Arbejdsløshed

Til trods for en sæsonbestemt nedgang i arbejdsløsheden i perioden mellem januar og februar 1980 har der i Fællesskabet kunnet registreres en svag stigning i arbejdsløsheden i sæsonkorrigerede tal. Sammenligner man imidlertid med det foregående år, er arbejdsløshedstallene uforandrede.

Indekset for industriproduktionen : det europæiske Fællesskabs industriproduktion steg med 4,5% i 1979.

Indekset for Det europæiske Fællesskabs industriproduktion korrigeret for sæsonudsving nåede i december 1979 op på 120,1 (1975=100), dvs. en stigning på 1,0% i forhold til den foregående måned. Denne kraftige stigning skyldes først og fremmest et kraftigt opsving i industriproduktionen hen imod årets slutning i Forbundsrepublikken Tyskland og i mindre omfang i Frankrig. Tendensen i Fællesskabets investeringsgode- og forbrugsgodeindustri var den samme som tendensen i det samlede indeks i løbet af de tre sidste kvartaler, men konjunktursvingningerne var mere markante inden for investeringsgodesektoren. I mellemproduktindustrien var den stigende tendens imidlertid jævnt aftagende i løbet af de to sidste kvartaler og sluttede under det samlede indeks.

Som helhed betragtet udgjorde stigningen i indekset over industriproduktionen i forhold til det foregående år 4,5% i 1979 mod henholdsvis 2,2% og 2,4% i 1977 og 1978. Alle de vigtigste produktionsgrupper viste en opadgående tendens i forhold til 1978, men denne udvikling var især mærkbar inden for mellemproduktindustrien (stigningstakt fra 3,0% i 1978 til 5,9% i 1979) og inden for investeringsgodeindustrier (stigningstakt fra 0,2% i 1978 til 3,0% i 1979).

Hvad angår stigningstakten i indekset for industriproduktionen i Fællesskabet og i medlemsstaterne i løbet af de sidste 3 år, er det bemærkelsesværdigt, at stigningen i 70'erne for alle landes vedkommende har været aftagende i forhold til de høje stigningstakter i de foregående 20 år. Omfanget af denne vigende tendens varierer betydeligt fra det ene land til det andet, men den samlede virkning på Fællesskabets indeks har været en halvering af stigningstakten fra tresserne til halvfjerdserne. I det tiår, som netop er gået, har den tydelige nedgang i den økonomiske aktivitet i 1975 haft en umådelig negativ virkning på stigningstakterne, selv om produktionen siden dette år er steget, og stigningstakterne er nået op på og ofte op over deres gennemsnitlige niveau på lang sigt. På baggrund heraf kan resultaterne for 1979 betragtes som gunstige.

Landbruget : indkomstudviklingen inden for landbruget.

Værditilvæksten i faktorpriser er en indikator for landbrugernes indkomst. Den nominelle stigning for hele Fællesskabet blev for 1979 anslået til 8,7, hvilket efter korrektion for prisstigninger svarer til en nedgang på 0,7% i faste priser. Der kan opstilles tre grupper af lande, nemlig de lande, som i faste priser kunne notere sig et fald på op til 5% (Tyskland, Nederlandene, Belgien og Det forenede Kongerige), de lande, som kunne registrere et fald på over 10% (Luxembourg, Irland og Danmark), og endelig de lande, som kunne registrere en stigning (Frankrig Italien).

Den reelle bruttoværditilvækst i faktorpriser pr. beskæftiget er siden 1968 steget med ca. 44%. Det har været vanskeligt at overvinde afmatningen i 1974; i 1979 var værditilvæksten således ikke meget større end i 1973.

Samhandelen inden for Fællesskabet : kraftig stigning siden 1978

Til trods for en sæsonmæssig nedgang i december (-4,1% i forhold til den foregående måned, dvs. 19,4 Mrd ECU i sæsonkorrigerede tal skete der en stigning i samhandelen mellem medlemsstaterne på 20,5% i forhold til samme måned i 1978 (på grundlag af importen).

Da konjunkturerne var gunstige i hele 1979, steg samhandelen inden for Fællesskabet med 20,2% og nåede dermed op på 220,1 Mrd ECU. Storbritanniens andel i samhandelen voksede, idet handelen med dets partnere i 1979 for første gang oversteg 40% (import 41,3% eksport 41,8%). Det var især eksporten, som steg, eftersom den i 1978 kun udgjorde 37,7%. Olieeksporten til Tyskland steg kraftigt, hvilke i væsentligt omfang forklarer denne udvikling.

