Hinweis

Die Veröffentlichung Eurostatistik — Daten zur Konjunkturanalyse ist eine von drei Schlüsselveröffentlichungen des Eurostat, die dem Leser einen Überblick über die wichtigsten quantitativen Daten geben sollen, die für die Gemeinschaft und die Mitgliedstaaten zur Verfügung stehen. Die anderen Veröffentlichungen in dieser Reihe sind Statistische Grundzahlen mit Daten für ein bestimmtes Jahr sowie Eurostat-Revue mit einem Zehnjahresüberblick über die Gemeinschaft in Zahlen. Eine monatliche Veröffentlichung mit laufenden Wirtschaftsdaten muß ständig angepaßt und auf den neuesten Stand gebracht werden. Zu Beginn des Jahres 1982 wurde mit der Einbeziehung von Daten für Griechenland und der Abwandlung der Aufmachung eine bedeutende Änderung vorgenommen. Im Laufe des Jahres 1982 werden nach und nach Gesamtzahlen für die 10 Mitgliedstaaten der Gemeinschaft aufgenommen. Sobald genügend Daten zur Verfügung stehen, wird das Basisjahr 1975, das die Grundlage für diese Veröffentlichung bildet, durch das Jahr 1980 ersetzt werden. Zu einem späteren Zeitpunkt ist vorgesehen, Daten für die beiden beitrittswilligen Länder Portugal und Spanien sowie für die Vereinigten Staaten und Japan hinzuzufügen. Es werden vier Arten von Daten in Eurostatistik veröffentlicht. Auf den Seiten 5 und 6 findet sich ein Artikel „Kurz notiert“, der sich mit den jüngsten Tendenzen bei den verfügbaren Daten befaßt. Die Seiten 15 bis 20 enthalten eine schematische Darstellung der wichtigsten wirtschaftlichen Reihen für die Gemeinschaft und die Mitgliedstaaten. Die Seite 23 ist die erste von 56 Seiten mit „Gemeinschaftstabellen“. Dieser Abschnitt enthält von Eurostat auf der Grundlage von Gemeinschaftskriterien harmonisierte Daten. Die neuesten Daten sind vorläufig und in einigen Fällen von Eurostat geschätzt. Schließlich enthält die Veröffentlichung noch einen Abschnitt „Ländertabellen“, der eine Auswahl der in jedem Land am häufigsten verwendeten Konjunkturindikatoren enthält. Hierbei handelt es sich um nationale Reihen auf der Grundlage nationaler Definitionen. Zu Vergleichszwecken ist auch eine Tabelle für die Vereinigten Staaten enthalten. In allen Fällen stehen auf Anfrage Zeitreihen über die Cronos-Datenbank des Eurostat zur Verfügung. Es werden außerdem statistische Bulletins über Arbeitslosigkeit, Preise, industrielle Produktion, Zahlungsbilanzen, Außenhandel und Energie monatlich oder vierteljährlich veröffentlicht. In Eurostatistik selbst ist ein absolutes Minimum an Erläuterungen zur Methodik enthalten. Ausführliche Informationen über Definitionen und Methodik sind bei Eurostat erhältlich. Eurostatistik wird am Ende eines jeden Monats in einer gemeinsamen Ausgabe für Deutsch, Englisch und Französisch veröffentlicht. Darüber hinaus steht auf Anfrage eine Ergänzung mit Übersetzung der Titel und der Erläuterungen ins Dänische, Griechische, Italienische und Niederländische zur Verfügung.

Eurostatistik : Kurz notiert

1. Arbeitslosigkeit

Ende Mai 1983 waren 11,6 Millionen Personen in der Gemeinschaft der Neun als arbeitslos gemeldet. Damit sank die Arbeitslosenquote gemessen an den zivilen Erwerbspersonen von 10,7% im April 1983 auf 10,4% im Mai 1983.

Der Rückgang der Arbeitslosenzahl um 2,4% gegenüber dem Vormonat in der Gemeinschaft der Neun ist im wesentlichen saisonbedingt. Die saisonbereinigten Werte, die in den letzten drei Jahren stetig und relativ stark angestiegen sind, haben in den letzten zwei Monaten wesentlich kleinere Zuwachsraten aufzuweisen. Ob sich daraus allerdings schon erste Anzeichen für eine zukünftige Stabilisierung der Arbeitslosigkeit — wenn auch auf hohem Niveau — in der Gemeinschaft der Neun entnehmen lassen, scheint zumindest im Augenblick mehr als zweifelhaft zu sein.

In den einzelnen Mitgliedstaaten weisen die saisonbereinigten Werte eine sehr unterschiedliche Entwicklung auf. Für Frankreich beispielsweise, wo die Abnahmen der absoluten und saisonbereinigten Zahlen von Januar bis April 1983 eine Verbesserung der Situation auf dem Arbeitsmarkt anzudeuten schienen, ergibt sich wegen eines erneuten Anstiegs der saisonbereinigten Werte im Mai 1983 kein eindeutiges Bild. Demgegenüber sind die saisonbereinigten Werte in der Bundesrepublik Deutschland in demselben Zeitraum angestiegen, so dass dort noch keine baldige Entspannung auf dem Arbeitsmarkt erwartet werden kann.

Die unterschiedliche Arbeitsmarktlage der beiden Mitgliedstaaten wird jedoch bei einem Vergleich der Arbeitslosenquoten deutlich. Frankreich ist der einzige Mitgliedstaat in der Gemeinschaft, in dem sich im letzten Jahr die Arbeitslosigkeit nahezu stabilisiert hat. Die Arbeitslosenquote stieg in Frankreich unwesentlich von 8,3% im Mai 1982 auf 8,4% im Mai 1983. Demgegenüber gehört die Bundesrepublik Deutschland zu den Mitgliedstaaten, in denen sich bei Steigerungen der Arbeitslosigkeit zwischen 26 und 30% gegenüber Mai 1982 sprunghafte Zunahmen der Arbeitslosenquoten ergeben: in der Bundesrepublik Deutschland von 6,2 auf 8,1%, in Irland von 11,8 auf 15,0% und in den Niederlanden von 11,1 auf 14,1%.

Aehnliche Steigerungen bei den Arbeitslosenquoten liessen sich für die Zeit von Mai 1980 bis Mai 1981 für das Vereinigte Königreich und Belgien feststellen. In dieser Zeit stieg die Quote im Vereinigten Königreich von 5,4 auf 9,4% und in Belgien von 8,0 auf 10,2%.

In Griechenland, das wegen seiner unterschiedlichen Beschäftigungsstruktur nicht mit den übrigen Mitgliedstaaten verglichen werden kann, hat sich die Arbeitslosenquote in der Zeit von Mai 1982 bis Mai 1983 wegen der aussergewöhnlich starken Zunahme der Arbeitslosenzahl um 39,3% von 1,0 auf 1,5% erhöht.

In der Zeit von Mai 1982 bis Mai 1983 hat die Zahl der arbeitslosen Frauen in der Gemeinschaft der Neun mit 14,1% weniger stark zugenommen als die der Männer mit 14,9%. Die Arbeitslosenquoten betragen im Mai 1983 11,2% für die Frauen und 10,0% für die Männer. Die Quoten für die weiblichen Arbeitslosen liegen seit Jahren in den meisten Mitglied-

staaten höher als die Arbeitslosigkeit insgesamt, ausser im Vereinigten Königreich, in Irland und in Dänemark. In den Niederlanden hat sich dieses Verhältnis im Mai 1982 geändert, so dass seitdem die Arbeitslosenquote der Frauen niedriger ist als die Gesamtarbeitslosenquote.

2. Der Verbraucherpreisindex im Mai 1983

Der Verbraucherpreisindex für die Europäische Gemeinschaft stieg zwischen April und Mai 1983 um 0,7%. Starke Steigerungen werden aus Griechenland (1,8%), Dänemark (1,1%) und Italien (1,0%) gemeldet. In allen anderen Mitgliedstaaten lagen die Steigerungen unter dem Gemeinschaftsdurchschnitt: 0,2% in den Niederlanden, 0,4% in der Bundesrepublik Deutschland und im Vereinigten Königreich, 0,5% in Belgien und Luxemburg und 0,6% in Frankreich.

