Manoscritto terminato il 23 luglio 1979

**Arbejdsløshed : Mindre nedgang ved udgangen af juni**

Ved udgangen af juni var der 5,6 mio arbejdsløse i Fællesskabet, hvilket er en lille nedgang (0,5% i bruttotal eller 0,2% i sæsonkorrigerede tal). De arbejdsløses andel af den erhvervsaktive civile befolkning ligger stadigvæk på niveauet for udgangen af maj (5,2%). I fire lande (Italien, Belgien, Luxembourg og Danmark) er arbejdsløshedstallet i bruttotal såvel som i sæsonkorrigerede tal gået ned. Derimod er der i sæsonkorrigerede tal en stigende arbejdsløshed i Forbundsrepublikken Tyskland og Frankrig i forhold til maj. I Det forenede Kongerige og Nederlandene begynder man at kunne mærke, at der er kommet unge arbejdssøgende ud på arbejdsmarkedet, hvilket til dels forklarer det stigende antal arbejdsløse i bruttotal. I sæsonkorrigerede tal er arbejdsløsheden imidlertid for Det forenede Kongeriges vedkommende faldende, medens den for Nederlandenes vedkommende udviser en knap så kraftig stigning.

**Industriproduktionen : Nedgang i maj**

Det sæsonkorrigerede industriproduktionsindeks for maj 1979 viser en klar nedgang i forhold til april (minus 1,3%). Dette skyldes især en betydelig produktionsnedgang i Forbundsrepublikken Tyskland, Italien og Benelux-landene. I Frankrig har produktionen rettet sig op efter en nedgang i april, og i Det forenede Kongerige har produktionen stabiliseret sig. Den Kortsigtede stigningstakt for industriproduktionen (stigningen i de seneste tre måneder i forhold til de foregående tre måneder) viser en gunstig udvikling i Forbundsrepublikken Tyskland, Det forenede Kongerige og Belgien, medens der er tale om en fortsat nedgang i disse måneder i Frankrig og Nederlandene.

**Energi : Import af råolie og olieprodukter til Fællesskabet i første kvartal af 1979**

På trods af den manglende eksport af råolie fra Iran viser de foreløbige tal for første kvartal af 1979, at Fællesskabets import af råolie fra tredjelande er steget med 5,9% i forhold til samme periode i 1978. For de store importlandes vedkommende er det bemærkelsesværdigt at se, at der er tale om meget forskellige stigninger. I tre lande er der tale om en meget kraftig stigning, nemlig Forbundsrepublikken Tyskland (+14,7%), Frankrig (+15,8%) og Italien (+13,0%), hvorimod man bemærker en kraftig nedgang i Nederlandene (minus 6,0%) og Det forenede Kongerige (minus 12,8%). For at dække denne mangel har Fællesskabet importeret mere råolie, især fra Afrika og også fra Irak, Saudi-Arabien og Kuwait.

Hvad angår import af alle former for olieprodukter er der på fællesskabsniveau (herunder samhandelen inden for Fællesskabet) for første kvartal 1979 tale om en stigning på 8,5% i forhold til samme periode i 1978. Stigningen, der er meget betydelig i Nederlandene (+63,8%) og Frankrig (+34,7%), kompenseres delvis ved en nedgang i importen i Forbundsrepublikken Tyskland og i Italien. Således har Fællesskabet i løbet af de sidste 12 måneder importeret 13% mere end i 1975.

**Samhandelen inden for Fællesskabet : betydelig importstigning for Det forenede Kongerige, Italien og Irland.**

I de første fire måneder af 1979 nåede samhandelen mellem medlemsstaterne op på 68,6 Mrd ERE, hvilket er en stigning på 16,4% i forhold til perioden januar-april 1978. Frem for alt forøgede Det forenede Kongerige (+28,9%), Italien (+27,2%) og Irland (+26,9%) deres import fra EF-partnerne. Efterspørgselen koncentreredes om færdigvarer. Tilsvarende havde Italien (+28,2%), Forbundsrepublikken Tyskland (+19,2%) og Frankrig (+16,5%) en stigning i salget til EF-partnerne, som lå over gennemsnittet. En særlig udvikling fandt sted i Nederlandenes og Forbundsrepublikken Tysklands handel med Det forenede Kongerige. De manglende olieleverancer fra Iran blev til dels dækket af import fra Det forenede Kongerige, der følgelig fordoblede leverancerne til Forbundsrepublikken Tyskland og forøgede dem med adskillige hundrede pct. til Nederlandene.

**Fællesskabets samhandel med tredielande : hurtigere stigning i importen fører til forværring af handelsbalancen.**

I de første fire måneder af 1979 beløb Fællesskabets import sig til 63,6 Mrd ERE og eksporten til 58,5 Mrd ERE. Det store underskud på 5,1 Mrd ERE (januar-april 1978 : -2,3 Mrd) skyldtes frem for alt den hurtige vækst i importen (+11,5%) foranlediget af den økonomiske opsving i denne periode. Samtidig førte en vis forværring af den økonomiske situation i nogle vestlige industrilande samt en betydelig nedgang i købekraften i nogle råvareeksporterende lande (f.eks. Iran) til, at Fællesskabets eksport kun steg langsomt. Denne udvikling berørte især Forbundsrepublikken Tyskland, hvor importen steg med 17%, hvilket er over gennemsnittet, hvorimod eksporten kun steg langsomt, nemlig med 5,7%. Dette betød, at Forbundsrepublikken Tyskland oplevede et betydeligt fald i eksportoverskuddet : fra 3,7 Mrd ERE for perioden januar-april 1978 til 2,2 Mrd for perioden januar-april 1979. Samtidig oplevede Det forenede Kongerige en hurtig forværring af handelsbalancen (januar-april 1979 : 1,4 Mrd ERE; samme periode 1978 : 0,8 Mrd), hvilket skyldtes en betydelig stigning i importen af færdigvarer.

