Arbejdsløshed - mere end 1,8 millioner arbejdsløse i 1980

Føllestatistik bestående af en af månedstatistik for de ved slutningen af januar 1981 8,4 millioner arbejdsløse, svarende til 7,7% af den civile arbejdsstyrkes befolkning.

Dette var resultatet af en tilsvarende stigning på en 1/2 million arbejdsløse i løbet af måned. Tredjedelen af det samlede månedlige ændring i størrelse og i sæsonkorrigerede tal for antallet af arbejdsløse blev på 2 millioner, imidlertid også de sæsonkorrigerede tal for den samlede befolkning og arbejdsstyrken. Det samlede resultat, nemlig stigningen, er at arbejdsløshedens andel af arbejdsstyrken er blevet mindre i løbet af året.

Efter at antallet af registrerede arbejdsløse havde været på 1,8 millioner i november 1980, blev det i december 1980 på 1,8 millioner. Den månedlige ændring på yderligere 1,6 millioner arbejdsløse i december 1980 var resultatet af en stigning på 1,6 millioner arbejdsløse i den månedlige ændring af den samlede befolkning og arbejdsstyrken. Den månedlige ændring i december 1980 var resultatet af en stigning på 1,6 millioner arbejdsløse i den månedlige ændring af den samlede befolkning og arbejdsstyrken.

Indførsel over industriproduktionen - Nedgangen i EF-landene over halvårsproduktionens værdier er afvigende

Ifølge EUROSTATS over landene har den månedlige værdi af den samlede industriproduktion i oktober 1980 været på 2,8% i forhold til den samlede værdi af den samlede industriproduktion i september 1980. Den månedlige værdi af den samlede industriproduktion i oktober 1980 var resultatet af en stigning på 2,8% i forhold til den samlede værdi af den samlede industriproduktion i september 1980.

Indførslen over industriproduktionen i oktober 1980 var resultatet af en stigning på 2,8% i forhold til den samlede værdi af den samlede industriproduktion i september 1980. Den månedlige værdi af den samlede industriproduktion i oktober 1980 var resultatet af en stigning på 2,8% i forhold til den samlede værdi af den samlede industriproduktion i september 1980.

Ser man nærmere på registrerede arbejdsløse i oktober 1980, så var den månedlige værdi af den samlede industriproduktion i oktober 1980 resultatet af en stigning på 2,8% i forhold til den samlede værdi af den samlede industriproduktion i september 1980. Den månedlige værdi af den samlede industriproduktion i oktober 1980 var resultatet af en stigning på 2,8% i forhold til den samlede værdi af den samlede industriproduktion i september 1980.

Energi - Statistiske oplysninger vedrørende elektricitetsproduktionen i 1980

Den månedlige produktion af elektricitet og forbruget af elektricitet er blevet rapporteret i 1978 og 1979, fortsat blev i 1980. Netforbruget af elektricitet i oktober 1980 var resultatet af en stigning på 2,8% i forhold til den samlede værdi af den samlede industriproduktion i september 1980.

For de traditionelle kraftværksværdierne registrerede man i Føllestatistik (EUR 9) en produktion på 2,8%. Den månedlige værdi af den samlede industriproduktion i oktober 1980 var resultatet af en stigning på 2,8% i forhold til den samlede værdi af den samlede industriproduktion i september 1980.

Samhandelen inden for Føllestatistik og Føllestatistikets samhandel med tredjelande - generel nedgang

I løbet af oktober måned voksede samhandelen inden for Føllestatistik med kun 2,8% af 21,2 Mrd ECU (import). Denne udvikling var resultatet af en stigning på 2,8% i forhold til den samlede værdi af den samlede industriproduktion i september 1980.

Forbrugerpriserne i december 1980

Forbrugerprisindekset for EF steg med 0,4% fra november til december 1980. Stigningerne var særligt kraftige i Italien (1,1%), Luxembourg (1,1%) og Frankrig (0,9%), mens stigningerne var mindre eller negative i alle de andre medlemslande.

Penge og finanser - Udvalgte væsentlige begivenheder og nye begivenheder

Manuskript afsluttet den 23. februar 1981. Manuskript completed 23 February 1981. Manoscritto terminato il 23 febbraio 1981.

Arbejdsløshed : mere end 1,8 millioner arbejdsløse i 1980

Fællesskabet bestående af de ni medlemsstater havde ved slutningen af januar 1981 8,4 millioner arbejdsløse svarende til 7,7% af den civile erhvervsaktive befolkning.

Dette var resultatet af en rekordstigning på en 1/2 million arbejdsløse i januar måned. Traditionelt er det i denne måned, sæsonarbejdsløsheden er størst, og i sæsonkorrigerede tal når antallet af arbejdsløse ikke op på 8 millioner. Imidlertid stiger de sæsonkorrigerede tal fortsat både for mænds og kvinders vedkommende. Det eneste positive, man kan konstatere, er at arbejdsløshedsstigningen målt i sæsonkorrigerede tal synes at aftage.

Efter at antallet af registrerede arbejdsløse havde stabiliseret sig ved omkring 6 millioner i 1978 og 1979, oplevede man således i 1980 en kraftig stigning på yderligere 1,8 millioner arbejdsløse.

