Manuskript afsluttet den 28. juli 1980

Manuscript completed 28 July 1980

Manoscritto terminato il 28 luglio 1980

Arbejdsløshed : Konstant stigning siden årets begyndelse

Ved udgangen af juni 1980 var antallet af arbejdsløse steget i Det europæiske Fællesskab både målt i bruttotal og i sæsonkorrigerede tal. Målt i sæsonkorrigerede tal er der tale om en konstant stigning i antallet af arbejdsløse siden årets begyndelse, men stigningen har været stærkest fra marts måned. Tendensen har i den seneste tid været mest ugunstig i Nederlandene og Det forenede Kongerige, hvor arbejdsløsheden steg kraftigst i juni måned.

En sammenligning med juni 1979 bekræfter denne forværrede situation på arbejdsmarkedet både for Fællesskabet som helhed og for de fleste medlemsstater. Arbejdsløshedsprocenten for hele Fællesskabet steg fra 5,2% i slutningen af juni 1979 til 5,7% i slutningen af juni 1980. De tilsvarende tal for de enkelte medlemsstater er følgende : Det forenede Kongerige : 5,2%—6,4%, Irland : 7,7%—8,5%, Danmark : 4,4%—5,1%, Belgien : 7,9%—8,4%, Nederlandene : 3,9%—4,4%, Italien : 7,5%—7,9%; Frankrig : 5,6%—5,9% og Luxembourg : 0,5%—0,6%. Kun Forbundsrepublikken Tyskland havde en uændret arbejdsløshedsprocent på 3,0%.

Endelig gøres opmærksom på, at ved udgangen af april 1980 var mere end en tredjedel af de arbejdsløse i Fællesskabet under 25 år (37,6%). Arbejdsløsheden blandt unge under 25 år var særlig høj i Italien (45,5%), Luxembourg (43,0%), Nederlandene (40,4%) og Frankrig (39,4%). Denne andel blev i visse medlemsstater væsentligt forøget efter skoleårets slutning.

INDEKSET FOR INDUSTRIPRODUKTIONEN**Nyt bevis på den aftagende vækst i industriproduktionen inden for Fællesskabet**

EUROSTAT skønner, at det sæsonkorrigerede indeks for industriproduktionen i Det europæiske Fællesskab i april 1980 nåede 120,1 (1975=100), hvilket er et fald på 0,4% i forhold til den foregående måned. De månedlige udsving i det sæsonkorrigerede indeks på -0,6% (januar), -0,1% (februar) og +0,6% (marts) er et udtryk for, at industriproduktionen i Fællesskabet stort set har været uændret siden årets begyndelse. Der er i vækstraten på kort sigt i indekset for EUR 9 sket en regelmæssig og markant nedgang i løbet af de sidste måneder, og i april måned nåede vækstraten ned på nul.

Hvis man analyserer årsagerne til denne nedgang ud fra væksttendenserne inden for investeringsgodeindustrien, mellemproduktindustrien og forbrugsgodeindustrien, fremgår det, at der skete en mærkbar nedgang i ekspansionen for disse tre produktionsgrupper i løbet af de sidste tre måneder. For eksempel inden for mellemproduktindustrien er vækstraten på kort sigt faldet gradvis om end uregelmæssigt siden september 1979 og var negativ i april måned. Inden for investeringsgodeindustrien holdt væksten på kort sigt sig på et relativt højt niveau i vintermånederne, men aftog herefter, mens der i væksten inden for forbrugsgodeindustrien skete en temmelig brat nedgang i april efter en rimelig stabil udvikling i løbet af de foregående fem måneder.

Med hensyn til væksttendenserne i industriproduktionen i medlemsstaterne viser de allerseneste tal, at vækstraten på kort sigt gik op i Italien, aftog men forblev positiv i Frankrig, Nederlandene, Belgien og Luxembourg, holdt sig på et lavt niveau i Tyskland og i Danmark og aftog yderligere i Det forenede Kongerige, det eneste medlemsland, hvor tendenserne i alle de vigtigste produktionsgrupper udvikler sig i ugunstig retning.

