## Hinweis für den Leser

Eurostatistik wird im Laufe des Jahres 1985 zum Zwecke der Ausdehnung und Verbesserung des Informationsmaterials einige Änderungen erfahren.

- Ab Nr. 1-1985
  - wurde der Schaubilderteil erweitert, um einerseits neue Bereiche der Konjunkturanalyse und andererseits Spanien, Portugal, die Vereinigten Staaten und Japan einzuschließen;
  - wurde das Jahr 1980 anstatt 1975 als Basisjahr für die veröffentlichten Indizes eingesetzt.
  
- Ab Nr. 1-1986 werden Angaben über Spanien, Portugal, die Vereinigten Staaten und Japan im vorher „Gemeinschaftstabellen“ und künftig „Konjunkturelle Angaben“ genannten Tabellenteil aufgeführt werden.

Diese Änderungen könnten in den kommenden Ausgaben einige vorübergehende Unregelmäßigkeiten zur Folge haben, wofür sie Eurostatistik bereits im voraus um Verständnis bittet.

(\*) Die in diesem Teil des Bulletins enthaltenen Angaben stellen die Ergebnisse der Konjunkturerhebung bei den Unternehmern in der Gemeinschaft dar. Ausführlichere Daten werden in „Europäische Wirtschaft“ veröffentlicht.

### 1. ARBEITSLOSIGKEIT: Leichter Rückgang für die Gemeinschaft im November 1985

Im Laufe des Monats November 1985 hat sich die Lage auf dem Arbeitsmarkt der Gemeinschaft nur geringfügig verändert. Die Zahl der bei den Arbeitsämtern in der Gemeinschaft gemeldeten Arbeitslosen liegt jetzt bei 12,7 Mio, das entspricht einer Arbeitslosenquote von 11,2 %, gemessen an den zivilen Erwerbspersonen. Die saisonbereinigten Werte sind für die Gemeinschaft (ohne Griechenland) gleichbleibend bis schwach abnehmend. Nationale Berechnungen für die Niederlande, Frankreich und das Vereinigte Königreich zeigen ebenfalls rückläufige Werte. Irland meldet hingegen einen leicht ansteigenden Trend und in der Bundesrepublik Deutschland hat die außergewöhnliche Wettersituation die Zahl der Arbeitslosen überdurchschnittlich ansteigen lassen. Die starke Veränderung der Zahl der Arbeitslosen in Dänemark ist mit einem in diesem Land üblichen saisonalen Höchststand im Oktober zu erklären.

Im Durchschnitt des Jahres 1985 dürfte die Zahl der eingeschriebenen Arbeitslosen in der Gemeinschaft mit etwa 12,8 Mio um gut 3 % höher liegen als im Jahr 1984. Zu den Mitgliedstaaten mit z. T. deutlich abnehmender Arbeitslosenzahl gehören Dänemark, die Niederlande, Belgien und Luxemburg (von -10 % bis etwa -4 %). Zunehmende Arbeitslosenzahlen werden sich für dieses Jahr für Italien, Irland, Frankreich, das Vereinigte Königreich und die Bundesrepublik Deutschland ergeben (von etwa 9 % bis unter 2 %).

Aus dieser Betrachtung ausgeschlossen bleibt Griechenland, da die Veränderung in der ausgewiesenen Zahl der eingeschriebenen Arbeitslosen weitgehend nur die Ausweitung des Systems der Erfassung und Sicherung gegen Arbeitslosigkeit auf größere Teile der Arbeitnehmerschaft widerspiegelt, nicht aber die tatsächliche Entwicklung der Arbeitslosigkeit, die nach Ergebnissen der Arbeitskräfte-Erhebung weitgehend unverändert bleibt.

### 2. PREISE: Die Inflation läßt auch im November weiter nach (+0,3 %)

Nach den Berechnungen von Eurostat in Luxemburg stieg der Verbraucherpreisindex für die Gemeinschaft zwischen Oktober und November 1985 um 0,3 %. Die Zuwachsraten waren in den meisten Ländern bescheiden und lagen zwischen 0 und 0,3 %. Die Ausnahmen bildeten *Italien*, das eine bedeutende Steigerung meldete (+0,7 %) und Griechenland, wo die Preise auch im November weiter emporschnellten (+2,5 %).

Der griechische Verbraucherpreisindex stieg somit in der Zeit vom September bis November um nicht weniger als 11,3 %.

Der Vierteljahresindex für Irland stieg von Mitte August bis Mitte November 1985 um 0,2 %, was einer monatlichen Zuwachsrate von 0,1 % entspricht.

Die Inflationsrate, gemessen am Verbraucherpreisindex, betrug 5,1 % (November 1985 im Vergleich zu November 1984).

Auf der Grundlage der Angaben für 11 Monate und unter Berücksichtigung der Tatsache, daß im allgemeinen die Preissteigerungen im Monat Dezember niedrig sind, kann der Anstieg der Verbraucherpreise für 1985 auf etwa 5,0 % geschätzt werden.

Die entsprechenden Schätzungen von Eurostat für die einzelnen Mitgliedstaaten sehen wie folgt aus:

BR Deutschland 1,8 %, Niederlande 1,9 %, Dänemark 3,4 %, Luxemburg 4,0 %, Belgien 4,1 %, Frankreich 4,7 %, Irland 4,9 %, Verein. Königreich 5,6 %, Italien 8,7 %, Griechenland 23,5 %

Für Spanien und Portugal werden die Steigerungsraten voraussichtlich 8 % bzw. 15 % betragen.

Für die Drittländer, für die Eurostat die Verbraucherpreisindizes veröffentlicht, werden folgende Zuwachsraten erwartet:

Österreich 2,5 %, Schweiz 3,6 %, Finnland 5,0 %, Norwegen 5,5 %, Schweden 6,0 %, Japan 2,0 %, USA 3,0 %, Kanada 4,0 %

### 3. INDUSTRIELLE PRODUKTION: Gleichbleibender Stand für die Gemeinschaft (EUR 10) im Oktober 1985, aber Verlangsamung des Wachstums in mehreren Mitgliedstaaten

*Der Index der Gemeinschaft* (EUR 10) für den Monat Oktober wird gegenwärtig auf 107,9 geschätzt, das bedeutet einen Anstieg von 1,5 % gegenüber dem Index für Oktober 1984.

