DATI PER L'ANALISI DELLA CONGIUNTURA

Manuskript afsluttet den 22. Juni 1981.

Manuscript completed 22 June 1981.

Manoscritto terminato il 22 giugno 1981.

Arbejdsløshed : I sæsonkorrigerede tal stadig stigende

Ved udgangen af maj måned blev der i Fællesskabet (EUR 9) registreret 8,3 Mio arbejdsløse svarende til 7,5% af den civile erhvervsaktive befolkning. Trods en mindre nedgang i bruttotallene i perioden mellem udgangen af april og udgangen af maj 1981 er arbejdsløsheden i Fællesskabet i realiteten steget med 2,5% i sæsonkorrigerede tal.

På 12 måneder steg arbejdsløsheden i De Ni med 35% og alle lande blev berørt. De største stigninger fandt sted i Det forenede Kongerige (70%), Nederlandene (64%), Danmark og Luxemburg (55%) og Forbundsrepublikken Tyskland (45%). Irland (32%), Belgien (27%), Frankrig (22%) og Italien (8%) holder sig under gennemsnittet for Fællesskabet.

Andelen af unge arbejdsløse under 25 år af det samlede antal arbejdsløse voksede i størstedelen af medlemsstaterne i forhold til maj måned sidste år. Integreringen i arbejdsmarkedet synes at have voldt særlig store vanskeligheder, og alle de unge, som nu snart forlader skoler og universiteter, vil møde et marked, som allerede er stærkt mættet.

Indekset over industriproduktionen : Fortsat nedadgående tendens på kort sigt

Ifølge EUROSTATs foreløbige beregninger opgøres indekset over industriproduktionen i Det europæiske Fællesskab for maj måned 1981 til 118,8 (1975 = 100) svarende til en nedgang af størrelsesordenen 6% i forhold til samme måned sidste år. Efter korrektion for sæsonudsving opgøres indekset til 112,3 (1975 = 100) svarende til 1,5% i forhold til februar måned.

Betragter man de tre vigtigste produktionsgrupper, konstaterer man, at forbrugsgode-industrien efter fem måneders fremgang er den gruppe, hvor udviklingen er mindst dårlig (-0,6%), mens udviklingstendensen for mellemproduktindustrien og investerings-godeindustrien igen er blevet negativ i løbet af de sidste to måneder. Især er produktionsnedgangen for den sidste gruppes vedkommende sket hurtigt, hvilket også kan ses af det ikke-korrigerede indeks. I løbet af de sidste fire måneder har man registreret tal, som lå lavere end de tilsvarende tal et år tidligere, hvilket sker efter to år med uafbrudt stigning.

Stål

I april 1981 registreredes i Fællesskabets (EUR 9) produktion af råstål en nedgang på 2% i forhold til den foregående måned (efter sæsonkorrigering). Med 10,4 Mio tons var den 10% lavere end året i forvejen. For de første fire måneder i 1981 er der således tale om en nedgang på 6,8% i forhold til den tilsvarende periode sidste år.

Der registreredes en mindre stigning i nye ordrer på almindeligt stål indgået fra tredjelande, mens der globalt set (målt i sæsonkorrigerede tal) var tale om en nedgang.

Energi : Kulminedrift i 1980

På fællesskabsplan kan det konstateres, at lukningen af ti miner og tabet af en produktionskapacitet på 0,5 Mio tons bragte denne ned på 245 Mio tons ved udgangen af 1980 (teoretisk beregning). Der registreredes en mindre produktionsstigning på 8,5 Mio. tons, idet produktionen reelt nåede op på godt 247 Mio. tons. Desuden voksede minerens samlede lagre med 10,7 til 37,2 Mio. tons (40,4%).

Samhandlen inden for fællesskabet

Der skete en mindre stigning i februar, hvor importen voksede med 11,2% i forhold til januar og nåede op på næsten 18,5 Mrd. ECU. Det er dog stadig 3% mindre end i februar 1980.

