Manuskript afsluttet den 28. april 1980

Manuscript completed 28 April 1980

Manoscritto terminato il 28 aprile 1980

Arbejdsløshed

Antallet af arbejdsløse udregnet i sæsonkorrigerede tal forblev relativt stabilt i første kvartal af 1980. I februar måned blev den største ændring blandt medlemslandene registreret i Forbundsrepublikken Tyskland.

Indekset for industriproduktionen : På kort sigt viser konjunkturerne stadig tegn på stigning i industriproduktionen.

Indekset for Fællesskabets industriproduktion i sæsonkorrigerede tal nåede i januar 1980 119,2 (1975 = 100), hvilket svarer til en nedgang på 0,7% i forhold til den foregående måned. Dette skyldes hovedsagelig den kraftige nedgang, der i månedens løb kunne registreres i Forbundsrepublikken Tysklands indeks og i mindre, men alligevel mærkbart, omfang også i det italienske indeks. Ser man på produktionsgrupperne, skete der for Fællesskabets investeringsgodeindustri en kraftig nedgang i produktionen udregnet i sæsonkorrigerede tal i januar i forhold til december, mens ændringerne for mellemproduktindustrien og forbrugsgodeindustrien var mindre udtalte. Med hensyn til de kortsigtede tendenser i industriproduktionens vækst viser udviklingen, at der for EUR 7 kunne registreres en stigende vækst i løbet af de sidste 4 måneder, hvilket har gjort de hyppige forudsigelser om en umiddelbart forestående konjunkturedgang til skamme. Dette skyldes flere faktorer, hvoraf de vigtigste med hensyn til indvirkningen på EUR 9 indekset er det uventede opsving i industriproduktionen i Tyskland og Italien i fjerde kvartal af 1979. Disse bevægelser har mere end opvejet den mindre gunstige indvirkning fra de usikre tendenser i produktionen i Frankrig, Det forenede Kongerige og andre EF-lande.

Foretager man en fordeling på brancher, er det interessant at sammenligne tendenserne i den gennemsnitlige vækst i Fællesskabet mellem perioden 1971-74 og 1976-79. Inden for næsten alle store sektorer har væksten været betydelig lavere i løbet af denne sidste periode end i løbet af de tre år, der gik forud for recessionen i 1975, idet den eneste undtagelse var automobilindustrien (NACE 35), hvor den gennemsnitlige vækst steg fra 0,8% i løbet af den første periode til 3,8% i den anden periode. Inden for de andre sektorer har den gennemsnitlige vækst enten været negativ efter 1975, mens den var positiv fra 1971 til 1974 som f.eks. i den øvrige transportmiddelindustri (NACE 36) og tekstilindustrien (NACE 43), eller også har den holdt sig omkring 0 i løbet af de to perioder, f.eks. inden for fodtøjsindustrien (NACE 451/452) og beklædningsindustrien (NACE 453, 454 og 456) eller, hvilket er forekommet hyppigere, den er faldet til mindre end 75% af gennemsnittet fra før recessionen, hvilket gælder fremstilling af primær bearbejdningsmetaller (NACE 22), den kemiske industri og fremstillingen af kemofibre (NACE 25/26), maskinindustrien, elektroindustrien og beslægtede industrier (NACE 31/36) og nærings- og nydelsesmiddelindustrien (NACE 41) samt fremstillingen af papirmasse og pap (NACE 471/472). Det er imidlertid interessant at bemærke, at gennemsnitstallene, der blev registreret i 1979 inden for alle de ovennævnte industrier, var højere end de tilsvarende tal for perioden 1976/1979, og at de inden for nogle sektorer (tekstilindustrien, maskin- og elektroindustrien, automobilindustrien, fodtøjsindustrien, beklædningsindustrien og papirindustrien) endog lå over de tilsvarende tal for perioden 1971/1974.

