DATI PER L'ANALISI DELLA CONGIUNTURA

Manuskript afsluttet den 28. September 1981.

Manuscript completed 28 September 1981.

Manoscritto terminato il 28 settembre 1981.

1. Arbejdsløshed — Over 9 millioner

Antallet af personer, som hos den offentlige arbejdsformidling i Fællesskabet (EUR 9) var registreret som arbejdsløse, nåede ved udgangen af august 1981 op over 9 millioner. Med et arbejdsløshedstal på 9 135 700 udgjorde arbejdsløshedsprocenten i forhold til den civile erhvervsaktive befolkning 8,3%.

Sammenlignet med den foregående måned steg antallet af arbejdsløse i Fællesskabet (EUR 9) med over 200 000. Målt i sæsonkorrigerede tal svarer dette til en stigning på over 2%. Alle medlemsstaterne med undtagelse af Italien oplever fortsat en kraftig stigning i antallet af registrerede arbejdsløse.

Den generelle arbejdsløshedsprocent, der i gennemsnit for Fællesskabet som helhed udgør 8,3%, varierer betydeligt medlemsstaterne imellem fra 0,9% i Luxembourg og 4,9% i Vesttyskland til 10,4% i Irland, 11,3% i Det forenede Kongerige og 12,6% i Belgien.

Disse forskelle mellem landene er endnu mere udpræget for mænds vedkommende, hvor arbejdsløshedsprocenten varierer fra 0,7% i Luxembourg og 3,9% i Vesttyskland til 11,0% i Irland og 13,1% i Det forenede Kongerige. Det bemærkes, at ud af de 5,2 millioner arbejdsløse i Fællesskabet (EUR 9) tegner Det forenede Kongerige sig for 2,1 millioner.

2. Indekset over industriproduktionen

Det foreløbige indeks over industriproduktionen i Det europæiske Fællesskab blev opgjort til 117,3 (1975=100) i juni 1981, hvilket svarer til en nedgang på 3,6% sammenlignet med juni 1980. Nedgangen i de første 6 måneder af 1981 lå på ca. 4,5% sammenlignet med sidste år og 2,3% sammenlignet med 1979.

Det sæsonkorrigerede indeks blev opgjort til 113,2, hvilket stort set er det samme tal som from april (113,0) og maj (112,9). Ser man på tendensen i medlemsstaternes produktion inden for de seneste måneder, kan der konstateres ustabile væksttendenser i lande som Tyskland (hvor vækstraten overraskende igen var negativ ved udgangen af første halvår), Nederlandene og Danmark. I Frankrig, Italien, Belgien, Luxembourg og Det forenede Kongerige er der imidlertid tegn på opgang eller stabilisering.

For så vidt angår hovedproduktionsgrupperne, var udviklingen også uensartet med undtagelse af mellemproduktindustrien, hvor der stadig har kunnet konstateres en fundamental nedadgående tendens (ca. -1%). Tendensen i produktionen af forbrugsgoder og investeringsgoder svinger mellem en beskedent forbedring og en mindre nedgang (forbrugsgoder : -0,4%, investeringsgoder : +0,5%).

3. Jern og stål

I juli og august 1981 viste fællesskabets produktion af råstål (EUR 9) efter sæsonkorrektur en nedadgående tendens : fra juni til juli -1,5% og fra juli til august -3,7%. Den lå i august 1981 på omkring 9,1 Mio t, hvilket er 2,7% lavere end i august sidste år. Produktionen af råstål i perioden fra januar til august 1981 udgjorde således kun 82,7 Mio t, hvilket er 6 Mio t (eller 6,7%) mindre end i samme periode sidste år (der bør dog tages hensyn til produktionstab i I. kvartal af 1981 som følge af arbejderstrejken inden for den britiske jern- og stålindustri). Efter en mindre nedgang i den foregående måned registreredes i juni et fald i ordretilgangen som følge af en nedgang i efterspørgslen fra andre EKSF-lande og tredjelande.

4. Forbrugerpriser i juli 1981

Forbrugerprisindekset for EF som helhed (EUR 10) steg med 0,9% fra juni til juli og ligger dermed for tredje måned i træk under 1%.