Importstigningen var særlig kraftig i forhold til januar i Nederlandene (24,2%) og Det forenede Kongerige (22,1%). Stigningen i eksporten udgjorde 23,6% for Frankrigs vedkommende og 17,3% i Italien. Selv med disse store tal nåede man imidlertid ikke op på samme niveau som i februar 1980 (Frankrig opnåede den største stigning i importen med 0,3%, mens Det forenede Kongerige opnåede den største stigning i eksporten med 6,7%).

De forskellige medlemsstaters handelsbalancer var stort set uændrede i forhold til februar 1980 bortset fra, at Frankrig formindskede sit underskud (185 Mio. ECU imod 317), og Det forenede Kongerige forbedrede sin balance fra et underskud på 184 Mio. ECU til et overskud på 139 Mio. ECU.

Endelig registreredes en tydelig bedring i Vesttysklands handelsbalance i forhold til januar (et overskud på 308 Mio. ECU mod et underskud på 253 Mio. ECU i januar).

Fællesskabets samhandel med tredjelande

Der indtrådte ligeledes en bedring i situationen i februar måned med en stigning i importen på 1% for Fællesskabet mod en nedgang på næsten 12% i januar. I forhold til februar 1980 er stigningen dog stadig beskedent (2,2%). De største og laveste tal registreredes i henholdsvis Italien (+18,2%) og Det forenede Kongerige (-16,2%).

Fremgangen i EFs eksport i forhold til januar er større (5,8%), men ligger stadig lavere end i februar 1980 (-6,6%). Denne fremgang er særlig udpræget for Italien (22,7% i forhold til januar og 21,7% i forhold til februar 1980) og Frankrig (henholdsvis 18,8% og 12%). Kun Det forenede Kongerige registrerede et negativt tal i forhold til januar (-13%). For alle medlemsstaters vedkommende er stigningen i eksporten i forhold til januar større end stigningen i importen.

Fællesskabets handelsunderskud nåede op på 2 981 Mio. ECU i februar, hvilket er mindre en i januar (3 749 Mio. ECU) og i februar 1980 (3 647 Mio. ECU). Dette underskud deles hovedsagelig mellem Frankrig (1 034 Mio. ECU), Nederlandene (1 029 Mio. ECU) og Italien (910 Mio. ECU).

Forbrugerprisindekset

Forbrugerprisindekset for hele EF steg med 1,6% mellem marts og april 1981, hvilket er den største stigning inden for de seneste 12 måneder. Den største stigning, nemlig 2,9%, registreredes i Det forenede Kongerige, hvilket delvis var forårsaget af de budgetterede afgiftsforhøjelser.

Der blev også registreret betydelige stigninger i Grækenland (2,0%), Frankrig (1,4%), Italien (1,4%), Danmark (1,2%) og Nederlandene (1,0%). Derimod var stigningerne mere moderate i Forbundsrepublikken Vesttyskland og Luxembourg (0,6%), mens Belgien tegnede sig for en mindre nedgang (-0,1%). For EUR 10 er stigningstakten for de seneste 12 måneder opgjort til 12,4%.

Penge og finanser : Foranstaltninger til støtte for den franske franc

Efter præsidentvalget kom den franske franc under pres og måtte støttes ved hjælp af en række valutapolitiske foranstaltninger. Den 15. maj hævede den franske nationalbank igen den vejledende rente fra 16 til 18%. Udover interventionerne på valutamarkedet (6 Mrd. ffr. på 3 dage) skærpedes kontrollen med kapitaludførelse.

Disse valutapolitiske foranstaltninger fik den ønskede virkning. Den franske franc, som den 21. maj nåede sit laveste punkt over for ECU'en med 6,11277 ffr. (centralkurs 1 ECU = 5,99526 ffr.) steg i begyndelsen af ugen til 6,067 (den 26. maj) og er dermed ikke langt fra sit niveau før præsidentvalget (6,02679 den 8. maj).