Samhandelen inden for Fællesskabet : Fortsat positiv tendens

Handelen mellem medlemsstaterne er stadig livlig; sammenlignet med samme måned i 1979 er der sket en fremgang på 30,6%, idet den nåede op på 17,0 Mrd ECU (på grundlag af importen). Den kraftigste vækst i importen fra EF-lande blev registreret i Det forenede Kongerige (53,5%) og Danmark (41,4%), mens Tyskland lå et godt stykke under gennemsnittet med den mindste stigning (19,5%). Det forenede Kongerige kunne også registrere den største stigning i eksporten til andre EF-lande (61,0%) efterfulgt af Italien (51,1%). Frankrig forøgede kun sin eksport med 19,9% og måtte med -360 mio. ECU registrere det største underskud i samhandelen inden for Fællesskabet (januar 1979 : -191 mio. ERE). Tyskland og Italien forøgede deres overskud mærkbart. Det forenede Kongerige og Nederlandene kunne også registrere en mindre forbedring i balancen, mens den for Danmarks og Irlands vedkommende blev forværret. Irland kunne med et meget stort underskud (176 mio. ECU) også den laveste importdækningsgrad, nemlig 66%.

Fællesskabets samhandel med tredjelande* : I januar nåede underskuddet allerede op på en fjerdedel af underskuddet fra det foregående år.

For første gang kunne Fællesskabet ikke registrere en sæsonmæssig tilbagegang i importen (der udgjorde 20,8% Mrd ECU) i januar i forhold til december, men derimod en mindre fremgang. I sammenligning med den tilsvarende måned det foregående år var stigningen meget markant (42,8%), Italien (60,3%). Det forenede Kongerige (47,6%) og Tyskland (45,1%) kunne notere sig de største stigninger. Stigningen i Danmark import (18,8%) var også bemærkelsesværdig.

Til trods for at eksporten steg 20,9% (idet den kom op på 15,7 Mrd ECU) i forhold til januar 1979, er underskuddet på handelsbalancen 5,1 Mrd ECU, hvilket svarer til en fjerdedel af hele underskuddet for 1979 (januar 1979 : -1,6 Mrd ECU). Forringelsen af Tysklands handelsbalance var meget markant, og balancen blev således endog negativ (-0,4 Mrd ECU). For Frankrigs og Det forenede Kongeriges vedkommende blev underskuddet fordoblet, mens underskuddet på Nederlandenes handelsbalance med lande uden for Fællesskabet kun blev lidt forøget. Irlands handelsbalance er med et underskud på 120 mio ECU meget foruroligende; eksporten udgjorde således kun 43% af importen.

Forbrugerpriserne i marts 1980

Forbrugerprisindekset for hele EF steg med 0,8% i perioden februar - marts 1980.

De største stigninger blev registreret i Danmark (1,4%), i Det forenede Kongerige (1,4%) og i Frankrig (1,2%). Stigningerne var mere moderate i Italien (0,9%), Nederlandene (0,8%) og i Tyskland (0,6%), mens stigningen var relativt beskedent i Luxembourg (0,4%) og i Belgien (0,2%).

Sammenligner man stigningen i løbet af første kvartal af 1980 med den tilsvarende periode i 1979, fremgår det, at der er sket en stigning i inflationstakten siden årets begyndelse.

Den årlige stigning for EUR 9 nåede op på 14,0%; der er dog stor forskel fra land til land : ca. 6% for Tyskland og Benelux-landene, mellem 13 og 15% for Frankrig, Danmark og Irland og ca. 20% for Det forenede Kongerige og Italien.

Penge og finanser : Omsving i valutakurserne, tendens

I de sidste to uger af marts og i første uge af april skete der et fuldstændigt omsving i valutakursernes og guldpriserens tendens i løbet af den foregående måned. Det høje renteniveau i Det forenede Stater (Prime Rate omkring 20%) gjorde investeringer i US-dollar relativt attraktive og bevirkede, at investeringerne blev flyttet fra guldet, der faldt ned under grænsen på 500 US-dollar pr. oz., og fra de europæiske valutaer, i særdeleshed DM. Denne var særlig svag over for de andre valutaer som følge af udsigterne til et fortsat underskud på den tyske betalingsbalance.