I det udvidede europæiske fællesskab omfattende Grækenland siden årets begyndelse udgjorde det samlede antal registrerede arbejdsløse ved udgangen af januar 1981 8,5 millioner svarende til en arbejdsløshedsprocent på 7,5% i forhold til den civile erhvervsaktive befolkning. Grækenlands indtræden i Fællesskabet har således ikke ændret meget ved arbejdsløshedsituationen som helhed betragtet.

Indekset over industriproduktionen : Nedgangen i EF-indekset over industriproduktionens vækstrate er aftagende

Ifølge EUROSTATs skøn faldt det ikke-sæsonkorrigerede indeks for hele industrien til 125,1 (1975=100) i november 1980, hvilket svarer til en nedgang på 2,8% i forhold til den tilsvarende måned sidste år. I august, september og oktober udgjorde den årlige ændring i indekset henholdsvis -4,1%, -5,3% og -3,9%, hvilket antyder, at 4. kvartal 1980 måske markerer begyndelsen til en vending af kurven, der viser vækstnedgang inden for industriproduktionen. De sæsonkorrigerede tal giver anledning til at drage samme konklusion. Det fremgår således, at indekset over hele industrien steg til 116,0 (1975=100) i november 1980, hvilket svarer til en månedlig stigning på 1,5%, mens ændringen i september og oktober måned var på henholdsvis -0,9% og 0,8%. Den kortsigtede stigningstendens for industriproduktionen er stadig negativ, men som nævnt ovenfor skete der i november en mærkbar forbedring. Det er interessant at konstatere, at den aftagende nedgang i industriproduktionen på kort sigt markerer afslutningen på en periode på næsten et år, hvor tallene konstant forværredes hver måned.

Ser man nærmere på væksttendenserne inden for de vigtigste produktionsgrupper, fremgår det, at det konstante fald i stigningstakterne blev bremset i november måned inden for mellemproduktindustrien og i mindre omfang inden for investeringsgodeindustrien og forbrugsgodeindustrien. Inden for mellemproduktindustrien er ændringen særlig markant, hvilket i høj grad vil påvirke udviklingen i produktionen.

Hvad angår indekserne over industriproduktionen i medlemsstaterne viser de seneste tal, at nedgangen i væksten i industriproduktionen på kort sigt er aftaget i Tyskland, Belgien, Nederlandene, Luxembourg og Danmark, mens der er vendt helt op og ned på udviklingen i Italien, hvor den negative vækst er ændret til en positiv vækst. I Frankrig og i Det forenede Kongerige var stigningstakten imidlertid stadig faldende, idet den negative tendens var særlig mærkbar i det sidstnævnte land.

Energi : Statistiske oplysninger vedrørende elektricitetsproduktionen i 1980

Den stigning i produktionen og forbruget af elektricitet, der blev registreret i 1978 og 1979, fortsatte ikke i 1980. Nettoforbruget (inklusive tab) for hele Fællesskabet (EUR 9) udgjorde i 1980 1 193 Mrd kWh mod 1 186 Mrd kWh i 1979, hvilket svarer til en stigning på kun 0,6%, mens man de to tidligere år registrerede stigninger i størrelsesordenen 5%. Bortset fra 1975 er dette den mindste fremgang, der hidtil er registreret på fællesskabsplan. Denne kraftige nedgang i forbrugsstigningen, som har kunnet konstateres i alle medlemsstaterne, skyldes den generelle afmatning inden for industrien samt den aftagende efterspørgsel hos husholdningerne, hvilket har præget de økonomiske konjunkturer i 1980.

For De Ti (EUR 10) udgjorde nettoforbruget (inklusive tab) i 1980 1 215 Mrd kWh.

Hvad angår produktionen konstaterer man en stigningstakt, der er lige så lav som for forbrugets vedkommende (0,6% for EUR 9). De hydrologiske forhold har stort set været de samme som i 1978 og 1979, hvorfor produktionen af elektricitet ved hjælp af vandkraft ikke har varieret meget og fortsat dækker 12% af den samlede produktion. Atomkraftens betydning er derimod øget kraftigt (16%), hvilket Frankrig har været stærkt medvirkende til (+53%), og atomkraften dækker nu mere end 12% af Fællesskabets behov.

For de traditionelle kraftværkers vedkommende registrerede man i Fællesskabet (EUR 9) en produktionsnedgang på 0,6%.

Samhandelen inden for Fællesskabet og Fællesskabets samhandel med tredjelande : generel nedgang

I løbet af oktober måned voksede samhandelen inden for Fællesskabet med kun 7,5% til 21,2 Mrd ECU (import). Denne udvikling bekræfter den tendens, man allerede har kunnet konstatere i de foregående måneder.

Det samme fænomen gør sig gældende inden for Fællesskabets samhandel med tredjelande. Fællesskabets import fra tredjelande (23,4 Mrd ECU) steg kun med 2,7% i forhold til september måned, mens de i perioden mellem august og september steg med knap 14%. Samme udvikling gør sig gældende for eksporten (20,1 Mrd ECU), hvor nedgangen i stigningstakten er knap så stor som for importens vedkommende : +9,3% mod 12,1% i perioden mellem august og september. Til trods for nedgangen i importstigningen var Fællesskabets handelsbalance over for tredjelande stadig klart negativ for oktober måned (3,3 Mrd ECU). Dette betyder, at Fællesskabets handelsunderskud i de forløbne 10 måneder når op på 40,6 Mrd ECU.

