Hinweis

Die Veröffentlichung Eurostatistik — Daten zur Konjunkturanalyse ist eine von drei Schlüsseleröffnungen des Eurostat, die dem Leser einen Überblick über die wichtigsten quantitativen Daten geben sollen, die für die Gemeinschaft und die Mitgliedstaaten zur Verfügung stehen. Die anderen Veröffentlichungen in dieser Reihe sind Statistische Grundzahlen mit Daten für ein bestimmtes Jahr sowie Eurostat-Revue mit einem Zehnjahresüberblick über die Gemeinschaft in Zahlen. Eine monatliche Veröffentlichung mit laufenden Wirtschaftsdaten muß ständig angepaßt und auf den neuesten Stand gebracht werden. Zu Beginn des Jahres 1982 wurde mit der Einbeziehung von Daten für Griechenland und der Abwandlung der Aufmachung eine bedeutende Änderung vorgenommen. Im Laufe des Jahres 1982 werden nach und nach Gesamtzahlen für die 10 Mitgliedstaaten der Gemeinschaft aufgenommen. Sobald genügend Daten zur Verfügung stehen, wird das Basisjahr 1975, das die Grundlage für diese Veröffentlichung bildet, durch das Jahr 1980 ersetzt werden. Zu einem späteren Zeitpunkt ist vorgesehen, Daten für die beiden beitragswilligen Länder Portugal und Spanien sowie für die Vereinigten Staaten und Japan hinzuzufügen. Es werden vier Arten von Daten in Eurostatistik veröffentlicht. Auf den Seiten 5 und 6 findet sich ein Artikel „Kurz notiert“, der sich mit den jüngsten Tendenzen bei den verfügbaren Daten befaßt. Die Seiten 15 bis 20 enthalten eine schematische Darstellung der wichtigsten wirtschaftlichen Reihen für die Gemeinschaft und die Mitgliedstaaten. Die Seite 23 ist die erste von 56 Seiten mit „Gemeinschaftstabellen“. Dieser Abschnitt enthält von Eurostat auf der Grundlage von Gemeinschaftskriterien harmonisierte Daten. Die neuesten Daten sind vorläufig und in einigen Fällen von Eurostat geschätzt. Schließlich enthält die Veröffentlichung noch einen Abschnitt „Ländertabellen“, der eine Auswahl der in jedem Land am häufigsten verwendeten Konjunkturindikatoren enthält. Hierbei handelt es sich um nationale Reihen auf der Grundlage nationaler Definitionen. Zu Vergleichszwecken ist auch eine Tabelle für die Vereinigten Staaten enthalten. In allen Fällen stehen auf Anfrage Zeitreihen über die Cronos-Datenbank des Eurostat zur Verfügung. Es werden außerdem statistische Bulletins über Arbeitslosigkeit, Preise, industrielle Produktion, Zahlungsbilanzen, Außenhandel und Energie monatlich oder vierteljährlich veröffentlicht. In Eurostatistik selbst ist ein absolutes Minimum an Erläuterungen zur Methodik enthalten. Ausführliche Informationen über Definitionen und Methodik sind bei Eurostat erhältlich. Eurostatistik wird am Ende eines jeden Monats in einer gemeinsamen Ausgabe für Deutsch, Englisch und Französisch veröffentlicht. Darüber hinaus steht auf Anfrage eine Ergänzung mit Übersetzung der Titel und der Erläuterungen ins Dänische, Griechische, Italienische und Niederländische zur Verfügung.

Eurostatistik : Kurz notiert

1. Index der industriellen Produktion —merklicher Rückgang im dritten Quartal 1982

Der vorläufige Index der industriellen Produktion der Gemeinschaft belief sich für September 1982 auf 112,5 (1975=100) und blieb damit um 4,3% unter dem Stand vom gleichen Monat des Vorjahres. Es handelt sich hierbei um den vierten Rückgang hintereinander, der gleichzeitig den deutlich stärksten Rückgang seit Juni 1982 darstellt. Insgesamt ist die Produktion im dritten Quartal 1982 um 3,4% gegenüber dem gleichen Quartal des Vorjahres zurückgegangen.

Nach Saisonbereinigung liegt der Index bei 111,1 (1975=100); dies entspricht einem neuen Rückgang um nahezu 1%. Der durchschnittliche Verlust im dritten Quartal 1982 beträgt gegenüber dem vorigen Quartal 2,2%, während es seit dem vierten Quartal 1980 in keinem Quartal eine signifikante Veränderung in der industriellen Produktion gegeben hatte. Es ist infolgedessen zu befürchten, dass die Industrietätigkeit nach einer langen Stagnationsperiode, die der letzten Rezession (in der ersten Hälfte des Jahres 1980) folgte, am Anfang einer neuen Rezession steht.

Auf einzelstaatlicher Ebene deuten die für das dritte Quartal 1982 verfügbaren Zahlen auf einen allgemein verbreiteten Produktionsrückgang hin. Mit Ausnahme von Luxemburg und im Vereinigten Königreich, in denen Stagnation bzw. ein leichter Anstieg zu verzeichnen waren, wurden im dritten Quartal (gegenüber dem vorausgegangenen Quartal) mitunter erhebliche Produktionsrückgänge registriert und zwar in der Bundesrepublik Deutschland (-3,4%), in Frankreich (-1,9%), in Italien (-2,5%), in den Niederlanden (-0,6%) und in Dänemark (-3,3%).

2. Energie : Weltjahresförderung von Kohle

Nach dem verlangsamten Wachstum der Weltförderung von Steinkohle 1980 ging die Förderung 1981 um 1% auf 2 800 Millionen Tonnen, davon 1 000 Millionen Tonnen in Europa, zurück. Darin wirkt sich die unterschiedliche Entwicklung in den einzelnen Förderländern aus, so die Zunahme der Förderung in Indien, Südafrika und in Australien (jeweils +14, +10 und +14 Millionen Tonnen) und eine deutliche Abnahme der Förderung in Polen und in den Vereinigten Staaten von Amerika (-30 bzw. -23 Millionen Tonnen). Der Anteil der drei Hauptförderländer (Vereinigte Staaten, China und UdSSR), der 1980 67% der Weltförderung ausmachte, betrug 1981 nur noch 65%.

Die Weltförderung von Braunkohle stieg 1981 um 17 Millionen Tonnen (+1,8% gegenüber 1980) auf 987 Millionen Tonnen, davon 868 Millionen Tonnen in Europa.

Die rückläufige Erzeugung von Steinkohlenkoks in der Gemeinschaft und in den Vereinigten Staaten (-4,5% bzw. -4,8%) und der Anstieg der Steinkohlenkokerzeugung in Asien (+1,9%) führten insgesamt zu einem Rückgang der Welterzeugung gegenüber 1980 (-1,1%).

3. Energie : Aspekte des Brennstoffverbrauchs sämtlicher Kraftwerke

Im Vergleich zu 1980 war in der Elektrizitätswirtschaft der Gemeinschaft 1981 praktisch eine Stagnation festzustellen : mit einer Abnahme der Gesamtnettoerzeugung von 0,2% und einer leichten Zunahme der dem Inlandsmarkt verfügbare Elektrizität von 0,2%.

Die Anteile der verschiedenen Energieträger entwickelten sich jedoch weiterhin entsprechend den bereits im Laufe der vorausgegangenen Jahre verzeichneten Tendenzen; dies lässt sich anhand folgender Ergebnisse veranschaulichen : eine starke Zunahme des Anteils der Kernenergie von +32,8% und ein Rückgang des Anteils der herkömmlichen Wärmekraftwerke von -6,2%.

Der Anteil des Postens „Feste Brennstoffe und Kernbrennstoffe“ an der Gesamtenergieumwandlung der Kraftwerke stieg von 61,6% (1980) auf 66,8% (1981) deutlich an, während der Anteil der Mineralölprodukte von 22,1% auf 18,3% zurückging.

Eine eingehende Analyse des Verbrauchs der verschiedenen in den herkömmlichen Wärmekraftwerken umgewandelten Brennstoffarten ergibt folgendes Bild :

- geringer Rückgang der Steinkohle (-0,5%), wobei der Anstieg in der BR Deutschland und in Italien (+1,5 bzw. +0,6 Millionen t RÖE) durch die Abnahme in Frankreich und Dänemark (-2 bzw. -1 Million t RÖE) kompensiert wurde;
- Zunahme der Braunkohle (+4,4%) in der BR Deutschland und in Griechenland (jeweils +0,6 Millionen t RÖE);
- deutlicher Rückgang der Mineralölprodukte (-15,5%) um insgesamt 9,5 Millionen t RÖE (davon 3,5 in Frankreich und 1,5 im Vereinigten Königreich);
- deutlicher Rückgang des Naturgases (-17,5%) um insgesamt 4,4 Millionen t RÖE (davon 3,3 in der BR Deutschland).

4. Landwirtschaft

Vergleich der Entwicklung des EG-Index der Erzeugerpreise landwirtschaftlicher Produkte mit der Entwicklung des EG-Index der Einkaufspreise der Waren und Dienstleistungen des laufenden landwirtschaftlichen Verbrauchs :

Wie in den drei vorausgegangenen Quartalen zeigt dieser Vergleich für EUR 10, dass die Erzeugerpreise landwirtschaftlicher Produkte rascher stiegen als die Einkaufspreise der Waren und Dienstleistungen des laufenden landwirtschaftlichen Verbrauchs (13,9% gegenüber 10,1%). Der Abstand zwischen den beiden Steigerungsraten vergrößerte sich weiterhin (auf derzeit 3,8 Prozentpunkte), und dies aufgrund einer Verlangsamung der Preissteigerung des Inputs bei gleichzeitig konstanter Preissteigerung des Outputs.