Der Anstieg in den letzten zwölf Monaten, ermittelt aus der Gegenüberstellung des Index vom Mai 1983 mit dem vom Mai 1982, betrug für die gesamte Gemeinschaft 8,6%. Für die einzelnen Mitgliedstaaten ergibt sich für die letzten zwölf Monate bis Mai 1983 folgendes Bild:

Niederlande	2,5%	Luxemburg	8,6%
Deutschland	3,0%	Frankreich	8,9%
Vereinigtes Königreich	3,7%	Irland	12,5%
Belgien	7,6%	Italien	16,2%
Dänemark	7,7%	Griechenland	22,1%

In der Erhöhung des Index der Gemeinschaft von Mai 1983 um 8,6% gegenüber dem Mai-Index des Vorjahres wird eine deutliche Verlangsamung nach dem Anstieg um 11,4% zwischen Mai 1981 und Mai 1982 erkennbar.

In den beitragswilligen Ländern Spanien und Portugal beliefen sich die Steigerungen in den letzten zehn Monaten bis Mai 1983 auf 12,5% bzw. 20,4%.

3. Index der industriellen Produktion im April 1983

Der vorläufige Gemeinschaftsindex belief sich im April 1983 auf 116,7 und lag damit um 2,3% unter dem Wert von April 1982 (1975=100). Nach Saisonbereinigung lag der Index für EUR 10 bei 111,0, d.h. um 0,5% höher als im März 1983 und praktisch auf der gleichen Ebene wie der Durchschnitt der ersten drei Monate von 1983. Damit wird bestätigt, dass ein klarer Aufschwung immer noch nicht feststellbar ist, auch wenn sich der Rückgang der industriellen Produktion, die Ende 1982 den tiefsten Stand erreicht haben dürfte, nicht mehr fortsetzt.

Die Lage ist von Land zu Land sehr verschieden. Der Tendenzindikator (Mittelwert der letzten drei Monate im Vergleich zu den vorhergehenden) zeigte einen merklichen Aufstieg in der Bundesrepublik (2,8%) und den Niederlanden (3,6%). Im Vereinigten Königreich ist der gleiche Indikator um 0,9% gestiegen. In Frankreich gibt es einen Rückgang von 0,4% und in Dänemark von 1,4%. In Italien ist der Tendenzindikator um 4,1% zurückgegangen.

4. Eisen und Stahl

Die Rohstahlerzeugung der Gemeinschaft (ohne Griechenland) ist im Mai 1983 mit 9,7 Mio t verglichen mit dem Vormonat um 2,1% (saisonbereinigt) angestiegen. Dennoch blieb sie 9,3% unter dem Ergebnis des entsprechenden Vorjahresmonats. Die Erzeugung der ersten fünf Monate des Jahres war um 15,3% niedriger als im gleichen Vorjahreszeitraum. Der Auftragseingang für Massenstahl ist im März 1983 weiter angestiegen und lag mit 8,3 Mio t — saisonbereinigt — um 11,2% über dem Vormonat und auch erstmals wieder seit Januar 1982 über dem vergleichbaren Vorjahresniveau (+2,6%). Erstes Vierteljahr 1983 gegenüber erstem Vierteljahr 1982: -5,8%.

5. Energiewirtschaft — Steinkohlenlieferungen

Der Steinkohlenverbrauch der öffentlichen Kraftwerke der Gemeinschaft ist 1982 gegenüber dem Vorjahr um 2% gestiegen. Diese Zunahme betraf alle Mitgliedstaaten mit Ausnahme des Vereinigten Königreichs. Nach dem Rückgang im Jahre 1981 (-1,7% gegenüber 1980) wurde in den Kraftwerken wieder verstärkt Kohle eingesetzt, wodurch eine dynamische Entwicklung auf dem Gebiet der Versorgung erfolgte. Die Gesamtlieferungen haben um 6 Mio t zugunsten der Gemeinschaftskohle zugenommen, während Drittländer Einbussen ihrer Kohlelieferungen hinnehmen mussten (-1 Mio t). Der Anteil an Gemeinschaftskohle machte damit 78,7% der Gesamtlieferungen gegenüber 77,3% im Jahr 1981 aus.

Bei Drittländern ist die starke Wiederbelebung der Kohlelieferungen aus Polen hervorzuheben (+2 Mio t), die die Quoten der anderen Länder beeinträchtigte, was besonders zu Lasten der Südafrikanischen Republik ging.

Die anhaltende Krise in der Stahlindustrie hatte negative Auswirkungen auf die Tätigkeit der Kokereien in der Gemeinschaft. Der Verbrauch an Steinkohle ging nämlich um 6 Mio t

(-6,8%) zurück, was wiederum zu einem Rückgang der Lieferungen (-5 Mio t) und einer Erhöhung der Lagerbestände (+1 Mio t) führte.

6. EG-Aussenhandel

In den ersten drei Monaten des Jahres 1983 nahmen die EG-Exporte in Drittländer gegenüber dem gleichen Zeitraum von 1982 um knapp 1% zu (ausgenommen die Niederlande, für die noch keine Angaben vorlagen). Die Mitgliedstaaten mit dem stärksten Ausfuhranstieg waren Belgien/Luxemburg (+20%) und Irland (+13%). Aus drei Ländern werden Ausfuhrrückgänge gemeldet, nämlich aus Griechenland (-12%), dem Vereinigten Königreich (-7%) und Italien (-2%). Die EG-Importe aus Drittländern (ebenfalls ohne die Niederlande) gingen verglichen mit dem ersten Vierteljahr 1982 um 3% zurück. Aus sechs Mitgliedstaaten werden für diesen Zeitraum Einfuhrrückgänge gemeldet, nämlich aus Italien (-6%), Belgien/Luxemburg (-5%), dem Vereinigten Königreich (-2%), Dänemark (-2%) und Griechenland (-46%). Diese Rückgänge sind hauptsächlich auf geringere Rohstoffeinfuhren (insbesondere Brennstoffe) zurückzuführen.

7. Innergemeinschaftlicher Handel

Die Einfuhr der Mitgliedstaaten aus anderen Mitgliedstaaten nahm im ersten Vierteljahr verglichen mit dem Zeitraum Januar bis März 1982 um 6% zu (ausgenommen die Niederlande, für die noch keine Angaben vorlagen). Die lebhaftesten Entwicklungen waren in den Bereichen Maschinen und Fahrzeuge, Rohstoffe einschliesslich Brennstoffe, Chemische Erzeugnisse und Sonstige bearbeitete Waren zu beobachten. Aus drei Mitgliedstaaten werden überdurchschnittliche Anstiege des innergemeinschaftlichen Handels gemeldet, nämlich aus Dänemark (+16%), Irland (+12%) und Belgien/Luxemburg (+11%).

Notice

Eurostatistics — data for short-term economic analysis is one of three key Eurostat publications designed to give the reader an overview of the most important quantitative information available for the Community and Member States. The other publications in this series are Basic Statistics giving data for a specific year, and Eurostat review with its summary of the Community in figures over the past 10 years.

A monthly publication with current economic data must be continually adapted and updated. At the beginning of 1982 a major modification took place with the inclusion of data for Greece and a change in presentation. Totals for the 10-member Community are being progressively introduced in 1982. Once sufficient data are available, the base year 1975 which is fundamental to this publication will be replaced with 1980. At a later stage it is planned to add data for the two applicant countries, Portugal and Spain, as well as for the United States and Japan.

