Manuskript afsluttet den 19. maj 1980

Manuscript completed 19 May 1980

Manoscritto terminato il 19 maggio 1980

Arbejdsløshed

Antallet af arbejdsløse i Fællesskabet var ved udgangen af april 1980 steget til 6,2 millioner i bruttotal (6,3 millioner i sæsonkorrigerede tal). I forhold til den foregående måned var dette i sæsonkorrigerede tal en stigning på 1,5%. Dette resultat i april sammenholdt med marts 1980 (+1,9) synes at markere et vendepunkt for den relativt stabile tendens, man har kunnet observere i de foregående måneder. Arbejdsløshedsprocenten i Fællesskabet er på 5,7% (ved udgangen af marts 1980 5,8%). Følgende medlemslandes arbejdsløshedsprocent ligger under EF-gennemsnittet: Luxembourg (0,6%), Forbundsrepublikken Tyskland (3,2%), Nederlandene (4,0%) og Danmark (5,4%). I Det forenede Kongerige ligger arbejdsløshedsprocenten omkring EF-gennemsnittet, og i de øvrige medlemslande er den højere: Belgien (8,5%), Irland (8,1%), Italien (7,8%) og Frankrig (6,2%).

Der er i Fællesskabet såvel som i de fleste af medlemslandene stadig væk større arbejdsløshed blandt kvinder end blandt mænd. For hele Fællesskabet lå arbejdsløshedsprocenten for mænd ved udgangen af april 1980 på 5,0% og for kvinder på 6,9%. Den højeste arbejdsløshedsprocent for kvinder konstateredes i Belgien (14,8%), Italien (10,5%) og Frankrig (8,7%).

For hele Fællesskabet steg antallet af registrerede arbejdsløse i forhold til året i forvejen med 5,2%. Selv om arbejdsløsheden er faldet i Forbundsrepublikken Tyskland, Irland og Danmark, er denne nedgang i antallet af arbejdsløse imidlertid delvis blevet ophævet af undertiden kraftige stigninger i Det forenede Kongerige, Frankrig, Italien, Nederlandene og Belgien.

Indekset for industriproduktionen : Faldende kortsigtet stigningstakt for EUR 9

EUROSTAT skønner, at det sæsonkorrigerede indeks for Det europæiske Fællesskabs industriproduktion i februar 1980 nåede op på 119,3 (1975 = 100), hvilket er en nedgang på 0,1% i forhold til den foregående måned. Efter månedlige ændringer i det sæsonkorrigerede indeks på +1,1% og -0,9% for henholdsvis december 1979 og januar 1980 er dette udtryk for en vis stilstand i produktionen under ét for de seneste tre måneder. Hvad de enkelte varegrupper angår, er den sæsonkorrigerede produktion i mellemproduktindustrien faldet med 0,7% til 123,8 (1975 = 100) i februar; til i forbrugsgodeindustrien faldt indekset med 0,3% og ligger på 120,1. For investeringsgodesektorens vedkommende udviser det sæsonkorrigerede produktionsindeks betydelige svingninger de enkelte måneder imellem: det steg med 2,4% i februar til 110,9, efter at der i januar var registreret et fald på 7,6% og i december en stigning på 5,2%. Disse bevægelser skyldes i stor udstrækning den særlig høje aktivitet i de franske og tyske investeringsgodesektorer i december og en forholdsvis svag produktion i de samme to lande i januar.

De seneste tal for den kortsigtede stigningstendens viser, at opsvinget i EF-produktionen stoppede i februar efter en uafbrudt stigning siden oktober 1979. De dårlige resultater i mellemprodukt-, investeringsgode- og forbrugsgodeindustrierne afspejler opbremsningen af den kortsigtede stigning i industriindekset under ét. Hvad de enkelte lande angår, er der i Italien, Danmark og Det forenede Kongerige tale om et kraftigt fald i den kortsigtede stigning, mens Frankrig og Luxembourg udviste mere positive resultater. Imidlertid blev de mere positive resultater, som man kunne registrere andre steder, i EUR 9 indekset langt opvejet af tendenserne i den første gruppe.

