DATI PER L'ANALISI DELLA CONGIUNTURA

Manuskript afsluttet den 27. Juli 1981.

Manuscript completed 27 July 1981.

Manoscritto terminato il 27 luglio 1981.

### 1. Arbejdsløshed

Ved udgangen af juni måned 1981 blev antallet af arbejdsløse registreret hos arbejdsformidlingskontorerne i de ni medlemsstater opgjort til 8,4 Mio svarende til en arbejdsløshedsprocent (i forhold til den civile, erhvervsaktive befolkning) på 7,6%. Det er det hidtil største tal for en sommermåned. I år har den sæsonbetingede nedgang været yderst beskedent, idet antallet af arbejdsløse ved udgangen af juni allerede er på højde med det tal, der blev registreret ved udgangen af marts 1981.

Forværringen i arbejdsløsheden i forhold til den foregående måned afspejles ikke blot i stigningen i det absolutte antal registrerede personer, men også i den vedholdende tendens til stigning i de sæsonkorrigerede tal; dog er der konstateret en nedgang i det absolutte antal i Luxembourg og Danmark og en relativ stabil udvikling i Frankrig, Italien og Irland.

Siden juni 1980 er arbejdsløsheden i de ni medlemsstater steget med 34%. Tiltagende arbejdsløshed er fælles for alle medlemsstaterne med de største stigninger i Nederlandene og i Det forenede Kongerige (62%) samt i Forbundsrepublikken Tyskland og Luxembourg (henholdsvis 44% og 43%).

Den store stigning i arbejdsløsheden inden for det sidste år skyldes for en stor dels vedkommende den kraftige stigning i antallet af arbejdsløse mænd, nemlig 42% for hele Fællesskabet mod 25% for kvindernes vedkommende. Denne udvikling gør sig gældende i alle medlemsstaterne med undtagelse af Italien og er særlig udpræget i Nederlandene (74%), Det forenede Kongerige (69%), Danmark (56%), Forbundsrepublikken Tyskland (54%) og Belgien (51%). I samme periode konstateredes en mærkbar stigning i antallet af arbejdsløse kvinder i Det forenede Kongerige (45%), Nederlandene (43%) og Luxembourg (42%).

Antallet af unge arbejdsløse under 25 år steg i perioden mellem marts og juni 1981 med 3% i de ni medlemsstater. Denne stigning skyldes hovedsagelig udviklingen i Det forenede Kongerige og i Nederlandene (16%), hvor skoleåret slutter relativt tidligt.

### 2. Indekset over industriproduktionen : Stabilisering

Det foreløbige indeks over industriproduktionen i Det europæiske Fællesskab blev i april måned 1981 opgjort til 118,0 (1975=100), hvilket svarer til en nedgang på 5% i forhold til april 1980. Efter korrektion for sæsonudsving er indekset 112,9 (1975=100) svarende til en mindre nedgang (0,2%) i forhold til marts 1981, der efterfølger en allerede beskedent nedgang i den foregående måned (0,8%). Ser man imidlertid på kvartalsgennemsnittet (februar-april 1981) for det sæsonkorrigerede indeks, konstaterer man, at udviklingen har været stabil i forhold til det foregående kvartal, hvilket lader formode, at nedgangsfasen i Fællesskabets industriproduktion sluttede ved udgangen af 1. kvartal 1981 og har været af en varighed på ca. 12 måneder.

Betragter man de enkelte lande konstateres det, at alle landene inden for den sidst opgjorte måned oplevede en større eller mindre bedring i vækstraten på kort sigt. Medens det blot for en måned siden af de foreløbige tal frem til marts 1981 fremgik, at kun Tyskland og Danmark havde en positiv vækst, viser de seneste tal, at fire andre lande (Italien, Nederlandene, Belgien og Irland) i løbet af de seneste måneder har haft en positiv vækst.

