Manuskript afsluttet den 22. september 1980

Manuscript completed 22 September 1980

Manoscritto terminato il 22 settembre 1980

**Arbejdsløshed : fortsat stigning**

Mellem slutningen af juli 1980 og slutningen af august steg arbejdsløsheden i Fællesskabet med 3% i bruttotal og 1,9% i sæsonkorrigerede tal og ligger nu på hidtil højeste niveau med 6,8 Mio arbejdsløse. De sæsonkorrigerede tal stiger stadig i næsten alle medlemslande; stigningen skyldes således ikke udelukkende den sædvanlige stigning på denne tid af året bl.a. som følge af, at de unge, der går ud af skolen, kommer ud på arbejdsmarkedet.

Fra slutningen af juli til slutningen af august 1980 steg procenten af registrerede arbejdsløse i forhold til den erhvervsaktive befolkning i Fællesskabet fra 6,1 til 6,3. Sidste år i august var procenten 5,4.

I forhold til august 1979 steg arbejdsløsheden med 15,3% i Fællesskabet. Tendensen var den samme i samtlige medlemsstater. Situationen blev især alvorligere i Det forenede Kongerige (+37,5%), Danmark, Irland og Nederlandene (ca. +20%).

For første gang i år steg antallet af mandlige arbejdsløse kraftigere end antallet af kvindelige arbejdsløse. Derfor er kvindernes andel i det samlede antal arbejdsløse gået ned både i forhold til den foregående måned (fra 45,5% til 45,2%) og i forhold til sidste år (fra 46,2% til 45,2%). Men alligevel udgør kvinderne stadig over halvdelen af de registrerede arbejdsløse i fire lande: Belgien 61,9%, Luxembourg 57,2%, Forbundsrepublikken Tyskland og Frankrig 55%.

**Indekset industriproduktionen : Brat fald i vækstindekset for industriproduktionen i andet kvartal af 1980.**

Indekset for industriproduktionen i Fællesskabet nåede 118,6 (1975 = 100) i juni 1980, hvilket er ensbetydende med en stigning på 0,7% i forhold til de i maj registrerede tal. Mere betydningsfuldt er det, at væksten på kort sigt for tredje måned i træk har været lig med eller mindre end nul, hvilket beviser, at industriproduktionen er i aftagende. Hvis man undersøger dette forhold på baggrund af udviklingen i de tre hovedkategorier af produktionsgrupper, fremgår det tydeligt, at væksten på kort sigt i mellemproduktindustrien i Fællesskabet efter de svage rater, der blev registreret i første kvartal, fortsat har været svagere i de sidste måneder, medens vækstraten i forbrugsgodeindustrien er aftaget kraftigt i de sidste to måneder. Denne aftagen følger efter den kraftige stigning, der blev registreret i denne sektor i første kvartal. Derimod har vækstraterne inden for investeringsgodeindustrien været meget ustabile siden årets begyndelse, og der blev registreret store variationer fra måned til måned. Årsagen hertil er for en stor del variationsgraden i produktionstendenserne i de fire store lande i Fællesskabet. I sidste kvartal var f.eks. de registrerede tal for denne sektor stabile og positive i Tyskland, de gik betydeligt op i Italien og var fortsat negative i Frankrig og Det forenede Kongerige, hvor tendensen i øvrigt blev betydeligt forværret.

Kort sagt er det klart, at tendensen er, at væksten i industriproduktionen på kort og lang sigt aftager i forskellig grad i næsten alle medlemsstaterne, hvilket naturligvis har betydelige konsekvenser for udviklingen i EUR 9-indekset.

