Manuskript afsluttet den 26. januar 1981.

Manuscript completed 26 January 1981.

Manoscritto terminato il 26 gennaio 1981.

**Arbejdsløshed : kraftig stigning i 1980**

I Fællesskabet bestående af De Ni blev der ved udgangen af december 1980 registreret 7,9 Mio arbejdsløse svarende til 7,2% af den civile erhvervsaktive befolkning. Situationen forværredes således i december måned i et langt større omfang end den sædvanlige sæsonbetingede stigning, især i Tyskland.

I alt steg arbejdsløsheden fra udgangen af december 1979 til udgangen af december 1980 for hele Fællesskabet fra 5,7% til 7,2%. Dette tal steg fra 4,9% til 6,6% for mændene og 6,9% til 8,3% for kvinderne.

Som helhed betragtet steg arbejdsløsheden i 1980 med 27%. De lande, som var hårdest ramt, var Det forenede Kongerige (66%), Danmark (56%), Nederlandene (49%), Irland (38%) og Vesttyskland (29%). Arbejdsløshedsstigningen lå under gennemsnittet for Fællesskabet i Luxembourg (19%), Belgien (17%), Frankrig (11%) og Italien (6%).

**Indekset for industriproduktionen : Afmatningen i Fællesskabets industriproduktion fortsætter**

Ifølge EUROSTATs foreløbige beregninger baseret på oplysningerne for otte medlemslande (Vesttyskland, Frankrig, Italien, Luxembourg, Nederlandene, Belgien, Det forenede Kongerige og Danmark) opgøres det sæsonkorrigerede samlede indeks for Fællesskabets industriproduktion til 114,3 (1975=100) i oktober 1980. I august måned blev det sæsonkorrigerede indeks for EUR 9 opgjort til 114,5 og i september til 113,5, hvoraf fremgår, at der ikke har været væsentlige ændringer i Fællesskabets industriproduktion i løbet af de sidste tre måneder. I denne periode lå det gennemsnitlige produktionsniveau imidlertid 3,4% lavere end for de foregående tre måneder (maj-juli), hvilket skal sammenholdes med den nedgang på 2,8%, som blev registreret i perioden mellem tredje og andet kvartal og nedgangen på 1,3% i perioden mellem andet og første kvartal 1980. Disse tal viser klart, at afmatningen i Fællesskabets industriproduktion fortsætter. Udviklingen har været nogenlunde den samme inden for mellemproduktindustrien og forbrugsgodeindustrien, og inden for investeringsgodeindustrien er den kortsigtede stigningstakt, som hidtil har været mest konstant, også begyndt at falde kraftigt.

**STÅL : følgerne af fællesskabskontingenteringen**

I november 1980 lå Fællesskabets produktion af råstål (9,9 Mio tons) lidt lavere end den foregående måned. Efter indførelsen af en kvotaordning med virkning fra 1. oktober 1980 for Fællesskabets jern- og stålindustri faldt produktionen af råstål med 18% i forhold til oktober-november 1979.

På grundlag af de foreliggende produktionsprognoser for december skønnes Fællesskabets produktion af råstål i 1980 at nå op på omkring 127 Mio tons (1979 : 140 Mio tons).

Den fornyede stigning i ordreindgangen for almindeligt stål, der blev registreret i september 1980, var endnu større i oktober (25% i forhold til september måned efter sæsonkorrigering).

**Samhandelen inden for Fællesskabet stagnerer**

Efter det sæsonbetingede fald skete der et opsving i samhandelen inden for Fællesskabet i september måned, hvor importen nåede op på 19 777 Mio ECU svarende til en stigning på 22,8% i forhold til august. Imidlertid er denne stigning meget relativ, eftersom den kun udgligner den kraftige nedgang i importen i august. Sammenlignet med september 1979 er importen i øvrigt kun steget med 13% (i løbende priser). Denne moderate stigning betyder 2 ting, dels at importen i september værdimæssigt ligger lavere end i juli måned, dels at stigningen over ni måneder er aftagende, nemlig 15,8% mod 16,1% for de første 8 måneder. Det skal imidlertid bemærkes, at denne tendens til aftagende stigning, man har set i de forløbne måneder, ser ud til at fortsætte.

