Hinweis

Die Veröffentlichung Eurostatistik — Daten zur Konjunkturanalyse ist eine von drei Schlüsselveröffentlichungen des Eurostat, die dem Leser einen Überblick über die wichtigsten quantitativen Daten geben sollen, die für die Gemeinschaft und die Mitgliedstaaten zur Verfügung stehen. Die anderen Veröffentlichungen in dieser Reihe sind Statistische Grundzahlen mit Daten für ein bestimmtes Jahr sowie Eurostat-Revue mit einem Zehnjahresüberblick über die Gemeinschaft in Zahlen. Eine monatliche Veröffentlichung mit laufenden Wirtschaftsdaten muß ständig angepaßt und auf den neuesten Stand gebracht werden. Zu Beginn des Jahres 1982 wurde mit der Einbeziehung von Daten für Griechenland und der Abwandlung der Aufmachung eine bedeutende Änderung vorgenommen. Im Laufe des Jahres 1982 werden nach und nach Gesamtzahlen für die 10 Mitgliedstaaten der Gemeinschaft aufgenommen. Sobald genügend Daten zur Verfügung stehen, wird das Basisjahr 1975, das die Grundlage für diese Veröffentlichung bildet, durch das Jahr 1980 ersetzt werden. Zu einem späteren Zeitpunkt ist vorgesehen, Daten für die beiden beitragswilligen Länder Portugal und Spanien sowie für die Vereinigten Staaten und Japan hinzuzufügen. Es werden vier Arten von Daten in Eurostatistik veröffentlicht. Auf den Seiten 5 und 6 findet sich ein Artikel „Kurz notiert“, der sich mit den jüngsten Tendenzen bei den verfügbaren Daten befaßt. Die Seiten 15 bis 20 enthalten eine schematische Darstellung der wichtigsten wirtschaftlichen Reihen für die Gemeinschaft und die Mitgliedstaaten. Die Seite 23 ist die erste von 56 Seiten mit „Gemeinschaftstabellen“. Dieser Abschnitt enthält von Eurostat auf der Grundlage von Gemeinschaftskriterien harmonisierte Daten. Die neuesten Daten sind vorläufig und in einigen Fällen von Eurostat geschätzt. Schließlich enthält die Veröffentlichung noch einen Abschnitt „Ländertabellen“, der eine Auswahl der in jedem Land am häufigsten verwendeten Konjunkturindikatoren enthält. Hierbei handelt es sich um nationale Reihen auf der Grundlage nationaler Definitionen. Zu Vergleichszwecken ist auch eine Tabelle für die Vereinigten Staaten enthalten. In allen Fällen stehen auf Anfrage Zeitreihen über die Cronos-Datenbank des Eurostat zur Verfügung. Es werden außerdem statistische Bulletins über Arbeitslosigkeit, Preise, industrielle Produktion, Zahlungsbilanzen, Außenhandel und Energie monatlich oder vierteljährlich veröffentlicht. In Eurostatistik selbst ist ein absolutes Minimum an Erläuterungen zur Methodik enthalten. Ausführliche Informationen über Definitionen und Methodik sind bei Eurostat erhältlich. Eurostatistik wird am Ende eines jeden Monats in einer gemeinsamen Ausgabe für Deutsch, Englisch und Französisch veröffentlicht. Darüber hinaus steht auf Anfrage eine Ergänzung mit Übersetzung der Titel und der Erläuterungen ins Dänische, Griechische, Italienische und Niederländische zur Verfügung.

(1) Die in diesem Teil des Bulletins enthaltenen Angaben stellen die Ergebnisse der Konjunkturerhebung bei den Unternehmern in der Gemeinschaft dar. Ausführlichere Daten werden in „Europäische Wirtschaft“ veröffentlicht.

Eurostatistik : Kurz notiert

1. Arbeitslosigkeit — Keine Trendwende auf dem Arbeitsmarkt

Ende März 1983 waren bei den Arbeitsämtern der Gemeinschaft der Neun 12,1 Millionen Arbeitslose registriert, das entspricht einer Arbeitslosenquote von 10,9%. Trotz eines merklichen Rückgangs bei der Arbeitslosigkeit — die Abnahme gegenüber dem Vormonat macht bei den absoluten Zahlen immerhin 2,2% aus — lässt sich noch keine Trendwende auf dem Arbeitsmarkt feststellen. Die saisonbereinigten Werte steigen sowohl für die Gemeinschaft als auch für die meisten Mitgliedstaaten weiterhin an. Dabei scheinen sich allerdings die Zunahmen in den letzten Monaten langsam abzuschwächen. Bei einem Vergleich mit Ende Februar 1983 sind die Rückgänge bei den absoluten Zahlen besonders für Luxemburg (um -8,7%), die Bundesrepublik Deutschland (-5,9%) und für Dänemark (-5,3%) hervorzuheben. Für Frankreich und Belgien finden sich seit Januar 1983, während der Wintermonate also, Rückgänge mit zunehmender Tendenz, während Italien und Irland für denselben Zeitraum Zunahmen mit abnehmender Tendenz aufweisen.

Die höchste Arbeitslosigkeit findet sich seit Monaten in Irland mit einer Quote für März 1983 von 15,2%, gefolgt von den Niederlanden mit 14,3% und Belgien mit 13,8%.

Von Dezember 1982 bis März 1983 hat sich der Anteil der Arbeitslosen unter 25 Jahren von 38,9% auf 37,0% verringert. Diese Entwicklung findet sich in den meisten Mitgliedstaaten. Hervorzuheben sind dabei Luxemburg und Belgien, wo der Anteil von 47,3% auf 43,2% bzw. von 39% auf 36% sank. Junge Frauen sind besonders von der Arbeitslosigkeit betroffen. Der Anteil der arbeitslosen Frauen unter 25 Jahren an der Frauenarbeitslosigkeit in der Gemeinschaft der Neun machte Ende März 1983 44,3% aus. Das bedeutet, dass nahezu jede zweite arbeitslose Frau jünger als 25 Jahren ist. Bei den jungen Männern sieht das Verhältnis dagegen etwas günstiger aus. Der Anteil der arbeitslosen Männer unter 25 Jahren an der Männerarbeitslosigkeit in der Gemeinschaft der Neun betrug Ende März 1983 32,2%. Somit ist etwa jeder dritte arbeitslose Mann jünger als 25 Jahre.

2. Der Verbraucherpreisindex im März 1983

Der Verbraucherpreisindex stieg im März 1983 um 0,6%, das jährliche gleitende Mittel sank damit auf 9,0%. In den einzelnen Ländern waren sowohl Rückgänge (in Dänemark um -0,2% und in der Bundesrepublik Deutschland um -0,1%) als auch Anstiege (in Griechenland um 4,8%) zu verzeichnen. Niedrige jährliche Steigerungsraten werden aus den Niederlanden (2,8%), aus Deutschland (3,5%) und dem Vereinigten Königreich (4,6%) gemeldet. Auch der dänische Verbraucherpreisindex aht sich in den vergangenen Monaten erheblich langsamer entwickelt und steht nun bei 7,5%. Frankreich und Belgien (jeweils 9,0%) und Luxemburg (9,5%) liegen nahe am Gemeinschaftsdurchschnitt. Die höchsten Zahlen werden aus Griechenland (23,1%) und Italien (16,1%) gemeldet. In den Vereinigten Staaten liegt die vergleichbare Zahl bei 3,6%.

3. Industrieproduktion — Der Rückgang scheint sich nicht mehr fortzusetzen

Der vorläufige Gemeinschaftsindex (EUR 10) belief sich für den Monat Februar 1983 auf 116,9 und lag damit um 2,8% unter dem Wert für Februar 1982.

Nach Saisonbereinigung lag der Index für EUR 10 bei 111,2, d.h. auf dem gleichen Niveau wie im Januar 1983. Diese Entwicklung scheint darauf hinzudeuten, dass der Rückgang der industriellen Produktion Ende 1982 zum Stillstand gekommen ist.

Für einige Mitgliedstaaten ist ein leichter Anstieg der Produktion im Vergleich zum Dezember 1982 festzustellen, insbesondere in der Bundesrepublik Deutschland, in Frankreich, im Vereinigten Königreich und in den Niederlanden. In Italien hingegen scheint die Produktion immer noch leicht rückläufig.

4. Eisen und stahl

Die seit Anfang dieses Jahres zu beobachtende leichte Aufwärtstendenz der Rohstahlerzeugung in der Gemeinschaft hat sich auch im März 1983 fortgesetzt. Mit 9,7 Mio t (ohne Griechenland) war die Erzeugung — nach Saisonbereinigung — um 2,7% höher als im Vormonat. Dennoch wurde das vergleichbare Vorjahresergebnis deutlich unterschritten (-13,1%).

Der Auftragseingang (Massenstahl), der bereits in den vorangegangenen Monaten auf relativ niedrigem Niveau stagnierte, hat sich im Januar 1983 gegenüber Dezember 1982 saisonbereinigt um 5,4% verringert. Er war mit knapp 6,3 Mio t um 14,5% schwächer als vor Jahresfrist.

5. Die energiewirtschaft 1982 — Geringere abhaengigkeit gegenüber drittlaendern

Mit insgesamt 872 Mio t Rohöleinheiten (RÖE) fiel der Brutto-Energie-inlandsverbrauch der Gemeinschaft im Jahre 1982 gegenüber dem Vorjahr um 38 Mio t RÖE, d.h. um 4,1%, während das Bruttoinlandsprodukt geringfügig zunahm (+0,2%) und der private und öffentliche Verbrauch um 0,1% bzw. 0,8% stieg. Die Industrieproduktion der Gemeinschaft ging währenddessen um ca. 1,5% zurück.

Betrachtet man die Entwicklung des Bruttoinlandsverbrauchs, so ist bei den einzelnen Energieträgern der Gemeinschaft ausser bei der Kernenergie, die um 13,6% zunahm, ebenfalls ein Rückgang festzustellen, der je nach Energieträger sehr unterschiedlich ist. Die Ergebnisse reichen von -1,2% bei Braunkohle bis -4,2% bei Steinkohle und bis etwa -6% bei flüssigen und gasförmigen Kohlenwasserstoffen. Diese unterschiedlichen Entwicklungen führten zu Verschiebungen der Anteile der verschiedenen Energieträger am Gesamtenergieverbrauch. So ergab sich zwischen 1981 und 1982 bei Erdöl ein Rückgang um 1% (von 49,7% auf 48,7%), bei Naturgas um 0,5% (von 18,2% auf 17,8%) und bei der Kernenergie ein relativ grosser Anstieg von 6,2% auf 7,4%. Der Anteil der Kohle blieb mit 24,2% unverändert.

