Hinweis

Die Veröffentlichung Eurostatistik — Daten zur Konjunkturanalyse ist eine von drei Schlüsselveröffentlichungen des Eurostat, die dem Leser einen Überblick über die wichtigsten quantitativen Daten geben sollen, die für die Gemeinschaft und die Mitgliedstaaten zur Verfügung stehen. Die anderen Veröffentlichungen in dieser Reihe sind Statistische Grundzahlen mit Daten für ein bestimmtes Jahr sowie Eurostat-Revue mit einem Zehnjahresüberblick über die Gemeinschaft in Zahlen. Eine monatliche Veröffentlichung mit laufenden Wirtschaftsdaten muß ständig angepaßt und auf den neuesten Stand gebracht werden. Zu Beginn des Jahres 1982 wurde mit der Einbeziehung von Daten für Griechenland und der Abwandlung der Aufmachung eine bedeutende Änderung vorgenommen. Im Laufe des Jahres 1982 werden nach und nach Gesamtzahlen für die 10 Mitgliedstaaten der Gemeinschaft aufgenommen. Sobald genügend Daten zur Verfügung stehen, wird das Basisjahr 1975, das die Grundlage für diese Veröffentlichung bildet, durch das Jahr 1980 ersetzt werden. Zu einem späteren Zeitpunkt ist vorgesehen, Daten für die beiden beitrittswilligen Länder Portugal und Spanien sowie für die Vereinigten Staaten und Japan hinzuzufügen. Es werden vier Arten von Daten in Eurostatistik veröffentlicht. Auf den Seiten 5 und 6 findet sich ein Artikel „Kurz notiert“, der sich mit den jüngsten Tendenzen bei den verfügbaren Daten befaßt. Die Seiten 15 bis 20 enthalten eine schematische Darstellung der wichtigsten wirtschaftlichen Reihen für die Gemeinschaft und die Mitgliedstaaten. Die Seite 23 ist die erste von 56 Seiten mit „Gemeinschaftstabellen“. Dieser Abschnitt enthält von Eurostat auf der Grundlage von Gemeinschaftskriterien harmonisierte Daten. Die neuesten Daten sind vorläufig und in einigen Fällen von Eurostat geschätzt. Schließlich enthält die Veröffentlichung noch einen Abschnitt „Ländertabellen“, der eine Auswahl der in jedem Land am häufigsten verwendeten Konjunkturindikatoren enthält. Hierbei handelt es sich um nationale Reihen auf der Grundlage nationaler Definitionen. Zu Vergleichszwecken ist auch eine Tabelle für die Vereinigten Staaten enthalten. In allen Fällen stehen auf Anfrage Zeitreihen über die Cronos-Datenbank des Eurostat zur Verfügung. Es werden außerdem statistische Bulletins über Arbeitslosigkeit, Preise, industrielle Produktion, Zahlungsbilanzen, Außenhandel und Energie monatlich oder vierteljährlich veröffentlicht. In Eurostatistik selbst ist ein absolutes Minimum an Erläuterungen zur Methodik enthalten. Ausführliche Informationen über Definitionen und Methodik sind bei Eurostat erhältlich. Eurostatistik wird am Ende eines jeden Monats in einer gemeinsamen Ausgabe für Deutsch, Englisch und Französisch veröffentlicht. Darüber hinaus steht auf Anfrage eine Ergänzung mit Übersetzung der Titel und der Erläuterungen ins Dänische, Griechische, Italienische und Niederländische zur Verfügung.

Eurostatistik : Kurz notiert

1. Arbeitslosigkeit

Ende April 1983 waren 11,9 Millionen Personen bei den Arbeitsämtern der Gemeinschaft der Neun als arbeitslos gemeldet. Damit betrug die Arbeitslosenquote gemessen an den zivilen Erwerbspersonen 10,7%. In absoluten Zahlen ging die Arbeitslosigkeit gegenüber dem Vormonat um 2% zurück, dies ist hauptsächlich auf saisonbedingte Faktoren zurückzuführen. Die saisonbereinigten Zahlen ergeben jedoch erneut einen geringen Anstieg der Arbeitslosigkeit in der Gemeinschaft der Neun verglichen mit Ende März 1983.