* BLØU ikke medregnet, da tallene ikke forelår.

Unemployment

After correction for seasonal adjustment, the number of unemployed remained fairly stable in the first quarter of 1980. Of the Member States, the Federal Republic of Germany registered the greatest change in the course of February.

Index of industrial production: cyclic indicators show continued short-term growth in industrial production

In January 1980, the seasonally corrected index of industrial production for the Community was 119.2 (1975=100), 0.7% lower than in the previous month. This change is largely explained by the sharp drop in the course of the month in the index for the Federal Republic of Germany, and to a lesser, but nonetheless appreciable, extent in the Italian index. With regard to the product groupings, the seasonally adjusted production figures for the capital goods industries in the Community were distinctly lower in January than in December, while the change was less pronounced in the intermediate products and consumer goods sectors. With regard to the short-term industrial production trends, the rate of growth for EUR 9 has proved to be more rapid in the last four months, despite recent and repeated forecasts of an imminent economic downturn. This phenomenon is the result of several factors, chief among which, from the point of view of the effect on the EUR 9 index, are the buoyancy and the unexpected recovery of German and Italian industrial production in the fourth quarter of 1979. These changes more than offset the less positive influence of the uncertain production trends in France, the United Kingdom and other Community countries. At the level of the different branches, it is interesting to compare the mean Community growth rates for the periods 1971-74 and 1976-79. In almost all the major sectors, growth was substantially slower in the latter period than in the three years before the 1975 recession, the only exception being motor vehicle manufacture (NACE 35), whose average rate of growth increased from 0.8% in the first period to 3.8% in the second. In the other sectors, the average growth rate either became negative after 1975, where as it was positive between 1971 and 1974, as for other means of transport (NACE 36) and textiles (NACE 43) or it remained about zero throughout the two periods, as in the footwear industry, (NACE 451/452) and clothing industry (NACE 453, 454, 456) or, more commonly, it fell to less than 75% of its mean value before the recession, as in production and preliminary processing of metals (NACE 22), the chemical industry and man-made fibres (NACE 25/26), mechanical and electrical engineering and related industries (NACE 31/36) and the food drink and tobacco industry (NACE 41) as well as the production of pulp paper and board (NACE 471/472). It is, however, interesting to note that the average growth rates recorded in 1979 in all the above industries were higher than for the period 1976/1979 and that in certain sectors (textiles, mechanical and electrical engineering, motor vehicles, footwear, clothing and paper) they even exceeded those for the period 1971/1974.

Intra-community trade*: sustained upward trend

Trade between Member States remained buoyant, increasing by 30.6% as compared with the same month in 1979 to 17 000 million ECU (on the basis of imports). The most marked increases in imports from other Community countries occurred in the United Kingdom (+53.5%) and Denmark (+41.4%), whereas Germany exhibited the lowest rate of increase, well below the average at +19.5%. The United Kingdom also achieved the greatest increase in exports within the Community (+61.0%), followed by Italy (+51.1%). France expanded its exports by only 19.9% and suffered the largest deficit on intra-Community trade at 368 million ECU (deficit for January 79: 191 million ECU). Germany and Italy substantially increased their surpluses, while the United Kingdom and the Netherlands achieved a slight improvement in their balances. The Danish and Irish trade balances deteriorated. Ireland, with a very substantial deficit (176 million ECU), also covered the lowest proportion of its imports by exports : 66 %.

Community external trade*: the January deficit already amounted to a quarter of that for the whole of the previous year

For the first time, the Community's imports did not exhibit a seasonal drop in January as compared with December, but increased slightly to 208 million ECU. The increase as compared with the corresponding month of the previous year was very marked (+42.8%). The sharpest rises occurred in Italy (+60.3%), the United Kingdom (+47.6%) and Germany (+45.1%). The increase in Danish imports was also spectacular (+18.8%).

