Growth in real terms of the main economic aggregates between 1973 and 1978

ARTIKLER – ARTICLES – ARTICOLI 83

Manuskript afsluttet den 25. juni 1979

Manuscript completed 25 June 1979

Manoscritto terminato il 25 giugno 1979

Arbejdsløshed

Den nedgang i arbejdsløsheden, der startede i februar 1979 både i Fællesskabet under ét og i de enkelte medlemslande, fortsatte i maj. Efter en ny nedgang på ca. 250 000 personer var antallet af registrerede arbejdsløse i Fællesskabet ved udgangen af maj 5,6 mio., mens de registrerede arbejdsløses andel af den erhvervsaktive befolkning udgjorde 5,3% mod 5,5% den foregående måned.

Dette svarer i bruttotal til en nedgang på 4,2% af antallet af registrerede arbejdsløse i sidste måned. I sæsonkorrigerede tal er nedgangen også temmelig betydelig (-0,9%). Den nedadgående tendens er generel, og kun for Frankrig, Nederlandene og Belgien viste de sæsonkorrigerede tal en stigende arbejdsløshed (henholdsvis +0,9% +1,7% og +0,23%).

Industriproduktionen : fornyet stigning i indekset for EUR-9 i februar og marts, men hovedtendensen i stigningstakten er stadig ugunstig.

De sæsonkorrigerede indekstal for Fællesskabets industriproduktion nåede i marts 1979 op på 116,5 (1975=100) i forhold til 112,3 og 114,9 for januar og februar. På trods af den nylige stigning i industriproduktionen er hovedtendensen i Fællesskabets stigningstakt ugunstig (1. kvartal 1979 udviste en stigning på 0,5% i forhold til 4. kvartal 1978). Dette bekræftes af de første skøn for april, som viser en stigning på 0,3% for Fællesskabets produktion. Stigningstakten for produktionsindekset for hele industrien er blevet gradvist forringet siden november 1978, hvilket afspejler den ugunstige situation i de tre vigtigste produktionssektorer. I 1. kvartal 1979 var denne tendens særlig markant for produktionen af investeringsgoder (-2,6% i forhold til 4. kvartal 1978), men dæmpningen i produktionen af forbrugsgoder (+0,2%) og mellemproduktindustrien (+1,1%) er ligeledes foruroligende.

I de enkelte medlemslande er denne dæmpning meget betydelig, således i Forbundsrepublikken Tyskland, Italien og Danmark, mens den er mindre i Luxembourg og nu også synes at gøre sig gældende i Nederlandene. I Frankrig er situationen gunstigere. I Det forenede Kongerige, hvor der har været nedgang siden august 1978, synes tendensen nu at være stigende.

Energi : stærk stigning i forbruget i 1978

1978 adskiller sig fra de foregående år ved en ret betydelig stigning i energiforbruget i hele Fællesskabet. Energiforbruget har for første gang siden oliekrisen i slutningen af 1973 passeret 1973-niveauet, som var på 933 millioner tons olieækvivalent. Stigningen på 2,9% er temmelig stor, især hvis man sammenligner med stigningstakten for bruttonationalproduktet (2,9%) og industriproduktionen (af størrelsesordenen 2,2%). Energiforbruget på 942,3 millioner tons dækkes hovedsagelig af olie (54%), kul (19%) og naturgas (17%), mens den elektriske primærenergi (3,6%) faldt med 0,5% i forhold til det foregående år som følge af nedsat vandføring. På trods af en produktionsstigning på 8% i forhold til 1977 dækker atomkraft endnu kun 3% af det samlede forbrug.

Samhandelen inden for Fællesskabet : økonomisk opgang fører til markant forøgelse af den økonomiske aktivitet.

Den mærkbare bedring i den økonomiske situation i medlemsstaterne kom til udtryk gennem en betydelig stigning i samhandelen inden for Fællesskabet (udregnet på basis af importtallene). I de tolv måneder, som gik forud for marts 1979, voksede samhandelen med 24,4%, mens samhandelen i det første kvartal - 51,4 mrd ERE - udviste en stigning på 17,9% i forhold til samme periode i 1978.

Den ekstraordinære stigning i Italiens (+35,2% i første kvartal af 1979 sammenlignet med første kvartal af 1978), Irlands (+27,7%) og Det forenede Kongeriges import (+21,1%) var hovedårsagerne til denne bedring i den økonomiske situation. Italien udvignede denne stigning med en lige så stor vækst i eksporten til andre EF-lande og opnåede således et overskud på 239 mio. ERE i samhandelen med fællesskabslandene. Til trods for en hurtig stigning i eksporten af olie til de andre EF-lande nåede væksten i Det forenede Kongeriges eksport kun op på 12%, hvilket førte til en fordobling af underskuddet fra første kvartal af 1979, som nu beløber sig til -1 343 mio. ERE, i forhold til -735 mio. ERE for første kvartal af 1978.