**Forbrugerpriser**

Forbrugerprisindekset for hele Fællesskabet steg med 1,0% fra maj til juni. Denne stigning skyldes betydelige stigninger i Frankrig (1,0%), Italien (1,0%) og Danmark (0,9%) samt en overordentlig kraftig stigning i Det forenede Kongerige (+1,7%), skønt monsstigningen endnu ikke er indregnet i junipriserne.

Stigningerne i Forbundsrepublikken Tyskland og Benelux-landene er stadigvæk beskedne, idet de ligger mellem 0 og 0,5%. En sammenligning af prisstigningerne i første halvår af 1979 med den tilsvarende periode i 1978 viser klart den øgede inflation, som alle landene har haft siden årets begyndelse (EUR 9 : 4,2% i første halvår af 1979, 6,4% i første halvår af 1978).

**Penge og finanser : Det forenede Kongerige deltager i SWAP-systemet inden for EMS**

På Det europæiske Topmøde den 21. juni meddelte Storbritannien, at man vil deltage i EMS-ordningen med kortfristede SWAP-kreditter SWAP-kreditsystemet indebærer, at medlemslandene for en periode på 3 måneder overdrager 20% af deres beholdninger i guld og dollar til EFMS og modtager ECU til gengæld. Disse ECU'er kan centralbankerne bruge, når de skal betale deres gæld til andre centralbanker i Det europæiske Fællesskab. SWAP-kreditterne, som i øvrigt skal fornyes hver tredje måned, vil hæve EFMS-faciliteterne fra 34 Mrd \$ til ca. 38 Mrd \$. Det forenede Kongerige deltager ikke i EMS's fælles interventionssystem. Pund Sterling fortsætter sit fald over for dollaren og andre europæiske valutaer (en opskrivning på ca. 5% i andet kvartal i 1979).

**Unemployment: slightly down at the end of June**

At the end of June the number of unemployed in the Community was recorded as 5.6 million, indicating a slight downward trend (0.5% in raw data and 0.2% after adjustment for seasonal variations). The unemployment rate expressed as a percentage of the civilian working population has remained at the same level as at the end of May (5.2%).

In four countries (Italy, Belgium, Luxembourg and Denmark) the number of unemployed has dropped, both in raw data and in seasonally adjusted data. In Germany and France on the other hand, unemployment was higher than in May in seasonally adjusted figures. In the United Kingdom and the Netherlands the effects are beginning to be felt of the arrival on the employment market of young people seeking first jobs, which helps to explain why in raw data, the number of unemployed has increased, whereas after adjustment for seasonal variations, unemployment is declining in the United Kingdom and increasing less rapidly in the Netherlands.

**Industrial production: Decline in May**

The index of industrial production for May 1979, after adjustment for seasonal variations, showed a net decline compared with April (-1.3%), mainly due to the appreciable drop in production in Germany, Italy and the Benelux countries. In France, production recovered after a decline in April, and in the United Kingdom it stabilized. The short-term industrial production growth rates (showing increases in the past three months compared with the previous three months) point to favourable developments in Germany, the United Kingdom and Belgium but have declined steadily in the past few months in France and the Netherlands.

**Energy: Imports of crude oil and petroleum products to the Community in the first quarter of 1979**

Despite the cutback of crude oil exports from Iran, the provisional data for the first quarter of 1979 indicate that Community imports of crude oil from non-Member countries increased by 5.9% compared with the same period in 1978. It is interesting to note that the rates of increase varied considerably in the main importing countries. In three countries there was a very sharp increase: in the Federal Republic of Germany (+14.7%), France (+15.8%) and Italy (+13.0%), whereas there was a sharp drop in imports by the Netherlands (-6.0%) and the United Kingdom (-12.8%). To make up for the shortage, the Community has imported more crude oil, especially from Africa, and also from Iraq, Saudi Arabia and Kuwait.

In the first quarter of 1979 imports of all petroleum products by the Community as a whole (including intra-Community trade) were 8.5% higher than in the same period in 1978. The increase was particularly significant in the Netherlands (+63.8%) and France (+34.7%); it was partially offset by a reduction in imports to the Federal Republic of Germany and Italy. In the past 12 months the Community imported 13% more than in 1975.