Nur in der Bundesrepublik Deutschland und in Irland bewegt sich die prozentuale Preissteigerung des Inputs leicht über derjenigen des Outputs. In den meisten der übrigen Mitgliedstaaten stiegen die Preise des Outputs schneller als die des

Inputs. In Dänemark entwickelten sich die beiden prozentualen Steigerungsraten gleich stark.

5. Extra-EG-Handel

In den drei Monaten Juni bis August 1982 war die Gemeinschaftsausfuhr in Drittländer wertmässig nur um 3% höher als im Vergleichszeitraum 1981 (ohne die Niederlande, für die jüngsten Daten von 1982 noch nicht vorliegen).

Die Gemeinschaftseinfuhr aus Drittländern nahm im selben Zeitraum um 2% zu. In zwei Ländern, nämlich Deutschland und Irland, wurde im Extra-EG-Handel ein Überschuss erzielt.

1981 waren als Lieferländer an der Einfuhr der Gemeinschaft die USA mit 16% (aus Drittländern), Saudiarabien mit 12% beteiligt. Den grössten Einfuhranteil (34%) wie die Warenkategorie Brennstoffe auf. Die wichtigsten Lieferanten Saudiarabien (65%), die UdSSR (8%), Libyen (7%), Algerien (6%) und Nigeria (5%). Als nächstwichtigste Kategorie sind Maschinen und Fahrzeuge (15% der Einfuhr) zu nennen. Hier führen die USA mit 36% Lieferanteil, gefolgt von Japan (23%), Schweden und der Schweiz (je 7%) und Spanien (5%).

Auf bearbeitete Waren, nach Beschaffenheit gegliedert (SITC-Teil 6), entfielen 12% der Einfuhr. Wichtigste Herkunftsländer waren die USA (12%), Schweden (11%), die Schweiz und Österreich (je 7%), Spanien und Finnland (je 6%) und

Norwegen (5%). Verschiedene bearbeitete Waren schlugen bei der Einfuhr mit 8% zu Buche. Die Lieferungen kamen aus den USA (20%), Hongkong und Japan (je 11%), der Schweiz (9%), Südkorea (6%) und Taiwan (5%).

6. Finanzen — Zinstrend weiterhin abwärts gerichtet

Nach der Diskontsatzsenkung in den USA im Monat November zogen eine Reihe europäischer Zentralbanken nach.

Bei den Zentralbanken der EG-Länder reduzierte die dänische Zentralbank ihren Diskontsatz von 11% auf 10% (mit Wirkung von 30. November), die Bundesbank ihren Satz auf 5% (vorher 6%) und die Nederlandsche Bank ebenfalls auf 5% (vorher 5,5%). Die Sätze der beiden letzten Zentralbanken sind gültig mit Wirkung vom 3. Dezember.

Technischer hinweis

Wegen eines Streiks im öffentlichen Dienst im Vereinigten Königreich ist es zur Zeit nicht möglich, Aussenhandelsdaten für den Zeitraum Februar bis August 1981 für das VK und EUR 10 zu veröffentlichen. Ausserdem können aus technischen Gründen die meisten Aussenhandelsdaten für Griechenland und EUR 10 ebenfalls nicht veröffentlicht werden. Sämtliche Reihen werden so bald wie möglich vervollständigt werden.

Notice

Eurostatistics — data for short-term economic analysis is one of three key Eurostat publications designed to give the reader an overview of the most important quantitative information available for the Community and Member States. The other publications in this series are Basic Statistics giving data for a specific year, and Eurostat review with its summary of the Community in figures over the past 10 years.

A monthly publication with current economic data must be continually adapted and updated. At the beginning of 1982 a major modification took place with the inclusion of data for Greece and a change in presentation. Totals for the 10-member Community are being progressively introduced in 1982. Once sufficient data are available, the base year 1975 which is fundamental to this publication will be replaced with 1980. At a later stage it is planned to add data for the two applicant countries, Portugal and Spain, as well as for the United States and Japan.

Four kinds of information are published in Eurostatistics. Pages 9 and 10 offer an article 'In brief' which looks at the latest trends in the data available. Pages 15 to 20 provide the reader with a visual presentation of the most important economic series for the Community and the Member States. Starting on page 23 there are 56 pages of 'Community tables'. This section contains data harmonized by Eurostat on the basis of common criteria. The most recent data are provisional and in some cases estimated by Eurostat. Finally there is a section 'Tables by country' which contains a selection of economic indicators most often used in each country. These are national series based on national definitions. For comparison a table for the United States is also included.

For all series, historical data are available on request from Eurostat's data bank Cronos. Statistical bulletins on unemployment, prices, industrial production, balance of payments, external trade and energy are also published monthly or quarterly. Eurostatistics itself contains an absolute minimum of methodological notes. Detailed information on definitions and methodology may be obtained from Eurostat.

Eurostatistics is published at the end of each month in a single edition in German, English and French. A supplement with translations of titles and explanatory notes exists in Danish, Greek, Italian and Dutch, and it is available on request.

(¹) The data included in this section of the bulletin are results from a short-term-trends enquiry conducted among heads of enterprises in the Community. More detailed data appear in *European Economy*.

Eurostatistics: in Brief

1. Index of industrial production -sharp fall in the third quarter of 1982

The provisional index of industrial production in the Community for September 1982 stood at 112.5 (1975=100), a drop of 4.3% compared with September 1981. This is the fourth consecutive fall (and also the steepest) in the monthly index since June 1982. The overall result for the third quarter of 1982 was a drop of 3.4% compared with the third quarter of 1981.

The seasonally adjusted September index stood at 111.1 (1975=100), a further drop of almost 1%. Industrial production in the third quarter of 1982 was on the average 2.2% down on the previous quarter, whereas no significant change in industrial production had been noted in any quarter since the fourth quarter of 1980. There are therefore grounds for fearing that industrial activity has now entered a renewed period of recession, following a prolonged spell of stagnation since the last such period in the first half of 1980.

At national level, the figures for the third quarter of 1982 point to a general slackening-off of production, with the exception of the United Kingdom and Luxembourg, which experienced a slight improvement, or at least no change. A deterioration in the situation (quite pronounced in some cases) is reported for the third quarter (compared with the previous one) by the FR of Germany (-3.4%), France (-1.9%), Italy (-2.5%), the Netherlands (-0.6%) and Denmark (-3.3%).

2. Energy: annual world coal production

The slowing in the growth of world coal production which took place in 1980 changed into a decrease in 1981 (-1%), so that production was only 2 800 million tonnes, of which 1 000 million were produced in Europe. However, this resulted from diverging trends in the various producer countries, shown by increases in India, South Africa and Australia (+14, +10 and +14 million tonnes respectively) and by substantial reductions in Poland and the United States (-30 and -23 million tonnes respectively). The production of the three main producer countries (United States, China and USSR), which accounted for 67% of world production in 1980, accounted for only 65% in 1981. World production of lignit increased by 17 million tonnes in 1981 (+1.8% on 1980), reaching a level of 987 million tonnes, of which 868 million were produced in Europe. World production of hard coke fell by 1.1% between 1980 and 1981, as a result of reductions in the Community and the United States (-4.5% and -4.8% respectively) and increases in Asia (+1.9%).

3. Energy: fuel consumption trends at power stations

Compared with 1980, the electricity economy was marked in 1981 by near-stagnation throughout the Community, with a drop in total net output of 0.2% and only a slight increase in electricity available for the internal market +0.2%.

The breakdown structure of the various sources of energy, on

the other hand, pursued the trends already observed in recent years, with a substantial rise in output of nuclear origin (+32.8%) and a decline in output of conventional thermal origin: -6.2%.

Lastly, the 'solid fuels and nuclear' aggregate significantly boosted its share in the overall transformation of energy in power stations from 61.6% (1980) to 66.8% (1981), while that of petroleum products fell back from 22.1% to 18.3%.

A detailed analysis of the consumption of the different types of fuels in conventional thermal power stations shows:

- a slight fall in coal (-0.5%), the rise in Germany and in Italy (+1.5 and +0.6 million toe respectively) being offset by the falls in France and Denmark (-2 and -1 million toe respectively);
- a rise in brown coal (+4.4%), in Germany and in Greece (+0.6 million toe in both countries);
- a marked drop in petroleum products (-15.5%) representing a total 9.5 million toe (of which 3.5 in France and 1.5 in the United Kingdom);
- a marked drop in natural gas (-17.5%) representing a total 4.4 million toe (of which 3.3 in Germany).

4. Agriculture

Comparison of the trend of the EC index of producer prices of agricultural products with that of the index of purchase prices of goods and services for current consumption in agriculture:

As for the previous three quarters, this comparison for EUR 10 shows that producer prices of agricultural products increased more rapidly than purchase prices of goods and services for current consumption in agriculture (13.9% as against 10.1%). The gap between the two rates of change has continued to widen (it is now 3.8 percentage points), and this is due, once again, to the slowdown in the rate of increase of input prices, that of output prices remaining stable. Only in the Federal Republic of Germany and in Ireland is the percentage rise in the prices of inputs slightly above that for outputs. In all the other Member States, output prices rose more rapidly than input prices, except in the case of Denmark where the two percentage movements were the same.