For juli måned registrerede to lande markante stigninger, nemlig Frankrig med 1,8% (foreløbige beregninger) og Belgien med 1,6%. For de andre landes vedkommende er stigningen under 1% : 0,8% i Italien, 0,7% i Danmark og Nederlandene, 0,5% i Luxembourg og Det forenede Kongerige, 0,4% i Vesttyskland, medens Grækenland registrerede en nedgang på 0,5% sammenlignet med den foregående måned.

5. Energi — Udviklingen i elektricitetsforbruget i første halvdel af 1981

Faldet i efterspørgslen i første kvartal af 1981 udjævnedes i et vist omfang i løbet af hele det første halvår. Der registreredes en nedgang på 1,7% i første kvartal, men efterspørgslen i hele første halvår af 1981 faldt med kun 1% i forhold til samme periode 1980. Denne knap så negative tendens skyldes, at nedgangen i industriproduktionen blev bremset i løbet af andet kvartal af 1981. Hvis man ser bort fra den særlig kraftige udvikling i Frankrigs atomkraftproduktion (Eurodif), udgør nedgangen 1,6% for Fællesskabet som helhed.

På nationalt plan kunne der stadig registreres negative tendenser i alle medlemsstaterne undtagen Frankrig (+3,1%, eller +0,5% efter korrektion for forbruget af kernekraft). Det bemærkes, at for dette lands vedkommende blev 41% af efterspørgslen dækket ved hjælp af kernekraft, hvilket er det hidtil højeste tal.

Som følge af faldet i den generelle efterspørgsel og den meget kraftige udvikling i atomkraftproduktionen (+36%), faldt Fællesskabets konventionelle krafproduktion med 7%, hvilket medførte besparelser på ca. 16% i forbruget af olie og naturgas i den offentlige sektors el-produktion.

6. Penge og finanser — Usikkerhed på de store kapitalmarkeder

Den ubetydelige nedgang i den amerikanske « prime rate » (fra 20% til 19 1/2%) gav forventning om et faldende renteniveau i USA og medførte et kraftigt fald i dollarkursen i tredje uge af september. Dollaren faldt således omkring 10% fra dens højdepunkt i begyndelsen af august (1,0229 ECU/Dollar) til slutningen af september (0,920 ECU/Dollar).

For at lette presset på den franske franc, som resulterede i et fald i de franske valutareserver i juli og august med omkring 10 Mrd ffr. til 325,23 Mrd ffr., strammede den franske regering reglerne for terminsforretninger. Desuden blev renten på kortfristede lån forhøjet.

På den engelske børs registreredes et kraftigt fald i aktiepriserne inden for de seneste uger, hvorved de nåede ned på det laveste niveau inden for de seneste 6 måneder.

1. Unemployment — Over 9 million

The number of persons registered as unemployed at public employment offices in the Community of Nine passed above the 9 million mark at the end of August 1981. With 9 135 700 unemployed, the unemployment rate by reference to the civilian working population amounted to 8.3%.

Compared with the previous month the number of registered unemployed in the Community of Nine went up by over 200 000 persons. In terms of seasonally adjusted figures, this corresponds to a rise of over 2%. All Member States excepting Italy continue to be affected by increase in registered unemployment.

The overall unemployment rate, of which the mean value for the Community is 8.3%, varies widely between the different Member States, going from 0.9% in Luxembourg and 4.9% in the F.R. of Germany to 10.4% in Ireland, 11.3% in the United Kingdom and 12.6% in Belgium.

This variation between countries is even more marked in the case of men for whom the unemployment rate ranges from 0.7% in Luxembourg and 3.9% in the R.F. of Germany to 11.0% in Ireland and 13.1% in the United Kingdom. It will be noted that, of the 5.2 million unemployed men in the Community of Nine, 2.1 million are in the United Kingdom.

2. Index of industrial production

The provisional index of industrial production in the European Community was 117.3 (1975=100) in June 1981, representing a decline of 3.6% compared with the June 1980 figure. The fall-off in the first six months of 1981 was about 4.5% compared with the corresponding figure for the previous year, and 2.3% compared with that for 1979.

