Manuskript afsluttet den 25. februar 1980

Manuscript completed 25 February 1980

Manoscritto terminato il 25 febbraio 1980

Arbejdsløshed : stabilitet i Fællesskabet

I sæsonkorrigerede tal konstateres en relativ stabilitet i arbejdsløsheden i januar 1980, idet bruttostigningen på 5,6% udelukkende er sæsonbestemt.

Denne stabilitet bekræfter den tendens, som man har kunnet iagttage i Fællesskabet i de seneste måneder. Desuden er den stigning, som man har konstateret i Frankrig og Det forenede Kongerige, fortsat i januar.

For hele 1979 udgjorde kvinder 44,7% af arbejdsløse. Mens der i 1974 var lige mange arbejdsløse mænd og kvinder (2,9%), var der i 1979 6,9% kvinder mod 4,9% mænd. Dette afspejler det fænomen, som man har kunnet iagttage i 5 år : arbejdsløsheden blandt kvinder er hele tiden steget mere end arbejdsløsheden blandt mænd. Sidste år faldt antallet af arbejdsløse mænd med 2,3%, mens stigningen i antallet af arbejdsløse kvinder fortsatte (+5,7%).

Industriproduktionen : godt resultat i november, men ugunstige vækstudsigter

Indekset for Fællesskabets industriproduktion i sæsonkorrigerede tal steg i november 1979 med 1,4%. Produktionsstigningen på kort sigt rettede sig i november for de tre vigtigste produktionsgruppers vedkommende : forbrugsgoder, mellemprodukter og investeringsgoder. Dette opsving skyldtes produktionsstigninger i Forbundsrepublikken Tyskland, Italien og Danmark. Produktionsindekset i Frankrig tyder på en vis afmatning i stigningen efter de gode resultater i de foregående måneder. I Storbritannien indvirker arbejdskonflikterne negativt på udviklingen i produktionen.

Hvis man anlægger en mere langsigtet synsvinkel, står det klart, at de stigningstakter, som man har registreret i de seneste måneder, er lavere end stigningstakterne for det første halvår. Dette omsving i den økonomiske aktivitet underbygger forudsigelserne om, at industriproduktionen i 1980 bliver lavere end i 1979.

Energi: første resultater for 1979

Det opsving i produktion og forbrug af el-energi, som man konstaterede allerede i 1978, blev bekræftet i 1979 (nettoforbruget i 1979 for hele Fællesskabet steg med 5,1% i forhold til 1978).

Ifølge de første foreløbige oplysninger skyldes dette forøgede forbrug, som man har kunnet konstatere i alle EF-landene uden undtagelse, hovedsagelig det opsving i industriaktiviteten, som især fandt sted i første halvår. På trods af den meget stærke kulde i de første måneder af 1979 synes de private husholdningers og den tredje sektors efterspørgsel derimod ikke at være steget væsentligt, som følge af en større forståelse hos forbrugerne for mådehold i forbruget (anslået stigning på 6-7% mod 10-11% tidligere).

Hvad produktionen angår var vandforholdene i 1979 de samme som i 1978. Derfor er der kun sket få ændringer i vandkraftproduktionen, som stadig udgør 12% af den samlede produktion. Kernekraften har på sin side kunnet registrere en fremgang på ca. 10%, og den dækker nu næsten 11% af fællesskabsbehovet. Denne stigning har især været følelig i Frankrig, hvor kernekraftproduktionen som følge af igangsættelse af store værker er steget med 30 %.

For de klassiske varmekraftværkers vedkommende er der sket en stigning i produktionen på mere end 5 %, hvilket betyder, at de i lighed med det foregående år dækker næsten 77% af behovet. I henhold til et program for spredning af forsyningskilderne baseret på mindre anvendelse af olieprodukter har kraftværkerne i højere grad anvendt fast brændsel og især kul, hvoraf 20% importeres, mens anvendelsen af olieprodukter har udvist en moderat stigning i forhold til tidligere år med undtagelse af Nederlandene, som har forøget olieforbruget stærkt, mens man har begrænset anvendelsen af naturgas.