Fællesskabets samhandel med tredjelande : olieimporten belaster handelsbalancen.

I første kvartal af 1979 voksede EF's samhandel med tredjelande ikke nær så kraftigt som samhandelen inden for Fællesskabet : importen steg med 10,2% (i forhold til samme periode forrige år) til 47,3 mrd ERE, hvilket navnlig skyldes den øgede efterspørgsel efter olie og de højere oliepriser, mens eksporten kun steg med 8% til 43,5 mrd ERE, hvilket ikke mindst skyldes den ringe økonomiske opgang i USA. Derfor var importdækningen kun 92% og underskuddet på handelsbalancen forøgedes til -3,8 mrd ERE (første kvartal 1978 : -2,6 mrd). Den opadgående økonomiske tendens i Italien indvirkede også på dette lands import fra tredjelande (+26,9% for de første tre måneder), mens stigningen i olieimporten belastede handelsbalancen. Trods lirens styrkede position steg også eksporten betydeligt, og dette gjorde forringelsen af handelsbalancen mindre udtalt, hvor underskuddet reduceredes med 302 mio. ERE til -869 mio. ERE. Det forenede Kongerige kunne ikke i fuldt omfang udnytte fordelene ved landets egen olieproduktion : importen faldt med 3,9%, men samtidig faldt eksporten med 8,2%. Resultatet blev et forøget underskud på -1 304 mio. ERE for perioden fra januar til marts 1979, sammenlignet med -979 mio ERE for samme periode i 1978. I Nederlandene noteredes der også et anseligt underskud (-1 814 mio. ERE). Nederlandene havde med 61% den laveste importdækningsgrad, fulgt af Irland med 63%. Den største absolutte forringelse af handelsbalancen noteredes for Tyskland, hvis overskud blev reduceret med 394 mio. til +2 210 mio. ERE.

Forbrugerpriser : moderat stigning i maj.

I maj 1979 steg forbrugerprisindekset (*) for Fællesskabet med 0,8% i forhold til april. Dette betyder en moderat stigning i forhold til de foregående måneder af 1979.

Der er tale om meget forskellige stigninger fra land til land : i Forbundsrepublikken Tyskland og Benelux-landene ligger stigningstakten mellem 0 (Nederlandene) og 0,6 (Luxembourg). Stigningerne er kraftigere i Frankrig (1,0%), Irland (1,1%), Italien (1,3%) og især i Danmark (1,6%). I Danmark er stigningen påvirket af den halvårige indregning af husleje samt af ferieudgifterne. Stigningen i Det forenede Kongerige ligger på samme niveau som i Fællesskabet (0,8%).

For øjeblikket er stigningen i fællesskabsindekset 8,9% på årsbasis, hvilket viser, at der siden begyndelsen af 1979 er sket en mindre forøgelse af stigningstakten.

Penge og Finanser : ECU'en som betalingsmiddel mellem Fællesskabets centralbanker

Den belgiske franc nåede ved udgangen af maj den nederste interventionsgrænse over for DM; den belgiske centralbank modtog DM som modydelse for sine ECU-fordringer i EFMS. Hermed introduceredes ECU'en som betalingsmiddel mellem centralbankerne i de lande, som deltager i EMS.

Desuden hævede den belgiske centralbank - for at begrænse kapitaludstrømningen - diskontoen fra 7% til 8%, og denne beslutning blev øjeblikkeligt fulgt af Nederlandsche Bank, som hævede diskontoen fra 6,5% til 7%. Den seneste styrkelse af DM'en skyldes delvis Deutsche Bundesbank's salg af US-dollars på det internationale valutamarked. Dette har begrænset både dollarens stigning og de stigende olieprisers inflatoriske virkning.

(*) Husholdningernes Konsum.

Unemployment

The downward trend in unemployment, which began in February 1979 in both the Community as a whole and the Member States, continued in May. After a further drop of around 250 000, the number of registered unemployed in the Community stood at 5.6 million at the end of May, representing 5.3% of the civilian working population — compared with 5.5% in the previous month.

This represents a drop of 4.2% in the gross figures for registered unemployed persons during the past month. The drop in the seasonally adjusted figures is also quite substantial (−0.9%). This downward trend is fairly widespread, with only France, the Netherlands and Belgium recording an increase in their seasonally adjusted unemployment figures (+0.9, 1.7 and 0.23% respectively).

