DATI PER L'ANALISI DELLA CONGIUNTURA

Manuskript afsluttet den 18. maj 1981.

Manuscript completed 18 May 1981.

Manoscritto terminato il 18 maggio 1981.

Arbejdsløshed : Ubetydelig sæsonbestemt nedgang

Ved udgangen af marts 1981 blev der registreret 8,4 millioner arbejdsløse i Fællesskabet (EUR 9), svarende til 7,7% af den civile erhvervsaktive befolkning. Til trods for den sæsonbestemte nedgang, man kunne forvente på dette tidspunkt, har arbejdsløsheden næsten været uændret siden februar (8,5 millioner – 7,7%). Målt i sæsonkorrigerede tal er der tale om en kraftig stigning for EUR 9 i forhold til den foregående måned (+3%).

De forskellige sæsonvariationer fra land til land gør det meget vanskeligt at foretage en analyse for hver medlemsstat. Sikkert er det imidlertid, at den store nedgang i bruttotallene registreret i Vesttyskland i marts måned ikke må betragtes som en bedring af situationen. Tværtimod er Vesttyskland sammen med Nederlandene, Danmark og Luxembourg blandt de lande, hvor den stigende tendens i arbejdsløsheden er særlig markant målt i sæsonkorrigerede tal (+5% eller mere i løbet af marts måned).

Den alvorlige situation på arbejdsmarkedet afspejles ligeledes i stigningen i antallet af arbejdsløse under 25 år. Det samlede antal er stort set uændret, medens det faldt i alle landene sidste år i løbet af de første 3 måneder.

Procentuelt er arbejdsløsheden stadig størst i Belgien og i Irland (10,5% af den civile erhvervsaktive befolkning), medens arbejdsløsheden blandt mænd er størst i Det forenede Kongerige og i Irland (ca. 11%) samt i Danmark (10,3%).

Indekset over industriproduktionen : Stadig lavt

Indekset for fællesskabet anslås til 119,1 (1975=100) for februar 1981 svarende til en nedgang på 4,4% i forhold til februar 1980, hvilket er en fortsættelse af den nedadgående tendens, man har kunnet registrere siden august 1980. Derimod nåede det sæsonkorrigerede indeks op på 114 (1975=100) svarende til en stigning på 1,5% i forhold til januar. Indekset over de tre vigtigste produktionsgrupper viser, at nedgangen i produktionen af forbrugsgoder langsomt, men sikkert aftager, medens mellemproduktindustrien og investeringsgodeindustrien i de seneste måneder har vist tegn på stagnation.

Stål

I marts 1981 kunne man for Fællesskabets (EUR 9) produktion af råstål (11,2 millioner tons) atter registrere en lille stigning på 0,5% i forhold til den foregående måned (efter sæsonkorrektion), der følger efter de relativt store stigninger i de to foregående måneder (februar i forhold til januar 1981 : +4,5%; januar 1981 i forhold til december 1980 : +5,5% efter sæsonkorrektion). I andet kvartal efter indførelsen den 1. oktober 1980 af den obligatoriske kvotaordning i henhold til artikel 58 i EKSF-traktaten var produktionen af råstål næsten 5,5% mindre end i første kvartal 1980 (hvilket i høj grad skyldtes strejken inden for den britiske jern- og stålindustri) og 10% lavere end produktionen i samme kvartal 1979.

Selv om man i februar 1981 kunne registrere en lettere stigning på 3% (sæsonkorrigerede tal) i ordretilgangen i forhold til den foregående måned, er tilgangen stagnerende.

Energi : Statistiske oplysninger vedrørende energisektoren 1980

I 1980 faldt Fællesskabets (EUR 9) energibehov med 4,6%, svarende til 44 millioner ton olieækvivalenter. På trods af stigningen i Fællesskabets bruttonationalprodukt med 1,3% (kun i Det forenede Kongerige og Danmark registreredes en negativ vækst) faldt det samlede bruttoforbrug af energi fra ca. 1% for Italiens og Frankrigs vedkommende op til 9,2% for Det forenede Kongerige.

For så vidt angår det elektriske materiel, kunne man til gengæld i 1980 registrere en omfattende idriftsætning af nye anlæg. Når man medregner afviklingen af gamle anlæg, er der sket en mærkbar stigning i anlæggenes samlede effekt af størrelsesordenen 11 000 MW, mod 6 000 – 8 000 MW de foregående år.