**Samhandelen inden for Fællesskabet + : Betydeligt underskud i Italien og i Frankrig.**

Medens stigningen i samhandelen mellem medlemsstaterne (basis: import) i maj var kommet ned på 4,4% i forhold til den tilsvarende måned sidste år, registreredes der på ny i juni en kraftig stigning på 13,2%. Stigningen var imidlertid stadig klart under de 19,2%, der blev registreret i gennemsnit i de første seks måneder af dette år. Det samlede tal for samhandelen inden for Fællesskabet i denne periode var 110,4 Mrd ECU. Denne udvikling er karakteristisk ved de store britiske eksporttal, som især skyldes råolie (+35,1%) og ved udvidelsen af Italiens (+30,7%) og Frankrigs (+20,3%) import, der ligger over gennemsnittet. Italien, der så sent som sidste år havde en fortjeneste på 452 mio ECU, måtte således afslutte med en negativ saldo på 1 652 mio ECU. Med hensyn til Frankrigs underskud gik dette fra 446 til 1 546 mio ECU. Derimod har Det forenede Kongerige kunnet rette sin balance betydeligt op med 1,7 Mrd ECU, således at der nu kun er et lille underskud på 335 mio ECU. De øvrige medlemsstater har ligeledes forbedret deres stilling i samhandelen med fællesskabspartnerne, og endda undertiden ret betydeligt (se serie O81, s. 24).

**Fællesskabets samhandel med tredjelande + : Underskuddet i første halvår er allerede større end rekordunderskuddet sidste år**

Skønt stigningen i importen fra tredjelande aftog noget i værdi i maj (+22,0%) og juni (+24,8%) i sammenligning med samme måneder sidste år, skete der dog i Fællesskabet i de første seks måneder af året en foruroligende stigning på 34,8%, således at tallet kom op på 125,9 Mrd ECU. Derfor kunne den betydelige stigning i eksporten (+18,5% : 102,7 Mrd ECU) heller ikke forhindre en pludselig forringelse af handelsbalancen; medens der for samme periode sidste år registreredes et underskud på 6,8 Mrd var den negative saldo i år 23,3 Mrd ECU. Underskuddet for første halvår er således allerede større end underskuddet for hele sidste år, som endda blev anset som en rekord i Fællesskabets historie. Denne udvikling skyldes ikke blot den hastige forringelse af energibalancen, men også bl.a. den aftagende aktivitet inden for eksporten i maj og juni. Mes undtagelse af Irland, som det er lykkedes at stabilisere sit underskud, tog udviklingen en meget dårlig retning i alle medlemsstaterne. Således blev underskuddet i Frankrig og i Italien tredoblet, medens Tysklands negative saldo var på 0,3 Mrd i modsætning til landets positive saldo på 4,1 Mrd sidste år (Se serie O80, s. 24).

**Priserne**

Forbrugerprisindekset for hele EF steg med 1% mellem juni og juli 1980. Der blev registreret betydelige stigninger i Danmark (1,8%), Italien (1,7%), Frankrig (1,5%) og Belgien (1,2%), medens de var knapt så store i Det forenede Kongerige (0,8%) og Nederlandene (0,6%) og nærmest moderate i Luxembourg (0,4%) og Forbundsrepublikken Tyskland (0,2%). I De forenede Stater var forbrugerprisindekset uforandret mellem juni og juli. Stigningen over 12 måneder for EUR 9 er 13,7%. Blandt medlemslandene og over samme periode skelner man mellem to grupper, de lande, hvor stigningen er under 10% (Forbundsrepublikken Tyskland 5,5%), Luxembourg 6,4%, Belgien 7, Nederlandene 7,5%) og dem, hvor den er over 10% (Danmark 12,8%, Frankrig 13,7%, Det forenede Kongerige 16,9%, Italien 21,7%).

**Finanser : modstridende udvikling i rentesatsen**

I de sidste to måneder har der været forskellige tendenser i udviklingen af vekselkurserne.

Medens den nedadgående tendens i rentesatsen i De forenede Stater, som havde varet siden april, standsede og endog gik i modsat retning siden anden halvdel af august, fortsatte denne tendens i Tyskland og Belgien og støttedes af hensigtsmæssige pengepolitiske foranstaltninger fra centralbankernes side. Banque Centrale Belge nedsatte diskontoen fra 13% til 12% fra den 31. juli, og Bundesbank nedsatte satsen for de obligatoriske reserver, idet den kom på 10% den 1. september.

Også i Japan blev den officielle diskonto nedsat lidt (fra 8,25% til 8%) den 20. august.

Med hensyn til vekselkurserne skete der faktisk en styrkelse af Sterling, idet den effektive vekselkurs i begyndelsen af september nåede sit højeste niveau i fem og et halvt år.