Stål : Forværring af handelsbalancen

Eksporten af stål fra Fællesskabet til tredjelande er i forhold til de første skøn for året 1979 faldet med 4,4% (til De forenede Stater: -20%) i forhold til 1978. Importen er derimod i den samme periode steget med 6,2% (østblokken: +12,5%, Spanien: +3,8%; dog Japan -23,6%).

Samhandelen inden for Fællesskabet : fortsat stigende samhandel

Målt på grundlag af importen steg samhandelen inden for Fællesskabet (med undtagelse af Belgien og Luxembourg, hvor tallene endnu ikke foreligger) i de to første måneder af 1980 med 39% i forhold til den tilsvarende periode i 1979. Den største stigning registreredes i Det forenede Kongerige (48%) og Italien (43%), mens stigningerne var lidt mindre i Forbundsrepublikken Tyskland og Frankrig (27% for begge landes vedkommende).

For de syv landes vedkommende, hvor tallene på nuværende tidspunkt foreligger, ligger den del, som samhandelen inden for Fællesskabet udgør af den samlede handel, i Februar 1980 på 48%. Irland nåede det højeste samhandelsniveau (70%) efterfulgt af Nederlandene (55%). Med undtagelse af Det forenede Kongerige (41%) ligger de øvrige medlemslande tæt på EF-gennemsnittet.

I de to første måneder af 1980 registrerede Frankrig et underskud på 685 Mio ERE over for sine EF-partnere, mens underskuddene for Irlands, Det forenede Kongeriges og Danmarks vedkommende lå mellem 200 og 300 Mio ERE. Nederlandene havde som sædvanlig et betydeligt overskud (1 574 Mio ERE) på grund af salg af olie, mens Forbundsrepublikken Tyskland ligeledes var i stand til at opretholde et betydeligt overskud over for EF-partnerne (851 Mio ERE). Italien er med et underskud på 35 Mio ERE det land, der ligger nærmest ligevægtpunktet.

Fællesskabets samhandel med tredjelande : underskud for alle medlemslandene

Importen fra tredjelande steg fortsat hurtigt i de første to måneder af 1980 med en EF-import (med undtagelse af Belgien og Luxembourg), som ligger 44% over niveauet for året i forvejen. Alle medlemslandene ligger temmelig tæt på dette generelle tal, idet der kun for Danmarks (+28%) og Nederlandenes (+33%) vedkommende er tale om betydelige forskelle.

Hvad angår eksporten til tredjelande, er der betydelig forskel på de enkelte medlemslandes resultater. Under ét har eksporten været 28% højere i de to første måneder af 1980, men tallene varierer fra 59% for Det forenede Kongeriges vedkommende til 7% for Italiens vedkommende. Nederlandene har registreret en stigning på 32% i eksporten til tredjelande, mens de andre lande ligger på omkring 20%.

Da importen er steget meget hurtigere end eksporten, nåede Fællesskabets handelsunderskud over for udlandet efter to måneder af 1980 op på 8 829 Mio ERE, hvilket er en kraftig stigning på 79% i forhold til året i forvejen. Alle landene har bidraget til denne negative handelsbalance. Den største stigning i underskuddet registreres i Frankrig (2 330 Mio ERE) efterfulgt af Italien (2 027 Mio ERE), Det forenede Kongerige (1 692 Mio ERE), Nederlandene (1 641 Mio ERE), Forbundsrepublikken Tyskland (528 Mio ERE), Danmark (380 Mio ERE) og Irland (231 Mio ERE).

Landbrugspriser : Udviklingen i fjerde kvartal 1979

Efter EUROSTAT's skøn er produktionsprisindekset for landbrugsvarer (undtagen frugt og grøntsager) for EUR 9 i 4. kvartal 1979 steget med 8% i forhold til 4. kvartal 1978. Denne stigning er udtryk for, at den stigende tendens, som har kunnet konstateres i de foregående kvartaler af 1979, fortsættes.

Stigningen skyldes i næsten lige høj grad prisudviklingen for vegetabiliske produkter (undtagen frugt og grøntsager) (+8,6%) og prisudviklingen for animalske produkter (+7,7%).