**Intra-Community trade: significant increase in imports for UK, Italy and Ireland**

In the first four months 1979 the exchange of goods between the Member States reached a value of 68.6 Mrd EUA growing by 16.4% as against Jan.-April 1978. Above all the United Kingdom (+28.9%), Italy (+27.2%) and Ireland (+26.9%) increased their purchases in EC partner countries with the demand being concentrated on manufactured goods. Accordingly Italy (+28.2%), Germany (+19.2%) and France (+16.5%) were the countries with an above-average increase in their sales to EC partners. A special development marked the trade between the Netherlands and Germany with the United Kingdom. The loss of oil deliveries from Iran was partly covered by purchases in the United Kingdom which, as a result, doubled its deliveries to Germany and increased them several-fold to the Netherlands.

**Community external trade: faster increase in imports leads to trade balance deterioration**

In the first four months of 1979 Community imports amounted to 63.6 Mrd EUA and exports to 58.5 Mrd EUA. The large deficit of 5.1 Mrd EUA (Jan.-April 1978: -2.3 Mrd) was above all due to the rapid growth in imports (+11.5%) caused by the economic recovery during the period. At the same time a certain worsening of the economic situation in some western industrialized countries as well as the significant reduction in the purchasing power of some raw material exporting countries (such as Iran) led to only a slow increase in Community exports. This development particularly affected Germany whose imports expanded at an above-average rate of 17% whereas its exports increased only slowly, by 5.7%. This resulted in Germany experiencing a significant decrease in its export surplus: falling from 3.7 Mrd EUA for Jan.-April 1978 to 2.2 Mrd for Jan.-April 1979. At the same time the United Kingdom reported a rapid deterioration in its trade balance (Jan.-April 1979: 1.4 Mrd EUA, same period 1978: 0.8 Mrd) due to a substantial increase in imports of manufactured goods.

**Prices**

The consumer price index for the EC as a whole rose by 1% from May to June. This increase was caused by significant rises in France (1.0%), Italy (1.0%) and Denmark (0.9%) and a sharp rise in the United Kingdom (+1.7%); the increase in VAT is not incorporated in the June prices.

Increases for the Federal Republic of Germany and the Benelux countries remain moderate and are situated between 0 and 0.5%.

A comparison of the price increases between the first half of 1979 and the corresponding period in 1978 shows the upward trend in inflation which has been apparent since the beginning of the year in all countries (EUR-9: 4.2% in the first half of 1978, compared with 6.4% in the first half of 1979).

**Finance: UK to take part in the EMS credit swaps**

At the European Summit on 21 June, it was announced that the United Kingdom would participate in the system of short-term credit swap facilities of the EMS. Under the credit swap system, the Member States transfer 20% of their gold and dollar reserves to the FECOM and receive ECUs in return. The ECUs thus created can be used by the central banks to settle their debts with other central banks in the European Community. The credit swap transaction, which has to be renewed every three months, will raise the FECOM funds facilities from \$ 34 000 Mrd to approximately \$ 38 000 Mrd. The United Kingdom is not taking part in the EMS mutual intervention scheme. The Pound Sterling continued to rise against the dollar and the other European currencies (approximately a 5% revaluation during the 2nd quarter of 1979).

**Disoccupazione: in lieve diminuzione a fine giugno**

A fine giugno il numero dei disoccupati nella Comunità risultava di 5,6 milioni, accusando una lieve diminuzione (pari allo 0,5% in dati grezzi e allo 0,2% in dati corretti delle variazioni stagionali). Il tasso di disoccupazione rispetto alla popolazione attiva civile è rimasto al livello di fine maggio (5,2%).

In quattro paesi (Italia, Belgio, Lussemburgo, Danimarca) il numero dei disoccupati è diminuito sia in dati grezzi che in dati destagionalizzati. In Germania e in Francia i dati destagionalizzati indicano invece un aumento della disoccupazione rispetto al mese precedente. Nel Regno Unito e nei Paesi Bassi si comincia ad osservare l'incidenza dell'afflusso sul mercato del lavoro dei giovani in cerna di una prima occupazione: ciò spiega in parte che, per questi paesi, si rilevi un aumento dei disoccupati in termini grezzi, mentre i dati destagionalizzati indicano una diminuzione della disoccupazione nel Regno Unito e un rallentarsi dell'aumento nei Paesi Bassi.

**Produzione industriale: diminuzione nel mese di maggio**

L'indice della produzione industriale del maggio 1979, corretto delle variazioni stagionali, risulta in netta diminuzione rispetto al mese di aprile (-1,3%). Quest'andamento è dovuto soprattutto alla sensibile caduta della produzione in Germania, in Italia e nel Benelux. La produzione indica invece una ripresa in Francia, dopo una flessione nel mese di aprile, mentre si stabilizza nel Regno Unito. I tassi di crescita a breve termine della produzione industriale (crescita degli ultimi tre mesi rispetto ai tre mesi precedenti) mostrano un andamento favorevole in Germania, nel Regno Unito e in Belgio, ma sono negli ultimi mesi in continuo regresso in Francia e nei Paesi Bassi.