*Der saisonbereinigte Index für Oktober* (nach derzeitigen Erkenntnissen 103,1) dürfte auf dem gleichen Stand wie in den Vormonaten geblieben sein. Diese Indizes spiegeln eine gewisse Atempause im Wachstum der industriellen Produktion der Europäischen Gemeinschaft insgesamt wider.

*Der Tendenzindikator* (Mittelwert der letzten drei Monate gegenüber dem der vorangegangenen drei Monate) bestätigt mit einem Anstieg von 0,0 % die stabile Tendenz. In Italien, den Niederlanden, Luxemburg und Irland schwächt sich der Tendenzindikator jedoch ab.

*Für die letzten drei Monate, über die Angaben vorliegen*, beläuft sich die jährliche Veränderung des Gesamtindex gegenüber den entsprechenden drei Vorjahresmonaten für EUR 10 auf 2,4 %. Die Veränderung beträgt 7,0 % für Dänemark, 5,4 % für das Vereinigte Königreich, 4,7 % für die BR Deutschland und -0,2 % für Frankreich. Für Italien und Irland wurde eine Abschwächung von 0,5 % verzeichnet.

Die entsprechenden Werte für die Vereinigten Staaten und Japan liegen bei 0,9 % bzw. ca. 4,7 %.

### 4. STAHL: Für 1985 bleibt die Produktion der Gemeinschaft auf dem Niveau des Jahres 1984 (119 Mio t)

Die Rohstahlerzeugung der Gemeinschaft (ohne Griechenland) ist im November 1985 – saisonbereinigt – gegenüber dem Vormonat um 2 % auf 10 Mio t zurückgegangen; dieses Ergebnis bleibt um 2,5 % unter dem Novemberergebnis 1984.

Auf Grund der Produktionsvorausschätzungen der Werke für Dezember ist für 1985 mit einer Rohstahlerzeugung von etwa 119 Mio t zu rechnen; damit wird ungefähr der gleiche Stand wie 1984 erreicht werden.

Der Auftragseingang an Mass Stahl hat im September, verglichen mit August, saisonbereinigt um 11,3 % zugenommen. Dieses Ergebnis entspricht einem Anstieg um 7 % gegenüber September 1984.

Im ersten 9 Monaten 1985 lag der Auftragseingang für Mass Stahl mit 65,4 Mio t um 4,1 % über dem vergleichbaren Vorjahresergebnis.

### 5. ENERGIE: Im ersten Halbjahr 1985 wurden 25 % der Steinkohlenversorgung der europäischen Kraftwerke importiert

Da das Vergleichsjahr 1984 einen ungewöhnlich starken Rückgang der Lieferungen um 30 % zu verzeichnen hatte (der ausschließlich auf den Streik im britischen Kohlenbergbau zurückzuführen war), ragt das 1. Halbjahr 1985 gegenüber dem entsprechenden Zeitraum 1984 mit einer Steigerung der Lieferungen um fast 7 Mio t Steinkohle heraus. Die Lieferungen an die britischen Kraftwerke entsprechen wieder der Hälfte der Lieferungen an Kraftwerke in der Gemeinschaft, woraus eine Rückkehr zum Normalzustand ersichtlich wird.

Trotz dieser Zunahme hat die Versorgung mit Importkohle aus Drittländern ihren Stand von 18,5 Mio t gehalten und deckt 25 % des gesamten Kraftwerksbedarfs. Die wichtigsten Lieferländer sind in absteigender Folge Südafrika mit 7,5 Mio t, die Vereinigten Staaten von Amerika mit 4,4 Mio t und Australien mit 3 Mio t. Es fällt auf, daß die Lieferungen aus Polen gesunken sind, wobei die im ersten Halbjahr 1985 gelieferten Mengen nur noch die Hälfte der Menge ausmachen, die 1984 geliefert wurde.

Die Kraftwerksversorgung ist somit zu 75 % aus Gemeinschaftskohle bestritten worden, gegenüber 71,5 % im entsprechenden Zeitraum 1984; der Bedarfszuwachs an Kesselkohle wurde ausschließlich aus Gemeinschaftsvorkommen gedeckt.

Gegenüber dem ersten Halbjahr 1984 ist im gleichen Zeitraum 1985 eine Zunahme der Steinkohlenlieferungen an die Kokereien um nahezu 2,5 Mio t zu verzeichnen, wobei der Verbrauch im gleichen Verhältnis zugenommen hat. Die Liefermenge belief sich auf 38 Mio t gegenüber etwas mehr als 35 Mio t im ersten Halbjahr 1984. Diese Steigerung fand in erhöhter Kokskehleinfuhr aus Drittländern (+2,4 Mio t) ihren Niederschlag, während der Versorgungsstand mit Gemeinschaftskohle unverändert blieb. Daraus ergab sich, daß die Einfuhr aus Drittländern 38,5 % des Gemeinschaftsbedarfs (gegenüber 34,5 % im Jahre 1984) deckte. Bedeutendstes Lieferland sind nach wie vor die Vereinigten Staaten mit 9 Mio t Kokskehle.

## 6. EINZELHANDEL – VERKAUSINDEX: Leichte Zunahme des Verkaufsvolumens im August 1985

Im Vergleich August 1985 zu August 1984 weist der unbereinigte Index in allen Ländern mit Ausnahme Frankreichs eine Zunahme auf. Während in Frankreich ein leichter Rückgang (–0,3 %) festzustellen ist, steigt der Index im Vereinigten Königreich um 6,6 %, in den Niederlanden, Irland und Dänemark um über 4 %.

Im Vergleich der ersten acht Monate des Jahres 1985 mit der entsprechenden Periode des Vorjahres errechnet sich ein Rückgang des Verkaufsindex in Frankreich (–2,9 %) und in Griechenland (–3,6 %). Der Index steigt um 4,6 % im Vereinigten Königreich, um 1,1 % in Irland, um 0,4 % in Belgien und Dänemark und um lediglich 0,2 % in der Bundesrepublik Deutschland sowie den Niederlanden.

Auf Grundlage der bereits verfügbaren Angaben scheint es unwahrscheinlich, daß sich die Aufwärtstendenz des Monats August im September fortsetzt.