Four kinds of information are published in Eurostatistics. Pages 9 and 10 offer an article 'In brief' which looks at the latest trends in the data available. Pages 15 to 20 provide the reader with a visual presentation of the most important economic series for the Community and the Member States. Starting on page 23 there are 56 pages of 'Community tables'. This section contains data harmonized by Eurostat on the basis of common criteria. The most recent data are provisional and in some cases estimated by Eurostat. Finally there is a section 'Tables by country' which contains a selection of economic indicators most often used in each country. These are national series based on national definitions. For comparison a table for the United States is also included.

For all series, historical data are available on request from Eurostat's data bank Cronos. Statistical bulletins on unemployment, prices, industrial production, balance of payments, external trade and energy are also published monthly or quarterly. Eurostatistics itself contains an absolute minimum of methodological notes. Detailed information on definitions and methodology may be obtained from Eurostat.

Eurostatistics is published at the end of each month in a single edition in German, English and French. A supplement with translations of titles and explanatory notes exists in Danish, Greek, Italian and Dutch, and it is available on request.

(1) The data included in this section of the bulletin are results from a short-term-trends enquiry conducted among heads of enterprises in the Community. More detailed data appear in *European Economy*.

Eurostatistics: In brief

1. Unemployment

At the end of May 1983 there were 11.6 million persons registered as unemployed in the Community of the Nine. This represented an unemployment rate of 10.4% of the civilian working population, a drop from the 10.7% registered in April 1983.

This fall, corresponding to a 2.4% decrease in the number of persons unemployed compared with the previous month, was due mainly to seasonal factors. The seasonally-adjusted figures, which have risen steadily and quite sharply over the past three years, have shown much smaller rises in the past two months. However, it would at present be premature to interpret this as the first real indication that unemployment will shortly be stabilizing — albeit at a high level — in the Community of the Nine.

The seasonally-adjusted figures show widely varying trends in the individual Member States. In France, for example, where the falls in both the absolute and seasonally-adjusted figures between January and April 1983 appeared to indicate an improvement in the labour market situation, the picture is some what less clear now that seasonally-adjusted figures for May 1983 showing an increase have become available. For comparison, there are as yet no prospects of an early improvement in the unemployment situation in the F.R. of Germany, where the seasonally-adjusted figures over the same period continued to rise.

The differences between these two countries as regards the labour market situation are, however, brought out by a comparison of their respective unemployment rates. France is the only country in the Community in which unemployment has remained more or less stable over the past year. Between May 1982 and May 1983, the unemployment rate in France rose very slightly from 8.3% to 8.4%. In contrast, Germany is one of those Member States where the number of persons unemployed has risen by between 26 and 30% since May 1982, producing sharp increases in the unemployment rates in these countries (in Germany from 6.2 to 8.1%, in Ireland from 11.8 to 15.0% and in the Netherlands from 11.1 to 14.1%).

Similar increases in unemployment rates occurred in the United Kingdom and Belgium between May 1980 and May 1981. During that period, the rate rose from 5.4 to 9.4% in the United Kingdom and from 8.0 to 10.2% in Belgium below.

In Greece, where the differing employment structure prevents direct comparison with the other Member States, the unemployment rate in the period from May 1982 to May 1983 rose from 1.0 to 1.5%. This was due to an unusually large increase of 39.3% in the number of persons unemployed.

The rise in unemployment since May 1982 has been less for women (+14.1%) than for men (+14.9%). In May 1983, the unemployment rate was 11.2% for women and 10.0% for men. For many years unemployment rates among women have been higher than overall unemployment rates in most Member States, except in the United Kingdom, Ireland and Denmark. This situation no longer obtains in the Netherlands where, since May 1982, the unemployment rate among women has been lower than the overall unemployment rate.

2. Consumer price index: may 1983

The Consumer Price Index for the European Community increased by 0.7% from April to May 1983. There were significant increases in Greece (1.8%), Denmark (1.1%) and Italy (1.0%). All the other member countries recorded increases below the Community average: the Netherlands (0.2%), Germany (FR) and the United Kingdom (0.4%), Belgium and Luxembourg (0.5%) and France (0.6%).

The increase over twelve months measured by comparing the May 1983 index with that of May 1982 for the Community as a whole was 8.6%. For the individual EC countries the increases over the twelve months to May 1983 were as follows:

Netherlands	2.5%	Luxembourg	8.6%
Germany	3.0%	France	8.9%
United Kingdom	3.7%	Ireland	12.5%
Belgium	7.6%	Italy	16.2%
Denmark	7.7%	Greece	22.1%

The increase for the Community of 8.6% compared with a year earlier represents a marked deceleration compared with the 11.4% recorded between May 1981 and May 1982.

The increases over the 12 months to May 1983 for the applicant Member States, Spain and Portugal, are about 12.5% and 20.4% respectively.

3. The index of industrial production in April 1983

The provisional index for the Community for April 1983 stands at 116.7 which corresponds to a fall of 2.3% compared with April 1982 (1975=100). After adjustment for seasonal influences, the EUR 10 index is at 111.0, i.e. a rise of 0.5% in March 1983 and practically at the same level as the average of the first three months of 1983. This confirms that though there has been a break in the fall of industrial production, which reached its minimum at the end of 1982, it is still not possible to talk of a clear change of trend at Community level.

The situation varies greatly from country to country. The trend indicator (last three months over previous three months) shows a clear rise in Germany (2.8%) and the Netherlands (3.6%). In the U.K. the same indicator is up 0.9%. There is a fall in France (-0.4%) and Denmark (-1.4%). In Italy the trend indicator shows a drop of (-4.1%).

4. Iron and Steel

In May 1983 production of crude steel for the Community (ex Greece) at 9.7 mio.t., experienced a rise of 2.1% (deseasonalized) compared with the previous month. Nevertheless it remains 9.3% below the level for May 1982. Production in the first 5 months of the year was in total 15.3% below that for the same period of 1982. In March 1983, at 8.3 mio.t., new orders (ordinary steels) showed a further increase of 11.2% (deseasonalized) compared with the preceding month; for the first time since January 1982 their level is higher than for the

same month of the previous year (+2.6%) — however the first quarter of 1983 is 5.8% down on the same quarter of 1982.

5. Energy — Hard Coal Supplies

Consumption of coal in public power stations in the Community rose by 2% in 1982 as compared with the previous year. The rise affected all Member States, with the exception of the United Kingdom. After the fall recorded in 1981 (-1.7% compared with 1980), the use of coal in power stations has once again begun to expand. This has resulted in a similar rapid increase in supply. Total supplies increased by 6 million tonnes, entirely to the advantage of Community coal, with a drop in deliveries of coal from non-Member States (-1 million tonnes). Community coal, therefore, represents 78.7% of total supplies, as compared with 77.3% in 1981. As for non-Member States, it should be pointed out that the large-scale resumption of supplies of Polish coal (+2 million tonnes) has affected the shares of other countries, mainly to the disadvantage of the Republic of South Africa.

The continuing crisis in the iron and steel industry has had a negative effect on activity in Community coking plants. Consumption of coal fell by 6 million tonnes (-6.8%), which in turn resulted in a fall in supplies (-5 million tonnes) and a rise in stocks (+1 million tonnes).

6. Extra-EC Trade

In the first three months of 1983 Community exports to third countries rose by just under 1% (excluding the Netherlands, for which data are not yet available), compared with the same period of 1982. The member states with the fastest growing exports were Belgium-Luxembourg (+20%) and Ireland (+13%). Three member states recorded falls in exports, Greece (-12%), the U.K. (-7%) and Italy (-2%). Community imports from third countries (again excluding the Netherlands) fell by 3% compared with the first quarter of 1982. Six member states imported less in this period, namely Italy (-6%), Belgium-Luxembourg (-5%), the U.K. (-2%), Denmark (-2%) and Greece (-46%). The declines were largely due to reductions in raw material imports, particularly of fuels.