## Unemployment: continued increase

Unemployment in the Community rose by 3% in raw figures and 1.9% in seasonally-adjusted figures between the end of July and the end of August 1980, thereby reaching a new peak of 6.8 million. As the seasonally-adjusted figures for almost all Member States also show a continued increase, this cannot be regarded simply as the usual rise for the time of year due primarily to the influx of school-leavers to the labour market.

Registered unemployed as a percentage of the civilian working population went up from 6.1% at the end of July to 6.3% at the end of August 1980, as compared with 5.4% in August 1979.

Unemployment in the Community showed a rise of 15.3% compared with its level at the end of August 1979. All Member States were affected by this trend. The deterioration in the unemployment situation was most marked in the United Kingdom (+37.5%) and in Denmark, Ireland and the Netherlands (each around +20%).

For the first time this year, the number of unemployed men rose more sharply than that of unemployed women. Because of this, unemployed women as a percentage of the total declined, compared with the previous month (from 45.5% to 45.2%) as well as compared with the corresponding month last year (from 46.2% to 45.2%).

Nevertheless, in August 1980, more than half of all unemployed persons were women in Belgium (61.9%), Luxembourg (57.2%) F.R. Germany and France (each 55%).

## Index of industrial production: Sharp fall in industrial production growth indices in the second quarter of 1980

The index of industrial production in the Community attained the level of 118.6 (1975 = 100) in June 1980, an increase of 0.7% over the figure recorded in May. More significantly, for the third consecutive month short-term growth has been at or below the zero mark, providing further evidence of the downturn in industrial production referred to above. Looking at this phenomenon in terms of developments in the three major product regroupments it is clear, first of all, that the short-term growth performance in the Community's intermediate goods industries has weakened further over the last few months following low rates in the first quarter, whilst in the consumer goods sector rates have turned sharply downwards in the last two months. This follows the strong growth performance in this regroupment in the first quarter. By contrast growth rates in the investment goods sector have been very erratic since the beginning of the year with large swings being registered on a month to month basis. This is largely explained by the significant degree of variation in production trends in the four largest Community countries: In the last quarter, for example, rates for this regroupment remained stable and positive in Germany, increased substantially in Italy, and remained negative in France and the United Kingdom, whilst worsening significantly in the latter country.

In summary, it is clear that both short and long-term industrial production growth trends have been weakening to varying degrees in nearly all Community countries, a development which has important implications for the evolution of the EUR 9 index.

## Intra-Community trade\*: a substantial deficit in Italy and France

Whilst the increase in trade between the Member States (on the basis of imports) fell back to 4.4% in May, compared with the same month in 1979, a sharper rise of 13.2% was again recorded in June. But this increase remained well below the average of 19.2% for the first six months of this year. The overall value of intra-Community trade for this period was 110 400 million ECU. This trend is characterized by the predominance of British exports mainly the increase in crude oil exports (+35.1%), and the above-average increase in imports to Italy (+30.7%) and France (+20.3%). Italy, which still had a surplus of 452 million ECU last year, thus had a negative balance of 1 652 million ECU, whereas France's deficit rose from 446 to 1 546 million ECU. The United Kingdom, on the other hand, achieved a marked improvement on its balance of 1 700 million ECU, and as a result, its deficit now amounts to only 335 million ECU. The other Member States also improved their positions in trade with their Community partners, with quite positive results in some cases (see series O81, P. 24).

## Community external trade\*: the deficit of the first six months already exceeding last year's record deficit

Although the growth in imports from third countries slowed down somewhat in value terms for May (+22.0%) and June (+24.8%) as compared with the corresponding months of last year, the total of 125 900 million ECU for the Community as a whole for the first six months of the year represented a disturbing increase of 34.8%. The substantial rise in exports (+18.5%: 102 700 million ECU) was therefore insufficient to prevent a sudden deterioration in the trade balance: whilst a deficit of 6 800 million ECU was recorded for the same period last year, the negative balance amounted to 23 300 million ECU this year.

The deficit for the first six months therefore already exceeds the deficit for the whole of last year, which was nevertheless considered a record in the Community's history. This development is due not only to the rapid deterioration in the energy balance but also, partly, to the declining rate of exports in May and June.

With the exception of Ireland, which managed to stabilize its deficit, the trend is very negative in all Member States. The deficits of France and Italy tripled, whereas Germany showed a negative balance of 300 million ECU compared with its positive balance of 4 100 million ECU last year (see series O80: p. 24).

