Manuskript afsluttet den 13. april 1981.

Manuscript completed 13 April 1981.

Manoscritto terminato il 13 aprile 1981.

**Indekset for industriproduktionen : stadig kun svag vækst trods forbedrede perspektiver på kort sigt**

Det ukorrigerede indeks for industriproduktionen i Fællesskabet anslås skønsmæssigt til 110 (1975=100) for januar 1981, hvilket er ensbetydende med et fald på 7% i forhold til januar 1980. Dermed accentueres den afmatning, der allerede i november gav sig udtryk i et fald på 4% og i december i et fald på 6% i forhold til de samme måneder året før. Det sæsonkorrigerede indeks for januar 81 anslås skønsmæssigt til 112 (1975=100), hvilket er ensbetydende med et fald på 1% i forhold til december.

Årsindekserne for industriproduktionen i 1980 er allerede beregnet for de fleste branchers vedkommende, og det fremgår heraf, hvilken indvirkning de negative vækstrater inden for adskillige brancher vil få på vækstraten for den samlede industri. Der har været en moderat vækst i produktionen (+1,3%) inden for metalforbearbejdningsindustrien, mens der er registreret negative vækstrater for metalfremstillingsindustrien (-6%), den kemiske industri (-3%), fremstillingen af kunstige og syntetiske fibre (-12,2%), autómobilindustrien (-5%), tekstilindustrien (-2,5%) og beklædningsindustrien (-5,2%).

**Olieforbruget 1980**

De foreløbige tal for 1980 viser, at forbruget inden for De Ni (målt på basis af tilførslen af olieprodukter til det fælles marked) er faldet 9,1% i forhold til 1979 (hvilket svarer til 44 mio tons). Dette fald bør ses i lyset af et globalt fald i energiforbruget på 4,5% i 1980 — et år, der har været præget af dels et mindre fald i indekset for industriproduktionen i forhold til 1979, og dels af fortsatte stigninger i prisen på råolie og olieprodukter, samtidig med at der dog har været tale om et generelt mildere klima.

Nettoimporten af olie til Fællesskabet (EUR 9) nåede op på 420 mio tons i 1980, hvilket er ensbetydende med et fald på 54 mio tons eller 11,4% i forhold til 1979 og på 52 mio tons i forhold til 1978.

En foreløbig status over råolieproduktionen viser, at Fællesskabets produktion kun er steget meget lidt i forhold til 1979, men dertil skal lægges et fald på 14% i importen af råolie, en mindre forøgelse af lagrene (det er sjette gang i perioden 1973-1980, at årsopgørelsen viser en forøgelse af lagrene) samt en forøgelse på kun 1% af råolieeksporten i forhold til året før. Derfor er den mængde råolie, som er blevet raffineret i 1980, ikke mere end 498 mio tons, hvilket er det laveste tal siden 1975.

Den råolieimport fra tredjelande, som er registreret i EUR 9, har i 1980 vist en tilbagegang på 16%. En nærmere betragtning af tallene for Fællesskabets råolieforsyninger viser, at importen fra Det nære og mellemste Østen er faldet med 65 mio tons (importen fra Iran er gået tilbage med 23 mio tons, fra Kuwait med 19 mio tons og fra Irak med 16 mio tons), medens importen fra Afrika (især Algeriet, Libyen og Nigeria) er faldet med 20 mio tons.

Der har i 1980 været tale om en forskydning af handelsbalancen på dette område, idet importen var 18 mio tons større end eksporten, mens det i 1979 var eksporten, der var 3 mio tons større end importen. I alle medlemsstater med undtagelse af Det forenede Kongerige er der i 1980 sket en styrkelse af tendensen til opfyldning af lagrene, og som nævnt har der været tale om et klart fald i efterspørgslen efter olieprodukter.

**Samhandelen inden for Fællesskabet : 1980 præget af træghed**

I december 1980 forstærkedes tendenserne fra de foregående måneder. Importen blev på 21,1 Mrd ECU, hvilket var en stigning på kun 4,6% i forhold til november og på 7,6% i forhold til december 1979.