7. Intra-EC Trade

Imports by member states from each other were 6% higher in the first quarter compared with January-March 1982 (excluding the Netherlands, for which data is not yet available). The most buoyant sectors were machinery and transport equipment, raw materials including fuels, chemicals and miscellaneous manufactured products. Three member states recorded rises in intra-EC exports which were well above average, namely Denmark (+16%), Ireland (+12%) and Belgium-Luxembourg (+11%).

Avertissement

Eurostatistiques — données pour l'analyse de la conjoncture est l'une des trois publications clés d'Eurostat, destinées à donner au lecteur un aperçu des informations quantitatives les plus importantes disponibles concernant la Communauté et les États membres. Les autres publications de cette série sont les Statistiques de base fournissant des données pour une année spécifique déterminée et la Revue de l'Eurostat qui passe en revue dix ans de la Communauté sous forme de tableaux chiffrés.

Une publication mensuelle contenant des données économiques conjoncturelles d'actualité doit être continuellement adaptée et mise à jour. Au début de 1982, une modification importante est intervenue avec l'inclusion de données concernant la Grèce et un changement de présentation. Des totaux pour la Communauté de dix membres seront progressivement introduits en 1982. Lorsque l'on disposera de données en nombre suffisant, l'année 1975 — année de référence pour cette publication — sera remplacée par 1980. Il est prévu ultérieurement d'ajouter les données concernant les deux pays candidats à l'adhésion — à savoir l'Espagne et le Portugal — ainsi que pour les États-Unis et le Japon.

Eurostatistiques publie quatre types d'informations. Les pages 13 et 14 contiennent un article « En bref » dans lequel les dernières tendances pouvant être dégagées à partir des données disponibles sont examinées. Les pages 15 à 20 fournissent au lecteur une présentation visuelle des séries économiques les plus importantes pour la Communauté et les États membres. Des « tableaux communautaires » sont présentés sur 56 pages à partir de la page 23. Cette section contient des données harmonisées par Eurostat sur la base de critères communs. Les données les plus récentes sont provisoires et, dans certains cas, estimées par Eurostat. Enfin, la section « tableaux par pays » contient une sélection des indicateurs économiques les plus souvent utilisés dans chaque pays. Ce sont des séries nationales fondées sur des définitions nationales. A des fins de comparaison, un tableau concernant les États-Unis est également inclus.

Pour toutes les séries, des données historiques sont disponibles sur demande auprès de la banque de données d'Eurostat, CRONOS. Les bulletins statistiques sur le chômage, les prix, la production industrielle, la balance des paiements, le commerce extérieur et l'énergie sont également publiés sur une base mensuelle ou trimestrielle. En soi, Eurostatistiques contient un minimum de notes méthodologiques. Une information détaillée concernant les définitions et la méthodologie peut-être obtenue auprès d'Eurostat.

Eurostatistiques est publié à la fin de chaque mois dans une seule édition en allemand, anglais et français. Un supplément contenant les traductions des titres et des notes explicatives existe en danois, grec, italien et néerlandais et est disponible sur demande.

Eurostatistiques : En bref

1. Chômage

A la fin du mois de mai 1983, le nombre de chômeurs inscrits auprès des bureaux de placement dans la Communauté des Neuf était de 11,6 millions. Le taux de chômage, calculé par rapport à la population active civile, est ainsi tombé de 10,7% en avril 1983 à 10,4% en mai 1983.

La diminution du chômage de 2,4% par rapport au mois précédent dans la Communauté des Neuf est due essentiellement à l'effet saisonnier. Les chiffres corrigés des variations saisonnières, qui ont augmenté de manière régulière et relativement forte ces trois dernières années, présentent des taux d'accroissement nettement plus faibles depuis deux mois. Il semble toutefois, actuellement prématuré de voir pour la Communauté des Neuf dans cette évolution les premiers indices d'une stabilisation future du chômage, même à un niveau élevé. Les données corrigées des variations saisonnières évoluent de manière très différente d'un État membre à l'autre. En France, par exemple, le recul des chiffres absolus et des chiffres désaisonnalisés de janvier à avril 1983 semblait indiquer une amélioration de la situation sur le marché de l'emploi, mais une nouvelle montée des données désaisonnalisées au mois de mai rend la conclusion difficile. Quant à la république fédérale d'Allemagne, ses données corrigées des variations saisonnières ont encore suivi une courbe ascendante au cours de la même période, de sorte que la situation du marché de l'emploi ne devrait pas s'améliorer dans l'immédiat.

Mais c'est dans leurs taux de chômage respectifs que se reflète la situation du marché de l'emploi de ces deux États membres. La France est le seul État membre de la Communauté où le chômage se soit pratiquement stabilisé l'année dernière. De mai 1982 à mai 1983, le taux de chômage a connu un accroissement minime, passant de 8,3% à 8,4%. En revanche, l'Allemagne fait partie des États membres qui ont connu, depuis mai 1982, un accroissement de 26% à 30% du chômage et ainsi une augmentation importante des taux de chômage. L'Allemagne est passée de 6,2 à 8,1%, l'Irlande de 11,8 à 15,0% et le taux s'est accru aux Pays-Bas de 11,1 à 14,1%.

De mai 1980 à mai 1981 des augmentations similaires des taux de chômage ont été relevées au Royaume-Uni et en Belgique. Pendant cette période, le taux du Royaume-Uni s'est accru de 5,4 à 9,4% et celui de la Belgique de 8,0 à 10,12%.

En raison de la structure particulière de son emploi, la Grèce ne peut pas être comparée aux autres États membres. En raison d'une augmentation particulièrement importante (39,3%) du nombre de chômeurs, le taux de chômage de ce pays est passé néanmoins de 1,0 à 1,5% entre mai 1982 et mai 1983.

Pendant la même période, le chômage féminin dans la Communauté des Neuf a connu un accroissement de 14,1%, alors que le chômage masculin a augmenté de 14,9%. En mai 1983, les taux de chômage étaient de 11,2% pour les femmes et de 10,0% pour les hommes. Depuis plusieurs années, le taux de chômage féminin est supérieur au taux de chômage global dans la plupart des États membres, seuls le Royaume-Uni, l'Irlande et le Danemark faisant exception. Aux Pays-Bas un renversement

est intervenu en mai 1982 : depuis lors, en effet, le taux de chômage féminin est inférieur au taux de chômage global.

2. L'indice des prix à la consommation en mai 1983

L'indice des prix à la Consommation pour la Communauté européenne a augmenté entre avril et mai 1983 de 0,7%. Des accroissements importants ont été enregistrés en Grèce (1,8%), au Danemark (1,1%) et en Italie (1,0%). Dans tous les autres États membres l'accroissement est inférieur à la moyenne communautaire : Pays-Bas (0,2%), R.F. d'Allemagne et Royaume-Uni (0,4%), Belgique et Luxembourg (0,5%) et France (0,6%).

L'accroissement mesuré sur 12 mois en comparant l'indice de mai 1983 avec celui de mai 1982 pour l'ensemble de la Communauté est de 8,6%. Pour les différents pays les accroissements sur les douze mois se terminant en mai 1983 sont les suivants :

Pays-Bas	2,5%	Luxembourg	8,6%
Allemagne (R.F.)	3,0%	France	8,9%
Royaume-Uni	3,7%	Irlande	12,5%
Belgique	7,6%	Italie	16,2%
Danemark	7,7%	Grèce	22,1%

Ce taux d'accroissement de 8,6% pour la Communauté représente une nette décélération comparé aux 11,4% enregistrés entre mai 1981 et mai 1982.

En mai 1983 l'accroissement sur 12 mois pour les États candidats à l'adhésion, c'est-à-dire l'Espagne et le Portugal, se situe à environ 12,5% et 20,4%.

3. L'indice de la production industrielle en avril 1983

L'indice provisoire pour la Communauté (EUR 10) du mois d'avril 1983 s'établit à 116,7 ce qui correspond à une baisse de 2,3% par rapport au mois d'avril 1982 (1975 = 100).