Den amerikanske dollar steg over for EMS-valutaerne som følge af det konstant stigende renteniveau i USA. I mellemtiden fastsatte størstedelen af de store amerikanske banker deres « prime rate » til 20%.

Unemployment: Seasonally adjusted figures still rising

At the end of May there were 8.3 million registered unemployed, representing 7.5% of the civilian working population, in the Community of the Nine. Despite a very slight drop in the total number of unemployed between end-April and end-May 1981, the seasonally adjusted figures showed an increase of 2.5% in the Community.

In the space of 12 months unemployment in Europe of the Nine has gone up by 35%; all the Member States have been affected. The biggest increases occurred in the United Kingdom (+70%), the Netherlands (+64%), Denmark and Luxembourg (+55% in each case) and the FR of Germany (+45%). The figures for Ireland (+32%), Belgium (+27%), France (+22%) and Italy (+8%) were below the Community average.

In most of the Member States the percentage of persons aged under 25 years in the unemployed total has increased in comparison with May of last year. It appears that the labour market has found it particularly difficult to absorb them and that the next batch of school and university leavers will encounter a market already largely saturated.

Index of industrial production: Continuing downward trend in short-term growth prospects

According to provisional EUROSTAT estimates, the index of industrial production in the European Community was 118.8 (1975=100) in March 1981, representing a further substantial decline of about 6% compared with the figure for the same month of last year. The seasonally adjusted index was 112.3 (1975=100), which is 1.5% down on the figure for February.

As far as the three main groups of industrial products are concerned, the consumer goods group has the best growth trend (-0.6%) after five months of recovery, whereas both the intermediate products and the capital goods groups have become negative again in the past two months. The latter group of products in particular experienced a sharp decline, which is also evident in the unadjusted index: over the last four months, three of the figures were below those of the previous year, after about two years of successive increases.

Steel

In April 1981 crude steel production in the Community of the Nine fell by 2% on the previous month (seasonally adjusted figures). At 10.4 Mio t it was 10% down on last year's level. As a result, there was a drop of 6.8% in the first four months of 1981 compared with the corresponding period of last year.

New orders for tonnage steel from third countries showed a slight upward trend, although the overall trend (seasonally adjusted) was downward.

Energy: Activities of coal mines in 1980

In the Community as a whole, the closure of ten pits and the loss of 0.5 Mio t of production capacity brought the latter down to 245 Mio t at the end of 1980 (theoretical estimate). There was a fairly substantial increase of 8.5 Mio t in production, with actual output reaching slightly over 247 Mio t. In addition, total pithead stocks went up by 10.7 Mio t to 37.2 Mio t (+40.4%).

Intra-community trade

There was a slight recovery in February, when imports went up by 11.2% compared with January to stand at 18.5 Mrd. ECU, although they are still 3% down on February 1980.

The increase in imports compared with January was particularly high in the case of the Netherlands (+24.2%) and the United Kingdom (+22.1%), while on the export side the increase amounted to 23.6% for France and 17.3% for Italy. However, these high rates of increase did not signal a general return to February 1980 levels (the highest figures were recorded by France with a 0.3% rise in imports and the United Kingdom with a 6.7% rise in exports).

The various Member States' trade balances remained at more or less the same level as in February 1980, apart from the drop in France's deficit (from 317 to 185 Mio ECU) and the transition from a deficit of 184 Mio ECU to a surplus of 139 Mio ECU for the United Kingdom.

Finally, Germany's balance of trade picked up sharply compared with January (+308 Mio ECU as against a deficit of 253 Mio ECU in January).

Extra-community trade

There was likewise a slight recovery in February, with a rise of 1% in Community imports compared with a fall of almost 12% in January. However, compared with February 1980 the increase is still very modest (+2.2%). The two extreme rates were recorded by Italy (+18.2%) and the United Kingdom (-16.2%).

The increase in Community exports compared with January was more substantial (+5.8%) but still down on February 1980 (-6.6%). This recovery was particularly marked in Italy (+22.7% compared with January and +21.7% compared with February 1980) and France (+18.8% and +12% respectively). Only the United Kingdom recorded a decline compared with January (-13%). For all the Member States exports picked up at a faster rate than imports between January and February.