Samhandelen inden for Fællesskabet forøgedes på årsbasis med kun 12,2% (beregningsgrundlag : import). De mest markante stigninger registreredes i den italienske import (+25,4%), den franske (+14,2%) og importen til BLØU (+43,4%). Rekorden i henseende til eksport blev sat af Det forenede Kongerige, der takket være sin olieeksport opnåede en stigning på 25,6%.

Den italienske eksportstigning blev så lav som 2,7% og den franske blev på 8%, mens resten af medlemsstaterne ligger mellem 10,3% (Tyskland) og 16,7% (Danmark). Der er stadig for visse medlemsstaters vedkommende tale om foruroligende underskud i samhandelen inden for Fællesskabet : Italien har haft et underskud på 4 769 mio ECU mod et overskud på 892 mio i 1979, Frankrig ligger med et underskud på 3 829 mio ECU kun lidt bedre end i 1979, og Irland har haft et underskud på 1 400 mio ECU.

I den modsatte ende er Tysklands overskud vokset lidt i 1980 (3 127 mio ECU), og Det forenede Kongerige har set et underskud på 2 776 mio ECU i 1979 vendt til et overskud på 1 843 mio ECU i 1980.

**Fællesskabets samhandel med tredjelande : underskud på 47 Mrd ECU i 1980**

Udviklingen i Fællesskabets samhandel med tredjelande i 1980 giver stadig grund til bekymring på trods af en mindre stigning i eksporten (+12% i forhold til november og +21,7% i forhold til december 1979). Fra 1979 til 1980 er Fællesskabets import nemlig steget med 24,9%, mens eksporten kun er steget med 15,5%, og underskuddet, der allerede i 1979 var på 23 Mrd ECU, er fordoblet til næsten 47,3 Mrd ECU.

De største importstigninger i det forløbne år er registreret i Frankrig (+34,8%) og BLØU (+32,3%). Importstigningen er i de øvrige medlemsstater på mere end 20% med undtagelse af Danmark (+7,7%) og Irland (+11%). Heroverfor har eksportfremgangen ikke oversteget 20% med undtagelse af Det forenede Kongerige (+23,3%) og Irland (+31,6%).

Samtlige medlemsstater har negativ handelsbalance med undtagelse af Tyskland (+486 mio ECU). For Danmarks, Irlands og Det forenede Kongeriges vedkommende er der tale om underskud af samme størrelsesorden som i 1979. Der er tale om kraftige stigninger for BLØU og Nederlandene (henholdsvis 5,6 og 11,2 Mrd ECU).

For Italiens og Frankrigs vedkommende er der tale om en fordobling af underskuddene (henholdsvis 10,8 og 13,1 Mrd ECU).

**Forbrugerpriserne i februar 1981**

Forbrugerprisindekset for hele EF steg med 1,1% fra januar til februar 1981. Den betydeligste stigning er registreret i Italien, hvor der efter en stigning på 1,9% i januar var tale om en yderligere stigning på 1,8% i februar. Der var i øvrigt også tale om ganske kraftige stigninger i de andre EF-lande, hvor man registrerede fra 0,6 til 1%, og i Irland er priserne steget fra november 1980 til februar 1981 med 6,2%. Stigningen over 12 måneder for EUR 10 er på 12,4%. For de enkelte lande er der tale om følgende stigning på ét år : Tyskland 5,5%, Beneluxlandene ca. 7%, Danmark 10,7%, Det forenede Kongerige og Frankrig ca. 12,5%, Italien ca. 20%, Irland 21% og Grækenland 26,5%. Det tilsvarende tal for De forenede Stater er ca. 11%.

**Penge og finanser : spændinger i valutasamarbejdet**

Den 22. marts devaluerede den italienske regering liren med 6% i forhold til de øvrige valutaer i EMS. Samtidig blev den italienske diskonto hævet fra 16,5% til 19% i et forsøg på at holde lirens kurs.

For at mindske presset mod den belgiske franc besluttede Belgiens Centralbank samtidig at hæve diskontoen fra 13 til 16% og lombardrenten fra 15 til 18%, idet banken, i ugen før den 30. marts havde måttet støtte franc'en med opkøb af 32 Mrd FB ved hjælp af ECU og fremmed valuta. De officielle rentesatser i Belgien har dermed nået deres højeste niveau siden krigen.