Ser man på de enkelte medlemsstater, er det Frankrig, som i væsentligt omfang har øget sin import i forhold til august (+56,3%) efter at have indhentet det kraftige fald den foregående måned (-38,1%). I øvrigt er det det samme fænomen, der gør sig gældende for eksporten, som steg med 65,7% og dermed opnår Frankrig et handelsunderskud, som er lidt mindre end i august måned. Der skete et temmelig kraftigt opsving i importen i Belgien (+29%) og i Det forenede Kongerige (+23,1%). I samhandelen inden for Fællesskabet tegnede Det forenede Kongerige sig i øvrigt for den største stigning i eksporten for september måned (+28,7%). Til gengæld steg Italiens import kun med 7,8%, mens eksporten voksede med 17,4%, hvorved Italien fik reduceret sit handelsunderskud i samhandelen med de andre medlemsstater lidt.

I perioden fra januar til september sammenlignet med samme periode det foregående år øgede Italien sin import med 32,8% efterfulgt af Frankrig med 17,3%. Disse to medlemsstater måtte registrere de største underskud i handelen med de andre medlemsstater (henholdsvis 3,2 Mrd og 2,5 Mrd ECU). I samme periode voksede Nederlandenes og Vesttysklands handelsoverskud til henholdsvis 6 og 2,7 Mrd ECU, mens Det forenede Kongerige forbedrede sin balance fra et underskud på 2,6 Mrd ECU til et overskud på 286 Mio ECU.

**Fællesskabets samhandel med tredjelande : på vej mod et underskud på over 40 Mrd ECU?**

Stigningen i Fællesskabets import fortsatte : i september med 13,8% i forhold til august og 25,3% i forhold til september 1979 svarende til 22 791 Mio ECU. I løbet af de første ni måneder steg importen med 30,5% sammenlignet med 1979, hvilket viser, at den hidtidige udvikling fortsætter.

Stigningen var meget kraftig i september i Belgien-Luxembourg (27,7% og 61,5% i forhold til september 1979), Irland (27,3%) og Danmark (24,8%). I løbet af de første ni måneder var importstigningen i Belgien (47,3%), Frankrig (38,6%) og Italien (36,9%) betydelig større end i de andre medlemsstater.

Fællesskabets eksport, som var gået tilbage i august måned, viste en stigende tendens, men steg dog ikke i nært samme omfang som importen : 12,1% i forhold til august og 19,2% i forhold til det foregående år. Stigningstakten for de første ni måneder når op på 17% mod 16% for de første otte måneder. Til trods for denne mindre stigning når det samlede handelsunderskud for de første tre kvartaler op på 37,3 Mrd ECU (mod 14,1 i 1979). Eksportfremgangen var særlig stor i Belgien (41,9% i forhold til august og 45,6% i forhold til september 1979) og Irland (40,2% i forhold til september 1979), som igennem flere måneder har haft en stor eksport. Derimod skete der ikke nogen stigning i eksporten i Nederlandene og Italien (0,3% og -1,9% i forhold til august). I løbet af de første ni måneder opnåede Irland og Belgien de største eksportstigninger (32 og 29,2%), mens Danmark og Italien tegnede sig for de mindste stigninger med 13 og 11,5%.

I samme periode forværredes handelsbalancen over for tredjelande for alle medlemsstaternes vedkommende, især for Frankrig (10,1 Mrd ECU), Nederlandene og Italien (8,1 Mrd ECU).

**Forbrugerpriserne : november 1980 og de første skøn for hele året**

Forbrugerprisindekset for hele EF steg med 1,0% i perioden mellem oktober og november 1980. Den største stigning registreredes i Italien, hvor priserne steg med 2,0%. Næsten alle EF-lande kunne ligeledes registrere store stigninger : Irland 3,1% i perioden medio august — medio november (i gennemsnit ca. 1% pr. måned), Belgien 1,0%, Danmark og Luxembourg 0,9%, Det forenede Kongerige 0,8%, Frankrig 0,7% og Vesttyskland 0,6%. Kun Nederlandene registrerede en beskedne stigning (0,3%).