Forbrugerpriserne i december 1980

Forbrugerprisindekset for EF steg med 0,8% fra november til december 1980. Stigningerne var temmelig kraftige i Italien (1,2%), Luxembourg (1,1%) og Frankrig (0,9%), mens stigningerne var moderate eller beskedne i alle de andre medlemsstater.

Prisstigningerne på årsbasis for hele EF var på 13,8% (årgennemsnit for 1980 sammenlignet med gennemsnittet for 1979). En sammenligning med de tilsvarende tal for 1979 viser en kraftig stigning i inflationen i det forløbne år.

Penge og finanser : tildeling af særlige trækingsrettigheder og nyt beregningsgrundlag

IMF har tildelt 4 052 Mio. SDR til dets 141 medlemmer, heraf 1 099 Mio SDR til de ti medlemmer af Det europæiske Fællesskab (Det forenede Kongerige med 298 Mio SDR, Tyskland med 219 Mio SDR og Frankrig med 195 Mio SDR er de vigtigste modtagerlande). Det er den tredje og sidste tildeling, der sker i overensstemmelse med den resolution, der blev vedtaget i 1978 af rådet af nationalbankdirektører, som havde fastsat en tildeling på ca. 4 Mrd SDR fordelt på de tre år 1979, 1980 og 1981.

Desuden har IMF forenklet den kurv, som danner grundlag ved fastsættelsen af SDR's værdi, ved at nedsætte antallet af valutaer, som indgår i denne kurv, fra 16 til 5. Ændringen trådte i kraft den 1. januar, og værdien af SDR fastsættes på grundlag af følgende valutaers værdi : US dollar (0,54), D-Mark (0,46), den japanske yen (34), den franske franc (0,74) og pund sterling (0,071).

Landbrugspriser : udviklingen i 1980

Efter EUROSTATs skøn vil produktionsindekset for landbrugsvarer for EUR 9 stige med 6,6% i 1980 i forhold til det foregående år. I 1980 skulle købspriserne på varer og tjenesteydelser til brug for driften i landbruget stige med 12,1%, hvilket er en meget kraftig stigning sammenlignet med de 8,9% i 1979. Især forventes en kraftig stigning for posterne » brændstoffer og smøremidler « (+26,5%) og » Gødning og jordforbedringsmidler « (+20,5%). Til gengæld forventes kun en stigning på 8,1% for den vigtige post » foderstoffer «, som alene udgør 45% af det samlede indeks.

I de forskellige medlemsstater vil stigningen sandsynligvis andrage mellem 7% og lidt over 15%.

En sammenligning af de to rækker viser for Fællesskabet som helhed, at stigningen i købspriserne på varer og tjenesteydelser til brug for driften i landbruget mellem 1979 og 1980 sandsynligvis vil være dobbelt så stor som stigningen i salgspriserne for landbrugsvarer. For at forstå konsekvenserne heraf må man tage i betragtning, at varer og tjenesteydelser til brug for driften i landbruget udgør mindre end 50% af produktionen af færdigvarer inden for denne sektor, og at indvirkningen på landmændenes indtjening derfor vil være temmelig uensartet.

I alle medlemsstaterne med undtagelse af Italien (hvor input- og outputpriserne er steget med næsten det samme) er inputpriserne steget betydeligt mere end outputpriserne. Forskellen forventes at være særlig stor i Irland og Frankrig, mens den vil være mindre markant i de øvrige seks medlemsstater.

Statistiske oplysninger vedrørende elektricitetsproduktionen i 1980

Sammenlignelse af Fællesskabets samlede indtægt med værdiansættelse af Fællesskabets samlede indtægt

Forsøgsresultater i december 1980

Prøve og finansiering af særlige teknologiprojekter og nyt personale

Unemployment: 1.8 million more unemployed in 1980

At the end of January 1981, there were 8.4 million unemployed persons in the Community of Nine, i.e. 7.7% of the civilian working population.

The increase recorded in January was a record half million. This month is normally marked by a seasonal peak and the seasonally adjusted number of unemployed is less than 8 million. The seasonally adjusted figures for both male and female unemployment, however, are still rising. The only positive factor to be noted is that the rate of increase in unemployment appears to be levelling out in terms of seasonally adjusted data. After remaining stable at about 6 million in 1978 and 1979, the number of registered unemployed has thus risen very substantially, by 1.8 million, in 1980.

In the enlarged European Community of ten members, which has included Greece since the beginning of this year, the total number of registered unemployed at the end of January 1981 was 8.5 million, representing an unemployment rate of 7.5% of the civilian working population. The enlargement of the Community by the accession of Greece thus does not greatly affect the overall employment situation.

Index of industrial production: Deceleration in the decline of industrial production growth trends in the Community

The unadjusted all industries index is estimated by EUROSTAT to have attained the level of 125.1 (1975=100) in November 1980, a drop of 2.8% over the corresponding month of the previous year. This follows yearly percentage changes in the index of -4.1%, -5.3% and -3.9% in August, September and October calculated on the same basis, and provides a pointer that the fourth quarter of 1980 may mark the beginning of the bottoming out of the cyclical downturn in industrial production. The same inference can be drawn from the seasonally adjusted data showing that the all industries' index rose to 116.0 (1975=100) in November 1980, a monthly increase of 1.5%, following changes of -0.9% and 0.8% in September and October respectively. Short-term industrial production growth trends remain negative but as suggested by the developments outlined above the result for the month of November was a noticeable improvement on some earlier rates (see table 2). Interestingly, the deceleration in the decline of short-term growth has brought to an end a period of nearly a year during which rates have deteriorated every month.

