## Hinweis

Die Veröffentlichung Eurostatistik — Daten zur Konjunkturanalyse ist eine von drei Schlüsselveröffentlichungen des Eurostat, die dem Leser einen Überblick über die wichtigsten quantitativen Daten geben sollen, die für die Gemeinschaft und die Mitgliedstaaten zur Verfügung stehen. Die anderen Veröffentlichungen in dieser Reihe sind Statistische Grundzahlen mit Daten für ein bestimmtes Jahr sowie Eurostat-Revue mit einem Zehnjahresüberblick über die Gemeinschaft in Zahlen. Eine monatliche Veröffentlichung mit laufenden Wirtschaftsdaten muß ständig angepaßt und auf den neuesten Stand gebracht werden. Zu Beginn des Jahres 1982 wurde mit der Einbeziehung von Daten für Griechenland und der Abwandlung der Aufmachung eine bedeutende Änderung vorgenommen. Im Laufe des Jahres 1982 werden nach und nach Gesamtzahlen für die 10 Mitgliedstaaten der Gemeinschaft aufgenommen. Sobald genügend Daten zur Verfügung stehen, wird das Basisjahr 1975, das die Grundlage für diese Veröffentlichung bildet, durch das Jahr 1980 ersetzt werden. Zu einem späteren Zeitpunkt ist vorgesehen, Daten für die beiden beitragswilligen Länder Portugal und Spanien sowie für die Vereinigten Staaten und Japan hinzuzufügen. Es werden vier Arten von Daten in Eurostatistik veröffentlicht. Auf den Seiten 5 und 6 findet sich ein Artikel „Kurz notiert“, der sich mit den jüngsten Tendenzen bei den verfügbaren Daten befaßt. Die Seiten 15 bis 20 enthalten eine schematische Darstellung der wichtigsten wirtschaftlichen Reihen für die Gemeinschaft und die Mitgliedstaaten. Die Seite 23 ist die erste von 56 Seiten mit „Gemeinschaftstabellen“. Dieser Abschnitt enthält von Eurostat auf der Grundlage von Gemeinschaftskriterien harmonisierte Daten. Die neuesten Daten sind vorläufig und in einigen Fällen von Eurostat geschätzt. Schließlich enthält die Veröffentlichung noch einen Abschnitt „Ländertabellen“, der eine Auswahl der in jedem Land am häufigsten verwendeten Konjunkturindikatoren enthält. Hierbei handelt es sich um nationale Reihen auf der Grundlage nationaler Definitionen. Zu Vergleichszwecken ist auch eine Tabelle für die Vereinigten Staaten enthalten. In allen Fällen stehen auf Anfrage Zeitreihen über die Cronos-Datenbank des Eurostat zur Verfügung. Es werden außerdem statistische Bulletins über Arbeitslosigkeit, Preise, industrielle Produktion, Zahlungsbilanzen, Außenhandel und Energie monatlich oder vierteljährlich veröffentlicht. In Eurostatistik selbst ist ein absolutes Minimum an Erläuterungen zur Methodik enthalten. Ausführliche Informationen über Definitionen und Methodik sind bei Eurostat erhältlich. Eurostatistik wird am Ende eines jeden Monats in einer gemeinsamen Ausgabe für Deutsch, Englisch und Französisch veröffentlicht. Darüber hinaus steht auf Anfrage eine Ergänzung mit Übersetzung der Titel und der Erläuterungen ins Dänische, Griechische, Italienische und Niederländische zur Verfügung.

## Eurostatistik: Kurz notiert

### 1. Arbeitslosigkeit : Zehn Millionen Arbeitslose in der Gemeinschaft

Mehr als 10 Millionen Arbeitslose waren am Ende des Jahres 1981 als Arbeitslose registriert. Der Anteil der eingeschriebenen Arbeitslosen an der Zahl der zivilen Erwerbspersonen ist damit erneut gestiegen und erreichte Ende Dezember 1981 9,2%. Im Durchschnitt nahm die Zahl der eingeschriebenen Arbeitslosen in der Gemeinschaft der Neun im Dezember 1981 um 2,7% zu. Damit hat sich die schon im November feststellbare Tendenz fortgesetzt. Deutlich kann zwischen solchen Ländern, in denen die Arbeitslosigkeit relativ unverändert ist, wie Frankreich, Italien und dem Vereinigten Königreich und anderen, wo sie in steilem Anstieg begriffen ist, unterschieden werden: Am stärksten beunruhigend sind die Fälle der BR Deutschland und der Niederlande mit einem Anstieg von 14 bzw. 7% im Berichtsmonat. Diese Zunahmen gehen weit über das im Winter Gewohnte hinaus und bestätigen die deutliche Verschlechterung der Arbeitsmarktbedingungen, die seit Monaten beobachtet wird.

Darüber hinaus zeigt die Tendenz der Zahlen eingeschriebener Arbeitsloser eine deutliche Differenzierung nach dem Geschlecht. Bei allen Mitgliedstaaten hat die Arbeitslosigkeit der Männer zugenommen. In den einzelnen Mitgliedstaaten gleicht dabei die Tendenz der für die Gesamtzahl des Arbeitslosen, ist jedoch stärker. So stieg die Zahl der arbeitslosen Männer in der BR Deutschland von einem Stand von 773 000 Ende November 1981 auf 955 000 Ende Dezember 1981. Für die Gemeinschaft der Neun wurde am Jahresende die Zahl von fast 6 Millionen männlichen Arbeitslosen erreicht, während es zum Jahresbeginn noch 4,5 Millionen waren. Dagegen scheint sich die Zahl der eingeschriebenen arbeitslosen Frauen in den letzten drei Monaten bei rund 4,2 Millionen stabilisiert zu haben. Damit ist auch der Anteil der arbeitslosen Frauen und der Arbeitslosigkeit insgesamt in allen Mitgliedstaaten gesunken.

Auf die zivilen Erwerbspersonen bezogen, stieg die Arbeitslosenquote der Gemeinschaft der Neun von 7,2% im Dezember 1980 auf 9,2% im Dezember 1981. Die Zunahme war besonders groß in der BR Deutschland (von 4,3 auf 6,5%), in den Niederlanden (von 6,2 auf 9,1%), im Vereinigten Königreich (von 8,6 auf 11,3%) sowie in Luxemburg (von 0,9 auf 1,3%). In den genannten Mitgliedstaaten lag der Anstieg der Arbeitslosigkeit zwischen 30% im Vereinigten Königreich und über 50% in der BR Deutschland.

### 2. Verbraucherpreise im November und Dezember 1981

Der Index der Verbraucherpreise in der Gemeinschaft stieg im Dezember 1981 um 0,7% an. Bezogen auf die mittlere monatliche Steigerung von rund 1% im Jahre 1981 ist das ein relativ schwacher Anstieg. Die am Verbraucherpreisindex gemessene Inflationsrate für die Gemeinschaft betrug im Jahr 1981 12,5%. Unterdurchschnittliche Steigerungsraten des Preisniveaus wurden in der BR Deutschland (6,3%), den Niederlanden (7,4%), Belgien (8,0%) und Luxemburg (8,1%) festgestellt. Steigerungen um den Mittelwert für die Gemeinschaft wurden für das Vereinigte Königreich (12,0%), Dänemark (12,2%) und Frankreich (14,0%) ausgewiesen. Der Preisanstieg betrug in Italien 18%, in Griechenland 22,5% und in Irland 23,5%.

### 3. Ziemlich feste Tendenz der industriellen Produktion

Der vorläufige Index der industriellen Produktion in der Gemeinschaft für den Monat Oktober 1981 lag bei 118,5 (1957=100), was einer Erhöhung um 0,5% gegenüber demselben Monat des Jahres 1980 gleichkommt; damit bestätigt sich die mit dem revidierten Index vom September festzustellende Steigerung um 0,9% (ebenfalls im Vergleich zum entsprechenden Vorjahresmonat). Es ist darauf hinzuweisen, daß diese beiden aufeinanderfolgenden Erhöhungen die ersten seit Mitte 1980 sind.

Nach Saisonbereinigung lag der Index für Oktober wie der für den Monat September 1981 bei 114,1 und erreichte damit den höchsten Stand seit Anfang des Jahres mit Ausnahme des Monats Februar.