The seasonally adjusted index was 113.2, which is roughly the same as the indices for April (113.0) and May (112.9). When production trends in member countries in recent months are considered, unstable growth trends can be observed for countries such as Germany (where surprisingly the growth rate became negative again at the end of the first half of the year), the Netherlands and Denmark. In France, Italy, Belgium, Luxembourg and the United Kingdom, however, some signs of recovery or stabilization are apparent.

As far as the main groups of industrial products are concerned, trends were also subject to fluctuations, with the exception of intermediate products, which still show a basic downward trend (approximately -1%). The trend in production of consumer and capital goods is wavering between a modest improvement and a slight decline (consumer goods: -0.4%; capital goods: +0.5%).

3. Iron and Steel

In July and August 1981 — after deseasonalization — the production of crude steel of the Community (excluding Greece) showed a downward trend: from June to July - 1.5%; from July to August - 3.7%. It stood in August 1981, at some 9.1 miot, 2.7% lower than the level reached in August of last year. Thus, the quantity of crude steel produced from January to August 1981 has reached only 82.7 miot, which represents 6 miot (or 6.7%) less than for the same period last year (although account should be taken of the loss of production in the first quarter of 1981 due to the strike of workers in the British iron and steel industry. In June, after a small rise the month before, the trend of new orders again declined, due to reduced demand from other ECSC countries and third countries.

4. Consumer prices in July 1981

The consumer price index for the EC as a whole (EUR 10) rose by 0.9% from June to July and so remains for three months in succession below 1%.

For July two countries recorded significant increases, France 1.8% (provisional) and Belgium 1.6%. For the other countries the rate of increase remains below 1%: 0.8% for Italy, and 0.7% for Denmark and the Netherlands, 0.5% for Luxembourg and the United Kingdom, 0.4% for Germany; Greece even shows a decrease of 0.5% compared to the preceding month.

5. Energy — Development of the electricity economy in the first half of 1981

The decline in demand in the first quarter of 1981 levelled for the whole of the first half of the year: a reduction of 1.7% was recorded for the first quarter, but demand over the whole first half of 1981 was only 1% below that of the same period in 1980. This less negative trend is explained by the fact that the decline in industrial production was curbed during the second quarter of 1981. If the particularly strong development of the French nuclear industry (Eurodif) is excluded, the rate of decline remains at 1.6% for the Community as a whole.

At national level, negative variation rates were still observed in all Member States except France (+3.1%, or +0.5% after correction for nuclear consumption). It should be noted that for this country, 41% of demand was met by nuclear power, which is a record level.

As a result of the fall in overall demand and very strong development of nuclear production (+36%), the Community's conventional power production fell by 7%, resulting in savings of about 16% in consumption of oil and natural gas in the public sector's power stations.

6. Finance — Uncertainty on important financial markets

The small decrease in the American prime rate (from 20% to 19 1/2%) led to the expectation of a falling rate of interest in the USA and to a considerable drop in the dollar rate in the third week of September. Thus, the dollar lost some ten per cent of its value from its peak at the beginning of August (1.0229 ECU/Dollar) to the end of September (0.920 ECU/Dollar).

In order to relieve the pressure on the French franc which was reflected in a fall in the French currency reserves in July and August of some FF 10 Mrd to FF 325.23 Mrd, the French government tightened the conditions for forward buying. In addition, the short-term interest rates were raised.

The U.K. stock exchange registered a major drop in share prices over the last few weeks bringing them to the lowest level in six months.

1. Disoccupazione: più di 9 milioni

Alla fine del mese di agosto 1981 sono stati oltrepassati i nove milioni di persone iscritte nelle liste di collocamento della Comunità europea dei Nove. Con 9 135 700 disoccupati iscritti il tasso di disoccupazione, rispetto alla popolazione attiva civile, ha raggiunto ora l'8,3%.

