stigning på 8% sammenlignet med januar 1978.

Den stigende tendens inden for råvarepriserne, især olie, fortsatte i begyndelsen af dette år og har medført en betydelig stigning i importudgifterne.

Eksporten til tredjelande faldt med 16% i forhold til december 1978, men steg med 8% i forhold til samme måned i 1977. Den beløber sig til 13,8 milliarder ERE.

Underskuddet på handelsbalancen over for tredjelande voksede i januar og nåede op på 1,7 milliarder ERE mod henholdsvis 0,7 og 0,2 milliarder ERE i november og december 1978. Kun Det forenede Kongerige har kunnet registrere en forbedring af handelsbalancen over for lande uden for Fællesskabet, idet underskuddet blev halveret.

**Samhandelen inden for Fællesskabet: værdimæssig stigning på 9%**

Samhandelen i løbende priser (baseret på importen) mellem EF-landene var på 15,1 milliarder ERE i januar 1979, hvilket er en nedgang på 9% i forhold til december 1978, men en stigning på 9% i forhold til januar 1978.

For Italiens (+21%), Frankrigs (+11%) og Tysklands (+11%) vedkommende registreredes en stærk stigning i importen fra andre EF-lande, hvorimod stigningen i Danmark (+4%) og Det forenede Kongerige (+3%) i importen fra andre EF-lande var beskeden.

Italien og Danmark udviste med henholdsvis 18 og 16% den største stigning i eksporten til partnerlandene. Nederlandene var det eneste land med en eksportnedgang, nemlig 8%.

**Priser: voksende inflation**

Efter EUROSTAT's skøn er forbrugerprisindekset for hele EF i februar steget med 0,8% i forhold til januar.

Denne stigning er den største siden april 1978.

For EUR 9 vil **stigningen i forhold til februar 1978** blive på 8,2%. I Forbundsrepublikken Tyskland og Benelux-landene var prisstigningen på mellem 3 og 5%. I Danmark var stigningen på ca. 7%, hvilket skyldes den nye momsats, der trådte i kraft den 1. oktober 1978. Den arlige pristigning i Frankrig, Italien, Det forenede Kongerige og Irland var meget høj og nåede op på eller over 10%.

**Penge og finanser: talrige valutapolitiske foranstaltninger i medlemslandene i begyndelsen af 1979**

De seneste to måneder har været præget af rolige forhold på valutamarkedet, og flere medlemslande har truffet vigtige, nationale valutapolitiske foranstaltninger.

I Italien og Belgien har man indskrænket de hidtil gældende restriktive foranstaltninger (flere banklån til den private sektor). Derimod har man i andre lande truffet nye restriktive foranstaltninger: forhøjelse af lombardrenten og de lovpligtige reserver i Forbundsrepublikken Tyskland, og forhøjelse af diskontoen i Det forenede Kongerige (fra 12,5% til 14% den 8. februar og tilbage til 13% i begyndelsen af marts). I Nederlandene begrænsedes stigningen i kortfristede banklån til den private sektor til 9%, og i Danmark blev der indført forbud mod salg af statsobligationer til udlændinge.

## National accounts for 1978: 3% growth in volume terms

In 1978, the volume growth in GDP and private consumption was 2.9% and 3.4% respectively. The growth in GDP ranged between 6% in Ireland and 1% in Denmark; in Germany, France and the United Kingdom, it was exactly the same as the Community average. Capital investment went up by 2.6% in volume terms in the Community as a whole; this growth was very high in Germany (+6.2%) and Ireland (+10.4%), below the Community average in France (+0.3%) and Denmark (+0.6%), and negative in Italy (-1.6%).

## Unemployment: uncertain trend

In February, unemployment in the Community showed a basically seasonal fall of 1.4%, since the seasonally adjusted figures indicate a rise of 0.2%. During the first two months of 1979 the unemployment situation was characterized by a slight increase, compared with a stabilization in the last three months of 1978.

## Steel: improvement in the external trade balance

Compared with 1977, the external trade figures for 1978 show a fall of around 18% in imports from and an increase of around 20% in exports to third countries, resulting in an improvement in the balance. Intra-Community trade went up by nearly 4% during the same period.

## Community external trade: deterioration of the balance

At current values, imports from third countries in January 1979 amounted to 15.5 thousand million EUA, a drop of 7% compared with December 1978 but an increase of 8% compared with January 1978.