Denne betydelige stigning skyldes hovedsagelig udvidelsen af atomkraftanlæggene (kun Frankrig), som er vokset med 6 065 MW netto, svarende til næsten 55% af den samlede idriftsætning af nye anlæg i Fællesskabet. Atomkraftværkernes maksimale nettoeffekt nåede op på 33 000 MW ved udgangen af 1980, hvilket er en stigning på 25% i forhold til 1979.

Forbrugerpriserne i marts 1981

Forbrugerprisindekset for hele EF steg med 1,2 % fra februar til marts 1981. Den største stigning registreredes i Grækenland (2,4%), medens priserne i Danmark steg med 2,0% efter ophævelsen af prisstoppet ultimo februar. Der registreredes stigninger på 1,5% i Italien og i Det forenede Kongerige, medens der var tale om mere moderate stigninger i Frankrig (1,0%), Nederlandene (0,9%), Luxembourg (0,8%), Forbundsrepublikken Tyskland (0,7%) og Belgien (0,6%). Stigningen over 12 måneder for EUR 10 er opgjort til 12,6%.

Samhandelen inden for fællesskabet

Nedgangen i samhandelen inden for Fællesskabet i 1980 fortsatte i januar 1981, hvor importen målt i løbende priser i forhold til december 1980 faldt med 9,9%. Alle medlemsstaterne kunne set i forhold til december måned registrere et fald i deres import med undtagelse af Vesttyskland (+2,1%). Vesttysklands handelsbalance over for de øvrige medlemsstater forringedes pludselig mærkbart (–253 mio ECU mod +467 mio ECU i januar 1980, medens overskuddet i december endnu lå på 2 mio ECU). Frankrig tegnede sig for det største underskud (499 mio ECU), medens Nederlandene og Det forenede Kongerige stadig er de eneste lande, som har overskud (henholdsvis 1 424 og 553 mio ECU).

Fællesskabets samhandel med tredjelande

Tilsvarende registreredes i januar en nedgang i Fællesskabets import og eksport sammenlignet med december måned (–10,2% og –18%), medens de tilsvarende tal i januar 1980 lå på 0,8% og 6%. Kun Det forenede Kongerige og BLØU forøgede deres eksport i forhold til december måned (+2,1% og +2,5%). Fællesskabets underskud på handelsbalancen over for tredjelande er stadig foruroligende (4 366 mio ECU mod 2 763 i december). Samtlige medlemsstater har måttet registrere et underskud, idet Frankrig tegner sig for det største, nemlig 1 438 mio ECU.

Penge og finanser : Renteforhøjelse i USA

Renten i USA er igen kommet op på et rekordhøjt niveau, efter at de vigtigste amerikanske banker har forhøjet prime rate (den udlånsrente, bankerne tilbyder deres bedste kunder) fra 18 til 19%. Ligeledes hævede Federal Reserve Board den 5. maj den officielle diskonto til 14% (tidligere 13%). Som følge af de større renteforskelle steg den amerikanske dollar i forhold til EMS-valutaerne. Den franske centralbank måtte støtte den franske franc i EMS-samarbejdet og hævede renten for visse interventioner på markedet fra 12,5% til 13,5%.

Unemployment: Seasonal reduction barely apparent

At the end of March 1981, 8.4 million persons in the Community of Nine were registered as unemployed, representing 7.7% of the civilian working population. Despite the seasonal factors tending to reduce unemployment at this time of year, unemployment had remained virtually unchanged since February (8.5 million, 7.7%). The seasonally adjusted figures indicate a marked increase for the Community of Nine as compared with the preceding month (+3%).

Differences between countries with regard to seasonal factors make analysis by Member States very difficult. It is, however, clear that the substantial fall recorded in the gross figures in the F.R. of Germany during March should not be interpreted as being due to an improvement in the situation. On the contrary, Germany, together with the Netherlands, Denmark and Luxembourg, is among the countries where the seasonally-adjusted figures show a particularly marked upward trend in unemployment (+5% or above during March).

The difficult labour market position is also apparent from the figures for unemployed persons aged under 25 years. The total remains practically unchanged, whereas it decreased in all countries during the first three months a last year.

The highest unemployment levels are still observed in Belgium and Ireland (10.5% of the civilian working population), while the male unemployment rates are highest in the United Kingdom and Ireland (about 11%) as well as in Denmark (10.3%).