Med hensyn til udviklingen i Fællesskabets produktion af de tre hovedgrupper af industriprodukter konstateres for forbrugsgoderne vedkommende en mindre stigning (0,2%), som følger efter en nedgangsperiode, der stort set faldt sammen med nedgangen i det samlede indeks. Ligeledes konstateredes der i april 1981 en stigende tendens for investeringsgoderne efter nogle måneders nedgang, mens man for mellemprodukterne stadig registrerede en mindre tilbagegang (0,5%).

### 3. Stål

Produktionen af råstål i EF (uden Grækenland) lå til trods for en mindre stigning i maj 1981 (sæsonkorrigeret tal : +3%) stadig betydelig under produktionen året i forvejen (-9,1%). Den samlede produktion i perioden mellem januar og maj 1981 er således 7,2% mindre end i samme periode i 1980. Produktionen af støbejern var ligeledes relativt beskedent, men i modsætning til produktionen af stål registreredes der visse mindre stigninger i forhold til maj 1980 (Italien og Nederlandene).

### 4. Forbrugerpriser

For anden gang i træk steg forbrugerprisindekset for hele EF med mindre end 1% på en måned. Indtil de endelige tal for visse lande foreligger, skønnes indekset for EUR 10 at være steget med 0,8% i perioden maj-juni 1981.

Der blev igen registreret en mærkbar stigning i Grækenland (1,8%) og ligeledes i Danmark, Frankrig, Italien og Luxembourg (alle 1,0%). Belgien (0,6%), Forbundsrepublikken Tyskland (0,5%), Det forenede Kongerige (0,5%) oplevede mere moderate stigninger, mens indekset i Nederlandene kun steg med 0,1% i perioden mellem maj og juni.

Sammenligner man stigningstakten i forbrugerprisindekset i første og andet halvår af 1980 med de første 6 måneder af dette år, konstateres det, at inflationen er aftagende for hele EUR 10 og i størstedelen af medlemsstaterne.

**5. Penge og finanser**

I de seneste måneder har det amerikanske renteniveau fortsat været højt, og delvis som følge heraf er dollaren steget over for de europæiske valutaer. Det engelske pund var særlig svagt og nåede det laveste punkt over for dollaren inden for de seneste tre år.

### 1. Unemployment

At the end of June 1981 the number of persons registered as unemployed at public employment offices in the Community of Nine rose to 8.4 million, representing an unemployment rate of 7.6% of the civilian working population. This level of unemployment has never before been reached in a summer month. This year the extent of the seasonal reduction has been particularly moderate so that the number of unemployed is now as high as at end-March 1981.

Compared with the previous month, not only has the absolute number of unemployed in the Community of Nine gone up but the rising trend of unemployment estimated in seasonally corrected values has continued. In Luxembourg and Denmark, however, the absolute figure for registered unemployed showed a reduction while in France, Italy and Ireland it remained unaltered.

Unemployment in the Community of Nine has risen by 34% since end-June 1980, all Member States being affected. The largest increases were recorded in the Netherlands and the United Kingdom (+62% in each case) and in the F.R. of Germany and Luxembourg (+44% and +43% respectively).

The rise in unemployment in the course of the past year was marked by an exceptionally high rate of increase in the case of males. For the Community of Nine this increase amounted to 42% whereas in the case of females the figure was only 25%. The faster growth of unemployment among men is apparent in all Member-States excepting Italy. In the past year the greatest increases in male unemployment occurred in the Netherlands (+74%), the United Kingdom (+69%), Denmark (+56%), the F.R. of Germany (+54%), and Belgium (+51%). In the same period the rise in female unemployment was greatest in the United Kingdom (+45%), the Netherlands (+43%), and Luxembourg (+42%).

The number of unemployed persons aged under 25 years in Europe-Nine rose by 3% between end-March and end-June 1981, principally on account of the increase in this group in the United Kingdom and the Netherlands (+16% in each case) due to the early school-leaving date in these Member-States.