## Index of industrial production : industrial production still slack, despite an improvement in the short-term prospects

The unadjusted index of industrial production for the Community is estimated at 110 (1975=100) for January 1981. This was 7% down on January 1980, accentuating the 4% and 6% declines registered in November and December respectively, compared with the same months of the previous year. The seasonally adjusted index for January 1981 is estimated at 112 (1975=100), which represents a decline of 1% compared with December.

The annual indices of industrial production for 1980 are already available for most industries and an analysis of them shows the effects of the negative growth of several industries on the results for the growth rate of all industry. Although annual production growth was moderate (+1.3%) in the engineering industries, negative growth rates of -6% were registered in the metal-producing and initial processing industries, -3% in the chemicals industry, -12.2% in the man-made fibres industry, -5% in the automobile sector, -2.5% in the textile industry and -5.2% in the clothing industry.

## The petroleum economy in 1980

Provisional data for 1980 shows that EUR 9 consumption (measured by inland deliveries of petroleum products) to have declined by 9.1% over 1979 levels (the equivalent of 44 million tonnes). This must be placed in the context of a decrease of approximately 4.5% in overall Energy consumption for the EUR 9 in 1980, a year in which the index of industrial production showed a slight fall over 1979, a year of further escalating price rises for crude oil and petroleum products and a year of generally milder climate.

Net imports of petroleum for the EUR 9 were 420 million tonnes in 1980, a decrease of 54 million tonnes or 11.4% compared to 1979 and 52 million tonnes less than the 1978 reference level.

The provisional balance sheet for crude oil shows that Community production of crude was only marginally higher than in 1979, but with a 14% reduction in imports of crude oil, a small increase of stocks (the sixth time in the period 1973-1980 that annual stock changes have moved in this direction), and exports of crude only 1% higher than in 1979, refinery throughput therefore levelled at 498 million tonnes for the year, the lowest since 1975.

EUR 9 imports of crude oil from third party countries showed a decline of 16% in 1980. A profile of the Community's supply of crude reveals a 65 million decrease in imports from the Near and Middle East (23 million tonnes less from Iran, 19 million tonnes less from Kuwait, 16 million tonnes less from Iraq) and 20 million tonnes less from Africa (notably from Algeria, Libya and Nigeria).

The products balance is characterized in 1980 by a switch in the balance of trade on products, namely that imports exceeded exports by 18 million tonnes, a reversal of the 1979 situation where exports topped imports by 3 million tonnes. There is a consistent annual stockbuild for products in all Member States except the United Kingdom and, as noted above, a large fall in product demand.

## Intra-Community trade: 1980 a gloomy year

In December 1980, the trends of the previous months were reinforced imports (21 100 million ECU) increased by only 4.6% compared with November and 7.6% compared with December 1979.

Over the year, intra-Community trade increased by only 12.2% (the figures being based on imports). The strongest trends were in imports to Italy (+25.4%) France (+14.2%) and the BLEU (+43.4%). In exports, the record Community rate of 25.6% was achieved by the United Kingdom with the aid of her oil sales.

At the other end of the scale, Italy (+2.7%) and France (+8%) recorded the lowest rates, whilst the other partners achieved between 10.3% (Germany) and 16.7% (Denmark). The 1980 intra-Community trade deficits of several Member States and still alarmingly high: Italy (4 769 million ECU) compared with a surplus of 892 million in 1979, France (3 829 million ECU), also lower than in 1979, and Ireland (1 400 million ECU).

Germany's positive balance, on the other hand, rose slightly in 1980 (3 127 million ECU) and the United Kingdom in particular recorded a surplus of 1 843 million ECU in 1980 after a deficit of 2 776 million in 1979.

## Extra-Community trade: a deficit of 47 000 million ECU in 1980

The Community's external trade situation for 1980 is still alarming, despite a slight improvement in exports (+12% compared with November and +21.7% compared with December 1979). Between 1979 and 1980, Community imports increased by 24.9% compared with 15.5% for exports, and the negative balance of 1979 (23 000 million ECU) was doubled to almost 47 300 million.