**Energia: Importazioni di petrolio greggio e di prodotti petroliferi nella Comunità nel primo trimestre 1979.**

Nonostante la scarsità delle esportazioni di petrolio greggio dell'Iran, i dati provvisori per il primo trimestre 1979 indicano che le importazioni comunitarie di petrolio greggio dai paesi terzi sono aumentate del 5,9% rispetto allo stesso periodo del 1978. E' da osservare che i grandi paesi importatori presentano tassi d'incremento estremamente diversi: mentre per tre paesi si osserva un aumento molto forte — R.F. di Germania (+14,7%), Francia (+15,8%), Italia (+13,0%) — si constata invece una sensibile diminuzione per i Paesi Bassi (-6,0%) e per il Regno Unito (-12,8%). Per far fronte alla situazione di penuria la Comunità ha aumentato i quantitativi di petrolio greggio importati soprattutto dall'Africa e, inoltre, dall'Iraq, dall'Arabia Saudita e dal Kuwait.

Per le importazioni della totalità dei prodotti petroliferi, si osserva per la Comunità (scambi intracomunitari compresi) un aumento dell'8,5% nel primo trimestre del 1979 rispetto al periodo corrispondente del 1978. L'aumento, estremamente rilevante nei Paesi Bassi (+63,8%) e in Francia (+34,7%) è parzialmente compensato da una riduzione delle importazioni della R.F. di Germania e dell'Italia. Complessivamente negli ultimi dodici mesi la Comunità ha importato prodotti petroliferi per un volume superiore del 13% a quello del 1975.

**Commercio intracomunitario: aumento rilevante delle importazioni del Regno Unito, dell'Italia e dell'Irlanda**

Nei primi quattro mesi del 1979 l'interscambio fra gli Stati membri ha raggiunto un valore di 68,6 miliardi di UCE, con un aumento del 16,4% rispetto al periodo gennaio-aprile 1978. Soprattutto il Regno Unito (+28,9%), l'Italia (+27,2%) e l'Irlanda (+26,9%) hanno aumentato i loro acquisti agli altri paesi della CEE, concentrando la loro domanda sui prodotti manufatti. D'altra parte l'Italia (+28,2%), la Germania (+19,2%) e la Francia (+16,5%) hanno registrato tassi di incremento delle loro vendite agli altri paesi della CEE superiori alla media comunitaria. Un'espansione particolare si osserva negli scambi dei Paesi Bassi e della Germania con il Regno Unito: il venir meno delle forniture di petrolio dell'Iran è stato infatti coperto in parte con maggiori acquisti nel Regno Unito, che in tal modo ha raddoppiato le sue forniture alla Germania e moltiplicato quelle ai Paesi Bassi.

**Commercio estero della Comunità: accelerato aumento delle importazioni e conseguente peggioramento della bilancia commerciale**

Nei primi quattro mesi del 1979 le importazioni della Comunità sono ammontate a 63,6 miliardi di UCE e le esportazioni a 58,5 miliardi di UCE. Il sensibile disavanzo, pari a 5,1 miliardi di UCE (gennaio-aprile 1978: -2,3 miliardi), è dovuto soprattutto al rapido incremento delle importazioni (+11,5%), in seguito alla ripresa economica osservata nel corso del periodo. Nel contempo, un certo peggioramento della congiuntura economica in alcuni paesi occidentali industrializzati e la forte riduzione del potere d'acquisto di alcuni paesi esportatori di materie prime (come l'Iran) sono all'origine di un aumento più rallentato delle esportazioni della Comunità. Questa situazione ha avuto ripercussioni in particolare per la Germania, le cui importazioni sono aumentate ad un ritmo superiore alla media (+17%), mentre le esportazioni salivano solo moderatamente (+5,7% circa). La conseguenza è stata una notevole contrazione dell'eccedenza della bilancia commerciale tedesca, il cui saldo attivo è sceso da 3,7 miliardi di UCE per il periodo gennaio-aprile 1978 a 2,2 miliardi per gennaio-aprile 1979. Nel contempo il Regno Unito accusava un rapido peggioramento della bilancia commerciale (gennaio-aprile 1979: -1,4 miliardi di UCE; periodo corrispondente del 1978: -0,8 miliardi), dovuto ad un sensibile incremento delle importazioni di prodotti manufatti.

**Prezzi**

L'indice dei prezzi al consumo per il complesso dei paesi della CE ha registrato, da maggio a giugno, un aumento dell'1,0%. Tale andamento è determinato da notevoli rialzi dei prezzi in Francia (1,0%), in Italia (1,0%) e in Danimarca (0,9%) e, soprattutto, nel Regno Unito, dove l'aumento osservato da maggio a giugno è ben dell'1,7%; da notare che questa cifra non comprende ancora l'incidenza del rialzo dell'IVA.

Gli aumenti osservati nella R.F. di Germania e nei paesi del Benelux restano invece moderati, situandosi tra lo 0 e lo 0,5%.

Il confronto degli aumenti prezzi tra il primo semestre del 1979 e il corrispondente periodo del 1978 indica chiaramente l'accelerarsi dell'inflazione che si manifesta in tutti i paesi dall'inizio dell'anno (EUR 9: 4,2% nel primo semestre 1979, 6,4% nel primo semestre 1978).

