DATI PER L'ANALISI DELLA CONGIUNTURA

Manuskript afsluttet den 26. Oktober 1981.

Manuscript completed 26 October 1981.

Manoscritto terminato il 26 Ottobre 1981.

1. Arbejdsløshed

Den offentlige arbejdsformidling registrerede ved udgangen af september over 9,4 mio arbejdsløse. Fællesskabet (EUR 9) nåede dermed op på et arbejdsløshedstal på 8,5% af den civile erhvervsaktive befolkning sammenlignet med 8,3% ved udgangen af august måned.

I sæsonkorrigerede tal udgør den månedlige stigning i arbejdsløshedstallet 2,4%. Til trods for en noget uensartet udvikling i antallet af arbejdsløse viser de sæsonkorrigerede tal, at der er tale om en forværring af situationen, hvilket allerede har kunnet konstateres inden for de seneste måneder i samtlige medlemsstater. Sæsonudsvingene før sig især gældende på denne årstid for unge under 25 år og er særlig udprægede i denne måned i Frankrig og Luxembourg. Selv om tallene for Tyskland ikke forelå, var der ved udgangen af september 1981 knap 4 mio unge uden arbejde i Fællesskabet.

De laveste arbejdsløshedstal blev registreret i Luxembourg (1,0%) og Tyskland (4,8%) og de højeste tal i Irland (10,4%). Det forenede Kongerige (11,5%) og Belgien (12,8%).

2. Forbrugerpriserne i september 1981

Forbrugerprisindekset for EF som helhed steg med 0,9% fra august til september 1981. Den største stigning blev registreret i Irland, hvor priserne steg med 5,6% i løbet af 3. kvartal (ca. 1,9% pr. måned i gennemsnit). Også i Italien (1,5%) var stigningen betydelig, mens priserne i Frankrig, Benelux-landene og Danmark steg ud ca. 1% i sidste måned.

Stigningen var moderat i Forbundsrepublikken Tyskland (0,5%) og i Det forenede Kongerige. Tallene for Grækenland foreligger endnu ikke. Inflationsraten målt på grundlag af forbrugerprisindekset for de sidste 12 måneder for EUR 9 er opgjort til 12,4%.

Den årlige inflationsrate er meget forskellig i de enkelte medlemsstater. Den er således meget høj i Grækenland (ca. 25%), Irland (ca. 20%) og Italien (ca. 19%) og er også høj i Frankrig. Det forenede Kongerige og Danmark (mellem 11 og 14%) og mere moderat i Forbundsrepublikken Tyskland og Benelux-landene fra 6 til 10%. De tilsvarende tal for Spanien og Portugal er henholdsvis ca. 15% og ca. 22%, mens stigningen i USA udgør ca. 11% og i Japan kun 4% siden september 1980.

3. Indekset over industriproduktionen

De foreløbige indeks for juli 1981 foreligger kun for fem lande (D, I, L, UK, DK) og kan ikke anvendes til opstilling af et fællesskabsindeks, i særdeleshed ikke da der ikke foreligger data for Frankrigs vedkommende, hvor udviklingen siden udgangen af 1980 har afviget betydeligt fra fællesskabsgennemsnittet. En foreløbig analyse af juli-indeksene viser dog, at til trods for den fortsat lave industriproduktion i Tyskland fortsætter stort set den tendens mod stabilisering, som indledtes ved udgangen af første kvartal. I Tyskland skete der en yderligere nedgang på næsten 1% i juli måned (efter korrektion for sæsonudsving).

Sammenlignet med den tilsvarende periode i 1980 faldt industriproduktionen i det første halvår 1981 med 4,4% hvilket for en stor dels vedkommende skyldes det kraftige fald i Luxembourg (-11,7%), Det forenede Kongerige (-7,4%) og Frankrig (-7,3%), mens den nedgang, der blev registreret i de andre lande, lå under fællesskabsgennemsnittet: Italien (-4,3%), Nederlandene (-3,6%), Belgien (-3,4%), Danmark (-2,4%), Irland (-1,6%) og Tyskland (-1,5%). Sammenlignet med samme periode i 1979 er der tale om en samlet nedgang i industriproduktionen på kun 2,3%. Ser man på de enkelte lande, er situationen stort set uændret; der blev dog registreret en stigning i fire lande, nemlig Tyskland (0,8%), Irland (1,1%), Danmark (2,3%) og Italien (5,6%), idet der i sidstnævnte land blev registreret en betydelig opgang i produktionen i anden halvdel af 1979 og i første kvartal af 1980.