Index of industrial production : Still low

The index of industrial production in the European Community is estimated at 119.1 (1975=100) for February 1981, i.e. 4.4% down on the figure for February 1980. This result continues the downward trend observed since August 1980. The seasonally adjusted index, on the other hand, was 114 (1975=100), an increase of 1.5% over the figure for January. The indices for the three main groups of industrial products reveal slow but sustained deceleration of the decline in production of consumer goods, while intermediate and capital goods have shown signs of stagnation for several months.

Steel

In March 1981, production of crude steel in the Community of Nine (11.2 Mio t) again showed a slight rise (0.5% after seasonal adjustment) compared with the previous month, which follows the relatively large rises of the previous two months (February compared with January 1981: +4.5%, January 1981 compared with December 1980, +5.5%, both after seasonal adjustment). During the second quarter since the introduction of compulsory quotas (on 1 October 1980) pursuant to Article 58 of the ECSC Treaty, production of crude steel has thus been nearly 5.5% lower than that of the first quarter of 1980 (itself heavily influenced by the strike in the British iron and steel industry) and 10% lower than production in the same quarter of 1979.

Although new orders in February 1981 showed a slight increase (3% after seasonal adjustment) compared with the previous month, they remain at a very low level.

Energy: Statistical aspects of the energy economy in 1980

In 1980, energy consumption in the Community of the Nine fell by 4.6%, i.e. 44 Mio toe. In spite of a rise of 1.3% in the Community GDP (only the United Kingdom and Denmark suffered negative growth), there was a decrease in gross inland energy consumption ranging from about 1% for Italy and France to 9.2% for the United Kingdom.

At the same time, considerable new generating capacity was commissioned in 1980. If allowance is made for plant withdrawn from service, overall capacity increased by about 11 000 MW, as compared with 6 000 to 8 000 MW in previous years.

This more substantial increase was mostly due to the expansion of nuclear generating capacity (France only), which grew by 6 065 MW net, thereby accounting for almost 55% of commissionings in the Community. The maximum nuclear output capacity reached 33 000 MW at the end of 1980, an increase of 25% over 1979.

Consumer prices in march 1981

The consumer price index for the EC as a whole rose by 1.2% from February to March 1981. The biggest increase was recorded in Greece (2.4%), while prices in Denmark increased by 2% after the lapsing of a statutory price freeze at the end of February. A rise of 1.5% was reported for Italy and the United Kingdom, while more moderate increases were recorded in France (1.0%), the Netherlands (0.9%), Luxembourg (0.8%), the F.R. of Germany (0.7%) and Belgium (0.6%). The rate of increase over twelve months for EUR 10 is 12.6%.

Intra-community trade

The deterioration of intra-Community trade which was apparent in 1980 continued in January 1981, imports at current values being 9.9% lower than in December 1980. All the Member States recorded a drop in their imports as compared with December, with the exception of the Federal Republic of Germany (+2.1%). The intra-Community trade balance of the F.R. of Germany has deteriorated substantially and suddenly (-253 Mio ECU as compared with +467 Mio ECU in January 1980, whereas in December the surplus was still 2 Mio ECU). The largest deficit was that of France (499 Mio ECU), while the Netherlands and the United Kingdom were the only countries which remained in surplus (1 424 and 553 Mio ECU respectively).

Extra-community trade

Similarly, Community imports and exports in January were lower than in December (by 10.2% and 18.7% respectively), whereas they were 0.8% and 6% down on January 1980. Only the United Kingdom and the BLEU increased their exports as compared with December (+2.1% and +2.5%). The external deficit of the Community continues to give cause for concern (4 366 Mio ECU as compared with 2 763 in December). All the Member States are in deficit, the largest imbalance being that for France: 1 438 Mio ECU.

Finance: Increase in American interest rates

Interest rates in the United States have reached a new record level, several of the leading American banks having increased the prime rates (lending rates to first-class customers) from 18 to 19%. In addition, the Federal Reserve Board raised the official bank rate to 14% (previous level 13%) as from 5 May. As a result of the increased differentials, the US dollar gained against the EMS currencies. The Banque de France had to support the French franc in accordance with EMS grid and raised the interest rates for certain types of market operation from 12.5 to 13.5%.