The upward trend in prices of raw materials, particularly oil, is continuing at the beginning of this year, causing an appreciable increase in the value of imports.

Exports to third countries fell by 16% compared with December 1978 but at 13.8 thousand million EUA were 8% up on the same month of 1977.

The trade balance deficit with third countries went up in January to 1.7 thousand million EUA, compared with 0.7 and 0.2 thousand million EUA in November and December 1978 respectively. Only the United Kingdom recorded an improvement in its trade balance with non-Community countries, reducing its deficit by half.

## Intra-Community trade: 9% increase in terms of value

At current values trade between the countries of the EC (based on imports) amounted to 15.1 thousand million EUA in January 1979, 9% down on December 1978 but 9% up on January 1978.

Italy (+21%), France (+11%) and Germany (+11%) recorded a substantial increase in their purchases from the other Community countries, while in the case of Denmark (+4%) and the United Kingdom (+3%) the increase in intra-Community imports was slight.

Italy and Denmark showed the greatest increase in sales to the other Community countries, with 18% and 16% respectively. The Netherlands was the only country to record a drop in sales (-8%).

## Prices: increase in the rate of inflation

According to EUROSTAT estimates, the consumer price index for the Community as a whole went up by 0.8% in February compared with January. This rate is the highest recorded since April 1978.

For EUR-9 the **increase compared with February 1978** is estimated at 8.2%. The annual rate of increase is between 3 and 5% in Germany (FR) and the Benelux countries, and around 7% in Denmark as a result of new rates of VAT which came into force on 1 October 1978, while in France, Italy, the United Kingdom and Ireland the annual rate of price increase was very high, reaching and even exceeding 10%.

## Finance: Numerous monetary measures taken in the Member States at the beginning of 1979

Exchange markets have been quiet in the first months of 1979, but several Member States have taken important domestic monetary measures.

In Italy and Belgium certain restrictive measures in force up to now have been relaxed (increase in rate of growth of bank loans to the private sector). On the other hand, new restrictive measures have been taken in some countries; increase in the Lombard rate and reserve requirements in the FR of Germany, increase in the minimum lending rate in the United Kingdom (from 12.5% to 14% on 8 February, then back to 13% at the beginning of March), in the Netherlands limit of 9% on growth of short-term bank lending to the private sector and in Denmark a ban on sales of government securities to foreigners.

## FATTI IMPORTANTI

### Conti nazionali 1978: una crescita del 3% in volume

Nel 1978, in volume, la crescita del PIL è stata mediamente del 2,9%, quella dei consumi privati del 3,4%. Tale incremento del PIL si situa in una forbice i cui estremi sono il 6% per l'Irlanda e l'1% per la Danimarca, mentre in Germania, in Francia e nel Regno Unito l'aumento è stato identico alla media comunitaria.

Gli investimenti, sempre in volume, sono aumentati del 2,6% come media EUR 9. L'aumento appare però differenziato: molto sensibile in Germania (+6,2%) e in Irlanda (+10,4%), inferiore alla media comunitaria in Francia (+0,3%)<sup>9</sup> in Danimarca (+0,6%) e negativo in Italia (-1,6%).

### Disoccupazione: tendenza incerta

La disoccupazione nella Comunità ha registrato in febbraio una diminuzione dell'1,4%, dovuta a fattori essenzialmente stagionali: infatti i dati corretti delle variazioni stagionali accusano per contro un aggravamento dello 0,2%. L'andamento della disoccupazione è caratterizzato, nei primi due mesi del 1979, da un lieve aumento, mentre nell'ultimo trimestre del 1978 accusava una stabilizzazione.

### Acciaio: miglioramento del saldo del commercio estero

I dati per il commercio estero del 1978 indicano, rispetto all'anno precedente, una flessione del 18% circa delle importazioni dai paesi terzi che, con il concomitante aumento del 20% circa delle esportazioni della Comunità in tali paesi, si traduce in un miglioramento del saldo. Nello stesso periodo gli scambi intracomunitari sono aumentati quasi del 4%.

### Commercio estero della Comunità: peggioramento della bilancia

Le importazioni dai paesi terzi sono state, nel gennaio 1979, di 15,5 miliardi di UCE in valori correnti, il che corrisponde ad una diminuzione del 7% sul mese di dicembre 1978 e ad un aumento dell'8% rispetto al gennaio dello stesso anno.