For så vidt angår hovedproduktionsgrupperne, er det kun investeringsgoderne, som ikke er blevet berørt af recessionen (en vækstrate på 0 sammenlignet med første halvdel af 1980 og en stigning på 6,3% sammenlignet med første halvdel af 1979), mens produktionen inden for mellemproduktindustrien og forbrugsgodeindustrien faldt kraftigere end det samlede indeks over industriproduktionen.

4. Jern og stål

Efter den nedadgående tendens i de foregående to måneder registreredes i september måned 1981 en stigning i Fællesskabets produktion af råstål på 3,1% (sæsonkorrigeret tal) sammenlignet med august 1981. Produktionen på 10,7 Mio tons (med undtagelse af Grækenland) lå 6,4% højere end i september 1980, men 13,3% lavere end i den tilsvarende periode i 1979 og 6,5% lavere end i 1978.

Efter en kraftig stigning i tilgangen af ordrer på almindeligt stål i juli måned skete der igen et betydeligt fald i august 1981. Skønt der med 6 Mio tons er tale om en stigning på 20% i forhold til den usædvanlig dårlige august måned 1980, er tallet lavere end i de tidligere år (-9,4% sammenlignet med august 1979 og -13,7% sammenlignet med august 1978).

5. Energi: Kulsektoren i første halvdel af 1981

Som helhed betragtet kendetegnedes Fællesskabets kulindustri af en mindre nedgang i produktionen af stenkul sammenlignet med den tilsvarende periode i 1980 og en stærk stigning i minernes lagre siden begyndelsen af denne periode.

Efter at være steget jævnt gennem hele 1980 faldt produktionen med 1,1 Mio tons (-0,9%) i årets første 6 måneder (sammenlignet med første halvdel af 1980) til 125,4 Mio tons. Dette fald skyldtes hovedsagelig nedgangen på 1,2 Mio tons i Det forenede Kongeriges produktion. Nedgangen var særlig stor i januar måned, hvor der alene blev registreret en nedgang på 900 000 tons sammenlignet med samme måned i 1980.

Til trods for produktionsnedgangen voksede minernes samlede lagre i Fællesskabet mere end 7 Mio tons (30%) og nåede dermed op på 44 Mio tons ved udgangen af første halvår af 1981. Stigningen var særlig stor i Det forenede Kongerige (64%), som nu tegner sig for mere end halvdelen af Fællesskabets lagre.

6. Samhandelen inden for fællesskabet

I de fem medlemsstater (Tyskland, Frankrig, Irland, Italien og Nederlandene), for hvilke tallene for juli 1981 foreligger, steg importen med 7% sammenlignet med juni 1981 og 14% sammenlignet med juli 1980. I perioden januar-juli 1981 tegnede Irland (18%) og Frankrig (12%) sig for de største stigninger i importen sammenlignet med den samme periode året i forvejen. I de fem landes eksport skete der en beskedent stigning, og resultatet af deres stigende import har været en stærk forringelse af deres samlede handelsbalance. Irland, Frankrig og Italien importerede over 20% mere end de eksporterede (til Fællesskabet) i de første 7 måneder af 1981, mens Nederlandene var det eneste land, som forbedrede handelsbalancen. De øvrige medlemsstater har sandsynligvis haft en tilsvarende forbedring i deres samlede handelsbalance.