Fællesskabets produktion af kul steg i 1979 til i alt 238,7 millioner tons, og opviser for første gang siden 1975 en ganske vist lille stigning på ca. en halv million tons. I forhold til 1978 skyldes denne produktionsstigning udelukkende de gode resultater i kulminerne i Forbundsrepublikken Tyskland, som for første gang i dette tiår har forøget produktionen i forhold til det foregående år (+3,2 millioner tons). Produktionen i de tre andre producentlande (Det forenede Kongerige, Frankrig og Belgien) er derimod faldet.

Hvad angår forbruget var der i 1979 en stærk stigning i det samlede forbrug af kul på næsten 16 millioner tons. For første gang siden stålkrisen kan man notere en stigning (+5 millioner tons) i leverancerne af kul til koksværkerne. Leverancerne til de offentlige værker og minekraftværkerne (som tegner sig for ca. 56% af den samlede efterspørgsel) steg med næsten 11 millioner tons (+7,1%) til 165,5 millioner tons, hvilket er rekord. Efterspørgslen fra de øvrige forbrugere (industri og private), som med 40 millioner tons tegner sig for knap 15% af det samlede forbrug, har derimod kun udvist få ændringer.

Parallelt med stabiliseringen i kuludvindingen og væksten i forbruget kan man notere :

- en kraftig stigning (+11 millioner tons) i kulimporten fra tredjelande, til 56,5 millioner tons, hvilket dækker næsten 20% af Fællesskabets behov. Man kan desuden notere, at Frankrig med 19,5 millioner tons importeret fra tredjelande alene tegner sig for næsten 35% af Fællesskabets udenrigshandel;
- en formindskelse af lagrene.

Stål : produktionsfremgangen bekræftet i 1979

Produktionen i 1979 nåede således op på 140 Mio tons og lå ca. 5,6% over det foregående års produktion. Alle EF-landene — med undtagelse af Italien (strejker i tredje kvartal 79) og Danmark — havde større produktion end i 1978. Produktionsniveauet for 1974, som var et højkonjunkturår, blev imidlertid ikke nået. Med en produktionskapacitet i Fællesskabet på ca. 203 Mio tons råstål bliver udnyttelsesgraden for 1979 på omkring 69%.

Samhandelen inden for Fællesskabet : fortsat vækst i forhold til foregående år.

Handelen mellem medlemslandene nåede i november 1979 op på 20,1 Mrd Ecu i sæsonkorrigeret værdi, idet den udviste en let tilbagegang på 0,4% i forhold til den foregående måned (basis : import). Sammenlignet med november 1978 var stigningen imidlertid meget betydelig : 22,8%.

I løbende værdier nåede samhandelen mellem EF-landene i de første 11 måneder af 1979 op på 200,3 Mrd Ecu. I forhold til samme periode i 1978 var væksten på 20,4%, og den største del af denne vækst tegnede Det forenede Kongerige og Italien sig for. Disse lande forøgede deres import fra partnerlandene med henholdsvis 30,6% og 30,5%. Deres eksport til de øvrige EF-lande steg med 29,6% og 26,0%, hvilket har fremskyndet deres integration i Fællesskabet.

Nederlandene og Forbundsrepublikken Tyskland registrerede betydelige overskud i deres handel med de øvrige EF-lande, mens Det forenede Kongerige, Danmark og Irland havde betydelige underskud. Dette gælder især for Irland, hvis underskud steg med 120% i forhold til januar-november 1978 (se også serie O81, s. 34).

Fællesskabets samhandel med tredjelande : nyt rekordunderskud i november 1979

I sæsonkorrigerede tal udviste værdien af samhandelen med tredjelande en let nedgang sammenlignet med den foregående måned. EF's import er gået ned med 1,8% til 20,5 Mrd Ecu, og eksporten er gået ned med 1,1% til 17,5 Mrd Ecu. Imidlertid er importen steget med 29,3% i forhold til november 1978, mens eksporten kun forøgedes med 14,3%.