Im Vergleich zum April 1982 ist die Zahl der Arbeitslosen im Durchschnitt der Europäischen Gemeinschaft um 16% gestiegen; in der Bundesrepublik Deutschland war ein Anstieg um 32%, in den Niederlanden um 28% und in Irland um 27% zu verzeichnen. Für die übrigen Mitgliedstaaten entspricht der Anstieg der Arbeitslosigkeit etwa dem Gemeinschaftsdurchschnitt, mit Ausnahme von Frankreich, wo es praktisch gelungen ist, die Arbeitslosigkeit auf dem Stand des letzten Jahres zu halten.

Dieser Anstieg der Arbeitslosigkeit gegenüber April 1982 betrifft die Männer stärker (+17,5%) als die Frauen (+13,9%). Die Arbeitslosenquoten rückten näher aneinander, sie beträgt nunmehr 11,3% für die Frauen und 10,4% für die Männer. Die Stabilisierung der Arbeitslosigkeit in Frankreich hat dazu geführt, daß, mit Ausnahme von Luxemburg, Frankreich bei den Männern mit 7,3% die niedrigste Arbeitslosenquote in der Gemeinschaft der Neun aufweist. Diese Quote liegt im Vereinigten Königreich und in den Niederlanden bei fast 15%, in Irland bei fast 16%.

Da die Schulabgänger dieses Jahres noch nicht auf den Arbeitsmarkt drängen, ist die Zahl der jüngeren Arbeitslosen unter 25 Jahren etwa auf dem Niveau des Vormonats geblieben.

In Griechenland, dessen unterschiedliche Beschäftigungsstruktur keinen Vergleich mit den übrigen Mitgliedstaaten erlaubt, ist die Zahl der Arbeitslosen im Vergleich zum Vorjahresmonat um 26% gestiegen.

2. Der Verbraucherpreisindex im April 1983

Der Verbraucherpreisindex für die Gemeinschaft stieg zwischen März und April 1983 durchschnittlich um 1,0%; dieser relativ starke Anstieg ist in einigen Ländern hauptsächlich auf saisonbedingte Faktoren zurückzuführen. Der Anstieg des Gemeinschaftsindex spiegelt starke Steigerungen in Griechenland (1,7%), in Frankreich und im Vereinigten Königreich (jeweils 1,4%) sowie in Italien (1,0%) wider, während aus anderen Ländern ein Anstieg um 0,2% bis 0,6% gemeldet werden.

Die anhand des Verbraucherpreisindex ermittelte Inflationsrate betrug für die gesamte Gemeinschaft in den letzten 12 Monaten bis Ende April 8,7%, dies ist der niedrigste Anstieg seit mehr als 4 Jahren (März 1979 : 8,6%).

3. Index der Industriellen Produktion im März 1983

Der vorläufige Gemeinschaftsindex (EUR 10) belief sich im März 1983 auf 116,3 und lag damit um 3,4% unter dem Wert von März 1982.

Nach Saisonbereinigung lag der Index für EUR 10 bei 109,7, d.h. um 1,2% niedriger als im Februar 1983; diese Entwicklung scheint zu bestätigen, daß der Aufschwung gegenwärtig immer noch nicht feststellbar ist, auch wenn sich der Rückgang der industriellen Produktion, die Ende 1982 den tiefsten Stand erreicht haben dürfte, nicht mehr fortsetzt.

In der Bundesrepublik Deutschland, in Frankreich und im Vereinigten Königreich ist im März ein Rückgang gegenüber den beiden Vormonaten festzustellen, in Italien war der niedrigste Stand seit mehr als vier Jahren zu beobachten.