7. Fællesskabets samhandel med tredjelande

For de fem medlemsstater, hvor juli-tallene forelå (Tyskland, Frankrig, Italien, Irland og Nederlandene), steg eksporten med 5% i forhold til juni 1981 og med 34% i forhold til juli 1980. I første halvår af 1981 steg eksporten i Irland (35%), Danmark (28%), Italien (26%) og Frankrig (21%) med over 20% i forhold til første halvdel af 1980. De fem nævnte landes import faldt med 3% i forhold til juni 1981, men udviste en stigning på 15% i forhold til juli 1980. I perioden fra januar til juli 1981 registrerede Tyskland (6%) og Danmark (indtil juni 7%) en årlig stigning, der lå under gennemsnittet, mens Italien (22%) og Irland (19%) tegnede sig for de største stigninger. Den samlede handelsbalance for de fem lande, for hvilke der foreligger data, er blevet væsentlig forbedret, skønt det kun er Tyskland, som hidtil har haft overskud.

8. Penge og Finanser : Ændringer i EMS-pariteterne

Pr. 5. oktober blev EMS-pariteterne ændret, idet den franske franc og den italienske lire blev devalueret med 3%, og D-marken og den hollandske gylde blev revalueret med 5,5%. Den relative svækkelse af dollaren, som disse justeringer af EMS-pariteterne bevirkede, og det faldende renteniveau i USA gav den tyske Bundesbank tilstrækkeligt grundlag til at træffe de indledende foranstaltninger til en nedsættelse af renten. Renten på de særlige Lombard-lån for banker blev nedsat fra 12% til 11%.

1. Unemployment

Over 9.4 million people were registered as unemployed at public employment offices at the end of September. The Community of Nine thus reached an employment rate of 8.5% of the civilian working population, compared with 8.3% at the end of August.

The seasonally adjusted figures show a month on month increase of 2.4% in the unemployment rate. Seasonally adjusted figures, despite somewhat divergent tendencies in the absolute numbers involved, show a worsening in the situation already observed over recent months in all Community countries, without exception. Seasonal effects are very pronounced for young people under 25 years of age at this time of year and are particularly marked this month in France and Luxembourg. Even without knowing the figures for Germany, there were close to 4 million young people under 25 out of work in the Community at the end of September 1981.

The lowest unemployment rates were in Luxembourg (1.0%) and Germany (4.8%) with the highest in Ireland (10.4%), the United Kingdom (11.5%) and Belgium (12.8%).

2. Consumer prices in september 1981

The consumer price index for the EC as a whole rose by 0.9% from August to September 1981. The biggest increase was recorded in Ireland where prices rose by 5.6% during the third quarter ($\pm 1.9\%$ per month on average). Another important increase was reported from Italy (1.5%), whereas prices in France, the Benelux countries and Denmark rose by $\pm 1\%$ last month.

The rates of increase were moderate in FR Germany (0.5%) and in the United Kingdom. The figures for Greece are not yet available. The inflation rate as measured by the consumer price index over the last 12 months for EUR 9 is 12.4%.

The annual rates are very different for the individual countries: they remain very high for Greece ($\pm 25\%$), Ireland ($\pm 20\%$) and Italy ($\pm 19\%$); they are also important for France, the United Kingdom and Denmark (between 11 and 14%) and more moderate for FR Germany and the Benelux countries (from 6 to 10%). The corresponding figures for Spain and Portugal are $\pm 15\%$ $\pm 22\%$ respectively, whereas the United States show an increase of $\pm 11\%$ and Japan only $\pm 4\%$ since September 1980.

3. Index of industrial production

Provisional indices for July 1981 are available for five countries only (D, I, L, UK, DK) and cannot be used to compile a Community index, particularly as no data are available for France, where trends since the end of 1980 have deviated substantially from the Community average. A preliminary analysis of the July indices nevertheless shows that despite the continuing low ebb of industrial production in Germany, the trend towards stabilization which began at the end of the first quarter is on the whole being maintained. German production suffered a further drop of nearly 1% in July (due allowance having been made for seasonal variations).