BLØU havde i 1978 et underskud på 0,5 Mrd ECU, men kunne til gengæld registrere et overskud på 1,0 Mrd ECU i 1979, og Nederlandene, som forøgede deres bemærkelsesværdige overskud på 4,1 Mrd ECU i 1978 med 50%, nåede op på 6,0 Mrd ECU i 1979. Det var de lande, som kunne registrere den største forbedring på betalingsbalancen. Nederlandenes overskud skyldes eksporten af olieprodukter, især til Tyskland. Irland registrerede en mærkbar forringelse i handelsbalancen over for de øvrige medlemsstater, underskuddet steg således fra 579 til 1 327 Mio ECU (se også serie O81).

Fællesskabets samhandel med tredjelande : Rekordunderskud i 1979

I sæsonkorrigerede tal faldt samhandelen med tredjelande i december måned i forhold til den foregående måned; importen faldt således med 3,1% til 20 Mrd ECU, og eksporten faldt med 3,7% og nåede ned på 16,8 Mrd ECU. Sammenligner man imidlertid med december 1978 steg importen med 27,5% og eksporten med 12,2%.

I 1979 kunne Fællesskabet registrere det største underskud i løbende priser i dets historie, nemlig på 22,9 Mrd ECU (ifølge beregningerne er dette underskud målt i faste priser 14% større end rekordunderskuddet i 1976). Der er således sket en drastisk ændring af den positive tendens i 1978, hvor underskuddet fra 1977 på 7,2 Mrd ECU blev reduceret til 4,4 Mrd ECU. Denne foruroligende forværring af handelsbalancen skyldes dels den meget kraftige stigning i oliepriserne, dels en nedgang i eksporten til OPEC-landene. Efter EUROSTAT-beregninger er underskuddet i handelen med olie og olieprodukter steget fra 36,4 til 45,1 Mrd ECU (1978/1979), mens eksporten til OPEC-landene er faldet med mere end 12%. I hele 1979 steg importen med 21,9% og nåede op på 217,3 Mrd ECU, mens eksporten kun steg med 11,9% svarende til 194,4 Mrd ECU.

For alle medlemsstaters vedkommende blev handelsbalancen forringet. Nederlandene måtte registrere det største absolutte underskud på 8,7 Mrd ECU. Tysklands handelsbalance blev hårdest ramt af de stigende oliepriser; overskuddet på 12,8 Mrd i 1978 svandt ind til 5,9 Mrd ECU i 1979. Til trods for bedringen i handelsbalancen for olie måtte Det forenede Kongerige notere sig en stigning i underskuddet på 1,6 Mrd, der således nåede op på 5,0 Mrd ECU. Kun Irland kunne registrere en svag stigning i underskuddet med tredjelande på grund af den stigende import af olie fra Det forenede Kongerige.

Priser

Forbrugerindekset for hele EF i perioden mellem januar og februar 1980 steg med 1,3%.

Alle landene havde andel i denne stigning, som udgjorde mellem 0,8 og 1,7%.

Stigningen var meget kraftig i Italien (1,7%) og i Det forenede Kongerige (1,4%) i Tyskland var den på 1,1%, hvilket er den største stigning siden november 1973. Stigningen var på 1,0% i Nederlandene og Danmark, og 0,8% i Belgien og Luxembourg.

Stigningen over 12 måneder for EUR 9 nåede op på 13,9%, fra februar 1978 til februar 1979 var denne stigning på kun 8,2%.

Penge og finanser : Nye renteforhøjelser

Der indtrådte en række nye renteforhøjelser i sidste halvdel af februar måned. Denne forhøjelse af renteniveauet blev udløst den 15. 2. efter den amerikanske diskontoforhøjelse fra 12 til 13%, og Japan og Danmark fulgte umiddelbart efter med forhøjelser fra 6 1/4 til 7 1/4 i Japan og fra 11% til 13% i Danmark. En uge senere så Belgien sig nødsaget til at forhøje diskontoen den 27. 2. med 1 1/2, hvilket bragte renten op fra 10 1/2% til 12%. Det blev understreget, at denne forhøjelse skulle være en tilpasning for at bevare ligevægten mellem den belgiske rente og renten i udlandet for derved at undgå eksport af kortfristet kapital. Dagen efter forhøjede Bundesbank diskontoen fra 6 til 7%.

Unemployment

Despite a seasonal drop in unemployment between January and February 1980, the number of unemployed in the Community showed a slight increase after adjustment for seasonal variations. As compared with the 1979 data, however, the level of unemployment is unchanged.