## 7. AUSSENHANDEL: Im 3. Vierteljahr 1985 weist die Handelsbilanz der Gemeinschaft eine leichte Verbesserung auf, aber der Wachstumsrhythmus der Exporte verlangsamt sich (+8 %)

Die *Ausfuhren* der Gemeinschaft in Drittländer stiegen im dritten Quartal wesentlich langsamer als im zweiten. Eurostat-Schätzungen zufolge lagen sie im zweiten Quartal um 17 % höher als im entsprechenden Zeitraum 1984, aber um nur 8 % über der Ausfuhr im 3. Quartal. Im Augenblick läßt sich noch nicht abschätzen, inwieweit diese Entwicklung im wesentlichen auf ein langsames Volumenwachstum oder auf Auswirkungen des Wechselkurses zurückzuführen ist (in Dollar ausgedrückte Preise sanken in den vergangenen Monaten, wenn sie in ECU ausgewiesen wurden). Dieser Rückgang beeinträchtigte die Ausfuhr in die meisten Bestimmungsländer. Die Zonen mit dem stärksten Rückgang des EG-Ausfuhrwachstums waren die USA (35 % Wachstum im 2. Quartal, 14 % im 3. Quartal), die AKP-Staaten (Rückgang von 16 % auf 1 %) und die Staatshandelsländer (Rückgang von 29 % auf 15 %). Die Ausfuhr in die OPEC-Staaten sank im 3. Quartal um 14 %. Andererseits konnte bei den Ausfuhren nach Spanien eine um 21 % höhere Wachstumsrate festgestellt werden. Deutschland erzielte im 3. Quartal das stärkste Ausfuhrwachstum (14 %), wohingegen Frankreich (0 %) und Italien (3 %) am meisten vom Wachstumsrückgang betroffen waren. Die Produktionssektoren mit dem langsamsten Wachstum waren Nahrungsmittel (–6 %) und Brennstoffe (1 %), während die Ausfuhr sonstiger Fertigwaren (18 %) wie auch Maschinen und Verkehrsmittel (14 %) überdurchschnittliche Zuwachsraten aufwies.

Die Ausfuhr der USA ging im 3. Quartal um 8 % zurück, während der japanische Export um 3 % anstieg.

Wie bei den Ausfuhren stiegen die *Einfuhren* aus Drittländern im zweiten Quartal langsamer (nach Schätzungen 11 % jährliches Wachstum im 2. Quartal, im Vergleich zu 2 % Wachstum im 3. Quartal). Die Einfuhren aus Italien und Belgien/Luxemburg sanken um 9 %, in Dänemark konnte mit einer Zunahme von 8 % der stärkste Anstieg festgestellt werden. Brennstoffe waren mit einer Senkung von 4 % der am stärksten betroffene Produktionssektor, wohingegen die Einfuhr von Maschinen, Verkehrsmitteln und chemischen Produkten 10 % stieg.

Einfuhren aus Portugal (21 %) Spanien (16 %) und Japan (15 %) wiesen weiterhin überdurchschnittliche Zuwachsraten auf; dagegen gingen die Einfuhren aus den USA (–8 %) und aus den AKP-Staaten (–13 %) zurück.

Die Einfuhren der USA blieben im 3. Quartal unverändert, während die japanischen Einfuhren um 12 % zurückgingen.

Das *Handelsdefizit* der Gemeinschaft mit der übrigen Welt belief sich im 3. Quartal auf einen Monatsdurchschnitt von 1,0 Milliarde ECU und stellte somit eine wesentliche Verbesserung innerhalb der vergangenen 12 Monate dar. Andererseits betrug das Handelsdefizit der Gemeinschaft mit Japan, das sich seit einigen Jahren nahezu laufend verschlechtert hat, durchschnittlich 1,4 Milliarden ECU pro Monat. Das Handelsdefizit der USA belief sich im 3. Quartal auf einen Monatsdurchschnitt von 16,3 Milliarden ECU, wohingegen Japans Handelsüberschuß monatlich 5,4 Milliarden ECU erreichte.

Im Gegensatz zum Handel mit Drittländern wiesen die Einfuhren aus anderen Mitgliedstaaten im 3. Quartal nur einen geringfügigen Rückgang der Wachstumsrate auf (von 14 % im 2. Quartal auf 11 %). In Dänemark (19 %) und in den Niederlanden (17 %) wurde das höchste Wachstum der Einfuhren und in Belgien/Luxemburg (5 %) das niedrigste festgestellt. Nur Brennstoffeinfuhren (1 %) wiesen im Vergleich zum Durchschnittswachstum der anderen bedeutendsten Produktionssektoren eine sehr unterschiedliche Wachstumsrate auf.

## 8. WECHSELKURSE: Die Wechselkurse hängen bisweilen vom Inflationsgefälle ab

Der Wechselkurs ist ein sehr sensibler finanzieller Indikator und reagiert daher unverzüglich auf die Ankündigung politischer Maßnahmen oder verschiedene wirtschaftliche Störungen, da die Marktbeteiligten den erwarteten wirtschaftlichen Auswirkungen der besagten Maßnahmen sofort Rechnung tragen. Jüngstes Beispiel für dieses Phänomen ist der Wechselkurs des Pfund Sterling: der erwartete Rückgang der Ölpreise (nach der Entscheidung der OPEC, möglicherweise die Ölproduktion zu steigern) führte sofort zu einer Verschlechterung des Pfund-Wechselkurses; Anfang letzter Woche (9. bis 15. Dezember) hatte das Pfund gegenüber dem Dollar 5 % verloren.

Aufgrund des nachfolgenden (vorübergehenden?) Anstiegs der Ölpreise konnte das Pfund inzwischen einen Teil des verlorenen Terrains zurückgewinnen.

Die relative Stabilität des *Dollars* auf dem niedrigen Stand, den er in den letzten beiden Monaten erreicht hat, sowie die kürzlich zu verzeichnende Bewegung des Wechselkurses des *japanischen Yen* in Richtung auf sein langfristiges Gleichgewicht (er ist in den letzten Monaten von 250 auf 200 Yen pro Dollar gestiegen) haben dazu beigetragen, daß sich das Interesse nunmehr auf die europäischen Währungen und dabei insbesondere auf die EWS-Währungen konzentriert. Der *belgische Franken* erscheint wiederum als schwächste EWS-Währung, und da er sich den bilateralen Interventionsgrenzen nähert, sind die ersten Maßnahmen zu seiner Stützung im Rahmen des EWS zu erwarten (Intervention, Zinssatzpolitik usw.). Die Senkung des Diskontsatzes durch die Banque Nationale de Belgique vor 2 Monaten wurde zunächst als Zeichen der Stärke der belgischen Währung gewertet. Diese Interpretation konnte sich jedoch nur kurze Zeit halten, und in den letzten Wochen ist der Franken auf seinen derzeitigen niedrigen Stand abgeglitten.