Med forbehold for skønnene for december måned skønnes inflationen for hele EF i 1980 at nå op på ca. 14% (årgennemsnittet for 1980 sammenlignet med årgennemsnittet for 1979).

Imidlertid bliver dette tal meget forskelligt i de enkelte lande. For Vesttysklands vedkommende bliver det omkring 5,5%, for Beneluxlandene mellem 6 og 7%, for Danmark næsten 12,5% og omkring 13,5% for Frankrig og USA.

Stigningerne i Det forenede Kongerige og Irland bliver ca. 18%, og for Italiens vedkommende bliver tallet ca. 21%, medens Grækenland, der tiltrådte EF den 1. januar i år, i øjeblikket har en inflationsrate på ca. 25% beregnet på grundlag af en periode på 12 måneder.

**Unemployment: heavy increase in 1980**

At the end of December 1980 7.9 million people were registered as unemployed in the Community of Nine, which represents a rate of 7.2% of the civilian working population. The situation therefore continued to worsen during December, to an extent which was significantly in excess of the usual seasonal rise, particularly in Germany.

All together, from the end of December 1979 to the end of December 1980 the unemployment rate for the whole of the Community increased from 5.7% to 7.2%. The rate increased from 4.9% to 6.6% for men and from 6.9% to 8.3% for women.

Overall, the rise in unemployment during 1980 was 27%. The countries which were the most severely affected were the United Kingdom (+66%), Denmark (+56%), the Netherlands (+49%), Ireland (+38%), and the Federal Republic of Germany (+29%). The rise in unemployment was below the Community average in Luxembourg (+19%), Belgium (+17%), France (+8%) and Italy (+6%).

**Index of industrial production: Continued weakness in EUR 9 industrial production growth trends**

On the basis of returns from eight countries (Germany, France, Italy, Luxembourg, Netherlands, Belgium, United Kingdom, Denmark) the seasonally adjusted index of total industrial production for the European Community is estimated provisionally by EUROSTAT to have attained the level of 114.3 (1975=100) in October 1980. This follows seasonally adjusted EUR 9 indices of 114.5 in August and 113.5 in September and suggests that there has been little change in Community industrial production over the last three months. The average level of production over this period was, however, 3.4% below that recorded in the previous three months (May-July) compared with a fall in production of 2.2% between the third and second quarters and 1.3% between the second and first quarters of 1980. These figures suggest strongly that short-term industrial production growth trends in the Community are continuing to weaken. At the product regroupment level a similar picture can be observed with respect to the Community's intermediate and consumer goods industries and there is also evidence that the short-term growth rate in the investment goods sector, having held up much better earlier in the year, is now weakening sharply.

**Steel: the consequences of European quota restrictions**

In November 1980 Community production of crude steel (9.9 mio t) was slightly lower than for the preceding month. Since the setting up, with effect from 1 October 1980, of a quota system for the ECSC iron & steel industry, the production of crude steel has dropped by 18% compared with Oct-Nov. 1979.

Taking account of available anticipated production figures for December, it is estimated that Community production of crude steel for 1980 will reach 127 mio t (1979:140 mio t).

The recovery of new orders for ordinary steels noticed in September 1980 has been accentuated in October (+25% compared with September, after deseasonalisation).

**Intra-EEC trade: stagnation**

After the usual seasonal decline, intra-EEC trade recovered in September, when imports reached a level of 19 777 million ECU, which represents an increase of 22.8% over August. Nevertheless, this recovery was very relative, since it did nothing more than make up for the rapid decline in imports during August. Compared with September 1979, the rate of growth of imports only increased by 13% (at current prices). This moderate recovery had two consequences. On the one hand, the value of imports in September remained lower than July, and on the other hand, the slowing down in the rate of growth of imports over nine months was 15.8%, compared with 16.1% for the first eight months of the year. Nevertheless, it should be noted that this trend towards a slow-down observed during recent months is now tending to bottom out.