Extra-EC Trade

In the three months to end August 1982, Community exports to third countries were only 3% higher in value than in the corresponding period of 1981 (excluding a contribution from the Netherlands, for which recent 1982 data is not yet available). Community imports from third countries rose by two per cent in this period. There were two member countries with a trade surplus on extra-EC trade, Germany and Ireland. For the year 1981, the leading suppliers to the Community were the U.S.A. with a 16 per cent share of imports from third countries and Saudi Arabia with a 12 per cent share. The commodity class with the largest share of imports (34 per cent) was fuel products and for this, the leading suppliers were Saudi Arabia

(65 per cent), U.S.S.R. (8 per cent), Libya (7 per cent), Algeria (6 per cent) and Nigeria (5 per cent). The next most important class was machinery and transport equipment (15 per cent of imports). Here the U.S.A. lead, with a 36 per cent share, followed by Japan (23 per cent), Sweden and Switzerland (7 per cent), and Spain (5 per cent).

Manufactured goods classified by type of products (SITC section 6) accounted for a further 12 per cent of imports. Leading suppliers were the U.S.A. (12 per cent), Sweden (11 per cent), Switzerland and Austria (7 per cent), Spain and Finland (6 per cent) and Norway (5 per cent). Miscellaneous manufactured goods accounted for 8 per cent imports and the leading suppliers were the U.S.A. (20 per cent), HongKong and Japan (11 per cent), Switzerland (9 per cent), South Korea (6 per cent) and Taiwan (5 per cent).

6. Financies — interest continue their fall

The interest rate fall in the U.S.A. in November was followed on by a series of European Central Banks. In the EC the Danish Central Bank reduced its discount rate from 11 to 10% (effective 30th November), the Bundesbank to 5% (from 6%) and the Nederlandsche Bank similarly to 5% (from 5.5%). These last two rates were effective 5th December.

Technical note

Because of a civil-service strike in the UK it is not possible for the moment to publish external trade figures for February to August 1981 for UK. In addition most external trade data for Greece and EUR 10 cannot be published because of technical reasons. All series will be completed as soon as possible.

Avertissement

Eurostatistiques — données pour l'analyse de la conjoncture est l'une des trois publications clés d'Eurostat, destinées à donner au lecteur un aperçu des informations quantitatives les plus importantes disponibles concernant la Communauté et les États membres. Les autres publications de cette série sont les Statistiques de base fournissant des données pour une année spécifique déterminée et la Revue de l'Eurostat qui passe en revue dix ans de la Communauté sous forme de tableaux chiffrés.

Une publication mensuelle contenant des données économiques conjoncturelles d'actualité doit être continuellement adaptée et mise à jour. Au début de 1982, une modification importante est intervenue avec l'inclusion de données concernant la Grèce et un changement de présentation. Des totaux pour la Communauté de dix membres seront progressivement introduits en 1982. Lorsque l'on disposera de données en nombre suffisant, l'année 1975 — année de référence pour cette publication — sera remplacée par 1980. Il est prévu ultérieurement d'ajouter les données concernant les deux pays candidats à l'adhésion — à savoir l'Espagne et le Portugal — ainsi que pour les États-Unis et le Japon.

Eurostatistiques publie quatre types d'informations. Les pages 13 et 14 contiennent un article « En bref » dans lequel les dernières tendances pouvant être dégagées à partir des données disponibles sont examinées. Les pages 15 à 20 fournissent au lecteur une présentation visuelle des séries économiques les plus importantes pour la Communauté et les États membres. Des « tableaux communautaires » sont présentés sur 56 pages à partir de la page 23. Cette section contient des données harmonisées par Eurostat sur la base de critères communs. Les données les plus récentes sont provisoires et, dans certains cas, estimées par Eurostat. Enfin, la section « tableaux par pays » contient une sélection des indicateurs économiques les plus souvent utilisés dans chaque pays. Ce sont des séries nationales fondées sur des définitions nationales. A des fins de comparaison, un tableau concernant les États-Unis est également inclus.

Pour toutes les séries, des données historiques sont disponibles sur demande auprès de la banque de données d'Eurostat, CRONOS. Les bulletins statistiques sur le chômage, les prix, la production industrielle, la balance des paiements, le commerce extérieur et l'énergie sont également publiés sur une base mensuelle ou trimestrielle. En soi, Eurostatistiques contient un minimum de notes méthodologiques. Une information détaillée concernant les définitions et la méthodologie peut-être obtenue auprès d'Eurostat.

Eurostatistiques est publié à la fin de chaque mois dans une seule édition en allemand, anglais et français. Un supplément contenant les traductions des titres et des notes explicatives existe en danois, grec, italien et néerlandais et est disponible sur demande.

(1) Les données contenues dans cette partie du Bulletin représentent les résultats de l'enquête de conjoncture auprès des chefs d'entreprise de la Communauté. Des données plus détaillées paraissent dans « Économie européenne ».

Eurostatistiques : en bref

1. Indice de la production industrielle : Baisse sensible au cours du troisième trimestre 1982

L'indice provisoire de la production industrielle dans la Communauté s'établit à 112,5 (1975=100) pour le mois de septembre 1982, restant de 4,3% en dessous de son niveau du mois correspondant de l'année précédente. Cette baisse est la quatrième baisse consécutive, et en même temps la plus forte, accusée depuis le mois de juin 1982. Pour l'ensemble du troisième trimestre 1982, la production a ainsi baissé de 3,4% par rapport au même trimestre de 1981.

Après désaisonnalisation, l'indice est de 111,1 (1975=100), ce qui correspond à un nouveau repli de près de 1%. La perte moyenne du troisième trimestre de 1982 par rapport au trimestre précédent se chiffre à 2,2%, alors que depuis le quatrième trimestre de 1980, aucun trimestre n'avait dégagé une variation significative de la production industrielle : il est dès lors à craindre que l'activité industrielle est entrée dans une nouvelle phase de récession, qui se sépare de la précédente (première moitié de 1980) par une longue période de stagnation.

Sur le plan national, les chiffres disponibles pour le troisième trimestre 1982 suggèrent une faiblesse généralisée de la production : à l'exception du Royaume-Uni et du Luxembourg où il y avait légère progression, voire stagnation, des baisses parfois prononcées ont été enregistrées au cours du troisième trimestre (comparé au trimestre précédent) en RF d'Allemagne (-3,4%), en France (-1,9%), en Italie (-2,5%), aux Pays-Bas (-0,6%) et au Danemark (-3,3%).

2. Énergie : Production annuelle mondiale de charbon

Le ralentissement de la croissance de la production mondiale de houille, qui s'était manifesté en 1980, s'est transformé en baisse au cours de 1981 avec un taux de -1% limitant le niveau de production à 2 800 millions de tonnes dont 1 000 en Europe. Cela résulte cependant d'évolutions divergentes dans les différents pays producteurs, reflétées par des hausses en Inde, en Afrique du Sud et en Australie (+14, +10 et +14 millions de tonnes respectivement) et par des baisses sensibles en Pologne et aux États-Unis (-30 et -23 millions de tonnes respectivement). La production des trois principaux pays (États-Unis, Chine et URSS), qui couvrait 67% de la production mondiale en 1980, n'a couvert que 65% en 1981.

La production mondiale de lignite a augmenté en 1981 de 17 millions de tonnes (+1,8% par rapport à 1980) atteignant le niveau de 987 millions de tonnes, dont 868 en Europe.

La production mondiale de coke de four a enregistré en 1981 un recul par rapport à 1980 (-1,1%), résultant de baisses dans la Communauté et aux États-Unis (-4,5% et -4,8% respectivement) et de hausses en Asie (+1,9%).

3. Énergie : L'évolution de la consommation de combustibles des centrales

Comparée à 1980, l'économie de l'énergie électrique en 1981 se caractérise, dans la Communauté, par une situation de

quasi-stagnation avec une diminution de la production totale nette de -0,2% et une augmentation de l'électricité disponible pour le marché intérieur de +0,2%.

Par contre, la structure de la répartition des différentes sources d'énergie ne cesse pas d'évoluer selon les tendances, déjà observées au cours des dernières années avec une hausse sensible du nucléaire de +32,8% et un recul du thermique classique de -6,2%.

Enfin, l'agrégat « combustibles solides et nucléaire » voit augmenter d'une façon significative sa quote-part dans la transformation globale d'énergie dans les centrales électriques de 61,6% (1980) à 66,8% (1981), tandis que les produits pétroliers baissent de 22,1% à 18,3%.

Une analyse détaillée de la consommation des différents types de combustibles transformés dans les centrales thermiques classiques révèle :

- faible recul de la houille (-0,5%), les hausses en RF d'Allemagne et en Italie (+1,5 et +0,6 millions de tep respectivement) étant compensées par les baisses en France et au Danemark (-2 et -1 millions de tep respectivement);
- hausse du lignite (+4,4%), en RF d'Allemagne et en Grèce (+0,6 millions de tep dans chacun des deux pays);
- baisse sensible des produits pétroliers (-15,5%), qui perdent dans l'ensemble 9,5 millions de tep (dont 3,5 en France et 1,5 au Royaume Uni);
- baisse sensible du gaz naturel (-17,5%), qui perd dans l'ensemble 4,4 millions de tep (dont 3,3 en RF d'Allemagne).