4. Eisen und Stahl

Nach der leicht ansteigenden Tendenz während des ersten Vierteljahres 1983 ist die Rohstahlerzeugung der EG (ohne Griechenland) im April gegenüber März 1983 saisonbereinigt um 1,1% auf 9,0 Mio t zurückgegangen. Sie lag damit um 14,4% unter der im April des Vorjahres erzeugten Menge. Der Auftragseingang für Massenschlamm hat von Januar auf Februar saisonbereinigt um 8,6% zugenommen, blieb aber mit knapp 6,6 Mio t um 6,0% unter dem vergleichbaren Vorjahresniveau.

5. Energiewirtschaft — Kraftwirtschaftlicher Betrieb der Kernkraftwerke im Jahre 1982

Im Vergleich zu den Vorjahren, in denen die Zahl der Kernkraftwerke ausserordentlich stark zunahm, kann das Jahr 1982 als ein Jahr der Konsolidierung betrachtet werden. 1982 wurden nur drei neue Kraftwerke (zwei in Frankreich, eines in Belgien) mit insgesamt 2 680 MW netto in Betrieb genommen. Berücksichtigt man daneben die Berichtigungen, erreichte die gesamte Nettoengpaßleistung der Gemeinschaft zum Jahresende 44 000 MW, das entspricht einer Zunahme um 6,3% gegenüber Ende 1981.

In der Gemeinschaft wurden aus Kernkraft 227 000 GWh netto an Elektrizität gewonnen. Die Steigerung um 12,1% gegenüber 1981 deutet auf eine allgemeine Verbesserung im Betrieb der Kernkraftwerke hin. Die entsprechenden Werte für den Arbeitsverfügbarkeits- und den Ausnutzungsfaktor lauten 64,0% und 61,4% (1981 : 63,2% bzw. 60,7%).

Schließlich bleibt noch anzumerken, daß sich die Schere zwischen Verfügbarkeit und Ausnutzung gegenüber 1981 geöffnet hat. Daraus geht hervor, dass die Kernkraftwerke nicht mehr ausschließlich als Grundlastwerke genutzt werden.

6. EG-Außenhandel

Die EG-Exporte in Drittländer nahmen im Januar 1983 gegenüber Januar 1982 wertmässig um 8% zu. Diese Zahl basiert auf den Angaben aus 8 von 10 EG-Mitgliedstaaten (die Angaben aus Frankreich und Griechenland lagen noch nicht vor). Die Einfuhren nahmen um 6% zu. Die Teilergebnisse

lassen darauf schließen, daß sich der Abbau des Handelsdefizites der Gemeinschaft in allen Ländern fortsetzt.

1982 belief sich die gesamte Ausfuhr der Gemeinschaft auf 602 Milliarden ECU, die Einfuhr auf 631 Milliarden ECU. 48% der EG-Gesamtausfuhr ging in Drittländer; 25% der Gesamtausfuhr ging in andere Industrieländer und 20% in Entwicklungsländer. Etwa die Hälfte der Ausfuhr in Entwicklungsländer war für OPEC-Staaten bestimmt. Von den Drittländern waren die USA nach wie vor der grösste Abnehmer für Waren aus der Gemeinschaft (mit 15% der Extra-EG-Ausfuhr). Weitere wichtige Kunden sind die Schweiz (8%), Schweden (5%), Saudi-Arabien (4%), Oesterreich (4%) und Spanien (4%).

Die EG-Einfuhr aus Drittländern machte 1982 51% der Gesamteinfuhren aus, davon kamen 26% aus Industrieländern und 20% aus Entwicklungsländern. 11% der gesamten EG-Ein-

fuhr kam aus OPEC-Ländern. Zu den an der EG-Einfuhr am stärksten beteiligten Ausfuhrländern zählen die USA (17% der Extra-EG-Einfuhr) Saudi-Arabien (8%), Japan (15%), die Schweiz (5%), die UdSSR (5%), Schweden (4%) und Norwegen (4%).