Index of industrial production: 4.5% growth in Community industrial production in 1979.

The seasonally adjusted index of industrial production for the European Community reached 120.1 (1975=100) in December 1979, a rise of 1.0% as compared with the previous month. This marked increase was due primarily to a sharp rise in industrial production at the end of the year in the Federal Republic of Germany and, to a lesser extent, in France. The trends of the Community's capital and consumer goods industries have matched those of the overall index over the last three quarters, but cyclical movements have been more pronounced in the capital goods sector. In the intermediate products sector, however, there has been a steady downward trend of the growth rate in the last two quarters to rates lower than those exhibited by the overall index.

Overall, the index of industrial production increased by about 4.5% in 1979 over the previous year whereas the rises in 1977 and 1978 were 2.2% and 2.4% respectively. Results for all the major product groups were better than in 1978, but the upturn was particularly marked in the intermediate products sector (growth up from 3.0% in 1978 to 5.9% in 1979) and the capital goods sector (growth up from 0.2% in 1978 to 3.0% in 1979).

If one considers the rates of rise of the index of industrial production for the Community and the Member States over the last three decades it is important to note that in all the countries, growth during the 1970s was not sustained at the fast rates recorded during the previous 20 years. There were considerable differences from country to country in the extent to which this slowing in growth became apparent, but the overall effect on the Community index was that its growth rate in the 1970s was half that in the 1960s. In the decade which has just ended the downturn in the level of economic activity in 1975 had an extremely negative impact on rates of growth, although production has since improved and growth rates have returned to, and in some cases exceeded, their long-term average levels. Against this background, the results for 1979 can be regarded as satisfactory.

Agriculture: Development of incomes in the agricultural sector

The value added at factor cost per person occupied is an indicator of incomes in the agricultural sector. The nominal increase in this quantity in 1979 has been estimated at 8.7% for the Community as a whole. Once adjustment is made for price increases, this is equivalent to a decline in real terms of 0.7%. Three groups of countries may be distinguished: those in which the drop in real terms was equal to or less than 5% (Germany, the Netherlands, Belgium and the United Kingdom), those in which the drop exceeds 10% (Luxembourg, Ireland and Denmark) and those in which there was an increase (France, Italy).

Gross value added at factor cost per person occupied has increased by 44% in real terms since 1968 but has been slow to recover from the downturn in 1974. In 1979 it was very little higher than in 1973.

Intra-community trade: sharp increase since 1978

Despite a seasonal drop in December (-4.1% as compared with the previous month to 19 400 million ECU after adjustment for seasonal variations), trade between the Member States increased by 20.5% as compared with the same month in 1978 (basis of calculation: imports).

As economic conditions were favourable in 1979, intra-community trade increased by 20.2% to 220 100 million ECU. British trade became more closely integrated with the Community market: in 1979 trade with the other Member States for the first time exceeded 40% of total trade (41.3% of imports and 41.8% of exports). The main increase was in exports, which amounted to only 37.7% in 1978. This development is to a large extent accounted for by a sharp increase in sales of oil to Germany.

The BLEU had a positive balance of 1 000 million ECU in 1979, whereas it had a deficit of 500 million ECU in 1978, and the Netherlands increased its remarkable surplus of 4 100 million ECU in 1978 by 50% to 6 000 million ECU in 1979. These are the countries which achieved the most spectacular improvement in their balance of trade. The positive balance of the Netherlands is primarily due to its exports of petroleum products to Germany. The Irish balance on intra-community trade deteriorated considerably, the deficit increasing from 579 to 1 327 million ECU (see also Series O81).

Community external trade: record deficit in 1979

After adjustment for seasonal variations, trade with third countries dropped in December as compared with the previous month: imports fell by 3.1% to 20 000 million ECU, while exports fell by 3.7% to 16 800 million ECU. However, imports were 27.5% and exports 12.2% higher than in December 1978.

In 1979 the Community's deficit at current values was the largest in its history at 22 900 million ECU. It is estimated that in real terms it was 14% higher than the record deficit in 1976. The positive trend in 1978, when the 1977 deficit of 7 200 million ECU fell to 4 400 million ECU, has thus been sharply reversed. This disquieting deterioration of the trade balance is primarily due to a very rapid increase in oil prices and a fall in exports to the OPEC countries. According to EUROSTAT estimates, the trade deficit in respect of oil and petroleum products increased from 36 400 to 45 100 million ECU (1978-1979), while at the same time exports to the OPEC countries fell by more than 12%. Over the whole of 1979, imports increased by 21.9% to 217 300 million ECU, while exports increased by only 11.9% to 194 400 million ECU.