Compared with the corresponding period in 1980, industrial production in the first half of 1981 was down 4.4%, this being to a large extent the result of the sharp drops in Luxembourg (-11.7%), the United Kingdom (-7.4%) and France (-7.3%), the falls recorded in the other countries being below the Community average: Italy (-4.3%), the Netherlands (-3.6%), Belgium (-3.4%), Denmark (-2.4%), Ireland (-1.6%) and Germany (-1.5%). A comparison with the same period in 1979 gives an overall fall in industrial production of only 2.3%. The classification by country remains more or less unchanged, although an upturn was recorded in four countries: Germany ($+0.8\%$), Ireland ($+1.1\%$), Denmark ($+2.3\%$) and Italy ($+5.6\%$), a substantial boost in production having been recorded in this latter country in the second half of 1979 and the first quarter of 1980.

As for the major groups of industrial products, only capital goods have been untouched by the recession (growth rate of zero compared with the first half of 1980 and $+6.3\%$ compared with the first half of 1979), while both intermediate products and consumer goods fell more sharply than the overall index of industrial production.

4. Iron and steel

After the downward trend of the previous two months, production of crude steel in the Community for the month of September 1981 showed an increase: of 3.1% (deseasonalized) when compared with August 81. At 10.7 mio t (excluding Greece) it was 6.4% higher than for September 1980, but 13.3% lower than the comparable tonnage for 1979 and 6.5% lower than that for 1978.

New orders for ordinary steels, after showing a marked increase in July, again dropped noticeably in August '81. Although at 6 mio t it is 20% higher than for the extremely bad — month of August 1980, it is nonetheless lower than in other past years (-9.4% compared with August 1979 and -13.7% compared with August 1978).

5. Energy: The coal sector in the first half of 1981

The main features of the Community's coal industry were a slight decline in the output of hard coal compared with the corresponding period of 1980 and a sharp rise in pithead stocks since the beginning of the period.

After rising steadily throughout 1980, output fell by 1.1 million tons (-0.9%) in the first six months of the year (compared with the first half of 1980) to 1.254 million tons. This slight drop was due mainly to the decline of 1.2 million tons in the United Kingdom's production. This decline was particularly appreciable in January, which alone saw a fall of 900 000 tons compared with the same month of 1980.

Despite the drop in production, total pithead stocks in the Community went up by more than 7 million tons ($+30\%$) to over 44 million tons at the end of the first half of 1981. The increase was particularly high in the United Kingdom ($+64\%$), which now accounts for more than half of total Community stocks.

6. Intra-community trade

In the five member States (Germany, France, Ireland, Italy and the Netherlands) for which the data for July 1981 are available, imports went up by 7% compared with June 1981 and 14% compared with July 1980. For the period January to July 1981, Ireland ($+18\%$) and France ($+12\%$) showed the largest rises in imports compared with the same period of the year before. The export performance of the five countries has been one of slow growth, and the consequence of their buoyant import performance has been a sharp deterioration of their aggregate trade balance. Ireland, France and Italy, imported over 20% more than they exported (to the Community) in the first seven months of 1981, whilst the Netherlands was the only one to improve its trade balance. Presumably, the remaining member countries have had a corresponding improvement in their aggregate trade balance.

7. Extra-community trade

For the five member States for which July data are available (Germany, France, Italy, Ireland and the Netherlands), exports rose by 5% compared with June 1981 and are up 34% on July 1980. In the first six months of 1981, Ireland (+35%), Denmark (+28%), Italy (+26%) and France (+21%) showed rises of over 20% on the first half of 1980. Imports by the five countries mentioned in July were 3% down from June 1981, though 15% up on July 1980. In the period from January to July 1981, Germany (+6%) and Denmark (to June +7%) recorded below average year on year rises, whilst Italy (+22%) and Ireland (+19%) had the largest increases. The aggregate trade deficit for the five countries for which data are available, has been improving rapidly, though only Germany is as yet in surplus.

8. Finance: Changes in EMS parities

As from 5th October, the parities inside the EMS were modified with the French franc and Italian lira being devalued by 3% and the Deutschmark and Dutch guilder revalued by 5.5%. The relative weakness of the Dollar which followed these changes in EMS parities and the falling tendency amongst US interest rates gave the German Bundesbank sufficient room for manoeuvre to take first measures towards reducing interest rates. The special Lombard rate for banks was changed from 12% to 11%.