La tendenza all'aumento dei prezzi delle materie prime e soprattutto del petrolio presegue all'inizio di quest'anno, provocando un sensibile aumento del valore dell'importazioni.

Le esportazioni verso i paesi terzi assommano a 13,8 miliardi di UCE: esse sono diminuite del 16% rispetto al dicembre 1978, ma sono in aumento dell'8% rispetto allo stesso mese del 1977.

Il disavanzo della bilancia commerciale con i paesi terzi si è aggravato in gennaio, toccando il livello di 1,7 miliardi di UCE: esso era di 0,7 miliardi di UCE nel novembre 1978 e di 0,2 miliardi di UCE nel dicembre dello stesso anno. Solo il Regno Unito accusa un miglioramento della bilancia commerciale con i paesi non comunitari, che porta a ridurre della metà il suo disavanzo.

### Commercio intracomunitario: aumento del 9% in valore

Gli scambi in valori correnti (calcolati sulla base delle importazioni) tra i paesi della CE erano, nel gennaio 1979, di 15,1 miliardi di UCE, il che rappresenta una diminuzione del 9% rispetto al dicembre 1978, ma un aumento del 9% rispetto al gennaio dello stesso anno.

Per l'Italia (+21%), la Francia (+11%) e la Germania (+11%), si registra un sensibile aumento degli acquisti agli altri paesi della Comunità, mentre l'aumento delle importazioni intracomunitarie è debole per la Danimarca (+4%) e per il Regno Unito (+3%).

L'incremento più sensibile delle vendite negli altri paesi della Comunità europea è stato registrato dall'Italia e dalla Danimarca (+18% e, rispettivamente, +16%). Una diminuzione di tali vendite si osserva solo per i Paesi Bassi (-8%).

### Prezzi: accelerarsi dell'inflazione

Secondo le stime dell'EUROSTAT, l'indice dei prezzi al consumo per il complesso della CE sarebbe aumentato dello 0,8% in febbraio, rispetto al mese di gennaio.

Questo tasso è il più elevato di tutti quelli osservati dall'aprile 1978.

Per il complesso EUR 9, l'aumento dei prezzi rispetto a febbraio del 1978 sarebbe dell'8,2%. In termini di ritmo annuo di aumento, si può osservare un saggio compreso tra il 3 e il 5% in Germania (RF) e nei paesi del Benelux, un aumento del 7% circa in Danimarca, in seguito alla nuova aliquota dell'IVA in vigore del 1° ottobre 1978, mentre in Francia, in Italia, nel Regno Unito e in Irlanda il ritmo di aumento dei prezzi su base annua risulta molto elevato, raggiungendo e superando anzi il livello del 10%.

### Finanze: numerosi provvedimenti di politica monetaria presi nei paesi membri all'inizio del 1979

Gli ultimi due mesi sono stati caratterizzati da una situazione calma sul mercato dei cambi, ma vari paesi membri hanno preso provvedimenti di politica monetaria importanti sul piano interno. In Italia e in Belgio sono state alleggerite le misure restrittive finora in vigore (aumento del tasso d'incremento dei prestiti bancari al settore privato). Nuovi provvedimenti restrittivi sono stati invece presi in altri paesi: nella Repubblica federale di Germania, aumento del tasso d'interesse sulle anticipazioni presso la banca centrale e dell'importo delle riserve obbligatorie; nel Regno Unito, aumento del tasso di sconto ufficiale (dal 12,5 al 14% l'8 febbraio, e quindi ritorno al 13% all'inizio di marzo); nei Paesi Bassi, limitazione al 9% dell'aumento dei crediti bancari a breve termine concessi al settore privato e, in Danimarca, divieto di vendita delle obbligazioni di Stato a stranieri.