Energi : Analyse af udviklingen i første kvartal 1980

I forhold til den tilsvarende periode i 1979 skete der en brat nedgang i efterspørgslen efter både olie og naturgas i de fleste medlemslande. Handelen med olieprodukter inden for Fællesskabet gik ned med 9,3% for Fællesskabet som helhed.

Denne generelle nedgang skyldes hovedsagelig den milde vinter, den økonomiske stagnation, prisstigningerne og den generelle tendens til at begrænse anvendelsen af olieprodukter.

Dette har medført :

— for olien et kraftigt fald i nettoimporten på 5,8 millioner tons, der fremkommer ved en nedgang på 7,6 millioner tons råolie og en stigning på 1,8 millioner tons olieprodukter;

— for naturgassen en nedgang på 6,4% i Fællesskabets produktion, idet importen fra tredjelande fortsat er stigende.

Denne nedgang kan ligeledes spores i elektricitetsforbruget (-0,5% forhold til første kvartal 1979), og den har samme årsager som de ovenfor anførte.

Stål : Fald i ordretilgangen

Fællesskabets produktion af råstål i maj 1980 nåede for første gang siden slutningen af 1979 op på over 12 millioner tons, hvilket efter sæsonkorrektur var en stigning på 4,5% i forhold til den foregående måned. Ligesom i april 1980 skyldes denne stigning hovedsagelig genoptagelsen af produktionen i Det forenede Kongerige. Produktionstab for årets første fem måneder er således i forhold til 1979 kun på 2,7%.

Ordretilgangen i første kvartal var imidlertid mere end 10% lavere end i samme kvartal i 1979; især var der en mærkbar nedgang i ordrerne fra tredjelande (-17,9%, ordrer inden for Fællesskabet : -7,8%).

Fællesskabets samhandel med tredjelande* : Kraftig stigning, men voksende handelsunderskud

Fællesskabets import fra tredjelande steg meget kraftigt i løbet af de første fire måneder af 1980 sammenlignet med den samme periode i 1979 (+41,1%, nåede dermed op på 84,0 milliarder ECU). I samme periode kunne man ligeledes konstatere en bemærkelsesværdig stigning i eksporten. Stigningen på 23,9% (til 68,3 milliarder ECU) var dog betydelig lavere end den tilsvarende stigning i importen. Da importen i nogen tid har ligget betydeligt over eksporten, forværredes handelsbalancen endnu engang. I 1979 var underskuddet for perioden januar-april 4,4 milliarder ECU, men i år nåede det op på 15,7 milliarder ECU for januar-april. Hvis denne tendens fortsætter med samme stigningsstakt for hver måned, vil dette underskud (i løbende priser) allerede efter første halvår 1980 være større end for hele 1979. De lande, der især er tale om i denne forbindelse, er Frankrig, BLØU, hvis underskud er mere end tredoblet (skønsmæssigt anslået for BLØU), og Tyskland, hvis overskud på 3,0 milliarder ECU ændredes til et underskud på 0,2 milliarder ECU (se også række 080).

Samhandelen inden for Fællesskabet* : Fortsat stigning

Stigningen på 23,4% i samhandelen mellem medlemsstaterne (baseret på importen) i april måned i forhold til samme måned sidste år var kun lidt lavere end den gennemsnitlige vækst i de første fire måneder af dette år i forhold til samme periode i 1979 (+25,3%, 74,4 milliarder ECU). Som følge af den økonomiske afmatning faldt importstigningen til 17% i april for Det forenede Kongerige, hvor den før var på 30,5% for årets første måneder. Italien registrerede den største stigning i importen fra andre EF-lande, nemlig 40,1%. Nederlandene

* Uden BLØU, hvis tal for april 1980 ikke foreligger.

kunne derimod kun notere en stigning i importen på 17,5%. Hvad angår eksporten var det Det forenede Kongerige, som for de første fire måneder registrerede den største stigning med 48,6%. Irlands eksport steg meget kraftigt (+26,9%).

