Manuskript afsluttet den 27. oktober 1980

Manuscript completed 27 October 1980

Manoscritto terminato il 27 ottobre 1980

Arbejdsløshed — over 7 millioner arbejdsløse

For første gang er antallet af arbejdsløse i Fællesskabet kommet op over 7 Mio. Stigningen på mere end 1 Mio i løbet af de sidste fire måneder tyder på en betydelig forværring af situationen på arbejdsmarkedet. Dette bekræftes af de sæsonkorrigerede tal, som også for første gang er kommet op over 7 Mio.

Ved udgangen af september 1980 svarede tallet 7,1 Mio registrerede arbejdsløse til en arbejdsløshedsprocent på 6,5%, dvs. 1% mere i forhold til samme måned i 1979.

Sammenlignet med august 1980 er arbejdsløsheden i Fællesskabet i sæsonkorrigerede tal steget med 2,2%.

Forværringen af situationen på arbejdsmarkedet fremgår meget klart, hvis man sammenligner tallene for september 1980 og for september 1979. For Fællesskabet som helhed er der 18,3% flere registrerede arbejdsløse. For de forskellige medlemsstaters vedkommende er tallene som følger : + 46,2% i Det forenede Kongerige, + 37,9% i Danmark, + 27,8% i Irland, + 26,6% i Nederlandene, + 12,0% i Belgien, + 11,6% i Forbundsrepublikken Tyskland, + 6,7% i Frankrig, + 6,2% i Italien og + 5,6% i Luxembourg.

Indekset for industriproduktionen : Tendensen til stigning i industriproduktionen på kort og lang sigt er uforandret.

Efter EUROSTAT's vurderinger fremgår det af de foreliggende oplysninger for juli, at tendensen til stigning i industriproduktionen på kort og lang sigt i Det europæiske Fællesskab ikke er ændret. Medens det sæsonkorrigerede EUR 9-indeks for industriproduktionen steg lidt i juli og nåede op på et skønsmæssigt anslået niveau af 118,8 (1975 = 100) var vækstraterne på kort sigt stadig negative for fjerde måned i træk. Der er registreret lignende vækstrater i denne periode for Fællesskabets mellemproduktindustri og forbrugsgodeindustri, idet dog disse to industrier viser lidt svagere rater, mens resultaterne i investeringsgodesektoren har været langt mere uregelmæssige. Denne uregelmæssighed skyldes for en stor del de store variationer i de produktionstendenser, der er registreret for denne sektor i de fire store fællesskabslande.

Energi : analyse af udviklingen i løbet af første halvår 1980

Som følge af den industrielle afmatning og den større forståelse hos forbrugerne (virksomheder og husholdninger) for at moderere deres forbrug, især i forbindelse med opvarmning, skete der i første halvår af 1980 en klar nedgang i efterspørgslen efter energi, hvilket lader formode, at Fællesskabets forbrug for 1980 vil ligge meget tæt på forbruget i 1979.

Denne efterspørgselsnedgang har man kunnet registrere både i det totale forbrug af olieprodukter (8%) og i forbruget af naturgas (4%) og elektricitet (0,1%). Kun efterspørgslen efter brændstof (+ 2%) følger den hidtidige stigende tendens. Imidlertid er der som følge af bestræbelserne for at fremme anvendelsen af kulprodukter sket en stigning i kulleverancerne især til el-værkerne (12%), som i stigende grad har anvendt kul både til forbrug (3%) og til opbygning af lagre.

Dette betyder:

- for olie, en kraftig nedgang i nettoimporten på henvend 16 Mio tons,
- for naturgas, en nedgang på 7% i Fællesskabets produktion, som delvis er opvejet af en mærkbar stigning i importen,
- for kul, en stigning på 3,4% i Fællesskabets produktion (hovedsagelig i Det forenede Kongerige) og en meget kraftig stigning (40%) i importen fra tredjelande; den samlede stigning på disse områder svarer til en besparelse på 10 Mio tons olie.

Hvad angår oliepriserne er det sikkert, at det træge oliemarked medvirker til at bremse inflationen, så længe et begrænset udbud af olie ikke vil forstyrre den nuværende ligevegt på markedet.

