1) Statistics for the Associated Countries are published in the "Statistical Yearbook of the AASM - 1973" - S.O.E.C.

I N T R O D U C T I O N

The following pages contain some statistics collected by the Statistical Office on the African, Caribbean and Pacific countries which are Associable States of the European Community (1). The aim of this publication is to help the structure of and latest developments in these countries to be more widely known. It is intended to assist in preliminary researches and to give an overall picture of the economies of these countries in particular with regard to trade with other countries, principally the Community.

This document "SELECTED FIGURES for Associables" is a supplement to the Statistical Yearbook which the Office has been publishing regularly for some years. It is no more than the preliminary approach to the subject : the tables frequently contain gaps which it is hoped will be progressively filled in as time goes on.

(1) The countries commonly referred to as "Associables" are the 19 independent Commonwealth countries referred to in Appendix VI of the Accession Treaty, plus the Sudan, Guinea, Liberia, Equatorial Guinea and Ethiopia. These countries have accepted the Community's offer (Protocol 22 of the Accession Treaty) to negotiate a Treaty of Association. These countries are listed on page 4.

NOTE ON THE EXTERNAL TRADE STATISTICS

The data on external trade are generally taken from the specialised publications of the United Nations, FAO and the Economic Commission for Africa. They are statistics worked out directly by the Customs or the national statistics offices.

Recent statistics are not available for some countries and in these cases we considered it best to use the data published by the IMF. These are arrived at from estimates made by the Statistical Office of the IMF on the basis of reciprocal data from trading partners, and are given in brackets () to emphasise that they are estimates. In the tables of exports and imports by countries, the WORLD has two lines of figures, A showing the data worked out directly by the countries and B showing for comparison the figures estimated by the IMF.

SOURCES

The data published in this brochure have been extracted from the publications of :

- the statistical offices of the "associable" states : yearbooks, bulletins, etc.
- the statistical office of the United Nations (New York) : Statistics Yearbook, Monthly Bulletin of Statistics, Yearbook of International Trade Statistics, Yearbook of National Accounts Statistics
- the statistical division of the FAO (Rome) : Production Yearbook, Trade Yearbook
- the statistical office of the Economic Commission for Africa (Addis Ababa) : Foreign Trade Statistics for Africa, series A and B
- the statistical office of the International Monetary Fund (Washington) : Department of Trade : Annual Report.

ECONOMIC ZONES

used for the external trade statistics

<u>WORLD</u>	: All countries of origin or destination
<u>CLASS 1</u>	: Industrialised countries with market economy
<u>CLASSE 2</u>	: Developing countries
<u>CLASSE 3</u>	: Countries with planned economy
<u>EUR 9</u>	: Member States of the European Communities : German Federal Republic, France, Italy, Netherlands, E.L.E.U., United Kingdom, Ireland, Denmark
<u>O.C.D.E.</u>	: Organisation for Economic Co-operation and Development : EUR 9, Norway, Sweden, Finland, Iceland, Austria, Switzerland, Portugal, Spain, Greece, Turkey, Canada, USA and Japan
<u>Mediterranean North Africa</u>	: Morocco, Algeria, Tunisia, Lybia, Egypt
<u>Tropical Africa</u>	: All countries making up the continent except for the "Mediterranean North Africa" South Africa and Rhodesia

PRINCIPAL ABBREVIATIONS USED

() estimates	mt	metric tons
- negligible	cts	carats
: data not available	kWh	kilowatt-hours
% per cent	m ³	cubic metres
\$ dollars	G.D.P.	gross domestic product
kg kilograms	S.T.C.	statistical and tariffs classification
mill millions		

Attention : in the tables, the comma sign (,) separates the units from the decimals.