4. Agriculture

Comparaison de l'évolution de l'indice CE des prix à la production des produits agricoles avec celle de l'indice CE des prix d'achat des biens et services de consommation courante de l'agriculture.

Comme pour les trois trimestres précédents cette comparaison, pour EUR 10, montre que les prix à la production des produits agricoles ont augmenté plus rapidement que les prix d'achat des biens et services de consommation courante de l'agriculture (13,9% contre 10,1%). L'écart entre les deux indicateurs continue de s'accroître (il est maintenant de 3,8 points de pourcentage), toujours en raison du ralentissement observé dans la hausse des prix des inputs, celle des outputs restant stable. Il n'y a qu'en République Fédérale d'Allemagne et en Irlande que le pourcentage de hausse des prix des inputs reste légèrement supérieur à celui des outputs. Dans tous les autres pays membres, les outputs ont augmenté plus vite que les inputs, sauf au Danemark, où les deux pourcentages sont égaux.

5. Commerce extra-communautaire

Dans les trois mois jusqu'à fin août 1982, les exportations de la Communauté vers des pays tiers étaient en hausse de 3% par rapport à la même période de 1981 (les données pour les Pays-Bas ne sont pas incluses). Les importations vers la Commu-

nauté avaient augmenté de 2% pour la même période. Deux pays membres, l'Allemagne et l'Irlande ont connu un excédent dans leur commerce extra-communautaire.

En 1981 les fournisseurs les plus importants de la Communauté étaient les États-Unis avec une part de 16% dans les importations des pays tiers suivis de l'Arabie Saoudite avec 12%. La classe de produits ayant la plus importante part dans les importations (34%) était les « produits énergétiques » et, ici, les fournisseurs les plus importants étaient l'Arabie Saoudite (65%), l'URSS (8%), la Lybie (7%), l'Algérie (6%), et le Nigéria (5%). Après vient le poste « machines et matériel de transport » avec 15% des importations. Ici les États-Unis dominent avec une part de 36% suivis par le Japon (23%), la Suède et la Suisse (chacun 7%) et l'Espagne (5%). Les « articles manufacturés classés par matières » (CTCI-6) représentaient 12% des importations. Les fournisseurs principaux incluaient les USA (12%), la Suède (11%), la Suisse et l'Autriche (7%), l'Espagne et la Finlande (6%) et la Norvège (5%). Les « articles manufacturés divers » expliquaient 8% des importations et les fournisseurs principaux étaient les USA