Samhandelen inden for fællesskabet : fortsat nedgang*

Stigningstakten i samhandelen inden for Fællesskabet (26,2%) fra første kvartal af 1980 (basis : import) kunne ikke fastholdes i månederne derefter. Stigningen i april var endnu på 23,4% sammenlignet med april 1979, men i maj var den ikke mere end 4,4% og steg så igen til 13,2% i juni. Denne stigning stabiliserede sig på samme procentsats i juli, hvorved stigningen for de første syv måneder kom ned på 18,3% sammenlignet med samme periode i 1979. Samhandelen mellem medlemsstaterne beløb sig til 128,8 Mrd ECU i løbende priser.

Med hensyn til forskellen i udviklingen i de forskellige medlemslandes handel bemærker man først og fremmest Italiens vældige import og Det forenede Kongerige, meget store eksport. I juli steg Italiens import med 53,1%, medens stigningen fra januar til juni var 30,7%. Men da Italiens eksport kun steg 10,8%, fik landet et rekordunderskud på 748 Mio ECU (se række 081).

Det forenede Kongerige, Danmark, Nederlandene, Irland og Tyskland havde en kraftig stigning i deres eksport fra begyndelsen af 1980. For Det forenede Kongeriges og Nederlandenes vedkommende skyldes dette opsving salget af olie og olieprodukter; store salg af kapitalgoder er årsag til, at Tysklands og Danmarks eksport er steget.

I Frankrig har den stigende efterspørgsel efter forbrugsgoder og kapitalgoder fra Tyskland haft til følge, at Frankrigs underskud over for Forbundsrepublikken Tyskland er øget med 1,6 Mrd ECU.

Fællesskabets samhandel med tredjelande : stigning i importen

Sidste års olieprisstigninger og stigningerne i begyndelsen af indeværende år fik visse følger for importen fra tredjelande i løbet af de første syv måneder af 1980. Dette havde en kraftig indvirkning på fællesskabslandenes handelsbalance, idet man her kunne registrere et rekordunderskud.

Målt i løbende priser steg EF's import med 33% til 146,9 Mrd ECU, mens denne stigning i juli udgjorde 23,4%.

Frankrig og Italien tegnede sig for de største stigninger med henholdsvis 43,4% og 35,7%. Selv Det forenede Kongerige, som efterhånden får større og større ligevægt på oliebalancen, forøgede sin import fra tredjelande med 29,4%. Det var først og fremmest et spørgsmål om at få dækket det stigende behov til motorkøretøjer og halvfabrikata i løbet af årets første måneder. Der bemærkes imidlertid en aftagende stigning i Det forenede Kongeriges import fra tredjelande; importen var således 14% i juni og 12% i juli. Hvis den positive tendens i eksporten varer ved, vil den gunstige udvikling i handelsbalancen, som indledtes i juli, måske fortsætte.

Ligesom for importens vedkommende var stigningen i Fællesskabets eksport (15,1% i juli) mindre end den gennemsnitlige stigning for de foregående måneder (18,5%). I alt steg eksporten med 18% til 120,7 Mrd ECU i løbet af årets første syv måneder.

I Italien (21,9%), Irland (21,8%) og Det forenede Kongerige (21%) registreredes en meget kraftig stigning. Selv om underskuddet for juli måned (2,9 Mrd ECU) var det mindste i 1980 (jf. række 080) nåede det samlede underskud siden årets begyndelse op på 26,2 Mrd ECU. Da BLØU's underskud sandsynligvis beløber sig til 3 Mrd ECU, vil Fællesskabets underskud på samhandelen med tredjelande kunne anslås til 29 Mrd ECU. Hvis underskuddet på handelsbalancen fortsætter, selv med aftagende hastighed i de kommende måneder, må man ved årets slutning regne med et underskud, der er dobbelt så stort som i 1979.

Forbrugerpriserne i august 1980

Forbrugerprisindekset for hele EF steg med 0,6% mellem juli og august 1980.

I august måned registreredes en aftagende stigning i indekset for alle EF-lande. Denne nedgang var størst i Frankrig, 1% i august mod 1,5% i juli, Italien 0,9% mod 1,7%, Belgien 0,2% mod 1,2%, Det forenede Kongerige 0,3% mod 0,8% og især Danmark 0,4% mod 1,8%.

I Det forenede Stater steg indekset for august med 0,7%, mens det ikke steg i perioden fra juni til juli, hvilket man ikke har oplevet inden for de seneste 13 år.