Takket være de gode resultater for eksporten og i særdeleshed for olieprodukterne kunne Det forenede Kongerige nedbringe sit handelsunderskud på 1,4 milliarder ECU (januar-april 1979) til 0,5 milliarder ECU for perioden januar-april 1980. Nederlandene og Tyskland kunne ligeledes registrere en betydelig bedring i handelsbalancen over for de andre medlemsstater, mens der skete en forringelse af de andre medlemsstaters balance (se også række 081).

Forbrugerpriserne :

Forbrugerprisindekset for EF steg med 0,7% fra maj til juni 1980. Dette betyder, at man for anden måned i træk kan konstatere en aftagende stigning (maj 0,8%, januar-april 1,5% i gennemsnit). De største stigninger blev registreret i Italien og Det forenede Kongerige (0,9%), mens stigningerne i Vesttyskland, Danmark og Benelux-landene var mere moderate.

Stigningen over 12 måneder for EUR 9 er på 14,6%. Den er på mellem 6 og 7% for Vesttyskland og Benelux-landene, mellem 13 og 14% for Frankrig og Danmark og mellem 20 og 21% for Irland, Italien og Det forenede Kongerige.

Unemployment:**A steady increase since the beginning of the year.**

The number of unemployed in the European Community rose at the end of June 1980, as expressed in both raw and seasonally-adjusted figures. According to these latest data, the number of unemployed has increased steadily since the beginning of the year, but at a faster rate since March. Currently the most adverse trends are to be found in the Netherlands and the United Kingdom, where the highest increases in unemployment were registered in June.

Compared with the corresponding month last year, the labour market situation was noticeably more difficult in the Community as a whole as well as in most Member States. The unemployment rate for the Community rose from 5.2% at end-June 1979 to 5.7% at end-June 1980. For the individual Member States the trends were as follows: United Kingdom, from 5.2% to 6.4%; Ireland, from 7.7% to 8.5%; Denmark, from 4.4% to 5.1%; Belgium, from 7.9% to 8.4%; Netherlands, from 3.9% to 4.4%; Italy, from 7.5% to 7.9%; France, from 5.6% to 5.9% and Luxembourg, from 0.5% to 0.6%. Only in F.R. of Germany did the unemployment rate remain unchanged, at 3.0%.

Over one third of all the unemployed in the Community at the end of April 1980 were under 25 years of age (37.6%). Unemployment among the under 25 year olds was especially notable in Italy (45.5%), Luxembourg (43.0%), the Netherlands (40.4%) and France (39.4%). Since then this proportion has increased considerably in some Member States with the ending of the school year.

INDEX OF INDUSTRIAL PRODUCTION**Further evidence of reduced industrial production growth in the Community**

The seasonally adjusted index of industrial production for the European Community is estimated by EUROSTAT to have reached the level of 120.1 (1975=100) in April 1980, a decrease of 0.4% over the figure recorded in the previous month. This follows monthly changes in the seasonally adjusted index of -0.6% (January), -0.1% (February) and +0.6% (March), and indicates that there has been little change in the level of industrial output in the Community since the beginning of the year. Reflecting this phenomenon, the short-term rate of growth of the EUR 9 index has fallen both steadily and sharply in recent months (see table 2), culminating in a zero rate of growth in April.

Analysing the causes of the above developments in terms of the growth trends in the Community's investment, intermediate and consumer goods industries, it is evident that over the last six months or so rates of expansion have slowed noticeably for all three aggregates. In the intermediate goods sector for example, the short-term rate of growth in output has fallen gradually if unevenly since September 1979, to register a negative rate in April. In the investment goods sector short-term growth was maintained at a relatively high rate over the winter months but has eased subsequently, whilst in the consumer goods industries growth dropped fairly sharply in April following a reasonably stable performance in the previous five months. Overall, then, there is a picture of moderating short-term growth rates in all the major product regroupments, with rates of change also varying quite significantly from one sector to another.