Die Steigerung der Primärenergieerzeugung um 7 Mio t RÖE,

d.h. um 1,4%, ist hauptsächlich auf die Zunahme bei Rohöl (+13,3%) und bei der Kernenergie (+13,6%) zurückzuführen, während die Naturgasförderung um 11 Mio t RÖE (-8,8%) zurückging.

Die schwache Energienachfrage sowie ein grösseres Aufkommen aus Gemeinschaftsquellen (britisches Rohöl und Kernenergie) führten zu einer zusätzlichen Verringerung der Abhängigkeit der Gemeinschaft von Energie lieferungen aus Drittländern, die von 47,5% im Jahre 1981 auf 45,6% im Jahre 1982 sank. Die Erdölabhängigkeit allein ging von 38,2% auf 36,1% zurück. Die Nettoeinfuhr (Einfuhr minus Ausfuhr) verringerte sich um nahezu 35 Mio t RÖE (-7,9%), davon entfielen 34 Mio t auf Rohöl, wie aus der Handelsbilanz hervorgeht, die ein Minus von 47 Mio t für Rohöl und ein Plus von 13 Mio t für Mineralölprodukte aufweist.

Hinter den auf den ersten Blick nur geringen Bestandsveränderungen (Einlagerung von 3,3 Mio t RÖE) verbergen sich bei den einzelnen Produkten jedoch sehr unterschiedliche Bewegungen: Einlagerung von 13,5 Mio t RÖE bei Steinkohle und Derivaten aufgrund von Schwierigkeiten beim Absatz der innergemeinschaftlichen Produktion von festen Brennstoffen sowie Lagerabbau um 12 Mio t RÖE bei Erdöl.

In den einzelnen Ländern ging der Brutto-Energieinlandsverbrauch zum dritten Mal in aufeinanderfolgenden Jahren allgemein zurück. Eine Ausnahme machte Griechenland, wo eine Zunahme um 2,5% festzustellen ist. Im Durchschnitt betrug der Verbrauchsrückgang in der Gemeinschaft 4%. Seine Bandbreite reichte aber von 0,2% in Dänemark bis 8% in den Niederlanden.

Jetzt schon aus diesen globalen Ergebnissen gezogene Schlussfolgerungen können nur sehr allgemeiner Natur sein. Auch unter Berücksichtigung der milden Witterung ist der Verbrauchsrückgang grösstenteils auf die schlechte Wirtschaftslage sowie die hohen Energiepreise zurückzuführen. Dennoch sollten weder die rationellere Energienutzung noch bestimmte Struktureinflüsse infolge der fortdauernden Krise in bestimmten Industriezweigen, die starke Energieabnehmer sind, übersehen werden.

6. Innergemeinschaftlicher Handel 1982

Der gesamte innergemeinschaftliche Handel belief sich 1982 auf 309 Milliarden ECU (Einfuhr auf cif-Basis), das entspricht einer Zunahme um 11,4% gegenüber 1981. Nach Produktgruppen aufgeschlüsselt ergibt sich folgendes Bild: Nahrungs- und Genussmittel, tierische und pflanzliche Fette: 14,0%;

Brennstoffe: 10,7%; sonstige Rohstoffe: 3,5%; chemische Erzeugnisse: 11,5%; Maschinen und Fahrzeuge: 27,5%; sonstige bearbeitete Waren: 29,2%. Bei Maschinen und Fahrzeugen sowie auf dem Nahrungsmittelsektor waren 1982 mit etwa 15% die grössten Steigerungen gegenüber dem Vorjahr zu verzeichnen.

Der innergemeinschaftliche Handel machte etwa 49% der gesamten Einfuhren der Mitgliedstaaten aus. In Irland (74%) und in Belgien/Luxemburg (61%) lag der Anteil erheblich über dem EG-Mittelwert, während im Vereinigten Königreich (41%) und in Italien (42%) die geringsten Anteile zu verzeichnen waren. Der innergemeinschaftliche Handel machte mehr als 70% der gesamten Ausfuhren der Niederlande, Belgiens/Luxemburgs und Irlands aus und mehr als 40% der gesamten Ausfuhren aller Mitgliedstaaten. Die hohen Zahlen für die beiden erstgenannten Länder sind teilweise auf Wiederausfuhren von Waren aus Nichtgemeinschaftsländern zurückzuführen.

Die Aufschlüsselung des innergemeinschaftlichen Handels nach Ausfuhrländern ergibt folgendes Bild: Deutschland (28%), die Niederlande (16%), Frankreich (15%), Vereinigtes Königreich (14%), Belgien/Luxemburg (12%), Italien (11%), Dänemark (3%), Irland (2%) und Griechenland (1%).

Folgende Länder waren führend bei der innergemeinschaftlichen Ausfuhr von bestimmten Warengruppen: Nahrungsmittel — die Niederlande und Frankreich; Genussmittel — Frankreich und die Niederlande; Rohstoffe ausser Brennstoffen — Frankreich und die Niederlande; Brennstoffe — die Niederlande und das Vereinigte Königreich tierische und pflanzliche Fette — Deutschland und die Niederlande; Maschinen und Fahrzeuge — Deutschland und Frankreich; sonstige bearbeitete Waren — Deutschland und Italien.

Die Handelsbilanz für den innergemeinschaftlichen Handel war im Jahre 1982 in drei Ländern positiv: in den Niederlanden (+14 Milliarden ECU), Deutschland (+9 Milliarden ECU) und Belgien/Luxemburg (+2 Milliarden ECU). In nur einem Mitgliedsland lag das Defizit über 3 Milliarden ECU (Frankreich mit einem Defizit von -14 Milliarden ECU).

Technischer Hinweis

Aus technischen Gründen zeigen die Angaben zur Zahlungsbilanz in den Tabellen 163-182 von Eurostatistik nicht den zu erwartenden neuesten Stand. Die jüngsten Zahlen können der Eurostat-Veröffentlichung «Zahlungsbilanzen — Vierteljahreszahlen» 3-4/82 entnommen werden.

Notice

Eurostatistics — data for short-term economic analysis is one of three key Eurostat publications designed to give the reader an overview of the most important quantitative information available for the Community and Member States. The other publications in this series are Basic Statistics giving data for a specific year, and Eurostat review with its summary of the Community in figures over the past 10 years.

A monthly publication with current economic data must be continually adapted and updated. At the beginning of 1982 a major modification took place with the inclusion of data for Greece and a change in presentation. Totals for the 10-member Community are being progressively introduced in 1982. Once sufficient data are available, the base year 1975 which is fundamental to this publication will be replaced with 1980. At a later stage it is planned to add data for the two applicant countries, Portugal and Spain, as well as for the United States and Japan.

Four kinds of information are published in Eurostatistics. Pages 9 and 10 offer an article 'In brief' which looks at the latest trends in the data available. Pages 15 to 20 provide the reader with a visual presentation of the most important economic series for the Community and the Member States. Starting on page 23 there are 56 pages of 'Community tables'. This section contains data harmonized by Eurostat on the basis of common criteria. The most recent data are provisional and in some cases estimated by Eurostat. Finally there is a section 'Tables by country' which contains a selection of economic indicators most often used in each country. These are national series based on national definitions. For comparison a table for the United States is also included.

For all series, historical data are available on request from Eurostat's data bank Cronos. Statistical bulletins on unemployment, prices, industrial production, balance of payments, external trade and energy are also published monthly or quarterly. Eurostatistics itself contains an absolute minimum of methodological notes. Detailed information on definitions and methodology may be obtained from Eurostat.

Eurostatistics is published at the end of each month in a single edition in German, English and French. A supplement with translations of titles and explanatory notes exists in Danish, Greek, Italian and Dutch, and it is available on request.

(1) The data included in this section of the bulletin are results from a short-term-trends enquiry conducted among heads of enterprises in the Community. More detailed data appear in *European Economy*.

Eurostatistics: In Brief

1. Unemployment — No change in labour market trends

At the end of March 1983 there were 12.1 million persons registered as unemployed at public employment offices in the Community of Nine, corresponding to an unemployment rate of 10.9%. Despite a substantial fall, amounting to 2.2% in the absolute figures of unemployment compared with the previous month, no change in the trend of the labour market situation can be detected. The seasonally adjusted figures continue to rise, both for the Community and for most Member States. However, within the last few months the rate of increase appears to be slowing down slightly.

By comparison with the end of February 1983 the fall in absolute numbers is most marked in the case of Luxembourg (-8.7%), Germany (-5.9%) and Denmark (-5.3%). In France and Belgium since January 1983, that is during the winter months, a reduction at an increasing rate is becoming evident while in Ireland and Italy in the same period the tendency is upward, although more slowly.

The highest rate of unemployment has been observed for some months in Ireland, the figure for March 1983 being 15.2%, followed by the Netherlands with 14.3% and Belgium with 13.8%.

Between December 1982 and March 1983, the share of the total unemployed aged under 25 years has declined from 38.9% to 37.0%. This development is taking place in most Member States, being most marked in Luxembourg and Belgium, where the proportions went down from 47.3% to 43.2% and from 39% to 36% respectively. Young women are particularly affected by unemployment. Women aged under 25 years accounted for 44.3% of the total of female unemployment in the Community of Nine at the end of March 1983. Thus almost one unemployed woman in every two was aged under 25 years. The proportion in the case of young men is more favourable. At the end of March 1983, men aged under 25 years represented 32.2% of the total of male unemployment in the Community of Nine. Thus about one unemployed man in every three is aged under 25 years.

2. The consumer price index in March 1983

The consumer price index rose by 0.6% in March 1983 bringing the twelve-monthly moving average down to 9.0%. Individual figures ranged from falls for Denmark (-0.2%) and Germany (-0.1%) to a rise of 4.8% in Greece. Low twelve-monthly rates are found in the Netherlands (2.8%), Germany (3.5%) and the United Kingdom (4.6%). The Danish consumer price index has also slowed considerably in recent months and now stands at 7.5%. At the Community average are France and Belgium (both 9.0%) and Luxembourg (9.5%). The highest figures are recorded in Greece (23.1%) and Italy (16.1%). The comparable figure for the United States is 3.6%.