Denne publikation omfatter to dele, den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder kun af EUROSTAT (harmoniserede tal) på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlege, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelseres definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

## PREFACE

EN

This bulletin is in two parts: 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

## AVVERTENZA

IT

Il presente bollettino consta di 2 parti: l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa

## COMMUNITY TRADE 1970-1978

### 1. INTRA-COMMUNITY TRADE (BASED ON IMPORTS)

From 1970 to 1978 trade between Member States increased in value from 57 billion EUA to 179 billion EUA, representing a rise of 216% for the period which, at an annual rate, averages 15.5% [when not indicated to the contrary, all rates of change (percentages) are on the basis of current prices]. As an approximate estimate, intra-EC trade increased in real terms by about 65%, an annual average rate of 6.5%. At the beginning of the decade the year-on-year growth rate was relatively stable (1970: +17%, 1971: +12%, 1972: +13%), but this was followed by significant increases in 1973 (+26%) and 1974 (+28%). In 1975 there was a marked setback in growth (+1%) due to the economic recession which occurred in almost all Member States. In 1976, the strong growth pattern returned and an increase in trade of 27% was seen. However, this was not sustained in the following two years when growth rates of 13% and 7% were recorded in 1977 and 1978 respectively.

In 1978 it was the smaller member countries which had the strongest trading relations with other Member States; Ireland imported 75.6% (1970: 69.2%) of their total imports from other members and exported 77.6% (1970: 73.7%) to them. The corresponding figures for Belgium-Luxembourg were 69.1% (65.3%) for imports and 71.4% (73.3%) for exports.

The United Kingdom showed the lowest level of intra-Community trade with shares of 38.2% for imports and 37.8% for exports in 1978. Nevertheless, UK trade with the rest of the Community grew very quickly after it had become a member, since its corresponding figures in 1970 were only 27.1% and 29.3%.

### 2. EXTRA-COMMUNITY TRADE

Imports from third countries grew at an annual average rate of 14.8% [when not indicated to the contrary, all rates of change (percentages) are on the basis of current prices] — slightly slower than intra-Community trade — and reached a value of 179 billion EUA in 1978, having trebled since the beginning of the decade (1970: 59 billion EUA). This is estimated to be equivalent to an increase in real terms of about 50% — an annual average growth rate of 5.1%. A strong contributory factor to this increase was the rise in raw material and oil prices in 1973/74 but, apart from these two years, extra-Community trade developed at a slower rate than internal trade (1973: +28.6%, 1974: +55.2%).

A certain correlation can be discerned between overall import growth and the level of imports from the OPEC countries. In the years of high growth, imports from OPEC increased by 30% (1973) and 153% (1974). In 1975, purchases from the oil-exporting cartel shrunk by 9% and total extra-EC imports by 4%. Since 1976 the growth of imports from third countries was higher than that from OPEC: in 1976 the overall rate was +27% against the OPEC rate of +18%, 1977: +7% against +1% and 1978: +5% against -13%. In value terms, imports from OPEC in 1978 stood at +37 billion EUA, approximately the same level as that pertaining in 1974 (39 billion EUA). Over the entire period, the proportion of total third-country imports originating from OPEC rose from 15% in 1970 to 30% in 1974 and then fell back to 21% in 1978.

During the same period, the value of exports to third countries rose at an annual average rate of 15.4%. In real terms, this was equivalent to an annual growth of about 6.1%, somewhat higher than that of imports, giving a level of 175 billion EUA in 1978 as against 81 billion EUA in 1970. The year-on-year growth of exports was also more uniform than that of imports, with the lowest rate of 7% being recorded in 1975 and the highest (42%) in 1974. In 1976 (+17%) and 1977 (+16%) the rate was slightly above average and, in 1978, fell to +7% as a result of a setback in trade with other Western European countries. The high annual growth rates of 1973 (+23%) and 1974 (+42%) were due not only to the rise in prices brought about by the increase in the cost of oil, especially for manufactured products, but also due to the increased import demand of the OPEC group due to their enhanced purchasing power. This led to export growth rates of the EC to OPEC members of 29% (to 6.6 billion EUA) in 1973, 72% (to 11.4 billion EUA) in 1974 and 73% (to 19.7 billion EUA) in 1975. Sales to OPEC continued to grow at above average rates in the following years with 19% in 1978 and 26% in 1977. However, in 1978 the rate shrunk to +4% with exports to OPEC reaching a level of 31 billion EUA as against 3.8 billion in 1970.