**Finanze: Il Regno Unito partecipa ai crediti swap dello SME**

Al vertice europeo del 21 giugno la Gran Bretagna ha annunciato la sua partecipazione al sistema di crediti swap a breve termine dello SME. In base a tale sistema i paesi membri trasferiscono al FECOM, per un periodo di tre mesi, il 20% delle loro attività in oro e in dollari, ricevendo come contropartita degli ECU (« scudi »). Le banche centrali possono utilizzare gli ECU così creati per il pagamento dei loro debiti nei confronti di altre banche centrali della Comunità europea. L'operazione di credito swap, che d'altronde dev'essere rinnovata ogni tre mesi, porterà le linee di credito presso il FECOM da \$ 34 miliardi a circa \$ 38 miliardi. Il Regno Unito non partecipa al sistema di mutuo intervento dello SME. La lira sterlina continua il suo progresso nei confronti del dollaro e delle altre valute europee (apprezzamento approssimativo del 5% nel secondo trimestre del 1979).

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturrelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlige, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelseres definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

## PREFACE

EN

This bulletin is in two parts : 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

## AVVERTENZA

IT

Il presente bollettino consta di 2 parti : l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa

ARTIKEL 83

LIGE UDKOMMET 89-90

- (1) Mere detaljerede oplysninger efter brancher findes i publikationen »Industriens Konjunkturindikatorer«.
- (2) Oplysningerne i dette afsnit af publikationen svarer til resultaterne af konjunkturundersøgelsen hos virksomhedsledere i Fællesskabet. Mere detaljerede oplysninger findes i »Europæisk økonomi«.
- (3) Tallene vedrørende udenrigshandelen findes mere detaljerede og udtrykt i ERE i »Månedlig Bulletin over Udenrigshandelen«.
- (4) Husholdningernes Konsum.

(1) Alcuni dati più dettagliati per branca sono riportati nel bollettino « Indicatori congiunturali dell'industria ».

(2) I dati contenuti in questa parte del bollettino rappresentano i risultati dell'indagine sulla congiuntura presso i capi di impresa delle Comunità. Alcuni dati più particolari figurano in « Economia europea ».

(3) Alcuni dati del commercio estero più dettagliati ed espressi in UCE sono riportati nel « Bollettino mensile del commercio estero ».

(4) Consumi finali delle famiglie.

Die deutsche Fassung dieses Bulletins wird am zweiten Dienstag jeden Monats in Druck gegeben.

La version française de ce bulletin est mise sous presse le second mardi de chaque mois.

De Nederlandse versie van dit bulletin gaat de tweede dinsdag van elke maand ter perse.

## THE BALANCE OF PAYMENTS: CONCEPTS AND DEFINITIONS

### INTRODUCTION

This paper describes the various items in the balance of payments of the Community and its Member States by reference to the terminology and definitions used by Eurostat. An analysis of the main trends over the period 1970-78 is given for reference and should enable the reader to understand the definitions rather more clearly.

This analysis is inevitably very cursory and Eurostat regards it as being valid only in this context as a brief guide to the balance of payments.

The paper begins with a very brief recapitulation of the concepts on which the balance-of-payments statistics are based to give the readers of Eurostatistics a better idea of the subsequent definitions.

To avoid any confusion, this memorandum adopts, as far as possible, the definitions given in the new edition of the IMF's balance-of-payments glossary:

John Alves — The balance of payments: a glossary of terms — International Monetary Fund Bureau of Statistics.

### A — BASIC CONCEPTS

The balance of payments is defined by the IMF as the record of a country's international transactions with the rest of the world (or, in other words, transactions of its residents with non-residents).

These transactions may be related to merchandise, services, transfers, loans issued or received, monetary sector holdings, foreign exchange, etc. The various transactions are recorded in the balance of payments by the double-entry system of bookkeeping. For instance, the import of goods priced at 100 EUA (European units of

account) is recorded under the heading 'Merchandise' with a minus sign and in the capital account with a plus sign. Likewise, all other transactions (including unrequited transfers) are entered twice, the amounts being identical but once with a plus sign and once with a minus sign. Clearly, the sum of all the items in the balance of payments is always zero, and the balance of payments is hence always in balance.

How is it then that we can talk about surpluses and deficits on the balance of payments?

When the balance of payments is said to be in balance or out of balance, this does not refer to the balance as a whole but simply to one of its component parts, in other words, one or more items making up a cumulative balance of payments.

The various items in the balance of payments may therefore be used much like building blocks to construct the kind of analytic presentation needed.

What we have, therefore, is not a single balance of payments, but a whole series of balances.

To enable us to define one of these balances of payments, let us draw an imaginary line at some significant point in the list of items making up the balance of payments and say that all the transactions appearing above the line are those which have to be financed, whereas all those appearing below the line are the sources of finance.

A disequilibrium in the balance of payments may therefore be regarded as deficit above the line, offset by the net total of transactions below the line. To enable us to do this, we first need a standard presentation of all the transactions described in the balance of payments, and the system adopted by Eurostat is as follows:

#### A. GOODS AND SERVICES

1. *Merchandise (fob)*
2. *Services*
  - 2.1 Transport
  - 2.2 Insurance on transport
  - 2.3 Travel
  - 2.4 Investment income
  - 2.5 Earnings from work
  - 2.6 Government transactions n.i.e.
  - 2.7 Other services