Although exports were 20.9% higher than in January 1979 at 15 700 million ECU, the trade deficit was 5 100 million ECU, i.e. a quarter of the deficit for the whole of 1979 (January 1979: 1 600 million ECU). The German trade balance deteriorated sharply, and even became negative (-400 million ECU). The Italian deficit virtually quadrupled (to 1 300 million ECU). France and the United Kingdom doubled their deficits, while the Netherlands only slightly improved its trade balance with non-Community countries. The Irish deficit of 120 million ECU is a major cause for concern, as this country was able to cover only 43% of its imports by exports.

Consumer prices in March 1980

The consumer price index for the EC as a whole rose by 0.8% from February to March 1980.

The highest increases were recorded in Denmark (1.4%) in the United Kingdom (1.4%) and in France (1.2%). Moderate increases were reported from Italy (0.9%), the Netherlands (0.8%) and Germany (FR) (0.6%), whereas rises were rather low in Luxembourg (0.4%) and Belgium (0.2%).

A comparison of the increase during the first quarter 1980 with the corresponding period of 1979, shows the speeding up of inflation since the beginning of this year.

The rise over 12 months for EUR 9 attained 14.0%, but there is considerable difference between countries : for Germany and Benelux countries, it is about 6%, for France, Denmark and Ireland between 13 and 15%, and about 20% for the United Kingdom and Italy.

Finance: Reversal of exchange rate trends

The last two weeks of March and the first week of April were characterized by a complete reversal of the exchange rate and bullion price trends observed during the previous month. High interest rates in the United States (Prime Rates of about 20 %) made the US dollar a relatively attractive investment and turned funds away from gold, which fell below the \$500 an ounce mark, and from European currencies, particularly from the DM-mark. The latter was also notably weak, against other currencies, due to expectations of a continuing deficit in the German balance of payments.

* Excluding the BLEU, for which no figures were available.

Disoccupazione

Il numero dei disoccupati, espresso in dati corretti delle variazioni stagionali, è rimasto relativamente stabile nel primo trimestre del 1980. Nel mese di febbraio, la variazione più sensibile fra tutti i paesi membri è stata osservata nella Repubblica federale di Germania.

Indice della produzione industriale : persistono nel breve periodo i segni congiunturali di aumento della produzione industriale

L'indice destagionalizzato della produzione industriale della Comunità è sceso, nel gennaio 1980, a 119,2 (su base 1975=100), con una diminuzione dello 0,7% rispetto al mese precedente. Quest'evoluzione è dovuta soprattutto alla decisa flessione accusata nel corso del mese dall'indice della Repubblica federale di Germania e, in misura minore, ma pur sempre sensibile, dall'indice italiano. Se si considerano i vari raggruppamenti di prodotti, si osserva che la produzione delle industrie dei beni d'investimento della Comunità è diminuita decisamente (in dati destagionalizzati) nel mese di gennaio rispetto a dicembre, mentre le variazioni sono state più moderate nel settore dei beni intermedi e dei beni di consumo. Circa le tendenze dello sviluppo industriale a breve termine, i fatti indicano che per EUR 9 la crescita si è accelerata negli ultimi quattro mesi, smentendo così le previsioni, spesso rinnovate di recente, che annunciavano invece l'imminenza di una recessione congiunturale. Questo fenomeno è dovuto a vari fattori, di cui i principali, per la loro influenza sull'indice EUR 9, sono il dinamismo e l'inattesa ripresa della produzione industriale tedesca ed italiana nel quarto trimestre del 1979: questi movimenti hanno più che compensato l'influenza meno favorevole delle tendenze incerte della produzione in Francia, nel Regno Unito e in altri paesi della Comunità.