Das überraschend unauffällige Verhalten der *DM* innerhalb des EWS, das relativ lange angehalten hat, scheint mit der für die deutsche Währung jetzt festzustellenden Aufwärtstendenz ein Ende gefunden zu haben. Seit der allgemeinen Neuorientierung der Wechselkurse im März 1983 hat das beträchtliche Zinssatzgefälle zugunsten der anderen EWS-Währungen wesentlich dazu beigetragen, das Gleichgewicht des Systems zu wahren (die Stärke des Dollar hat dabei sicher eine Rolle gespielt), indem die DM auf einem recht niedrigen Stand gehalten wurde.

Andererseits besteht in den EWS-Ländern noch immer ein – allerdings stetig abnehmendes – Inflationsgefälle, dessen kumulative Auswirkungen sich – durch die verlorene Wettbewerbsfähigkeit – schließlich in Leistungs- und Handelsbilanzdefiziten der betroffenen Länder niederschlagen. Die genannten Ungleichgewichte in der Zahlungsbilanz üben, wenn sie weiter bestehen und zunehmen, Druck auf die Wechselkurse aus, was nur kurzfristig durch das Zinssatzgefälle ausgeglichen werden kann.

---

## Note to readers

A certain number of enhancements to Eurostatistics will take place in 1985:

- From issue 1-1985:
  - The graphical section was expanded to cover new areas of short-trend economic analysis, and to include Spain, Portugal, the United States, and Japan.
  - 1980 has replaced 1975 as the base year for indices.
- From issue 1-1986, Spain, Portugal, the United States and Japan will be included in the section entitled 'Community tables', which will itself be renamed 'trends.'

These changes may cause certain anomalies for which Eurostatistics offers you its apologies.

(<sup>1</sup>) The data included in this section of the bulletin are results from a short-term-trends enquiry conducted among heads of enterprises in the Community. More detailed data appear in *European Economy*.

## 1. UNEMPLOYMENT: A slightly falling trend for the Community in November 1985

In November 1985 there was little change in the labour market situation in the Community. The number of persons registered as unemployed at unemployment offices in the Community stood at 12.7 million, corresponding to an unemployment rate among the civilian working population of 11.2%.

Similarly, the seasonally-adjusted data for the Community (excluding Greece) was stable but suggests a slightly falling trend. This was also reflected in the national calculations for the Netherlands, France and the United Kingdom. In Ireland, however, a slight rise was recorded, while in the Federal Republic of Germany exceptional weather conditions produced an above-average rise in the number of unemployed. The large swings in the number of unemployed in Denmark in recent months were, in turn, attributable to the fact that in Denmark the highest unemployment levels for this time of year are usually recorded in October.

The probable average number of registered unemployed in the Community of Nine in 1985, at about 12.8 million, will be at least 3% higher than in 1984. The Member States in which the number of unemployed has dropped, in some cases significantly, include Denmark, the Netherlands, Belgium and Luxembourg (approximately -10% to -4%). In contrast, there will be a rise in the unemployment figures for Italy, Ireland, France, the United Kingdom and the Federal Republic of Germany (ranging from about 9% to under 2%).

The above comments do not apply to Greece, where the change in the recorded figure for registered unemployed stems largely from the fact that the system for recording unemployment together with the social security provisions for unemployment have been extended to include large numbers of employers and does not reflect a real change in unemployment levels which, according to results from the labour force survey, have remained more or less unchanged.

## 2. PRICES: The slowing down of inflation continues in November (+ 0.3%)

According to the calculation of Eurostat in Luxembourg the CPI for the Community as a whole rose by 0.3% between October and November 1985.

Increases were rather modest in most of the Member States, between 0 and 0.3%.

However there were two exceptions: Italy recorded a somewhat larger rise (0.7%), while the very rapid inflation in Greece continued in November with 2.5% in one month. Prices in Greece rose by 11.3% during the period from September to November.

The quarterly index for Ireland rose by 0.2% between mid-August and mid-November 1985, which corresponds to a monthly average of less than 0.1%.

The average inflation rate in the Community over the year (November 1985/November 1984) as measured by the CPI is 5.1% on the basis of data for 11 months and given the fact price increases are generally low in December, it can now be estimated that the rise for the whole year 1985 will be around 5.0%.

Eurostat estimates that the corresponding figures for the individual countries will be as follows:

Germany 1.8%, Netherlands 1.9%, Denmark 3.4%, Luxembourg 4.0%, Belgium 4.1%, France 4.7%, Ireland 4.9%, United Kingdom 5.6%, Italy 8.7%, Greece 23.5%

The inflation rates in 1985 for Spain and Portugal are estimated by Eurostat at 8.0% and 15%.

The rates for the non-Community countries for which Eurostat publishes the CPI are expected to be the following:

Austria 2.5%, Switzerland 3.6%, Finland 5.0%, Norway 5.5%, Sweden 6.0%, Japan 2.0%, USA 3.0%, Canada 4.0%

## 3. INDUSTRIAL PRODUCTION: The level for the Community (EUR 10) was maintained in October 1985 but there was a slackening growth for several Member States.

*The index for the Community (EUR 10) for October is currently estimated at 107.9, 1.5% above the index for the October 1984.*

*After seasonal adjustment, the October index - currently 103.1 - may be regarded as being at the same level as the indices for the three preceding months. These indices reflect a flattening out of the rate of growth of industrial production for the Community as a whole.*

*The trend indicator (average of the last three months compared to the preceding three months) remains unchanged confirming a stabilized trend, but the trend indicators were falling in Italy, the Netherlands, Luxembourg and Ireland.*

*For the last three months for which figures are available the change as compared with the same three months of the previous year was 2.4% for EUR 10. The difference was 7.0% for Denmark, 4.7% for the Federal Republic of Germany, 5.4% for the United Kingdom and -0.2% for France. For Italy and Ireland there was a deep of 0.5%.*

*The corresponding figures rose by 0.9% for the United States and by 4.7% for Japan.*

## 4. STEEL: In 1985 same level of Community production as in 1984 (119 million tonnes)

In November 1985 approximately 10 million tonnes of crude steel were produced in the Community (excluding Greece). This figure represents a deseasonalized drop of 2% compared with October 1985 and a fall of 2.5% compared with November 1984.

On the basis of estimates made by the works Community crude steel production (excluding Greece) of 119 million tonnes can be expected for the year 1985; i.e. the same result as in 1984.