### 2. Index of industrial production : Stabilization

The provisional index of industrial production in the European Community was 118.0 (1975=100) in April 1981, representing a decline of 5% compared with the figure for April 1980. The seasonally adjusted index was 112.9 (1975=100), which is slightly down (-0.2%) on the figure for March 1981, following the moderate decline in the previous month (-0.8%). Nevertheless, the average seasonally adjusted index for the last three months (February to April 1981) remained stable compared with the previous quarter (see Table II: Short-term growth indicator) which would appear to indicate that the decline in industrial activity within the EC terminated towards the end of the first quarter of 1981, after lasting for about 12 months. However, it is not possible to determine when and to what degree an upturn in industrial production will occur within the coming months, if at all, simply on the basis of the trend in the index of production.

At the national level, it should be noted that in the last month for which figures are available, the short-term growth rate of every country improved by varying degrees (see Table II). Only a month ago, according to the provisional figures covering the period up to March 1981, the only countries with positive growth were Germany and Denmark, whereas the latest figures show that four other countries (Italy, the Netherlands, Belgium and Ireland) ceased to have negative growth in the last few months. It can therefore be concluded that the national trends this time show many more signs of stabilization or upturn in industrial production.

As far as trends in Community production of the three main groups of industrial products are concerned, the consumer goods group shows now a slight increase (+0.2), after passing through a period of decline, which virtually coincided with the decline in the overall index. Similarly, the capital goods industry showed signs of recovery in April 1981 after several months of stagnation, whereas the growth rate for intermediate products remained slightly negative (-0.5%).

### 3. Iron and steel

Production of crude steel for the Community (excluding Greece) has, despite a slight rise in May 1981 (+3% deseasonalized), remained noticeably lower than for the same month last year (-9.1%).

The total production for January-May 1981 is thus 7.1% lower than that for 1980. Production of pig-iron has also shown a slight upturn, but, unlike steel production, there are certain small increases when compared with May 1980 (notably Italy and the Netherlands).

### 4. Consumer prices in June 1981

For the second time in succession, the consumer price index for the EC as a whole rose by less than 1% in a month. Pending definite figures for some countries, the June-index for EUR 10 is estimated to be 0.8% higher than in May.

A big increase was recorded again in Greece (1.8%); significant increases were also reported from Denmark, France, Italy and Luxembourg (all 1%). Belgium (0.6%), F.R. Germany (0.5%) and the United Kingdom (0.5%) show moderate increases, whereas the Dutch consumer price index rose only by 0.1% from May to June.

A comparison of the rates of increase of the consumer price index during the first and the second half year of 1980 with the first six months of this year shows the slowing down of the inflation for EUR 10 as a whole and in most of individual member countries.

The increase over 12 months for EUR 10 is 12.5% as against around 0.5% for the USA and around 4.5% for Japan.

**5. Finance**

In the past month US interest rates have remained high and partly as a result, the dollar has risen against European currencies. Sterling was particularly weak and reached a three year low against the dollar.

[The following text is extremely faint and illegible due to low contrast and scan quality. It appears to be a continuation of the financial report, possibly containing a table or detailed analysis.]

### 1. Disoccupazione

Alla fine del mese di giugno 1981 il numero dei disoccupati iscritti nelle liste di collocamento della Comunità dei Nove era di 8,4 milioni, pari al 7,6% della popolazione attiva civile: si tratta del tasso di disoccupazione più elevato mai raggiunto finora in un mese estivo. Quest'anno il regresso stagionale della disoccupazione ha avuto un'ampiezza molto moderata e il numero dei disoccupati di fine giugno corrisponde ormai a quello di fine marzo 1981.

L'aggravamento della disoccupazione rispetto al mese precedente si traduce non solo nell'aumento del numero dei disoccupati in cifre assolute, ma nel persistere della tendenza all'aumento delle cifre corrette delle variazioni stagionali; si può tuttavia osservare una lieve diminuzione del numero assoluto degli iscritti nel Lussemburgo e in Danimarca ed una relativa stabilità in Francia, in Italia e in Irlanda.

Dal giugno 1980 l'incremento della disoccupazione nella Comunità (nove paesi) è stato del 34%: l'aumento riguarda tutti gli Stati membri, con punte maggiori nei Paesi Bassi e nel Regno Unito (+62%), nella Repubblica federale di Germania (+44%) e nel Lussemburgo (+43%).