The sharpest increases in imports for the past year were registered in France (+34.8%) and the BLEU (+32.3%). The import growth of the other Member States were over 20%, except in Denmark (+7.7%) and Ireland (+11%). On the other hand, exports did not increase by more than 20%, except in the United Kingdom (+23.3%) and Ireland (+31.6%). All Member States showed a trade deficit, except for Germany (+486 million ECU). The deficits of Denmark, Ireland and the United Kingdom are similar to those of 1979. The BLEU and the Netherlands had much higher deficits (5 600 and 11 200 million ECU respectively) than in the previous year. Finally, the deficits of Italy and France were doubled (to 10 800 and 13 100 million ECU respectively).

## Consumer prices in february 1981

The consumer price index for the EC as a whole rose by 1.1% from January to February 1981. The biggest increase was recorded in Italy; after the significant rise of 1.9% in January, prices rose again by 1.8% this month. Increases were rather high in all EC-countries; they lay between 0.6 and 1.0%, whereas consumer prices in Ireland climbed by 6.2% from November 1980 to February 1981. The rise over the year for EUR-10 is 12.4%. The rates for the different EC-countries are as follows: Germany (F.R.) 5.5%, the Benelux-countries  $\pm$  7.0%, Denmark 10.7%, the UK and France  $\pm$  12.5%, Italy  $\pm$  20%, Ireland 21% and Greece 26.5%. The corresponding figure for the USA amounts to  $\pm$  11%.

**Finance: tension within the EMS**

On 22 March, the Italian government devalued the Lire by 6% in relation to other EMS currencies. At the same time, the bank rate was raised from 16.5 to 19% as a further step to maintain the value of the Lire. Likewise, to reduce the pressure to devalue the Belgian franc (in the week leading up to 30 March, the Belgian Central Bank had to intervene on the exchange market by buying approximately 32 000 million Belgian francs with foreign currency and ECU) the Banque Nationale de Belgique decided to raise the bank rate from 13 to 16% and the Lombard rate from 15 to 18%. These official rates thus reached their highest post-war level.

**Indice della produzione industriale : la produzione industriale rimane bassa malgrado un miglioramento delle prospettive a breve termine**

Secondo le stime dell'Eurostat l'indice non corretto della produzione industriale della Comunità europea ha raggiunto nel gennaio 1981 il livello di 110 (1975=100), il che rappresenta una diminuzione del 7% rispetto allo stesso mese dell'anno precedente : si accentua così la flessione del 4% già osservata in novembre e quella del 6% registrata in dicembre rispetto ai mesi corrispondenti dell'anno precedente. L'indice destagionalizzato per il gennaio 1981 è stimato a 112 (1975=100), il che rappresenta una diminuzione rispetto a dicembre.

Gli indici annuali della produzione industriale per il 1980 sono già disponibili per la maggior parte delle branche e la loro analisi mette in luce l'incidenza dell'evoluzione negativa in numerose industrie sui risultati della crescita globale dell'industria nel suo complesso : mentre la crescita della produzione annuale è stata moderata (+1,3%) nelle industrie di trasformazione dei metalli, si è registrata una flessione del 6% nella produzione e prima trasformazione dei metalli, del 3% nell'industria chimica, del 12,2% in quella delle fibre artificiali e sintetiche, del 5% nell'industria automobilistica, del 2,5% in quella tessile e del 5,2% in quella dell'abbigliamento.

**L'attività petrolifera nel 1980**

I dati provvisori per il 1980 indicano che rispetto al 1979 il consumo nella Comunità dei Nove (misurato sulla base delle consegne di prodotti petroliferi sul mercato interno) è diminuito del 9,1%, ovvero dell'equivalente di 44 milioni di tonnellate. Questa diminuzione dev'essere considerata nel contesto di una flessione di circa il 4,5% del consumo energetico globale nel 1980, anno caratterizzato sia da una leggera diminuzione dell'indice della produzione industriale rispetto al 1979, sia dal proseguire dell'ascesa dei prezzi del petrolio greggio e dei prodotti petroliferi; il clima è stato inoltre generalmente più mite.