In September 1985 new orders (ordinary steels) experienced a deseasonalized rise of 11.3% compared with the previous month; this corresponds to 7% more than in September 1984. The sum of the first nine months of 1985, at 65.4 million tonnes, thus works out at 4.1% above that of the analogous period of 1984.

## 5. ENERGY: In the first six months of 1985, 25% of supplies of coal to European power stations was imported

Against the background of an exceptional sharp reduction of 30% in 1984 (due entirely to the British miners' strike), the first half of 1985 is marked by an increase in supplies of just under 7 million tonnes of coal compared with the same period in 1984. Supplies to British power stations again represent half of supplies to Community power stations, which is clear evidence of a return to a normal situation.

In spite of this increase, supplies of coal imported from third countries remain at the same level of 18.5 million tonnes, providing 25% of the total requirements of power stations. The main suppliers are, in order of importance, South Africa with 7.5 million tonnes, the United States of America with 4.4 million tonnes and Australia with 3 million tonnes. There was a sharp decline in supplies from Poland in the first half of 1985 to only half the level they had reached over the same period in 1984.

Community coal thus represented 75% of power-station supplies as compared with 71.5% for the same period in 1984, the increase in steam coal demand being met entirely with Community resources.

Coal supplies to coking plants in the first half of 1985 were 2.5 million tonnes higher than for the same period in 1984 and consumption increased by the same amount. Supplies reached a total of just under 38 million tonnes compared with just over 35 million

tonnes for the first half of 1984. This increase was accompanied by a rise in coking coal imports from third countries (+2.4 million tonnes), whereas Community coal supplies remained stable. Imports from third countries thus met 38.5% of Community demand (as opposed to 34.5% in 1984). The United States is still the most important supplier of coking coal (9 million tonnes).

## 6. RETAIL SALES — INDEX NUMBERS: Slight rise in the volume of sales in August 1985

- (a) The index of gross volume of sales for August 1985 has risen compared with that for August 1984 in all the countries except in France where it is very slightly down (-0.3%). It is in the United Kingdom that the index has experienced the sharpest rise (+6.6%), followed by the Netherlands, Ireland and Denmark where the volume of sales rose by more than 4%.
- (b) Compared with the first eight months of 1984, the index of the volume of sales experienced during the period January to August 1985 a drop of 2.9% in France and of 3.6% in Greece. The index rose by 4.6% in the United Kingdom, by 1.1% in Ireland, by 0.4% in Belgium and Denmark and by only 0.2% in the Federal Republic of Germany and the Netherlands.
- (c) It does not seem likely from the information already available that the upward trend established in August will be maintained throughout September.

## 7. EXTERNAL TRADE: Net improvement of the Community's trade balance, but expansion of exports slightly less rapid (+8%) in the third quarter of 1985

Community exports to third countries grew considerably slower in the third quarter than in the second. Eurostat estimates that exports were 17% higher in the second quarter compared with the corresponding period of 1984, but only 8% higher in the third quarter. It is too early to tell whether this is mainly due to slower volume growth or due to exchange-rate effects (prices fixed in dollar terms have fallen in recent months when expressed in terms of ECU). The slowdown affected exports to most destinations. The zones with the largest reductions in EC export growth were the USA (35% growth in the second quarter down to 14% in the third quarter), ACP countries (16% down to 1%) and countries with State trade (29% down to 15%). Exports to OPEC countries fell 14% in the third quarter. On the other hand, exports to Spain had a faster growth rate and were 21% higher. The Federal Republic of Germany had the fastest export growth (14%) in the third quarter whilst France (0%) and Italy (3%) were the most affected by the slowdown in growth. The slowest growing product sectors were food (-6%) and fuels (1%) whilst exports of miscellaneous manufactures (18%) and machinery and transport equipment (14%) grew at well above average rates.

The USA's exports were 8% lower in the third quarter whilst those of Japan rose by 3%.

As with exports, imports from third countries grew more slowly than in the second quarter (an estimated 11% year-on-year growth in the second quarter as against 2% growth in the third quarter). Imports by Italy and Belgium, Luxembourg fell by 9% and Denmark, with an 8% rise, had the largest increase. Fuels were the most depressed product sector, with a 4% fall, whilst both machinery and transport equipment, and chemical imports rose by 10%. Imports from Portugal (21%), Spain (16%) and Japan (15%) continued to rise at above-average rates whilst imports were lower from the USA (-8%) and from ACP countries (-13%).

The USA's imports were static in the third quarter whilst Japan's were 12% lower.

The Community's trade deficit with the rest of the world averaged 1 000 million ECU per month in the third quarter, representing a substantial improvement over the last 12 months. On the other hand the Community's trade deficit with Japan, which has been deteriorating fairly continuously for several years, averaged about 1 400 million ECU per month. The USA's trade deficit averaged 16 300 million ECU per month in the third quarter, whilst Japan's trade surplus reached 5 400 million ECU per month.

In contrast to trade with third countries, imports from other member states showed only a small reduction in growth rate in the third quarter (down to 11% from 14% in the second quarter). Denmark (19%) and the Netherlands (17%) had the fastest import growth and Belgium-Luxembourg (5%) the lowest. Only fuel imports (1%) among the main product sectors had a growth rate much different from the average.

## 8. EXCHANGE RATES: Exchange rates depend sometimes on inflation differentials

The exchange rate is a very sensitive financial indicator and therefore it reacts immediately to the announcement of policy measures or to various economic disturbances as the market participants quickly discount the future economic effects of the said measures. The sterling's exchange rate is the most recent example of this phenomenon: the expected fall of the oil prices (following OPEC's decision to increase, possibly, its oil production) immediately pushed downwards the pound's exchange rate whose loss vis-à-vis the dollar reached 5% early last week (9 to 15 December). The subsequent rise (temporary?) of the oil prices has helped the pound to regain part of the lost ground.

The dollar's relative stability at the low levels it had reached during the last two months as well as the recent movement of the Japanese yen toward its long-term equilibrium rate (it has appreciated from 250 to 200 yen per dollar in the last months) have both contributed to a shift of the focus to the European and particularly to EMS currencies. The Belgian franc appears again as the most weak of the EMS currencies and as it is approaching its bilateral intervention limits the first measures towards its support, in the context of the EMS, should be expected (intervention, interest-rate policy, etc). The reduction of the official discount rate by the Banque nationale de Belgique two months ago was initially taken as a sign of strength of the Belgian currency. This interpretation was nevertheless short-lived and the franc has been sliding during the last weeks to its present low level.