Il notevole aggravamento della disoccupazione nell'ultimo anno è stato caratterizzato soprattutto da un forte incremento della disoccupazione maschile salita mediamente del 42%, mentre quella femminile ha avuto un aumento più moderato (+25%). Ad eccezione dell'Italia, si osserva lo stesso fenomeno anche a livello nazionale, con incrementi della disoccupazione maschile che raggiungono il 74% nei Paesi Bassi, il 69% nel Regno Unito, il 56% in Danimarca, il 54% nella R.F. di Germania e il 51% in Belgio. Si può peraltro osservare nello stesso periodo un aumento sensibile anche della disoccupazione femminile nel Regno Unito (+45%), nei Paesi Bassi (+43%) e nel Lussemburgo (+42%).

Il numero dei disoccupati iscritti di meno di 25 anni è aumentato, tra marzo e giugno 1981, del 3% nella Comunità dei Nove. Detto aumento è essenzialmente dovuto all'evoluzione nel Regno Unito e nei Paesi Bassi (+16%), dove l'anno scolastico termina relativamente presto.

### 2. Indice della produzione industriale : stabilizzazione

L'indice provvisorio della produzione industriale nella Comunità europea si è situato, nel mese di aprile 1981, a livello 118,0 (su base 1975=100), il che corrisponde ad una flessione del 5% sulla cifra di aprile 1980. Se si elimina l'influenza delle variazioni stagionali, l'indice corretto risulta di 112,9 (1975=100), cifra che accusa una lieve diminuzione (-0,2%) rispetto a marzo del 1981, facendo seguito ad una flessione già moderata nel mese precedente (-0,8%). Tuttavia, il fatto che la media trimestrale dell'indice destagionalizzato (da febbraio ad aprile del 1981) risulti stabile sul trimestre precedente induce a ritenere che la fase di regresso dell'attività industriale comunitaria, che durava da circa 12 mesi, sia terminata verso la fine del primo trimestre 1981.

A livello nazionale, si può osservare che nell'ultimo mese noto tutti i paesi hanno constatato un miglioramento, in misura diversa, del tasso di sviluppo a breve termine. Mentre solo un mese fa dai dati provvisori fino a marzo 1981 si osservavano cifre positive solo per la Germania e la Danimarca, dagli ultimi dati risulta che quattro altri paesi (Italia, Paesi Bassi, Belgio e Irlanda) sono usciti negli ultimi mesi dalla zona di andamento negativo.

Se si analizza l'andamento della produzione comunitaria dei tre grandi gruppi di prodotti industriali, si osserva che i beni di consumo registrano un andamento leggermente positivo (+0,2%), dopo un periodo di flessione che coincideva praticamente con il regresso dell'indice globale. Allo stesso modo, i beni d'investimento hanno manifestato nell'aprile del 1981 segni di ripresa, dopo alcuni mesi di debolezza, mentre per i beni intermedi il tasso di sviluppo resta leggermente negativo (-0,5%).

### 3. Acciaio

La produzione d'acciaio grezzo della CE (Grecia esclusa) è rimasta ancora notevolmente inferiore al livello dell'anno precedente (-9,1%), nonostante il lieve incremento osservato nel mese di maggio (+3% in cifre destagionalizzate). La produzione totale dei mesi da gennaio a maggio del 1981 è quindi inferiore del 7,2% a quella del periodo corrispondente del 1980. Anche la produzione di ghisa ha avuto un andamento alquanto depresso, ma contrariamente alla produzione di acciaio si osservano qui alcuni lievissimi aumenti rispetto a maggio del 1980 (Italia e Paesi Bassi).

### 4. I prezzi al consumo

Per il secondo mese consecutivo l'indice dei prezzi al consumo per il complesso della CE accusa un aumento, su base mensile, inferiore all'1%: nell'attesa di conoscere i dati definitivi per alcuni paesi, si stima che tra maggio e giugno 1981 l'indice per EUR 10 sia salito dello 0,8%.