Examining total industry growth trends in terms of developments in the major product regroupments reveals that the steady decline in short-term rates was arrested most sharply in November in the intermediate goods sector, followed by the investment goods sector and the consumer goods sector. Both in terms of the size of the improvement and the influence on the all industries index, the intermediate goods sector is most significant.

Turning to trends at the member state level the latest data show a deceleration in the decline of short-term industrial production growth in Germany, Belgium, Netherlands, Luxembourg and Denmark, with a large turnaround from negative to positive growth being registered in Italy. However, in France and the United Kingdom, short-term growth rates continued to fall, with UK rates in particular remaining sharply negative.

Statistical aspects of electricity supply and demand in 1980

The recovery in both production and consumption of electrical energy recorded in 1978 and 1979 was not consolidated in 1980. Net consumption (including losses) for the whole Community (EUR 9) amounted to 1 193 thousand million kWh in 1980 as against 1 186 thousand million kWh in 1979, an increase of only 0.6%, compared with increases of around 5% in the two previous years. With the exception of 1975, this annual increase was the lowest recorded to date for the Community.

This distinct fall-off in consumption, which was also noted in all the Community countries, was due to the general decline in industrial activity and the reduced demand from the domestic sector, which dominated the general economic situation in 1980.

For the Community of the Ten (EUR 10), net consumption (including losses) amounted to 1 215 thousand million kWh in 1980.

On the production side, the rate of increase was as low as that for consumption (+0.6% for EUR 9). Hydrological conditions were more or less the same as in 1978 and 1979, as a result, production of hydroelectricity did not differ greatly, continuing to account for 12% of total production. On the other hand, there was a further increase (+16%) in the production of nuclear energy owing to the substantial contribution from France (+53%), consequently, this type of energy accounted for more than 12% of Community requirements.

As a result, production in conventional thermal power stations fell by 0.6% in the Community (EUR 9).

Intra and extra-Community trade: general slowing of the growth of trade

In October, intra-Community trade increased by only 7.5% to 21 200 million ECU in terms of imports. This confirms the trend towards slower growth which was already apparent in the previous months.

The same loss of impetus is also apparent in extra-Community trade.

Imports from countries outside the EEC (23 400 million ECU) were only 2.7% higher than in September, whereas the September figures had been almost 14% higher than those for August. The same applies to exports (20 100 million ECU), though the decline in the growth rate was less severe than in the case of imports: +9.3% as compared with a difference of +12.1% between the August and September figures. Despite the drop in the growth rate for imports, the Community trade balance continued to exhibit a substantial deficit in October (3 300 million ECU). The trade deficit of the Community over the ten-month period ending in October thus amounts to 40 600 million ECU.

Consumer prices in December 1980

The consumer price index for the EC rose by 0.8% from November to December 1980. Rises were rather high in Italy (1.2%), Luxembourg (1.1%) and in France (0.9%), whereas the other EC-countries recorded only moderate or low increases.

The increase for the EC as a whole was 13.8% in 1980 (annual average 1980 compared with that of 1979). A comparison with the corresponding figures for 1979 shows the clear acceleration of the inflation during last year.

Finance: SDRs: Allocation and new definition

The IMF has allocated SDRs 4 502 million to its 141 members, of which SDRs 1099 (27%) were taken up by the ten EC-countries (UK: 298 Mio SDR, Germany: 219 Mio SDR, France 195 Mio SDR being the main beneficiaries).

This allocation is the third and final made in accordance with a resolution by the Board of Governors in 1978, which provided for an allocation of about SDR 4 Mrd in each of the three years 1979, 1980, 1981.

Also, the IMF has simplified the basket determining the value of the SDR by reducing the number of currencies within this basket from 16 to 5. Effective January 1, the value of the SDR will be the sum of the values of the following currencies : US dollar (0.54), Deutsche Mark (0.46), Japanese Yen (34), French Franc (0.74), Pound Sterling (0.071).

Agricultural prices: movement in 1980

The forecasts indicate that the overall index of producer prices of agricultural products for EUR 9 is likely to be 6.6% higher in 1980 than in the previous year.

It is likely that in the Community as a whole the purchase prices of goods and services for current consumption in agriculture will rise by 12.1% in 1980. This represents a marked acceleration of the upward movement of prices as compared with the 8.9% increase observed in 1979. A particularly large increase is anticipated in 1980 for "energy and lubricants" (+26.5%) and "fertilizers and soil improvers" (+20.5%). On the other hand, a rise of only 8.1% is expected in prices for the important item "animal feeding-stuffs", the value weight of which alone accounts for 45% of the overall index.

The rates of increase in the various Member States are expected to range from +7% to just over +15%.

A comparison of the two series indicates that for the Community as a whole the percentage increase between the 1979 and 1980 purchase prices of goods and services for current consumption in agriculture is forecast to be almost twice as large as the percentage increase in the selling prices for agricultural products. When assessing the significance of this observation, however, one must bear in mind that goods and services for current consumption in agriculture represent less than 50% of the value of agricultural final production so that the effects on farming income may be rather different.