7. Innergemeinschaftlicher Handel

Die Intra-EG-Einfuhr lag im Januar 1983 um 10% über dem Wert für Januar 1982 (auf der Grundlage der Angaben aus 8 von 10 EG-Mitgliedstaaten). Die jährliche Anstiegsrate war damit höher als in den drei Vormonaten. Die Einfuhren der Niederlande stiegen besonders schnell (+20%), das gleiche gilt für die Ausfuhren Belgiens und Luxemburgs (+27%) sowie Irlands (+19%).

Notice

Eurostatistics — data for short-term economic analysis is one of three key Eurostat publications designed to give the reader an overview of the most important quantitative information available for the Community and Member States. The other publications in this series are Basic Statistics giving data for a specific year, and Eurostat review with its summary of the Community in figures over the past 10 years.

A monthly publication with current economic data must be continually adapted and updated. At the beginning of 1982 a major modification took place with the inclusion of data for Greece and a change in presentation. Totals for the 10-member Community are being progressively introduced in 1982. Once sufficient data are available, the base year 1975 which is fundamental to this publication will be replaced with 1980. At a later stage it is planned to add data for the two applicant countries, Portugal and Spain, as well as for the United States and Japan.

Four kinds of information are published in Eurostatistics. Pages 9 and 10 offer an article 'In brief' which looks at the latest trends in the data available. Pages 15 to 20 provide the reader with a visual presentation of the most important economic series for the Community and the Member States. Starting on page 23 there are 56 pages of 'Community tables'. This section contains data harmonized by Eurostat on the basis of common criteria. The most recent data are provisional and in some cases estimated by Eurostat. Finally there is a section 'Tables by country' which contains a selection of economic indicators most often used in each country. These are national series based on national definitions. For comparison a table for the United States is also included.

For all series, historical data are available on request from Eurostat's data bank Cronos. Statistical bulletins on unemployment, prices, industrial production, balance of payments, external trade and energy are also published monthly or quarterly. Eurostatistics itself contains an absolute minimum of methodological notes. Detailed information on definitions and methodology may be obtained from Eurostat.

Eurostatistics is published at the end of each month in a single edition in German, English and French. A supplement with translations of titles and explanatory notes exists in Danish, Greek, Italian and Dutch, and it is available on request.

(1) The data included in this section of the bulletin are results from a short-term-trends enquiry conducted among heads of enterprises in the Community. More detailed data appear in *European Economy*.

Eurostatistics : In Brief

1. Unemployment

At the end of April 1983 there were 11.9 million persons registered as unemployed at public employment offices in the Community of Nine, corresponding to an unemployment rate of 10.7% of the civilian working population. The absolute figures of unemployment showed a fall of 2% compared with the previous month, mainly due to normal seasonal factors. The seasonally adjusted figure, however, indicates a further very slight rise in unemployment in the Community of Nine compared with end-March 1983.

Compared with the month of April 1982, the number unemployed in the Community has risen by 16% on average. This increase amounted to +32% in Germany, +28% in the Netherlands and +27% in Ireland. The increase was close to the Community average in the other Member countries with the exception of France where unemployment remained practically stable over the past year.

The rise in unemployment since April 1982 has been greater for men (+17.5%) than for women (+13.9%). In consequence the unemployment rates for the two sexes moved closer together, 11.3% for women as against 10.4% for men. The stabilisation of unemployment in France has resulted in an unemployment rate for males in that country (7.3%) which, with the exception of Luxembourg, is the lowest in the Community of Nine. This rate reached almost 15% in the United Kingdom and the Netherlands and almost 16% in Ireland.

The next generation of school-leavers having not yet arrived on the labour market, the number of unemployed persons aged under 25 years remained at much the same level as at end-March.