L'aumento è stato però di nuovo rilevante in Grecia (1,8%), oltre che in Danimarca, Francia, Italia e Lussemburgo, paesi che accusano tutti tassi superiori all'1,0%. Il Belgio (0,6%), la R.F. di Germania (0,5%) e il Regno Unito (0,5%) registrano invece aumenti moderati, mentre l'indice dei Paesi Bassi è salito, tra maggio e giugno, solo dello 0,1%. Un confronto dei tassi d'incremento dell'indice dei prezzi al consumo nel primo e nel secondo semestre del 1980 con i primi sei mesi di quest'anno permette di osservare un rallentamento dell'inflazione nel complesso EUR 10 e nella maggior parte dei paesi membri.

L'aumento sull'arco di 12 mesi risulta del 12,5% per EUR 10, contro il 9,5% circa negli Stati Uniti e il 4,5% in Giappone.

## 5. Finanze

Nel mese scorso i tassi d'interesse negli Stati Uniti sono rimasti elevati; in parte come conseguenza di quest' andamento, il dollaro ha segnato un ulteriore aumento nei confronti delle valute europee. La sterlina è stata particolarmente debole, raggiungendo il suo livello più basso, nei confronti del dollaro, degli ultimi tre anni.

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«. I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal. Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.** Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA. I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturrelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan. For alle rækkerne findes de historiske tal (årlige, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning. Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelseres definitioner, metoder, tilpasninger og kilder vil blive beskrevet. Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

PREFACE

This bulletin is in two parts : 'Community Tables' and 'Country Tables'. The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series. Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.** Finally the Community Tables include a column for the USA as an indicator of changes in the world economy. The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan. For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request. This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'. Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

AVVERTENZA

Il presente bollettino consta di 2 parti : l'una ha per oggetto alcune »tavole comunitarie«, l'altra riguarda alcune »tavole per paese«. Nelle tavole »comunitarie« si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali. Le variazioni stagionali delle serie sono eliminate con il metodo »Dainties« dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.** Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale. Nelle »tavole per paesi« si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e »destagionaliz-

zate» per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone. Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta. La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici. Ogni mese vengono pubblicate due versioni di »EUROSTATISTICHE«. La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa

**DE**

Die deutsche Fassung dieses Bulletins wird am zweiten Dienstag jeden Monats in Druck gegeben.

**FR**

La version française de ce bulletin est mise sous presse le second mardi de chaque mois.

**NL**

De Nederlandse versie van dit bulletin gaat de tweede dinsdag van elke maand ter perse.

(1) Alcuni dati più dettagliati per branca sono riportati nel bollettino « Indicatori congiunturali dell'industria ».

(2) I dati contenuti in questa parte del bollettino rappresentano i risultati dell'indagine sulla congiuntura presso i capi di impresa delle Comunità. Alcuni dati più particolari figurano in « Economia europea ».

(3) Alcuni dati del commercio estero più dettagliati ed espressi in UCE sono riportati nel « Bollettino mensile del commercio estero ».

(4) Consumi finali delle famiglie.

Abonnementet er årligt og løber fra 1. januar til 31. december hvert år.

The annual subscription runs from 1 January to 31 December of each year.

Gli abbonamenti sono annuali e il loro periodo di validità va dal 1° gennaio al 31 dicembre di ciascun anno.

Betaling kan kun ske til agenturerne i landene nævnt på omslagets side 3.

Payments to be made only to the agents in the countries listed on page 3 of the cover.

I versamenti devono essere indirizzati agli uffici di vendita indicati a pag. 3 della copertina.

Priserne dækker forsendelse ad land- eller søvej; agenturerne giver oplysning om priserne for luftforsendelse.

These are surface mail rates; for air subscription rates please apply to the agents.

I prezzi non comprendono le spese di spedizione per posta aerea; per le condizioni di abbonamento in caso di spedizione per posta aerea, si consultino gli uffici di vendita.