Was die Entwicklung in den einzelnen Ländern angeht, so ist insbesondere in Frankreich und im Vereinigten Königreich eine anhaltende Verbesserung festzustellen, während sich in der BR Deutschland die Produktion etwa auf dem Niveau des dritten Quartals 1981 zu stabilisieren scheint. Dagegen ist für die industrielle Produktion in Italien nach einem deutlichen vorübergehenden Rückgang im August (-12 Punkte gegenüber dem Vormonat nach Saisonbereinigung) im Oktober 1981 eine erneute Abschwächung (um mehr als 5 Punkte gegenüber September) festzustellen, die in einem stark negativen Wachstum (-3,7% im Oktober) zum Ausdruck kommt.

### 4. Stahl

Die Rohstahlerzeugung der Gemeinschaft (ohne Griechenland) hat im Dezember 1981 erneut leicht (um 1,3%) zugenommen; sie lag mit 9,7 Mio t um 13,6% über dem sehr niedrigen Ergebnis vom Dezember 1980.

Die Rohstahl-Jahreserzeugung 1981 erreichte 125,1 Mio t (126 Mio t einschließlich Griechenland) und blieb damit um 2,1% unter der Vorjahresleistung, die bereits um 9% hinter dem Ergebnis von 1979 zurückgeblieben war. Sämtliche Mitgliedstaaten, mit Ausnahme der Niederlande, des Vereinigten Königreichs (hierbei ist der Streik in der britischen Stahlindustrie im ersten Quartal 1980 zu berücksichtigen) und Irlands, haben weniger erzeugt als 1980.

Die Erzeugung vor Walzstahlfertigerzeugnissen hat sich im November 1981 nach vorübergehender Minderung wieder leicht um 2,1% erhöht (gegenüber November 1980 um 11,1%).

### 5. Binnen- und Außenhandel der Gemeinschaft

Im letzten Dreimonatsabschnitt, über den Zahlen vorliegen (September bis November 1981 bei Frankreich, dem Vereinigten Königreich und Irland; August bis Oktober bei der BR Deutschland, den Niederlanden und Dänemark; Juli bis September bei den übrigen Mitgliedstaaten), ist der Wert der Ausfuhr der einzelnen EG-Staaten in andere Mitgliedstaaten — auf ECU-Basis — gegenüber dem entsprechenden Zeitraum des Jahres 1980 um zwischen 10% (Irland) und 22% (Niederlande) angestiegen. Die Ausfuhr in Nichtmitgliedstaaten erfuhr im gleichen Zeitraum eine wesentlich stärkere Steigerung. Gegenüber

dem entsprechenden Vorjahreszeitraum betrug die relative Zunahme zwischen 17% (Vereinigtes Königreich) und 56% (Italien). Die Einfuhr aus Nichtmitgliedstaaten ist im allgemeinen langsamer angestiegen als die Ausfuhr, wobei die Zunahme in den einzelnen Mitgliedstaaten auf Jahresbasis zwischen 11% und 35% liegt.

#### **6. Unterschiedliche Zinsentwicklung zwischen den USA und einigen EG-Ländern**

Während das Zinsniveau in den USA, bedingt durch die wachsende Staatsverschuldung und die restriktive Geldpolitik des Federal Reserve Board, unverändert hoch bleibt, scheint in Europa eher eine Tendenz fallender Zinsen vorzuliegen. Die belgische Zentralbank senkte ihren Diskontsatz mit Wirkung vom 7. Januar von 15% auf 14%. Auch die Deutsche Bundesbank gab mit der Senkung um 1/2% des Sonderlombardsatzes

(d. h. des Satzes, zu dem sich die Banken unter bestimmten Bedingungen bei der Bundesbank refinanzieren können) das langerwartete Zeichen für eine weniger restriktive Geldpolitik. Auf dem Goldmarkt fiel der Preis für die Unze auf USD 380, den niedrigsten Stand seit 1979.

#### **Technische Bemerkung**

Die Leser werden darauf hingewiesen, daß es aus technischen Gründen nicht gelungen ist, in den Abschnitt Außenhandel (Tabellen 079-135) alle Angaben für Griechenland und EUR 10 aufzunehmen. Außerdem bedeuten die Ausdrücke „Intra-EG“ und „Extra-EG“ bei Material bis einschließlich Berichtsmonat Dezember 1978 intra-9 und extra-9 sowie ab Berichtsmonat Januar 1979 intra-10 und extra-10 (Tabellen 066-123). Zahlen für die Ländertabelle „Griechenland“ werden in einer Folgeausgabe von „Eurostatistik“ erscheinen.

---

## Notice

Eurostatistics — data for short-term economic analysis is one of three key Eurostat publications designed to give the reader an overview of the most important quantitative information available for the Community and Member States. The other publications in this series are Basic Statistics giving data for a specific year, and Eurostat review with its summary of the Community in figures over the past 10 years.

A monthly publication with current economic data must be continually adapted and updated. At the beginning of 1982 a major modification took place with the inclusion of data for Greece and a change in presentation. Totals for the 10-member Community are being progressively introduced in 1982. Once sufficient data are available, the base year 1975 which is fundamental to this publication will be replaced with 1980. At a later stage it is planned to add data for the two applicant countries, Portugal and Spain, as well as for the United States and Japan.

Four kinds of information are published in Eurostatistics. Pages 9 and 10 offer an article 'In brief' which looks at the latest trends in the data available. Pages 15 to 20 provide the reader with a visual presentation of the most important economic series for the Community and the Member States. Starting on page 23 there are 56 pages of 'Community tables'. This section contains data harmonized by Eurostat on the basis of common criteria. The most recent data are provisional and in some cases estimated by Eurostat. Finally there is a section 'Tables by country' which contains a selection of economic indicators most often used in each country. These are national series based on national definitions. For comparison a table for the United States is also included.

For all series, historical data are available on request from Eurostat's data bank Cronos. Statistical bulletins on unemployment, prices, industrial production, balance of payments, external trade and energy are also published monthly or quarterly. Eurostatistics itself contains an absolute minimum of methodological notes. Detailed information on definitions and methodology may be obtained from Eurostat.

Eurostatistics is published at the end of each month in a single edition in German, English and French. A supplement with translations of titles and explanatory notes exists in Danish, Greek, Italian and Dutch, and it is available on request.

SITC	Standard International Trade Classification

(<sup>1</sup>) The data included in this section of the bulletin are results from a short-term-trends enquiry conducted among heads of enterprises in the Community. More detailed data appear in *European Economy*.

## Eurostatistics: In brief

### 1. Unemployment: Ten million unemployed in the Community

More than 10 million persons were registered as unemployed in the European Community at the end of 1981. The unemployment rate calculated by reference to the civilian working population rose once again, to 9.2% at the end of December 1981. The average increase in registered unemployment in the Community of Nine during December 1981 was 2.7% and the trends observed during the previous month continued. A fairly sharp distinction can be made between certain countries where unemployment is relatively stable such as France, Italy and the United Kingdom and others, where it is growing rapidly: the most disquieting instances are the FR of Germany with an increase of +14% in the month and the Netherlands with +7%. These increases are much in excess of those usual in winter and confirm the considerable deterioration in the labour market situation observed for a number of months past.

As well as this, the trend in registered unemployment shows a pronounced difference for men and for women. The rise in male unemployment is general in all the Community countries without exception. The trends by country are similar to those for total unemployment but are more substantial. Thus in the FR of Germany the number of unemployed men went from 773 000 at the end of November 1981 to 955 000 at the end of December 1981. At the level of the Community of Nine, the number of unemployed men amounted to almost 6 million at the end of the year 1981, whereas it had been 4.5 million at the beginning of the year. By contrast the number of women registered as unemployed appears to have levelled off at around 4.2 million during the past three months, and the share of women in total unemployment has declined in all Member States.

The unemployment rate by reference to the civilian working population went from 7.2% in December 1980 to 9.2% in December 1981. The increase in this rate was particularly marked in the FR of Germany (from 4.3% to 6.5%), in the Netherlands (from 6.2% to 9.1%); in the United Kingdom (from 8.6% to 11.3%) and in Luxembourg (from 0.9% to 1.3%). In these Member States the rise in unemployment varied from 30% in the United Kingdom to above 50% in the FR of Germany.