3. Industrial production — The decline seems to have come to a halt

The provisional index for the Community (EUR 10) for the month of February 1983 stood at 116.9 which corresponds to a drop of 2.8% compared with February 1982.

After seasonal adjustment, the EUR 10 index reached 111.2 i.e. the same level as in January 1983, which would suggest that the decline in industrial production came to a halt at the end of 1982.

For several member states a slight upward movement in production compared with the level of December 1982 may be noted, particularly in Germany, France, the United Kingdom and the Netherlands. However, in Italy production would still seem to be falling a little.

4. Iron and steel

The slight tendency to a rise in the production of crude steel in the Community shown since the beginning of the year, has continued in the month of March 1983, for which, at 9.7 mio.t., the figure is 2.7% (deseasonalized) above the previous month; nevertheless its level remains 13.1% below the figure for March 1982.

New orders (ordinary steels), which had stabilized at a low level in the preceding months, have fallen still further in January 1983. At around 6.3 mio.t., they are 5.4% (deseasonalized) lower compared with the month of December 1982 and 14.5% lower compared with the month of January 1982.

5. The energy economy in 1982 — Falling external dependency

At a total of 872 million tonnes oil equivalent (toe), the Community's gross domestic energy consumption fell during 1982 by 38 million toe as compared with the previous year, i.e. a fall of 4.1%, whereas gross domestic product increased very slightly (+0.2%) and private and public consumption rose by 0.1% and 0.8% respectively. Industrial production in the Community contracted by approximately 1.5%.

Trends in gross domestic consumption of various kinds of energy similarly declined throughout the Community, with the exception of nuclear energy, which increased by 13.6%. These trends, however, vary quite considerably from one energy source to the other, ranging from -1.2% for lignite to -4.2% for coal, and to approximately -6% for liquid and gaseous hydrocarbons. These differing variations resulted in a redistribution of the proportion of the various energy sources in overall energy consumption; thus 1982 showed, as compared with 1981, a reduction of one percentage point for oil, which fell from 49.7% to 48.7%, half a percentage point for natural gas, from 18.2% to 17.8% and, on the contrary, a fairly notable increase in relative terms for nuclear energy, the proportion of which rose from 6.2% to 7.4%. The proportion of coal in total energy consumption remained unchanged at 24.2%.

The increase in the production of primary energy of 7 million toe, i.e. a rise of 1.4%, may be largely attributed to crude oil (+13.3%) and nuclear energy (+13.6%), whereas a decline

of 11 million toe (-8.8%) was registered in the production of natural gas.

The weak level of demand combined with greater availability of Community sources of energy (oil from the United Kingdom and nuclear energy) helped further to reduce the Community's dependence on non-Member States for energy supplies, which fell from 47.5% in 1981 to 45.6% in 1982, the figures for oil alone being a fall from 38.2% to 36.1%. Net imports (total imports minus exports) fell by almost 35 million toe (-7.9%), of which 34 million were accounted for by oil (made up of -47 million for crude oil and +13 million for petroleum products).

The apparent low level of changes in overall stocks (additions to stocks of 3.3 million toe) nevertheless conceals two quite different trends at the individual product level, that is to say: stock increases of 13.5 million toe for coal and its derivatives because of the difficulty of disposing of domestically produced solid fuels, and running down of stocks of 12 million toe in the case of oil.

At the level of individual countries, there was for the third year running a general decline in domestic energy consumption, with the exception of Greece, where a rise of 2.5% was recorded. The drop in consumption ranges from 0.2% for Denmark to 8% for the Netherlands, the Community average being about 4%.

The conclusions to be drawn at the present stage from these overall results can only be of a very general nature. Taking account of favourable climatic factors, the drop in consumption is largely to be attributed to the poor economic situation and the high cost of energy. Other factors which should not be ignored, however, are the more rational use of energy and certain structural effects due to the crisis in some industrial sectors which are major energy consumers.

6. Intra-EC Trade in 1982

Total intra-EC trade was 309 milliard ECUs in 1982 (imports c.i.f.), up 11.4% on 1981. The breakdown by product categories

was as follows: food, drink, tobacco, animal and vegetable oils: 14.0%; fuels 10.7%; other raw materials: 3.5%; chemicals: 11.5%; machinery and transport equipment: 27.5%; other manufactured goods: 29.2%. Machinery and transport equipment and food were the most buoyant sector in 1982 with rises of around 15% on the previous year.

Intra-EC trade represented about 49% of members' total imports. The proportion was substantially above the EC average for Ireland (74%) and Belgium-Luxembourg (61%), whilst the U.K. (41%) and Italy (42%) recorded the lowest proportions. Intra-EC trade accounted for over 70% of the total exports of the Netherlands, Belgium-Luxembourg and Ireland, and for over 40% of total exports of all member countries. The high figures for the first two countries are partially due to reexports of goods of non-Community origin.

The breakdown in intra-EC trade by exporting country was: Germany (28%), the Netherlands (16%), France (15%), U.K. (14%), Belgium-Luxembourg (12%), Italy (11%), Denmark (3%), Ireland (2%) and Greece (1%).

For particular product categories, the leading EC exporters were: Food — the Netherlands and France; drink and tobacco — France and the Netherlands; raw materials other than fuels — France and the Netherlands; fuels — the Netherlands and the U.K.; animal and vegetable oils — Germany and the Netherlands; machinery and transport equipment — Germany and France; other manufactured products — Germany and Italy.

Three countries had a positive trade balance on intra-EC trade in 1982. They were the Netherlands (+14 milliards ECU), Germany (+9 milliards ECU) and Belgium-Luxembourg (+2 milliards ECU). Only one country had a deficit exceeding 3 milliards ECU: France (-14 milliards ECU).

Technical note

For technical reasons the Balance of Payments data in tables 163-182 of Eurostatistics are not as up to date as they could be. The latest figures may be consulted in the Eurostat publications « Balance of Payments — Quarterly data » 3-4/82.

Avertissement

Eurostatistiques — données pour l'analyse de la conjoncture est l'une des trois publications clés d'Eurostat, destinées à donner au lecteur un aperçu des informations quantitatives les plus importantes disponibles concernant la Communauté et les États membres. Les autres publications de cette série sont les Statistiques de base fournissant des données pour une année spécifique déterminée et la Revue de l'Eurostat qui passe en revue dix ans de la Communauté sous forme de tableaux chiffrés.

Une publication mensuelle contenant des données économiques conjoncturelles d'actualité doit être continuellement adaptée et mise à jour. Au début de 1982, une modification importante est intervenue avec l'inclusion de données concernant la Grèce et un changement de présentation. Des totaux pour la Communauté de dix membres seront progressivement introduits en 1982. Lorsque l'on disposera de données en nombre suffisant, l'année 1975 — année de référence pour cette publication — sera remplacée par 1980. Il est prévu ultérieurement d'ajouter les données concernant les deux pays candidats à l'adhésion — à savoir l'Espagne et le Portugal — ainsi que pour les États-Unis et le Japon.

Eurostatistiques publie quatre types d'informations. Les pages 13 et 14 contiennent un article « En bref » dans lequel les dernières tendances pouvant être dégagées à partir des données disponibles sont examinées. Les pages 15 à 20 fournissent au lecteur une présentation visuelle des séries économiques les plus importantes pour la Communauté et les États membres. Des « tableaux communautaires » sont présentés sur 56 pages à partir de la page 23. Cette section contient des données harmonisées par Eurostat sur la base de critères communs. Les données les plus récentes sont provisoires et, dans certains cas, estimées par Eurostat. Enfin, la section « tableaux par pays » contient une sélection des indicateurs économiques les plus souvent utilisés dans chaque pays. Ce sont des séries nationales fondées sur des définitions nationales. A des fins de comparaison, un tableau concernant les États-Unis est également inclus.

Pour toutes les séries, des données historiques sont disponibles sur demande auprès de la banque de données d'Eurostat, CRONOS. Les bulletins statistiques sur le chômage, les prix, la production industrielle, la balance des paiements, le commerce extérieur et l'énergie sont également publiés sur une base mensuelle ou trimestrielle. En soi, Eurostatistiques contient un minimum de notes méthodologiques. Une information détaillée concernant les définitions et la méthodologie peut-être obtenue auprès d'Eurostat.

Eurostatistiques est publié à la fin de chaque mois dans une seule édition en allemand, anglais et français. Un supplément contenant les traductions des titres et des notes explicatives existe en danois, grec, italien et néerlandais et est disponible sur demande.

Eurostatistiques : En Bref

1. Chômage : Pas de changement sur le marché du travail

A la fin du mois de mars 1983, 12,1 millions de chômeurs étaient inscrits auprès des bureaux de placement dans la Communauté des Neuf. Ceci correspondait à un taux de chômage de 10,9% par rapport à la population active civile. Le nombre de chômeurs s'est ainsi réduit de 2,2% par rapport au mois précédent. Cette baisse est toutefois essentiellement saisonnière et n'indique pas de changement profond de la situation des marchés du travail. Les données corrigées des variations saisonnières continuent à augmenter pour la Communauté des Neuf et pour la plupart des États membres. L'ampleur de l'augmentation semble néanmoins se réduire au cours des derniers mois.

Par rapport à fin février 1983, la réduction du nombre absolu des chômeurs a été particulièrement important au Luxembourg (-8,7%), en Allemagne (-5,9%) et au Danemark (-5,3%). La France et la Belgique ont déjà connu des baisses croissantes du chômage au cours des trois derniers mois, donc en période d'hiver, alors qu'en Italie et en Irlande il existait toujours une augmentation, avec toutefois des valeurs décroissantes.

Le chômage le plus important est enregistré depuis plusieurs mois en Irlande avec un taux de chômage en mars 1983 de 15,2%, suivi pour les Pays-Bas avec 14,3% et la Belgique avec un taux de 13,8%.