Penge og finanser : mange diskontoændringer

Forskellen mellem de vigtigste officielle europæiske diskontosatser og diskontoen i USA bliver stadig større.

Nederlandenes Centralbank nedsatte diskontoen fra 9% til 8,5% (den 22. september) og Danmarks Nationalbanks ny diskontosats (fra 19. september) er 12%, dvs. lavere end den tidligere, som var 13%, mens De forenede Staters Federal Reserve Board hævede sin officielle diskonto med 1% fra 10% til 11% (den 26. september).

Italiens Centralbank, som for nylig traf en lang række valutakontrolforanstaltninger, hævede endvidere sin diskonto fra 15 til 16,5% den 29. september med henblik på at beskytte liren over for de andre valutaer.

* Uden BLØU, da tallene for juni og juli endnu ikke foreligger.

Unemployment - over 7 million unemployed

For the first time the number of unemployed in the Community has passed the 7 million mark. As the seasonally corrected figure also exceeds this level for the first time, the increase of over 1 million in the last four months indicates a substantial worsening of the labour market situation.

At the end of September 1980 the figure of 7.1 million registered unemployed was equivalent to an unemployment rate of 6.5%, i.e. an increase of 1% compared with the corresponding month of 1979. Compared with August 1980, the seasonally corrected figures show an increase of 2.2% in unemployment in the Community.

The worsening of the labour market situation is shown very clearly by a comparison of the September 1980 figures with those for September 1979. For the Community as a whole the number of registered unemployed is up by 18.3%. The figures for each of the Member States are as follows: United Kingdom +46.2%, Denmark +37.9%, Ireland +27.8%, the Netherlands +26.6%, Belgium +12.0%, the FR of Germany +11.6%, France +6.7%, Italy +6.2% and Luxembourg +5.6%.

Index of industrial production: No change in either the short or long term outlook for industrial production growth

According to EUROSTAT estimates, the data available for the month of July suggest that there has been no change in either the short- or long-term industrial production growth outlook in the European Community. Thus, while the seasonally adjusted EUR-9 index of industrial production grew marginally during the month of July to reach an estimated level of 118.8 (1975=100), for the fourth consecutive month short-term growth rates remained negative. Similar growth developments occurred in the Community's intermediate and consumer goods industries during this period, with the former regroupment showing slightly weaker trends, whilst in the investment goods sector results have been much more erratic. This is largely due to wide variations in production trends in this regroupment in the four largest Community countries.

Energy: Analysis of trends in the first half of 1980

As a result of the downturn in industrial activity and a greater awareness on the part of users (industrial and domestic) of the need to moderate their consumption, especially for heating purposes, energy demand in the first half of 1980 showed a marked fall-off, indicating that the level of Community consumption will be very similar in 1980 to what it was in 1979.

This decline is apparent in both total deliveries of petroleum products (-8%) and consumption of natural gas (-4%) and electricity (-0.1%). Only fuel demand (+2%) continues to follow its natural progression. However, as a result of the efforts to favour the use of coal products, hard coal deliveries went up, particularly to power stations (+12%), which used more coal both for consumption (+3%) and for building up stocks.

The trends outlined above had the following consequences:

- for petroleum, a substantial drop of almost 16 million tonnes in net imports;
- for natural gas, a fall of 7% in Community production, partially offset by an appreciable increase in imports;
- for coal, a rise of 3.4% in Community production (mainly in the United Kingdom) and a substantial leap (+40%) in imports from non-member countries, these two increases together representing a saving of 10 million tonnes of petroleum.

As regards petroleum prices, the depressed market will certainly help to curb inflationary tendencies, provided a reduction in supply does not upset the present balance.

Intra-Community trade: continued decline (in growth) (*)

The rate of growth in intra-Community trade (26.2%) during the first quarter of 1980 (on the basis of imports) could not be maintained in the following months. In April the increase was still 23.4% compared with April 1979, but in May it fell to only 4.4%, rising again to 13.2% in June. It remained steady at this level in July, bringing the rise in the first seven months of the year to 18.3% compared with the same period of 1979. Trade between Member States was worth 128.8 thousand million ECU at current prices.