Industrial production: rise in the EUR-9 index in February and March, but the underlying trend in the growth rate still unfavourable.

After adjustment for seasonal variations, the index of industrial production in the Community reached 116.5 in March 1979 (1975 = 100), compared with the figures of 112.3 and 114.9 recorded in January and February. Despite the recent upturn in industrial production, the underlying growth trend in the Community is unfavourable (first quarter of 1979 0.5% up on the fourth quarter of 1978). This is confirmed by the initial estimates for April which indicate a growth of 0.3% in Community production. The growth rate for the all-industry index of production has progressively declined since November 1978, as is shown by the unfavourable situation in the three main sectors into which production is aggregated. In the first quarter of 1979, this trend was particularly pronounced in the capital goods industries (2.6% down on the fourth quarter of 1978), but the slowing down of production in the consumer and intermediate goods industries (+0.2 and +1.1% respectively) is just as disturbing.

At national level, this slowing down is very marked in Germany, Italy and Denmark, not so pronounced in Luxembourg and seems to be increasing in the Netherlands. The situation is more favourable in France. In the United Kingdom, after a decline since August 1978, production seems to have been picking up again over the past few months.

Energy: sharp increase in consumption in 1978

1978 stands out from previous years by virtue of a fairly substantial increase in energy consumption in the Community as a whole. Thus, for the first time since the oil crisis at the end of 1973, energy consumption exceeded the 1973 level of 933 million tonnes petroleum equivalent. The increase of 2.9% is a fairly substantial one, especially in comparison with the growth rates for GDP (2.9%) and industrial production (around 2.2%). Total consumption of 942.3 million tonnes was accounted for mainly by oil (54%), coal (19%), natural gas (17%) and primary electrical energy (3.6%), the latter being 0.5% down on the previous year owing to less satisfactory flow conditions. Despite an increase of 8% over 1977, nuclear energy still accounts for only 3% of total consumption.

Intra-Community trade: economic recovery leads to marked acceleration

The notable economic recovery in the Member States manifested itself in considerably increased trade within the Community (as measured by imports). In the twelve months to March 1979, trade increased by 24.4%, while, in the first quarter, trade amounted to 51.4 Mrd. EUA, a rise of 17.9% compared with the same period of 1978.

The extraordinary expansion of purchases by Italy (+35.2% for the 1st quarter 1979 compared with the first quarter 1978), Ireland (+27.7%) and the United Kingdom (21.1%) were the prime movers of this boom. Italy balanced this increase by an equally large growth in its sales to other EC countries, to realise a surplus of 239 Mio EUA in its intra trade. Despite a rapid increase in the United Kingdom's oil exports to its EC partners, the average growth of its exports was limited to only 12%, leading to a doubling of its 1st quarter deficit to −1343 Mio EUA in 1979 against −735 Mio EUA in 1978.

Community external trade: Oil imports burden the trade balance

In the first quarter of 1979 the EC's external trade grew much more feebly than internal trade: imports went up by 10.2% (as against the same period of the previous year) to 47.3 Mrd EUA particularly as a result of strengthened oil demand and higher oil prices, while exports increased by only 8% to 43.5 Mrd EUA, not least because of the weak economic recovery in the USA. Therefore import coverage was only 92% and the deficit on the trade balance widened to −3.8 Mrd EUA (1st quarter 1978: −2.6 Mrd.)

The upward economic trend in Italy also had an impact on its imports from non-EC countries (+26.9% for the first three months) with the expansion in oil imports putting a strain on the trade balance. However, even with the stronger position of the lira, exports also increased considerably thus moderating the worsening of the trade balance, which widened by 302 Mio to −869 Mio EUA. The United Kingdom did not profit fully from the advantages of its own oil production: imports decreased by 3.9%, but at the same time exports shrunk by 8.2%. The result was an enlarged deficit of −1304 Mio EUA in January to March 1979 as against −979 Mio in the same period of 1978. The Netherlands also reported a higher deficit (−1814 Mio EUA). This member had the lowest import coverage rate of 61% followed by Ireland with 63%. The largest absolute deterioration of a trade balance was that for Germany, whose surplus was reduced by 394 Mio to +2210 Mio EUA.

Prices: more moderate rise in May

The consumer price index (*) for the Community as a whole went up by 0.8% between April and May 1979, representing a moderate rise in comparison with the corresponding increases in the first five months of the year.