De décembre 1982 à mars 1983 la part des chômeurs de moins de 25 ans dans le total des chômeurs s'est réduit de 38,9% à 37,0%. Une telle évolution est à constater dans la plupart des États membres, mais notamment au Luxembourg et en Belgique où la part a diminué respectivement de 47,3% à 43,2% et de 39,0% à 36,0%. Parmi les jeunes chômeurs, le nombre de femmes est important. La part des femmes de moins de 25 ans dans le total du chômage féminin s'élevait fin mars 1983 à 44,3%. Ceci signifie que près d'une femme sur deux inscrite au chômage avait moins de 25 ans. La relation est plus favorable parmi les hommes : la part des jeunes dans le total n'atteignait fin mars 1983 que 32,2%; un chômeur masculin sur trois était ainsi âgé de moins de 25 ans.

2. L'indice des prix à la consommation en mars 1983

L'indice de prix à la consommation s'est accru de 0,6% en mars 1983, portant ainsi la moyenne mobile annuelle à 9%. Les chiffres individuels vont d'une baisse pour le Danemark (-0,2%) et l'Allemagne (-0,1%) à une hausse de 4,8% pour la Grèce. De faibles taux annuels sont remarqués aux Pays-Bas (2,8%), Allemagne (3,5%) et au Royaume-Uni (4,6%). L'indice de prix à la consommation danois s'est aussi considérablement ralenti dans les derniers mois et s'établit maintenant à 7,5%.

La France et la Belgique (9,0%) et le Luxembourg (9,5%) se situent au taux moyen de la Communauté. Des chiffres élevés sont enregistrés en Grèce (23,1%) et en Italie (16,1%). Le chiffre comparable pour les USA est de 3,6%.

3. Indice de la production industrielle : la baisse de la production semble s'être arrêtée

L'indice pour la Communauté (EUR 10) provisoire, du mois de février 1983 s'établit à 116,9 ce qui correspond à une baisse de 2,8% par rapport à février 1982.

Après correction des variations saisonnières, l'indice EUR 10 est au niveau 111,2 c'est-à-dire au même niveau qu'en janvier 1983 ce qui semble confirmer qu'il y a bien un arrêt de la baisse de la production industrielle qui aurait atteint un niveau minimum à la fin de l'année 1982.

Pour plusieurs pays membres on constate une légère reprise de la production par rapport au niveau atteint en décembre 1982, en particulier en Allemagne, en France, au Royaume-Uni et aux Pays-Bas. Cependant en Italie la production serait encore en légère baisse.

4. Sidérurgie

La légère tendance à la hausse de la production d'acier brut dans la C.E. qui s'est manifestée depuis le début de l'année a continué au mois de mars 1983, qui avec 9,7 mio t. (sans la Grèce) est en augmentation de 2,7% (désaisonnalisée) par rapport au mois précédent; cependant son niveau reste inférieur de 13,1% à celui de mars 1982.

Les commandes nouvelles (acières courants) qui s'étaient stabilisées les mois précédents à un faible niveau ont encore diminué en janvier 1983. Avec environ 6,3 mio t. elles sont en baisse de 5,4% (désaisonnalisées) par rapport au mois de décembre 1982 et de 14,5% par rapport au mois de janvier 1982.

5. Énergie : L'économie énergétique en 1982

Avec un total de 872 millions de tonnes d'équivalent pétrole (tep), la consommation intérieure brute d'énergie de la Communauté a diminué en 1982 de 38 millions de tep par rapport à l'année précédente, soit -4,1%, alors que le produit intérieur brut a très légèrement augmenté (+0,2%) et que les consommations privées et publiques ont progressé de +0,1% et +0,8% respectivement. La production industrielle de la Communauté, quant à elle, enregistre une baisse de l'ordre de 1,5%.

Les évolutions des consommations intérieures brutes des différentes sources d'énergie accusent également une régression au niveau communautaire, à l'exception de celle relative à l'énergie nucléaire en progression de 13,6%. Cependant ces évolutions ont divergé assez sensiblement d'une source d'énergie à l'autre, allant de -1,2% pour le lignite à -4,2% pour la houille et à -6% environ pour les hydrocarbures liquides et gazeux. Ces différentes variations ont eu pour conséquence de modifier les parts des diverses sources d'énergie dans la consommation d'énergie globale; c'est ainsi qu'on observe, en 1982 comparativement à 1981, une réduction d'un point pour le pétrole qui est passé de 49,7% à 48,7%, d'un demi-point pour le gaz naturel passant de 18,2% à 17,8% et a contrario un accroissement relativement assez sensible du nucléaire qui a vu sa part

s'élever de 6,2% à 7,4%. Le charbon conserve une égale participation s'élevant à 24,2%.

L'augmentation de la production d'énergie primaire de 7 millions de tonnes d'équivalent pétrole (tep), soit +1,4% est à attribuer principalement au pétrole brut (+13,3%) et à l'énergie nucléaire (+13,6%), tandis qu'on enregistre une baisse de production de gaz naturel de 11 millions de tep (-8,8%).

La faiblesse de la demande conjuguée à une plus grande disponibilité des ressources communautaires (pétrole britannique et nucléaire) a entraîné une réduction supplémentaire de la dépendance énergétique de la Communauté vis-à-vis des fournitures extérieures, qui est tombée de 47,5% en 1981 à 45,6% en 1982 et, quand à la seule dépendance pétrolière, de 38,2% à 36,1%. En effet les importations nettes (importations moins exportations) ont baissé de près de 35 millions de tem (-7,9 %) dont 34 pour le pétrole, résultant d'un solde portant sur -47 millions pour le pétrole brut et +13 pour les produits pétroliers.

La faible variation apparente des stocks globaux (mises aux stocks de 3,3 millions de tep) cache toutefois des mouvements diversifiés au niveau des produits, à savoir : stockage de 13,5 millions de tep pour la houille et ses dérivés dû aux difficultés d'écoulement de la production indigène de combustibles solides et déstockage de 12 millions de tep pour le pétrole.

Au niveau des pays, pour la troisième année consécutive, la baisse de la consommation intérieure brute d'énergie a été générale, exception faite de la Grèce où l'on constate une hausse de 2,5%. Autour d'une moyenne communautaire de -4%, la régression de la consommation s'échelonne entre -0,2% pour le Danemark et -8% pour les Pays-Bas.

Les conclusions que l'on peut dégager dès à présent de ces résultats globaux ne peuvent être que très générales. Compte tenu d'un effet climatique favorable, la diminution de la consommation est à attribuer cependant en majeure partie à la mauvaise conjoncture économique ainsi qu'à la cherté de l'énergie. Néanmoins, il ne faut ignorer ni l'incidence d'une utilisation plus rationnelle de l'énergie ni certains effets de structure, dus à une situation de crise dans des branches industrielles fortes consommatrices d'énergie.

6. Commerce intra-communautaire en 1982

Le commerce total intra-CE était de 309 milliards d'ECUs en 1982 (importations C.A.F.), soit une augmentation de 11,4% par rapport à 1981. La ventilation par produits était la

suivante : produits alimentaires, boissons, tabac, huiles végétales et animales : 14,0%; produits énergétiques : 10,7%; autres matières brutes : 3,5%; produits chimiques : 11,5%; machines et matériel de transport : 27,5%; autres articles manufacturés : 29,2%. Les machines et matériel de transport et les produits alimentaires étaient les secteurs les plus actifs en 1982 avec un accroissement d'environ 15% sur l'année précédente.

Le commerce intra-CE représentait environ 49% des importations totales des pays membres. La proportion était nettement supérieure à la moyenne de la Communauté pour l'Irlande (74%) et pour Belgique-Luxembourg (61%), tandis que le Royaume-Uni (41%) et l'Italie (42%) enregistraient les parts les plus faibles.

Le commerce intra-CE compte pour plus de 70% dans les exportations totales des Pays-Bas, Belgique-Luxembourg et Irlande, et pour plus de 40% dans les exportations totales de tous les pays membres. Les chiffres élevés pour les deux premiers pays étaient partiellement dus à la réexportation de biens d'origine non communautaire.