The main feature of the differing trends in each Member State's trade are the very high figures for Italy's imports and the United Kingdom's exports. In July Italy's imports went up by 53.1%, compared with an increase of 30.7% over the period from January to June. However, as its exports went up by only 10.8%, Italy had a record deficit of 748 million ECU (see Series O81).

The United Kingdom, Denmark, the Netherlands, Ireland and Germany recorded a substantial increase in exports from the beginning of 1980. In the case of the United Kingdom and the Netherlands this was due to sales of petroleum and petroleum products, while the increase in Germany's and Denmark's exports was due to substantial sales of capital goods.

In France the increased demand for consumer and capital goods from Germany led to a rise of 1.6 thousand million ECU in its deficit *vis-à-vis* that country.

Community external trade: imports on the increase (*)

The oil price increases last year and at the beginning of this year had repercussions on the value of imports from non-member countries during the first seven months of 1980. This considerably affected the Community countries' trade balance, which showed a record deficit.

Community imports went up by 33% at current prices to 146.9 thousand million ECU, with a rise of 23.4% in July. France (+43.4%) and Italy (+35.7%) recorded the highest rates of increase. Even the United Kingdom, which is stabilizing its oil balance better and better, increased its purchases from non-member countries by 29.4%, mainly in response to a greater demand for vehicles and semi-finished products during the first few months of the year. However, the rate of increase in the United Kingdom's purchases from non-member countries is showing signs of slowing down: it stood at 14% in June and 12% in July. If the positive trend in exports continues, the improvement in the trade balance, which began in July, could be maintained.

As with imports, the increase in Community exports (+15.1% in July) remained below the average for the preceding months (+18.5%). Total exports went up by 18% to 120.7 thousand million ECU in the first seven months of the year. Italy (+21.9%), Ireland (+21.8%), and the United Kingdom (+21%) recorded substantial increases.

Despite the fact that the July deficit (-2.9 thousand million ECU) was the lowest in 1980 (see Series O80), the overall deficit since the beginning of the year amounted to 26.2 thousand million ECU. Since the BLEU's deficit will probably be around 3 thousand million ECU, the Nine's deficit with non-member countries can be estimated at 29 thousand million ECU. If this negative trade balance continues in the next few months, even at a lower rate, the deficit at the end of the year can be expected to be twice as high as in 1979.

Consumer prices in august 1980

The consumer price index for the EC as a whole rose by 0.6% from July to August 1980.

In August the rate of increase in the price index slowed in all EC countries: most noticeably in France where it was 1% as against 1.5% in July, Italy 0.9% as against 1.7%, Belgium 0.2% compared with 1.2%, the United Kingdom 0.3% compared with 0.8% and particularly in Denmark 0.4% as against 1.8%.

In the United States, the index rose 0.7% in August after showing no growth between June and July, the first time this has happened for 13 years.

Finance: frequent changes of discount rates

The gaps between major official rates and the US-discount rate continues to widen. The Central Bank of the Netherlands lowered its discount rate from 9 to 8.5% (22 Sept.) and the Danish Central Bank set its new rate at 12%, down from a previous level of 13% (19 Sept.) whereas the Federal Reserve Board of the United States increased by 1% (from 10 to 11%) its official discount rate (26 Sept.). On the other hand it should also be noted that the Bank of Italy, which recently set up an important package of exchange rate controls raised its rate from 15 to 16.5% on 29 September, with the aim of protecting the external value of the Lira.

(*) Excluding the BLEU, for which the June and July figures are not available.

Disoccupazione : più di 7 milioni di disoccupati

Per la prima volta il numero dei disoccupati nella Comunità ha superato i 7 milioni. L'aumento di oltre un milione, negli ultimi quattro mesi, indica un notevole peggioramento della situazione del mercato del lavoro. Quest'andamento è confermato dai dati destagionalizzati, che per la prima volta superano anch'essi la soglia dei 7 milioni.

La cifra di 7,1 milioni di disoccupati iscritti, osservata a fine settembre 1980, corrisponde ad un tasso di disoccupazione del 6,5%, superiore cioè di oltre un punto rispetto alla situazione del settembre 1979.

Con riferimento all'agosto del 1980, sulla base dei dati destagionalizzati, la disoccupazione è salita nella Comunità del 2,2%.