In the case of Greece, where the differing employment structure prevents direct comparison with the other Member States, the number unemployed at the end of April 1983 was 26% above the figure of April 1982.

2. The consumer price index in April 1983

The consumer price index for the Community rose by 1.0% on average between March and April 1983; this relatively high monthly increase is mainly due to seasonal factors in a number of countries. The rise in the Community index reflects significant rises in Greece (1.7%), in France and the United Kingdom (both 1.4%) as well as in Italy (1.0%) whereas the other countries reported increases between 0.2% to 0.6%.

The rate of inflation as measured by the consumer price index for the Community as a whole over the last 12 months to end April is 8.7%, which is the lowest increase for more than 4 years (March 1979, 8.6%).

3. The index of industrial production in March 1983

The provisional index for the Community in March 1983 stood at 116.3 which corresponds to a fall of 3.4% compared with March 1982.

After adjustment of seasonal influences, the EUR 10 index is at

109.7 which represents a drop of 1.2% compared with February 1983. This seems to confirm that the decline in industrial production has stopped, having reached a minimum at the end of 1982. Nonetheless, it is still not possible to show that production is taking off again.

In Germany, France and the United Kingdom the March level is lower than that of January and February. In Italy the level is the lowest recorded for four years.

4. Iron and steel

Following the slight tendency to rise in the first quarter of 1983 production of crude steel for the EC (ex Greece) showed in April 1983, at 9 mio.t., a fall of 1.1% (deseasonalized) compared with the previous month and 14.4% compared with the same month of 1982. In February 1983 new orders (ordinary steels), at 6.6 mio.t., showed an increase of 8.6% (deseasonalized) compared with the preceding month — their level nevertheless remains 6% below that of February 1982.

5. Energy — Energy production of nuclear power stations during 1982

Compared with previous years, which were characterized by a massive growth in nuclear power capacity, 1982 may be regarded as a year of consolidation. Only three power stations entered service in 1982 (two in France and one in Belgium) with a total capacity of 2 680 MW net. Taking account of corrections, the total net generation capacity installed in the Community reached 44 000 MW by the end of the year, an increase of 6.3% since the end of 1981.

The electrical energy of nuclear origin produced in the Community was 227 000 GWh net, an increase of 12.1% over 1981, which signifies a general improvement in the performance of nuclear power stations. Indeed, the energy availability and load factors were 64.0% and 61.4% respectively (as against 63.2% and 60.7% in 1981).

Finally, it should be noted that the gap between availability and load was wider than in 1981, indicating that nuclear power stations are no longer being used exclusively as base load power stations.

6. Extra-EC trade

Extra-EC exports rose 8% by value in January, compared with January 1982. This figure is based on data from eight of the ten EC-members (French and Greek data are not yet available). Imports rose by 6%. As a result, the partial figures suggest that the trend towards the reduction of the Community's overall trade deficit is continuing.

In 1982, total Community exports reached 602 milliard ECU, and the corresponding figure for imports was 631 milliard ECU. Extra-EC trade accounted for 48% of total EC exports; 25% of the total went to other industrialised countries and 20% went to

developing countries. Just under half of exports to developing countries was accounted for by OPEC countries. Of individual third countries, the USA remains the largest market for Community goods, taking 15% of extra-EC exports. Other important customers are Switzerland (8%), Sweden (5%), Saudi Arabia (4%), Austria (4%) and Spain (4%).

Extra-EC imports made up 51% of total imports in 1982, of which 26% of the total came from industrialised countries and 20% from developing countries. OPEC countries supplied 11% of total EC imports. The leading exporters to the EC were the USA (17% of extra-EC imports), Saudi Arabia (8%), Japan

(15%), Switzerland (5%), USSR (5%), Sweden (4%) and Norway (4%).

7. Intra-EC trade

Intra-EC imports were up 10% in January compared with the first month of 1982 (based on data from eight of the ten EC-members). This is a higher year on year rate than experienced in the previous three months. Imports by the Netherlands increased particularly fast (+20%) as did exports by Belgium-Luxembourg (+27%) and Ireland (+19%).