I løbende værdier er importen vokset med 21,5% (196,3 Mrd Ecu) og eksporten med 12,0% (176,2 Mrd Ecu). Den negative saldo på handelsbalancen for de første 11 måneder af 1979 oversteg 20,0 Mrd Ecu, og de første tal for december tyder på et endnu større underskud.

Nederlandene registrerede et rekordstort underskud på 7,9 Mrd Ecu, og overskudet på handelen med de øvrige EF-lande dækker kun 3/4 af dette underskud. Desuden er Italiens, Frankrigs og Det forenede Kongeriges underskud blevet foruroligende store. Sammenlignet med perioden januar-november 1978 er disse underskud steget drastisk. Af alle medlemslandene er Forbundsrepublikken Tyskland det eneste med overskud. Men med 5,7 Mrd Ecu er dette overskud betydelig mindre end overskuddet i 1978 (11,7 Mrd Ecu) (se serie O80, s. 34). Denne negative tendens i samhandelen med tredjelandene er især kommet til udtryk i udviklingen i handelen med OPEC-landene. Dels har den hurtige stigning i oliepriserne ført til stigende import udtrykt i værdi, og dels er OPEC-landenes import fra EF-landene gået stærkt ned.

Penge og finanser : Den internationale Valutafond foretog i januar en uddeling af særlige trækingsrettigheder

IMF har foretaget en ny uddeling på 4 083,3 Mio SDR fra de 1. januar 1980. EF-landene modtog 27,3% af dette beløb, nemlig 1 099,7 Mio SDR. De største modtagere var Det forenede Kongerige (304 Mio SDR), Forbundsrepublikken Tyskland (224 Mio SDR), Frankrig (199 Mio SDR) og Italien (128 Mio SDR). Den samlede virkning af disse trækingsrettigheder på EF-reserverne er imidlertid ikke ret stor (ca. 1% stigning i de samlede reserver — eksklusive guld).

Unemployment: stable in the Community as a whole

The seasonally adjusted unemployment data remained comparatively stable in January 1980, the 5.6% increase in the unadjusted figures being purely seasonal in character. This stability confirms the trend observed in the last months for the Community as a whole. Similarly, the increase previously observed in France and the United Kingdom continued in January.

Over the whole of 1979, women accounted for 44.7% of the number of unemployed. Whereas in 1974 the unemployment rate was identical for both sexes (2.9%), in 1979 it was 6.9% for women as opposed to 4.9% for men. This illustrates a phenomenon observed over the last five years: female unemployment has always risen more than male unemployment. Last year, the number of male unemployed fell by 2.3% while female unemployment continued to rise (+5.7%).

Industrial production: November figures good but poor growth prospects

The seasonally adjusted Community index of industrial production rose by 1.4% in November 1979. The short-term production growth rates improved in November in the three main industrial sectors: consumer goods, intermediate products and capital goods. This improvement was the result of increased production in Germany, Italy and Denmark. The production index for France indicated a certain loss of impetus after the good results of the previous few months. In the United Kingdom, industrial disputes adversely affected production.

If one takes a longer-term view, it is clear that the growth rates observed in the past few months have been lower than in the first half of the year. This reversal of the tendency in the level of economic activity lends support to the forecast that the growth of industrial production will be lower in 1980 than in 1979.

Energy: first results for 1979

The recovery of electricity production and consumption already observed in 1978 was confirmed in 1979. (Net consumption for the Community as a whole in 1979 was 5.1% higher than in 1978.)

According to such provisional information as is so far available, this increase in the rate of growth of consumption, which is apparent in all the Community countries without exception, appears to be largely accounted for by the economic recovery which was particularly marked in the first half of the year. Conversely, it appears that despite the very cold weather in the first months of 1979, demand from households and the tertiary sector was curtailed by a greater awareness on the part of users of the need to restrict their consumption (growth estimated at 6 or 7% as opposed to the rates of 10-11% observed in the past).