Rispetto al mese precedente, l'aumento per la Comunità dei Nove è stato di oltre 200 000 persone; i dati corretti delle variazioni stagionali mostrano un incremento della disoccupazione del 2%. In tutti gli Stati membri, ad eccezione dell'Italia, si può notare che il numero dei disoccupati iscritti continua a progredire con un ritmo rapido.

Il tasso globale di disoccupazione, il cui valore medio per la Comunità si colloca sull'8,3%, varia notevolmente tra uno Stato membro e l'altro, andando dallo 0,9% nel Lussemburgo e dal 4,9% nella Repubblica federale di Germania al 10,4% in Irlanda, all'11,3% nel Regno Unito e al 12,6% in Belgio.

La variabilità tra paesi è ancora maggiore se si considerano i soli disoccupati di sesso maschile: il tasso di disoccupazione è situato in questo caso tra lo 0,7% nel Lussemburgo e il 3,9% nella Repubblica federale di Germania, da un lato, e l'11,0% in Irlanda e il 13,1% nel Regno Unito, dall'altro. Da notare inoltre che su 5,2 milioni di uomini disoccupati nella Comunità dei Nove, 2,1 milioni risiedono nel Regno Unito.

2. Indice della produzione industriale

L'indice stimato della produzione industriale nella Comunità europea si è situato, nel mese di giugno 1981, al livello 117,3 (su base 1975=100), il che corrisponde ad una flessione del 3,6% sulla cifra del giugno 1980. La flessione nei primi 6 mesi del 1981 è stata di circa il 4,5% rispetto al dato corrispondente dell'anno precedente e del 2,3% rispetto a quello del 1979.

L'indice destagionalizzato, pari a 113,2, è restato più o meno uguale agli indici del mese di aprile (113,0) e di maggio (112,9). Quanto alle tendenze della produzione negli Stati membri negli ultimi mesi, si possono osservare tassi di incremento instabili per paesi quali la Repubblica federale di Germania (dove, stranamente, il tasso di crescita è diventato nuovamente negativo alla fine del primo semestre), i Paesi Bassi e la Danimarca. Per contro, si sono osservati segni di ripresa o di stabilizzazione in Francia, in Italia, in Belgio, nel Lussemburgo e nel Regno Unito.

Se si considerano i grandi gruppi di prodotti industriali, anche qui le tendenze appaiono fluttuanti, tranne che per beni intermedi che continuano a mostrare una tendenza discendente (-1% circa). La tendenza nella produzione dei beni di consumo e dei beni di investimento oscilla invece tra un modesto miglioramento e un lieve declino (beni di consumo -0,4%; beni di investimento +0,5%).

3. Siderurgia

Le cifre destagionalizzate della produzione di acciaio grezzo della Comunità (senza la Grecia), nei mesi di luglio e agosto del 1981, accusano una tendenza alla diminuzione: -1,5% da giugno a luglio e -3,7% da luglio ad agosto. La produzione dell'agosto 1981, pari a circa 9,1 milioni di t, è rimasta inferiore del 2,7% a quella di agosto dello scorso anno. Conseguentemente, la quantità di acciaio grezzo prodotta da gennaio ad agosto 1981 non raggiunge che 82,7 milioni di t, cioè 6 milioni di t in meno (o il 6,7%) che nello stesso periodo dell'anno precedente (Va tuttavia tenuto conto della produzione perduta nel 1° trimestre del 1981 per lo sciopero dei lavoratori dell'industria siderurgica britannica). Nel giugno 1981 è regredita ancora, dopo il lieve progresso del mese precedente, l'evoluzione delle nuove ordinazioni, a seguito della debole domanda degli altri paesi CECA e dei paesi terzi.

4. Prezzi al consumo nel luglio 1981

L'indice dei prezzi al consumo per il complesso CE (EUR 10) è salito, tra giugno e luglio, dello 0,9%: per il terzo mese consecutivo l'aumento osservato resta così inferiore all'1%.

L'aumento di luglio è stato rilevante per due paesi, la Francia con l'1,8% (provvisorio) e il Belgio con l'1,6%. Per gli altri paesi il tasso d'aumento rimane al di sotto dell'1%: 0,8% per l'Italia, 0,7% per la Danimarca e i Paesi Bassi, 0,5% per il Lussemburgo e il Regno Unito, 0,4% per la Repubblica federale di Germania. La Grecia, addirittura, registra una flessione dei prezzi dello 0,5% rispetto al mese precedente.