The Community's trade deficit totalled 2 981 Mio ECU in February, lower than in January (3 749 Mio ECU) and in February 1980 (3 647 Mio ECU). This deficit is accounted for mainly by France (1 034 Mio ECU), the Netherlands (1 029 Mio ECU) and Italy (910 Mio ECU).

Consumer price index

The consumer price index for the Community as a whole went up by 1.6% between March and April 1981, the highest rise for 12 months. The biggest increase - 20.9% - was recorded in the United Kingdom, partly as a result of tax increases in the budget.

Appreciable rises were also recorded in Greece (2.0%), France (1.4%), Italy (1.4%), Denmark (1.2%) and the Netherlands (1.0%). On the other hand, there were more moderate rises in the FR of Germany and Luxembourg (0.6% in each case), while there was a slight fall in Belgium (-0.1%).

The rate of increase for EUR 10 over the last 12 months is 12.4%.

Finance: Measures to support the French franc

Following the Presidential elections, the French franc came under pressure and had to be supported by means of a series of monetary measures. On 15 May the Banque de France raised the guide rate again from 16 to 18%. In addition to intervention on the exchange market (FF 6 Mrd. in three days), controls on the export of capital were stepped up.

These monetary policy measures had the desired success. The French franc, which on 21 May reached its lowest point vis-à-vis the ECU at 6.11277 (central rate: 1 ECU = FF 5.99526), picked up again at the beginning of the week (26 May) to 6.067 and was thus not very far from its pre-election level (6.02679 on 8 May).

The \$US appreciated against the EMS currencies as a result of the steady upward trend in interest rates in the United States. In the meantime, most of the leading American banks have set their 'prime rate' at 20%.

Disoccupazione: continuato ad aumentare i dati destagionalizzati

Alla fine del mese di maggio 1981 il numero delle persone iscritte nelle liste di collocamento nella Comunità dei Nove era di 8,3 milioni, pari al 7,5% della popolazione attiva civile. Malgrado un leggerissimo calo, in dati grezzi, del numero di disoccupati tra fine di aprile e fine maggio del 1981, la disoccupazione nella Comunità è di fatto aumentata del 2,5% in dati destagionalizzati.

Nel giro di dodici mesi l'aumento della disoccupazione nell'Europa dei Nove è stato del 35%, e il fenomeno ha interessato tutti i paesi. Gli aumenti più importanti si osservano nel Regno Unito (+70%), nei Paesi Bassi (+64%), in Danimarca e nel Lussemburgo (+55%) e nella Repubblica federale di Germania (+45%). Aumenti inferiori alla media comunitaria si sono registrati in Irlanda (+32%), in Belgio (+27%), in Francia (+22%) e in Italia (+8%).

La percentuale dei giovani di età inferiore a 25 anni sul totale dei disoccupati è aumentata, rispetto al mese di maggio dello scorso anno, nella maggior parte degli Stati membri. A quanto sembra la loro inserzione nel mercato del lavoro è stata particolarmente difficile e il prossimo afflusso di giovani che hanno terminato la scuola o l'università avverrà su un mercato già largamente saturo.

Indice della produzione industriale: Prospettive di crescita a breve termine ancora una volta orientate verso il basso

Secondo stime provvisorie dell'EUROSTAT, l'indice della produzione industriale nella Comunità europea si situa, nel mese di marzo 1981, a 118,8 (1975 = 100), il che corrisponde ancora una volta ad una diminuzione notevole di circa il 6% rispetto allo stesso mese dell'anno precedente. Una volta destagionalizzato, l'indice si colloca a 112,3 (1975 = 100), con una diminuzione dell'1,5% rispetto al dato del mese di febbraio.