Turning to industrial production growth trends in the Member States, the latest data show that short-term growth rates increased in Italy, fell but remained positive in France, the Netherlands, Belgium and Luxembourg, remained at a low level in Germany and Denmark and weakened further in the United Kingdom, the one Community country in which trends in all the major product regroupments appeared to be moving in unfavourable directions.

Energy: Analysis of trend during 1st quarter 1980

Compared to the same period of 1979, demand for both petroleum and natural gas dipped in most Member States in the first quarter of 1980, Inland deliveries of petroleum products fell by 9.3% in the Community, and this slackening of demand was particularly noticeable in the gas oil and residual fuel oil markets. Consumption of natural gas in the first quarter of 1980 declined by 4.3%.

This lower demand is the result of a mild winter, weakening economic activity, the effect of rising prices and more generally the propensity to limit the use of petroleum products.

As a consequence of this:

— In the petroleum sector there has been a decrease of 5.8 million tonnes in the Communities' net imports in the first quarter of 1980; a decrease of 7.6 million tonnes was noted for crude oil with an increase of 1.8 million tonnes for petroleum products.

— For natural gas a decrease in Community production of 6.4% whilst imports from third party countries have continued to grow.

There has been a similar decline in electricity consumption (-0.5% compared with the 1st quarter of 1979) for the same reasons.

Steel: Drop in new orders

Community production of crude steel in May 1980 stood, for the first time since the end of 1979, at more than 12 million tonnes and was — after deseasonalisation — 4.5% higher than the level of the previous month. This rise is explained, as was April's, mainly by the resumption of production in the U.K. Thus, the loss of production for the first five months of the year, when compared with 1979 is no more than 2.7%.

New orders for the first quarter were, however, 10% down on the same quarter of 1979; orders from third countries in particular showing a marked fall-off (-17.9%; orders from the Community: -7.8%).

External trade*: sharp rise but with a growing deficit

Imports to the Community from third countries increased very sharply during the first four months of 1980 compared with the same period of 1979 (+41.1%, reaching 84 000 million ECU). An impressive increase in exports was also recorded for the same period; however, it remained well below that of imports at 23.9% (68 300 million ECU). The fact that imports have remained at a much higher level for some time has led to a further deterioration in the trade balance. In 1979, the deficit for the period January-April was -4 400 million ECU; this year, however, it reached -15 700 million ECU for the same period. If this tendency continues at the same monthly rate, the deficit will have exceeded (in current values) that of the entire year 1979 by the end of the first half of 1980. The countries most affected by this development are France, the BLEU, whose deficit has more than tripled (estimate for the BLEU) and Germany, whose surplus of 3 000 million ECU has been turned into a deficit of 200 million ECU (see also Series O80).

Intra-Community trade*: sustained growth

The increase in trade between Member States (based on imports) of 23.4% in April compared with the same month of the previous year was only slightly lower than the average increase the first four months of this year compared with the same period of 1979 (+25.3%, 74 000 million ECU). As a result of a downturn in the economy, the growth of imports to the United Kingdom fell to 17% in April, although

* Excluding the BLEU, for which the data for April 1980 are not available.

it was 30.5% for the first four months of the year. Italy recorded the highest increase in imports from the EC: 40.1%. The Netherlands, on the other hand, increased their imports by only 17.5%. The fastest increase in exports was recorded by the United Kingdom: 48.6% for the first four months. Ireland's exports increased very sharply (+26.9%).

Thanks to the positive results achieved in exports — especially exports of petroleum products — the United Kingdom made an impressive cut in her deficit from -1 400 million ECU (January-April 1979) to -500 million ECU for the period January-April 1980. The Netherlands and Germany also showed a definite improvement in their intra-Community trade balance, whereas the other Community countries suffered a deterioration in their balance (see also Series 081).