### 2. Consumer prices in November and December 1981

In December 1981, the consumer price index for the Community rose by 0.7%, which is relatively low compared with the average monthly rate of increase for the year 1981, which was about 1%. The inflation rate as measured by the consumer price index for the Community as a whole rose by 12.5% in 1981. Below average increases were registered in Germany (+6.3%), the Netherlands (+7.4%), Belgium (+8.0%) and Luxembourg (+8.1%). Increases near to the Community average were recorded in the UK (+12.0%), Denmark (+12.2%) and France (+14%). Prices rose by 18% in Italy, 22.5% in Greece and 23.5% in Ireland.

### 3. Index of industrial production — Trend steady

The provisional index of industrial production in the Community for October 1981 stood at 118.5 (1975=100), corresponding to a rise of 0.5% against the same month of 1980 and thus confirming the 0.9% rise (also against the same month of 1980) in the revised index for September. It should be pointed out that these two successive rises are the first ones recorded since mid-1980.

After seasonal adjustment, the October 1981 index, like the September one, stood at 114.1, which is the highest level reached since the beginning of the year, with the exception of February.

As for trends in the Member States, the main feature is a sustained upturn in France and the United Kingdom, whereas in the Federal Republic of Germany production would appear to be stabilizing at approximately the level recorded during the third quarter of 1981. Industrial production in Italy, on the other hand, after registering a temporary but notable fall in August (−12 points as compared with the previous month, after seasonal adjustment) declined again during October 1981 (by more than 5 points compared with the September figure), resulting in a pronounced negative growth rate (−3.7% in October).

### 4. Steel

Community (excluding Greece) production of crude steel in December 1981 once more showed a slight rise (+1.3%) and at 9.7 mio t exceeded by 13.6% the very low figure of December 1980.

Production of crude steel for 1981 thus rose to 125.1 mio t (126 mio t including Greece) a reduction of 2.1% compared with 1980, itself 9% lower than 1979. With the exception of the Netherlands, UK (taking into account the strike in the British iron and steel industry in the first quarter of 1980) and Ireland, all countries saw their production fall.

After a falling off the preceding month, November's 1981 production of finished rolled products showed a slight increase of 2.1% after deseasonalization (+11.1% compared with November 1980).

### 5. EC trade

For the latest three months that figures are available (September–November 1981 for France, the UK and Ireland; August–October for Germany, the Netherlands and Denmark; and July–September for the other Member States) the increases in the ECU value of individual member countries' exports to other Member States, compared with the corresponding period of 1980, ranged from 10% (Ireland) to 22% (Netherlands). Exports to non-member countries expanded much faster over the same period. The year-on-year increases range from 17% (UK) up to 56% (Italy). Imports from non-members have generally risen at a much slower rate than exports, the year on year increases for member countries being between 11% and 35%.

## **6. Finances — Different developments in interest rates in the USA and some EC countries**

Although the interest rate level in the USA remains high because of growing public debt and the restrictive monetary policy of the Federal Reserve Board, Europe seems to be experiencing a trend towards falling interest rates. The Belgian Central Bank dropped its discount rate from 15 to 14% on 7 January. The German Bundesbank also gave a long awaited sign of a less restrictive monetary policy with a reduction of 1/2% in the special Lombard rate (i.e. the rate at which banks can cover themselves under special conditions at the Bundesbank). On the gold market the price fell to USD 380 an ounce, its lowest level since 1979.

## **Technical note**

The readers' attention is drawn to the fact that for technical reasons it has not been possible to include all Greek and EUR 10 data in the section External trade (Tables 079-135). In addition, the terms 'intra-EC' and 'extra-EC' signify intra-9 and extra-9 for data up to and including December 1978 and intra-10 and extra-10 for data starting from January 1979 (Tables 066-123).

Figures for the country table 'Greece' will appear in a later edition of 'Eurostatistics'.

## ***Avertissement***

Eurostatistiques — données pour l'analyse de la conjoncture est l'une des trois publications clés d'Eurostat, destinées à donner au lecteur un aperçu des informations quantitatives les plus importantes disponibles concernant la Communauté et les États membres. Les autres publications de cette série sont les Statistiques de base fournissant des données pour une année spécifique déterminée et la Revue de l'Eurostat qui passe en revue dix ans de la Communauté sous forme de tableaux chiffrés.

Une publication mensuelle contenant des données économiques conjoncturelles d'actualité doit être continuellement adaptée et mise à jour. Au début de 1982, une modification importante est intervenue avec l'inclusion de données concernant la Grèce et un changement de présentation. Des totaux pour la Communauté de dix membres seront progressivement introduits en 1982. Lorsque l'on disposera de données en nombre suffisant, l'année 1975 — année de référence pour cette publication — sera remplacée par 1980. Il est prévu ultérieurement d'ajouter les données concernant les deux pays candidats à l'adhésion — à savoir l'Espagne et le Portugal — ainsi que pour les États-Unis et le Japon.

Eurostatistiques publie quatre types d'informations. Les pages 13 et 14 contiennent un article « En bref » dans lequel les dernières tendances pouvant être dégagées à partir des données disponibles sont examinées. Les pages 15 à 20 fournissent au lecteur une présentation visuelle des séries économiques les plus importantes pour la Communauté et les États membres. Des « tableaux communautaires » sont présentés sur 56 pages à partir de la page 23. Cette section contient des données harmonisées par Eurostat sur la base de critères communs. Les données les plus récentes sont provisoires et, dans certains cas, estimées par Eurostat. Enfin, la section « tableaux par pays » contient une sélection des indicateurs économiques les plus souvent utilisés dans chaque pays. Ce sont des séries nationales fondées sur des définitions nationales. A des fins de comparaison, un tableau concernant les États-Unis est également inclus.

Pour toutes les séries, des données historiques sont disponibles sur demande auprès de la banque de données d'Eurostat, CRONOS. Les bulletins statistiques sur le chômage, les prix, la production industrielle, la balance des paiements, le commerce extérieur et l'énergie sont également publiés sur une base mensuelle ou trimestrielle. En soi, Eurostatistiques contient un minimum de notes méthodologiques. Une information détaillée concernant les définitions et la méthodologie peut-être obtenue auprès d'Eurostat.

Eurostatistiques est publié à la fin de chaque mois dans une seule édition en allemand, anglais et français. Un supplément contenant les traductions des titres et des notes explicatives existe en danois, grec, italien et néerlandais et est disponible sur demande.

(1) Les données contenues dans cette partie du Bulletin représentent les résultats de l'enquête de conjoncture auprès des chefs d'entreprise de la Communauté. Des données plus détaillées paraissent dans « Économie européenne ».

## Eurostatistiques : En bref

### 1. Chômage : dix millions de chômeurs dans la Communauté

Plus de 10 millions de personnes étaient inscrites au chômage dans la Communauté européenne à la fin de l'année 1981. Le taux de chômage par rapport à la population active civile a une nouvelle fois progressé et a atteint 9,2% à la fin décembre 1981. L'augmentation moyenne du chômage enregistré dans la Communauté des neuf a été de +2,7% au cours du mois de décembre 1981. Les tendances observées le mois précédent se sont poursuivies. D'une part une distinction assez nette peut être faite entre certains pays où le chômage est relativement stabilisé comme la France, l'Italie ou le Royaume-Uni et d'autres où il croît vivement : les exemples les plus inquiétants sont la R.F. d'Allemagne avec un accroissement au cours du mois de +14% et les Pays-Bas avec +7%. Ces croissances vont nettement au-delà des influences hivernales habituelles et confirment l'importante détérioration du marché du travail observée depuis de nombreux mois.

D'autre part l'évolution du chômage enregistré reste très nettement différenciée suivant le sexe : l'augmentation du chômage est, pour les hommes, générale à tous les pays de la Communauté sans exception. Les tendances suivant les pays sont les mêmes que pour le chômage total mais avec une plus grande ampleur. Ainsi en R.F. d'Allemagne le nombre des chômeurs masculins est passé de 773 000 à la fin novembre 1981 à 955 000 à la fin de décembre. Au niveau de la Communauté des neuf les 6 millions de chômeurs étaient prêts d'être atteints à la fin de l'année 1981 alors qu'ils étaient de 4,5 millions au début de l'année. Par contre le nombre des femmes qui s'inscrivent au chômage semble plafonner aux alentours de 4,2 millions depuis 3 mois et la part des femmes dans le total du chômage baisse dans tous les états membres.