Looking at individual Member States, France increased its imports considerably compared with August (+56.3%) having made up for the drastic decline in imports during the previous month (-38.1%). What is more, the same jolt was observed in the case of sudden French exports, which rose by 65.7%. The result is a trade deficit which is slightly lower than that for August. A fairly distinct recovery of imports took place in Belgium (+29%) and in the United Kingdom (+23.1%). The United Kingdom, moreover, registered the strongest rate of increase of intra-EEC exports for September (+28.7%). Italy, on the other hand, only increased its imports by 7.8%, whereas its exports rose by 17.4%, thereby helping it slightly to reduce its intra-EEC trade deficit.

For the period covering January to September compared with the same period last year, Italy increased its imports by 32.8%, followed by France (+17.3%). These two Member States experienced the highest intra-EEC deficits (respectively, 3.2 thousand million and 2.5 thousand million ECU). Over the same period, the Netherlands and the Federal Republic of Germany saw their trade surpluses increase, reaching 6 and 2.7 thousand million ECU respectively, whilst the United Kingdom achieved a turnaround in its imports, going from a deficit of 2.6 thousand million ECU to a surplus of 286 million ECU.

**Extra-EEC trade: heading towards a deficit greater than 40 000 million ECUs?**

Community imports continued to rise: in September they rose by 13.8% compared with August and by 25.3% compared with September 1979, reaching 22 791 million ECU. Over a period of nine months compared with the same period in 1979, imports increased by 30.5%, thus maintaining previous trends.

The rise was more marked in September in Belgium and Luxembourg (+27.7% and +61.5% compared with September 1979), Ireland (+27.3%) and Denmark (+24.8%). Over the first nine months of the year, Belgium (+47.3%), France (+38.6%) and Italy (+36.9%) experienced growth rates of import penetration distinctly higher than those of the other Member States.

Community exports, which had declined in August, recovered, but at rates which were not in proportion to imports: 12.1% compared with August and 19.2% compared with the previous year. This brings the growth rate over nine months up to 17%, as against 16% over an eight-month period. In spite of this slight recovery, the total trade deficit over the three quarters of the year reached 37.3 thousand million ECU (as compared with 14.1 thousand million in 1979). The rise in exports was particularly impressive in the case of Belgium (+41.9% compared with August and +45.6% compared with September 1979) and Ireland (+40.2% compared with September 1979), which has kept up a high rate of exports for several months. On the other hand, there was no export recovery in the Netherlands and Italy (0.3% and -1.9% compared with August). All together, over a period of nine months Ireland and Belgium reached maximum export growth rates (32 and 29.2%), whereas minimum rates of 13 and 11.5% were recorded in Denmark and Italy.

Over the same period, the extra-EEC trade balance for all the Member States continued to deteriorate: this was particularly so in France (10.1 thousand million ECU), the Netherlands and Italy (8.1 thousand million ECU).

**Consumer prices: November 1980 and first estimates for the year**

The consumer price index for the EC as a whole rose by 1.0% from October to November 1980. The highest increase was recorded in Italy, where prices rose by 2.0%. Nearly all other EC countries registered significant increases: prices in Ireland rose by 3.1% from mid-August to mid-November (on average about 1.0% per month), in Belgium by 1.0%, in Denmark and Luxembourg by 0.9%, in the United Kingdom by 0.8%, in France by 0.7% and in Germany (FR) by 0.6%. Only in the Netherlands was the rate of increase rather low (0.3%).

Pending figures for the month of December, it is estimated that inflation for the EC as a whole will be about 14% in 1980 (annual average 1980 compared with that of 1979).

However this rate will be very different for the individual countries: for Germany (FR) it will be about 5.5%, for the Benelux countries between 6 and 7%, for Denmark near 12.5% and for France and USA about 13.5%.

Increases will be about 18% for the United Kingdom and Ireland and 21% for Italy, whereas Greece, which has become an EC member state since January 1st, currently has an inflation rate of about 25% over 12 months.

**Disoccupazione : forte aumento nel 1981**

Alla fine del mese di dicembre del 1980, risultavano iscritte nelle liste di disoccupazione della Comunità dei Nove 7,9 milioni di persone, pari al 7,2% della popolazione attiva civile. La situazione ha quindi continuato a peggiorare nel mese di dicembre, in proporzioni che superano ampiamente l'aumento stagionale abituale, particolarmente in Germania.