With regard to production, hydrological conditions in 1979 were similar to those in 1978 with the result that hydroelectric production remained at much the same level, continuing to account for 12% of total production. Production of nuclear power expanded by 10% to cover almost 11% of Community requirements. This expansion is particularly marked in France, where production of nuclear power increased by 30% as a result of the commissioning of major plants.

Production in conventional thermal power stations increased by more than 5% with the result that they covered almost 77% of requirements as in the previous year. In accordance with a programme aimed at diversification of the sources of supply and reduced reliance on petroleum products, power station operators made greater use of solid fuels and in particular coal, 20% of which was imported, while the use of petroleum products increased less rapidly than in previous years except in the Netherlands, which sharply increased oil consumption while reducing the use of natural gas.

Community coal production in 1979 totaled 238.7 million tonnes, thus increasing for the first time since 1975, albeit by only about half a million tonnes. This rise in production as compared with 1978 is entirely due to the good results of the West German coal mining industry, which for the first time since the beginning of the decade increased production as compared with the previous year (+3.2 million tonnes). On the other hand, output fell in the other three coal-producing countries (the United Kingdom, France and Belgium).

With regard to consumption, total demand for coal increased sharply in 1979 by almost 16 million tonnes. For the first time since the crisis in the steel industry began, there was a rise in coal deliveries to coking plants (+5 million tonnes). Deliveries to public utility and pithead power plants (which represent about 56% of total demand) increased by almost 11 million tonnes (+7.1%) to reach the record level of 165.5 million tonnes. Demand from other consumers (industry and households), which represents barely 15% of total consumption, exhibited no great change and remained at 40 million tonnes.

The stabilization of coal production and the rise in consumption have been accompanied by:

- a sharp increase (+11 million tonnes) in imports from third countries, amounting to 56.5 million tonnes and thus covering almost 20% of Community requirements (France alone, which imports 19.5 million tonnes from third countries, accounts for 35% of Community external trade);
- a drop in stocks.

Steel industry: confirmed recovery of production in 1979

Production in 1979 was 140 million tonnes, 5.6% more than in the previous year. It was higher than in 1978 in all Community countries apart from Italy (strikes in the second quarter of 1979) and Denmark, but did not reach the level attained in the boom year of 1974. As crude steel capacity in the Community was approximately 203 million tonnes, the plant utilization factor in 1979 was about 69%.

Intra-community trade: continued growth as compared with previous year

After correction for seasonal variations, trade among the Member States amounted to 20 100 million ECU in November 1979, 0.4% less than in the previous month (basis of calculation: imports). The increase as compared with November 1978, however, was very substantial 22.8%.

At current values, intra-Community trade amounted to 200 300 million ECU in the first 11 months of 1979. The increase as compared with the same period in 1978 was 20.4%, the greater part of which was accounted for by the United Kingdom and Italy. Their imports from the other Community countries rose by 30.6% and 30.5% respectively. Their intra-Community exports increased by 29.6% and 26.0%, thus accelerating their integration with the rest of the Community.

Substantial surpluses in intra-Community trade were achieved by the Netherlands and Germany, while the United Kingdom, Denmark and Ireland incurred considerable deficits. The Irish deficit, in particular, increased by 120% as compared with January-November 1978 (see also Series 081, page 34).

Community external trade: further record deficit in November 1979

After adjustment for seasonal variations, the value of trade with third countries slightly decreased as compared with the previous month: Community imports fell by 1.8% to 20 500 million ECU and exports dropped by 1.1% to 17 500 million ECU. However, imports were 29.3% higher than in November 1978 while exports increased by only 14.3%.

At current values, imports increased by 21.5% (196 300 million ECU) and exports by 12.0% (176 200 million ECU).

The negative trade balance in the first 11 months of 1979 exceeded 20 000 million ECU and the initial figures available for December appear to indicate a further increase in the deficit.