Disoccupazione : nessun miglioramento stagionale

A fine marzo del 1981 gli iscritti nelle liste di disoccupazione nella Comunità dei Nove erano 8,4 milioni, pari al 7,7% della popolazione attiva civile. Sebbene in questo periodo dell'anno si manifesti normalmente una diminuzione stagionale, il numero dei disoccupati (in dati grezzi) resta quasi immutato rispetto al mese di febbraio (8,5 milioni, pari al 7,7%); le cifre corrette delle variazioni stagionali accusano così per la Comunità dei Nove un deciso aggravamento della disoccupazione sul mese precedente (+3%).

L'analisi per Stato membro è resa difficile dalla diversa configurazione stagionale che la disoccupazione assume nei vari paesi. È certo tuttavia che la forte riduzione in dati grezzi osservata in marzo nella Repubblica federale di Germania non deve essere interpretata come un miglioramento della situazione: anzi, con i Paesi Bassi, la Danimarca e il Lussemburgo, la Germania è uno dei paesi in cui i dati destagionalizzati accusano una tendenza particolarmente marcata all'aggravamento della disoccupazione (almeno +5% nel mese di marzo). La difficile situazione del mercato del lavoro si manifesta anche nell'evoluzione del numero dei giovani disoccupati (con meno di 25 anni): il totale resta ora praticamente invariato, mentre nei primi tre mesi dell'anno scorso era diminuito in tutti i paesi.

Da un raffronto dei tassi di disoccupazione dei vari paesi emerge che quelli più elevati si registrano sempre in Belgio e in Irlanda (10,5% della popolazione attiva civile) oppure, quando si considerano i soli disoccupati di sesso maschile, nel Regno Unito e in Irlanda (11% circa) e quindi in Danimarca (10,3%).

Indice della produzione industriale : costantemente depresso

Per il mese di febbraio del 1981 l'indice per la Comunità è stimato a 119,1 (1975=100), il che corrisponde ad una flessione del 4,4% su febbraio del 1980. Questo risultato manifesta il proseguire della tendenza negativa registrata dall'agosto del 1980. L'indice destagionalizzato è invece di 114 (1975=100) e segna un aumento dell'1,5% sul mese di gennaio. L'esame degli indici per i tre grandi gruppi di prodotti industriali indica un rallentamento, lento ma sicuro, nella flessione della produzione dei beni di consumo, mentre i beni intermedi e i beni d'investimento accusano da alcuni mesi segni di ristagno.

Acciaio

Nel marzo del 1981 la produzione d'acciaio grezzo nella Comunità dei Nove (11,2 milioni di t) ha registrato ancora un lieve aumento dello 0,5% su febbraio (dati depurati delle variazioni stagionali), dopo gli incrementi relativamente maggiori dei due mesi precedenti (+4,5% tra gennaio e febbraio 1981 e +5,5% tra dicembre 1980 e gennaio 1981, sempre sulla base delle cifre destagionalizzate). Nel secondo trimestre di applicazione del sistema di quote obbligatorie (in vigore dal 1° ottobre 1980) a norma dell'articolo 58 del Trattato CECA, la produzione di acciaio grezzo è stata quindi inferiore quasi del 5,5% a quella del 1° trimestre 1980 (fortemente influenzata dallo sciopero nella siderurgia britannica), e del 10% alla produzione dello stesso trimestre del 1979.

Quanto ai nuovi ordinativi, sebbene essi abbiano registrato nel febbraio del 1981 un lieve aumento del 3% sul mese precedente (in cifre destagionalizzate), la situazione resta caratterizzata da una debolezza persistente.

Energia : Aspetti statistici dell'economia energetica nel 1980

Nel 1980 il consumo di energia è diminuito nella Comunità dei Nove del 4,6% o di 44 milioni di tep. Nonostante l'incremento del PIL, pari all'1,3% per la Comunità (solo il Regno Unito e la Danimarca hanno registrato una flessione), è stato possibile diminuire il consumo interno lordo di energia in una misura che va dall'1% circa per l'Italia e la Francia al 9,2% per il Regno Unito.

Per contro, se si considera l'evoluzione delle capacità di produzione di energia elettrica nel 1980, si osserva che sono entrati in funzione numerosi nuovi impianti. Al netto degli impianti messi fuori servizio, si registra un aumento notevole della potenza complessiva, dell'ordine di 11 000 MW, contro 6 000-8 000 MW negli anni precedenti.