Il confronto dei dati del settembre 1980 con quelli del settembre 1979 evidenzia molto chiaramente il peggioramento della situazione del mercato del lavoro : i disoccupati iscritti sono aumentati del 18,3% per la Comunità nel suo complesso; le cifre corrispondenti per i singoli Stati membri sono : +46,2% per il Regno Unito, +37,9% per la Danimarca, +27,8% per l'Irlanda, +26,6% per i Paesi Bassi, +12,0% per il Belgio, +11,6% per la Repubblica federale di Germania, +6,7% per la Francia, +6,2% per l'Italia e +5,6% per il Lussemburgo.

Indice della produzione industriale : le tendenze dello sviluppo della produzione industriale a breve e a lungo termine restano immutate

Secondo le stime dell'EUROSTAT, i dati disponibili per il mese di luglio indicano che le tendenze dello sviluppo della produzione industriale a breve e a lungo termine non si sono modificate nella Comunità europea. Pertanto, mentre l'indice EUR 9 destagionalizzato della produzione industriale è salito lievemente in luglio, per raggiungere un livello stimato di 118,8 (1975=100), i tassi di sviluppo a breve termine sono rimasti negativi per il quarto mese consecutivo. Tassi di sviluppo analoghi sono stati registrati, nello stesso periodo, per le industrie dei beni intermedi e tassi leggermente inferiori per quelle dei beni di consumo della Comunità, mentre nel settore dei beni d'investimento i risultati sono stati molto più irregolari. L'irregolarità è dovuta in gran parte alle forti variazioni delle tendenze produttive registrate in questo settore nei quattro maggiori paesi della Comunità.

Energia : analisi dell'evoluzione nel 1° semestre 1980

In seguito alla flessione dell'attività industriale ed alla maggiore sensibilità degli utenti (industriali e domestici) agli appelli alla moderazione dei consumi, particolarmente nelle applicazioni termiche, la domanda di energia accusa nel 1° semestre del 1980 un netto rallentamento, che lascia sperare che per l'intero anno il volume dei consumi risulti, nella Comunità, molto vicino a quello del 1979.

Tale rallentamento può essere osservato sia nelle forniture totali di prodotti petroliferi (-8%) che nel consumo di gas naturale (-4%) e di energia elettrica (-0,1%). Soltanto la domanda di carburanti segue ancora il suo naturale incremento (+2%). Peraltro, in seguito alle iniziative intraprese per privilegiare l'impiego dei prodotti carboniferi, le consegne di carbon fossile accusano un aumento, soprattutto per quanto riguarda le centrali elettriche (+12%), che hanno acquistato maggiori quantitativi di carbone destinandolo sia al consumo (+3%) che alla costituzione di scorte.

Questi fatti hanno come conseguenza :

- per il petrolio : una forte diminuzione delle importazioni nette, pari a quasi 16 milioni di tonnellate;
- per il gas naturale : una diminuzione del 7% della produzione comunitaria, compensata in parte da un sensibile aumento delle importazioni;
- per il carbon fossile : un aumento della produzione comunitaria, pari al 3,4% (essenzialmente nel Regno Unito), e un fortissimo incremento delle importazioni dai paesi terzi (+40%) : questi aumenti corrispondono, complessivamente, ad un risparmio di 10 milioni di tonnellate di petrolio.

Per quanto riguarda i prezzi del petrolio, è certo che la situazione di ristagno sul mercato petrolifero contribuisce a frenare le tendenze inflazionistiche, perlomeno fino a quando una contrazione dell'offerta non verrà a compromettere l'attuale equilibrio.

Commercio intracomunitario : peggioramento continuo (*)

Il rapido ritmo di espansione degli scambi intracomunitari osservato nel primo trimestre del 1980 (+26,2%, sulla base delle importazioni) non ha potuto essere mantenuto nei mesi successivi : l'aumento sul mese corrispondente del 1979, ancora del 23,4% in aprile, era sceso in maggio al 4,4%, per risalire al 13,2% in giugno e stabilizzarsi in luglio sullo stesso livello; in tal modo gli scambi intracomunitari dei primi sette mesi del 1980 si trovano a superare del 18,3% quelli dello stesso periodo del 1979, ammontando a 128,8 miliardi di ECU in valori correnti.