In all Member States of the Community with the exception of Italy (where the percentage rise in input and output prices is expected to be the same), input prices are forecast to rise considerably more rapidly than output prices. The difference is considered likely to be particularly large in Ireland and in France, but not so marked in the other six Member States.

However, in France and the United Kingdom, short-term growth rates continued to fall, with UK rates in particular showing steady declines. In Italy, Belgium, Netherlands, Luxembourg and Denmark, with a slight recovery from negative to positive growth being registered in Italy. In the Community as a whole, the rate of growth in the value of agricultural final production was 10.7% in 1979, compared with 8.9% in 1978. The rate of increase in the value of agricultural final production in 1980 is forecast to be 12.1%.

Statistical aspects of electricity supply and demand in 1980

The forecast for 1980 shows a continuation of the upward trend in electricity demand in the Community, with an overall increase of 5.5% compared with 1979. The rate of increase in electricity demand is forecast to be 5.5% in 1980, compared with 5.2% in 1979. The rate of increase in electricity demand in 1980 is forecast to be 5.5%.

Imports and exports of goods and services in the Community were 12.1% higher in 1980 than in 1979. The rate of increase in imports and exports of goods and services in 1980 is forecast to be 12.1%.

Consumer prices in December 1980

The consumer price index for the EC rose by 0.8% from November to December 1980. The rate of increase in the consumer price index for the EC in 1980 is forecast to be 0.8%.

Financial SDRs: Allocation and new definition

The IMF has allocated 250 million SDRs to the EC in 1980. The rate of increase in the value of financial SDRs in 1980 is forecast to be 250 million SDRs.

Disoccupazione : aumento di 1,8 milioni di disoccupati nel 1980

Alla fine del mese di gennaio 1981 risultavano iscritti nelle liste di disoccupazione della Comunità dei Nove 8,4 milioni di persone, pari al 7,7 % della popolazione attiva civile.

Nel mese di gennaio si è osservato l'aumento record di mezzo milione di disoccupati. Gennaio rappresenta tradizionalmente una punta stagionale e, in dati destagionalizzati, il numero di disoccupati non raggiunge gli 8 milioni. Ciononostante i dati destagionalizzati continuano a far registrare un aumento del numero di disoccupati di entrambi i sessi. L'unico dato positivo che si possa rilevare è che l'incremento della disoccupazione sembra rallentarsi, sulla base dei dati destagionalizzati.

Nel 1978 e nel 1979 il numero dei disoccupati iscritti nelle liste di collocamento si era stabilizzato intorno alla cifra di circa 6 milioni : nel 1980 si è avuto quindi un aumento di ben 1,8 milioni di unità.

Se si considera la Comunità europea a Dieci (compresa la Grecia a decorrere dal 1° gennaio 1981), il numero totale di disoccupati ammontava, alla fine del mese di gennaio 1981, a 8,5 milioni, il che corrisponde a un tasso di disoccupazione del 7,5 % rispetto alla popolazione attiva civile. L'ampliamento della Comunità a seguito dell'adesione della Grecia non incide quindi in misura notevole sulla situazione globale della disoccupazione.

Indice della produzione industriale : si attenua la flessione dell'indice comunitario delle tendenze dell'andamento della produzione industriale

Secondo le stime dell'EUROSTAT, l'indice non corretto per il complesso dell'industria ha raggiunto nel novembre 1980 il livello di 125,1 (1975 = 100), il che rappresenta una diminuzione del 2,8 % rispetto allo stesso mese dell'anno precedente. Nei mesi di agosto, settembre e ottobre, la variazione annuale della percentuale dell'indice era stata rispettivamente del -4,1 %, -5,3 % e -3,9 %, il che sembra indicare che il quarto trimestre 1980 potrebbe segnare l'inizio di un'inversione della curva indicante la flessione ciclica della produzione industriale. Dai dati destagionalizzati si può trarre la stessa conclusione : infatti, si può vedere che l'indice per il complesso dell'industria è passato, nel novembre 1980, al livello di 116,0 (1975 = 100), il che rappresenta un aumento mensile dell'1,5 %, mentre per i mesi di settembre e di ottobre la variazione era stata del -0,9 % e, rispettivamente, dello 0,8 %. Le tendenze dell'andamento della produzione industriale a breve termine permangono negative, sebbene si sia visto che il mese di novembre ha fatto registrare un sensibile miglioramento. È interessante notare che il rallentamento della flessione della produzione industriale a breve termine ha messo fine a un periodo di quasi un anno durante il quale i tassi erano diminuiti invariabilmente da un mese all'altro.

Dall'esame delle tendenze dell'evoluzione dei principali gruppi di prodotti si può vedere che la continua flessione dei tassi di crescita a breve termine ha subito un netto colpo d'arresto nel mese di novembre nel settore dei beni intermedi e, in misura minore, nei settori dei beni d'investimento e dei beni di consumo. Il fenomeno, particolarmente marcato per il settore dei beni intermedi, influenzerà quindi in grande misura l'evoluzione della produzione.