Se si spinge l'analisi a livello delle singole branche, è interessante confrontare le tendenze comunitarie della crescita media nel periodo 1971-74 e, rispettivamente, 1976-79. In quasi tutti i grandi settori, la crescita è stata sensibilmente più lenta in quest'ultimo periodo che non nei tre anni precedenti la recessione del 1975, con la sola eccezione delle costruzioni automobilistiche (NACE 35), in cui la crescita media è passata dallo 0,8% nel primo periodo al 3,8% nel secondo. Negli altri settori, invece, la crescita media è o divenuta negativa dopo il 1975, dopo essere stata positiva tra il 1971 e il 1974 — come si osserva per la costruzione di altri mezzi di trasporto (NACE 36) e l'industria tessile (NACE 43) — oppure, si è mantenuta intorno allo zero in entrambi i periodi, come nell'industria delle calzature (NACE 451/452) e dell'abbigliamento (NACE 453, 454, 456); oppure, caso ancora più frequente, è caduta a meno del 75% del tasso medio del periodo precedente la recessione, come nella produzione e prima trasformazione dei metalli (NACE 22), nell'industria chimica e delle fibre sintetiche (NACE 25/26), nella costruzione meccanica ed elettrica e nelle industrie connesse (NACE 31/36), nell'industria alimentare, delle bevande e dei tabacchi (NACE 31/36), nell'industria alimentare, delle bevande e dei tabacchi (NACE 41) e nella fabbricazione di pasta per carta, carta e cartone (NACE 471/472). È interessante tuttavia notare che nel 1979 si sono osservati in tutte le industrie suddette tassi medi superiori a quelli del periodo 1976/1979, e, in alcune branche, superiori perfino a quelli del periodo 1971/1974 (tessili, costruzioni meccaniche ed elettriche, veicoli automobili, calzature, abbigliamento e carta).

Commercio intracomunitario* : persistere della tendenza positiva

Il commercio tra gli Stati membri continua ad essere vivace: rispetto al mese corrispondente del 1979, gli scambi sono aumentati del 30,6%, raggiungendo il livello di 17,0 miliardi di ECU (dati valutati sulla base delle importazioni). La maggiore espansione negli acquisti dagli altri paesi della Comunità è stata registrata dal Regno Unito (+53,5%) e dalla Danimarca (+41,4%), mentre la Germania registra l'aumento più esiguo (+19,5%), nettamente inferiore a quello medio. Il Regno Unito ha registrato anche il più forte aumento delle esportazioni verso la Comunità (+61,0%), seguito dall'Italia (+51,1%). La Francia ha invece aumentato le sue vendite solo del 19,9%, registrando il maggior disavanzo nel commercio intracomunitario (-368 milioni di ECU, a fronte di -191 milioni di UCE nel gennaio 1979).

La Germania e l'Italia hanno aumentato in maniera sensibile il loro saldo attivo. Anche il Regno Unito e i Paesi Bassi hanno registrato un lieve miglioramento della loro bilancia degli scambi intracomunitari, mentre sono peggiorati il saldo della Danimarca e dell'Irlanda. Con un deficit di grande entità (-176 milioni di ECU) l'Irlanda accusa d'altra parte il più esiguo tasso di copertura delle importazioni, pari al 66% solamente.

Commercio estero della comunità* : in gennaio il deficit ha già raggiunto la quarta parte del deficit dell'intero anno precedente

Per la prima volta, la Comunità ha registrato tra dicembre e gennaio un lieve aumento delle importazioni (invece del solito regresso stagionale), che sono salite a 20,8 miliardi di ECU. L'aumento è molto rilevante (+42,8%) rispetto allo stesso mese dell'anno precedente: i maggiori aumenti sono registrati dall'Italia (+60,3%), dal Regno Unito (+47,6%) e dalla Germania (+45,1%); anche in Danimarca l'aumento delle importazioni è stato spettacolare (+18,8%).