The unusually discreet behaviour of the DM inside the EMS which has lasted for a relatively long period seems to have come to end, as an upward trend is now discerned for the German currency. Since the general currency realignment of March 1983, the significant interest-rate differentials in favour of the other EMS currencies have played an important role in preserving the equilibrium of the system (the strength of the dollar has certainly contributed to that) by keeping the DM rather weak.

On the other hand the inflation differentials among the EMS countries, though constantly decreasing, they still exist and their cumulative effects - through the lost competitiveness - are finally translated into trade and current-account deficits for the countries concerned. The said balance-of-payments disequilibria, to the extent that they persists and accumulate, exert pressure on the exchange rates which can only temporarily be offset by the interest-rate differentials.

---

## Avis aux lecteurs

Au cours de l'année 1985, un certain nombre de changements viendront enrichir et améliorer Eurostatistiques.

- A partir du n° 1-1985:
  - la partie «graphiques» a été développée afin de couvrir de nouveaux domaines d'analyse conjoncturelle, d'une part, et d'inclure l'Espagne, le Portugal, les États-Unis et le Japon, d'autre part;
  - 1980 remplace 1975 comme année de base pour les données publiées en indices.
- A partir du n° 1-1986, des données concernant l'Espagne, le Portugal, les États-Unis et le Japon seront incluses dans la partie qui s'intitulait «Tableaux communautaires» et dont le titre deviendra alors «Données conjoncturelles».

Ces changements pourraient entraîner un certain nombre d'anomalies lors des prochaines parutions, et Eurostatistiques vous prie de bien vouloir l'en excuser.

(1) Les données contenues dans cette partie du Bulletin représentent les résultats de l'enquête de conjoncture auprès des chefs d'entreprise de la Communauté. Des données plus détaillées paraissent dans «Économie européenne».

## 1. CHOMAGE: En novembre 1985, légère tendance à la régression pur la Communauté

Au cours du mois de novembre 1985, la situation sur le marché du travail de la Communauté s'est peu modifiée. Le nombre des chômeurs inscrits auprès des services de placement de la Communauté s'élevait fin novembre à 12,7 millions ce qui correspond à un taux de chômage de 11,2 % par rapport à la population active civile.

Les données désaisonnalisées pour la Communauté (Grèce exclue) sont stables et suggèrent une légère tendance à la régression. Une telle tendance ressort également des calculs nationaux de désaisonnalisation effectués aux Pays-Bas, en France et au Royaume-Uni; en revanche l'Irlande communique une légère tendance à la hausse tandis qu'en République fédérale d'Allemagne, la situation météorologique exceptionnellement mauvaise a entraîné une augmentation du nombre des chômeurs supérieure à la moyenne. La forte variation du nombre des chômeurs au Danemark résulte d'un maximum saisonnier habituel en octobre dans ce pays.

En moyenne pour l'année 1985, le nombre des chômeurs inscrits dans la Communauté est estimé à environ 12,8 millions, dépassant d'un bon 3 % celui de l'année précédente. Le Danemark, les Pays-Bas, la Belgique et le Luxembourg font partie des pays où le chômage est actuellement en nette régression (de -10 % à environ -4 %). En revanche, en Italie, en Irlande, en France, au Royaume-Uni et en République fédérale d'Allemagne, il y aura cette année augmentation du nombre de chômeurs (de 9 % à moins de 2 %).

La Grèce reste exclue de cette analyse car la variation enregistrée des chiffres des chômeurs inscrits est due presque exclusivement à l'extension à une plus grande partie des salariés du système de recensement des chômeurs et de protection sociale en matière de chômage et non pas à une évolution réelle du chômage qui, d'après les résultats de l'enquête sur les forces de travail, reste dans une large mesure inchangé.

## 2. PRIX: Poursuite de la décélération en novembre (+ 0,3 %)

Selon les calculs de l'Eurostat, l'indice des prix à la consommation pour l'ensemble de la Communauté a progressé de 0,3 % entre octobre et novembre 1985. Les accroissements étaient modérés dans la plupart des pays allant de 0 à 0,3 %.

Les seules exceptions à signaler sont l'Italie où on enregistrait une hausse plus importante (0,7 %) et la Grèce où l'ascension des prix continuait en novembre avec 2,5 %. Dans ce pays l'indice a monté de 11,3 % dans la période de septembre à novembre.

L'indice trimestriel de l'Irlande a monté de 0,2 % entre la mi-août et la mi-novembre 1985, ce qui correspond à un accroissement en rythme mensuel de moins de 0,1 %.

Sur un an (novembre 1985/novembre 1984), le taux d'inflation pour la Communauté, mesuré par l'IPC, est de 5,1 %.

Sur la base des données disponibles pour 11 mois et en considérant que les accroissements des prix sont généralement modérés en décembre, on peut actuellement estimer que la hausse sera de l'ordre de 5,0 % pour l'ensemble de l'année 1985.

Eurostat estime que les taux correspondants pour les pays individuellement pris seront comme suit (décembre 1985/décembre 1984):

RF d'Allemagne 1,8 %, Pays-Bas 1,9 %, Danemark 3,4 %, Luxembourg 4,0 %, Belgique 4,1 %, France 4,7 %, Irlande 4,9 %, Royaume-Uni 5,6 %, Italie 8,7 %, Grèce 23,5 %

Eurostat prévoit une hausse en 1985 de l'ordre de 8 % pour l'Espagne et d'environ 15 % pour le Portugal.

Le taux pour les non communautaires pour lesquels Eurostat publie les indices seront les suivants:

Autriche 2,5 %, Suisse 3,6 %, Finlande 5,0 %, Norvège 5,5 %, Suède 6,0 %, Japon 2,0 %, USA 3,0 %, Canada 4,0 %

## 3. PRODUCTION INDUSTRIELLE: En octobre 1985 niveau maintenu pour la Communauté (EUR 10), mais ralentissement de la croissance pour plusieurs États membres.

L'indice pour la Communauté (EUR 10) du mois d'octobre est actuellement estimé à 107,9 soit une hausse de 1,5 % par rapport à l'indice du mois d'octobre 1984.

Après correction des variations saisonnières, l'indice d'octobre (actuellement 103,1) peut être considéré comme étant au même niveau que les indices des trois mois précédents. Ces indices correspondent à une certaine pause dans le rythme de croissance de la production industrielle pour la Communauté européenne dans son ensemble.