Le taux de chômage par rapport à la population active civile pour la Communauté des neuf est passé entre décembre 1980 et décembre 1981 de 7,2% à 9,2%. L'augmentation de ce taux a été particulièrement forte en R.F. d'Allemagne (de 4,3% à 6,5%), aux Pays-Bas (de 6,2% à 9,1%), au Royaume-Uni (de 8,6% à 11,3%) et au Luxembourg (de 0,9% à 1,3%). Dans ces États membres le chômage s'est donc accru de +30% au Royaume-Uni à plus de 50% pour la R.F. d'Allemagne.

### 2. Les prix à la consommation en décembre 1981

En décembre 1981, l'indice des prix à la consommation pour la Communauté a augmenté de 0,7%, ce qui est une hausse relativement limitée par rapport au rythme moyen mensuel de 1% qui a été observé au cours de l'année 1981. Le taux d'inflation mesuré par l'indice des prix à la consommation pour l'ensemble de la Communauté a été de 12,5% en 1981. Des taux en dessous de la moyenne ont été enregistrés en Allemagne (+6,3%), aux Pays-Bas (+7%), en Belgique (+8%) et au Luxembourg (+8,1%). Le Royaume-Uni (+12,0%), le Danemark (+12,2%) et la France (+14%) ont connu des taux autour de la moyenne communautaire. Les prix ont augmenté de 18% en Italie, 22,5% en Grèce et 23,5% en Irlande.

### 3. Indice de la production industrielle — Tendence plutôt ferme

L'indice provisoire de la production industrielle dans la Communauté pour le mois d'octobre 1981 s'est établi à 118,5 (1975=100), ce qui correspond à une hausse de 0,5%, comparé au même mois de 1980, confirmant ainsi la hausse de 0,9% (également par rapport au même mois de 1980) enregistrée par l'indice révisé de septembre. Il convient de souligner que ces deux hausses successives sont les premières observées depuis mi-1980.

Après correction des variations saisonnières, l'indice d'octobre, comme celui de septembre 1981, était à 114,1, ce qui est le plus haut niveau atteint depuis le début de l'année, exception faite du mois de février 1981.

Quant à l'évolution au niveau des pays, on note surtout un rétablissement soutenu en France et au Royaume-Uni, alors qu'en R.F. d'Allemagne la production semble se stabiliser autour du niveau de production du troisième trimestre 1981. La production industrielle italienne par contre, après avoir enregistré une chute temporaire mais sensible en août (-12 points par rapport au mois précédent et après désaisonnalisation) a connu une nouvelle dépression en octobre 1981 (de plus de 5 points par rapport à septembre), ce qui se traduit par une croissance fortement négative (-3,7% en octobre).

### 4. Acier

La production communautaire d'acier brut en décembre 1981 (sans la Grèce) a de nouveau enregistré une légère augmentation (+1,3% désaisonnalisée) et dépasse ainsi (avec 9,7 miot) de 13,6% le chiffre très faible de décembre 1980.

La production d'acier brut en 1981 s'élève ainsi à 125,1 miot (126 avec la Grèce) soit une réduction de 2,1% par rapport à l'année 1980, elle-même inférieure de 9% à l'année 1979. Tous les pays, sauf les Pays-Bas, le Royaume-Uni (tenir compte de la grève de la sidérurgie britannique pendant le 1<sup>er</sup> trimestre 1980) et l'Irlande ont vu leur production diminuer.

Après la baisse du mois précédent, la production en novembre 1981 des produits finis laminés a enregistré une hausse de 2,1% (+11,1% par rapport au mois correspondant de 1980).

### 5. Commerce extérieur

Pour les trois derniers mois dont les chiffres sont disponibles (septembre à novembre pour France, Royaume-Uni et Irlande, août-octobre pour Allemagne, Pays-Bas et Danemark et juillet-septembre pour les autres pays membres) la valeur exprimée en ECU des exportations intra-communautaires, a augmenté dans une fourchette allant de 10% (Irlande) à 22% (Pays-Bas) par rapport à la même période de 1980. Les exportations extra-communautaires ont augmenté beaucoup plus rapidement pendant la période en référence allant de +17% (Royaume-Uni) à +56% (Italie). Des importations de l'extérieur de la Communauté ont connu une hausse moins importante que celle des exportations et se situe entre +11% et +35%.