The Netherlands incurred a record deficit of 7 900 million ECU of which only three-quarters could be offset by their surplus in inter-Community trade. At the same time, Italy, France and the United Kingdom suffered disturbingly large deficits which were considerably higher than those for the period January-November 1978. Of all the Member States, only Germany achieved a surplus, which was, however, considerably lower at 5 700 million ECU than in 1978 (11 700 million ECU) (see Series 080, page 34). The predominant feature of this negative trend in the balance of trade with third countries was the Community's trade with the OPEC countries. On the one hand, the rapid rise in oil prices led to an increase in the value of imports while on the other hand exports from the Community to the OPEC countries were substantially reduced.

Finance: The International Monetary Fund allocate SDR's in January.

The IMF has allocated 4033.3 Mio in new SDR's from January 1 1980. Of this amount 27.3% or 1099.7 Mio SDR's were allocated to the EC countries. The biggest recipients among the EC-countries were the United Kingdom (304 Mio SDR's), Germany (224 Mio SDR's), France (199 Mio SDR's) and Italy (128 Mio SDR's). The overall effect of the allocation on the EC reserves however remains relatively small (approximatively a 1% increase in the total foreign reserves without gold).

DI SOCCUPAZIONE : Stabilità a livello comunitario

I dati corretti delle variazioni stagionali indicano, per gennaio 1980, una relativa stabilità della disoccupazione : l'aumento del 5,6% accusato dai dati grezzi ha carattere esclusivamente stagionale.

Questa stabilità conferma la tendenza osservata negli ultimi mesi per la Comunità nel suo complesso. D'altra parte prosegue in gennaio l'aumento osservato in Francia e nel Regno Unito.

Sull'arco dell'intero 1979, la quota femminile nel totale dei disoccupati è stata del 44,7% e il tasso di disoccupazione, che nel 1974 era identico per i due sessi (2,9%), è risultato del 6,9% per le donne contro il 4,9% per gli uomini : questa differenza illustra il fenomeno osservato negli ultimi cinque anni, in cui la disoccupazione è aumentata sempre in misura maggiore per le donne che non per gli uomini. Nello scorso anno il numero degli uomini disoccupati è diminuito del 2,3%, mentre il numero delle disoccupate continua ad aumentare (+5,7%).

Produzione industriale : buon risultato in novembre ma prospettive di sviluppo sfavorevoli

Nel novembre del 1979 l'indice destagionalizzato della produzione industriale della Comunità è in aumento dell'1,4% ed i tassi di sviluppo a breve termine della produzione risultano migliorati nei tre principali gruppi di branche : beni di consumo, beni intermedi e beni d'investimento; tale miglioramento è dovuto all'aumento della produzione in Germania, in Italia e in Danimarca, mentre in Francia l'indice della produzione accusa un certo esaurimento dello sviluppo, dopo i buoni risultati di alcuni mesi prima; in Gran Bretagna i conflitti sociali influiscono negativamente sull'andamento della produzione.

In una prospettiva a più lungo termine, è chiaro che i tassi d'incremento registrati negli ultimi mesi sono inferiori a quelli del primo semestre dell'anno : questo rallentamento del livello di attività economica giustifica le previsioni di uno sviluppo della produzione industriale inferiore nel 1980 a quello del 1979.

Energia : primi risultati per il 1979.

La ripresa dello sviluppo della produzione e del consumo di energia elettrica, già osservata nel 1978, si è confermata nel 1979, con un consumo netto per l'intera Comunità superiore del 5,1% a quello del 1978.

Secondo le prime informazioni provvisorie già disponibili, quest'espansione accelerata del consumo, constatata per tutti i paesi della Comunità senza eccezioni, sarebbe essenzialmente dovuta alla ripresa dell'attività industriale, particolarmente sostenuta nel primo semestre. Per contro, pare che malgrado il freddo intenso dei primi mesi del 1979 la domanda degli utenti domestici e del settore terziario sia rimasta contenuta, in conseguenza di una risposta positiva degli utenti agli appelli alla moderazione dei consumi (aumento stimato al 6-7%, contro i tassi del 10-11% osservati in passato).