Après correction des variations saisonnières, l'indice EUR 10 est au niveau 111,0 c'est-à-dire en hausse de 0,5% par rapport au niveau de mars 1983 et pratiquement au même niveau que la moyenne des trois premiers mois de 1983 ce qui permet de confirmer que s'il y a pause dans la baisse de la production industrielle qui a atteint un minimum à la fin de l'année 1982, il n'est pas encore possible au niveau de EUR 10 de parler de reprise sensible d'indicateur de tendance.

En fait, la situation est très diverse selon les pays, le même indicateur de tendance (rapport des trois derniers mois aux trois mois précédents) pour la même période est en hausse sensible en R.F. d'Allemagne (+2,8%) et aux Pays-Bas (+3,6%). La hausse est de +0,9% au Royaume-Uni. La baisse est de -0,4% en France et de -1,4% au Danemark. En Italie cet indicateur de tendance indique une baisse de -4,1%.

4. Sidérurgie

En mai 1983, la production d'acier brut communautaire (sans la Grèce) a connu avec 9,7 mio.t une hausse de 2,1% (désaisonnalisée) par rapport au mois précédent. Elle reste

cependant inférieure de 9,3% au niveau de mai 1982. La production des 5 premiers mois de l'année se solde par une diminution de 15,3% par rapport à la même période de l'année 1982. En mars 1983, avec 8,3 mio.t, les commandes nouvelles (aciers courants) ont enregistré à nouveau une hausse de 11,2% (désaisonnalisée) par rapport au mois précédent; pour la première fois, depuis janvier 1982, leur niveau est en augmentation par rapport au même mois de l'année précédente (+2,6%). Mais le premier trimestre 1983 est en diminution de 5,8% par rapport au même trimestre 1982.

5. Énergie-Approvisionnement en houille

La consommation de houille dans les centrales électriques des services publics dans la Communauté a enregistré en 1982 une augmentation de 2% par rapport à l'année précédente. Le phénomène concerne tous les pays membres à l'exception du Royaume-Uni. Après un recul en 1981 (-1,7% par rapport à 1980), l'utilisation du charbon dans les centrales a repris de nouveau sa progression. Il en est résulté un mouvement de reprise dans l'approvisionnement. Le total des fournitures a augmenté de 6 millions de tonnes au profit exclusif du charbon communautaire à 78,7% des fournitures totales, contre 77,3% en 1981. En ce qui concerne les pays tiers, il convient de signaler enfin que la reprise massive des fournitures de charbon polonais (+2 millions de tonnes) a modifié la part des autres pays, aux dépens principalement de la République sud-africaine.