Consumer prices

The consumer price index for the EC as a whole rose by 0.7% from May to June 1980. This means that for the second month in succession a clear slowing down of the rate of increase can be observed (May 0.8%, January to April 1.5% on average). The greatest increases were recorded in Italy and the United Kingdom (both 0.9%), whereas increases in Germany (FR), Denmark and the Benelux countries were more moderate.

The rise over the last 12 months for EUR 9 was 14.6%; for Germany (FR) and de Benelux countries it was between 6 and 7%, for France and Denmark between 13 and 14% and for Ireland, Italy and the United Kingdom between 20 and 21%.

Disoccupazione : aumento continuo dall'inizio dell'anno

A fine giugno 1980 il numero dei disoccupati risultava aumentato nella Comunità europea, sia in dati grezzi, sia in dati corretti delle variazioni stagionali. In base a questi ultimi si osserva un aumento continuo del numero dei disoccupati dall'inizio dell'anno, più accentuato dal mese di marzo. Le tendenze recenti più sfavorevoli si manifestano nei Paesi Bassi e nel Regno Unito, dove si osservano in giugno i maggiori aumenti.

Un raffronto con i dati del giugno 1979 conferma che questi squilibri sul mercato del lavoro si manifestano sia per la Comunità nel suo insieme che per la maggior parte dei singoli Stati membri. Il tasso di disoccupazione per l'insieme della Comunità è passato dal 5,2% a fine giugno 1979 al 5,7% a fine giugno 1980. Per gli Stati membri considerati separatamente l'evoluzione è la seguente : dal 5,2% al 6,4% nel Regno Unito, dal 7,7% all'8,5% in Irlanda, dal 4,4% al 5,1% in Danimarca, dal 7,9% all'8,4% in Belgio, dal 3,9% al 4,4% nei Paesi Bassi, dal 7,5% al 7,9% in Italia, dal 5,6% al 5,9% in Francia e dallo 0,5% allo 0,6% nel Lussemburgo. Soltanto la Repubblica federale di Germania registra un tasso di disoccupazione invariato del 3,0%.

Osserviamo ancora che a fine aprile 1980 più di un terzo dei disoccupati della Comunità era di età inferiore a 25 anni (37,6%) e la quota dei giovani di età inferiore a 25 anni sul totale dei disoccupati risultava particolarmente elevata in Italia (45,5%), nel Lussemburgo (43,0%), nei Paesi Bassi (40,4%) e in Francia (39,4%). L'incidenza della disoccupazione giovanile si è notevolmente aggravata in taluni Stati membri in coincidenza della chiusura dell'anno scolastico.

INDICE DELLA PRODUZIONE INDUSTRIALE**Conferma di una tendenza alla flessione nello sviluppo della produzione industriale nella Comunità**

L'EUROSTAT stima che l'indice destagionalizzato della produzione industriale delle Comunità europea ha raggiunto nell'aprile 1980 il livello di 120,1 (1975 = 100), con una diminuzione dello 0,4% rispetto al mese precedente. Dopo le fluttuazioni mensili dell'indice destagionalizzato pari a -0,6% (gennaio), -0,1% (febbraio), e +0,6% (marzo), questa variazione indica che il livello della produzione industriale nella Comunità è rimasto praticamente invariato dall'inizio dell'anno. Rispecchiando questo fenomeno, il tasso di crescita a breve termine dell'indice EUR 9 ha subito una flessione regolare e netta nel corso degli ultimi mesi, per attestarsi infine sul tasso di crescita zero in aprile.

Se si analizzano le cause di questo regresso in termini di tendenza della crescita nei settori dei beni d'investimento, dei beni intermedi e dei beni di consumo, si osserva che nel corso degli ultimi 6 mesi circa, i tassi d'espansione si sono sensibilmente ridotti per i tre aggregati. Nel settore dei beni intermedi, per esempio, i tassi di crescita a breve termine della produzione è gradatamente, benché irregolarmente, diminuito dal settembre 1979 fino a raggiungere un tasso negativo in aprile. Nel settore dei beni d'investimento la crescita a breve termine si è mantenuta ad un tasso relativamente elevato nei mesi invernali indebolendosi successivamente, mentre nel settore dei beni di consumo la crescita ha subito una flessione abbastanza brusca in aprile dopo un comportamento ragionevolmente stabile durante i 5 mesi precedenti.