1. Disoccupazione

A fine settembre più di 9,4 milioni di persone erano iscritte nelle liste dei disoccupati presso gli uffici di collocamento : il tasso di disoccupazione per la Comunità a Nove è così salito all'8,5% della popolazione attiva civile, contro l'8,3% a fine agosto.

I dati corretti delle variazioni stagionali indicano un aggravamento della disoccupazione pari al 2,4% : le cifre destagionalizzate, nonostante qualche divergenza in termini assoluti, indicano per tutti i paesi della Comunità, senza eccezioni, un peggioramento della situazione osservata negli ultimi mesi. Il fenomeno della stagionalità appare molto pronunciato, in questo periodo dell'anno, per i giovani minori di 25 anni ed è particolarmente accentuato, nel mese in questione, in Francia e in Lussemburgo. Sebbene non si conoscano le cifre esatte per la Germania, si calcola che a fine settembre del 1981 i giovani disoccupati (minori di 25 anni) fossero circa 4 milioni nella Comunità.

I tassi di disoccupazione più bassi si osservano nel Lussemburgo (1,0%) e in Germania (4,8%), i più elevati in Irlanda (10,4%), nel Regno Unito (11,5%) e in Belgio (12,8%).

2. I prezzi al consumo nel mese di settembre

L'indice dei prezzi al consumo per il complesso della CE è salito dello 0,90% tra agosto e settembre del 1981. Il maggiore aumento è stato registrato in Irlanda, in cui l'aumento per il terzo trimestre dell'anno è stato del 5,6% ($\pm 1,9\%$ su base mensile). Un altro aumento rilevante si osserva in Italia (1,5%), mentre per la Francia, i paesi del BENELUX e la Danimarca l'aumento dei prezzi nel mese scorso è stato all'incirca dell'1%. I tassi sono stati invece moderati nella Repubblica federale di Germania (0,5%) e nel Regno Unito. I dati della Grecia non sono ancora disponibili. A libello EUR-9 risulta un tasso d'inflazione, espresso dall'indice dei prezzi al consumo, pari al 12,4% negli ultimi 12 mesi. I tassi annui di incremento dei prezzi mostrano però notevoli differenze da un paese all'altro : restano molto elevati per Grecia ($\pm 25\%$), Irlanda ($\pm 20\%$) e Italia ($\pm 19\%$), rilevanti per Francia, Regno Unito e Danimarca (tra l'11 e il 14%) e più moderati per la RF di Germania e i paesi del BENELUX (dal 6 al 10%). Le cifre corrispondenti per la Spagna e il Portogallo sono $\pm 15\%$ e $\pm 22\%$ rispettivamente, mentre, sempre rispetto a settembre del 1980, l'aumento è del 11% circa per gli Stati Uniti e del 4% soltanto per il Giappone.

3. Indice della produzione industriale

Gli indici provvisori per il mese di luglio 1981 sono disponibili solo per cinque paesi (D, I, L, UK, DK) e non permettono di elaborare un indice comunitario, soprattutto perchè mancano i dati della Francia, paese in cui le tendenze osservate dalla fine del 1980 presentano un andamento alquanto divergente rispetto alla media comunitaria. Un'analisi preliminare degli indici di luglio indica tuttavia che si mantiene nel complesso la tendenza alla stabilizzazione iniziata alla fine del primo trimestre, nonostante la persistente debolezza della produzione industriale in Germania, scesa di nuovo in luglio di quasi l'1% (tenuto conto delle variazioni stagionali).