Hvad angår det samlede prisindeks (undtagen frugt og grøntsager) udviser Det forenede Kongerige (+10,4%) og Italien (+12,9%) i 4. kvartal 1979 i forhold til det tilsvarende kvartal i 1978 stigningssatser, som ligger over gennemsnittet, hvilket betyder en fortsættelse af den tendens, der har kunnet konstateres i de foregående tre kvartaler. Der er her tale om de to lande i Fællesskabet med den højeste inflation. I følgende lande er der konstateret stigningssatser under gennemsnittet: Danmark (+5,0%), Nederlandene (+5,9%), Forbundsrepublikken Tyskland (+6,1%), Frankrig (+6,7%) og Belgien (+7,1%). I Luxembourg er det samlede indeks (undtagen frugt og grøntsager) kun steget med 3,3%, og i Irland har man endog konstateret en nedgang på 3,6%, især som følge af faldende priser på dyr og animalske produkter.

For EUR 9 steg købspriserne på varer og tjenesteydelser *til brug for driften i landbruget* i løbet af 4. kvartal 1979 med 11,7% i forhold til samme periode i 1978. Hvis man sammenligner med stigningstakterne for de foregående kvartaler i 1979, kan man konstatere stærkere stigende priser i løbet af 1979. Hovedårsagen hertil er omkostningsudviklingen på energiområdet, hvor priserne i løbet af 4. kvartal 1979 steg med omkring 28% i forhold til 4. kvartal 1978. Imidlertid har man for alle de andre grupper af varer og tjenester til brug for driften i landbruget — med undtagelse af frø — ligledes registreret højere stigninger i 4. kvartal 1979 end i det foregående kvartal.

I løbet af 4. kvartal 1979 var stigningen i det samlede prisindeks i forhold til 1978 relativt svag i Forbundsrepublikken Tyskland (+5,9%), Luxembourg (+6,4%) og Nederlandene (+6,8%), mens stigningerne i Irland (+16,9%) og Italien (+17,7%) lå klart over EF-gennemsnittet.

I forhold til den tilsvarende periode i 1978 steg købspriserne på varer og tjenesteydelser, *som indgår i investeringerne i landbruget*, for EUR 9 med 14,7% i 4. kvartal 1979. Denne stigning er 3 points højere end prisstigningen på varer og tjenester til brug for driften i landbruget. I forhold til 3. kvartal 1979 var priserne på maskiner og bygninger betydeligt højere og er fortsat med at stige med omkring 3 3/4% i 4. kvartal, især i Italien og Danmark.

For EUR 9 er købspriserne på varer og tjenester til brug for driften i landbruget i løbet af 4. kvartal 1979 og i forhold til samme periode 1978 steget med 3,7 points mere end salgspriserne for landbrugsvarer (undtagen frugt og grøntsager).

Med undtagelse af Forbundsrepublikken Tyskland, hvor output- og inputpriserne er steget med næsten det samme (omkring +6,0%) er inputpriserne i alle de øvrige medlemslande steget meget kraftigere end outputpriserne.

Unemployment

The number of unemployed in the Community at the end of April 1980 stood at 6.2 million expressed in raw figures (6.3 million in seasonally-adjusted figures). This represents an increase of 1.5% in relation to the previous month and expressed in seasonally-adjusted figures. Following on the March 1980 increase of 1.9% this would seem to suggest a break with the comparatively stationary trend recorded in previous months. The Community unemployment rate stands at 5.7% (compared with 5.8% at the end of March 1980). The rate in the following Member States is lower than the Community average: Luxembourg (0.6%), Germany (3.2%), the Netherlands (4%) and Denmark (5.4%). The figure for the United Kingdom corresponds more or less to the Community average, while in the other countries the unemployment rate is higher than the Community average: Belgium (8.5%), Ireland (8.1%), Italy (7.8%) and France (6.2%).

Female unemployment in the Community and in most of the Member States continues to be higher than male unemployment. The Community figure for male unemployment was 5% at the end of April 1980, while female unemployment stood at 6.9%. The highest female unemployment rates were recorded in Belgium (14.8%), Italy (10.5%), and France (8.7%).

The number of registered unemployed in the Community as a whole showed a 5.2% increase over the previous year. Although the unemployment situation has eased in Germany, Ireland and Denmark, this decrease in the total number of unemployed has nonetheless been partly cancelled out by increases — sometimes significant — in the United Kingdom, France, Italy, the Netherlands and Belgium.