All the Member States suffered a deterioration in their trade balance. The Netherlands incurred the largest absolute deficit of 8 700 million ECU. Germany's trade balance was most seriously affected by the increase in oil prices. Its surplus of 12 800 million ECU in 1978 shrank to 5 900 million ECU in 1979. The United Kingdom, despite an improvement in its balance in respect of oil, increased its deficit by 1 600 million ECU to 5 000 million ECU. Ireland was the only country to suffer only a slight increase in its deficit with third countries as a result of its increased imports of oil from the United Kingdom.

Prices

The consumer price index for the European Community as a whole rose by 1.3% between January and February 1980.

This increase was apparent in all the countries, the rates varying from 0.8 to 1.7%.

The rise was very sharp in Italy (1.7%) and the United Kingdom (1.4%). In Germany it was 1.1% — the highest rate since November 1973.

Prices rose by 1% in the Netherlands and Denmark and by 0.8% in Belgium and Luxembourg.

The rise over 12 months for EUR 9 was 13.9%, whereas in the period from February 1978 to February 1979 it was only 8.2%.

Finance: further increases in interest rates

A further series of interest rate increases took place in the second fortnight in February. These were triggered on 15 February by the rise from 12% to 13% in the discount rate of the United States Federal Reserve System. Japan and Denmark immediately increased their rates, which rose from 6 1/4% to 7 1/4% in Japan and from 11% to 13% in Denmark. One week later, Belgium was compelled to react by increasing its main discount rate by 1 1/2% on 27 February from 10 1/2% to 12%, emphasizing that the purpose of this increase was to maintain a balance between interest rates in Belgium and abroad and thus to avoid flows of short-term money out of the country. The following day, the Bundesbank in turn increased its discount rate from 6% to 7%.

Disoccupazione

Malgrado una lieve diminuzione, di carattere stagionale, della disoccupazione intervenuta tra il mese di gennaio e quello di febbraio del 1980, il numero di disoccupati nella Comunità ha fatto registrare un lieve aumento in dati destagionalizzati. Peraltro, da un raffronto con i dati dell'anno precedente, il livello della disoccupazione risulta stazionario.

Indice della produzione industriale : Aumento del 4,5% della produzione industriale nella Comunità europea nel 1979.

Nel dicembre del 1979 l'indice destagionalizzato della produzione industriale della Comunità europea ha raggiunto il livello di 120,1 (1975=100), pari ad un aumento dell'1,0% rispetto al mese precedente. Questo forte aumento è dovuto in massima parte ad una vivace ripresa della produzione industriale a fine anno nella Repubblica federale di Germania e, in misura minore, in Francia. Le tendenze registrate nelle branche dei beni d'investimento e dei beni di consumo della Comunità sono state comparabili a quelle dell'indice globale nel corso degli ultimi tre trimestri, mentre i movimenti ciclici sono stati più pronunciati nel settore dei beni d'investimento. Nella branca dei beni intermedi, peraltro, la tendenza del tasso di sviluppo è diminuita regolarmente nel corso degli ultimi due trimestri, per situarsi al di sotto dell'indice globale.

Nel complesso, l'aumento dell'indice della produzione industriale rispetto all'anno precedente è stato, nel 1979, dell'ordine dell'4,5% contro il 2,2% del 1977 e il 2,4% del 1978. Tutti i principali gruppi di prodotti hanno fatto registrare risultati superiori a quelli del 1978, ma il miglioramento è stato particolarmente rilevante nel settore dei beni intermedi (tasso di sviluppo passato dal 3,0% nel 1978 al 5,9% nel 1979) e nel settore dei beni d'investimento (tasso di sviluppo passato dallo 0,2% nel 1978 al 3,0% nel 1979).

Quanto ai tassi di sviluppo dell'indice della produzione industriale nella Comunità e negli Stati membri nel corso degli ultimi tre decenni, occorre notare che in tutti i paesi lo sviluppo ha registrato, negli anni '70, una flessione rispetto ai tassi elevati constatati nel corso del ventennio precedente. L'incidenza di una tale decelerazione dello sviluppo varia notevolmente da un paese all'altro, ma il suo effetto globale sull'indice comunitario è stato di dimezzarne il tasso di sviluppo tra gli anni '60 e gli anni '70. Per il decennio appena trascorso la netta flessione del livello dell'attività economica nel 1975 si è ripercossa in maniera estremamente negativa sui tassi di sviluppo nonostante il fatto che, in seguito, la produzione sia migliorata e i tassi di sviluppo abbiano raggiunto, e talvolta superato, i rispettivi livelli medi a lungo termine. In questo contesto, i risultati relativi al 1979 possono essere ritenuti favorevoli.