Nei primi sei mesi del 1981, la produzione industriale è scesa del 4,4% rispetto al corrispondente periodo del 1980 : questo risultato è la conseguenza soprattutto delle forti flessioni osservate in Lussemburgo ($-11,7\%$), nel Regno Unito ($-7,4\%$) e in Francia ($-7,3\%$), mentre negli altri paesi il calo produttivo è stato inferiore alla media comunitaria : Italia ($-4,3\%$), Paesi Bassi ($-3,6\%$) Belgio ($-3,4\%$), Danimarca ($-2,4\%$), Irlanda ($-1,6\%$) e Germania ($-1,5\%$). Un confronto con il primo semestre del 1979 evidenzia però una flessione della produzione industriale pari al 2,3% soltanto, con cifre positive per 4 paesi : Germania ($+0,8\%$), Irlanda ($+1,1\%$), Danimarca ($+2,3\%$) e Italia ($+5,6\%$); per l'Italia va osservato che si è avuto un forte incremento della produzione nella seconda metà del 1979 e nel primo trimestre del 1980.

Se si considera l'andamento pe grandi gruppi di prodotti industriali, si può osservare che solo i beni d'investimento hanno resistito alla recessione (tasso d'incremento zero sul primo semestre del 1980 e $+6,3\%$ sul primo semestre del 1979), mentre tanto i beni intermedi quanto i beni di consumo hanno subito diminuzioni maggiori di quelle constatate per l'indice generale della produzione industriale.

4. Siderurgia

Dopo una tendenza alla diminuzione nei due mesi precedenti, nel mese di settembre 1981 la produzione di acciaio grezzo nella Comunità ha nuovamente registrato un aumento, pari al 3,1% (cifra destagionalizzata) sul mese di agosto 1981 : con un volume di 10,7% milioni di tonnellate (esclusa la Grecia), tale produzione è stata superiore del 6,4% a quella del settembre 1980, restando però inferiore, del 13,3% e del 6,5% rispettivamente, alle cifre corrispondenti del 1979 e del 1978.

Le nuove ordinazioni di acciai comuni, dopo aver segnato un deciso aumento nel mese di luglio, hanno subito in agosto una nuova notevole flessione, scendendo a 6 milioni di tonnellate, cifra pur sempre superior del 20% a quella — estremamente bassa — dell'agosto del 1980, ma che non arriva a recuperare i livelli degli anni precedenti ($-9,4\%$ rispetto ad agosto 1979 e $-13,7\%$ su agosto del 1978).

5. Energia : il settore carbonifero nella prima metà del 1981

Le principali caratteristiche dell'industria carbonifera della Comunità in questo periodo sono una lieve flessione della produzione di carbon fossile, rispetto al primo semestre del 1980, e un deciso incremento delle scorte sul piazzale delle miniere fin dall'inizio del periodo considerato.

Dopo essere costantemente aumentata in tutto il 1980, la produzione è scesa nei primi sei mesi dell'anno di 1,1 milioni di tonnellate ($-0,9\%$) sul primo semestre del 1980), ammontando così a 125,4 milioni di tonnellate. Questa lieve flessione è dovuta essenzialmente alla diminuzione ($-1,2$ milioni di tonnellate) della produzione nel Regno Unito, accentuata soprattutto nel mese di gennaio, in cui la produzione britannica è stata inferiore di ben 900 000 tonnellate a quella di gennaio del 1980.

Nonostante il rallentamento dell'estrazione, le scorte totali sul piazzale delle miniere nella Comunità sono aumentate di oltre 7 milioni di tonnellate ($+30\%$), raggiungendo così a fine giugno del 1981 il volume di 44 milioni di tonnellate. L'incremento è stato particolarmente forte nel Regno Unito ($+64\%$), che detiene ormai oltre la metà del totale delle scorte della Comunità.

6. Scambi intracomunitari

Per i cinque Stati membri i cui dati sono disponibili (Germania, Francia, Irlanda, Italia e Paesi Bassi), le importazioni di luglio del 1981 risultano aumentate del 7% rispetto a giugno 1981 del 14% rispetto a luglio dell'anno scorso. Per i primi sette mesi dell'anno, Irlanda ($+18\%$) e Francia ($+12\%$) accusano i maggiori incrementi delle importazioni rispetto allo stesso periodo dello scorso anno. All'aumento deciso delle importazioni corrisponde però solo un lieve aumento delle esportazioni dei cinque paesi considerati : ne consegue un netto peggioramento delle loro bilancia commerciale aggregata. Nei primi sette mesi del 1981, Irlanda, Francia e Italia hanno importato dagli altri paesi della Comunità oltre il 20% di più di quanto non abbiano esportato; soltanto per i Paesi Bassi si osserva un miglioramento della bilancia commerciale (che dev'essersi verificato, logicamente, anche per i rimanenti paesi i cui dati non sono ancora disponibili).