Index of industrial production: Reduction in EUR 9 short-term trend rate of growth

Eurostat estimates the seasonally adjusted index of industrial production for the European Community to have reached the level of 119.3 (1975=100) in February 1980, and to have fallen very slightly (-0.1%) against the figure recorded in the previous month. This follows monthly changes in the seasonally adjusted index of +1.1% and -0.9% in December 1979 and January 1980 respectively and suggests that taking the last three months as a whole production has been rather flat. At the product regroupment level, monthly seasonally adjusted production in the Community's intermediate goods industries slipped by -0.7% to 123.8 (1975=100) in February whilst in the consumer goods sector the index fell by -0.3% to 120.1. Continuing its tradition of registering large and erratic month to month changes the adjusted index of production in the investment goods sector increased by 2.4% in February to attain the level of 110.9, after falling by 7.6% in January and increasing by 5.2% in December. These movements are explained to a large extent by the exceptionally high rates of activity in French and German investment goods industries in December, and by comparatively low production in the same two countries in January.

According to the latest data on short-term growth trends, the recent upturn in Community industrial production growth was checked in February following an uninterrupted rise from October 1979. Developments in the Community's intermediate, investment, and consumer goods sectors mirrored the downward movement in short-term growth in the all-industries index. At the member state level there was a sharp drop in short-term growth in Germany, Italy, Denmark and the United Kingdom in February, whilst in France and Luxembourg developments moved in a more favourable direction. However, the influence of the adverse growth trends in the former group of countries on the EUR 9 index significantly outweighed the positive developments which took place elsewhere.

Steel: a deteriorating trade balance

Exports of ECSC steel from the Community to third countries has, according to preliminary data for the year 1979, fallen back by some 4.4% (to the U.S.A. -20%) compared with 1978. Imports, on the other hand, have increased in the same period by 6.2% (Eastern bloc +12.5%, Spain +3.8%, Japan however -23.6%).

Intra-Community trade: Integration continues

Measured on the basis of imports, intra-Community trade (excluding Belgium-Luxembourg where figures are not yet available) was 33% higher in the first two months of 1980 than it was in the corresponding period of 1979. The largest percentage rises were recorded by the United Kingdom (48%) and Italy (43%), while Germany and France showed the lowest proportionate rises of 27% each.

The proportion of total trade represented by intra-Community trade, for the seven member states considered here, stood at 48% in February 1980 with Ireland showing the highest level of integration (70%) followed by the Netherlands (55%). Apart from the United Kingdom (41%) the other members were very close to the Community average.

In the first two months of 1980, France recorded a trade deficit of 685 million ECU with its Community partners while deficits of between 200 and 300 million ECU were shown by Ireland, the United Kingdom and Denmark. The Netherlands showed its habitual large surplus (1574 million ECU) due to petrol sales while Germany, too, was able to maintain a substantial surplus with its Community partners (851 million ECU). Italy was the nearest to an overall balance into a deficit of 35 million ECU.

Community external trade: All members in deficit

Imports from third countries continued to rise at a rapid rate during the first two months of 1980 with Community purchases (excluding Belgium-Luxembourg) being 44% above their level of a year earlier. All member states were fairly near this overall figure, the only substantial deviations being seen in Denmark (+28%) and the Netherlands (+33%).

A much more diverse performance amongst members is evident in Community exports to third countries. Overall, these were 28% higher in the first two months of 1980 but individual performances ranged from a leap of 59% for the United Kingdom to a modest rise of 7% for Italy. The Netherlands achieved a 32% increase in their external sales while the other members showed rises of around 20%.

Due to the much faster rise in imports than in exports, the Community's external trade deficit stood at 8829 million ECU after two months of 1980, a massive 79% higher than in the previous year, with all members contributing to the negative balance. The highest individual deficit was recorded by France (2330 million ECU) followed by Italy (2027), the United Kingdom (1692), Netherlands (1641), Germany (528), Denmark (380) and Ireland (231 million ECU).

Agricultural prices: Comments on the results for the fourth quarter 1979

According to SOEC estimates, the overall index of producer prices of agricultural products (excluding fruits and vegetables) for EUR 9 in the fourth quarter of 1979 was 8% higher than in the same period in 1978. This rate of increase continued the accelerating trend detected in previous quarters of 1979.