This rise still varies considerably from country to country: in the FR of Germany and the Benelux countries the rate of increase ranged from 0 (the Netherlands) to 0.6% (Luxembourg). The rises were high in France (1.0%), Ireland (1.1%), Italy (1.3%) and above all Denmark (1.6%), where the rise was influenced by inclusion in the index of half-yearly rent increases and holiday expenses. The rise in the United Kingdom was the same as that in the Community (0.8%).

The rate of increase in the Community index over 12 months currently stands at 8.9%, thus confirming the slight acceleration in prices since the beginning of 1979.

Finance: the ECU as a means of payment between central banks in the Community

At the end of May the Belgian franc reached its lowest intervention level vis-à-vis the Deutsche Mark; the Belgian Central Bank obtained DM in exchange for its assets in ECU held with the European Monetary Co-operation Fund (FECOM). This marks the beginning of the ECU's role as a means of payment between the central banks of the countries in the EMS.

In addition, in order to limit the outflow of capital, the Belgian authorities increased the official discount rate from 7 to 8% — a decision which was immediately followed by the Nederlandsche Bank, which increased its rate from 6.5 to 7%. The recent strengthening of the DM is due partly to the Bundesbank's sales of US dollars on the international exchange market — an action which curbed both the rise of the US dollar and the inflationary pressure linked to the increase in the price of oil.

(*) Final consumption of households.

Disoccupazione

È proseguito in maggio il movimento di riduzione della disoccupazione, avviatosi nel febbraio 1979, sia per l'insieme della Comunità che per i singoli Stati membri. Dopo una nuova flessione di circa 250.000 unità, a fine maggio i disoccupati iscritti presso gli uffici di collocamento della Comunità erano 5,6 milioni e la loro quota sul totale della popolazione attiva civile era scesa al 5,3%, contro il 5,5% del mese precedente.

In termini relativi e sulla scorta dei dati non corretti delle variazioni stagionali, i disoccupati iscritti presso gli uffici di collocamento risultano diminuiti, nell'ultimo mese, del 4,2%; la diminuzione resta abbastanza sensibile (-0,9%) anche quando è calcolata sulla scorta dei dati corretti delle variazioni stagionali. La tendenza discendente della disoccupazione è generale; soltanto la Francia, i Paesi Bassi ed il Belgio accusano un aumento della disoccupazione sulla scorta dei dati destagionalizzati (rispettivamente: +0,9%, +1,7%, +0,23%).

Produzione industriale : ripresa dell'indice EUR-9 in febbraio e in marzo, ma persistere della tendenza di base sfavorevole del tasso di crescita.

In base ai dati destagionalizzati, l'indice della produzione industriale della Comunità ha raggiunto nel marzo 1979 il livello di 116,5 (1975 = 100) rispetto alle cifre di 112,3 e 114,9 registrate in gennaio e in febbraio. Tuttavia, nonostante la recente ripresa della produzione industriale, la tendenza di base dello sviluppo nella Comunità resta sfavorevole (per il 1° trimestre 1979, aumento dello 0,5% rispetto al 4° trimestre 1978). Questo fatto è confermato dalle prime stime per il mese di aprile, che indicano un incremento dello 0,3% della produzione comunitaria. Il tasso d'incremento dell'indice della produzione del complesso delle industrie è progressivamente peggiorato dal novembre 1978, accusando la situazione sfavorevole dei tre principali settori in cui viene raggruppata la produzione. Per il 1° trimestre del 1979, la tendenza negativa è particolarmente accentuata nelle industrie dei beni d'investimento (-2,6% rispetto al 4° trimestre 1978), ma i rallentamenti osservati nelle industrie dei beni di consumo (+0,2%) e in quelle dei beni intermedi (+1,1%) non sono meno preoccupanti.

Se si esamina la situazione dei singoli Stati membri, il rallentamento appare molto accentuato in Germania, in Italia e in Danimarca e più moderato nel Lussemburgo, mentre sembra manifestarsi nei Paesi Bassi.

In Francia la situazione è più favorevole. Nel Regno Unito, dopo un regresso dall'agosto 1978, la tendenza degli ultimi mesi sembra indicare una ripresa.

Energia : forte espansione del consumo nel 1978

Il 1978 si distingue dagli anni precedenti per un aumento alquanto sensibile del consumo di energia per l'intera Comunità : per la prima volta dalla crisi petrolifera della fine del 1973, il consumo di energia ha superato il livello del 1973, che era stato di 933 milioni di tonnellate di equivalente petrolio. L'aumento del 2,9% è piuttosto rilevante, soprattutto se confrontato con i tassi d'incremento del PIL (2,9%) e della produzione industriale (dell'ordine del 2,2%). Il consumo di energia, pari a 942,3 milioni di tonnellate, è stato coperto essenzialmente con il petrolio (54%), il carbone (19%), il gas naturale (17%) e l'energia elettrica primaria (3,7%), diminuita tuttavia dello 0,5% rispetto all'anno precedente per le meno favorevoli disponibilità idriche. L'energia nucleare, pur avendo registrato un'espansione dell'8% rispetto al 1977, non rappresenta ancora che una quota del 3% del consumo globale di energia.