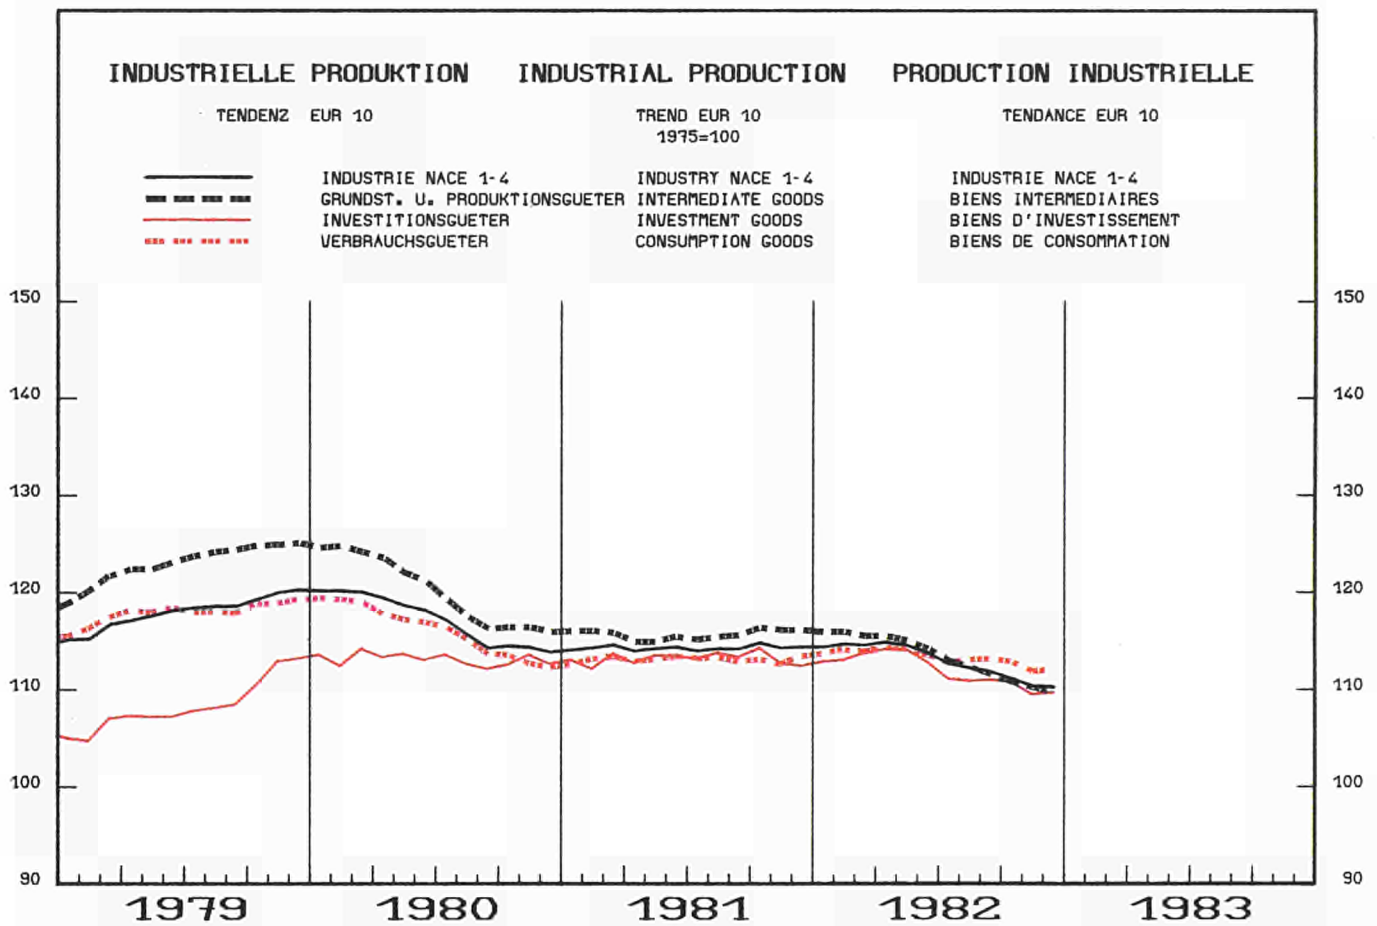

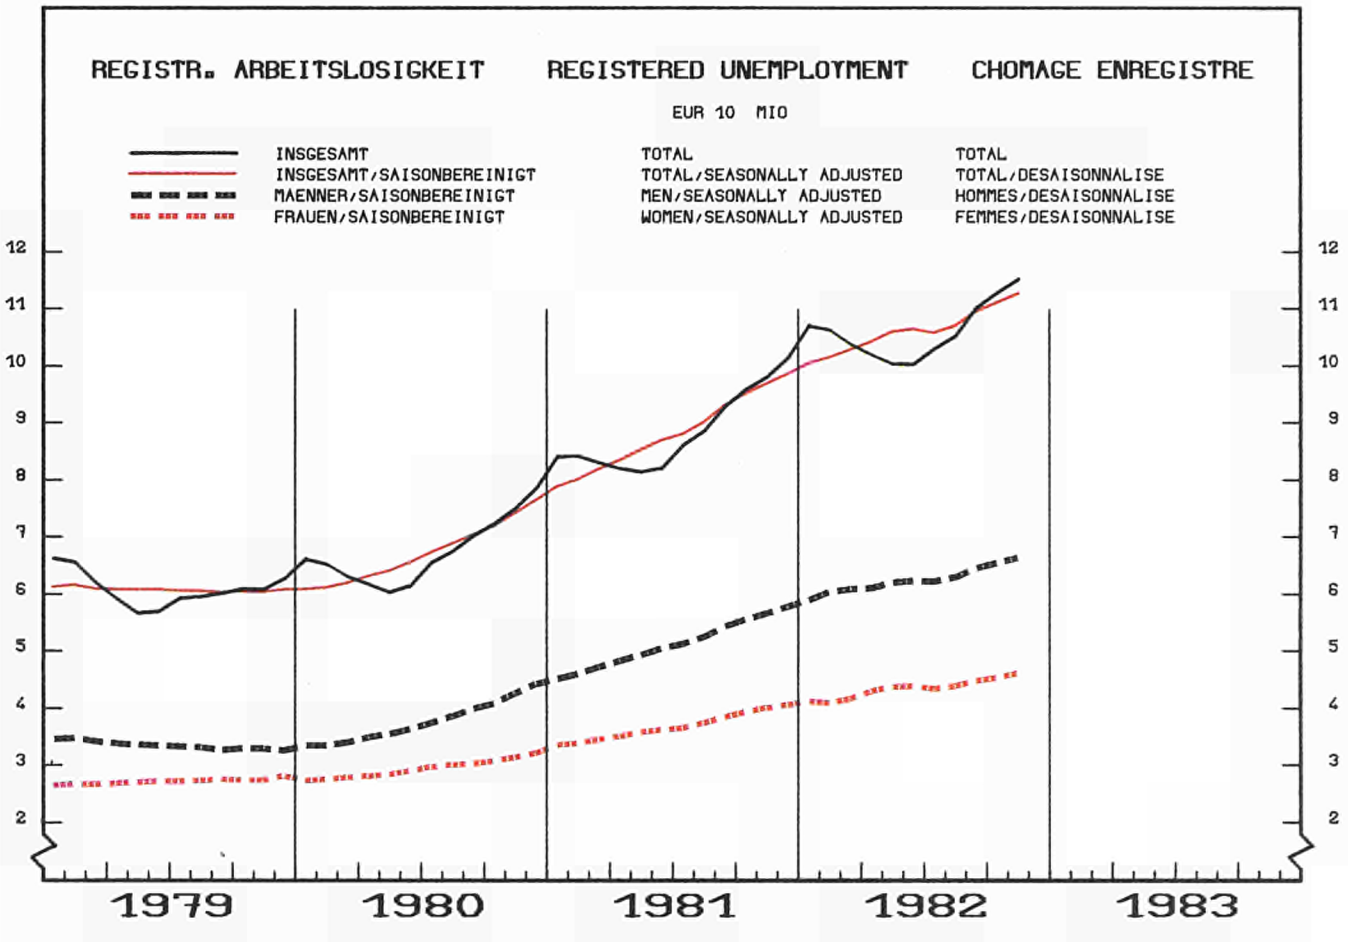

La ventilation du commerce intra-CE par pays exportateurs était : Allemagne (28%), Pays-Bas (16%), France (15%), Royaume-Uni (14%), Belgique-Luxembourg (12%), Italie (11%), Danemark (3%), Irlande (2%) et Grèce (1%).