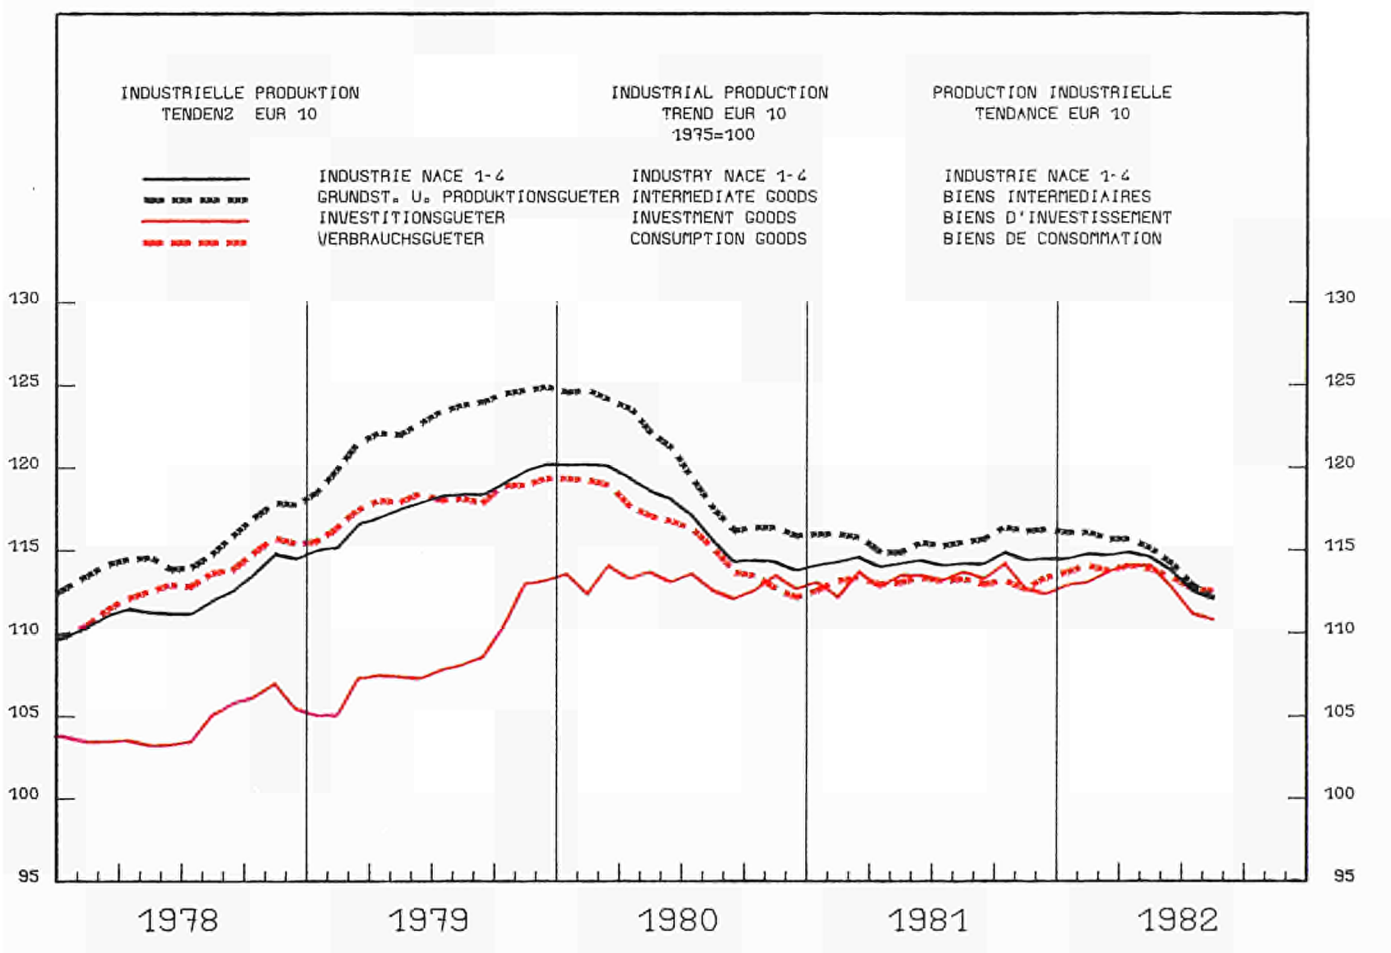

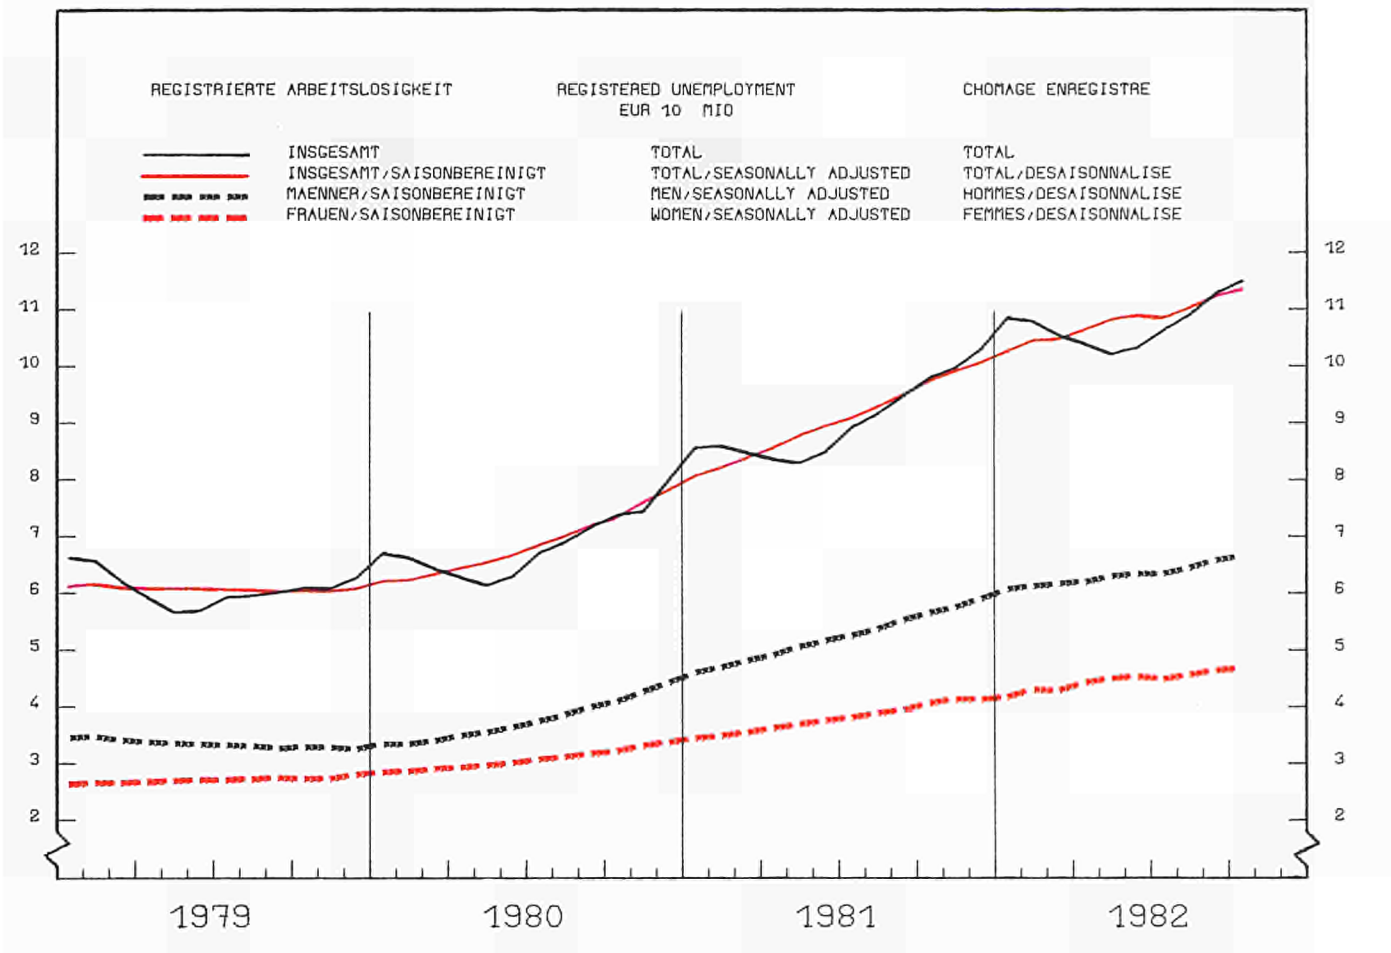

(20%), Hong-Kong et le Japon (11%), la Suisse (9%), la Corée du Sud (6%) et Taïwan (5%).