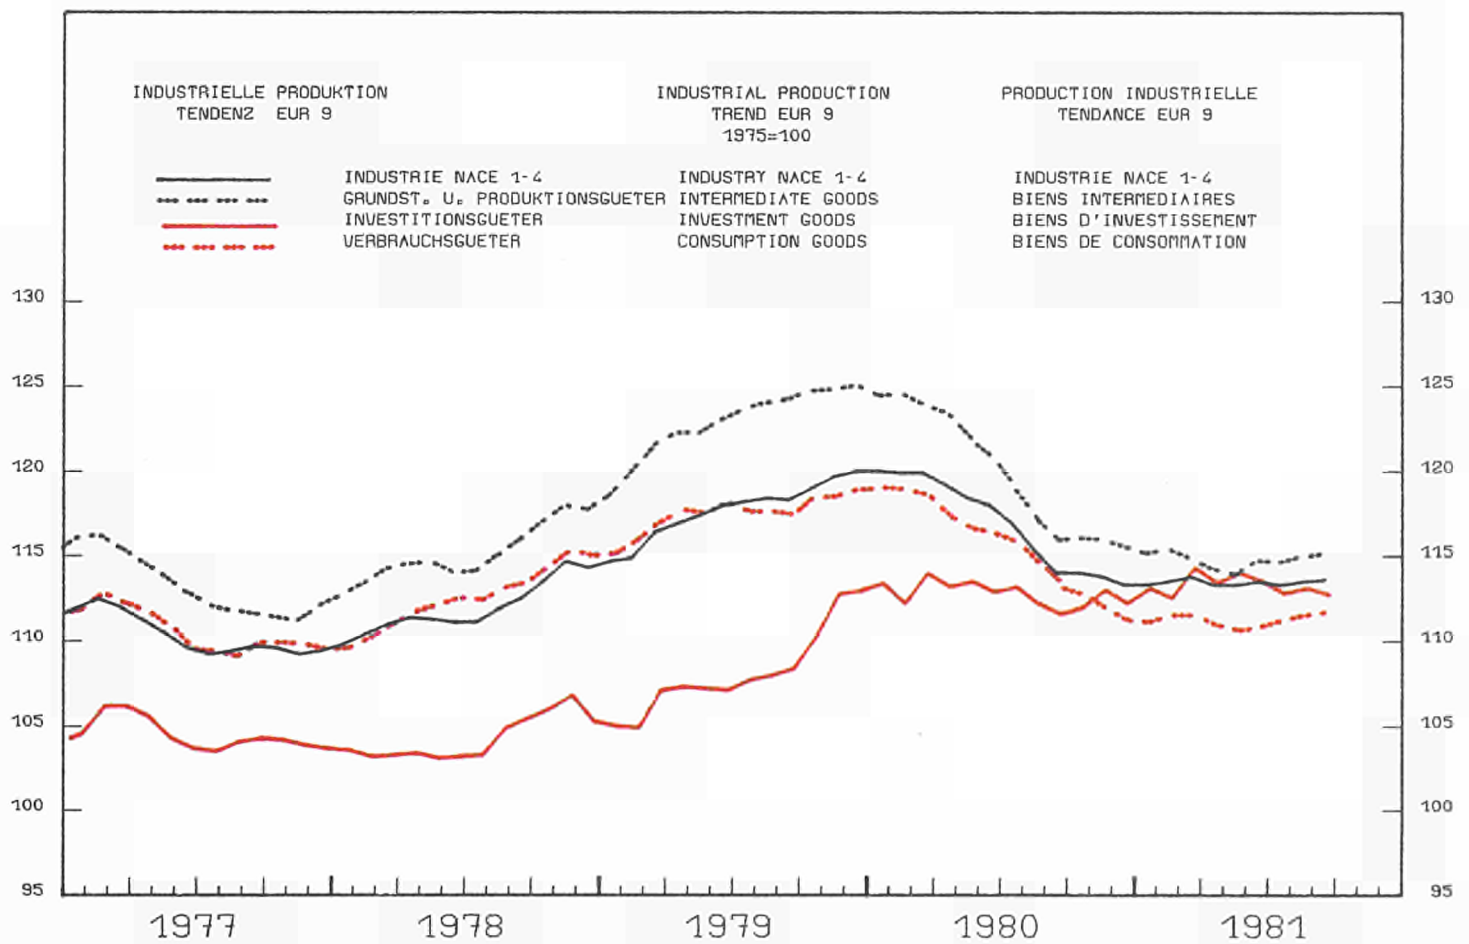

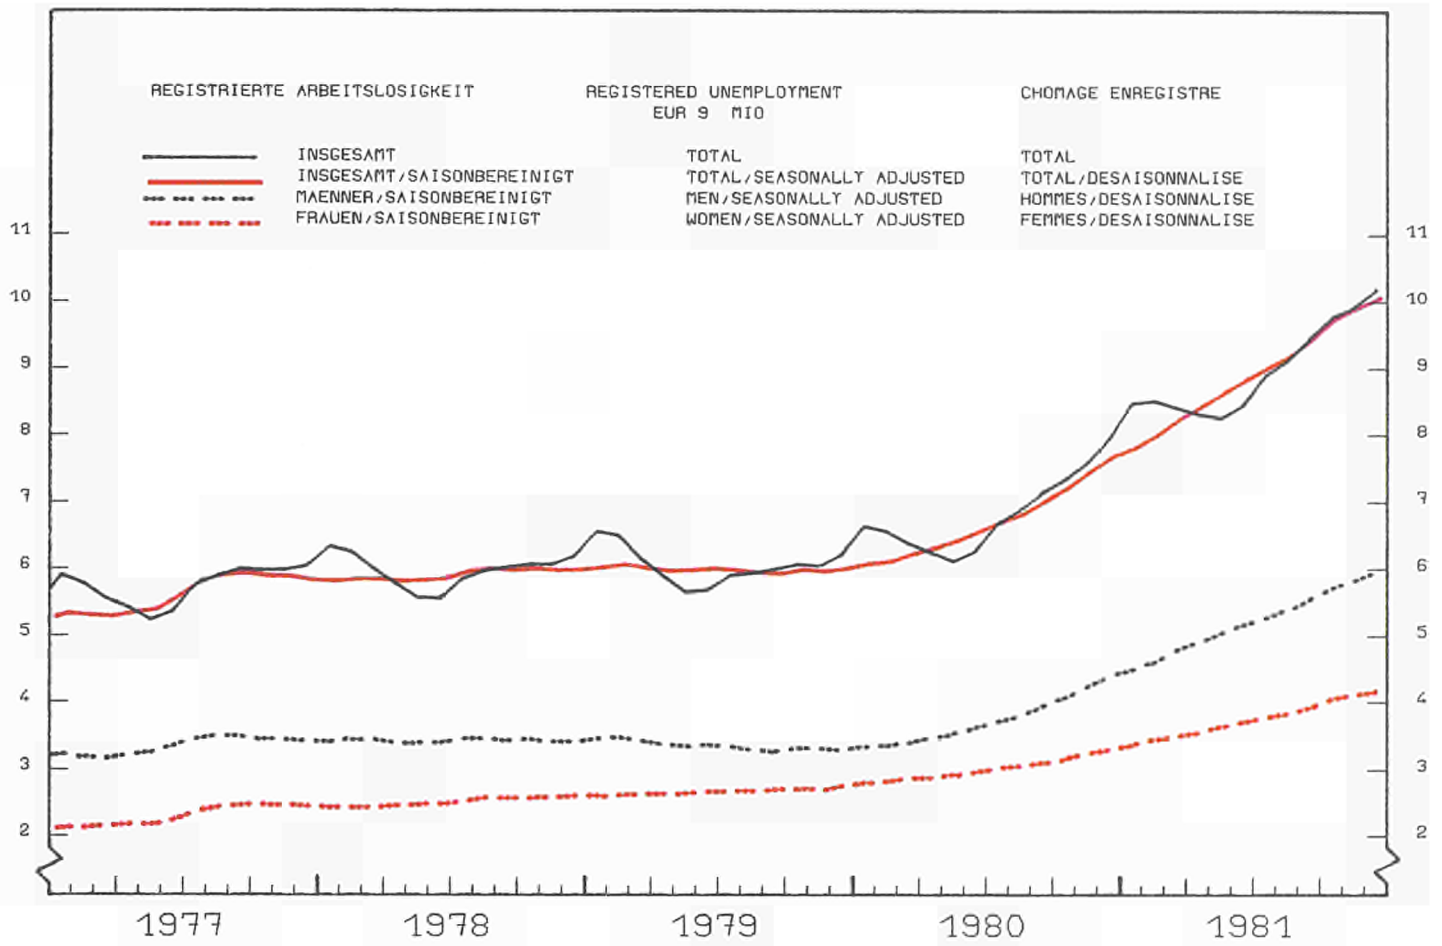

## 6. Finances — Évolutions différentes des taux d'intérêt aux USA et dans quelques pays membres de la Communauté

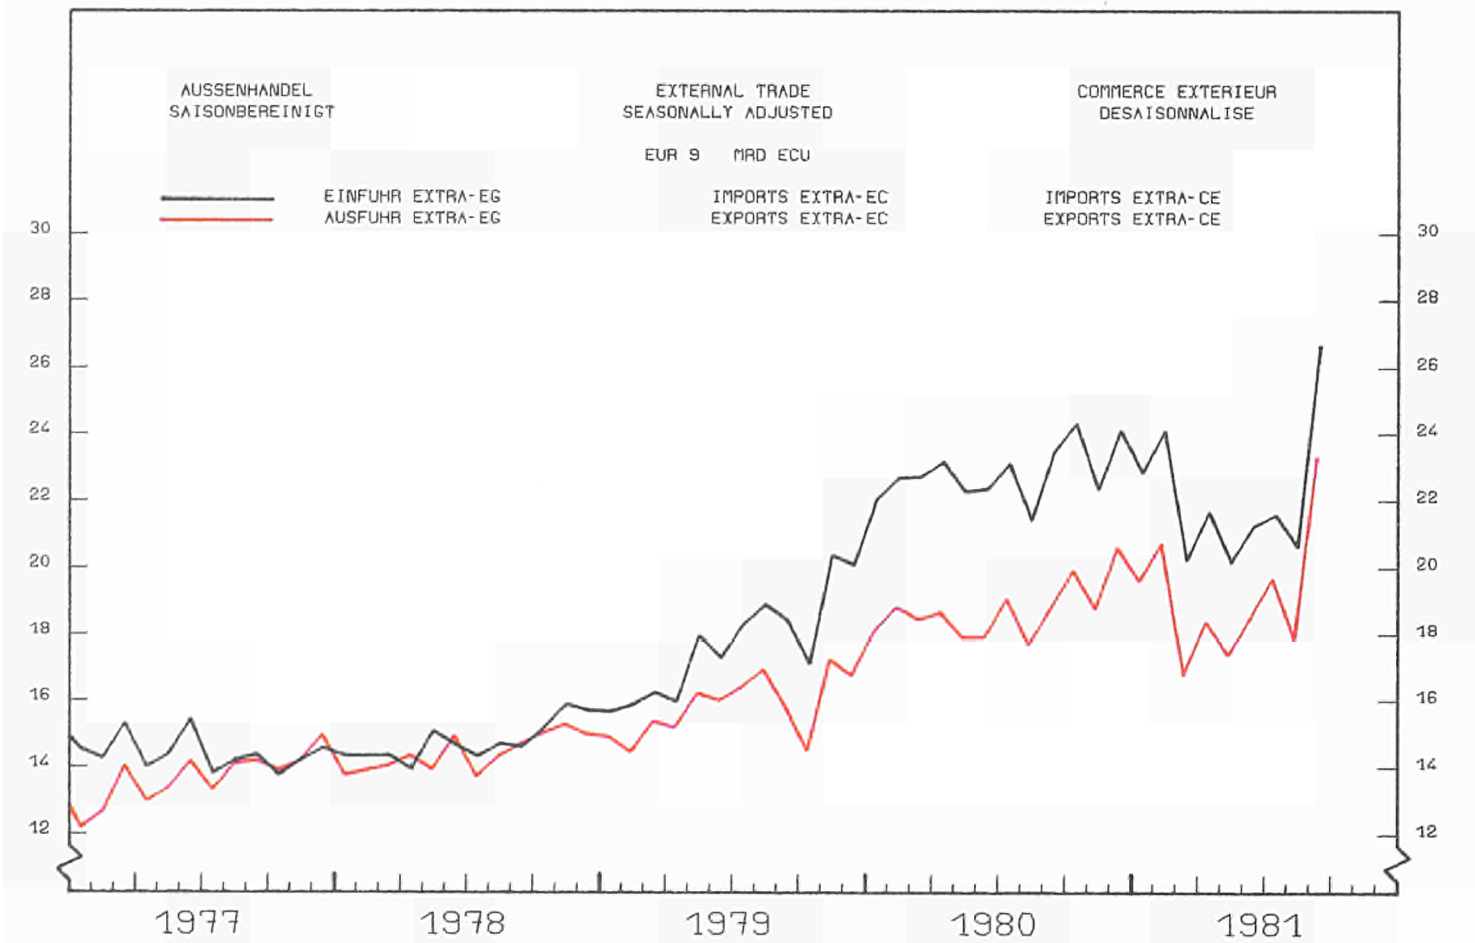

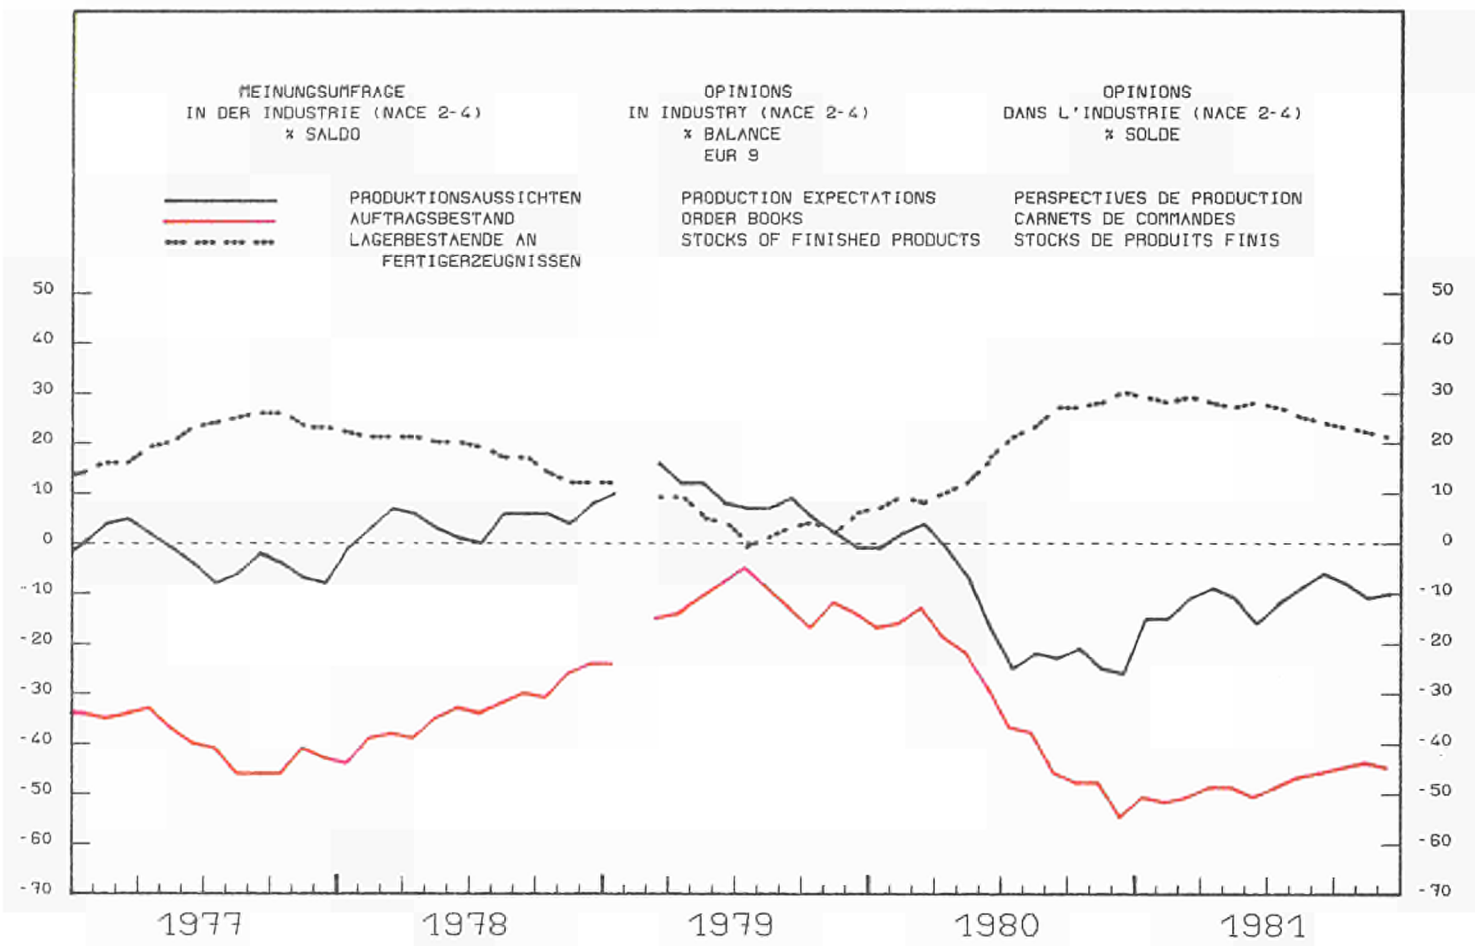

Quoique le niveau des taux d'intérêt aux États-Unis reste élevé à cause de la croissance de la dette publique et la politique monétaire sévère du Federal Reserve Board, l'Europe semble connaître une tendance vers la baisse des taux d'intérêt. En Belgique, la Banque Nationale a réduit le taux d'escompte de 15 à 14% le 7 janvier. La Bundesbank allemande également a donné un signe, attendu depuis longtemps, d'une politique monétaire moins sévère avec la réduction du taux Lombard spécial de 1/2% (c'est-à-dire le taux où les banques peuvent emprunter à la Bundesbank sous des conditions spéciales). Sur le marché d'or le prix a baissé à 380 \$ l'once, son taux le plus bas depuis 1979.