Questo maggiore aumento delle capacità è dovuto in grandissima parte all'espansione del parco nucleare (esclusivamente in Francia), cresciuto di 6 065 MW netti, pari quasi al 55% di tutti i nuovi impianti entrati in servizio nella Comunità. La potenza massima possibile netta del parco nucleare ha raggiunto alla fine del 1980 i 33 000 MW, con un aumento del 25% sul 1979.

I prezzi al consumo nel mese di marzo

L'indice dei prezzi al consumo per l'intera CE è salito dell'1,2% tra febbraio e marzo del 1981. L'aumento più sensibile è osservato in Grecia (2,4%), mentre in Danimarca i prezzi sono saliti del 2% allo scadere della legge sul blocco dei prezzi, a fine febbraio. Aumenti dell'1,5% si registrano in Italia e nel Regno Unito, contro aumenti più moderati in Francia (1,0%), nei Paesi Bassi (0,9%), nel Lussemburgo (0,8%), nella Repubblica federale di Germania (0,7%) e in Belgio (0,6%). Il tasso di aumento dei prezzi sui 12 mesi per EUR-10 è del 12,6%.

Scambi intracomunitari

Il peggioramento degli scambi intracomunitari osservato nel 1980 è proseguito nel gennaio del 1981: le importazioni in valori correnti accusano una flessione del 9,9% rispetto a dicembre del 1980. L'evoluzione è negativa per tutti gli Stati membri, tranne che per la Repubblica federale di Germania (+2,1%), che d'altra parte accusa un peggioramento brusco e notevole del saldo dei suoi scambi intracomunitari (-253 milioni di ECU, contro +467 milioni di ECU nel gennaio 1980; in dicembre il saldo era ancora attivo per 2 milioni di ECU). Il maggior disavanzo è stato raggiunto dalla Francia (-499 milioni di ECU); i Paesi Bassi e il Regno Unito restano i soli ad avere un saldo attivo (rispettivamente di 1 424 e 553 milioni di ECU).

Scambi con i paesi al di fuori della CE

Anche per questi scambi si osserva in gennaio una caduta delle importazioni e delle esportazioni della Comunità rispetto al mese di dicembre (-10,2% e, rispettivamente, -18,7%). L'evoluzione resta però positiva rispetto a gennaio del 1980, con tassi pari allo 0,8% e al 6%. Solo il Regno Unito e l'UEBL hanno registrato un aumento delle esportazioni rispetto al mese di dicembre (+2,1 e +2,5%). Il disavanzo della Comunità nel suo commercio con l'estero resta sempre preoccupante ed è pari a 4 366 milioni di ECU (contro 2 763 in dicembre: vi contribuiscono tutti gli Stati membri, ma il disavanzo più elevato è quello della Francia (1 438 milioni di ECU).

Finanze : Aumento dei tassi d'interesse americani

Il tasso d'interesse ha raggiunto negli Stati Uniti un nuovo livello record : molte delle grandi banche americane hanno portato il « prime rate » (tasso d'interesse sui prestiti ai clienti di prima categoria) dal 18 al 19%. Il 5 maggio il Federal Reserve Board ha alzato a sua volta il tasso ufficiale di sconto, portandolo dal 13 al 14%. In conseguenza dei maggiori differenziali d'interesse, il dollaro americano si è apprezzato sulle valute dello SME. La Banca di Francia ha dovuto difendere il franco francese nel quadro del sistema d'intervento dello SME ed ha aumentato il tasso d'interesse per alcuni tipi d'interventi sul mercato, portandolo dal 12,5 al 13,5%.

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturrelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlige, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelseres definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

PREFACE

EN

This bulletin is in two parts: 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

AVVERTENZA

IT

Il presente bollettino consta di 2 parti: l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese: si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa.

(1) Mere detaljerede oplysninger efter brancher findes i publikationen »Industriens Konjunkturindikatorer«.

(2) Oplysningerne i dette afsnit af publikationen svarer til resultaterne af konjunkturundersøgelsen hos virksomhedsledere i Fællesskabet. Mere detaljerede oplysninger findes i »Europæisk økonomi«.

(3) Tallene vedrørende udenrigshandelen findes mere detaljerede og udtrykt i ERE i »Månedlig Bulletin over Udenrigshandelen«.

(4) Husholdningernes konsum.