A livello dei tre principali raggruppamenti di prodotti industriali, si può constatare che il gruppo dei beni di consumo è divenuto, dopo 5 mesi di riprese, quello il cui andamento è tendenzialmente il meno critico (-0,6%), mentre la tendenza si è fatta di nuovo negativa, negli ultimi due mesi, per il gruppo dei beni intermedi e per quello dei beni d'investimento. In particolare per quest'ultimo gruppo di prodotti si è assistito ad un deterioramento rapido, e quest'evoluzione è rispecchiata anche dall'indice non corretto: negli ultimi quattro mesi si sono osservati tre dati in ribasso rispetto a quelli di un anno prima, e questo dopo circa due anni di aumenti successivi.

Acciaio

Nell'aprile 1981, la produzione di acciaio grezzo della Comunità dei Nove ha fatto registrare una diminuzione del 2% rispetto al mese precedente (dati destagionalizzati). Con 10,4 milioni di tonnellate la produzione è stata inferiore del 10% al livello raggiunto l'anno precedente. Per i primi quattro mesi del 1981 si è così constatata una diminuzione del 6,8% rispetto al periodo corrispondente del 1980. Sebbene i nuovi ordinativi d'acciaio comune in provenienza dai paesi terzi abbiano fatto registrare una lieve tendenza all'aumento, l'evoluzione globale (in dati destagionalizzati) è stata negativa.

Energia: Attività delle miniere di carbon fossile nel 1980

Per la Comunità va notato che la chiusura di 10 pozzi e la perdita di una capacità di 0,5 milioni di tonnellate hanno ridotto le capacità produttive a 245 milioni di tonnellate alla fine del 1980 (previsione teorica). Si è avuto tuttavia un aumento della produzione pari a 8,5 milioni di tonnellate, e il livello della produzione reale ha leggermente superato la cifra di 247 milioni di tonnellate. Inoltre le scorte totali presso le miniere sono aumentate da 10,7 a 37,2 milioni di tonnellate (+40,4%).

Scambi intracomunitari

In febbraio si è assistito ad una lieve ripresa degli scambi intracomunitari: le importazioni sono aumentate dell'11,2% rispetto al mese di gennaio, per collocarsi a circa 18,5 miliardi di ECU. Nonostante ciò, esse permangono inferiori del 3% a quelle di febbraio del 1980.

L'incremento delle importazioni rispetto a gennaio è particolarmente marcato per i Paesi Bassi (+24,2%) e il Regno Unito (+22,1%). Quanto alle esportazioni, l'aumento raggiunge il 23,6% per la Francia e il 17,3% per l'Italia. Tuttavia, malgrado questi tassi elevati, non si sono raggiunti i livelli del febbraio 1980 (rispetto a tale data l'incremento più alto è stato ottenuto, per le importazioni, dalla Francia con lo 0,3%, per le esportazioni dal Regno Unito, con il 6,7%). I saldi commerciali dei vari Stati membri sono rimasti più o meno allo stesso livello di quelli osservati nel febbraio 1980, con due eccezioni: è diminuito il disavanzo francese (185 milioni di ECU contro 317), mentre il Regno Unito è passato da un disavanzo di 184 milioni di ECU ad un attivo di 139 milioni di ECU.

Si può osservare, infine, un netto miglioramento del saldo della bilancia commerciale della Repubblica federale di Germania rispetto al mese di gennaio (+308 milioni di ECU, contro un disavanzo di 253 milioni di ECU in gennaio).

Scambi con i paesi al di fuori della Comunità

Anche per questi scambi si è osservata nel mese di febbraio una lieve ripresa, con un incremento delle importazioni dell'1% per la Comunità nel suo complesso, contro una diminuzione di quasi il 12% in gennaio. Rispetto al mese di febbraio 1980, l'incremento permane peraltro molto esiguo (+2,2%). I due tassi estremi si sono osservati in Italia (+18,2%) e nel Regno Unito (-16,2%).