## Prices

The consumer price index for the entire EC rose by 1% between June and July 1980. Substantial increases were recorded in Denmark (1.8%), Italy (1.7%), France (1.5%) and Belgium (1.2%), whereas increases were smaller in the United Kingdom (0.8%) and the Netherlands (0.6%), and quite moderate in Luxembourg (0.4%) and F.R. Germany (0.2%).

In the United States, the consumer price index remained unchanged between June and July.

The rise over 12 months for EUR 9 is 13.7%. For this period, the Member States can be generally divided into two groups: those with an increase of under 10% (F.R. Germany 5.5%, Luxembourg 6.4%, Belgium 7.3%, Netherlands 7.5%) and those with an increase of over 10% (Denmark 12.8%, France 13.7%, United Kingdom 16.9%, Italy 21.7%).

## Finance: contradictory tendencies in interest rates

The previous two months were characterised by mixed movements in interest rate trends.

Whereas in the United States the decline of interest rates, lasting since April, came to an end even, since the second half of August, reversed, the tendency for lower interest rates continued in Germany and Belgium, supported by relevant monetary policies of the central banks. The Belgian central bank lowered its discount rate from 13 to 12% with effect from 31. July, and the Bundesbank shifted downwards 1. September its minimum reserve requirements by 10%.

Also in Japan the official discount rate was slightly lowered (from 8 to 8.25%) on the 20. August.

On the exchange rate front, a notable feature was the strength of sterling, the effective exchange rate of which reached a five and a half year high in early september.

---

\* Excluding the BLEU, for which the figures for May and June are not available.

**Disoccupazione : Persistenza dell'aumento**

Tra fine luglio e fine agosto 1980 la disoccupazione nella Comunità è aumentata del 3% in dati grezzi e dell'1,9% in dati corretti delle variazioni stagionali, registrando un nuovo massimo di 6,8 milioni di persone disoccupate. I dati corretti delle variazioni stagionali continuano a salire in quasi tutti i paesi membri; l'aumento del numero dei disoccupati non può quindi essere imputato unicamente al fenomeno, abituale in questo periodo dell'anno, dei giovani che si presentano entrano sul mercato del lavoro alla fine dell'anno scolastico.

Dalla fine di luglio alla fine di agosto 1980 la percentuale dei disoccupati iscritti rispetto alla popolazione attiva civile è passata, per l'insieme della Comunità, dal 6,1% al 6,3%. Tale tasso era del 5,4% nell'agosto dell'anno scorso.

Rispetto al mese di agosto 1979, il numero dei disoccupati iscritti è aumentato del 15,3% per l'insieme della Comunità. Tale evoluzione è stata risentita in tutti gli Stati membri; la situazione si è particolarmente aggravata nel Regno Unito (+37,5%), in Danimarca, in Irlanda e nei Paesi Bassi (+20% circa).

Per la prima volta in quest'anno il numero dei disoccupati di sesso maschile è aumentato più rapidamente di quello relativo al sesso femminile.

Ne risulta una diminuzione della parte rappresentata dalle donne sul totale della disoccupazione, sia rispetto al mese precedente (dal 45,5 % al 45,2 %), che all'anno precedente (dal 46,2% al 45,2%). Cionondimeno in quattro paesi le donne disoccupate sono ancora più della metà dei disoccupati iscritti e precisamente : in Belgio 61,9%, in Lussemburgo 57,2%, nella R.F. di Germania e in Francia 55%.

**Indice della produzione industriale : brusca caduta degli indici di sviluppo della produzione industriale nel secondo trimestre del 1980.**