Quanto agli indici dell'evoluzione della produzione industriale negli Stati membri, i dati più recenti dimostrano che la flessione dello sviluppo della produzione industriale a breve termine si è attenuata nella Repubblica federale di Germania, in Belgio, nei Paesi Bassi, nel Lussemburgo e in Danimarca, mentre l'Italia ha fatto registrare una vera e propria inversione della tendenza, passando da una crescita negativa ad una crescita positiva. In Francia e nel Regno Unito, peraltro, i tassi di crescita a breve termine hanno continuato a diminuire, in particolare nel Regno Unito.

Energia : aspetti statistici dell'economia del settore elettrico nel 1980

La ripresa dell'aumento della produzione e del consumo d'energia elettrica, registrata nel 1978 ed nel 1979, non si è più osservata nel 1980. Il consumo netto (comprese le perdite) per il complesso della Comunità (EUR 9) ha raggiunto nel 1980 il livello di 1193 miliardi di kWh, contro 1186 miliardi di kWh nel 1979, facendo registrare un aumento del +0,6 % soltanto, mentre ancora nei due anni precedenti si osservavano tassi di aumento dell'ordine del +5 %. Fatta eccezione per il 1975, l'aumento del 1980 è il più esiguo finora registrato a livello comunitario.

La netta flessione dell'evoluzione del consumo, constatata in tutti i paesi della Comunità, dipende dalla regressione generale dell'attività industriale e dalla contrazione della domanda del settore domestico, che hanno caratterizzato la congiuntura economica del 1980.

Per la Comunità dei Dieci (EUR 10), il consumo netto (comprese le perdite) è ammontato nel 1980 a 1 215 miliardi di kWh.

Sul piano della produzione, si può osservare un tasso d'incremento altrettanto esiguo di quello registrato per il consumo (+0,6 % per EUR 9). Le condizioni idriche sono state praticamente le stesse che nel 1978 e nel 1979, per cui la produzione idroelettrica è rimasta praticamente invariata e ha continuato a coprire il 12 % della produzione totale. La produzione elettro nucleare ha accelerato invece la sua espansione (+16 %) grazie all'apporto rilevante della Francia (+53 %), provvedendo in tal modo a soddisfare oltre il 12 % dei fabbisogni comunitari.

Di conseguenza, per le centrali termoelettriche tradizionali della Comunità (EUR 9) si è registrato un calo della produzione dell'ordine dello 0,6 %.

Commercio intra ed extra comunitario : rallentamento generale degli scambi

Nel mese di ottobre, gli scambi intracomunitari sono aumentati soltanto del 7,5 % per raggiungere 21,2 miliardi di ECU di importazioni. Questo andamento conferma le tendenze al rallentamento già osservate nel corso dei mesi precedenti.

Lo stesso fenomeno di rallentamento si osserva anche negli scambi extracomunitari. Le importazioni extra-CEE (23,4 miliardi di ECU) sono aumentate soltanto del 2,7 % rispetto al mese di settembre, mentre ancora tra agosto e settembre erano aumentate di quasi il 14 %.

Stesso rallentamento per le esportazioni (20,1 miliardi di ECU), il cui tasso di incremento cala meno drasticamente che per le importazioni : +9,3 % contro 12,1 % tra agosto e settembre. Malgrado il calo del tasso di incremento delle importazioni, il saldo degli scambi della Comunità è restato ancora nettamente negativo per il mese d'ottobre (3,3 miliardi di ECU). Di conseguenza, il disavanzo commerciale della Comunità per i primi dieci mesi del 1980 ha raggiunto la cifra di 40,6 miliardi di ECU.

I prezzi al consumo nel dicembre 1980

L'indice dei prezzi al consumo per la CE è salito dello 0,8 % tra novembre e dicembre del 1980. Gli aumenti sono stati abbastanza rilevanti in Italia (1,2 %), nel Lussemburgo (1,1 %) e in Francia (0,9 %), mentre per gli altri paesi della CE sono stati moderati o esigui.

L'aumento dei prezzi su un anno per il complesso della CE è stato del 13,8 % (media annuale del 1980 confrontata con quella del 1979). Da un raffronto con i dati corrispondenti relativi al 1979 si può osservare un'accelerazione molto marcata dell'inflazione per l'anno 1980.

Finanze : assegnazione di DSP e nuova definizione

Il FMI ha assegnato ai suoi 141 membri 4 052 milioni di diritti speciali di prelievo, di cui 1 099 milioni sono stati attribuiti ai dieci paesi membri della Comunità europea (i principali beneficiari sono il Regno Unito con 298 milioni di DSP, la Repubblica federale di Germania con

219 milioni di DSP e la Francia con 195 milioni di DSP). Si tratta della terza e ultima assegnazione effettuata in applicazione della risoluzione adottata nel 1978 dal Consiglio dei Governatori, che prevedeva un'assegnazione di circa 4 miliardi di DSP ripartiti su un periodo di tre anni : il 1979, il 1980 e il 1981.

Inoltre il FMI ha semplificato il paniere che determina il valore del DSP, riducendo da 16 a 5 il numero di valute prese in considerazione. Con effetto a decorrere dal 1° gennaio, il valore del DSP sarà la somma dei valori delle valute seguenti : dollaro US (0,54), marco tedesco (0,46), yen giapponese (34), franco francese (0,74), lira sterlina (0,071).

Prezzi agricoli : l'evoluzione nel 1980

Secondo le previsioni, l'indice globale dei prezzi alla produzione dei prodotti agricoli per EUR 9 avrà segnato, nel 1980, un aumento del 6,6 % rispetto all'anno precedente.