Nel complesso, tra fine dicembre 1979 e fine dicembre 1980 il tasso di disoccupazione per l'intera Comunità è passato dal 5,7% al 7,2% ovvero, per sesso, dal 4,9% al 6,6% per gli uomini e dal 6,9% all'8,3% per le donne.

Per l'intero 1980 l'aumento complessivo della disoccupazione è stato del 27% : i paesi più colpiti da quest'evoluzione sono il Regno Unito (+66%), la Danimarca (+56%), i Paesi Bassi (+49%), l'Irlanda (+38%) e la Repubblica federale di Germania (+29%), mentre gli aumenti della disoccupazione sono stati inferiori alla media comunitaria nel Lussemburgo (+19%), in Belgio (+17%), in Francia (+11%) e in Italia (+6%).

**Indice della produzione industriale : persistente debolezza nell'evoluzione comunitaria**

Secondo le stime dell'EUROSTAT, basate sui dati disponibili per otto paesi (Germania, Francia, Italia, Lussemburgo, Paesi Bassi, Belgio, Regno Unito, Danimarca), l'indice globale destagionalizzato della produzione industriale per la Comunità europea ha raggiunto nell'ottobre 1980 il livello di 114,3 (su base 1975=100), mentre l'indice destagionalizzato EUR 9 di agosto era di 114,5 e quello di settembre 113,5 : queste cifre indicano che non si sono avuti cambiamenti significativi nella produzione industriale comunitaria negli ultimi tre mesi. Tuttavia, nello stesso periodo il livello medio della produzione è risultato inferiore del 3,4% a quello osservato nei tre mesi precedenti (maggio-luglio); queste cifre vanno raffrontate con la flessione produttiva del 2,8%, osservata nel terzo trimestre rispetto al secondo, e dell'1,3% nel secondo trimestre del 1980 rispetto al primo. Tutti questi dati indicano chiaramente che l'evoluzione tendenziale della produzione industriale nella Comunità continua a peggiorare. Per grandi gruppi di prodotti, i beni intermedi e quelli di consumo presentano un andamento simile, mentre per i beni d'investimento comincia a peggiorare notevolmente anche il tasso di crescita a breve termine, che si era finora mantenuto più stabile.

**Siderurgia : le conseguenze del contingentamento europeo**

In novembre 1980 la produzione di acciaio grezzo nella Comunità (9,9 milioni di t.), è stata leggermente inferiore a quella del mese precedente. Dopo l'instaurazione, con effetto dal 1° ottobre 1980, di una disciplina di quote per la siderurgia della CECA, la produzione di acciaio grezzo è diminuita dal 18% in rapporto ai mesi di ottobre-novembre 1979.

Tenuto conto delle previsioni di produzione disponibili per dicembre, si può stimare che la produzione comunitaria di acciaio grezzo raggiungerà nel 1980 circa 127 milioni di t. (1979 : 140 milioni di t.).

La ripresa delle nuove ordinazioni di acciaio comune rilevata in settembre 1980 si è accentuata in ottobre (+25% in rapporto a settembre, dopo la destagionalizzazione).

**Commercio intracomunitario : ristagno**

Dopo la diminuzione stagionale, si è avuta nel mese di settembre una ripresa degli scambi intracomunitari che, valutati sulla base delle importazioni, hanno raggiunto la cifra di 19 777 milioni di ECU, con un aumento del 22,8% sul mese di agosto. La ripresa è tuttavia molto relativa e non fa che recuperare il crollo del mese di agosto. Con riferimento a settembre del 1979, il tasso d'incremento delle importazioni intracomunitarie è stato d'altronde solo del 13%, in valori correnti. La scarsa entità della ripresa ha due conseguenze : da un lato, il valore delle importazioni di settembre resta inferiore a quelle di luglio; d'altro lato, il tasso di sviluppo degli scambi intracomunitari sull'arco di nove mesi risulta rallentato, scendendo al 15,8%, mentre era del 16,1% per i primi otto mesi dell'anno. Va notato tuttavia che questa tendenza al rallentamento, osservata nei mesi scorsi, tende a stabilizzarsi.