Avertissement

Eurostatistiques — données pour l'analyse de la conjoncture est l'une des trois publications clés d'Eurostat, destinées à donner au lecteur un aperçu des informations quantitatives les plus importantes disponibles concernant la Communauté et les États membres. Les autres publications de cette série sont les Statistiques de base fournissant des données pour une année spécifique déterminée et la Revue de l'Eurostat qui passe en revue dix ans de la Communauté sous forme de tableaux chiffrés.

Une publication mensuelle contenant des données économiques conjoncturelles d'actualité doit être continuellement adaptée et mise à jour. Au début de 1982, une modification importante est intervenue avec l'inclusion de données concernant la Grèce et un changement de présentation. Des totaux pour la Communauté de dix membres seront progressivement introduits en 1982. Lorsque l'on disposera de données en nombre suffisant, l'année 1975 — année de référence pour cette publication — sera remplacée par 1980. Il est prévu ultérieurement d'ajouter les données concernant les deux pays candidats à l'adhésion — à savoir l'Espagne et le Portugal — ainsi que pour les États-Unis et le Japon.

Eurostatistiques publie quatre types d'informations. Les pages 13 et 14 contiennent un article « En bref » dans lequel les dernières tendances pouvant être dégagées à partir des données disponibles sont examinées. Les pages 15 à 20 fournissent au lecteur une présentation visuelle des séries économiques les plus importantes pour la Communauté et les États membres. Des « tableaux communautaires » sont présentés sur 56 pages à partir de la page 23. Cette section contient des données harmonisées par Eurostat sur la base de critères communs. Les données les plus récentes sont provisoires et, dans certains cas, estimées par Eurostat. Enfin, la section « tableaux par pays » contient une sélection des indicateurs économiques les plus souvent utilisés dans chaque pays. Ce sont des séries nationales fondées sur des définitions nationales. A des fins de comparaison, un tableau concernant les États-Unis est également inclus.

Pour toutes les séries, des données historiques sont disponibles sur demande auprès de la banque de données d'Eurostat, CRONOS. Les bulletins statistiques sur le chômage, les prix, la production industrielle, la balance des paiements, le commerce extérieur et l'énergie sont également publiés sur une base mensuelle ou trimestrielle. En soi, Eurostatistiques contient un minimum de notes méthodologiques. Une information détaillée concernant les définitions et la méthodologie peut-être obtenue auprès d'Eurostat.

Eurostatistiques est publié à la fin de chaque mois dans une seule édition en allemand, anglais et français. Un supplément contenant les traductions des titres et des notes explicatives existe en danois, grec, italien et néerlandais et est disponible sur demande.

(1) Les données contenues dans cette partie du Bulletin représentent les résultats de l'enquête de conjoncture auprès des chefs d'entreprise de la Communauté. Des données plus détaillées paraissent dans « Économie européenne ».

Eurostatistiques : En Bref

1. Chômage

A la fin du mois d'avril 1983, le nombre des personnes inscrites auprès des bureaux de placement s'élevait à 11,9 millions dans la Communauté Européenne des Neuf. Ce chiffre correspond à un taux de chômage par rapport à la population active civile de 10,7%. Cette diminution des chiffres bruts du chômage de 2% est due essentiellement à l'effet saisonnier habituel. Les données corrigées des variations saisonnières montrent une très légère augmentation du chômage pour la Communauté des Neuf par rapport à la fin mars 1983.

Par rapport au mois d'avril de l'année dernière, le nombre des chômeurs a crû de +16% en moyenne dans la Communauté Européenne. Cette augmentation du chômage a atteint +32% en Allemagne, +28% aux Pays-Bas et +27% en Irlande. Elle est plus proche de la moyenne communautaire pour les autres États membres. Seule la France a réussi à pratiquement stabiliser le chômage depuis l'année dernière.