Sebbene anche le esportazioni siano aumentate del 20,9% rispetto al gennaio del 1979, raggiungendo il livello di 15,7 miliardi di ECU, il disavanzo della bilancia commerciale è di 5,1 miliardi di ECU, pari a ben un quarto di quello dell'intero anno 1979 (gennaio 1979: -1,6 miliardi di ECU). Nettissimo il peggioramento della bilancia commerciale della Germania, divenuta negativa (-0,4 miliardi di ECU). Il deficit italiano si è quasi moltiplicato per quattro (-1,3 miliardi di ECU). D'altra parte, Francia e Regno Unito hanno raddoppiato il loro disavanzo, mentre i Paesi Bassi hanno aumentato solo leggermente il loro disavanzo commerciale con i paesi extracomunitari. La bilancia commerciale dell'Irlanda accusa un disavanzo, molto preoccupante, di 120 milioni di ECU: le esportazioni irlandesi hanno coperto soltanto il 43% delle importazioni di questo paese.

I prezzi al consumo nel marzo 1980

L'indice dei prezzi al consumo per il complesso della CE è salito dello 0,8% tra febbraio e marzo del 1980.

I maggiori aumenti sono stati osservati in Danimarca (1,4%), nel Regno Unito (1,4%) e Francia (1,2%). Gli aumenti sono stati invece moderati in Italia (0,9%), nei Paesi Bassi (0,8%) e nella Repubblica federale di Germania (0,6%), mentre risultano relativamente bassi nel Lussemburgo (0,4%) e in Belgio (0,2%).

Un raffronto tra il tasso d'aumento dei prezzi nel primo trimestre del 1980 e quello del periodo corrispondente del 1979 indica un accelerarsi dell'inflazione dall'inizio di quest'anno.

Rapportato ad un periodo di 12 mesi, l'aumento raggiunge per EUR 9 un tasso globale del 14,0%, che nasconde però notevoli variazioni da un paese all'altro: è del 6% circa per la R.f. di Germania e i paesi del Benelux, va dal 13 al 15% per Francia, Danimarca e Irlanda, ed è del 20% circa nel Regno Unito e in Italia.

Finanze : capovolgimento delle tendenze sui tassi di cambio

Le ultime due settimane di marzo e la prima settimana di aprile hanno visto una completa inversione delle tendenze dei tassi di cambio e dei prezzi dell'oro osservate nel mese precedente. Tassi d'interesse elevati negli Stati Uniti (« prime rate » intorno al 20%) hanno trasformato il dollaro US in un investimento relativamente allettante, che ha attratto fondi sia dal mercato dell'oro, sceso al di sotto del limite di \$ US 500 l'oncia, sia dal mercato delle valute europee, in particolare del marco tedesco. Il marco è stato particolarmente debole rispetto alle altre valute, date le prospettive di persistenza del disavanzo della bilancia tedesca dei pagamenti.

* Senza l'UEBL, i cui dati non sono disponibili.

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturrelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlige, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelseres definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

PREFACE

EN

This bulletin is in two parts: 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

AVVERTENZA

IT

Il presente bollettino consta di 2 parti: l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso, e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa.

Abonnementet er årligt og løber fra 1. januar til 31. december hvert år.

The annual subscription runs from 1 January to 31 December of each year.

Gli abbonamenti sono annuali e il loro periodo di validità va dal 1° gennaio al 31 dicembre di ciascun anno.

Betaling kan kun ske til agenturerne i landene nævnt på omslagets side 3.

Payments to be made only to the agents in the countries listed on page 3 of the cover.

I versamenti devono essere indirizzati agli uffici di vendita indicati a pag. 3 della copertina

Priserne dækker forsendelse ad land- eller søvej; agenturerne giver oplysning om priserne for luftforsendelse.

These are surface mail rates; for air subscription rates please apply to the agents.

I prezzi non comprendono le spese di spedizione per posta aerea; per le condizioni di abbonamento in caso di spedizione per posta aerea, si consultino gli uffici di vendita.