L'indice della produzione industriale della Comunità è stato di 118,6 (1975=100) nel giugno 1980, con un aumento dello 0,7% rispetto alla cifra registrata in maggio. Più significativo è il fatto che per il terzo mese consecutivo lo sviluppo nel breve termine è stato pari o inferiore a zero, il che prova la flessione della produzione industriale. Se si esamina il fenomeno considerando l'evoluzione delle tre principali categorie di prodotti, risulta evidente che, dopo i modesti tassi registrati nel corso del primo trimestre, lo sviluppo a breve termine delle industrie dei beni intermedi nella Comunità ha continuato ad indebolirsi durante gli ultimi mesi, mentre nel settore dei beni di consumo i tassi d'aumento hanno subito contemporaneamente una brusca flessione, che fa seguito al forte aumento registrato in questo settore durante il primo trimestre. Per contro, i tassi di sviluppo del settore dei beni d'investimento sono stati molto irregolari sin dall'inizio dell'anno : da un mese all'altro sono state registrate variazioni considerevoli. Ciò si spiega in gran parte con la variabilità delle tendenze della produzione nei quattro grandi paesi della Comunità. Nel corso dell'ultimo trimestre, per esempio, i tassi di sviluppo registrati per i beni d'investimento sono risultati stabili e positivi in Germania, sono aumentati sensibilmente in Italia e sono rimasti negativi in Francia e nel Regno Unito, dove d'altronde la tendenza si è aggravata sensibilmente.

Riepilogando, è chiaro che le tendenze all'aumento della produzione industriale, a breve e a lungo termine, di sono indebolite in diversa misura in quasi tutti gli Stati membri, il che esercita evidentemente un'influenza notevole sull'evoluzione dell'indice EUR 9.

**Commercio intracomunitario\* : disavanzo considerevole in Italia e in Francia.**

Mentre nel mese di maggio il tasso di sviluppo degli scambi commerciali tra gli Stati membri (base : importazioni), calcolato con riferimento allo stesso mese del 1979, era sceso al 4,4%, in giugno si registra di nuovo un aumento accelerato (13,2% su base annua). Tuttavia questo tasso di aumento rimane nettamente inferiore alla percentuale del 19,2% osservata in media nel corso dei primi sei mesi dell'anno. In complesso il commercio intracomunitario di questo periodo è ammontato a 110,4 miliardi di ECU. Quest'evoluzione è caratterizzata dalla predominanza delle esportazioni britanniche, dovuta soprattutto al petrolio grezzo (+35,1%), e dall'espansione superiore alla media delle importazioni dell'Italia (+30,7%) e della Francia (+20,3%). L'Italia, che denunciava ancora l'anno scorso un saldo attivo di 452 milioni di ECU, ha dovuto chiudere con un saldo passivo di 1 652 milioni di ECU. Il disavanzo della Francia è passato a sua volta da 446 a 1 546 milioni di ECU.

Per contro, il Regno Unito ha potuto migliorare di ben 1,7 miliardi di ECU la bilancia dei suoi scambi intracomunitari, così da accusare ormai solamente un modesto disavanzo di 335 milioni di ECU. Anche di 335 milioni di ECU. Anche i rimanenti Stati membri hanno migliorato, talvolta in misura non trascurabile, le loro posizioni negli scambi con i partner commerciali della Comunità (cf. serie 081, pag. 24).

**Commercio estero della Comunità\* : Il disavanzo del primo semestre supera già il record dell'anno scorso**

Nonostante che l'aumento delle importazioni in provenienza dai paesi terzi sia leggermente rallentato in valore per i mesi di maggio (+22,0%) e di giugno (+24,8%), rispetto ai mesi corrispondenti dell'anno scorso, nel complesso della Comunità le importazioni cumulate dei primi sei mesi dell'anno denunciano un aumento preoccupante del 34,8% su base annua, raggiungendo 125,9 miliardi di ECU. Di conseguenza l'aumento apprezzabile delle esportazioni (+18,5% : 102,7 miliardi di ECU) non è bastato ad impedire il repentino peggioramento della bilancia commerciale : mentre nello stesso periodo dell'anno scorso si registrava un disavanzo di 6,8 miliardi, il saldo passivo si eleva quest'anno già a 23,3 miliardi di ECU. Perciò il disavanzo del primo semestre supera già il disavanzo complessivo dell'anno scorso, che pur era considerato un record nella storia della Comunità. Quest'evoluzione è dovuta non soltanto al rapido peggioramento della bilancia energetica, ma anche, tra l'altro, alla dinamica declinante delle esportazioni in maggio e giugno.

Ad eccezione dell'Irlanda, che è riuscita a stabilizzare il suo disavanzo, l'evoluzione si è orientata negativamente in tutti gli Stati membri. Per esempio, il disavanzo della Francia e dell'Italia sono triplicati, mentre in Germania al saldo attivo di 4,1 miliardi dell'anno scorso si oppone il saldo passivo di 0,3 miliardi di quest'anno (cf. serie 0,80, pag. 24).