Per i prezzi d'acquisto dei beni e servizi di consumo corrente dell'agricoltura si prevede nel 1980 per la Comunità nel suo complesso un aumento del 12,1 %, che rappresenta una decisa accelerazione rispetto al tasso di aumento dell'anno precedente (1979 : +8,9 %). Particolarmente elevato dovrebbe risultare nel 1980 l'aumento dei prezzi per le voci « energia e lubrificanti » (+26,5 %) e « concimi e miglioramenti » (+20,5 %); moderato, invece, quello dei « mangimi » (8,1 %), voce molto importante, poiché da sola ha un peso del 45 % nell'indice globale.

Per paesi, i tassi d'aumento dovrebbero variare tra il 7 % e un po' più del 15 %.

Un esame comparato delle due serie di indici evidenzia che nel 1980, rispetto al 1979, il tasso di aumento dei prezzi d'acquisto dei beni e servizi di consumo corrente dell'agricoltura sarà quasi doppio di quello dei prezzi di vendita dei prodotti agricoli. Nel valutare questo divario va tuttavia tenuto presente che i beni e servizi di consumo corrente dell'agricoltura intervengono per meno del 50 % nel valore della produzione agricola finale : gli effetti sul reddito agrario possono quindi essere alquanto diversi.

In tutti i paesi membri della Comunità è previsto un aumento dei prezzi degli input decisamente più rapido di quello dei prezzi degli output, con la sola eccezione dell'Italia (dove si prevede un'identica percentuale per le due categorie). Il divario sarà particolarmente ampio in Irlanda e in Francia, e meno marcato nei sei Stati membri rimanenti.

La politica agricola comune (PAC) è il pilastro della politica economica della Comunità. Il suo obiettivo è quello di assicurare ai produttori agricoli un reddito equo e di stabilire un mercato comune per i prodotti agricoli. La PAC è basata su tre pilastri: la garanzia di un prezzo minimo, la garanzia di un mercato comune e la garanzia di un reddito equo. La PAC è finanziata dalla Comunità e dai governi dei paesi membri. La PAC ha permesso di aumentare la produzione agricola e di ridurre i costi di produzione. La PAC ha anche permesso di stabilire un mercato comune per i prodotti agricoli e di ridurre i costi di distribuzione. La PAC ha infine permesso di stabilire un reddito equo per i produttori agricoli.

Energia : aspetti statistici dell'economia del settore elettrico nel 1980

L'analisi dell'evoluzione del settore elettrico della Comunità è basata sui dati pubblicati dalla Commissione europea. I dati più recenti disponibili per la Francia sono quelli relativi al 1979. La produzione elettrica della Francia è cresciuta del 1,5 % nel 1979 rispetto al 1978. La produzione elettrica della Francia è cresciuta del 1,5 % nel 1979 rispetto al 1978. La produzione elettrica della Francia è cresciuta del 1,5 % nel 1979 rispetto al 1978.

La produzione elettrica della Francia è cresciuta del 1,5 % nel 1979 rispetto al 1978. La produzione elettrica della Francia è cresciuta del 1,5 % nel 1979 rispetto al 1978. La produzione elettrica della Francia è cresciuta del 1,5 % nel 1979 rispetto al 1978. La produzione elettrica della Francia è cresciuta del 1,5 % nel 1979 rispetto al 1978.

La produzione elettrica della Francia è cresciuta del 1,5 % nel 1979 rispetto al 1978. La produzione elettrica della Francia è cresciuta del 1,5 % nel 1979 rispetto al 1978. La produzione elettrica della Francia è cresciuta del 1,5 % nel 1979 rispetto al 1978.

Comunità: l'andamento generale degli scambi

Il mercato comune ha permesso di stabilire un mercato comune per i prodotti agricoli. La PAC è basata su tre pilastri: la garanzia di un prezzo minimo, la garanzia di un mercato comune e la garanzia di un reddito equo. La PAC è finanziata dalla Comunità e dai governi dei paesi membri. La PAC ha permesso di aumentare la produzione agricola e di ridurre i costi di produzione. La PAC ha anche permesso di stabilire un mercato comune per i prodotti agricoli e di ridurre i costi di distribuzione. La PAC ha infine permesso di stabilire un reddito equo per i produttori agricoli.

I prezzi di consumo nel biennio 1980

La politica agricola comune (PAC) è il pilastro della politica economica della Comunità. Il suo obiettivo è quello di assicurare ai produttori agricoli un reddito equo e di stabilire un mercato comune per i prodotti agricoli. La PAC è basata su tre pilastri: la garanzia di un prezzo minimo, la garanzia di un mercato comune e la garanzia di un reddito equo. La PAC è finanziata dalla Comunità e dai governi dei paesi membri. La PAC ha permesso di aumentare la produzione agricola e di ridurre i costi di produzione. La PAC ha anche permesso di stabilire un mercato comune per i prodotti agricoli e di ridurre i costi di distribuzione. La PAC ha infine permesso di stabilire un reddito equo per i produttori agricoli.