Sul piano della produzione il 1979 è stato caratterizzato da condizioni idriche analoghe a quelle del 1978 : di conseguenza la produzione idroelettrica è rimasta praticamente costante, continuando a rappresentare il 12% del totale. D'altra parte la produzione elettronucleare ha registrato un incremento del 10% circa, che ha fatto salire all'11% quasi la sua quota nella copertura del fabbisogno della Comunità. Tale espansione è stata particolarmente netta in Francia, dove l'entrata in funzione di grandi nuove centrali nucleari ha aumentato ben del 30% la produzione elettronucleare. In tale contesto, l'aumento della produzione è stato di oltre il 5% per le centrali termoelettriche classiche, che come l'anno scorso hanno contribuito per quasi il 77% alla copertura del fabbisogno totale di energia elettrica della Comunità. Secondo un programma di diversificazione delle fonti di approvvigionamento, inteso a ridurre il consumo relativo di prodotti petroliferi, le centrali termoelettriche hanno bruciato in maggior misura combustibili solidi e in particolare carbon fossile (importato per il 20%) : l'impiego dei prodotti petroliferi ha avuto un'espansione moderata rispetto agli anni precedenti, tranne che nei Paesi Bassi, che hanno aumentato fortemente il loro consumo, limitando nel contempo l'impiego del gas naturale.

La produzione comunitaria complessiva di carbon fossile è stata, nel 1979, di 238,7 milioni di tonnellate ed ha segnato così, per la prima volta dal 1975, un aumento, sia pure lieve, di circa mezzo milione di tonnellate. Rispetto al 1978, tale aumento della produzione è dovuto esclusivamente ai buoni risultati dell'estrazione nelle miniere di carbone della Repubblica federale di Germania, che per la prima volta nel decennio hanno aumentato la produzione rispetto all'anno precedente (+3,2 milioni di tonnellate). E' invece diminuita la quantità di carbone estratta negli altri tre paesi produttori (Regno Unito, Francia e Belgio).

Dal lato dei consumi, la domanda globale di carbone ha avuto nel 1979 una forte espansione, pari a quasi 16 milioni di tonnellate. Per la prima volta dalla crisi siderurgica si osserva un aumento delle forniture di carbone alle cokerie (+5 milioni di tonnellate), mentre le forniture alle centrali elettriche dei servizi pubblici e delle miniere (che rappresentano il 56% circa domanda globale) sono aumentate di quasi 11 milioni di tonnellate (+7,1%), raggiungendo il volume record di 165,5 milioni di tonnellate. La domanda degli altri consumatori (industria e utenti domestici), che rappresenta meno del 15% del consumo globale, è rimasta invece sostanzialmente stabile, sul livello di 40 milioni di tonnellate.

Parallelamente alla stabilizzazione dell'estrazione di carbon fossile e all'aumento dei consumi, si osserva, com'è naturale, un duplice fenomeno :

— forte aumento (+11 milioni di tonnellate) delle importazioni dai paesi terzi, che raggiungono così il livello di 56,5 milioni di tonnellate, pari al 20% del fabbisogno comunitario; da notare che la Francia assorbe da sola 19,5 milioni di tonnellate, pari a quasi il 35% del carbone importato nella Comunità dai paesi terzi;

— una diminuzione delle scorte.

Siderurgia : ripresa confermata della produzione nel 1979

La produzione del 1979 è ammontata a 140 milioni di tonnellate, superando del 5,6% circa quella dell'anno precedente. A parte l'Italia (per gli scioperi del secondo trimestre del 1979) e la Danimarca, tutti gli altri paesi hanno avuto nel 1979 una superiore a quella del 1978, senza che si sia però raggiunto il livello produttivo del 1974, anno di alta congiuntura. Son riferimento ad una capacità di produzione di acciaio grezzo pari a circa 203 milioni di tonnellate, risulta per la Comunità nel 1979 un coefficiente di utilizzazione degli impianti del 69% circa.