Commercio intracomunitario : mercato più vivace per la ripresa economica

La sensibile ripresa economica negli Stati membri si è tradotta in un deciso incremento del volume del commercio tra i paesi della Comunità (rilevato sulla base delle importazioni). In dodici mesi, fino a tutto marzo 1979, gli scambi intracomunitari sono aumentati del 24,4%, mentre nel solo primo trimestre tale interscambio è stato di 51,4 miliardi di UCE, con un aumento del 17,9% rispetto allo stesso periodo del 1978.

Questo boom è stato avviato da una straordinaria espansione delle importazioni da parte dell'Italia (+35,2% per il 1° trimestre 1979, rispetto al 1° trimestre del 1978), dell'Irlanda (+27,7%) e del Regno Unito (+21,1%). Per l'Italia l'incremento delle importazioni è stato accompagnato da uno sviluppo altrettanto forte delle vendite agli altri paesi della CE, cosicché la bilancia commerciale italiana con gli altri paesi della Comunità si chiude con un attivo di 239 milioni di UCE. Per il Regno Unito, nonostante un rapido incremento delle forniture di petrolio agli altri paesi della CE, l'espansione media delle esportazioni è stata limitata al 12% : il disavanzo per il 1° trimestre si è così raddoppiato, passando a -1.343 milioni di UCE nel 1979, contro -735 milioni di UCE nel 1978.

Commercio estero della comunità : le importazioni di petrolio gravano sulla bilancia commerciale

Nel 1° trimestre del 1979 il commercio estero della CE è aumentato molto più debolmente del commercio intracomunitario : rispetto al periodo corrispondente dello scorso anno, le importazioni sono aumentate del 10,2%, salendo a 47,3 miliardi di UCE, soprattutto per la più sostenuta domanda di petrolio e per i prezzi più elevati di questa materia prima, mentre le esportazioni sono salite solo dell'8%, raggiungendo un livello di 43,5 miliardi di UCE, anche a causa della debolezza della ripresa economica negli Stati Uniti. Di conseguenza le esportazioni hanno coperto solo il 92% delle importazioni ed il disavanzo della bilancia commerciale è salito a -3,8 miliardi di UCE (disavanzo del 1° trimestre 1978 : -2,6 miliardi).

La tendenza economica ascendente registrata dall'Italia ha avuto incidenza anche sulle sue importazioni dai paesi terzi (+26,9% per i primi tre mesi) : in particolare, l'espansione delle importazioni di petrolio si è duramente ripercossa sulla bilancia commerciale. Comunque, malgrado il rafforzamento della lira, anche le esportazioni sono aumentate notevolmente, moderando così il peggioramento della bilancia commerciale, che è passata da un attivo di 302 milioni a un disavanzo di 869 milioni di UCE. Il Regno Unito non ha approfittato pienamente dei vantaggi della produzione interna di petrolio : infatti, se le importazioni sono diminuite del 3,9%, le esportazioni si sono ridotte nel contempo dell'8,2%. La conseguenza è stato un maggiore disavanzo, pari a 1304 milioni di UCE da gennaio a marzo 1979, contro 979 milioni di UCE nello stesso periodo del 1978. Anche i Paesi Bassi hanno registrato un più grave disavanzo (-1.814 milioni di UCE) e risultano il paese membro che registra il tasso più basso di copertura delle importazioni con esportazioni (61%), seguiti dall'Irlanda con il 63%. Il maggior peggioramento della bilancia commerciale in termini assoluti è stato quello della Germania, il cui attivo si è ridotto di 394 milioni, scendendo a +2.210 milioni di UCE.

Prezzi : aumento più moderato in maggio

Nel maggio 1979 l'indice dei prezzi al consumo* per la Comunità è salito dello 0,8% rispetto al mese precedente : si tratta di un aumento moderato, a fronte dei tassi conosciuti nei primi quattro mesi del 1979.