Le importazioni nette di petrolio per l'intera Comunità (EUR 9) hanno raggiunto 420 milioni di tonnellate nel 1980, con una diminuzione di 54 milioni di tonnellate o dell'11,4% rispetto al 1979 e di 52 milioni di tonnellate rispetto al livello di riferimento del 1978.

Il bilancio provvisorio del petrolio greggio indica che la produzione comunitaria ha realizzato solo un aumento minimo rispetto al 1979, accompagnato da una riduzione del 14% delle importazioni di petrolio greggio, da un leggero aumento delle scorte (per la sesta volta nel corso del periodo 1973-1980 i dati annuali indicano un aumento delle scorte) e da un aumento solo dell'1% delle esportazioni di petrolio greggio rispetto all'anno precedente; per questo le quantità di greggio lavorato nelle raffinerie non hanno superato nel 1980, i 498 milioni di tonnellate : si tratta del tonnellaggio più basso dal 1975.

A livello EUR 9 le importazioni di petrolio greggio dai paesi terzi hanno registrato nel 1980 una diminuzione del 16%. Una analisi dell'approvvigionamento comunitario di petrolio greggio rivela che le importazioni dal Vicino e dal Medio Oriente sono diminuite di 65 milioni di tonnellate (le importazioni provenienti dall'Iran sono scese di 23 milioni di tonnellate, quelle dal Kuwait di 19 milioni di tonnellate, e quelle dall'Iraq di 16 milioni di tonnellate), mentre le importazioni provenienti dall'Africa (in modo particolare da Algeria, Libia e Nigeria) hanno registrato una diminuzione di 20 milioni di tonnellate).

Il 1980 è stato caratterizzato da un rovesciamento della bilancia commerciale : infatti le importazioni hanno superato le esportazioni di 18 milioni di tonnellate, mentre nel 1979 si rilevava un'eccedenza nelle esportazioni di 3 milioni di tonnellate. Nel 1980 in tutti gli Stati membri, ad eccezione del Regno Unito, si è vista confermata la tendenza a costituire delle scorte e si è osservata, come già detto, una netta diminuzione della domanda di prodotti petroliferi.

**Scambi intracomunitari : 1980 : un'annata poco favorevole**

Nel dicembre 1980 si è visto il rafforzamento delle tendenze rilevate nei mesi precedenti : le importazioni (21,1 miliardi di ECU) sono aumentate solo del 4,6% rispetto al mese di novembre, e del 7,6% rispetto a dicembre del 1979.

Se si considera l'intero 1980, gli scambi intracomunitari sono aumentati solo del 12,2% (sulla base delle importazioni). Le tendenze più marcate riguardano le importazioni in Italia (+25,4%), Francia (+14,2%), UEBL (+43,4%). Dal lato delle esportazioni il Regno Unito ha raggiunto l'aumento record per la Comunità del 25,6%, grazie alle sue vendite petrolifere.

Inversamente, l'Italia (+2,7%) e la Francia (+8%) hanno registrato i tassi più bassi, mentre gli altri partner si collocano tra il 10,3% della Germania e il 16,7% della Danimarca. Il deficit degli scambi commerciali intra-CEE nel 1980 resta preoccupante per numerosi Stati membri, particolarmente per l'Italia (4 769 milioni di ECU, contro un'eccedenza di 892 milioni nel 1979), la Francia (3 829 milioni di ECU, inferiore a quello del 1979) e l'Irlanda (1 400 milioni di ECU).

Per contro il saldo positivo della Repubblica federale di Germania è aumentato leggermente nel 1980 (3 127 milioni di ECU) e, soprattutto, il Regno Unito è passato da un deficit da 2 776 milioni di ECU nel 1979 ad un saldo attivo di 1 843 milioni nel 1980.

**Scambi extra-CEE : un disavanzo di 47 miliardi di ECU per il 1980**

La situazione degli scambi della Comunità con i paesi terzi per il 1980 rimane preoccupante, malgrado una leggera ripresa delle esportazioni (+12% rispetto al mese di novembre e +21,7% rispetto a dicembre del 1979). Infatti tra il 1979 e il 1980 le importazioni comunitarie sono aumentate del 24,9%, e le esportazioni solo del 15,5% : il saldo già negativo nel 1979 (23 miliardi di ECU) è così raddoppiato, arrivando a quasi 47,3 miliardi.