This rise is due to almost parallel increases in the prices of vegetable products (excluding fruit and vegetables) (+8.6%) and those of animal products (+7.7%).

Above-average increases in the overall index (excluding fruit and vegetables) occurred in the fourth quarter of 1979 as compared with the same period in the previous year in the United Kingdom (plus 10.4%) and Italy (+12.9%), a repeat of their performance in the three previous quarters. These two countries are also those which have the highest rates of inflation. There were below-average rates of increase in Denmark (+5%), the Netherlands (+5.9%), the Federal Republic of Germany (+6.1%), France (+6.7%) and Belgium (+7.1%). In Luxembourg, the overall index (excluding fruit and vegetables) rose by only 3.3% and in Ireland there was a decline of 3.6% due mainly to the fall in the prices for animals and animal products.

Purchase prices of goods and services for *current consumption in agriculture* in EUR 9 rose in the fourth quarter of 1979 by 11.7% as compared with the same period in 1978. When the rates of increase in the previous quarters of 1979 are examined, it can be seen that the overall rise in price trend clearly accelerated during 1979. The main reason for this lies in the cost of energy, prices for which in the fourth quarter were around 28% higher than in the same quarters of 1978. With the exception of seeds, however, all the other groups of goods and services currently consumed in agriculture also showed higher rates of increase in the fourth quarter of 1979 than in the third quarter.

Rates of increase in the overall index in the fourth quarter of 1979 compared with 1978 were relatively low for the Federal Republic of Germany (+5.9%), Luxembourg (+6.4%) and the Netherlands (+6.8%), while those for Ireland (+16.9%) and Italy (+17.7%) were well above the Community average.

The purchase prices of goods and services *contributing to agricultural investment* in EUR 9 increased in the fourth quarter of 1979 by 14.7% compared with the corresponding period in 1978, this increase being 3 percentage points above that of the purchase prices for goods and services for current consumption in agriculture. The prices of machines and buildings were both appreciably higher and continued to rise by approximately 3.3/4% in the fourth quarter compared with the third quarter of 1979, particularly in Italy and Denmark.

For EUR 9 in the fourth quarter of 1979, compared with the corresponding period of 1978, input prices of goods and services for current consumption in agriculture rose by 3.7% percentage points more than output prices of agricultural products (excluding fruit and vegetables).

With the exception of the Federal Republic of Germany, where output and input price increases were virtually the same (around 6%), input prices rose by more than output prices in all the other eight Member States.

Disoccupazione

A fine aprile del 1980 il numero dei disoccupati nella Comunità era di 6,2 milioni in dati grezzi, pari a 6,3 milioni in dati corretti delle variazioni stagionali. Le cifre destagionalizzate indicano un aumento della disoccupazione dell'1,5 % rispetto al mese precedente : questo risultato di aprile, che fa seguito a quello del mese di marzo (+1,9 %), sembra indicare un'inflessione della tendenza relativamente stazionaria che si era osservata nei mesi precedenti. Il tasso di disoccupazione risulta del 5,7 % a livello comunitario (contro il 5,8 % a fine marzo del 1980); a livello degli Stati membri, tassi inferiori alla media comunitaria si osservano in Lussemburgo (0,6 %), nella R.F. di Germania (3,2 %), nei Paesi Bassi (4,0 %) e in Danimarca (5,4 %), mentre il tasso di disoccupazione del Regno Unito si colloca all'incirca allo stesso livello della media per la Comunità e gli altri paesi presentano invece tassi superiori (Belgio : 8,5 %; Irlanda : 8,1 %; Italia : 7,8 %, Francia : 6,2 %).

Per la popolazione femminile il tasso di disoccupazione risulta sempre superiore a quello che si osserva per gli uomini, nella Comunità come nella maggior parte degli Stati membri : per la Comunità i tassi di disoccupazione per sesso risultavano, a fine aprile del 1980, del 5,0 % per gli uomini e del 6,9 % per le donne. I tassi di disoccupazione femminile più elevati si osservano in Belgio (14,8 %), in Italia (10,5 %) e in Francia (8,7 %).