Quanto alle tendenze della crescita della produzione industriale negli Stati membri considerati singolarmente, i dati più recenti indicano che i tassi di crescita a breve termine sono aumentati in Italia, si sono indeboliti pur rimanendo positivi in Francia, nei Paesi Bassi, in Belgio e nel Lussemburgo, si sono mantenuti ad un livello basso in Germania e in Danimarca e sono ulteriormente peggiorati nel Regno Unito, unico paese della Comunità in cui le tendenze hanno un andamento sfavorevole per tutti i raggruppamenti principali di prodotti.

Energia : Analisi dell'evoluzione nel 1° trimestre 1980

Rispetto al periodo corrispondente del 1979, la domanda sia di gas naturale che di gas naturale ha accusato un netto rallentamento nella maggior parte dei paesi membri. Le consegne interne di prodotti petroliferi hanno denunciato una contrazione del 9,3% a livello comunitario.

Questa diminuzione generale è dovuta essenzialmente alla mitezza dell'inverno, al ristagno dell'attività economica, all'incidenza dell'aumento dei prezzi e, in generale, alla propensione a limitare l'impiego dei prodotti petroliferi.

Tali fatti hanno provocato :

- per il petrolio, un forte calo delle importazioni nette, pari a 5,8 milioni di tonnellate, quale risultato di una diminuzione di 7,6 milioni di tonnellate di petrolio greggio e di un aumento di 1,8 milioni di tonnellate di prodotti petroliferi;
- per il gas naturale, una diminuzione del 6,4% della produzione comunitaria, mentre le importazioni dai paesi hanno continuato ad aumentare. Per ragioni identiche questo rallentamento si può constatare anche per quanto riguarda il consumo di elettricità (-0,5% rispetto al 1° trimestre 1979).

Acciaio : Nuovi ordini in ribasso

La produzione comunitaria di acciaio grezzo di maggio 1980 si situa, per la prima volta dopo la fine del 1979, al di sopra dei 12 milioni di t. e supera — dopo la destagionalizzazione — del 4,5% il corrispondente livello del mese precedente. Questo incremento si spiega, come quello di aprile 1980, soprattutto con la ripresa della produzione nel Regno Unito; così la diminuzione di produzione dei primi 5 mesi dell'anno, in rapporto al 1979, non è maggiore del 2,7%.

Le nuove ordinazioni del primo trimestre del 1979; soprattutto le ordinazioni dai paesi terzi hanno accusato un ribasso sensibile (-17,9%; ordinazioni della Comunità : -7,8%).

Commercio estero della Comunità (*) : Forte crescita, ma con disavanzo in aumento

Le importazioni della Comunità dai paesi terzi sono cresciute in maniera molto sensibile nei primi quattro mesi del 1980 rispetto allo stesso periodo del 1979 (+41,1%), raggiungendo la cifra di 84,0 miliardi di ECU. Durante il medesimo periodo si è potuta constatare anche una crescita delle esportazioni, certamente impressionante (+23,9%), che le ha fatte salire a 68,3 miliardi di ECU, ma pur sempre sensibilmente inferiore a quella delle importazioni. Ne è derivato un ulteriore peggioramento della bilancia commerciale. Il disavanzo per il periodo gennaio-aprile era di 4,4 miliardi di ECU nel 1979, mentre quest'anno è stato di 15,7 miliardi di ECU. Se que sta tendenza dovesse continuare con lo stesso ritmo mensile, entro la fine del primo semestre 1980 il disavanzo avrà superato (in valori correnti) quello dell'intero anno 1979. I paesi più colpiti da questa dinamica sono la Francia e l'UEBL, il cui disavanzo è più che triplicato (per l'UEBL : dati stimati) e la Germania, il cui saldo positivo di 3,0 miliardi di ECU si è convertito nel disavanzo di 0,2 miliardi di ECU (cfr. anche serie O80).