Se si esaminano le differenze nell'evoluzione dei singoli paesi membri, si nota anzitutto l'elevato livello delle importazioni dell'Italia e delle esportazioni del Regno Unito : in luglio le importazioni italiane sono aumentate del 53,1%, mentre per i mesi da gennaio a giugno l'aumento medio era stato del 30,7%. Poiché parallelamente le esportazioni italiane aumentavano solo del 10,8%, l'Italia ha raggiunto un disavanzo record di 748 milioni di ECU (vedi serie 081).

Il Regno Unito, la Danimarca, i Paesi Bassi, l'Irlanda e la Germania hanno registrato un forte aumento delle loro esportazioni dall'inizio del 1980. Per il Regno Unito ed i Paesi Bassi questa spinta è dovuta alle vendite di petrolio e di prodotti petroliferi, mentre alla base dello sviluppo delle esportazioni della Germania e della Danimarca stanno vendite molto cospicue di beni d'investimento.

In Francia la maggior domanda di beni di consumo e d'investimento di produzione tedesca ha comportato un aggravamento, pari a 1,6 miliardi di ECU, del disavanzo negli scambi con la Repubblica federale di Germania.

Commercio estero della comunità : importazioni crescenti

Gli aumenti del prezzo del petrolio, applicati l'anno scorso e all'inizio di quest'anno, hanno avuto ripercussioni sul valore delle importazioni dai paesi terzi nei primi sette mesi del 1980, influenzando pesantemente la bilancia commerciale dei paesi della Comunità, che ha così registrato un disavanzo record.

Le importazioni della CE sono aumentate, in valori correnti, del 33%, raggiungendo il livello di 146,9 miliardi di ECU; in luglio l'aumento era del 23,4%.

I tassi d'incremento più elevati sono stati registrati dalla Francia (+43,4%) e dall'Italia (+35,7%); d'altra parte lo stesso Regno Unito, che pur sta reaizzando un sempre miglior equilibrio della propria bilancia petrolifera, ha aumentato del 29,4% gli acquisti nei paesi terzi, soprattutto per soddisfare un'accresciuta domanda di veicoli e prodotti semi lavorati nei primi mesi dell'anno. Si osserva peraltro una tendenza al rallentamento del ritmo di sviluppo degli acquisti del Regno Unito nei paesi terzi, sceso al 14% in giugno e al 12% in luglio. A condizione che si mantenga la tendenza positiva delle esportazioni, potrebbe proseguire il miglioramento della bilancia commerciale avviato in luglio.

Come per le importazioni, lo sviluppo delle esportazioni della Comunità (+ 15,1% in luglio) è rimasto inferiore a quello della media dei mesi precedenti (+ 18,5%) : nel complesso le esportazioni sono aumentate del 18%, per raggiungere nei primi sette mesi dell'anno il livello di 120,7 miliardi di ECU. L'Italia (+ 21,9%), l'Irlanda (+ 21,8%) e il Regno Unito (+ 21%) hanno registrato un incremento notevolissimo. Sebbene il disavanzo del mese di luglio (- 2,9 miliardi di ECU) sia stato il più esiguo di tutto il 1980 (vedi serie O80), il deficit globale cumulato dall'inizio dell'anno arriva a 26,2 miliardi di ECU. Se vi si aggiunge il disavanzo probabile dell'UEBL, stimato a 3 miliardi di ECU, si può valutare a circa 29 miliardi di ECU il disavanzo della Comunità a Nove con i paesi terzi. In tal modo, se il saldo negativo della bilancia commerciale dovesse proseguire nei prossimi mesi, anche a cadenza ridotta, si arriverebbe a fine anno ad un disavanzo pari al doppio di quello del 1979.

I prezzi al consumo nell'agosto 1980

Tra luglio ed agosto del 1980 l'indice dei prezzi al consumo per il complesso della CE è aumentato dello 0,6%.

In agosto si nota un rallentamento dell'aumento dell'indice per tutti i paesi della CE. Tale rallentamento è più sensibile per la Francia (1% in agosto, contro 1,5% in luglio), l'Italia (0,9%, contro 1,7%), il Belgio (0,2%, contro 1,2%), il Regno Unito (0,3%, contro 0,8%) e, soprattutto, per la Danimarca (0,4%, contro 1,8%).

Negli Stati Uniti l'aumento dell'indice è, per il mese di agosto, dello 0,7%, dopo una situazione di immobilità tra giugno e luglio, che non si era più verificata da 13 anni a questa parte.