Rispetto all'anno precedente, il numero dei disoccupati iscritti nelle liste di collocamento è aumentato del 5,2 % per la Comunità nel suo complesso. Infatti, sebbene la disoccupazione sia diminuita nella Repubblica federale di Germania, in Irlanda e in Danimarca, tale regresso è stato compensato in parte da aumenti, talvolta rilevanti, nel Regno Unito, in Francia, in Italia, nei Paesi Bassi e in Belgio.

Indice della produzione industriale : riduzione del tasso di crescita EUR 9 a breve termine

Secondo le stime dell'EUROSTAT, l'indice destagionalizzato della produzione industriale per la Comunità europea si situa, nel febbraio 1980, al livello di 119,3 (1975 = 100), il che rappresenta una flessione dello 0,1 % sul mese precedente. Dopo variazioni mensili dell'indice destagionalizzato pari a +1,1 % e -0,9 % rispettivamente nel dicembre 1979 e nel gennaio 1980, tale variazione traduce una certa atonia della produzione nel suo complesso negli ultimi tre mesi. Per gruppi di prodotti, la produzione destagionalizzata delle industrie comunitarie dei beni intermedi risulta diminuita dello 0,7 % nel mese di febbraio, con un indice pari a 123,8 (1975 = 100), mentre nel settore dei beni di consumo l'indice diminuiva dello 0,3 %, situandosi a 120,1. Nel settore dei beni d'investimento l'indice destagionalizzato della produzione accusa notevoli fluttuazioni mensili : in febbraio, risulta aumentato del 2,4 %, situandosi al livello di 110,9, dopo aver registrato in gennaio una flessione del 7,6 % e in dicembre un aumento del 5,2 %. Questi movimenti sono ampiamente spiegati dai tassi d'attività particolarmente elevati in dicembre nelle industrie dei beni d'investimento, in Francia e in Germania, e da una produzione comparativamente esigua nei due stessi paesi nel mese di gennaio.

Gli ultimi dati sulle tendenze dello sviluppo a breve termine indicano che la ripresa della crescita della produzione comunitaria ha subito un brusco arresto in febbraio, dopo un aumento ininterrotto dall'ottobre del 1979. I cattivi risultati registrati dai settori dei beni intermedi, d'investimento e di consumo riflettono la flessione della crescita a breve termine accusata dall'indice generale dell'industria. A livello dei singoli Stati membri, la crescita nel breve periodo è diminuita fortemente in Italia, in Danimarca e nel Regno Unito in febbraio, mentre Francia e Lussemburgo presentavano risultati più positivi. Tuttavia, nell'ambito dell'indice EUR 9, le tendenze del primo gruppo di paesi sono risultate ampiamente prevalenti rispetto ai risultati più positivi registrati in altri paesi.

Acciaio : peggioramento della bilancia commerciale

Le esportazioni di acciaio CECA della Comunità verso i paesi terzi sono regredite per l'anno 1979, secondo le prime indicazioni, del 4,4 % (-20 % verso gli Stati Uniti) in rapporto al 1978. Le importazioni per contro sono aumentate, nello stesso periodo, del 6,2 % (Blocco Est : +12,5 %, Spagna : +3,8 %; contemporaneamente Giappone : -23,6 %).

Commercio intracomunitario : l'integrazione prosegue

Nei primi due mesi del 1980 gli scambi intracomunitari (esclusi il Belgio e il Lussemburgo, i cui dati non sono ancora disponibili), valutati sulla base delle importazioni, hanno superato del 39 % il livello del corrispondente periodo del 1979. I maggiori incrementi sono stati registrati dal Regno Unito (48 %) e dall'Italia (43 %), mentre la Germania e la Francia hanno avuto i tassi meno elevati (pari al 27 %).