Commercio intracomunitario (*) : Tendenza sostenuta

In aprile l'aumento degli scambi tra paesi membri (valutati sulla base delle importazioni) rispetto allo stesso mese dell'anno precedente risultava del 23,4%, dato solo leggermente inferiore alla crescita media dei primi quattro mesi di quest'anno rispetto al corrispondente periodo del 1979 (+25,3% : 74,4 miliardi di ECU). In conseguenza di una flessione della congiuntura, la crescita delle importazioni del Regno Unito in aprile è caduta al 17%, mentre era del 30,5% per i primi quattro mesi dell'anno. L'Italia ha registrato l'aumento massimo

(*) Senza l'UEBL, i cui dati per il mese d'aprile 1980 non sono disponibili

nelle importazioni in provenienza dalla CE: 40,1%. I Paesi Bassi, invece, hanno aumentato le loro importazioni solo del 17,5%. Per quanto riguarda le esportazioni, è stato il Regno Unito a registrare per i primi quattro mesi l'aumento più cospicuo con un tasso del 48,6%. Le esportazioni dell'Irlanda sono cresciute con un tasso fortissimo (+ 26,9%).

Grazie ai buoni risultati registrati per le esportazioni, e più particolarmente quelle di prodotti petroliferi, il Regno Unito ha potuto correggere sostanzialmente il disavanzo della sua bilancia portandolo da -1,4 miliardi di ECU (gennaio-aprile 1979) a -0,5 miliardi di ECU per il periodo gennaio-aprile 1980. Anche i Paesi Bassi e la Germania hanno registrato un sensibile miglioramento delle rispettive bilance commerciali intracomunitarie, mentre gli altri paesi della Comunità hanno denunciato un peggioramento (cfr. anche serie 081).

Prezzi al consumo

L'indice dei prezzi al consumo per la CE è aumentato dello 0,7% da maggio a giugno 1980. Questo significa che per il secondo mese consecutivo si può rilevare un rallentamento del tasso d'aumento dei prezzi (maggio 0,8% gennaio-aprile 1,5% in media). Gli aumenti più forti sono stati registrati in Italia e nel Regno Unito (0,9%), quelli più moderati nella Repubblica federale di Germania, in Danimarca e nei paesi del Benelux.

L'aumento sull'arco di 12 mesi per EUR 9 risulta del 14,6%. Esso si colloca tra il 6% e il 7% per la Repubblica federale di Germania e i paesi del Benelux, fra il 13% e il 14% per la Francia e la Danimarca e tra il 20% e il 21% per l'Irlanda, l'Italia e il Regno Unito.

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturrelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlige, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelsers definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

PREFACE

EN

This bulletin is in two parts: 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

AVVERTENZA

IT

Il presente bollettino consta di 2 parti: l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa.

Abonnementet er årligt og løber fra 1. januar til 31. december hvert år.

The annual subscription runs from 1. January to 31. December of each year.

Gli abbonamenti sono annuali e il loro periodo di validità va dal 1° gennaio al 31 dicembre di ciascun anno.

Betaling kan kun ske til agenturerne i landene nævnt på omslagets side 3.

Payments to be made only to the agents in the countries listed on page 3 of the cover.

I versamenti devono essere indirizzati agli uffici di vendita indicati a pag. 3 della copertina.

Priserne dækker forsendelse ad land- eller søvej; agenturerne giver oplysning om priserne for luftforsendelse.

These are surface mail rates; for air subscription rates please apply to the agents.

I prezzi non comprendono le spese di spedizione per posta aerea; per le condizioni di abbonamento in caso di spedizione per posta aerea, si consultino gli uffici di vendita.