La ripresa delle esportazioni CE rispetto a gennaio è più marcata (+5,8%), ma ancora inferiore al livello del febbraio 1980 (-6,6%). La ripresa è particolarmente manifesta per l'Italia (+22,7% rispetto a gennaio e +21,7% rispetto a febbraio 1980) e per la Francia (+18,8% e, rispettivamente, +12%). Unico paese a far registrare un tasso negativo rispetto al mese di gennaio è stato il Regno Unito (-13%). Per tutti gli Stati membri la ripresa delle esportazioni rispetto al mese di gennaio è risultata più rapida di quella delle importazioni.

Il disavanzo degli scambi commerciali della Comunità è stato, in febbraio, di 1981 milioni di ECU, ed è inferiore a quello del mese di gennaio (3749 milioni di ECU) e di febbraio del 1980 (3647 milioni di ECU). Tale disavanzo è ripartito per la massima parte tra la Francia (1034 milioni di ECU), i Paesi Bassi (1029 milioni di ECU) e l'Italia (910 milioni di ECU).

Indice dei prezzi al consumo

L'indice dei prezzi al consumo per il complesso della CE è salito dell'1,6% tra marzo e aprile del 1981, facendo registrare l'aumento più elevato da 12 mesi a questa parte. L'aumento più forte, pari al 2,9%, è stato registrato nel Regno Unito, in parte a motivo delle maggiorazioni fiscali incorporate nel bilancio.

Aumenti sensibili si sono registrati anche in Grecia (2,0%), in Francia (1,4%), in Italia (1,4%), in Danimarca (1,2%) e nei Paesi Bassi (1,0%). Per contro nella Repubblica federale di Germania e nel Lussemburgo si è assistito ad aumenti più moderati (0,6%) e in Belgio addirittura ad una lieve diminuzione (-0,1%).

Per EUR 10 il tasso d'aumento dei prezzi per gli ultimi dodici mesi risulta del 12,4%.

Finanze: Provvedimenti per la difesa del franco francese

Dopo le elezioni presidenziali, il franco francese è stato messo sotto pressione e ha dovuto essere difeso da una serie di provvedimenti monetari. Il 15 maggio la « Banque de France » ha aumentato nuovamente il tasso direttore, che passa dal 16 à 18%. Oltre agli interventi sul mercato dei cambi (6 miliardi di FF in tre giorni), sono stati rafforzati i controlli sull'esportazione di capitali.

Questi provvedimenti di politica monetaria hanno ottenuto il successo sperato: il franco francese, che il 21 maggio ha raggiunto il livello più basso nei confronti dell'ECU con 6,11277 FF (tasso centrale 1 ECU = 5,99526 FF), è risalito all'inizio della settimana a 6,067 (il 26 maggio) e non si discosta quindi più molto dal livello raggiunto prima delle elezioni presidenziali (6,02679 l'8 maggio).

Il dollaro US si è rafforzato nei confronti delle valute dello SME, dato che i tassi d'interesse negli Stati Uniti manifestano una tendenza costante verso l'alto. Nel frattempo la maggior parte delle grandi banche americane hanno fissato al 20% il loro « prime rate ».

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturrelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlige, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelsers definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

PREFACE

EN

This bulletin is in two parts: 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

AVVERTENZA

IT

Il presente bollettino consta di 2 parti: l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa.

Abonnementet er årligt og løber fra 1. januar til 31. december hvert år.

The annual subscription runs from 1 January to 31 December of each year.

Gli abbonamenti sono annuali e il loro periodo di validità va dal 1° gennaio al 31 dicembre di ciascun anno.

Betaling kan kun ske til agenturerne i landene nævnt på omslagets side 3.

Payments to be made only to the agents in the countries listed on page 3 of the cover.

I versamenti devono essere indirizzati agli uffici di vendita indicati a pag. 3 della copertina

Priserne dækker forsendelse ad land- eller søvej; agenturerne giver oplysning om priserne for luftforsendelse.

These are surface mail rates; for air subscription rates please apply to the agents.

I prezzi non comprendono le spese di spedizione per posta aerea; per le condizioni di abbonamento in caso di spedizione per posta aerea, si consultino gli uffici di vendita.