L'indicateur de tendance (moyenne des trois derniers mois par rapport à celle des trois mois précédents) avec un accroissement de 0,0 % confirme la stabilité, mais les indicateurs de tendance sont en baisse en Italie, aux Pays-Bas, au Luxembourg et en Irlande.

Pour les trois derniers mois connus, la variation en un an de l'indice d'ensemble par rapport aux trois mois correspondants est de 2,4 % pour EUR 10. La variation est de 7,0 % pour le Danemark, de 5,4 % pour le Royaume-Uni, 4,7 % pour la RF d'Allemagne et de -0,2 % pour la France. Pour l'Italie et pour l'Irlande on constate une baisse de 0,5 %.

Les taux correspondants sont en hausse de 0,9 % pour les États-Unis et de 4,7 % pour le Japon.

## 4. ACIER: En 1985, la production communautaire reste au niveau de 1984 (119 mio t)

En novembre 1985, avec 10 millions de tonnes, la production d'acier brut (Communauté sans la Grèce) a connu un recul désaisonnalisé de 2 % par rapport au mois précédent et une baisse de 2,5 % par rapport à novembre 1984.

Les prévisions des usines pour le mois de décembre permettent d'estimer à 119 millions de tonnes la production totale de l'année 1985. Ce chiffre correspond aux résultats de 1984.

En septembre 1985, les commandes nouvelles (aciers courants) ont enregistré une hausse désaisonnalisée de 11,3 % par rapport au mois précédent et une progression de 7 % par rapport à septembre 1984. Les 9 premiers mois de 1985 se soldent ainsi, avec 65,4 millions de tonnes, par une progression de 4,1 % par rapport à la période analogue de 1984.

## 5. ENERGIE: Au 1<sup>er</sup> semestre 1985, 25 % de l'approvisionnement en houille des centrales électriques européennes sont assurés par des importations

Compte tenu que l'année 1984 a été caractérisée par une forte baisse exceptionnelle de 30 % (imputable entièrement à la grève dans les charbonnages britanniques), le premier semestre 1985, par rapport à la période homologue de 1984, se distingue par une augmentation des approvisionnements de près de 7 millions de tonnes de houille. Les livraisons aux centrales britanniques représentent de nouveau la moitié des livraisons aux centrales communautaires, ce qui concrétise le retour à une situation de période normale.

Malgré cette augmentation, l'approvisionnement en houille importée des pays tiers est resté au même niveau avec 18,5 millions de tonnes et couvrent 25 % de la demande totale des centrales. Les fournisseurs les plus importants sont, en ordre décroissant, l'Afrique du Sud avec 7,5 millions de tonnes, les États-Unis d'Amérique avec 4,4 millions de tonnes et l'Australie avec 3 millions de tonnes. On note un net recul des fournitures en provenance de la Pologne, les quantités livrées au cours du premier semestre 1985 ne représentant plus que la moitié des quantités livrées en 1984.

L'approvisionnement des centrales a été ainsi assuré à raison de

75 % par du charbon communautaire contre 71,5 % pour la période homologue en 1984, l'accroissement des besoins en charbon-vapeur ayant été couvert entièrement à partir des ressources communautaires.

Par rapport au premier semestre 1984, on note, pour la même période de 1985, une augmentation de l'approvisionnement en houille des cokeries de près de 2,5 millions de tonnes, la consommation augmentant dans les mêmes proportions. L'approvisionnement a atteint près de 38 millions de tonnes contre un peu plus de 35 millions de tonnes pour le premier semestre 1984. Cet accroissement s'est traduit par une plus forte importation de charbon à coke en provenance des pays tiers (+2,4 millions de tonnes), le niveau de l'approvisionnement en charbon communautaire étant resté stable. Ainsi, les importations en provenance des pays tiers ont couvert 38,5 % des besoins communautaires (contre 34,5 % en 1984). Le fournisseur le plus important demeure les États-Unis avec 9 millions de tonnes de charbon à coke.

## **6. COMMERCE DE DÉTAIL: Légère augmentation du volume des ventes en août 1985**

- L'indice de volume brut des ventes du mois d'août 1985 s'accroît, par rapport à celui du mois d'août 1984, dans tous les pays sauf en France où il est très légère régression (+0,3 %). C'est au Royaume-Uni que l'indice subit la plus forte hausse (-6,6 %), suivi des Pays-Bas, de l'Irlande et du Danemark où le volume des ventes augmente de plus de 4 %.
- Par rapport aux huit premiers mois de 1984, l'indice du volume des ventes subit durant la période de janvier à août 1985 une baisse de 2,9 % en France et de 3,6 % en Grèce. L'indice augmente de 4,6 % au Royaume-Uni, de 1,1 % en Irlande, de 0,4 % en Belgique et au Danemark et de 0,2 % seulement en RF d'Allemagne et aux Pays-Bas.
- Compte tenu des informations déjà disponibles, il ne semble pas que la tendance vers la hausse constatée au mois d'août se maintienne au cours du mois de septembre.

## **7. COMMERCE EXTÉRIEUR: Au 3<sup>e</sup> trimestre 1985, nette amélioration de la balance commerciale de la Communauté mais ralentissement du rythme de croissance des exportations (-8 %)**

Au cours du troisième trimestre, les exportations de la Communauté à destination des pays tiers ont progressé à un rythme beaucoup plus lent qu'au deuxième trimestre. Eurostat estime qu'au deuxième trimestre, les exportations ont été supérieures de 17 % à celles de la période correspondante de 1984, mais de 8 % seulement au troisième trimestre. Il est trop tôt pour dire si ce ralentissement est dû essentiellement à une croissance en volume plus faible ou s'il est dû aux taux de change (les prix exprimés en dollars ont diminué ces derniers mois lorsqu'ils sont traduits en Écus). Ce ralentissement des exportations a affecté la plupart des destinations mais parmi les zones où la progression des exportations de la CE s'est le plus ralentie, on trouve les États-Unis (croissance de 35 % au deuxième trimestre ramenée à 14 % au troisième trimestre), pays ACP (16 % à 1 %) et pays à commerce d'État (29 % à 15 %). Les exportations vers les pays de l'OPEP ont diminué de 14 % au troisième trimestre. Par ailleurs, les exportations vers l'Espagne ont crû à un rythme plus rapide et ont été supérieures de 21 %. Au troisième trimestre, c'est l'Allemagne qui a eu le taux de croissance le plus rapide (14 %), la France (0 %) et l'Italie (3 %) étant les plus touchés par ce ralentissement de la croissance. Les secteurs les plus touchés ont été les produits alimentaires (+6 %) et les combustibles (1 %), tandis que les exportations d'articles manufacturés divers (18 %) et les machines et le matériel de transport (14 %) progressaient à des taux nettement supérieurs à la moyenne.