Cette augmentation du chômage par rapport à avril 1982 a été plus forte chez les hommes (+17,5%) que les femmes (+13,9%). Il en résulte un resserrement des taux de chômage des deux sexes, 11,3% pour les femmes contre 10,4% pour les hommes. La stabilisation du chômage en France a entraîné que, hormis le Luxembourg, c'est la France qui, avec 7,3%, a le taux de chômage masculin le plus faible de la Communauté des Neuf. Ce taux atteignait près de 15% au Royaume-Uni et aux Pays-Bas, près de 16% en Irlande.

La prochaine génération des jeunes sortant de l'école n'étant pas encore arrivée sur le marché du travail, le nombre des jeunes chômeurs de moins de 25 ans est resté à peu près au même niveau qu'au mois de mars.

Enfin, en Grèce, dont la situation socio-économique particulière ne permet pas de faire de comparaison avec les autres États membres, le nombre des chômeurs à la fin avril 1983 était supérieur de 26% au chiffre d'avril 1982.

2. L'indice des prix à la consommation en avril 1983

L'indice des prix à la consommation pour la Communauté s'est accru de 1% en moyenne de mars à avril 1983. Cette hausse mensuelle relativement importante est principalement due à des facteurs saisonniers dans un certain nombre de pays. L'accroissement de l'indice communautaire reflète des hausses significatives en Grèce (1,7%), en France et au Royaume-Uni (1,4% chacun) ainsi qu'en Italie (1,0%) tandis que les autres pays observent des hausses se situant entre 0,2% et 0,6%.

Le taux d'inflation mesuré par l'indice des prix à la consommation pour la Communauté dans son ensemble s'élève à 8,7% pour les douze derniers mois jusqu'à la fin avril, ce qui constitue le plus faible taux depuis plus de 4 ans (mars 1979 : 8,6%).

3. L'indice de la production industrielle en mars 1983

L'indice provisoire pour la Communauté (EUR 10) du mois de mars 1983 s'établit à 116,3 ce qui correspond à une baisse de 3,4% par rapport à mars 1982.

Après correction des variations saisonnières, l'indice EUR 10 est au niveau 109,7 c'est-à-dire en baisse de 1,2% par rapport au niveau de février 1983, ce qui semble confirmer que s'il y a une pause dans la baisse de la production industrielle qui aurait atteint un minimum à la fin de l'année 1982, il n'est pas actuellement possible de parler de reprise constatée.

Pour la République fédérale d'Allemagne, la France et le Royaume-Uni le niveau de mars est en baisse par rapport aux deux mois précédents de pour l'Italie il correspond au niveau le plus bas qui ait été observé depuis plus de quatre ans.

4. Sidérurgie

Après la légère tendance à la hausse du premier trimestre 1983, la production d'acier brut de la CE (sans la Grèce) a enregistré en avril 1983, avec 9 mio, t, une baisse de 1,1% (désaisonnalisée) par rapport au mois précédent et de 14,4% par rapport au même mois de 1982.

En février 1983, les commandes nouvelles (aciers courants) avec 6,6 mio, t ont connu une hausse de 8,6% (désaisonnalisée) par rapport au mois précédent. Leur niveau reste cependant inférieur de 6% à celui de février 1982.

5. Énergie : Exploitation énergétique des centrales nucléaires au cours de 1982

Par rapport aux années précédentes, caractérisées par une croissance massive du parc des centrales nucléaires, 1982 peut être considéré comme une année de consolidation. Trois centrales seulement sont entrées en service en 1982 (deux en France et une en Belgique) pour une capacité globale de 2 680 MW nets. Compte tenu des rectifications, la puissance totale nette installée dans la Communauté a atteint à la fin de l'année 44 000 MW, soit une augmentation de 6,3% par rapport à la fin de 1981.