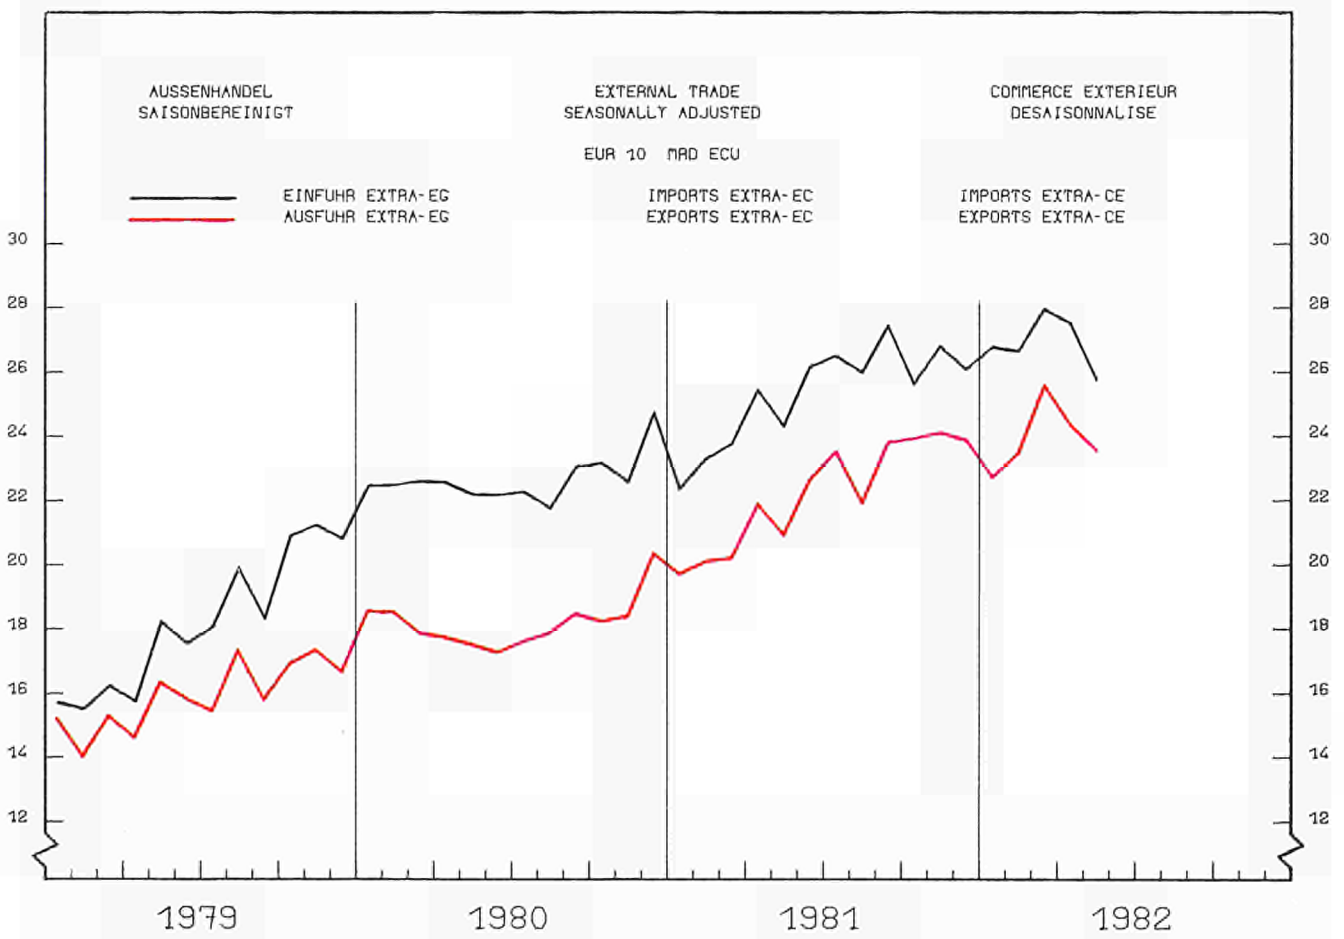

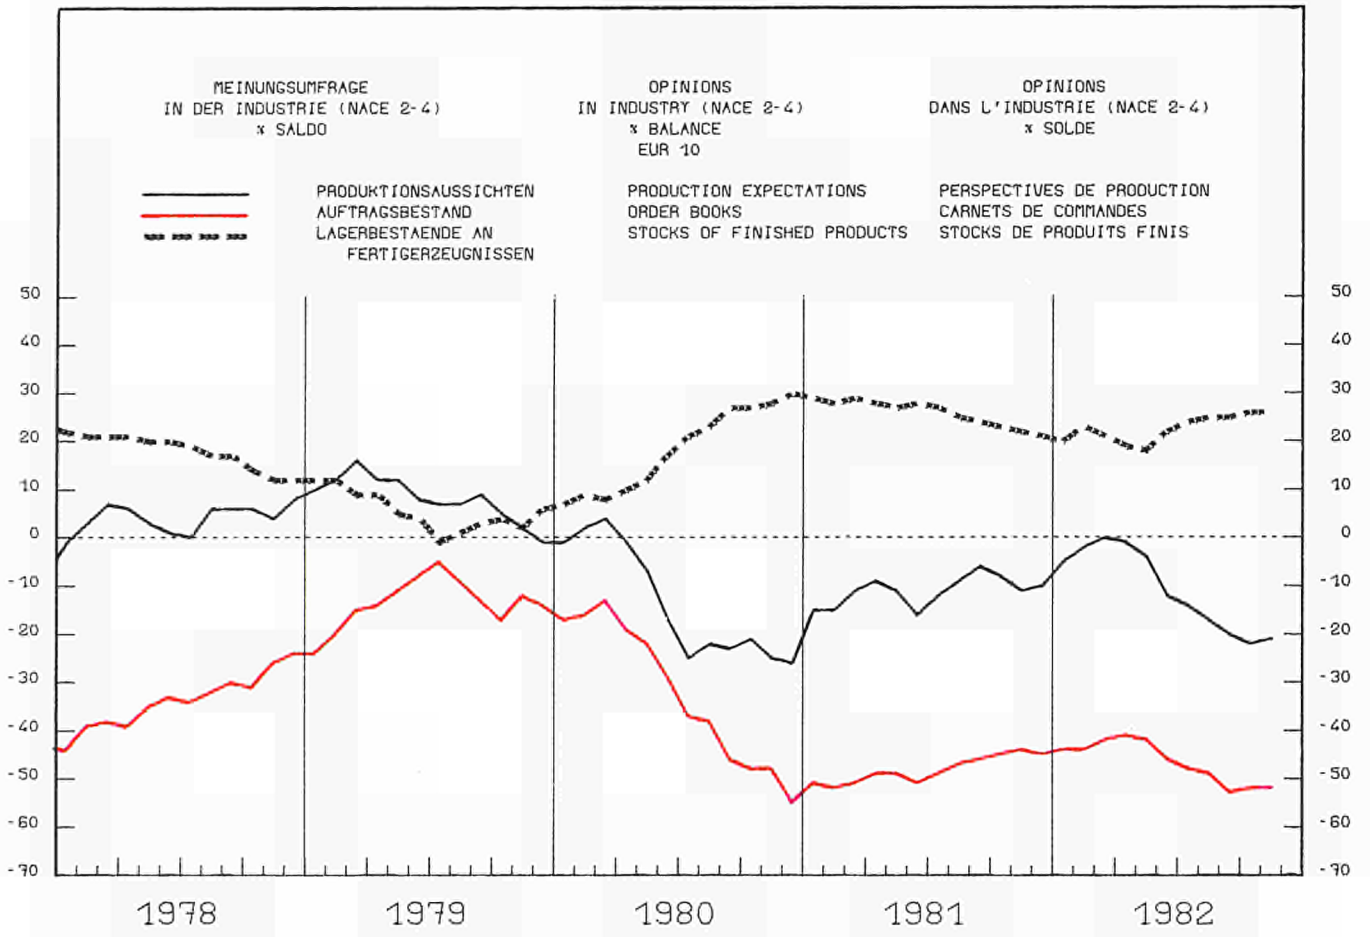

6. Finances : Baisse dans les taux d'intérêt se maintient

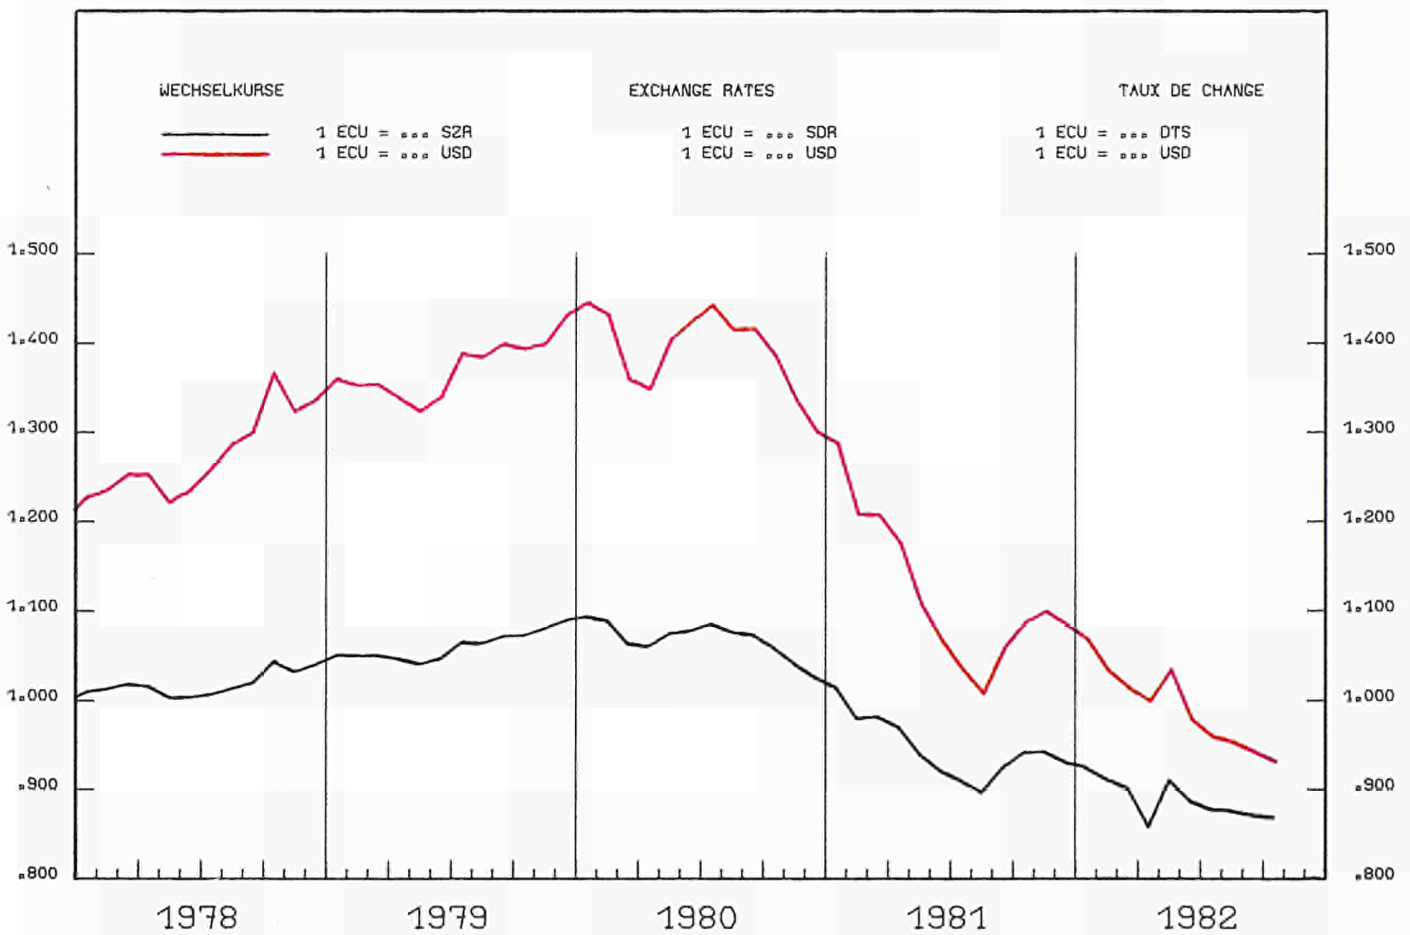

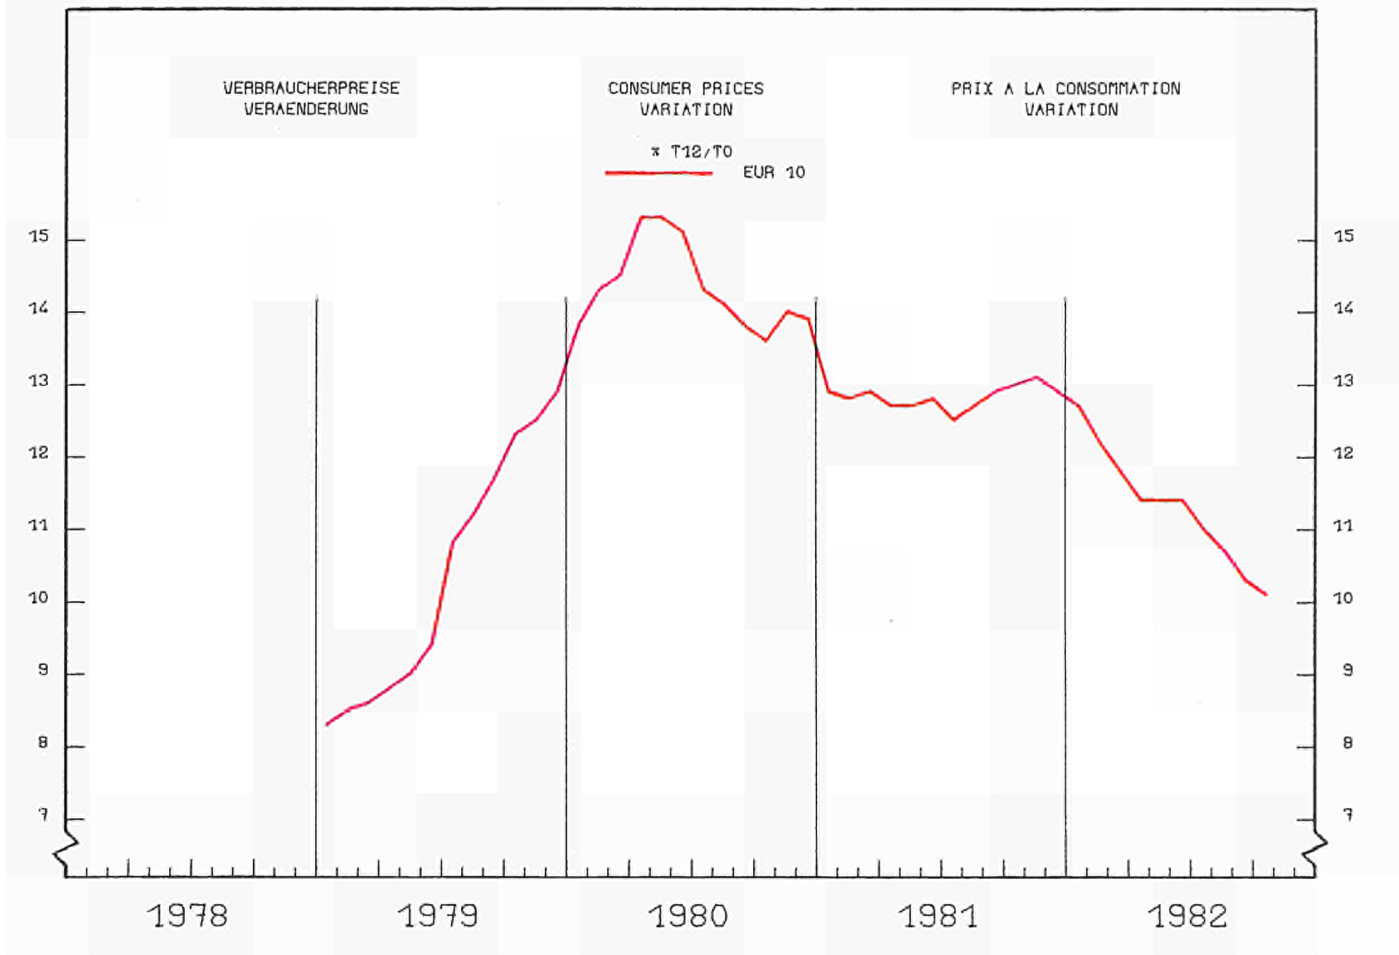

Après la baisse du taux d'escompte américain en novembre, une série de Banques Centrales européennes ont pris la même mesure. Dans la CE, la Banque Centrale du Danemark a diminué son taux de 11% à 10% (avec effet le 30 novembre), la Bundesbank a fait passer son taux de 6 à 5% et la Nederlandsche Bank de 5,5% à 5%. Les taux des deux dernières banques ont pris effet le 3 décembre.