Agricoltura : evoluzione del reddito da attività agricola

Il valore aggiunto al costo dei fattori per persona occupata è un indicatore del reddito da attività agricola. Per il complesso della Comunità, nel 1979 il suo aumento nominale è stato stimato a 8,7, il che, tenuto conto dell'aumento dei prezzi, si traduce in una diminuzione in termini reali dello 0,7%. A livello dei vari paesi, occorre distinguere tre gruppi : i paesi che hanno fatto registrare, in termini reali, una diminuzione inferiore o uguale al 5% (Repubblica federale di Germania, Paesi Bassi, Belgio e Regno Unito), i paesi per i quali la diminuzione supera il 10% (Lussemburgo, Irlanda e Danimarca) e, infine, i paesi che hanno fatto registrare un aumento (Francia, Italia).

Il valore aggiunto reale al costo dei fattori per persona occupata è aumentato, dal 1968 a tutt'oggi, del +44% circa, riuscendo con difficoltà a superare la flessione intervenuta nel 1974; nel 1979 esso supera appena il livello del 1973.

Commercio intracomunitario : forte aumento a decorrere dal 1978

Malgrado una diminuzione stagionale nel mese di dicembre (-4,1% rispetto al mese precedente), corrispondente a 19,4 miliardi di ECU (dato destagionalizzato), gli scambi tra gli Stati membri sono aumentati del 20,5% rispetto allo stesso mese del 1978 (base : importazioni). Grazie ad una congiuntura favorevole nel corso del 1979, il commercio intracomunitario è aumentato del 20,2%, per raggiungere un livello di 220,1 miliardi di ECU. L'intergrazione del commercio britannico nel mercato comunitario ha fatto registrare un netto progresso : la quota degli scambi con gli altri paesi membri nel 1979 ha superato, per la prima volta, la soglia del 40% (importazioni : 41,3%, esportazioni : 41,8%). Ad aumentare sono state soprattutto le esportazioni che, nel 1978, rappresentavano soltanto il 37,7%. Sono fortemente aumentate le vendite di petrolio alla Repubblica federale di Germania, il che spiega in gran parte una tale evoluzione.

L'UEBL che, nel 1978, aveva accusato un disavanzo di 0,5 miliardi di ECU, fa invece registrare nel 1979 un saldo positivo di 1,0 miliardi di ECU, mentre i Paesi Bassi, che hanno aumentato del 50% il loro già cospicuo saldo positivo di 4,1 miliardi di ECU del 1978, nel 1979 hanno raggiunto i 6,0 miliardi di ECU. Si tratta dei due paesi in cui si è notato il miglioramento più spettacolare della bilancia commerciale. Il saldo positivo dei Paesi Bassi è dovuto soprattutto alle sue esportazioni di prodotti petroliferi verso la Repubblica federale di Germania. In Irlanda si è invece constatato un notevole deterioramento della bilancia commerciale negli scambi intracomunitari, con un disavanzo passato da 579 a 1327 milioni di ECU (vedasi anche serie 081).

Commercio estero della Comunità : deficit record del 1979

In cifre destagionalizzate, il valore degli scambi della Comunità con i paesi terzi accusa, in dicembre, una flessione rispetto al mese precedente : le importazioni sono diminuite del 3,1%, scendendo a 20 miliardi di ECU, le esportazioni del 3,7%, situandosi a 16,8 miliardi di ECU. Tuttavia, rispetto al mese di dicembre del 1978, le importazioni sono aumentate del 27,5% e le esportazioni del 12,2%.