Gli aumenti più forti delle importazioni per l'anno scorso vengono rilevati per la Francia (+34,8%) e l'UEBL (+32,3%). I tassi di incremento delle importazioni negli altri Stati membri hanno superato il 20%, ad eccezione della Danimarca (+7,7%) e dell'Irlanda (+11%). Per contro l'aumento delle esportazioni non ha superato il 20%, ad eccezione del Regno Unito (+23,3%) e dell'Irlanda (+31,6%). I saldi commerciali di tutti gli Stati membri sono deficitari, ad eccezione della Germania (+486 milioni di ECU). Il deficit è vicino a quello del 1979 per la Danimarca, l'Irlanda e il Regno Unito, è aumentato sensibilmente per l'UEBL ed i Paesi Bassi (rispettivamente 5,6 e 11,2 miliardi di ECU), ed è raddoppiato per l'Italia e la Francia (rispettivamente 10,8 e 13,1 miliardi di ECU).

**I prezzi al consumo nel febbraio 1981**

L'indice dei prezzi al consumo per l'insieme della Comunità è salito dell'1,1% tra gennaio e febbraio del 1981. L'aumento più forte viene rilevato in Italia dove i prezzi, che erano aumentati dell'1,9% in gennaio, sono saliti di nuovo dell'1,8% questo mese. D'altra parte gli aumenti sono abbastanza forti anche in tutti gli altri paesi della Comunità : si situano infatti tra lo 0,6 e l'1,0%. In Irlanda i prezzi sono aumentati del 6,2% tra novembre 1980 e febbraio 1981. Per EUR 10 l'aumento su 12 mesi è del 12,4%. I tassi annuali per i diversi paesi sono i seguenti : Germania 5,5%, paesi del Benelux  $\pm$ 7,0%, Danimarca 10,7%, Regno Unito e Francia  $\pm$ 12,5%, Italia  $\pm$ 20%, Irlanda 21% e Grecia 26,5%. La cifra corrispondente per gli Stati Uniti è dell'11% circa.

**Finanze : tensioni nell'ambito dello SME**

Il 22 marzo, il governo italiano ha svalutato la lira del 6% rispetto alle altre monete dello SME. Contemporaneamente il tasso di sconto è stato aumentato dal 16,5 al 19%, come misura supplementare di sostegno del valore della lira. Analogamente, per diminuire la pressione diretta ad una svalutazione del franco belga (nella settimana precedente il 30 marzo la Banca Centrale belga è stata costretta ad intervenire sul mercato dei cambi acquistando circa 32 miliardi di franchi belgi contro valute straniere ed ECU) la Banque Nationale de Belgique ha deciso di aumentare il tasso di sconto dal 13 al 16% ed il tasso « Lombard » (sulle anticipazioni presso la Banca Centrale) dal 15 al 18%. In tal modo questi tassi ufficiali hanno raggiunto il loro livello più alto dalla fine della guerra.

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturindikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlige, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelser definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

## PREFACE

EN

This bulletin is in two parts: 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

## AVVERTENZA

IT

Il presente bollettino consta di 2 parti: l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa.

Abonnementet er årligt og løber fra 1. januar til 31. december hvert år.

The annual subscription runs from 1 January to 31 December of each year.

Gli abbonamenti sono annuali e il loro periodo di validità va dal 1° gennaio al 31 dicembre di ciascun anno.

Betaling kan kun ske til agenturerne i landene nævnt på omslagets side 3.

Payments to be made only to the agents in the countries listed on page 3 of the cover.

I versamenti devono essere indirizzati agli uffici di vendita indicati a pag. 3 della copertina

Priserne dækker forsendelse ad land- eller søvej; agenturerne giver oplysning om priserne for luftforsendelse.

These are surface mail rates; for air subscription rates please apply to the agents.

I prezzi non comprendono le spese di spedizione per posta aerea; per le condizioni di abbonamento in caso di spedizione per posta aerea, si consultino gli uffici di vendita.