La quota del commercio intracomunitario nel commercio totale dei sette paesi finora considerati risulta, nel febbraio del 1980, del 48 %. Il più elevato livello d'integrazione è presentato dall'Irlanda (70 %), seguita dai Paesi Bassi (55 %) mentre, con l'eccezione del Regno Unito (41 %), gli altri paesi membri si situano ad un livello molto vicino alla media comunitaria. Nei primi due mesi del 1980 la Francia ha registrato, negli scambi con gli altri paesi della Comunità, un disavanzo di 685 milioni di UCE, mentre disavanzi compresi tra 200 e 300 milioni di UCE sono accusati dall'Irlanda, del Regno Unito e dalla Danimarca. I Paesi Bassi presentano come sempre un notevole attivo (1 574 milioni di UCE), dovuto alle vendite di petrolio, ma anche la Germania è riuscita a mantenere un saldo positivo rilevante negli scambi con gli altri paesi della Comunità (851 milioni di UCE). L'Italia è il paese più vicino all'equilibrio generale, presentando un disavanzo di 35 milioni di UCE.

Commercio extracomunitario : tutti i paesi membri in deficit

Nei primi due mesi del 1980 le importazioni dai paesi terzi hanno continuato ad aumentare ad un ritmo sostenuto, con acquisti da parte della Comunità (esclusi il Belgio e il Lussemburgo) che superano del 44 % il livello di un anno fa. Tutti i paesi membri presentano tassi d'incremento abbastanza vicini a quello generale; le sole differenze significative si osservano per la Danimarca (+28 %) e i Paesi Bassi (+33 %).

Quanto alle esportazioni verso i paesi terzi, i vari paesi membri hanno ottenuto risultati alquanto disparati : globalmente, nei primi due mesi del 1980 tali esportazioni hanno superato del 28 % quelle dell'anno precedente, ma, paese per paese, si va da un incremento del 59 % per il Regno Unito ad un aumento moderato del 7 % per l'Italia; entro tali estremi, i Paesi Bassi hanno registrato un incremento del 32 % delle loro vendite al di fuori della Comunità, mentre i tassi degli altri paesi si situano intorno al 20 %.

Dato che l'aumento delle importazioni è stato molto più rapido di quello delle esportazioni, il disavanzo del commercio estero della Comunità raggiunge, dopo i primi due mesi del 1980, il livello di ben 8 829 milioni di UCE, con un aumento rilevantissimo del 79 % rispetto all'anno precedente; a tale saldo negativo contribuiscono tutti i paesi. Il maggior aggravamento del disavanzo è registrato dalla Francia (2 330 milioni di UCE), seguita dall'Italia (2 027 milioni di UCE), dal Regno Unito (1 692 milioni di UCE), dai Paesi Bassi (1 641 milioni di UCE), dalla Germania (528 milioni di UCE), dalla Danimarca (380 milioni di UCE) e dall'Irlanda (231 milioni di UCE).

Prezzi agricoli : andamento nel quarto trimestre 1979

Secondo le stime dell'ISCE, nel quarto trimestre del 1979 l'indice globale EUR 9 dei prezzi alla produzione dei prodotti agricoli (ortofruttili esclusi) è aumentato dell'8 % rispetto al corrispondente periodo del 1978. Questo tasso di aumento conferma la tendenza all'accelerazione già riscontrata nei precedenti trimestri del 1979.

Tale aumento è imputabile in parti quasi uguali all'andamento dei prezzi dei prodotti vegetali (ortofruttili esclusi) (+8,6 %) e dei prodotti animali (+7,7 %).

Aumenti dell'indice globale (ortofrutticoli esclusi) superiori alla media per il quarto trimestre del 1979 rispetto al corrispondente periodo dell'anno precedente si osservano per il Regno Unito (+10,4 %) e l'Italia (+12,9 %), cosa del resto già constatata nei tre trimestri precedenti. Si tratta d'altronde dei due paesi che hanno anche i più alti tassi d'inflazione della Comunità.

Tassi di aumento inferiori alla media sono stati registrati in Danimarca (+5,0 %), nei Paesi Bassi (+5,9 %), nella Repubblica federale di Germania (+6,1 %), in Francia (+6,7 %) e in Belgio (+7,1 %). Nel Lussemburgo, l'indice globale (ortofrutticolo esclusi) è aumentato soltanto del 3,3 %, mentre in Irlanda si è registrata una flessione del 3,6 %, dovuta soprattutto alla diminuzione dei prezzi degli animali e dei prodotti animali.