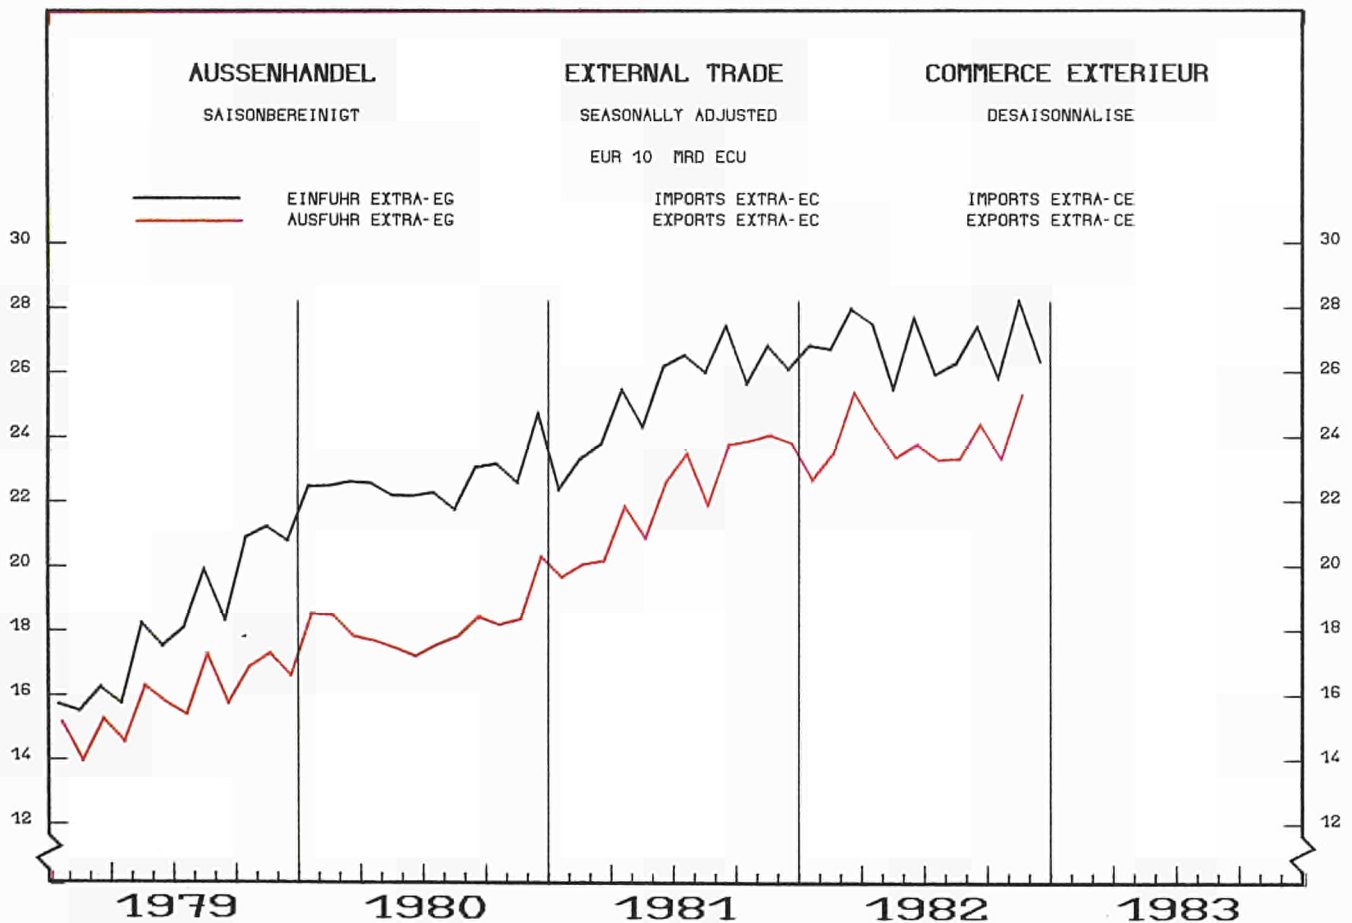

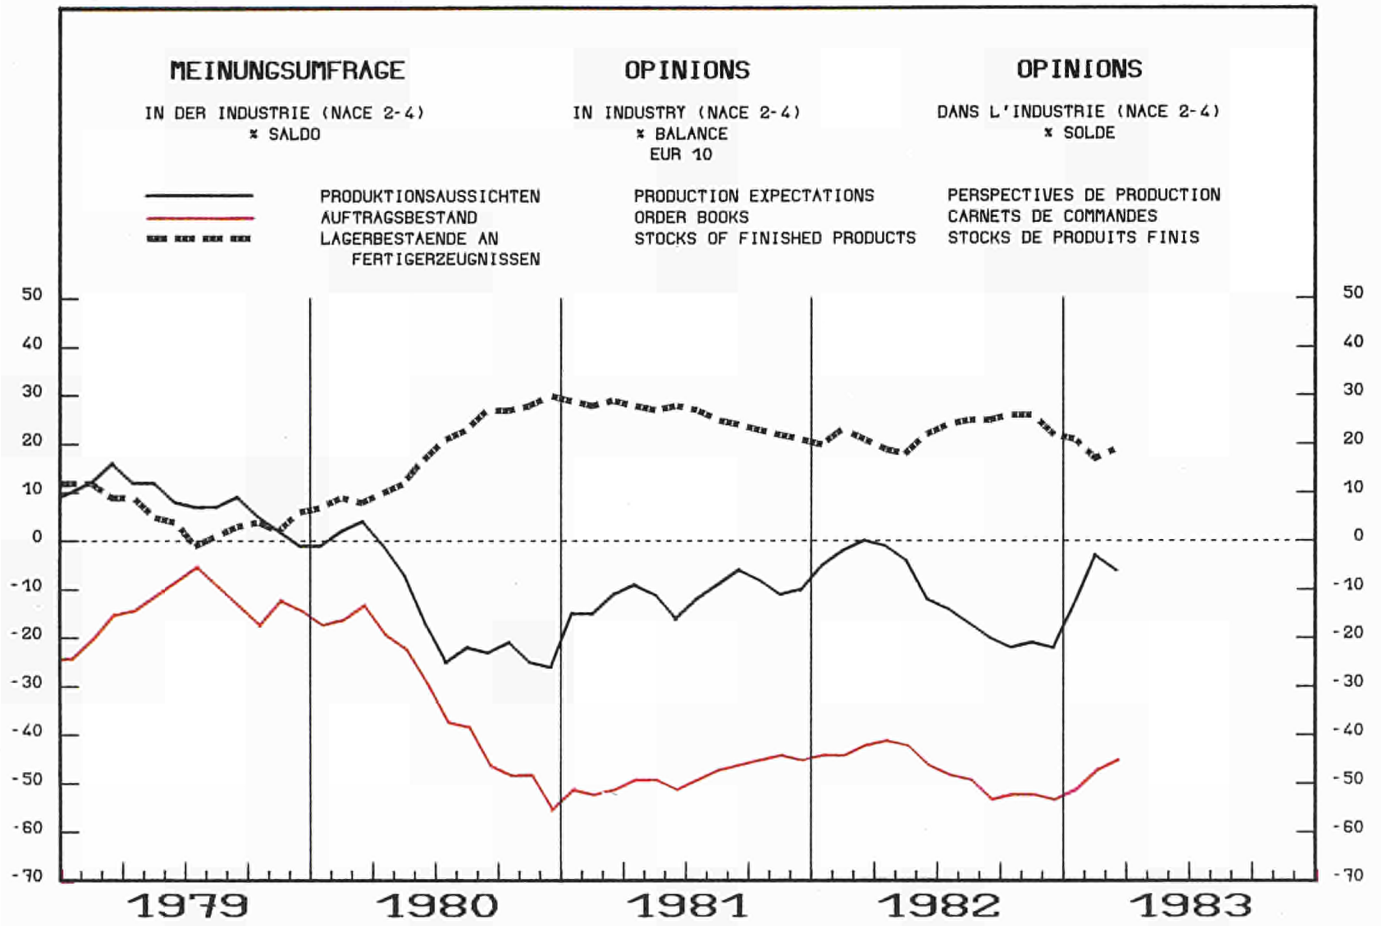

Pour certaines catégories de produits, les premiers exportateurs de la Communauté étaient : Produits alimentaires — Pays-Bas et France; boissons et tabac — France et Pays-Bas; matières brutes autres qu'énergétiques — France et Pays-Bas; produits énergétiques — Pays-Bas et Royaume-Uni; huiles végétales et animales — Allemagne et Pays-Bas; machines et matériel de transport — Allemagne et France; autres articles manufacturés — Allemagne et Italie.