La politica agricola comune (PAC) è il pilastro della politica economica della Comunità. Il suo obiettivo è quello di assicurare ai produttori agricoli un reddito equo e di stabilire un mercato comune per i prodotti agricoli. La PAC è basata su tre pilastri: la garanzia di un prezzo minimo, la garanzia di un mercato comune e la garanzia di un reddito equo. La PAC è finanziata dalla Comunità e dai governi dei paesi membri. La PAC ha anche permesso di stabilire un mercato comune per i prodotti agricoli e di ridurre i costi di distribuzione. La PAC ha infine permesso di stabilire un reddito equo per i produttori agricoli.

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturrelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

Før alle rækkerne findes de historiske tal (årlige, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske arbigvelers definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

PREFACE

EN

This bulletin is in two parts: 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

AVVERTENZA

IT

Il presente bollettino consta di 2 parti: l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa.

- 05 Beskæftigelsesindeks for industriens arbejdere.
 06 Registrerede ledige i procent af antal personer i arbejdsstyrken — sæsonkorrigeret.
 07 Den offentlige arbejdsformidling: Antal pladser, der ved månedens udgang stod ubesatte.
 12 Animalske landbrugsprodukter : mængdeindeks.
 21 Konjunkturbarometer for industriproduktionen: Nettotal (tallene for tidligere kvartaler angiver en vurdering af det faktiske produktionsforløb, mens tallet for det sidste kvartal udtrykker forventningerne til dette kvartal).
 22 Mængdeindeks for omsætningen af egne varer og tjenester i industrien i alt ekskl. værfter.
 23 Mængdeindeks for omsætningen af egne varer og tjenester i mellemproduktindustrien.
 24 Mængdeindeks for omsætningen af egne varer og tjenester i investeringsgodeindustrien ekskl. værfter.
- 32 Mængdeindeks for omsætningen af egne varer og tjenester i forbrugsgodeindustrien.
 34 Antal påbegyndte lejligheder.
 39 Indeks for ordreindgang i industrien i alt ekskl. værfter.
 41 Import af varer (cif) i alt — sæsonkorrigeret.
 42 Eksport af varer (fob) i alt — sæsonkorrigeret.
 43 Handelsbalancen i alt.
 45 Indeks for enhedsværdier for import af varer.
 46 Indeks for enhedsværdier for eksport af varer.
 47 Bytteforholdet i udenrigshandelen.
 53 Værdiindeks for detailomsætningen — sæsonkorrigeret.
 54 Mængdeindeks for detailomsætningen — sæsonkorrigeret.
 62 Nyregistrerede personbiler — sæsonkorrigeret.
- 63 Nyregistrerede vare- og lastbiler samt busser.
 71 Prisindeks for omsætningen af egne varer og tjenester i industrien i alt ekskl. værfter.
 77 Råvareprisindeks : 1978-vægte.
 79 Forbrugerprisindeks.
 85 Timelønsindeks for industriens arbejdere.
 89 Pengeforsyningen (M2).
 92 International likviditet (brutto).
 96 Betalingsbalancens løbende poster i alt.
 97 Betalingsbalancens kapitalposter i alt.

Kilde : Danmarks Statistik.

UNITED STATES

- 02 Gross national product in constant (1972) dollars.
 03 Gross national product : implicit price deflators — seasonally adjusted.
 06 Labour force : unemployed — seasonally adjusted.
 07 Labour force : help wanted advertising — seasonally adjusted.
 22 Industrial production — seasonally adjusted.
 23 Industrial production : intermediate products — seasonally adjusted.
 24 Industrial production : equipment — seasonally adjusted.
 25 Industrial production : consumer goods — seasonally adjusted.
 28 Industrial production : motor vehicles and parts — seasonally adjusted.
 38 Housing starts and permits : total privately owned — seasonally adjusted.
- 39 Manufacturers' sales, inventories : new orders, net — seasonally adjusted.
 41 Foreign trade : general imports, total — seasonally adjusted.
 42 Foreign trade : exports — seasonally adjusted.
 43 Foreign trade : trade balance — seasonally adjusted.
 45 Foreign trade : imports — unit value.
 46 Foreign trade : exports — unit value.
 47 Foreign trade : terms of trade.
 54 Domestic trade : retail trade — estimated sales — seasonally adjusted.
 63 Transportation equipment : trucks and buses — registrations.
 79 Commodity prices : consumer prices (CPI-U).
- 87 Federal government budget surplus (+) or deficit (—).
 89 Money supply.
 92 Gross official reserves.
 95 Effective exchange rate of the dollar.
 96 Balance on current account — seasonally adjusted.
 98 US assets abroad reserve assets excluded — seasonally adjusted.
 99 Foreign assets — foreign official excluded — seasonally adjusted.

Abonnementet er årligt og løber fra 1. januar til 31. december hvert år.

The annual subscription runs from 1 January to 31 December of each year.

Gli abbonamenti sono annuali e il loro periodo di validità va dal 1° gennaio al 31 dicembre di ciascun anno.

Betaling kan kun ske til agenturerne i landene nævnt på omslagets side 3.

Payments to be made only to the agents in the countries listed on page 3 of the cover.

I versamenti devono essere indirizzati agli uffici di vendita indicati a pag. 3 della copertina.

Priserne dækker forsendelse ad land- eller søvej; agenturerne giver oplysning om priserne for luftforsendelse.

These are surface mail rates; for air subscription rates please apply to the agents.

I prezzi non comprendono le spese di spedizione per posta aerea; per le condizioni di abbonamento in caso di spedizione per posta aerea, si consultino gli uffici di vendita.