Se si considerano singolarmente i vari paesi membri, l'aumento dei prezzi presenta come sempre disparità notevoli : per la Repubblica federale di Germania e i paesi del Benelux il tasso è compreso tra lo 0 (Paesi Bassi) e lo 0,6% (Lussemburgo); tassi elevati si osservano invece in Francia (1,0%), in Irlanda (1,1%), in Italia (1,3%) e soprattutto in Danimarca (1,6%) : in quest'ultimo paese le cifre sono influenzate dall'inclusione semestrale, nell'indice, degli aumenti degli affitti e delle spese per le vacanze. Nel Regno Unito l'evoluzione dei prezzi si colloca allo stesso livello della media comunitaria (0,8%).

Attualmente il tasso d'incremento dell'indice comunitario su 12 mesi risulta dell'8,9%, il che conferma la lieve accelerazione dall'inizio del 1979.

Finanze : L'ECU come mezzo di pagamento tra le banche centrali della Comunità

Il franco belga ha raggiunto a fine maggio il livello minimo d'intervento nei confronti del marco tedesco e la Banca Centrale del Belgio ha ottenuto dei DM come contropartita dei suoi attivi in ECU presso il FECOM. Ciò segna l'inizio del ruolo dell'ECU come mezzo di pagamento tra banche centrali dei paesi partecipanti allo SME.

Inoltre, per frenare le uscite di capitali, le autorità belghe hanno aumentato il tasso ufficiale di sconto dal 7% all'8%; tale decisione è stata seguita immediatamente dalla Nederlandsche Bank, che ha portato a sua volta il tasso di sconto dal 6,5% al 7%. Il recente rafforzamento del DM è dovuto in parte alle vendite di dollari US sul mercato internazionale dei cambi, operate dalla Bundesbank; tali vendite hanno limitato sia la risalita del dollaro US, sia la pressione inflazionista connessa con l'aumento del prezzo del petrolio.

(*) Consumi finali delle famiglie

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlige, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelser definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

PREFACE

EN

This bulletin is in two parts: 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

AVVERTENZA

IT

Il presente bollettino consta di 2 parti: l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri nazionali, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa.

LIGE UDKOMMET

89-90

- (1) Mere detaljerede oplysninger efter brancher findes i publikationen »Industriens Konjunkturindikatorer«.
- (2) Oplysningerne i dette afsnit af publikationen svarer til resultaterne af konjunkturundersøgelsen hos virksomhedsledere i Fællesskabet. Mere detaljerede oplysninger findes i »Europæisk økonomi«.
- (3) Tallene vedrørende udenrigshandelen findes mere detaljerede og udtrykt i ERE i »Månedlig Bulletin over Udenrigshandelen«.

ARTICLE

Growth in real terms of the main economic aggregates between 1973 and 1978

JUST PUBLISHED

- (1) More detailed data by branch appears in 'Industrial Short-term Trends'.
- (2) The data included in this section of the bulletin are results from a short-term trends enquiry conducted among heads of enterprises in the Community. More detailed data appear in 'European Economy'.
- (3) More detailed data on external trade, expressed in EUA appear in the 'Monthly External Trade Bulletin'.

DI RECENTE PUBBLICAZIONE

91

(1) Alcuni dati più dettagliati per branca sono riportati nel bollettino « Indicatori congiunturali dell'industria ».

(2) I dati contenuti in questa parte del bollettino rappresentano i risultati dell'indagine sulla congiuntura presso i capi di impresa delle Comunità. Alcuni dati più particolari figurano in « Economia europea ».

(3) Alcuni dati del commercio estero più dettagliati ed espressi in UCE sono riportati nel « Bollettino mensile del commercio estero ».

DE

Die deutsche Fassung dieses Bulletins wird am zweiten Dienstag jeden Monats in Druck gegeben.

FR

La version française de ce bulletin est mise sous presse le second mardi de chaque mois.

NL

De Nederlandse versie van dit bulletin gaat de tweede dinsdag van elke maand ter perse.

- 06 Percentage of insured persons on Live Register at mid-month.
 13 Creamery butter production.
 14 Pigs received at bacon factories.
 15 Exports of cattle.
 16 Exports of beef — fresh, chilled or frozen.
 22 Volume of production — Transportable goods industries.
 35 Total number of dwellings completed (connected to the electricity supply).
 41 Imports.
- 42 Exports.
 43 Trade balance.
 48 Volume of imports index numbers.
 49 Volume of exports index numbers.
 53 Value index of retail sales — seasonally adjusted.
 54 Volume index of retail sales — seasonally adjusted.
 61 New private motor cars registered for the first time.
 74 General wholesale price index (Excluding VAT).
- 78 Agricultural output price index numbers — Total index.
 79 Consumer price index — All items.
 89 Money supply M₂.
 92 Gross official reserves.
 96 Balance of current accounts.
 97 Balance of capital movements.