Finanze : numerose variazioni dei tassi di sconto

Continua ad approfondirsi lo scarto tra i principali tassi ufficiali europei e il tasso di sconto degli USA.

Le banche centrali dei Paesi Bassi e della Danimarca hanno ridotto il loro tasso di sconto, portandolo rispettivamente dal 9% all'8,5% (il 22 settembre) e dal 13% al 12% (il 19 settembre); parallelamente, il 26 settembre, il Federal Reserve Board degli Stati Uniti aumentava invece di un punto il tasso di sconto ufficiale, portandolo dal 10% all'11%.

Va notato inoltre che, per proteggere il valore esterno della lira, la Banca d'Italia, che ha recentemente instaurato un complesso organico di provvedimenti di controllo dei tassi di cambio, ha aumentato dal canto suo il tasso di sconto, portandolo dal 15 al 16,5% in data 29 settembre.

(*) Senza l'UEBL, per la quale non si dispone né dei dati di giugno, né di quelli di luglio.

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturrelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlige, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelsers definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

PREFACE

EN

This bulletin is in two parts: 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

AVVERTENZA

IT

Il presente bollettino consta di 2 parti: l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione, Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa.

DANMARK

- 05 Beskæftigelsesindeks for industriens arbejdere.
 06 Registrerede ledige i procent af antal personer i arbejdsstyrken — sæsonkorrigeret.
 07 Den offentlige arbejdsformidling: Antal pladser, der ved månedens udgang stod ubesatte.
 12 Animalske landbrugsprodukter : mængdeindeks.
 21 Konjunkturbarometer for industriproduktionen: Nettotal (tallene for tidligere kvartaler angiver en vurdering af det faktiske produktionsforløb, mens tallet for det sidste kvartal udtrykker forventningerne til dette kvartal).
 22 Mængdeindeks for omsætningen af egne varer og tjenester i industrien i alt ekskl. værfter.
 23 Mængdeindeks for omsætningen af egne varer og tjenester i mellemproduktindustrien.
 24 Mængdeindeks for omsætningen af egne varer og tjenester i investeringsgodeindustrien ekskl. værfter.

- 25 Mængdeindeks for omsætningen af egne varer og tjenester i forbrugsgodeindustrien.
 34 Antal påbegyndte lejligheder.
 39 Indeks for ordreindgang i industrien i alt ekskl. værfter.
 41 Import af varer (cif) i alt — sæsonkorrigeret.
 42 Eksport af varer (fob) i alt — sæsonkorrigeret.
 43 Handelsbalancen i alt.
 45 Indeks for enhedsværdier for import af varer.
 46 Indeks for enhedsværdier for eksport af varer.
 47 Bytteforholdet i udenrigshandelen.
 53 Værdiindeks for detailomsætningen — sæsonkorrigeret.
 54 Mængdeindeks for detailomsætningen — sæsonkorrigeret.
 62 Nyregistrerede personbiler — sæsonkorrigeret.

- 63 Nyregistrerede vare- og lastbiler samt busser.
 71 Prisindeks for omsætningen af egne varer og tjenester i industrien i alt ekskl. værfter.
 77 Råvareprisindeks : 1978-vægte.
 79 Forbrugerprisindeks.
 85 Timelønsindeks for industriens arbejdere.
 89 Pengeforsyningen (M2).
 92 International likviditet (brutto).
 96 Betalingsbalancens løbende poster i alt.
 97 Betalingsbalancens kapitalposter i alt.

Abonnementet er årligt og løber fra 1. januar til 31. december hvert år.

The annual subscription runs from 1 January to 31 December of each year.

Gli abbonamenti sono annuali e il loro periodo di validità va dal 1° gennaio al 31 dicembre di ciascun anno.

Betaling kan kun ske til agenturerne i landene nævnt på omslagets side 3.

Payments to be made only to the agents in the countries listed on page 3 of the cover.

I versamenti devono essere indirizzati agli uffici di vendita indicati a pag. 3 della copertina

Priserne dækker forsendelse ad land- eller søvej; agenturerne giver oplysning om priserne for luftforsendelse

These are surface mail rates; for air subscription rates please apply to the agents.

I prezzi non comprendono le spese di spedizione per posta aerea; per le condizioni di abbonamento in caso di spedizione per posta aerea, si consultino gli uffici di vendita