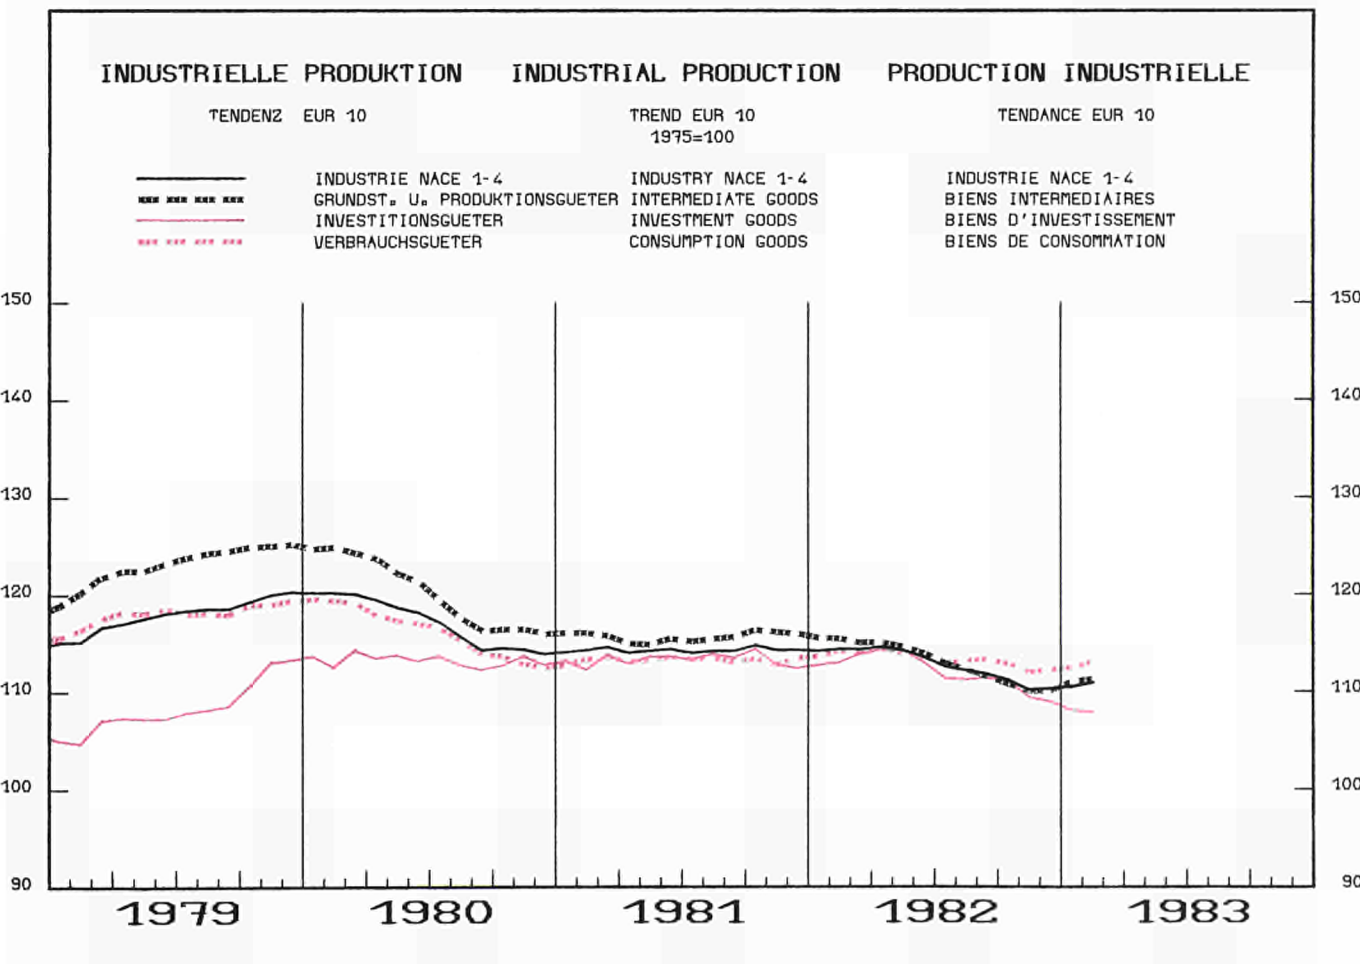

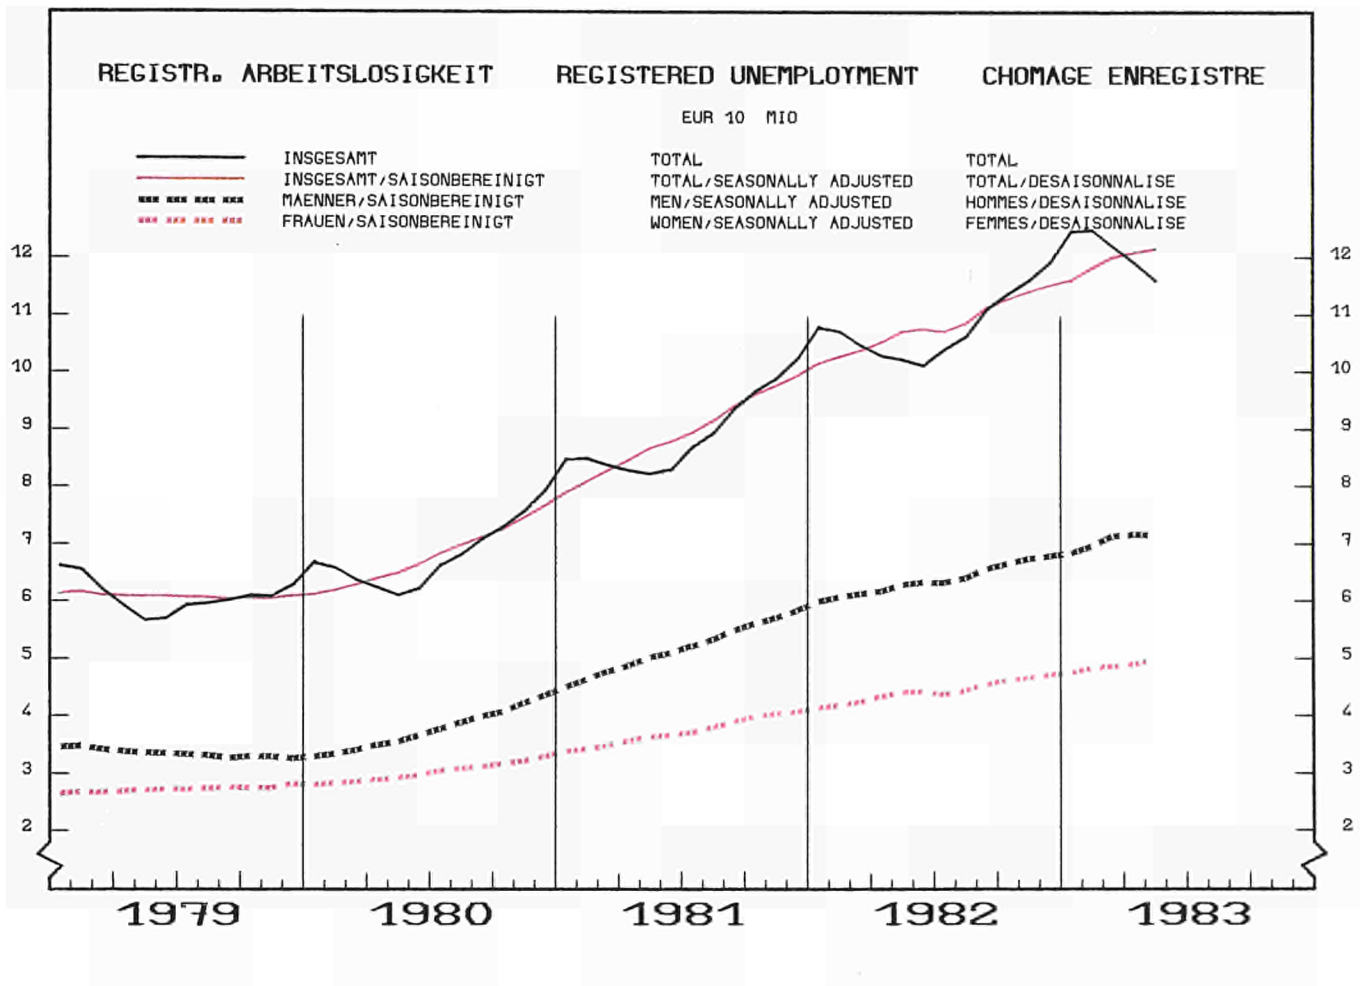

La persistance de la crise de la sidérurgie a eu des effets négatifs sur l'activité des cokeries de la Communauté. En effet, la consommation de houille a enregistré une diminution de 6 millions de tonnes (-6,8%) qui, à son tour, a entraîné une baisse des fournitures (-5 millions de tonnes) et une augmentation des stocks (1 million de tonnes).