#### B. UNREQUITED TRANSFERS

1. *Private transfers*
2. *Official transfers*

#### C. TOTAL (A + B)

#### D. CAPITAL OF NON-MONETARY SECTORS

1. *Total assets*
  - 1.1 Long-term assets
    - 1.11 Private sector
      - 1.111 *Direct investment*
      - 1.112 *Portfolio investment*
      - 1.112 *Other assets*
    - 1.12 Public sector
  - 1.2 Short-term assets
    - 1.21 Private sector
    - 1.22 Public sector
2. *Total liabilities*
  - 2.1 Long-term liabilities
    - 2.11 Private sector
      - 2.111 *Direct investment*
      - 2.112 *Portfolio investment*
      - 2.113 *Other liabilities*
    - 2.12 Public sector
  - 2.2 Short-term liabilities
    - 2.21 Private sector
    - 2.22 Public sector

#### E. CAPITAL AND GOLD OF THE MONETARY SECTOR

1. *Total assets*
  - 1.1 Assets of commercial banks
    - 1.11 Long-term assets
    - 1.12 Short-term assets
  - 1.2 Assets of the monetary authorities
    - 1.21 Gold
    - 1.22 Special drawing rights (SDRs)
    - 1.23 Reserve position in the IMF
    - 1.24 Freely mobilizable assets
    - 1.25 Other assets
2. *Total liabilities*
  - 2.1 Liabilities of commercial banks
    - 2.11 Long-term liabilities
    - 2.12 Short-term liabilities
  - 2.2 Liabilities of the monetary authorities
    - 2.21 Use of IMF credit
    - 2.22 Other liabilities

#### F. CONTRA-ENTRY TO NET SDRs ALLOCATIONS

#### G. ERRORS AND OMISSIONS

We can use this presentation to pick out those headings describing certain cumulative balances of payments.

## B — BALANCE OF TRADE (MERCHANDISE)

The balance of trade is often regarded as the most important item because it deals with merchandise which, in value terms, often makes up the main item in the balance of payments.

The balance of trade as a component part of the balance of payments differs from the balance of trade drawn up on the basis of external trade statistics because of methodological differences in the two cases.

External trade statistics are drawn up on the basis of customs statistics and import data, being evaluated on a cif basis (includes the cost of transport and insurance). There are a number of other differences with regard to scope, chronology and evaluation. Although these differences are often only marginal, they may nevertheless in certain cases reach substantial proportions.

### Analysis of the balance of trade

The Community's balance of trade was in surplus in all the years observed, with the exception of 1974 and 1976. The 1974 deficit may be explained by the effects of the 1973 oil crisis and the subsequent rise in the price of raw materials. The United States' balance of trade was also in deficit in 1974 and 1976, and here the deficit increased still further in 1977 and 1978. Among the Member States of the European Community, it is interesting to note the 'stable' behaviour of the German balance of trade surplus, the recovery in the French and Italian balances in 1977 and 1978, the deterioration in the Belgian and Dutch situations, the deficit on the balance of trade run by the United Kingdom since 1972 and, finally, the Irish and Danish deficits for all the years observed.

We may conclude from this that the Community's surplus on its balance of trade is essentially due to the performance of the German balance.

## C — SERVICES

The main items included under services are all the transactions on transport, insurance on transport, travel, investment income and earnings from work, government transactions not included elsewhere, etc.

### Analysis of the balance of services

It is worth noting that all the countries observed are in surplus on their balance of services, with the exception of the Federal Republic of Germany, which is consistently in deficit. More detailed analysis of the German balance of services brings out the fact that, on average, 90% of the deficit is due to travel. Likewise, in the United States' balance of services, the 'travel' component is in deficit, but this is offset by a large surplus for the heading 'investment income'.

The Netherlands, Belgium and Denmark are also in deficit on the 'travel' component of the balance of services, offset, in the case of the Netherlands and Belgium, by a surplus on 'investment income'.

France and the United Kingdom are in surplus on both 'travel' and 'investment income'.

Another point to note is the German surplus on 'government transactions n.i.e.' which in effect comprises the cost of foreign troops stationed in Germany.

The reader will realize from these examples the significance of balance-of-payments statistics for analysing flows resulting from tourism or investment income. Another subject for analysis might be the balances on transfers of technology, etc.

The balance of payments therefore represents a reference framework for all international service transactions, and enables these transactions to be analysed.

## D — UNREQUITED TRANSFERS

Unrequited transfers are transfers undertaken without a *quid pro quo*, for instance a donation, the money sent home by a foreign worker or a country's contribution to an international organization.

Another highly important element of unrequited transfers is aid paid to developing countries.

### Analysis of the unrequited transfers balance

All the countries observed, with the exception of Italy, Ireland and Denmark, run a deficit on this balance.

As far as Italy and Ireland are concerned, the surplus on this balance may be put down to remittances by migrant workers.

There is a conceptual difference between migrant workers' remittances and earnings from work. The former come from workers who, after leaving their country of origin for more than a year, are regarded as integrated into the economy of the host country, whereas the latter are transactions effected by seasonal workers and any other person who takes work on a casual basis in a foreign country. Because of the difficulty in drawing this distinction, it is best to treat these statistics with a good deal of caution when drawing comparisons between countries.

## E — CURRENT ACCOUNT

The current account comprises transactions in goods (merchandise), services and unrequited transfers. Occasionally, government aid to developing countries is not included in the current account, but aggregated with certain loans (which are normally to be found in the capital account) under the heading 'Official aid'. This is not the case with the balance drawn up by Eurostat, which includes all official transfers.