L'énergie électrique d'origine nucléaire produite dans la Communauté a atteint 227 000 GWh net, soit une augmentation de 12,1% par rapport à 1981 ce qui indique une amélioration générale des performances des centrales nucléaires. En effet, les taux moyens de disponibilité et d'utilisation en énergie ont été respectivement de 64,0% et de 61,4% (contre 63,2% et 60,7% en 1981).

On peut observer enfin que l'écart entre la disponibilité et l'utilisation a augmenté par rapport à 1981 ce qui indique que désormais les centrales nucléaires ne sont pas exclusivement employées comme centrales de base.

6. Commerce extra-Communautaire

Les exportations extra CE se sont accrues de 8% en valeur en janvier 83 comparé à janvier 1982. Ce chiffre se base sur des données de huit pays parmi les dix membres de la Communauté (les données pour la France et de la Grèce ne sont pas encore disponibles). Les importations ont augmenté de 6%. En résultat les chiffres partiels montrent que la tendance vers une

réduction du déficit commercial global de la Communauté se confirme. En 1982 les exportations totales de la Communauté ont atteint 602 milliards d'ECU et le chiffre correspondant pour les importations était de 631 milliards d'ECU. Le commerce extra CE comptait pour 48% du total des exportations communautaires; 25% du total allait aux autres pays industrialisés et 20% aux pays en voie de développement. Environ la moitié des exportations vers les pays en voie de développement sont destinées aux pays de l'OPEP. Parmi les pays tiers les USA restent le plus grand marché pour la Communauté, avec une part de 15% des exportations extra CE. Les autres clients importants sont la Suisse (8%), la Suède (5%), l'Arabie Saoudite (4%), l'Autriche (4%) et l'Espagne (4%).

Les importations extra CE constituaient 51% du total des importations en 1982, dont 26% du total provenait des pays industrialisés et 20% des pays en voie de développement. Les

pays de l'OPEP fournissaient 11% du total des importations communautaires. Les principaux exportateurs vers la Communauté étaient les USA (17% des importations extra CE), Arabie Saoudite (8%), Japon (15%), Suisse (5%), URSS (5%), Suède (4%) et Norvège (4%).

7. Commerce Intra-Communautaire

Les importations intra CE ont augmenté de 10% en janvier comparé au premier mois de 1982 (chiffre basé sur les données de 8 des 10 pays membres). Ceci est un taux annuel plus élevé que pour les trois mois précédents.

Les importations des Pays-Bas ont augmenté très rapidement (+20%), il en est de même pour Belgique-Luxembourg (+27%) et pour l'Irlande (+19%).

Öffentliche Preise in Luxemburg (ohne MwSt.) □ Price (excluding VAT) in Luxembourg
 Prix publics au Luxembourg (TVA exclue)

	ECU	BFR	DM	FF	IRL	UKL	USD
Einzelpreis • Single copy • Prix par numéro	3,29	150	8	22	2.30	1.90	3.50
Abonnement • Subscription	24,95	1 140	59	165	18	14	24

Das Jahresabonnement beginnt am 1. Januar und endet am 31. Dezember.

The annual subscription runs from 1 January to 31 December of each year.

Les abonnements sont annuels; ils portent sur une période allant du 1^{er} janvier au 31 décembre de chaque année.

Zahlungen können nur an die auf Umschlagseite 3 angegebenen Vertriebsbüros geleistet werden.

Payments to be made only to the agents in the countries listed on page 3 of the cover.

Les versements doivent être adressés aux bureaux de vente indiqués à la page 3 de la couverture.

Die Versandkosten für Luftpostzustellung sind im Preis nicht enthalten. Die Bedingungen für Luftpostabonnements sind bei den Vertriebsbüros zu erfragen.

These are surface mail rates; for air subscription rates please apply to the agents.

Les prix ne comprennent pas les frais d'expédition par avion; pour les conditions d'abonnement par avion, consulter les bureaux de vente.