The 'oil crisis' also left its mark on the trade balance of the Community. In 1970 a deficit of 3.7 billion EUA was recorded with third countries, partly due to the already existing deficit with OPEC (-5.1 billion EUA) and that with the USA (-3.0 billion EUA) and Canada (-1.5 billion EUA). In 1971 the Community deficit shrunk to 0.8 billion EUA and, in the following year, this was transformed into a surplus of 0.2 billion EUA. In 1973 a deficit was once again recorded (-3.6 billion), partly due to a negative trade balance with OPEC of 8.7 billion EUA. 1974 saw a record trade deficit for the Community, with the OPEC deficit alone being 27.5 billion EUA (Saudi Arabia, -10.0 billion; Iran, -4.6 billion) that with the United States -4.4 billion, that with Japan -2.6 billion and that with Canada -1.5 billion EUA. The resulting overall balance stood at -16.6 billion EUA. The trade balance with EFTA (+7.5 billion), other Western Europe (+5.1 billion) and Eastern Europe (+1.8 billion) were also at record levels, but this time in favour of the Community. The deficit position continued into 1975

1: value.

2: as % of the total.

(-4.2 billion) but the negative balance with OPEC was reduced to 15.7 billion EUA. In 1976 the overall deficit increased sharply once again to reach 18.3 billion EUA, including -18.4 billion with OPEC, -9.1 billion with the USA and -3.7 billion with Japan. However, the high growth of exports to, and low growth in imports from OPEC made their mark in 1977 when the deficit with the cartel shrunk to 12.7 billion EUA. In 1978 this figure was reduced still further, to -6.0 billion EUA, giving a total Community trade deficit of 7.1 billion EUA in 1977 and 4.0 billion EUA in 1978. Imports from Western industrialized countries grew at an annual rate of 13.7% and amounted to 93 billion EUA in 1978, as against 33 billion in 1970. After a below average growth of 8% between 1976 and 1977, the rate increased in 1978 to +13%. At the same time, exports to this group grew at an annual average rate of 12.5%, from 35 billion EUA in 1970 to 90 billion EUA in 1978. During the last three years of this period, however, the trend in growth was reversed: +19% in 1976, +15% in 1977 and +5% in 1978.

The country showing the strongest expansion in this group was Japan, from whom the Community purchased more than five times as much as in 1970. With an annual average growth of 23.2%, the Community's imports amounted to 8.7 billion EUA in 1978 and exports reached 3.7 billion, having grown at an annual average rate of 13% (1970: 1.4 billion EUA). Japan's share in total EC imports from third countries grew from 2.8% in 1970 to 4.9% in 1978, whereas its share in exports fell from 2.5% to 2.1%. Hence, from 1970, the trade deficit of the EC with Japan grew steadily to reach -4.6 billion EUA in 1977 and -5.1 billion in 1978.

Compared with Japan, trade with the USA developed remarkably slowly, with an annual average rate of 10.9% for imports and 12.1% for exports. Nevertheless, this country is still the EC's largest trading partner with a share of 15.7% in total extra-EC imports and 13.2% in exports in 1978 (1970: 20.7% and 16.7%). The trade balance with the United States stood at -7.4 billion EUA in 1975 and -9.1 billion in 1976, but the deficit was reduced in 1977 to 5.1 billion and again in 1978 to 5.0 billion EUA.

Of the three candidate countries, only Spain was able to stabilize its position. In 1974 the surplus of the Community reached the record level of 1.4 billion EUA, but shrunk to 1.1 billion in 1975, 842 million in 1976 and 567 million in 1977. In 1978 the balance turned into a deficit for the Community of 455 million EUA. In contrast, the Community has always showed a large surplus in its trade with Portugal, with the lowest level of +352 million EUA being recorded in 1972, and the highest level, of 949 million, being seen in 1977. In 1978, the surplus stood at 737 million EUA.

The situation with Greece has been one of a continuing surplus for the Community which rose from 563 million EUA in 1970 to 1 379 million in 1977 and on to 1.440 million in 1978.

Community imports from developing countries (excluding OPEC) increased at an annual average rate of 12.8% from 12.9 billion EUA in 1970 to 34.0 billion in 1978, while exports grew at 13.9% from 12.5 billion EUA to 35.4 billion. Compared to this, trade with the ACP group did not develop satisfactorily over the period from their point of view. EC imports grew at an annual average rate of only 12.7% (from 4.6 billion EUA in 1970 to 12.0 billion EUA in 1978) while exports grew at an annual rate of 17.8% (from 3.4 to 12.7 billion EUA). Consequently, the ACP's share in Community imports fell from 7.7% in 1970 to 6.7% in 1978, whilst it accounted for a larger proportion of Community exports (6.2% in 1970 to 7.2% in 1978).