Services and unrequited transfers are usually referred to as 'invisibles' or 'invisible transactions', which enables a distinction to be drawn between these elements and visible transactions (or merchandise).

Another aggregate is that referred to as the 'Balance of goods and services' which is an expression of the net transfer of resources between an economy and the rest of the world. By contrast, the current account — according to the definition adopted by Eurostat — represents transactions which add or subtract certain elements to or from an economy's foreign financial holdings (apart, of course, from changes in value). The current account is the balance most frequently used for analytical purposes and most often used by the press, although it cannot be regarded as the sole indicator of how a country's balance of payments is behaving.

### Analysis of the current account

The Community's current account was in deficit in 1974 and 1976, and in surplus for all the other years observed.

The 1978 surplus was particularly large, amounting to some 12 000 million EUA, although this estimate is based on figures which are still largely provisional and which may be revised. It should be noted too that the total does not include the figures for Ireland, which are not yet available.

The 1978 surplus resulted from the reversal of the trend which had set in after 1976.

This reversal had the effect of doubling the German surplus (+ 3 000 million EUA in 1977, + 6 000 million in 1978), redressing the situation in France (− 2 900 million EUA in 1977, + 3 000 million in 1978) and more than doubling the Italian surplus (+ 2 000 million EUA in 1977, + 5 000 million in 1978). The United Kingdom balance remained stable (600 million EUA in 1977, 400 million in 1978), whereas Belgium, the Netherlands and Denmark ran deficits, as did the United States (− 12 500 million EUA in 1978).

### The current account in relation to the gross domestic product

To give a better idea of balance — of — payments data over a period of time and to enable more meaningful comparisons to be drawn between countries, it is useful to relate a country's current account to its gross domestic product.

Country	1970	1971	1972	1973	1974	1975	1976	1977	1978
D	0.5	0.4	0.3	1.3	2.6	0.9	0.9	0.7	1.3
F	-0.1	0.3	0.1	-0.3	- 2.2	0.0	-1.7	-0.9	0.8
I	0.8	1.6	1.7	-1.8	- 5.1	-0.3	-1.5	1.1	2.4
N	-1.6	-0.5	2.8	3.9	2.9	2.0	3.0	0.3	-1.1
B/LUX	2.7	2.9	3.2	2.5	1.7	1.1	-0.5	-0.5	-0.6
UK	1.4	1.9	0.2	-1.5	- 4.5	-1.8	-0.9	0.3	0.2
IRL	-4.9	-4.2	-2.4	-3.5	-10.0	-0.3	-3.7	-3.0	:
DK	-3.4	-2.4	-0.3	-1.6	- 2.9	-1.4	-4.6	-3.6	-2.5
EUR 9	0.4	0.8	0.7	0.1	- 1.0	0.1	-0.5	0.0	0.8
USA	0.3	0.0	-0.5	0.6	0.2	1.2	0.3	-0.8	-0.8

The above figures show that the Community's surplus of 12 000 million EUA in 1978 and 5 400 million EUA in 1971 both represented 0.8% of GDP. They also show that the deficit or surplus on current account run by the smaller countries have a proportionately greater impact on their economies. An illustration of this is the situation in Ireland where, in 1974, the deficit on current account was equivalent to 10% of GDP.

This is an example of how balance-of-payments data may be used in a wider macro-economic context. The analysis could be taken further by comparing balance-of-payments data to exchange rates, monetary assets, etc.

## F — CAPITAL ACCOUNT

The capital account records capital transactions, including the net acquisition of foreign financial assets.

It may also be defined as the account which reflects all those transactions which finance current transactions, or, even more simply, we may say that, on the one hand, there are transactions recorded in the current account and, on the other hand, capital movements. Returning to our example of double-entry bookkeeping, we may say that, for every debit (e.g. exports), there must be an equivalent credit (e.g. increasing assets). In the capital account, therefore, acquired assets and reduced liabilities are given a minus sign, and reduced assets and increased liabilities a plus sign.

Eurostat's capital account is divided into two parts

- the non-monetary sector account,
- the monetary sector account.

## G — THE NON-MONETARY SECTOR ACCOUNT

This account records capital transactions effected by the private sector (households and enterprises) and the public sector (central and local government authorities). A distinction is drawn between assets and liabilities, which are recorded as a net figure of credits and debits

A distinction is also drawn between long and short-term capital (i.e. more or less than one year).

One item in this account which is particularly important for the economic analysis of the country is that which records direct investment.

Among the transactions which may be described as direct investment, we can pick out the establishment of foreign subsidiaries or branches, the purchase of shares enabling the purchaser to take a controlling interest in a company, or the provision of finance for expansion programmes not involving direct control, in the form of increased productive capacity or the purchase of plant.

## H — THE MONETARY SECTOR ACCOUNT

This account covers transactions effected by commercial banks and monetary authorities. As far as the commercial banks are concerned,

a distinction is drawn between long and short-term capital. Transactions involving monetary authorities' assets relate essentially to movements in a country's reserves.

Reserves are made up of special IMF drawing rights, gold and other freely mobilizable assets. Certain categories of long-term assets are normally excluded from the reserves because they are not freely mobilizable. On the other hand, other assets, which are nominally long-term, are included if they can be sold at short notice.