Nel quarto trimestre del 1979, i prezzi d'acquisto dei beni e servizi di *consumo corrente dell'agricoltura* risultano aumentati, per EUR 9, dell'11,7 % rispetto al periodo corrispondente del 1978. Se si considerano anche i tassi d'aumento dei precedenti trimestri del 1979, si osserva una netta accelerazione della tendenza ascendente dei prezzi nel corso del 1979, dovuta in primo luogo al costo dell'energia, i cui prezzi nel quarto trimestre superavano del 28 % circa quelli del corrispondente trimestre 1978. Ma anche per tutti gli altri gruppi di beni e servizi di consumo corrente in agricoltura, ad eccezione delle sementi, si osservano nel quarto trimestre 1979 tassi d'aumento superiori a quelli del terzo trimestre.

L'analisi della situazione per paese evidenzia tassi d'aumento dell'indice globale relativamente moderati (sempre per il quarto trimestre 1979 sul quarto trimestre 1978) per la Repubblica federale di Germania (+5,9 %), il Lussemburgo (+6,4 %) e i Paesi Bassi (+6,8 %), mentre i tassi corrispondenti dell'Irlanda (+16,9 %) e dell'Italia (+17,7 %) sono nettamente superiori alla media comunitaria.

Parallelamente, i prezzi d'acquisto dei beni e servizi *attinenti agli investimenti dell'agricoltura* accusano, per EUR 9 e per lo stesso periodo (quarto trimestre 1979/quarto trimestre 1978), un aumento del 14,7 % circa, superiore di 3 punti a quello dei prezzi d'acquisto dei beni e servizi di consumo corrente dell'agricoltura. L'aumento, rilevante sia per le macchine che per i fabbricati, è proseguito ad un ritmo del 33/4 % circa su base trimestrale (dal terzo al quarto trimestre 1979) specialmente in Italia e Danimarca.

Dall'esame comparato dell'evoluzione dei prezzi degli input (beni e servizi di consumo corrente dell'agricoltura) e di quelli degli output (prodotti agricoli, ortofrutticoli esclusi) emerge, per EUR 9 e per il periodo in esame (quarto trimestre 1979 sul quarto trimestre 1978), un maggior aumento dei primi rispetto ai secondi, pari a 3,7 punti percentuali.

Questa constatazione, fatta per la Comunità, è valida anche a livello dei singoli Stati membri, con l'eccezione della Repubblica federale di Germania, dove l'aumento dei prezzi degli input e degli output è stato più o meno di pari entità (+6 % circa).

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturrelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlege, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i én specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelsers definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

PREFACE

EN

This bulletin is in two parts: 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

AVVERTENZA

IT

Il presente bollettino consta di 2 parti: l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa.

Die deutsche Fassung dieses Bulletins wird am zweiten Dienstag jeden Monats in Druck gegeben.

La version française de ce bulletin est mise sous presse le second mardi de chaque mois.

De Nederlandse versie van dit bulletin gaat de tweede dinsdag van elke maand ter perse.

(1) Alcuni dati più dettagliati per branca sono riportati nel bollettino « Indicatori congiunturali dell'industria ».

(2) I dati contenuti in questa parte del bollettino rappresentano i risultati dell'indagine sulla congiuntura presso i capi di impresa delle Comunità. Alcuni dati più particolari figurano in « Economia europea ».

(3) Alcuni dati del commercio estero più dettagliati ed espressi in UCE sono riportati nel « Bollettino mensile del commercio estero ».

(4) Consumi finali delle famiglie.

Abonnementet er årligt og løber fra 1. januar til 31. december hvert år.

The annual subscription runs from 1 January to 31 December of each year.

Gli abbonamenti sono annuali e il loro periodo di validità va dal 1° gennaio al 31 dicembre di ciascun anno.

Betaling kan kun ske til agenturerne i landene nævnt på omslagets side 3.

Payments to be made only to the agents in the countries listed on page 3 of the cover.

I versamenti devono essere indirizzati agli uffici di vendita indicati a pag. 3 della copertina

Priserne dækker forsendelse ad land- eller søvej; agenturerne giver oplysning om priserne for luftforsendelse.

These are surface mail rates; for air subscription rates please apply to the agents.

I prezzi non comprendono le spese di spedizione per posta aerea; per le condizioni di abbonamento in caso di spedizione per posta aerea, si consultino gli uffici di vendita.