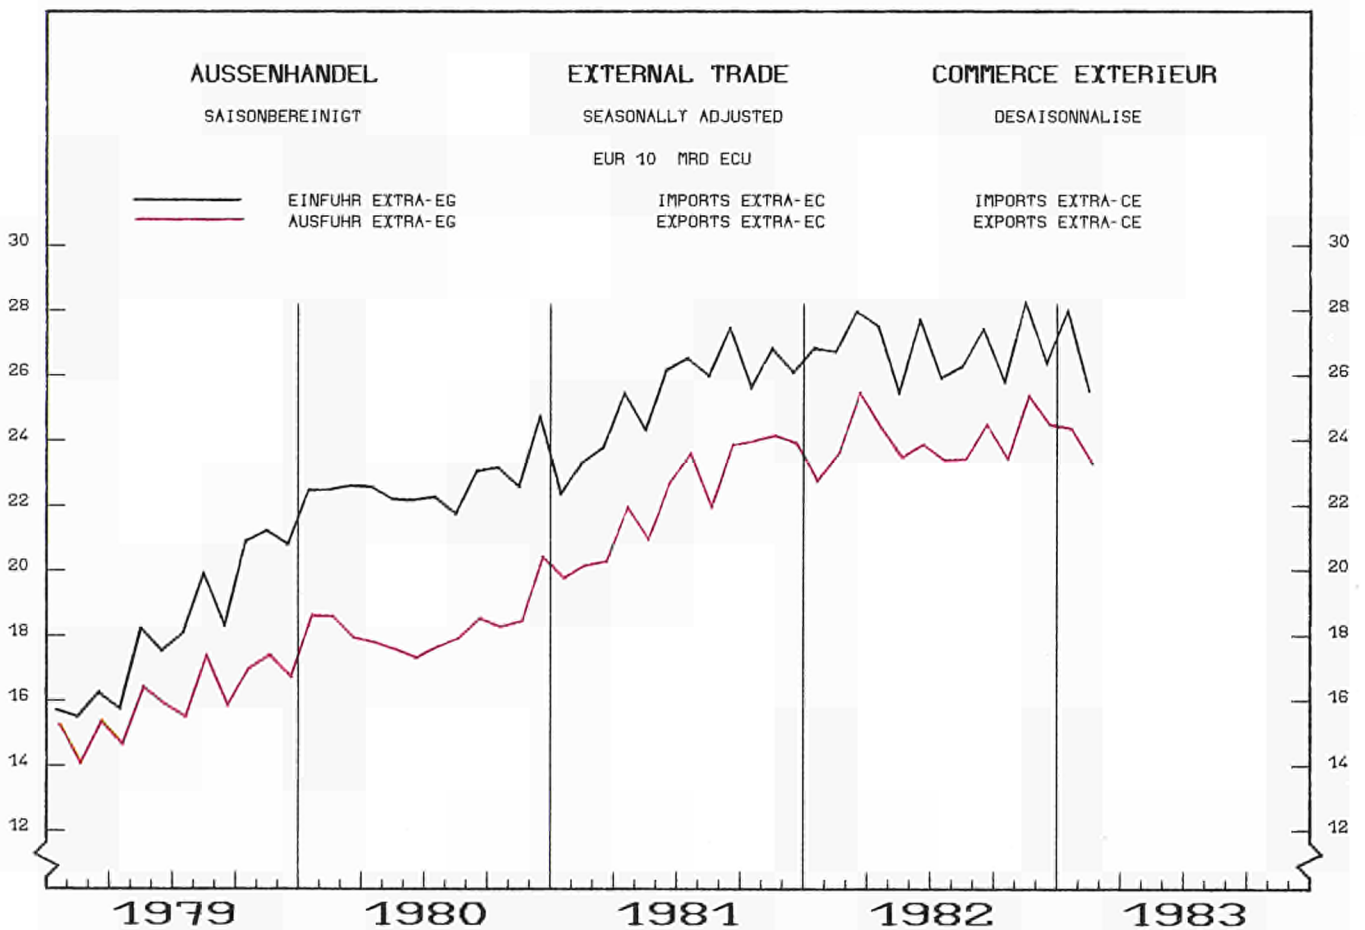

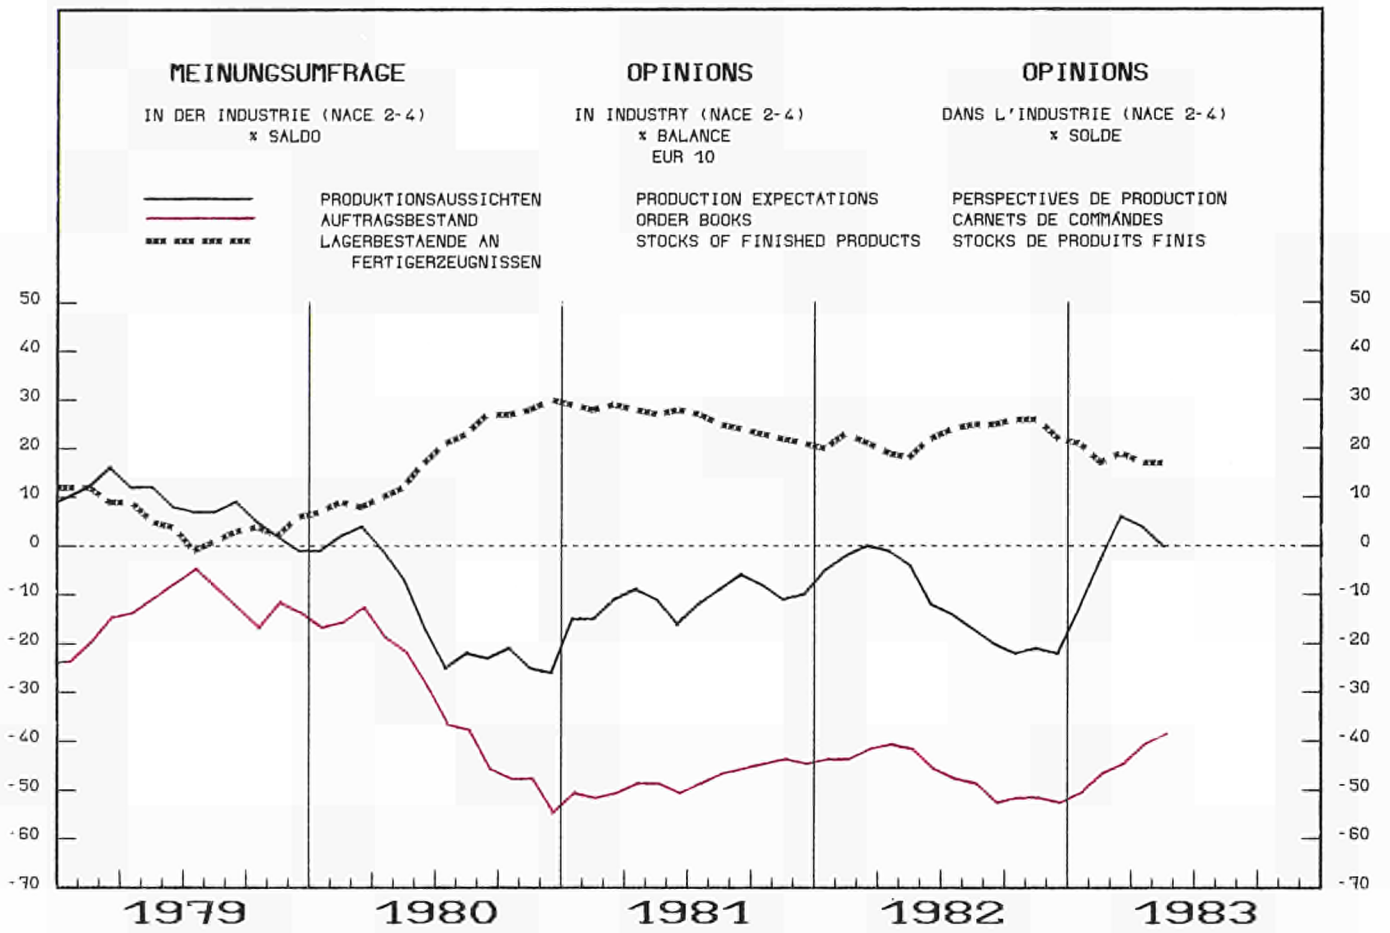

6. Commerce extra-CE

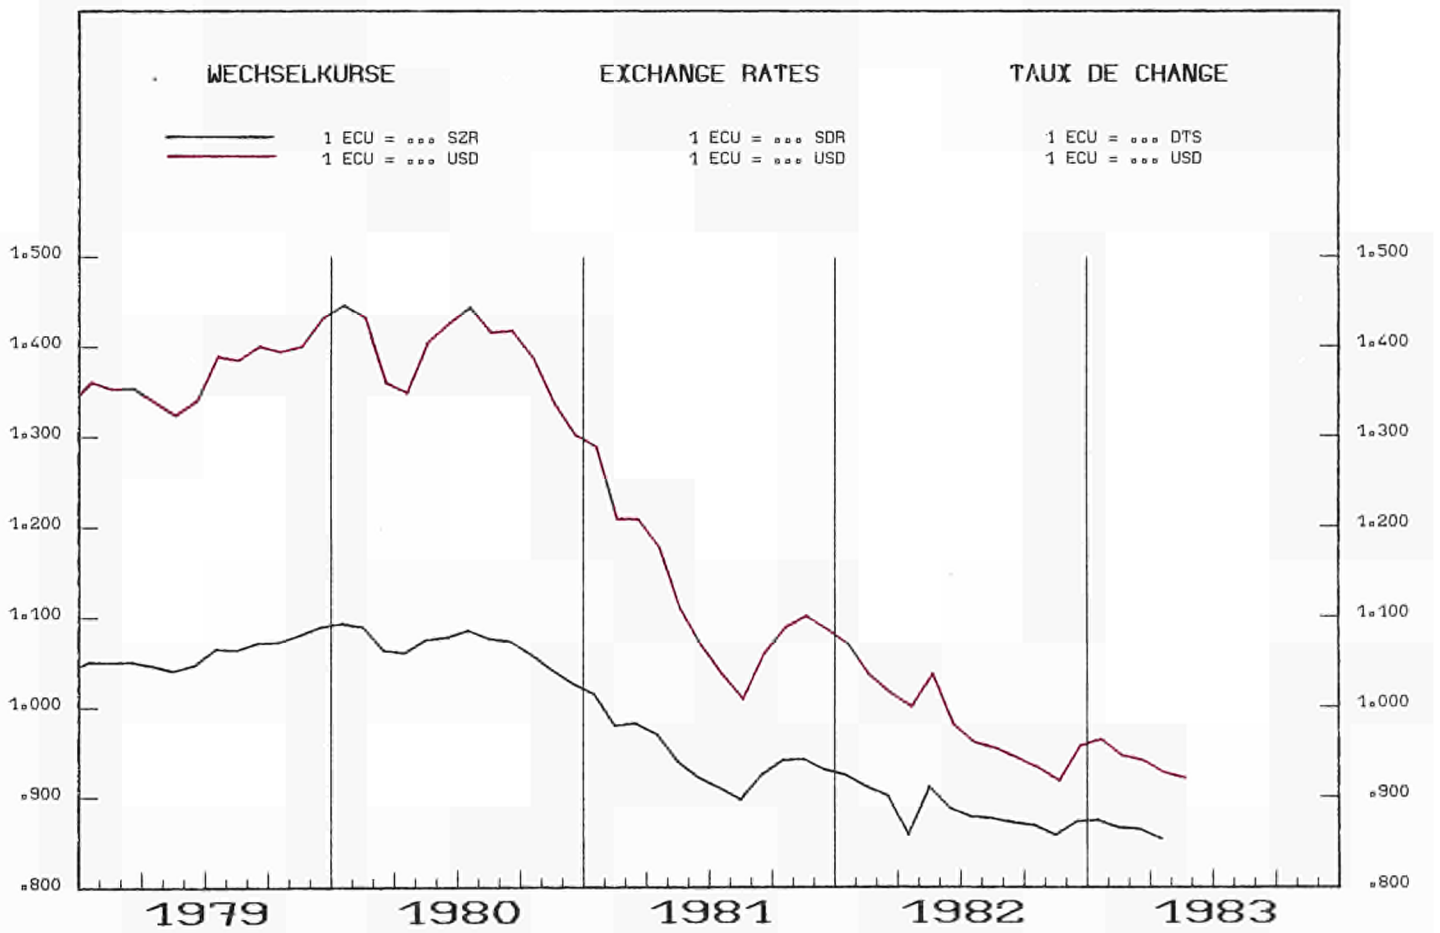

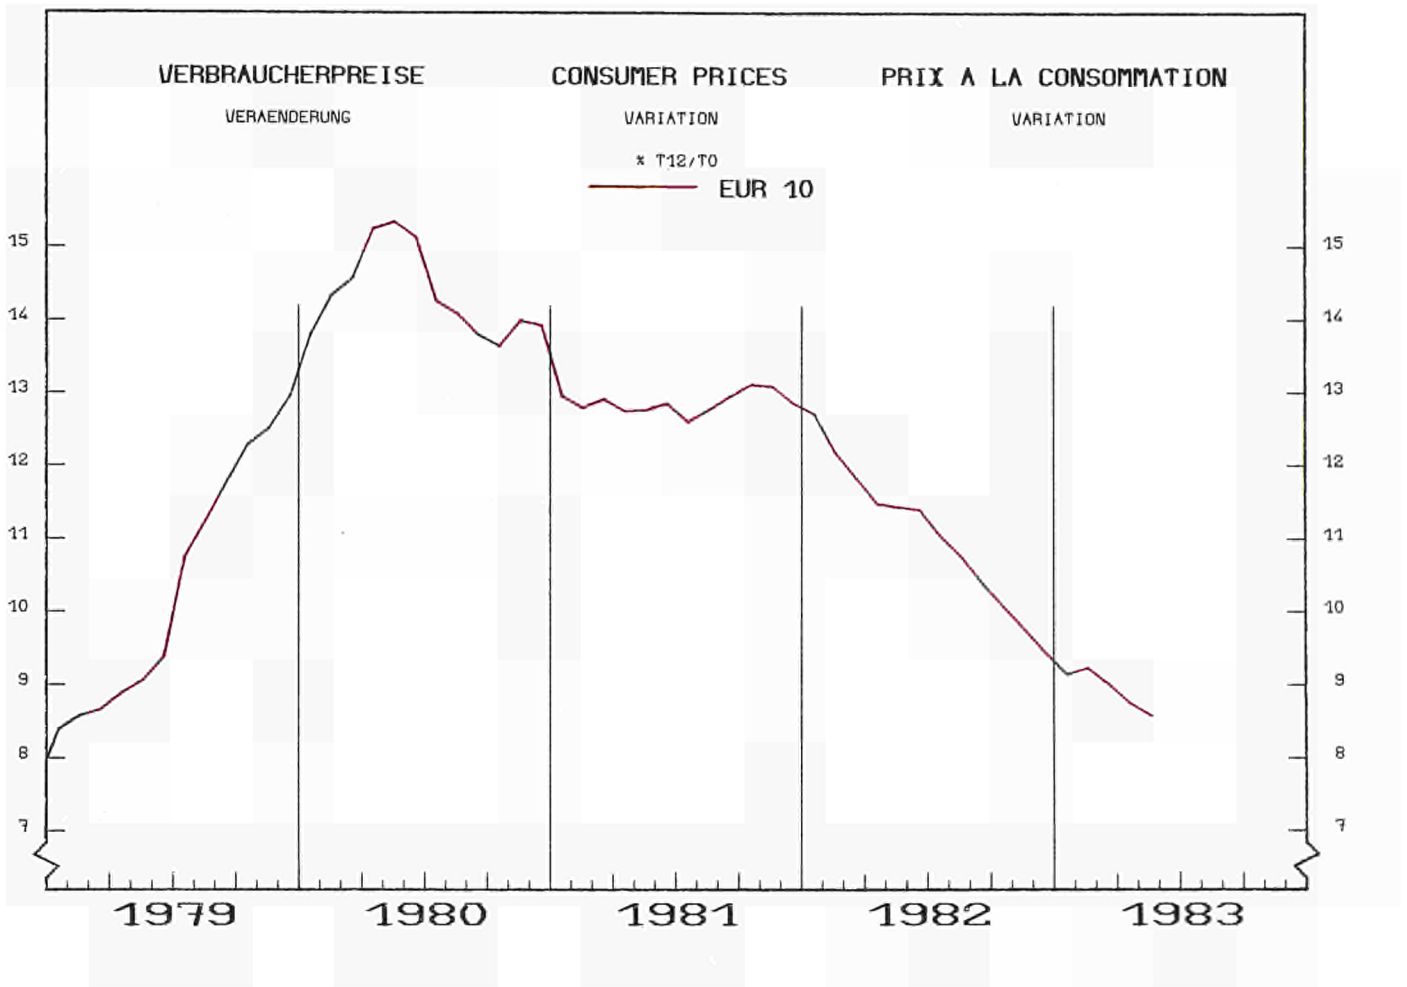

Durant les 3 premiers mois de 1983 les exportations de la Communauté vers les pays tiers ont augmenté d'à peine 1% (les chiffres dans les Pays-Bas n'étant pas encore disponibles) par rapport à la même période de 1982. Les États membres connaissant les plus fortes augmentations de leurs exportations ont été Belgique-Luxembourg (+20%) et l'Irlande (+13%). Trois États membres ont enregistré des baisses de leurs exportations, la Grèce (-12%), le Royaume-Uni (-7%) et l'Italie (-2%). Les importations de la Communauté en provenance des pays tiers (en excluant à nouveau les Pays-Bas) ont diminué de 3% par rapport aux quatre premiers mois de 1982. Six États membres ont importé moins durant cette période, l'Italie (-6%), Belgique-Luxembourg (-5%), le Royaume-Uni (-2%), le Danemark (-2%) et la Grèce (-46%). Ces baisses sont dues en grande partie à la réduction des importations de matières premières, en particulier de produits énergétiques.

7. Commerce intra-CE

Les importations entre les pays membres étaient de 6% plus élevées durant les 4 premiers mois de 1983 par rapport à Janvier-Mars 1982 (en excluant les Pays-Bas pour lesquels les chiffres ne sont pas encore disponibles). Les secteurs les plus soutenus étaient les machines et