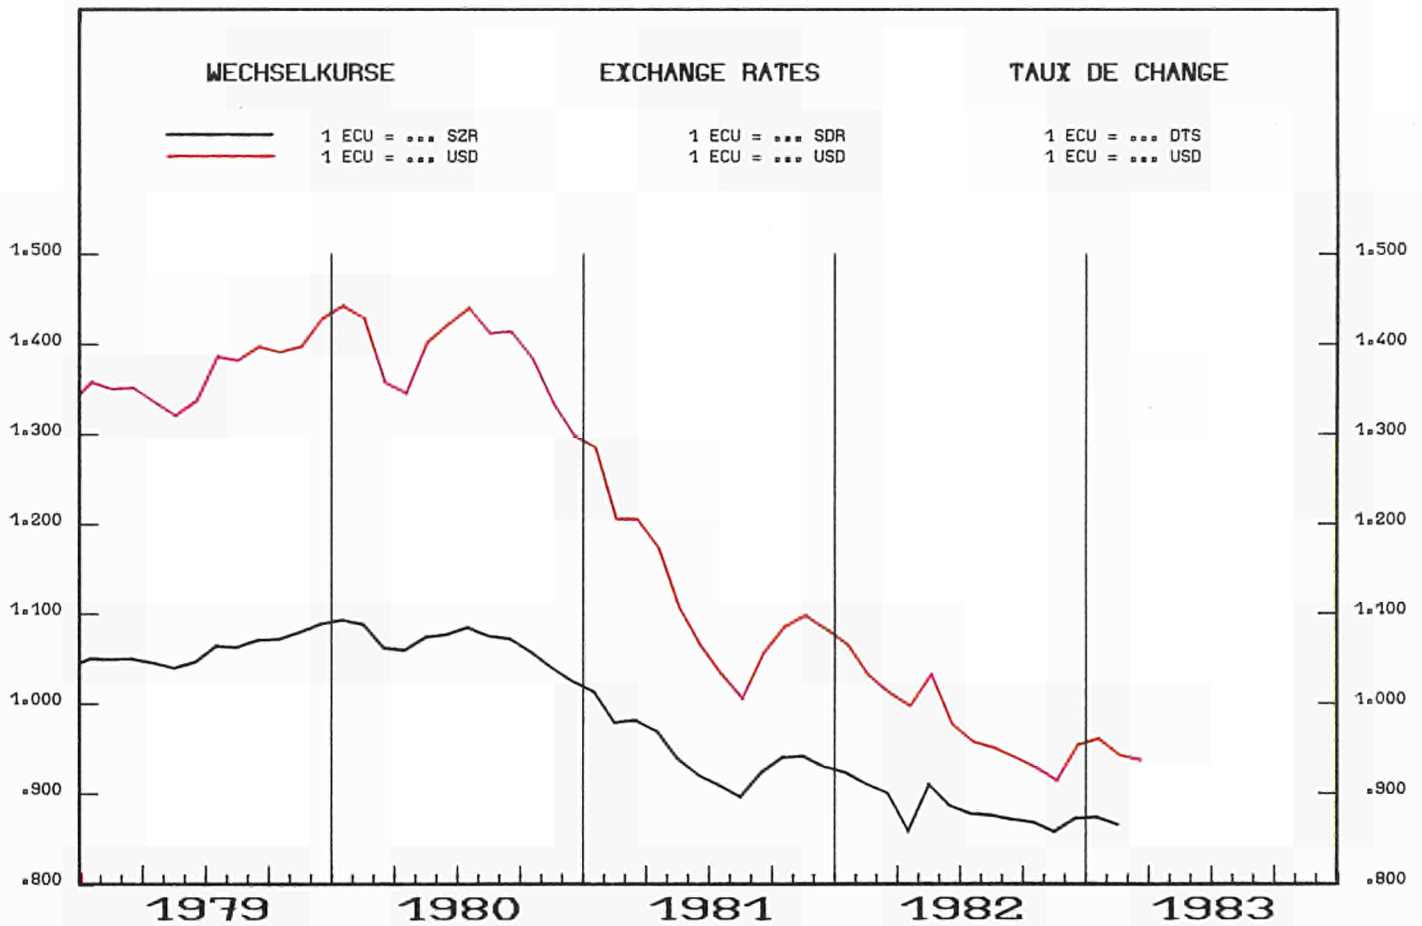

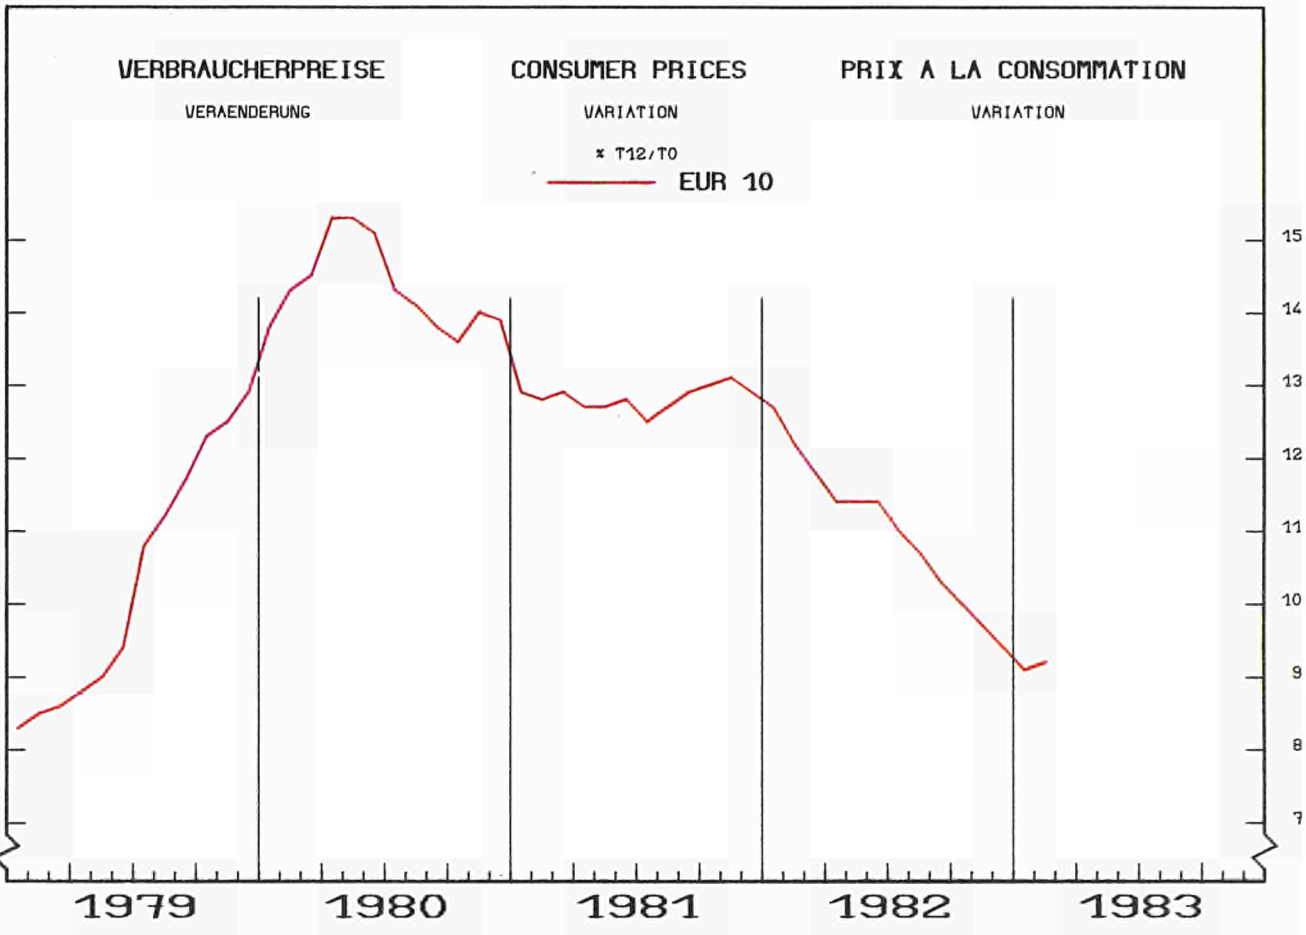

Trois pays avaient une balance commerciale positive pour le commerce intra-CE en 1982. Il s'agissait des Pays-Bas (+14 milliards d'ECU), Allemagne (+9 milliards ECU) et Belgique-Luxembourg (+2 milliards ECU). Un seul pays avait un déficit dépassant les 3 milliards ECU : France (-14 milliards ECU).