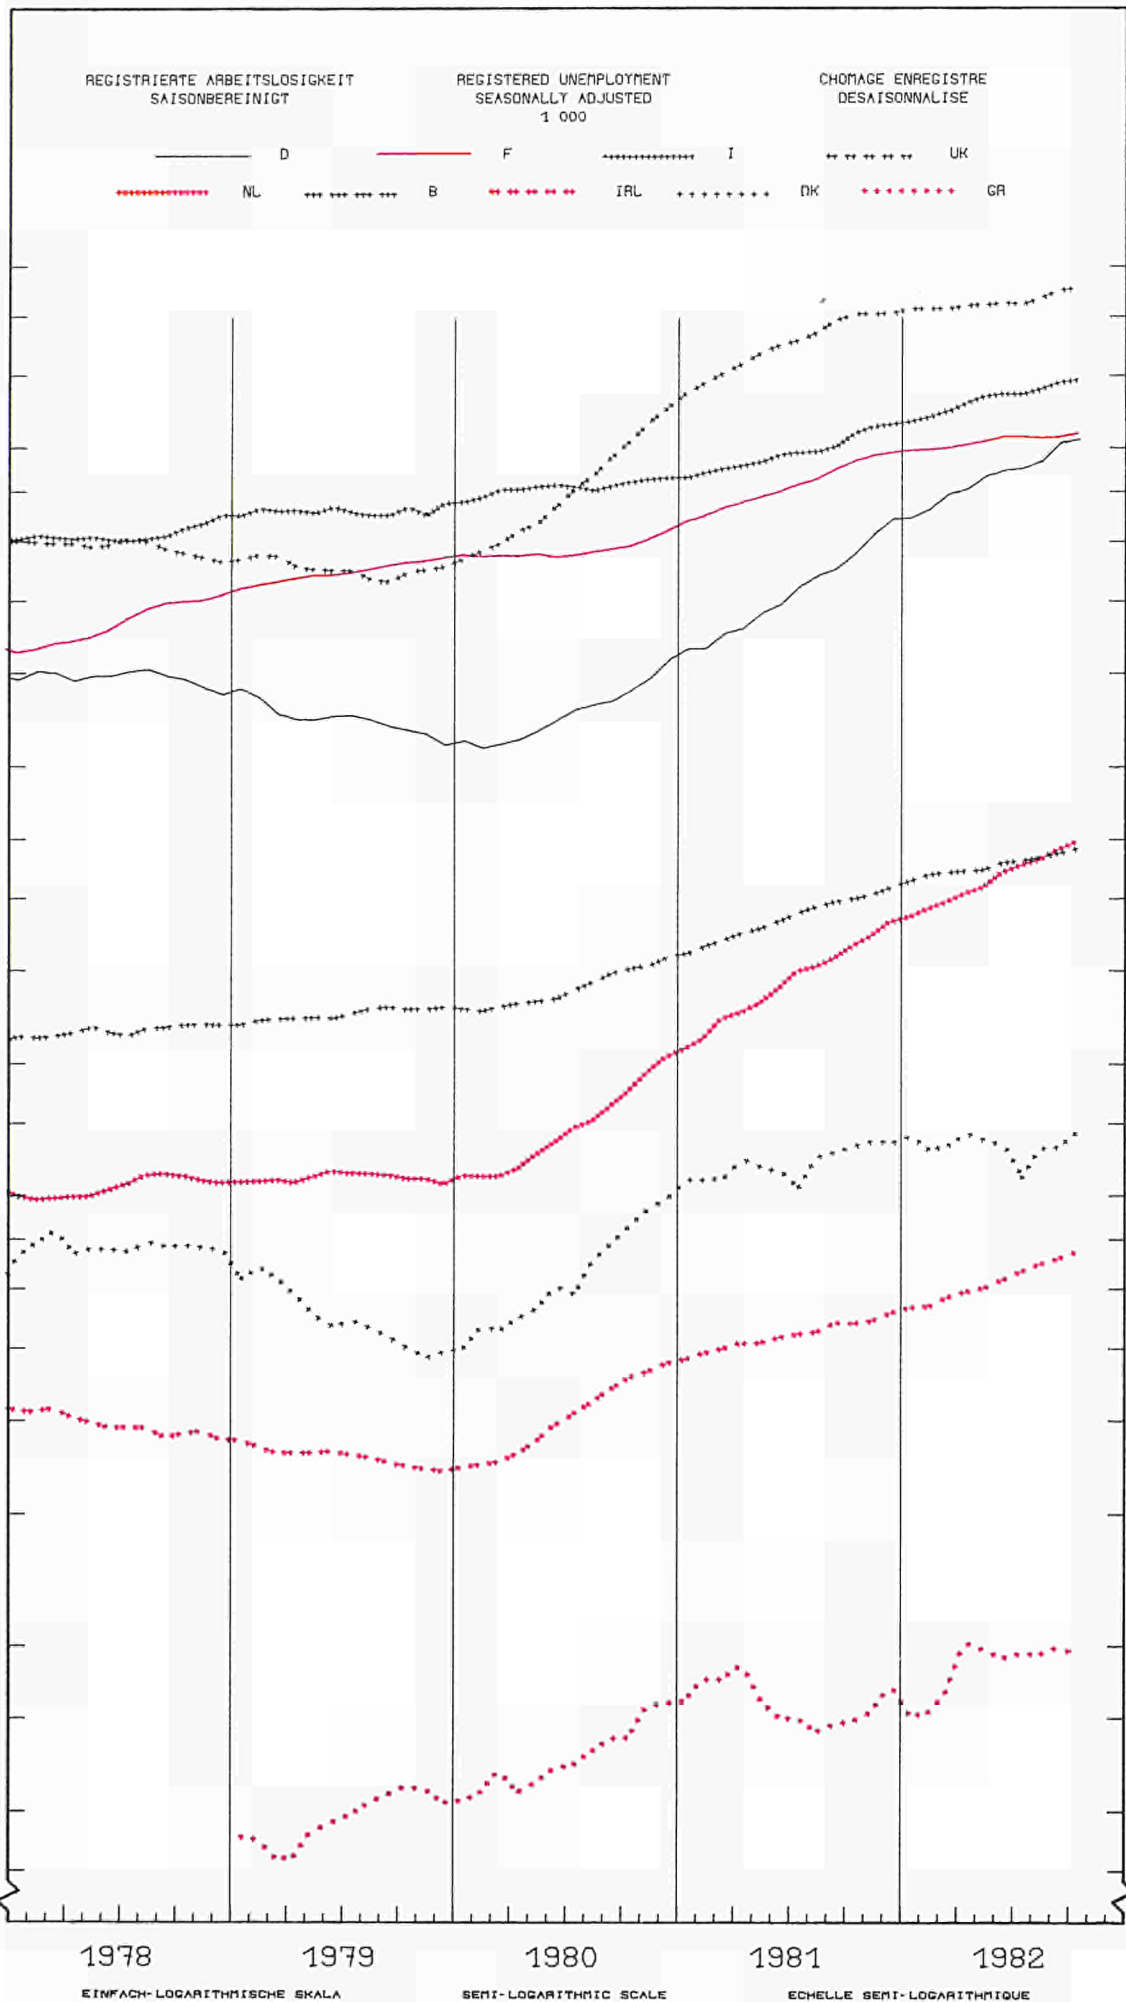

Note technique

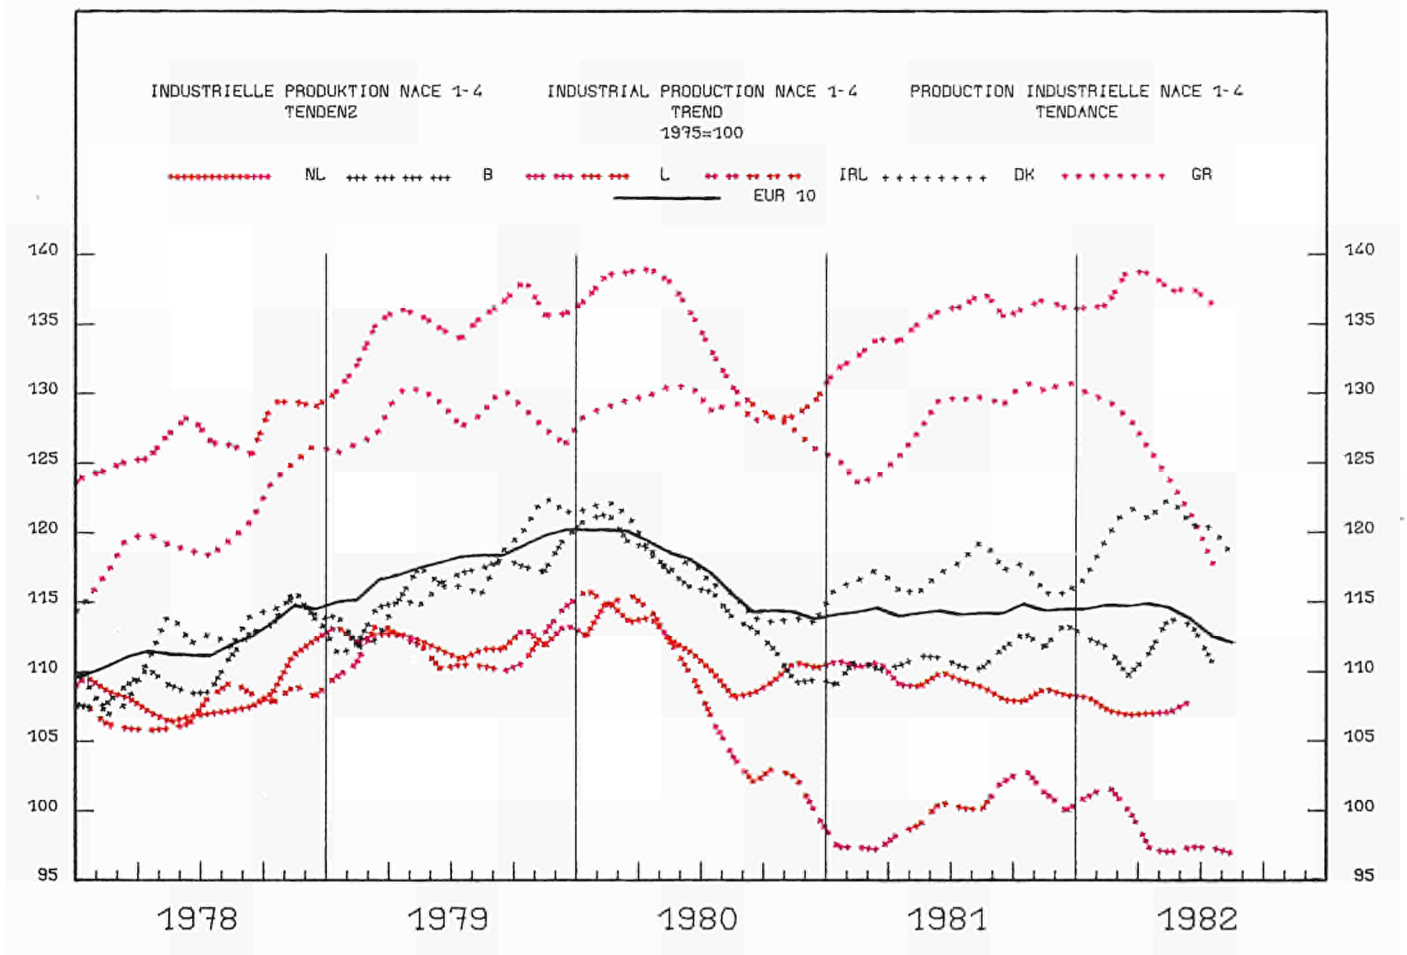

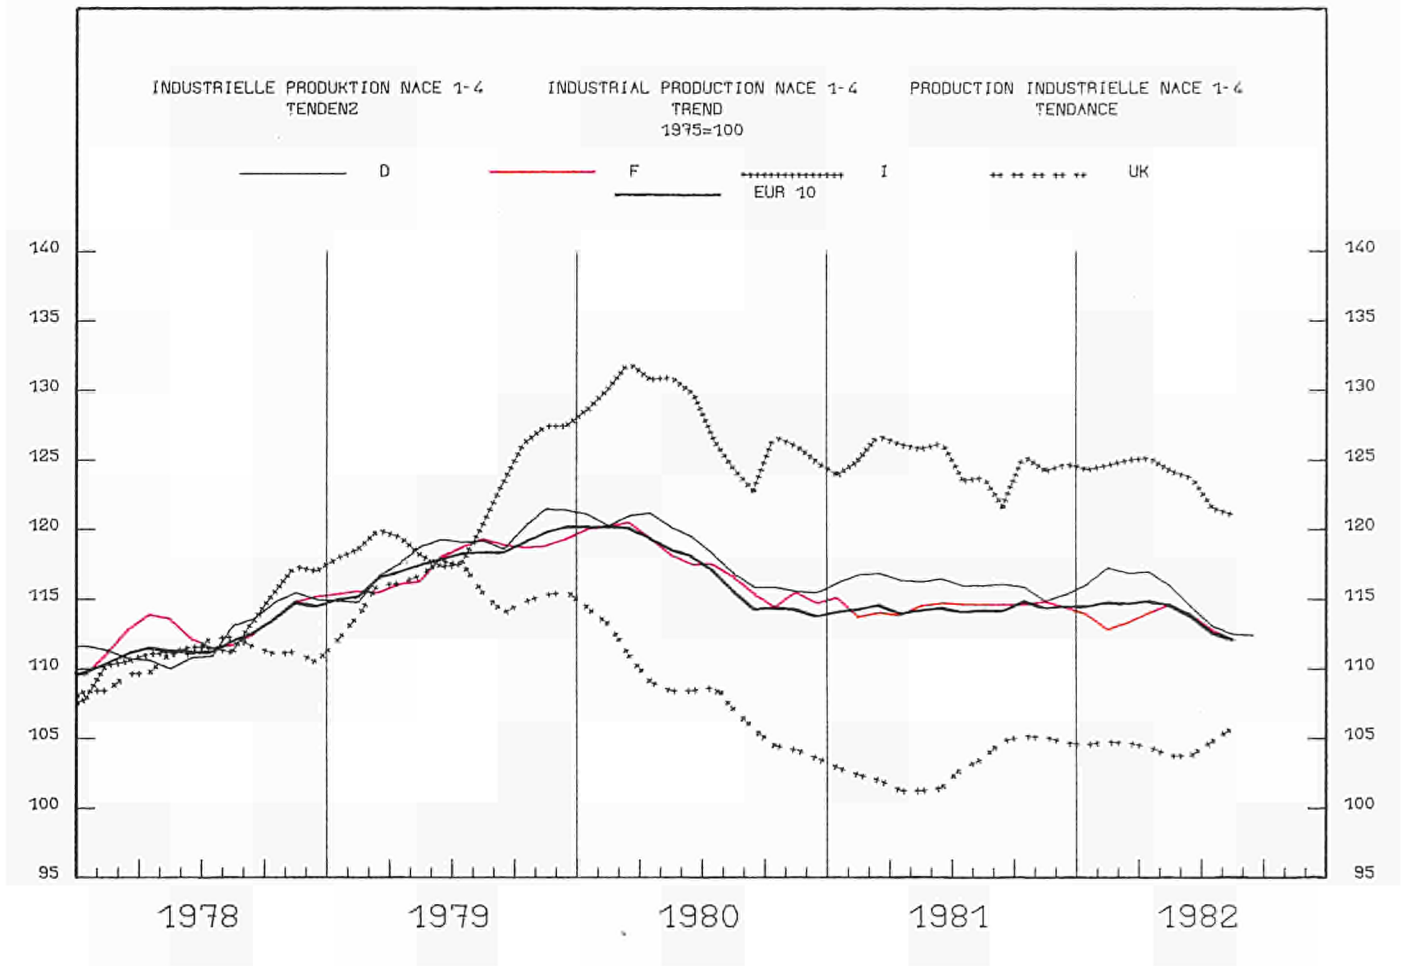

En raison des grèves dans les administrations publiques du Royaume-Uni, les chiffres pour le commerce extérieur de février à août 1982 ne sont pas disponibles pour ce pays et EUR 10. En outre la plupart des données du commerce extérieur pour la Grèce et EUR 10 ne peut pas être publiée pour des raisons techniques. Les séries seront complétées dès que possible.

Öffentliche Preise in Luxemburg (ohne MwSt.) □ Price (excluding VAT) in Luxembourg
 Prix publics au Luxembourg (TVA exclue)

	ECU	BFR	DM	FF	IRL	UKL	USD
Einzelpreis • Single copy • Prix par numéro	2,95	120	7,20	18	2	1,75	3,25
Abonnement • Subscription	23,32	950	57	142	16	13,80	27

Das Jahresabonnement beginnt am 1. Januar und endet am 31. Dezember.

The annual subscription runs from 1 January to 31 December of each year.

Les abonnements sont annuels; ils portent sur une période allant du 1^{er} janvier au 31 décembre de chaque année.

Zahlungen können nur an die auf Umschlagseite 3 angegebenen Vertriebsbüros geleistet werden.

Payments to be made only to the agents in the countries listed on page 3 of the cover.

Les versements doivent être adressés aux bureaux de vente indiqués à la page 3 de la couverture.

Die Versandkosten für Luftpostzustellung sind im Preis nicht enthalten. Die Bedingungen für Luftpostabonnements sind bei den Vertriebsbüros zu erfragen.

These are surface mail rates; for air subscription rates please apply to the agents.

Les prix ne comprennent pas les frais d'expédition par avion; pour les conditions d'abonnement par avion, consulter les bureaux de vente.