DANMARK

- 05 Beskæftigelsesindeks for industriens arbejdere.
 06 Registrerede ledige i procent af antal personer i arbejdsstyrken — sæsonkorrigeret.
 07 Den offentlige arbejdsformidling: Antal pladser, der ved månedens udgang stod ubesatte.
 12 Animalske landbrugsprodukter: mængdeindeks.
 21 Konjunkturbarometer for industriproduktionen: Nettotal (tallene for tidligere kvartaler angiver en vurdering af det faktiske produktionsforløb, mens tallet for det sidste kvartal udtrykker forventningerne til dette kvartal).
 22 Mængdeindeks for omsætningen af egne varer og tjenester i industrien i alt ekskl. værfter.
 23 Mængdeindeks for omsætningen af egne varer og tjenester i mellemproduktindustrien.
 24 Mængdeindeks for omsætningen af egne varer og tjenester i investeringsgodindustrien ekskl. værfter.
- 25 Mængdeindeks for omsætningen af egne varer og tjenester i forbrugsgodeindustrien.
 34 Antal påbegyndte lejligheder.
 39 Indeks for ordremængde i industrien i alt ekskl. værfter.
 41 Import af varer (cif) i alt — sæsonkorrigeret.
 42 Eksport af varer (fob) i alt — sæsonkorrigeret.
 43 Handelsbalancen i alt.
 45 Indeks for enhedsværdier for import af varer.
 46 Indeks for enhedsværdier for eksport af varer.
 47 Bytteforholdet i udenrigshandelen.
 53 Værdiindeks for detailomsætningen — sæsonkorrigeret.
 54 Mængdeindeks for detailomsætningen — sæsonkorrigeret.
 62 Nyregistrerede personbiler — sæsonkorrigeret.
- 63 Nyregistrerede vare- og lastbiler samt busser.
 71 Prisindeks for omsætningen af egne varer og tjenester i industrien i alt ekskl. værfter.
 77 Råvareprisindeks: 1978-vægte.
 79 Forbrugerprisindeks.
 85 Tilmælningindeks for industriens arbejdere.
 89 Pengeforsyningen (M2).
 92 International likviditet (brutto).
 96 Betalingsbalancens løbende poster i alt.
 97 Betalingsbalancens kapitalposter i alt.
 Kilde: Danmarks Statistik.

UNITED STATES

- 02 Gross national product in constant (1972) dollars.
 03 Gross national product: implicit price deflators — seasonally adjusted.
 06 Labour force: unemployed — seasonally adjusted.
 07 Labour force: help wanted advertising — seasonally adjusted.
 22 Industrial production — seasonally adjusted.
 23 Industrial production: intermediate products — seasonally adjusted.
 24 Industrial production: equipment — seasonally adjusted.
 25 Industrial production: consumer goods — seasonally adjusted.
 28 Industrial production: motor vehicles and parts — seasonally adjusted.
 38 Housing starts and permits: total privately owned — seasonally adjusted.
- 39 Manufacturers' sales, inventories: new orders, net — seasonally adjusted.
 41 Foreign trade: general imports, total — seasonally adjusted.
 42 Foreign trade: exports — seasonally adjusted.
 43 Foreign trade: trade balance — seasonally adjusted.
 44 Foreign trade: imports — unit value.
 45 Foreign trade: exports — unit value.
 46 Foreign trade: terms of trade.
 54 Domestic trade: retail trade — estimated sales — seasonally adjusted.
 63 Transportation equipment: trucks and buses — registrations.
 79 Commodity prices: consumer prices (CPI-U).
- 87 Federal government budget surplus (+) or deficit (-).
 89 Money supply.
 92 Gross official reserves.
 95 Effective exchange rate of the dollar.
 96 Balance on current account — seasonally adjusted.
 98 US assets abroad reserve assets excluded — seasonally adjusted.
 99 Foreign assets — foreign official excluded — seasonally adjusted.

GROWTH IN REAL TERMS OF THE MAIN ECONOMIC AGGREGATES BETWEEN 1973 AND 1978

The provisional results and estimates for the 1978 national accounts provide the answer to an important question, namely: At what level did the main economic aggregates stand in 1978 compared with 1973, the last year before the economic crisis?

Table I shows — for the Community (EUR 9), its nine Member States and the United States of America — the growth achieved in real terms in 1978 by the main economic aggregates in comparison with their 1973 level (= 100).