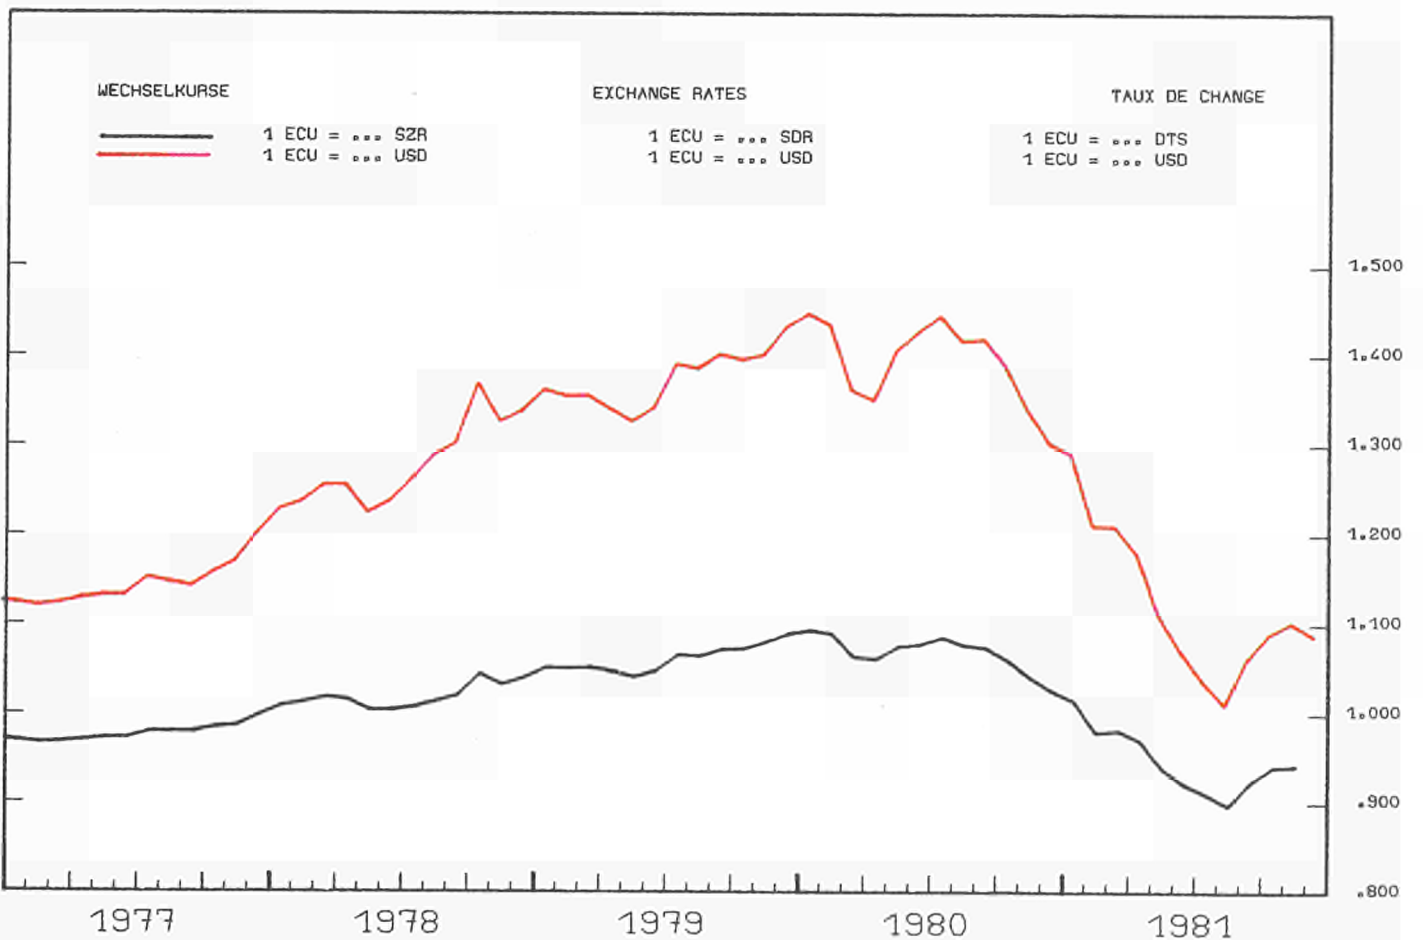

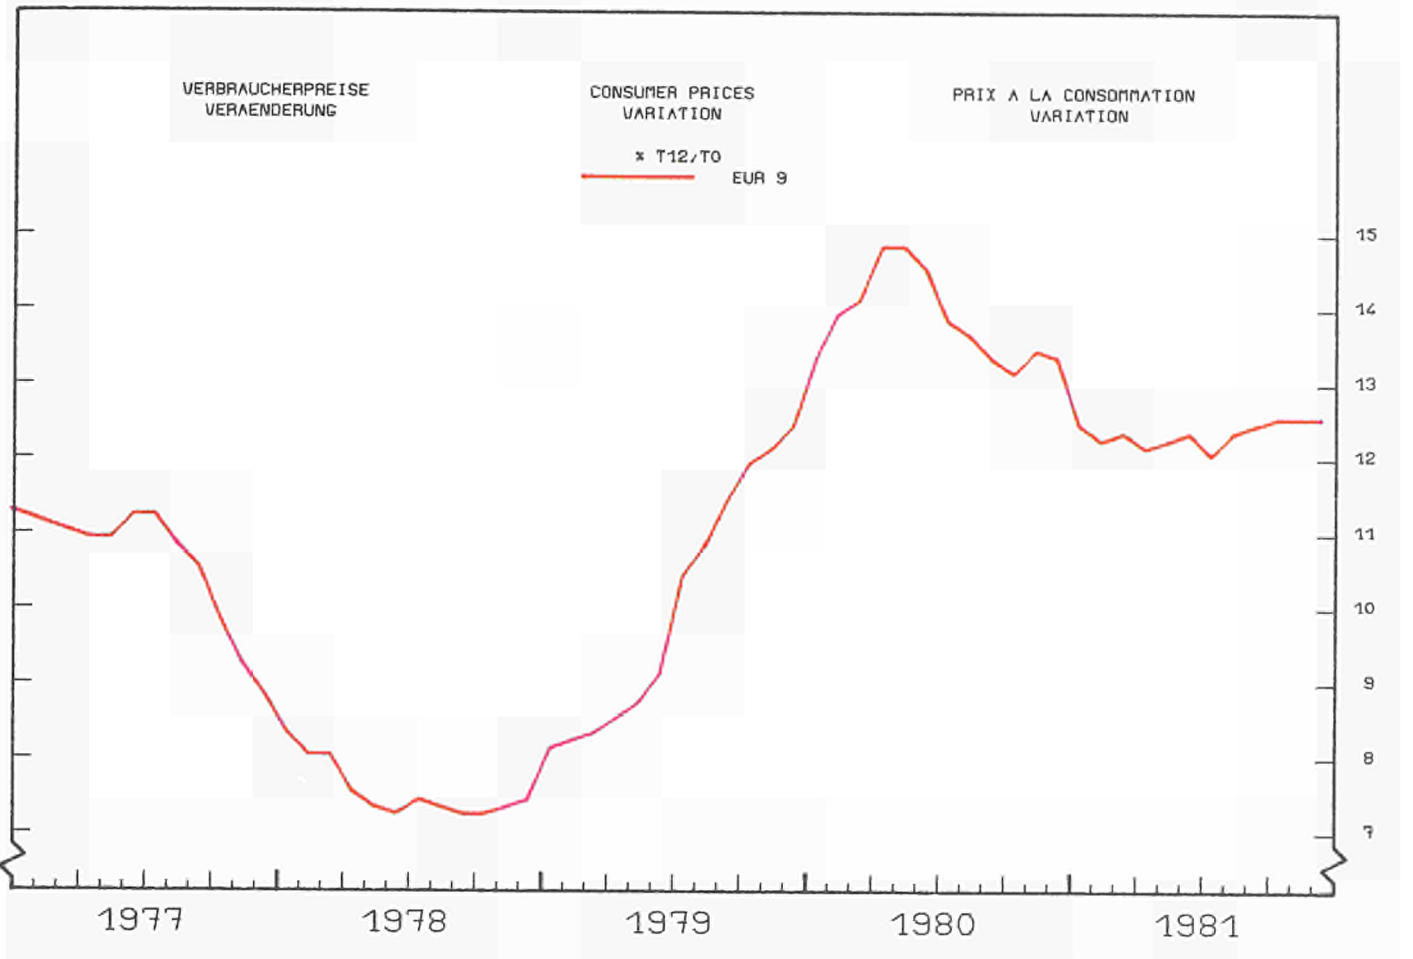

### Note technique

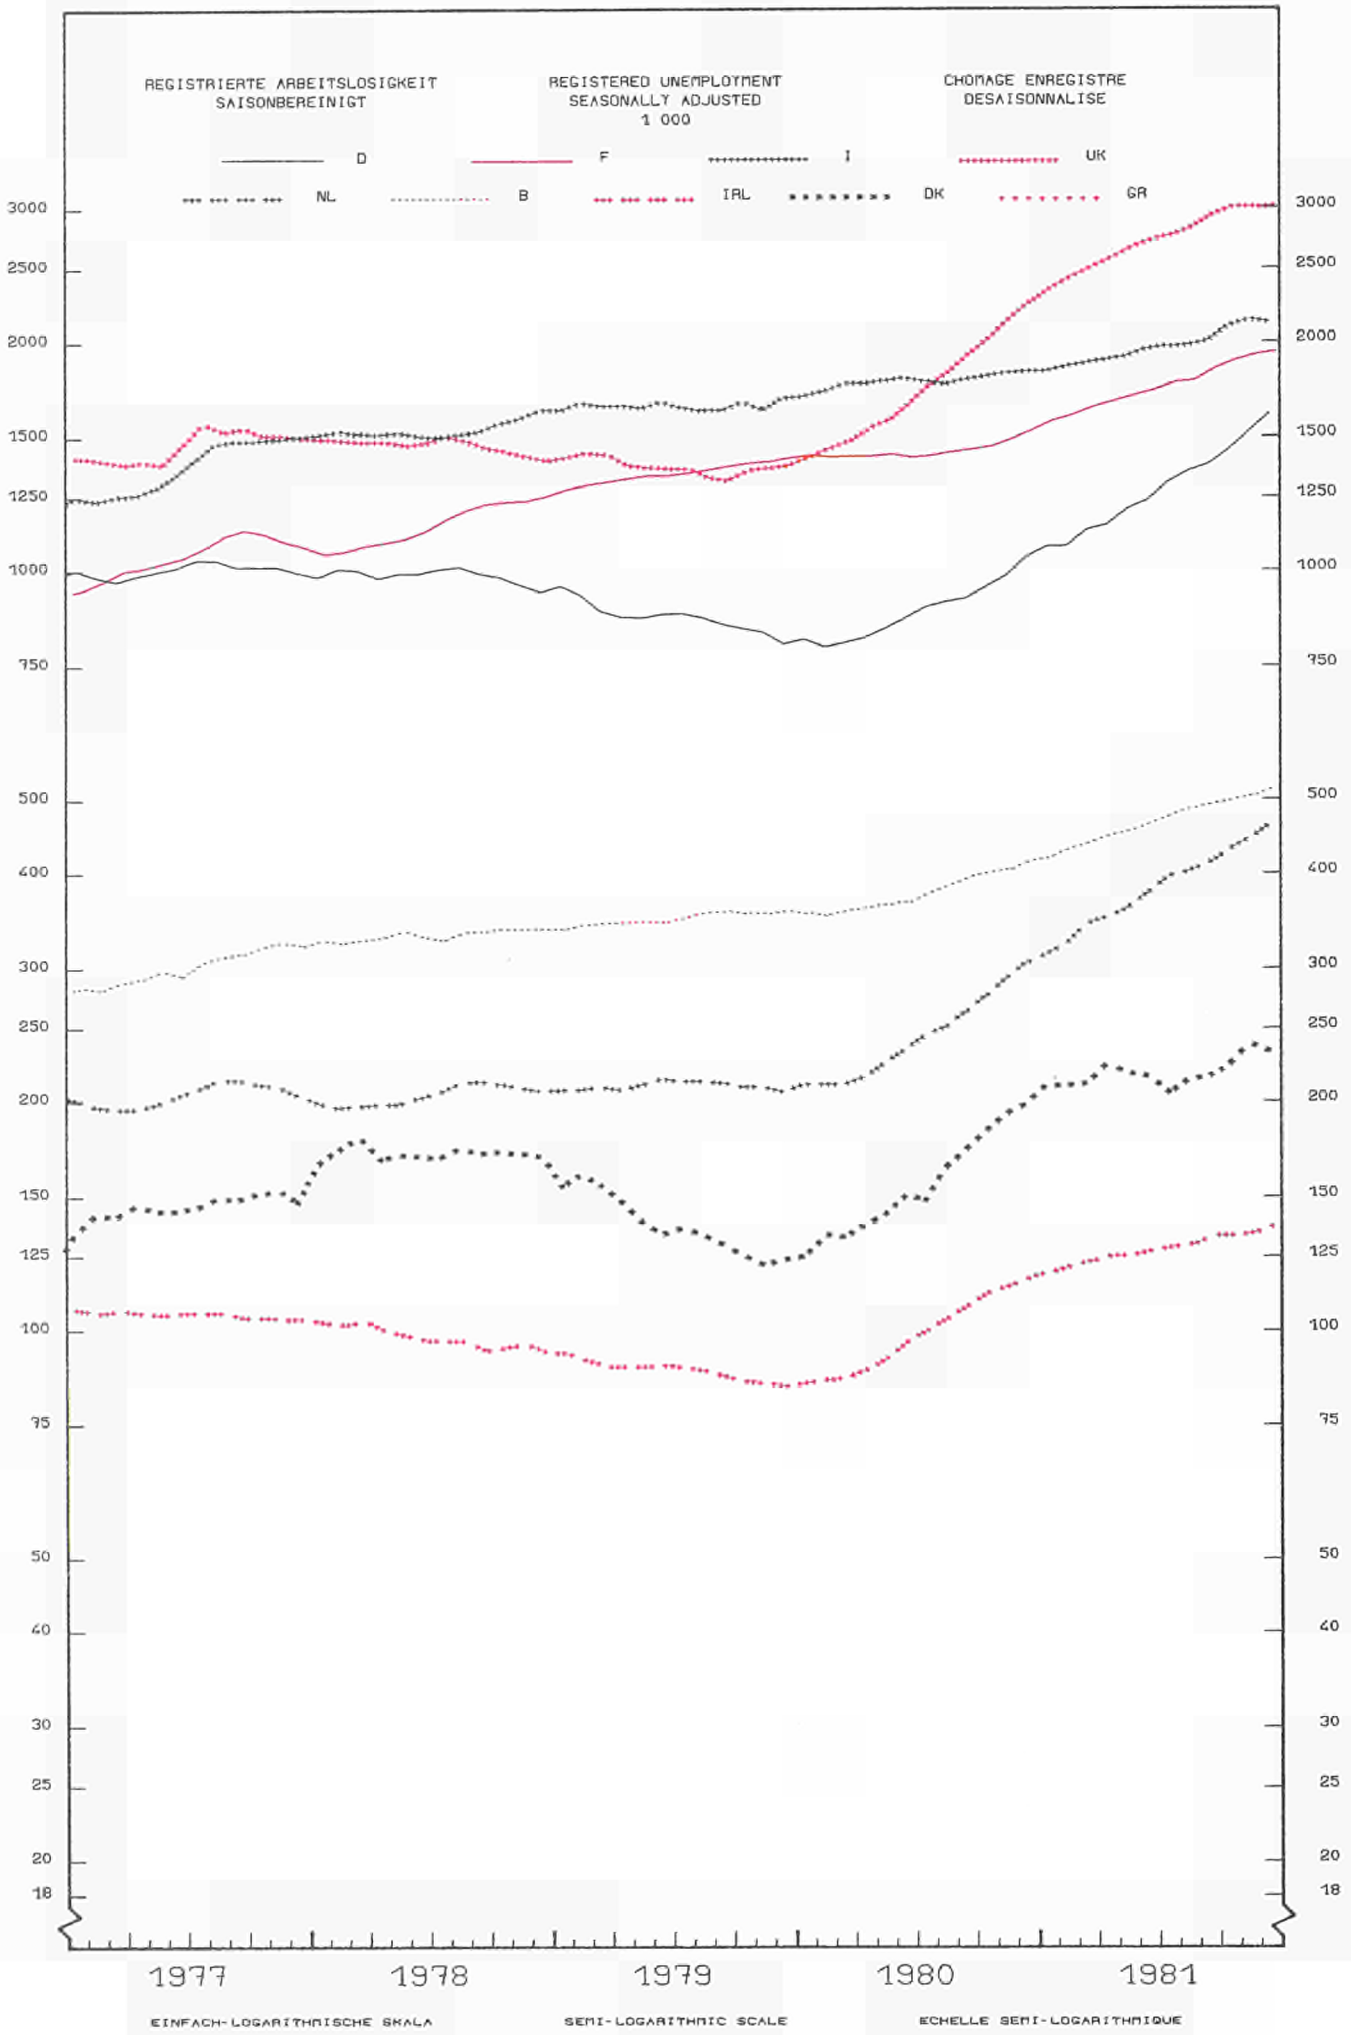

Nous attirons l'attention de nos lecteurs sur le fait que pour les raisons techniques il n'a pas été possible d'inclure toutes données pour la Grèce et EUR-10 dans la section « Commerce extérieur » (tableaux 079-135). En outre, les titres « intra-CE » et « extra-CE » signifient intra-9 et extra-9 pour les données jusqu'en décembre 1978 inclus et intra-10 et extra-10 à partir de janvier 1979 (tableaux 066-123).

Les chiffres pour le tableau-pays « Grèce » figureront dans un numéro prochain d'« Eurostatistique ».

Das Jahresabonnement beginnt am 1. Januar und endet am 31. Dezember. The annual subscription runs from 1 January to 31 December of each year. Les abonnements sont annuels; ils portent sur une période allant du 1 <sup>er</sup> janvier au 31 décembre de chaque année.	Zahlungen können nur an die auf Umschlagseite 3 angegebenen Vertriebsbüros geleistet werden. Payments to be made only to the agents in the countries listed on page 3 of the cover. Les versements doivent être adressés aux bureaux de vente indiqués à la page 3 de la couverture.			Die Versandkosten für Luftpostzustellung sind im Preis nicht enthalten. Die Bedingungen für Luftpostabonnements sind bei den Vertriebsbüros zu erfragen. These are surface mail rates; for air subscription rates please apply to the agents. Les prix ne comprennent pas les frais d'expédition par avion; pour les conditions d'abonnement par avion, consulter les bureaux de vente.