## I — OTHER ITEMS IN THE BALANCE OF PAYMENTS

Apart from the current and capital accounts, the balance of payments also includes the following balancing items:

- contra-entries to net SDR allocations,
- errors and omissions.

The net total of errors and omissions is a contra-entry which offsets any surplus of credits over debits or vice-versa. This may amount to a substantial figure when the balance-of-payments statistics are derived from a variety of sources, and it may be an important element in an analysis of the balance of payments by, for instance, revealing a capital outflow which is not recorded elsewhere.

The 'Errors and omissions' component of the Community's balance of payments includes some fairly sizeable amounts. For certain countries, it includes non-identifiable commercial credits. The amounts included under this heading may not invariably be regarded as an indicator of the quality of the statistics, because a fairly insignificant entry may be the result of a balance of payments drawn up solely on the basis of bank statistics, which balance themselves.

## J — BASIC BALANCE

The basic balance is the sum of the balance of current and long-term capital transactions. It is thought to be an indicator of long-term trends in the balance of payments because it is supposedly not distorted by fluctuating, easily reversible, or speculative factors. However, the inclusion of portfolio investment may sometimes introduce unstable factors which should be carefully analysed.

The long-term capital included in Eurostat's basic balance belongs to the non-monetary sector.

Bearing in mind its definition, a plus on the basic balance — unlike the capital account — indicates a surplus, and vice-versa, a minus on the basic balance indicates a deficit.

### Analysis of the basic balance

The Community's basic balance for 1978 has not yet been drawn up because certain detailed data on long-term assets are not yet available. The Community's basic balance was in deficit in 1974 and 1976, compared with a surplus for the other years observed.

If we refer back to the analysis of the current account discussed earlier, we shall see that, by showing larger amounts than the current account for most countries and periods, the basic balance points to an increase in the Community's long-term liabilities (or a decrease in its assets), unlike the United States, where the opposite is true.

## **K — BALANCE OF OFFICIAL TRANSFERS**

The balance of official transfers (also shown as a global figure) comprises the basic balance and movements of short-term capital.

In the definition adopted by Eurostat, the balance of official transfers is calculated by defining transactions below the line. It is equivalent to the balance of the monetary authorities' sector multiplied by  $-1$ . The monetary authorities are institutions such as the central bank or exchange office and the treasury or finance ministry that mobilize finance to meet balance-of-payments deficits (or surpluses), for which purpose they have control over the national reserves. The institutions may undertake long-term loan transactions or operate bilateral payments agreements. These transactions (which are not normally classed among reserves) are included in the balance of official transfers as defined by Eurostat.

Analysis of the balance of official transfers is particularly interesting over short periods in that it indicates the pressure on a national currency's exchange rate.

## **L — CONCLUSIONS**

As was pointed out in the introduction, this memorandum was intended essentially to fulfil an educative function and may be regarded as a basic guide to the statistical aspect of the balance of payments. Eurostat intends to issue a more detailed methodological description in a more detailed publication which is now in preparation, and to return to the question of the balance of payments analytical technique in longer articles which will deal with specific aspects of the technique.

**Lønstrukturen inden for handel, bankvæsen og forsikringsvirksomhed i 1974 — Bind 5 — Irland**

331 sider. Format A4

EN/FR udgave. Udkommet i juni 1979

Denne undersøgelse er blevet foretaget samtidigt og med samme fremgangsmåde i de ni medlemsstater

Formålet hermed var hovedsagelig at undersøge lønningerne, individuelle oplysninger om lønmodtagerne (køn, alder, kvalifikationer, anciennitet, etc.) og strukturelle oplysninger om de virksomheder, der beskæftiger dem (sektor, størrelse, etc.) med henblik på at belyse forholdet mellem disse oplysninger og lønniveauet

Resultaterne offentliggøres i et særskilt bind for hvert land.

**Structure of earnings in wholesale and retail distribution, banking and insurance in 1974 — Volume 5 — Ireland**

331 pages. Format A4  
Edition EN/FR published in June 1979

This survey has been conducted simultaneously, and according to identical methods, in the 9 countries of the European Community. Its essential objective was to obtain details of the earnings and of individual characteristics (sex, age, level of professional qualification, length of service, etc.) of employed persons, and of the structure (branch of activity, size, etc.) of the enterprises employing them, in order to bring out the relationships between these facts and the levels of remuneration. The results are published in one volume for each country.

Serie gialla :

**Struttura delle retribuzioni nel commercio, nelle banche e nelle assicurazioni nel 1974 — Volume 5 — Irlanda**

331 pagine. Formato A4  
Edizione EN/FR Giugno 1979

L'indagine è stata eseguita contemporaneamente nei nove paesi della Comunità europea, in base allo stesso metodo.

Il suo scopo è di rilevare le retribuzioni, le caratteristiche individuali dei lavoratori (sesso, età, livello di qualifica, anzianità di servizio, ecc) e le caratteristiche strutturali delle imprese in cui sono occupati, per evidenziare le correlazioni tra dette caratteristiche ed i livelli retributivi. I risultati sono pubblicati in un volume a parte per ciascun paese.