matériels de transport, les matières premières sauf les produits énergétiques, les produits chimiques et autres produits manufacturés divers. Trois États membres ont enregistré des hausses dans toutes exportations intra-CE qui étaient largement au-dessus de la moyenne, le Danemark (+16%), l'Irlande (+12%) et Belgique-Luxembourg (+11%).

	ECU	BFR	DM	FF	IRL	UKL	USD
Einzelpreis • Single copy • Prix par numéro	3,29	150	8	22	2.30	1.90	3.50
Abonnement • Subscription	24,95	1 140	59	165	18	14	24

Das Jahresabonnement beginnt
 am 1. Januar und
 endet am 31. Dezember.

The annual subscription runs
 from 1 January to
 31 December of each year.

Les abonnements sont annuels; ils portent sur
 une période allant du 1^{er} janvier au 31 décembre
 de chaque année.

Zahlungen können nur an die
 auf Umschlagsseite 3 angegebenen
 Vertriebsbüros geleistet werden.

Payments to be made only to the agents
 in the countries listed on page 3
 of the cover.

Les versements doivent être adressés
 aux bureaux de vente indiqués à la page 3
 de la couverture.

Die Versandkosten für Luftpostzustellung sind im
 Preis nicht enthalten. Die Bedingungen für Luftpost-
 abonnements sind bei den Vertriebsbüros zu erfragen.

These are surface mail rates;
 for air subscription rates
 please apply to the agents.

Les prix ne comprennent pas les frais
 d'expédition par avion; pour les conditions d'abonnement
 par avion, consulter les bureaux de vente.