Nel 1979 la Comunità ha accusato il deficit, in valori correnti, più rilevante finora constatato, cioè di 22,9 miliardi di ECU, che, secondo le stime, supera del 14%, in valori reali, il deficit record del 1976. Infatti, la tendenza positiva del 1978, anno in cui il deficit del 1977 di 7,2 miliardi di ECU si era ridotto a 4,4 miliardi di ECU, si è drammaticamente invertita. Questo inquietante peggioramento della bilancia commerciale è dovuto soprattutto all'aumento rapidissimo dei prezzi del petrolio, da un lato, e ad una diminuzione delle esportazioni verso i paesi dell'OPEP, dall'altro. Secondo le stime dell'EUROSTAT, il deficit nel settore del commercio del petrolio e dei prodotti petroliferi è passato da -36,4 a -45,1 miliardi di ECU (1978-1979), mentre, parallelamente, le esportazioni verso i paesi dell'OPEP sono diminuite di oltre il 12%. Per tutto l'anno 1979 le importazioni sono aumentate del 21,9% situandosi a 217,3 miliardi di ECU, mentre le esportazioni si sono accresciute soltanto dell'11,9%, raggiungendo l'importo di 194,4 miliardi di ECU.

Tutti i paesi membri hanno accusato un deterioramento della propria bilancia commerciale. I Paesi Bassi, con 8,7 miliardi di ECU, hanno registrato il deficit più elevato in assoluto. La bilancia commerciale della Repubblica federale di Germania è stata quella maggiormente colpita dall'aumento dei prezzi petroliferi, con un saldo positivo di 12,8 miliardi, nel 1978, ridottosi a 5,9 miliardi di ECU nel 1979.

Il Regno Unito, malgrado un miglioramento della propria bilancia per quanto attiene al petrolio, ha visto aumentare il proprio deficit di 1,6 miliardi, per raggiungere i 5,0 miliardi di ECU. Solamente l'Irlanda non ha accusato che un lieve aumento del proprio deficit nei confronti dei paesi terzi grazie all'aumento delle importazioni di petrolio dal Regno Unito.

Prezzi

L'indice dei prezzi al consumo per il complesso della CE è aumentato dell'1,3% tra il mese di gennaio e quello di febbraio del 1978. L'aumento è stato accusato in tutti i paesi, con tassi che si collocano tra lo 0,8% e l'1,7%. L'aumento è molto rilevante in Italia (1,7%) e nel Regno Unito (1,4%); nella Repubblica federale di Germania esso si situa all'1,1%, il tasso più elevato constatato dal novembre 1973 a tutt'oggi. L'incremento è dell'1,0% nei Paesi Bassi e in Danimarca, dello 0,8% in Belgio e nel Lussemburgo.

Per il complesso EUR 9 l'aumento su 12 mesi si colloca al 13,9%, mentre per il periodo febbraio 1978 — febbraio 1979 esso non era ammontato che all'8,2%.

Finanze : nuovi aumenti dei tassi d'interesse

Durante la seconda metà del mese di febbraio si è registrata una nuova serie di aumenti dei tassi d'interesse, provocati, il 15 febbraio dall'aumento del tasso di sconto, dal 12% al 13%, deciso dal « Federal Reserve System » statunitense. Immediatamente, il Giappone e la Danimarca hanno aumentato a loro volta i propri tassi di sconto, passati dal 6 1/4% al 7 1/4% in Giappone e dall'11% al 13% in Danimarca. Una settimana più tardi il Belgio si è visto costretto a reagire, maggiorando il 27 febbraio il proprio tasso di sconto principale dell'1 1/2% (tasso che passa quindi dal 10 1/2% al 12%), facendo presente che un tale aumento costituisce un adeguamento per poter mantenere l'equilibrio tra i tassi belgi e quelli esteri e per evitare, di conseguenza, trasferimenti di fondi a breve termine verso l'estero. Il giorno dopo, la Bundesbank ha da parte sua aumentato il proprio tasso di sconto dal 6% al 7%.

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunktuelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlege, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelser definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

PREFACE

EN

This bulletin is in two parts: 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

AVVERTENZA

IT

Il presente bollettino consta di 2 parti: l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo, la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa.

Abonnementet er årligt og løber fra 1. januar til 31. december hvert år.

The annual subscription runs from 1 January to 31 December of each year.

Gli abbonamenti sono annuali e il loro periodo di validità va dal 1° gennaio al 31 dicembre di ciascun anno.

Betaling kan kun ske til agenturerne i landene nævnt på omslagets side 3.

Payments to be made only to the agents in the countries listed on page 3 of the cover.

I versamenti devono essere indirizzati agli uffici di vendita indicati a pag. 3 della copertina

Priserne dækker forsendelse ad land- eller søvej; agenturerne giver oplysning om priserne for luftforsendelse.

These are surface mail rates; for air subscription rates please apply to the agents.

I prezzi non comprendono le spese di spedizione per posta aerea; per le condizioni di abbonamento in caso di spedizione per posta aerea, si consultino gli uffici di vendita.