In 1978, the volume of the Community's **gross domestic product** was only 10% higher than its 1973 level (United States: +12%). However, this average growth concealed substantial differences between member countries, the highest increases being in Ireland (+19%) and France (+15%) and the lowest in Luxembourg (+1%) and the United Kingdom (+5%).

The differences are just as pronounced in the case of **private consumption**, the volume of which in 1978 was 16 to 20% up on 1973 in France, the Netherlands, Ireland, Luxembourg and the Federal Republic of Germany, while the increase was distinctly lower in the United Kingdom (+3%) and Denmark (+8%).

The level of **collective consumption of General Government** went up by 14% over the same period for the Community as a whole. In this case the increases vary from 10% for the Federal Republic of Germany and the United Kingdom to around 25% for Ireland and Denmark.

Over the past few years **gross fixed capital formation** has been the weakest component of demand. For the Community as a whole its volume in 1978 was still lower than in 1973. Whereas in the Federal Republic of Germany the level of investment was virtually the same in these two years, it fell by 8% in Italy and Denmark, 7% in the United Kingdom and 6% in Luxembourg. In France, the Netherlands and Ireland the total volume of investment in 1978 was only 2 to 3% up on 1973; in Belgium it was 9% up on the 1973 level.

The growth in the volume of **exports of goods and services** between 1973 and 1978, which was around 26% for the Community as a whole, was very uneven from one member country to another. It was very high in the case of Italy (+52%) and Ireland (+49%) and substantial in the case of France (+37%). On the other hand, in Belgium and Luxembourg the volume of exports was barely higher last year than in 1973 (+3 and +4% respectively). The increase was also low in the Netherlands (+12%) and Denmark (+14%).

As regards **imports of goods and services**, the greatest increases in terms of volume were recorded in the Federal Republic of Germany (+35%), Ireland (+30%) and France (+28%). On the other hand, the United Kingdom (+2%), Denmark (+4%) and Belgium (+5%) increased their imports only very slightly.

**Table I: Volume indices of uses and resources of goods and services
1973/1978 (1973 = 100)**

	Private consumption	Collective consumption of General Government	Gross fixed capital formation	Exports of goods and services	Imports of goods and services	Gross domestic product at market prices
EUR 9	113	114	99	126	118	110
FR of Germany	116	109	100	127	135	110
France	120	119	102	137	128	115
Italy	110	115	92	152	115	112
Netherlands	119	117	103	112	115	113
Belgium	114	121	109	104	105	111
Luxembourg	117	116	94	103	111	101
United Kingdom	103	111	93	119	102	105
Ireland	117	126	103	149	130	119
Denmark	108	124	92	114	104	109
United States	116	112	103	120	127	112

In Table II the volume increase in overall **gross domestic product** between 1973 and 1978 is calculated in relation to the trends in the total population and the occupied population.

It can be seen that for the Community as a whole the **gross domestic product per inhabitant** was 9% up in 1978 on its 1973 level, a slightly higher figure than that for the United States (+8%). The increase varied widely from one Member State to another, ranging from 0% for Luxembourg and 5% for the United Kingdom to 12.5% for Ireland and France.

Gross domestic product per occupied person, often used as an indicator of overall labour productivity, also shows widely differing trends. Particular note should be made of the striking contrast between the Community and the United States; completely different trends in the occupied population between 1973 and 1978 (-1% for the Community, +10.5% for the United States) meant that the domestic product per occupied person went up by 11.5% in the Community, compared with only 1.5% in the United States.

It can also be seen that, among the Member States of the Community, the greatest increases in gross domestic product per occupied person were recorded by Ireland (+20%), the Federal

Republic of Germany (+16.6%) and France (+15.6%). In the case of Germany, this result is linked to a substantial reduction in the occupied population (-6%).

In conclusion, two general remarks be made:

(i) Of the Community countries, the United Kingdom, Denmark and Luxembourg showed, on average, the lowest increases in real terms in the main aggregates of the economic accounts between 1973 and 1978 (overall or in relation to the total population or the occupied population).

(ii) Comparison, based on the two tables, of trends in the Community and the United States shows that, while in the Community countries employment is stagnating or falling as a rule, the trend is the reverse in the United States. This difference has contrasting results. In the United States, although the growth in employment did not lead to an appreciable improvement in productivity, the increases (overall or in relation to the total population in the case of GDP) in the economic aggregates between 1973 and 1978 are, on average, comparable to those for the Community, whereas there seems to be a close link between the increase in productivity and the growth of these aggregates in the member countries of the EC.

Table II: Volume indices of overall gross domestic product and gross domestic product per inhabitant and per occupied person 1973/1978 (1973 = 100)