**Prezzi**

L'indice dei prezzi al consumo per l'insieme della Comunità europea è aumentato dell'1% tra giugno e luglio 1980.

Aumenti sensibilissimi sono stati registrati in Danimarca (1,8%), in Italia (1,7%), in Francia (1,5%) e in Belgio (1,2%), meno sensibili nel Regno Unito (0,8%) e nei Paesi Bassi (0,6%), alquanto modesti nel Lussemburgo (0,4%) e nella Repubblica federale di Germania (0,2%).

Negli Stati Uniti l'indice dei prezzi al consumo è rimasto invariato tra giugno e luglio.

L'aumento relativo a 12 mesi per EUR 9 è stato del 13,7%. Tra gli Stati membri e per il medesimo periodo si possono distinguere due gruppi : quello in cui l'aumento è inferiore al 10% (R.F. di Germania 5,5%, Lussemburgo 6,4%, Belgio 7,3%, Paesi Bassi 7,5%) e quello in cui è superiore a tale percentuale (Danimarca 12,8%, Francia 13,7%, Regno Unito 16,9%, Italia 21,7%).

**Finanze : evoluzioni contraddittorie dei saggi d'interesse**

I due ultimi mesi sono stati caratterizzati da movimenti vari nell'evoluzione di tassi di cambio.

Negli Stati Uniti, la tendenza al ribasso dei saggi d'interesse, che durava dal mese di aprile, è terminata e si è anzi invertita nella seconda metà di agosto, tale tendenza è invece continuata in Germania e in Belgio, sostenuta da misure ad hoc di politica monetaria prese dalle banche centrali. La Banca Centrale belga ha ridotto il suo saggio di sconto dal 13% al 12% a decorrere dal 31 luglio e la Bundesbank ha ridotto i tassi delle riserve obbligatorie portandoli al 10% il 1° settembre.

Anche in Giappone il saggio ufficiale di sconto è stato leggermente ridotto (dall'8,25% all'8%) il 20 agosto.

Sul fronte dei tassi di cambio, il fatto saliente è costituito dal rafforzamento della sterlina inglese, il cui tasso di cambio effettivo ha raggiunto all'inizio di settembre il livello più alto da cinque anni e mezzo a questa parte.

\* Senza l'UEBL, i cui dati per maggio e giugno non sono disponibili.

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturrelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlige, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelsers definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

## PREFACE

EN

This bulletin is in two parts : 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

## AVVERTENZA

IT

Il presente bollettino consta di 2 parti : l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa.

(1) Alcuni dati più dettagliati per branca sono riportati nel bollettino « Indicatori congiunturali dell'industria ».

(2) I dati contenuti in questa parte del bollettino rappresentano i risultati dell'indagine sulla congiuntura presso i capi di impresa delle Comunità. Alcuni dati più particolari figurano in « Economia europea ».

(3) Alcuni dati del commercio estero più dettagliati ed espressi in UCE sono riportati nel « Bollettino mensile del commercio estero ».

(4) Consumi finali delle famiglie.

Die deutsche Fassung dieses Bulletins wird am zweiten Dienstag jeden Monats in Druck gegeben.

La version française de ce bulletin est mise sous presse le second mardi de chaque mois.

De Nederlandse versie van dit bulletin gaat de tweede dinsdag van elke maand ter perse.

Abonnementet er årligt og løber fra 1. januar til 31. december hvert år.

The annual subscription runs from 1 January to 31 December of each year.

Gli abbonamenti sono annuali e il loro periodo di validità va dal 1° gennaio al 31 dicembre di ciascun anno.

Betaling kan kun ske til agenturerne i landene nævnt på omslagets side 3.

Payments to be made only to the agents in the countries listed on page 3 of the cover.

I versamenti devono essere indirizzati agli uffici di vendita indicati a pag. 3 della copertina

Priserne dækker forsendelse ad land- eller søvej; agenturerne giver oplysning om priserne for luftforsendelse.

These are surface mail rates; for air subscription rates please apply to the agents.

I prezzi non comprendono le spese di spedizione per posta aerea; per le condizioni di abbonamento in caso di spedizione per posta aerea, si consultino gli uffici di vendita.