Per Stati membri, si osserva che la Francia ha aumentato notevolmente le sue importazioni rispetto ad agosto (+56,3%), recuperando il brusco crollo del mese precedente (-38,1%). Lo stesso sbalzo si osserva d'altronde per le esportazioni francesi, salite del 65,7% : il risultato è un disavanzo commerciale lievemente inferiore a quello del mese d'agosto. Una ripresa abbastanza netta delle importazioni si è manifestata in Belgio (+29%) e nel Regno Unito (+23,1%), paese che ha d'altronde realizzato il maggior tasso di espansione delle esportazioni intracomunitarie nel mese di settembre (+28,7%). Inversamente, l'Italia ha aumentato le importazioni solo del 7,8%, e le esportazioni ben del 17,4%, riducendo così lievemente il proprio disavanzo negli scambi commerciali con gli altri paesi della CEE.

Nel periodo gennaio-settembre, l'Italia ha aumentato le proprie importazioni del 32,8% rispetto allo stesso periodo dell'anno precedente; per la Francia, il tasso corrispondente è il 17,3%. Questi due Stati membri accusano i più forti disavanzi nei confronti del complesso degli altri paesi della CEE (rispettivamente : 3,2 miliardi e 2,5 miliardi di ECU). Nello stesso periodo, i Paesi Bassi e la Repubblica federale di Germania hanno invece aumentato il loro attivo commerciale, pari rispettivamente a 6 e 2,7 miliardi di ECU, mentre nel Regno Unito si è verificato un cambiamento di segno nel saldo del commercio intracomunitario, che passa da un disavanzo di 2,6 miliardi di ECU a un attivo di 286 milioni di ECU.

**Commercio estero della comunità : verso un disavanzo di oltre 40 miliardi di ECU?**

Le importazioni della Comunità hanno proseguito il loro aumento, raggiungendo nel settembre del 1980 i 22 791 milioni di ECU, cifra che corrisponde ad un incremento del 13,8% rispetto al mese di agosto e del 25,3% rispetto a settembre del 1979. Nei primi nove mesi dell'anno le importazioni sono aumentate del 30,5% rispetto al corrispondente periodo del 1979 : risultano così mantenute le tendenze precedenti.

L'aumento osservato in settembre è particolarmente deciso per la zona Belgio-Lussemburgo (+27,7%), per l'Irlanda (+27,3%) e per la Danimarca (+24,8%). Sull'arco dei primi nove mesi, il Belgio (+47,3%), la Francia (+38,6%) e l'Italia (+36,9%) hanno raggiunto tassi di sviluppo delle importazioni nettamente superiori a quelli degli altri Stati membri.

Le esportazioni della Comunità, che erano diminuite in agosto, hanno segnato una ripresa in settembre, ma ad un ritmo assolutamente non comparabile a quello delle importazioni : +12,1% rispetto ad agosto e +19,2% rispetto all'anno precedente. In tal modo il tasso d'incremento delle esportazioni su nove mesi sale al 17%, contro il 16% su otto mesi. Nonostante questa lieve ripresa, il disavanzo del complesso degli scambi commerciali dei primi tre trimestri dell'anno arriva a 37,3 miliardi di ECU (contro 14,1 nel 1979). L'aumento delle esportazioni è particolarmente spettacolare per il Belgio (+41,9% sul mese di agosto e +45,6% su settembre 1979) e per l'Irlanda (+40,2% su settembre 1979), che già da vari mesi mantiene un ritmo sostenuto di esportazione. La ripresa delle esportazioni non si è invece manifestata nei Paesi Bassi e in Italia (+0,3% e, rispettivamente, -1,9% sul mese di agosto). Complessivamente, su nove mesi, i più elevati tassi d'incremento delle esportazioni sono stati raggiunti dall'Irlanda (+32%) e dal Belgio (+29,3%), quelli più bassi dalla Danimarca (+13%) e dall'Italia (+11,5%).

Nello stesso periodo, il saldo degli scambi con i paesi terzi ha continuato a peggiorare per tutti gli Stati membri, e particolarmente per la Francia (disavanzo di 10,1 miliardi di ECU), i Paesi Bassi e l'Italia (8,1 miliardi di ECU).