Les exportations des États-Unis ont été inférieures de 8 % au troisième trimestre, celles du Japon supérieures de 3 %.

Comme pour les exportations, les importations en provenance des pays tiers ont progressé plus lentement qu'au deuxième trimestre (d'une année sur l'autre, l'augmentation est estimée à 11 % pour le deuxième trimestre contre 2 % pour le troisième trimestre). En Italie et Belgique-Luxembourg les importations ont diminué de 9 % tandis qu'avec 8 %, le Danemark détient le record de l'augmenta-

tion. Le secteur le plus touché est celui des combustibles avec une baisse de 4 %, les secteurs machines et matériel de transport et des produits chimiques progressant, eux, de 10 %.

Les importations en provenance du Portugal (21 %), de l'Espagne (16 %) et du Japon (15 %) ont continué à progresser plus que la moyenne tandis que les importations en provenance des États-Unis (-8 %) et des pays ACP (-13 %) diminuaient.

Les importations des États-Unis ont été stables au troisième trimestre, celles du Japon inférieures de 12 %.

Le déficit commercial de la Communauté avec le reste du monde a été en moyenne de 1,0 milliard d'Écus par mois au troisième trimestre, ce qui constitue une nette amélioration par rapport aux douze derniers mois. Par ailleurs, le déficit commercial de la Communauté avec le Japon, qui n'a cessé de se détériorer depuis plusieurs années, a atteint environ 1,4 milliard d'Écus par mois. Le déficit commercial des États-Unis a été de 16,3 milliards d'Écus en moyenne par mois au troisième trimestre, tandis que le Japon avait un excédent de 5,4 milliards d'Écus par mois.

Contrairement aux échanges avec les pays tiers, le taux de croissance des importations en provenance d'autres pays membres n'a que légèrement fléchi au troisième trimestre (de 14 % au deuxième trimestre, à 11 %). Le Danemark (19 %) et les Pays-Bas (17 %) ont enregistré le taux de croissance le plus rapide, Belgique-Luxembourg (5 %) le plus faible. Parmi les principaux produits, seules les importations de fuel (1 %) ont un taux de croissance très différent de la moyenne.

## **8. TAUX DE CHANGE: Les taux de change dépendent parfois des différentiels d'inflation**

Le taux de change est un indicateur financier très sensible et c'est la raison pour laquelle il réagit immédiatement à l'annonce de mesures politiques ou à des perturbations économiques, car les opérateurs financiers évaluent rapidement les effets économiques qu'évoquent ces mesures ou perturbations. L'illustration la plus récente de ce phénomène est fournie par le taux de change de la livre sterling: la baisse prévue des prix pétroliers (résultant de la décision de l'OPEP d'augmenter éventuellement sa production) a eu pour effet immédiat de faire tomber le taux de change de la livre, dont le recul vis-à-vis du dollar atteignait 5 % au début de la semaine dernière (du 9 au 15 décembre). La hausse ultérieure (et temporaire?) des prix pétroliers a permis à la livre de refaire une partie du terrain perdu.

Tant la stabilité relative du dollar aux faibles niveaux qu'il a atteints au cours des deux derniers mois que la récente évolution du yen japonais vers un taux équilibré à long terme (il a augmenté, passant de 250 à 200 yen par dollar au cours de ces derniers mois) ont contribué à ramener au premier plan de l'actualité les monnaies européennes et en particulier celles du SME. Le franc belge apparaît de nouveau comme la plus faible des monnaies du SME et s'approche de ses seuils d'intervention bilatéraux. On peut s'attendre à ce que les premières mesures (interventions, politique en matière de taux d'intérêt, etc.) soient prises pour soutenir cette monnaie dans le contexte du SME. Initialement, la réduction du taux d'escompte officiel, effectuée voici deux mois par la Banque nationale de Belgique, apparaissait comme une preuve de la force de la monnaie belge. Mais cette impression ne s'est pas confirmée et, ces dernières semaines, le cours du franc n'a cessé de se détériorer pour tomber à son faible niveau actuel.

Le comportement inhabituellement discret du DM dans le contexte du SME, observé pendant un certain temps, semble appartenir au passé, puisque la devise allemande suit maintenant une courbe ascendante. Depuis le réaligement général des devises en mars 1983, les écarts importants entre les taux d'intérêt, qui jouaient en faveur des autres monnaies du SME, ont largement contribué à préserver l'équilibre du système (tout comme la bonne santé du dollar) en maintenant le DM à un niveau assez faible.

D'autre part, les écarts entre les taux d'inflation des pays du SME diminuent régulièrement mais subsistent néanmoins et leurs effets cumulatifs (dus à une perte de compétitivité) se traduisent en fin de compte par des déficits de la balance commerciale et de la balance courante des pays concernés. Dans la mesure où ils persistent et s'accroissent, ces déséquilibres de la balance des paiements exercent une pression sur les taux de change, qui ne peut être contrabalancée que temporairement par les écarts entre les taux d'intérêt.

Das Jahresabonnement beginnt  
 am 1. Januar und  
 endet am 31. Dezember.

The annual subscription runs  
 from 1 January to  
 31 December of each year.

Les abonnements sont annuels: ils portent sur  
 une période allant du 1<sup>er</sup> janvier au 31 décembre  
 de chaque année.

Zahlungen können nur an die  
 auf Umschlagseite 3 angegebenen  
 Vertriebsbüros geleistet werden.

Payments to be made only to the agents  
 in the countries listed on page 3  
 of the cover.

Les versements doivent être adressés  
 aux bureaux de vente indiqués à la page 3  
 de la couverture.

Die Versandkosten für Luftpostzustellung sind im  
 Preis nicht enthalten. Die Bedingungen für Luftpost-  
 abonnements sind bei den Vertriebsbüros zu erfragen.

These are surface mail rates:  
 for air subscription rates  
 please apply to the agents.

Les prix ne comprennent pas les frais  
 d'expédition par avion: pour les conditions d'abonnement  
 par avion, consulter les bureaux de vente.