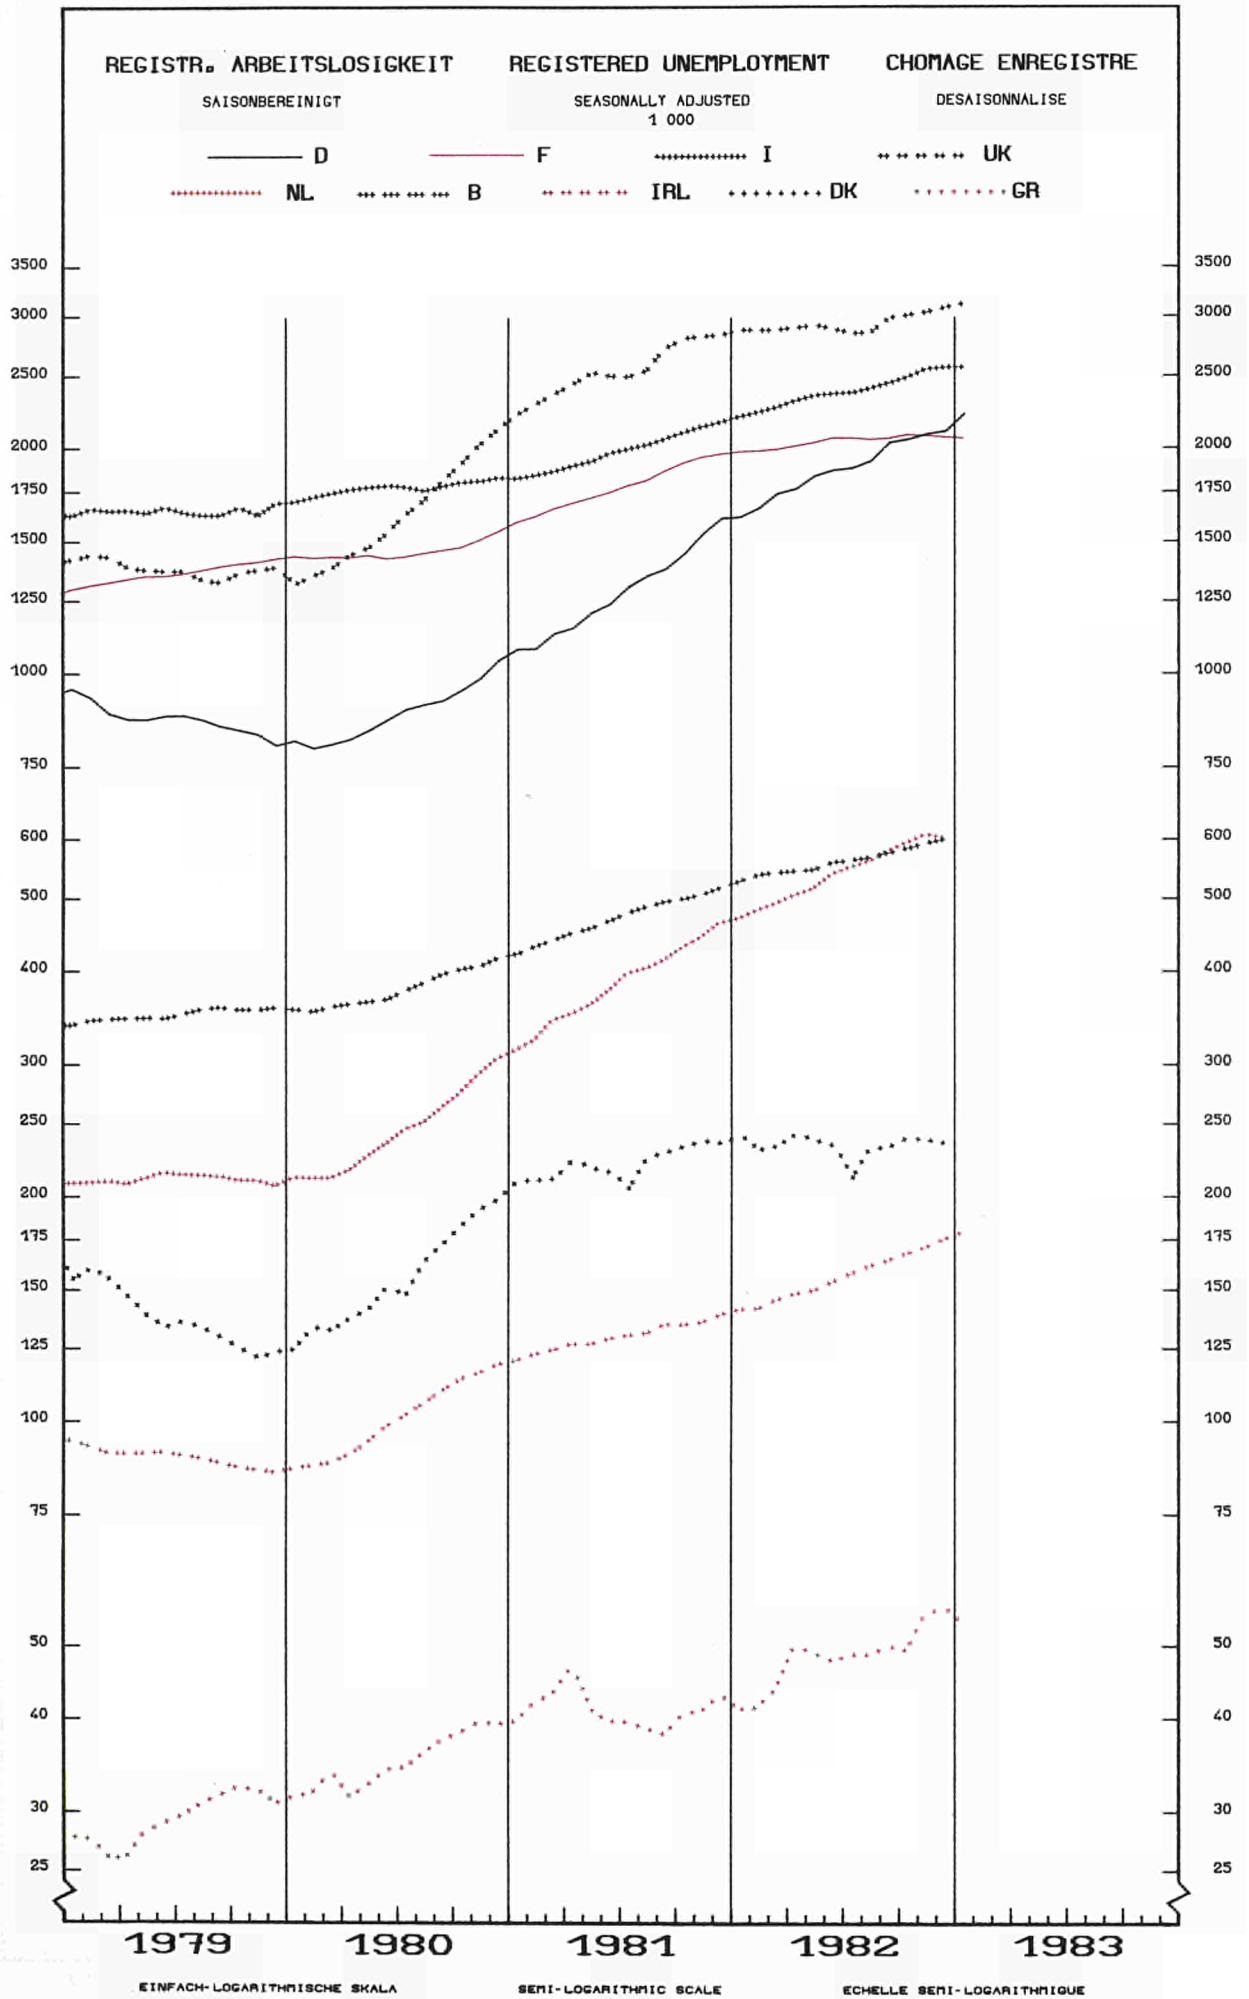

Note technique

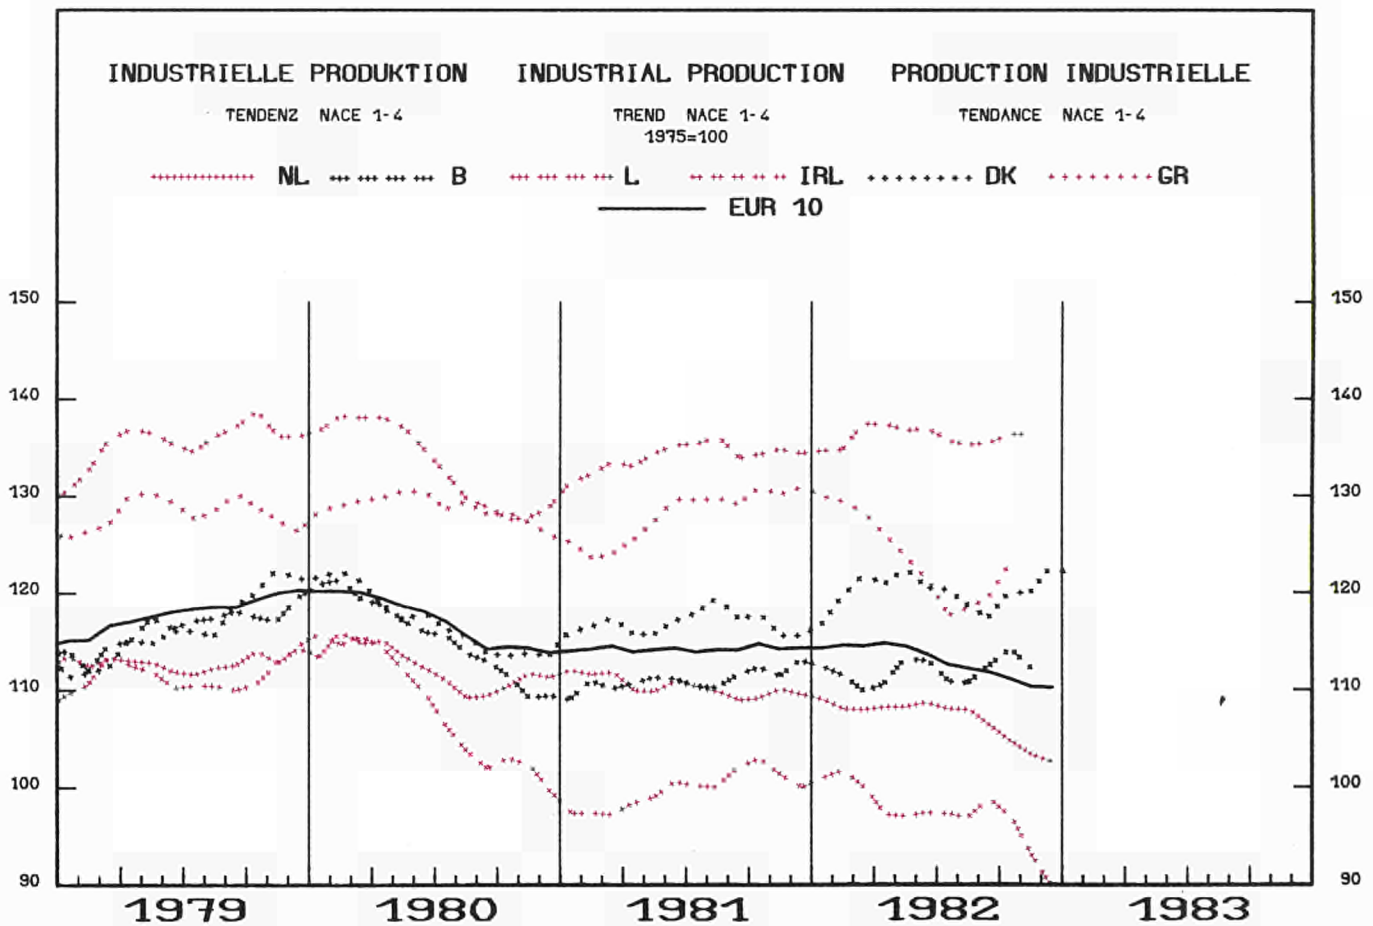

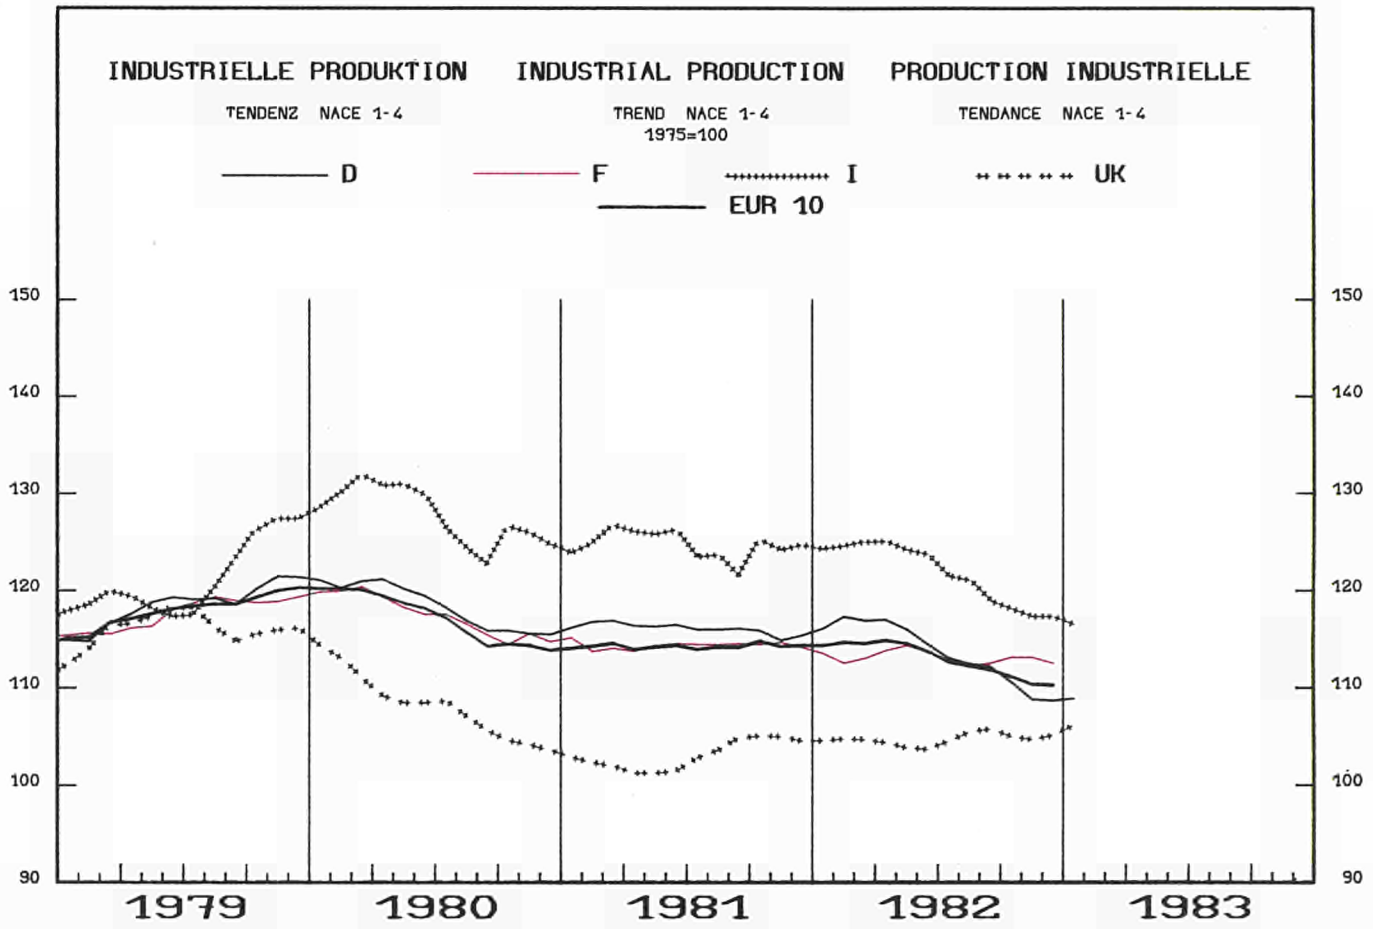

Pour des raisons techniques les données sur la balance des paiements des tableaux 163-182 d'Eurostatistiques ne sont pas aussi à jour qu'elles le devraient. Les derniers chiffres peuvent être consultés dans la publication Eurostat « Balance des paiements — Données trimestrielles » 3-4/1982.

Das Jahresabonnement beginnt
 am 1. Januar und
 endet am 31. Dezember.

The annual subscription runs
 from 1 January to
 31 December of each year.

Les abonnements sont annuels; ils portent sur
 une période allant du 1^{er} janvier au 31 décembre
 de chaque année.

Zahlungen können nur an die
 auf Umschlagseite 3 angegebenen
 Vertriebsbüros geleistet werden.

Payments to be made only to the agents
 in the countries listed on page 3
 of the cover.

Les versements doivent être adressés
 aux bureaux de vente indiqués à la page 3
 de la couverture.

Die Versandkosten für Luftpostzustellung sind im
 Preis nicht enthalten. Die Bedingungen für Luftpost-
 abonnements sind bei den Vertriebsbüros zu erfragen.

These are surface mail rates:
 for air subscription rates
 please apply to the agents.

Les prix ne comprennent pas les frais
 d'expédition par avion; pour les conditions d'abonnement
 par avion, consulter les bureaux de vente.