Trade with State-trading countries reached a value of 13.8 billion EUA for imports and 15.4 billion EUA for exports in 1978. The growth in trade between 1970 and 1978 was slightly higher than that for total extra-EC trade, with an annual average rate of 16.2% for imports and 17.4% for exports. The highest rates were recorded during the 1973-1975 period when the year-on-year rates were 39%, 37% and 4% for imports and 38%, 52% and 19% for exports respectively. In 1976 imports climbed again by 34% but sales then fell by 7% in 1977 and 4% in 1978. Against this, export growth rates were always at a relatively low level during the period, with +9% for 1976, +2% for 1977 and +6% for 1978. The largest partner of the Community in this group was the Soviet Union: in 1978 imports from the USSR amounted to 6.4 billion EUA (1970: 1.5 billion) and exports to the country reached 5.6 billion EUA (1970: 1.4 billion). Hence, in 1978, the Community showed a deficit of 801 million EUA which followed smaller deficits in 1977 and 1976 (304 and 358 billion EUA respectively) and a surplus of 1 102 billion in 1975.

USSR	-132	-114	1 102	-358	-304	-801
China	113	63	486	326	-66	539

Trade with China was, in general, in the Community's favour with a balance of +486 million EUA in 1975, 326 million in 1976, a slight deficit of 66 million in 1977 and, once again, a surplus of 532 million EUA in 1978. Despite the setback in trade with China in 1977, when EC imports remained static and exports fell by 33%, average annual growth rate for the period 1970-1977 were 13.1% for imports and 15.5% for exports.

This was the result of a steady growth in imports which reached a level of 930 million EUA in 1978 (+8% against 1977) and an extraordinarily high increase in exports in the same year to 1 462 million EUA (+84%).

Grøn serie:

**Landbrugsstatistisk årbog 1974-1977**  
ISBN 92-825-0545-6

294 sider. Format C 5.  
Flersproget udgave. Udkommet i januar 1979.

Denne årbog er en slags statistisk »vademecum«, der indeholder syntesen af de væsentligste afsnit i »Landbrugsstatistik«. Den er opdelt i 6 underafsnit:

- Almindelig oversig;
- Landbrugs- og skovbrugssektorregnskaber;
- Struktur;
- Produktion;
- Forsyningsbalancer;
- Priser og prisindekser.

ISBN 92-825-0755-6

64 sider. Format A 4.  
Udgave på EN/FR. Udkommet i februar 1979.

Denne publikation indeholder de harmoniserede data for mineralolieindustrien i løbet af sidste år. Specialisten finder her supplerende oplysninger, og en hurtig opdatering af serier offentliggjort for tidligere år i energistatistikårbogen. Den dækker de forskellige mineralolieprodukter og viser for hver af disse de forskellige energibevægelser.

**Methodology of balance of payments of Belgo-Luxembourg Economic Union**  
ISBN 92-825-0380-1

84 pages. Format A4.  
Bilingual edition FR/NL published in February 1979.

This publication describes the concepts, definitions and methods which have been used in compiling the balance of payments of the BLEU for the year 1976. The work consists of three chapters. In the first chapter the principles which govern the balance of payments of the BLEU are described globally, and, in some cases, compared to the recommendations formulated by the International Monetary Fund. The second chapter describes in detail the composition of each balance of payments item and the criteria adopted for breakdown. The last chapter gives an overall view of the sources and methods used to calculate or estimate the data of each balance of payments item.

The text has been supplemented by a number of annexes which for the 1976 data give, on the one hand, an analytical view of the underlying transactions and the adjustments which have been made and, on the other, indicate the relation between the items of the balance of payments of the BLEU and those of the presentation recommended by the International Monetary Fund.

**Annuario di statistica agraria 1974-1977**  
ISBN 92-825-0545-6

294 pagine. Formato C 5.  
Edizione multilingue. Febbraio 1979.

L'Annuario può essere definito un « vademecum » che compendia i temi principali contenuti nelle pubblicazioni specializzate di statistica agraria. L'opera è suddivisa nelle sei parti seguenti :

- Parte generale;
- Conti dell'agricoltura e della silvicoltura;
- Struttura;
- Produzione;
- Bilanci d'approvvigionamento;
- Prezzi e indici dei prezzi.