5. Energia: andamento del settore elettrico nel primo semestre del 1981

La contrazione della domanda, osservata nel 1° trimestre 1981, si è lievemente attenuata nel resto dell'anno: essa è risultata dell'1,7% per il 1° trimestre e dell'1% soltanto per i primi sei mesi del 1981, rispetto al corrispondente periodo del 1980. Questa tendenza negativa si spiega col fatto che la flessione della produzione industriale si è attenuata nel 2° trimestre del 1981. Se si esclude l'incremento particolarmente marcato dell'industria nucleare francese (Eurodif), il tasso di diminuzione resta però dell'ordine dell'1,6% per la Comunità nel suo complesso.

A livello nazionale, si sono riscontrati tassi di variazione negativi per tutti gli Stati membri, fatta eccezione per la Francia (+3,1% o +0,5%, se si tiene conto del consumo di energia nucleare). Da osservare che in questo paese l'energia nucleare copre il 41% della domanda, il che costituisce un livello record.

In conseguenza della contrazione della domanda generale e del nettissimo sviluppo della produzione di energia nucleare (+36%), la produzione di energia elettrica dalle fonti tradizionali nella Comunità è diminuita del 7%, con una diminuzione del 16% del consumo di petrolio e di gas naturale nelle centrali elettriche pubbliche.

6. Finanze — Incertezza su importanti mercati finanziari

La lieve diminuzione del « prime rate » statunitense (dal 20% al 19,5%), facendo sospettare una contrazione del tasso d'interesse negli Stati Uniti, ha comportato un calo notevole del tasso di cambio del dollaro nella 3^o settimana di settembre. In questo modo il dollaro ha perso circa il 10% del suo valore dalla punta massima registrata all'inizio di agosto (1 0229 ECU/Dollaro) alla fine di settembre (0,920 ECU/Dollaro).

Per alleviare la pressione sul franco francese — che ha comportato nei mesi di luglio e agosto perdite per circa 10 miliardi di FFr nelle riserve valutarie francesi, scese così' a 325,3 miliardi di FFr - il governo francese ha deciso di applicare condizioni piu' severe per gli acquisti a termine. Inoltre sono stati aumentati i tassi di interesse a breve termine.

Alla borsa valori del Regno Unito si è registrata, nelle ultime settimane, una forte flessione delle quotazioni azionarie, che hanno così' raggiunto il livello piu' basso degli ultimi sei mesi.

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturrelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlege, kvartals- og måneds-tal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelsers definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

PREFACE

EN

This bulletin is in two parts: 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

AVVERTENZA

IT

Il presente bollettino consta di 2 parti: l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa.

(1) More detailed data by branch appear in 'Industrial Short-term Trends'.

(2) The data included in this section of the bulletin are results from a short-term trends enquiry conducted among heads of enterprises in the Community. More detailed data appear in 'European Economy'.

(3) More detailed data on external trade, expressed in EUA appear in the 'Monthly External Trade Bulletin'.

(4) Final consumption.

- 14 Pigs received at bacon factories.
- 15 Exports of cattle.
- 16 Exports of beef — fresh, chilled or frozen.
- 22 Volume of production — Transportable goods industries.
- 35 Total number of dwellings completed (connected to the electricity supply).
- 41 Imports.

- 42 Exports.
- 43 Trade balance.
- 48 Volume of imports index numbers.
- 49 Volume of exports index numbers.
- 53 Value index of retail sales — seasonally adjusted.
- 54 Volume index of retail sales — seasonally adjusted.
- 61 New private motor cars registered for the first time.
- 74 General wholesale price index (Excluding VAT).

- 78 Agricultural output price index numbers — Total index.
- 79 Consumer price index — All items.
Mid-November 1975 = 100
- 89 Money supply M₃.
- 92 Gross official reserves.
- 96 Balance of current accounts.
- 97 Balance of capital movements.