7. Scambi con i paesi al di fuori della comunità

Per i cinque Stati membri i cui dati sono disponibili (Germania, Francia, Irlanda, Italia e Paesi Bassi), le esportazioni del mese di luglio del 1981 hanno superato del 5% quelle di giugno 1981 e del 34% quelle di luglio del 1980. Quattro paesi hanno registrato per i primi sei mesi dell'anno tassi di incremento superiori al 20% sul corrispondente periodo del 1980: si tratta di Irlanda (+35%), Danimarca (+28%), Italia (+26%) e Francia (+21%). D'altra parte, le importazioni dei cinque paesi considerati sono state in luglio inferiori del 3% rispetto a giugno del 1981, ma superiori del 15% a quelle di luglio del 1980. Nei primi sette mesi dell'anno la Germania (+6%) e la Danimarca (+7% fino a giugno) hanno registrato tassi di incremento delle loro importazioni inferiori alla media su base annua, mentre l'Italia (+22%) e l'Irlanda (+19%) hanno avuto i maggiori incrementi. Il disavanzo della bilancia commerciale aggregata per i cinque paesi in questione è migliorato rapidamente, sebbene solo la Germania abbia ormai un'eccedenza.

8. Finanze : Modifiche delle parità dello SME

Il 5 ottobre le parità all'interno della SME sono state modificate, con una svalutazione del 3% del franco francese e della lira italiana e una rivalutazione del 5,5% del marco tedesco e del fiorino olandese. La relativa debolezza del dollaro, seguita a tali modifiche di parità, e la tendenza discendente dei tassi di interesse negli Stati Uniti hanno dato alla Bundesbank spazio di manovra sufficiente per poter prendere i primi provvedimenti intesi ad una riduzione dei tassi di interesse: il cosiddetto tasso Lombard (tasso di sconto sulle anticipazioni presso la banca centrale) è stato così portato dal 12 all'11%.

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabelle« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabelle« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturrelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlige, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelsesdefinitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

PREFACE

EN

This bulletin is in two parts: 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

AVVERTENZA

IT

Il presente bollettino consta di 2 parti: l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa.

Die deutsche Fassung dieses Bulletins wird am zweiten Dienstag jeden Monats in Druck gegeben.

La version française de ce bulletin est mise sous presse le second mardi de chaque mois.

De Nederlandse versie van dit bulletin gaat de tweede dinsdag van elke maand ter perse.

(1) Alcuni dati più dettagliati per branca sono riportati nel bollettino « Indicatori congiunturali dell'industria ».

(2) I dati contenuti in questa parte del bollettino rappresentano i risultati dell'indagine sulla congiuntura presso i capi di impresa delle Comunità. Alcuni dati più particolari figurano in « Economia europea ».

(3) Alcuni dati del commercio estero più dettagliati ed espressi in UCE sono riportati nel « Bollettino mensile del commercio estero ».

(4) Consumi finali delle famiglie.

The annual subscription runs from 1 January to 31 December of each year.

Gli abbonamenti sono annuali e il loro periodo di validità va dal 1° gennaio al 31 dicembre di ciascun anno.

Betaling kan kun ske til agenturerne i landene nævnt på omslagets side 3.

Payments to be made only to the agents in the countries listed on page 3 of the cover.

I versamenti devono essere indirizzati agli uffici di vendita indicati a pag. 3 della copertina.

Priserne dækker forsendelse ad land- eller søvej; agenturerne giver oplysning om priserne for luftforsendelse.

These are surface mail rates; for air subscription rates please apply to the agents.

I prezzi non comprendono le spese di spedizione per posta aerea; per le condizioni di abbonamento in caso di spedizione per posta aerea, si consultino gli uffici di vendita.