Commercio intracomunitario : aumento continuo rispetto all'anno precedente

Il commercio tra gli Stati membri è ammontato nel novembre 1979 a 20,1 miliardi di ECU (dato valutato sulla base delle importazioni e corretto delle variazioni stagionali) ed accusa una lieve flessione sul mese precedente (-0,4%), ma un fortissimo aumento, pari al 22,8%, rispetto al novembre 1978.

In valori correnti gli scambi intracomunitari dei primi 11 mesi del 1979 sono ammontati a 200,3 miliardi di ECU : l'incremento rispetto allo stesso periodo del 1978 è stato del 20,4% ed è dovuto essenzialmente al Regno Unito ed all'Italia, che hanno aumentato le loro importazioni dagli altri paesi membri nella misura rispettiva del 30,6% e del 30,5%. Questi paesi manifestano d'altronde un'integrazione accelerata nell'area commerciale comunitaria, poiché anche le loro esportazioni verso i paesi membri sono salite in misura rilevante (+29,6 e, rispettivamente, +26,0%).

La bilancia degli scambi commerciali con gli altri paesi della CE è risultata in forte attivo per i Paesi Bassi e la Germania, mentre Regno Unito, Danimarca ed Irlanda accusano notevoli disavanzi : il deficit irlandese, in particolare, è aumentato del 120% rispetto al periodo gennaio-novembre 1978 (cfr. anche la serie O81, pag. 34).

Commercio estero della CE : nuovo deficit record nel novembre 1979

In cifre destagionalizzate, il valore degli scambi della Comunità con i paesi terzi accusa una flessione sul mese precedente : in novembre le importazioni della CE sono diminuite dell'1,8%, scendendo a 20,5 miliardi di ECU, le esportazioni dell'1,1% situandosi a 17,5 miliardi di ECU. Tuttavia, rispetto al novembre 1978 le importazioni sono aumentate del 29,3%, le esportazioni del 14,3% soltanto.

In valori correnti, gli aumenti sono stati del 21,5% per le importazioni (196,3 miliardi di ECU) e del 12,0% per le esportazioni (176,2 miliardi di ECU). In tal modo il saldo negativo della bilancia commerciale dei primi undici mesi del 1979 è stato superiore a 20,0 miliardi di ECU e le prime cifre registrate per dicembre sembrano annunciare un disavanzo ancora maggiore.

I Paesi Bassi hanno registrato un disavanzo record di 7,9 miliardi di ECU, compensato solo per i tre quarti dal loro saldo attivo negli scambi intracomunitari. D'altra parte, Italia, Francia e Regno Unito hanno accumulato deficit preoccupanti, in drammatico aumento rispetto al periodo gennaio-novembre 1978. Sola fra i paesi membri, la Germania ha invece un saldo attivo, che è però notevolmente inferiore a quello del 1978 (5,7 contro 11,7 miliardi di ECU; cfr. serie O80, pag. 34). Questa tendenza al peggioramento della bilancia commerciale con i paesi terzi è dovuta prevalentemente all'andamento degli scambi con i paesi dell'OPEP : da un lato il rapido aumento dei prezzi petroliferi ha comportato importazioni crescenti in valore, mentre gli acquisti dei paesi dell'OPEP nella Comunità si sono notevolmente contratti.

Dal 1° gennaio 1980 il FMI ha operato una nuova distribuzione di 4083,3 milioni di diritti speciali di prelievo : i paesi della Comunità hanno ricevuto il 27,3% di questa somma, pari a 1099,7 milioni di DSP. I maggiori beneficiari sono il Regno Unito (304 milioni di DSP), la Germania (224 milioni di DSP), la Francia (199 milioni di DSP) e l'Italia (128 milioni di DSP). Questa distribuzione ha però nel complesso scarsa incidenza sulle riserve comunitarie, poiché non rappresenta che l'1% circa dell'aumento totale delle riserve, oro escluso.

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunktuelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlege, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelser, definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

PREFACE

EN

This bulletin is in two parts: 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

AVVERTENZA

IT

Il presente bollettino consta di 2 parti: l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri nazionali, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa.