**Prezzi al consumo : andamento in novembre e prime stime per l'intero 1980**

L'indice dei prezzi al consumo per il complesso della CE è salito dell'1,0% tra ottobre e novembre del 1980. L'aumento più forte si osserva in Italia, dove i prezzi sono saliti del 2,0%. Quasi tutti i paesi della CE registrano peraltro aumenti rilevanti : in Irlanda, l'aumento del 3,1% tra metà agosto e metà novembre dà una media mensile dell'1% circa, mentre i tassi corrispondenti sono dell'1,0% per il Belgio, dello 0,9% per la Danimarca e il Lussemburgo, dello 0,8% per il Regno Unito, dello 0,7% per la Francia e dello 0,6% per la Repubblica federale di Germania. Solo i Paesi Bassi registrano un aumento dei prezzi molto moderato (0,3%).

In attesa delle stime relative al mese di dicembre, si può oggi valutare che il tasso d'inflazione per il complesso della CE sarà nel 1980 del 14% circa (media annuale del 1980 confrontata con quella del 1979).

Tale tasso risulterà comunque molto diverso da un paese all'altro : intorno al 5,5% per la Repubblica federale di Germania, tra il 6 et il 7% per i paesi del Benelux, quasi del 12,5% per la Danimarca e intorno al 13,5% per la Francia e gli USA.

L'aumento dei prezzi sarà del 18% circa nel Regno Unito e in Irlanda; per l'Italia la cifra si collocherà intorno al 21%. La Grecia, entrata nella Comunità europea il 1° gennaio scorso, ha attualmente un'inflazione del 25% circa su 12 mesi.

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturrelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlige, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelseres definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

## PREFACE

EN

This bulletin is in two parts: 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria; this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

## AVVERTENZA

IT

Il presente bollettino consta di 2 parti: l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa.

Die deutsche Fassung dieses Bulletins wird am zweiten Dienstag jeden Monats in Druck gegeben.

La version française de ce bulletin est mise sous presse le second mardi de chaque mois.

De Nederlandse versie van dit bulletin gaat de tweede dinsdag van elke maand ter perse.

(1) Alcuni dati più dettagliati per branca sono riportati nel bollettino « Indicatori congiunturali dell'industria »

(2) I dati contenuti in questa parte del bollettino rappresentano i risultati dell'indagine sulla congiuntura presso i capi di impresa delle Comunità. Alcuni dati più particolari figurano in « Economia europea ».

(3) Alcuni dati del commercio estero più dettagliati ed espressi in UCE sono riportati nel « Bollettino mensile del commercio estero ».

(4) Consumi finali delle famiglie

## UNITED STATES

- 02 Gross national product in constant (1972) dollars.  
 03 Gross national product : implicit price deflators — seasonally adjusted.  
 06 Labour force : unemployed — seasonally adjusted.  
 07 Labour force : help wanted advertising — seasonally adjusted.  
 22 Industrial production — seasonally adjusted.  
 23 Industrial production : intermediate products — seasonally adjusted.  
 24 Industrial production : equipment — seasonally adjusted.  
 25 Industrial production : consumer goods — seasonally adjusted.  
 28 Industrial production : motor vehicles and parts — seasonally adjusted.  
 38 Housing starts and permits : total privately owned — seasonally adjusted.

- 39 Manufacturers' sales, inventories : new orders, net — seasonally adjusted.  
 41 Foreign trade : general imports, total — seasonally adjusted.  
 42 Foreign trade : exports — seasonally adjusted.  
 43 Foreign trade : trade balance — seasonally adjusted.  
 45 Foreign trade : imports — unit value.  
 46 Foreign trade : exports — unit value.  
 47 Foreign trade : terms of trade.  
 54 Domestic trade : retail trade — estimated sales — seasonally adjusted.  
 63 Transportation equipment : trucks and buses — registrations.  
 79 Commodity prices : consumer prices (CPI-U).

- 87 Federal government budget surplus (+) or deficit (—).  
 89 Money supply.  
 92 Gross official reserves.  
 95 Effective exchange rate of the dollar.  
 96 Balance on current account — seasonally adjusted.  
 98 US assets abroad reserve assets excluded — seasonally adjusted.  
 99 Foreign assets — foreign official excluded — seasonally adjusted.
