Las publicaciones de Eurostat están clasificadas por temas y por series. La clasificación se encuentra al final de la obra. Para mayor información sobre las publicaciones, rogamos se pongan en contacto con Eurostat. Para los pedidos, diríjense a las oficinas de venta cuyas direcciones figuran en la página interior de la contracubierta.

Eurostats publikationer er klassificeret efter emne og serie. En oversigt herover findes bag i hæftet. Yderligere oplysninger om publikationerne kan fås ved henvendelse til Eurostat. Bestilling kan afgives til de salgssteder, der er anført på omslagets side 3.

Die Veröffentlichungen von Eurostat sind nach Themenkreisen und Reihen gegliedert. Die Gliederung ist hinten in jedem Band aufgeführt. Genauere Auskünfte über die Veröffentlichungen erteilt Eurostat. Ihre Bestellungen richten Sie bitte an die Verkaufsbüros, deren Anschriften jeweils auf der dritten Umschlagseite der Veröffentlichungen zu finden sind.

Οι εκδόσεις της Eurostat ταξινομούνται κατά θέμα και κατά σειρά. Η ακριβής ταξινόμηση αναφέρεται στο τέλος κάθε έκδοσης. Για λεπτομερέστερες πληροφορίες σχετικά με τις εκδόσεις, μπορείτε να απευθύνεσθε στην Eurostat.

Για τις παραγγελίες μπορείτε να απευθύνεσθε στα γραφεία πώλησης, των οποίων οι διευθύνσεις αναγράφονται στη σελίδα 3 του εξωφύλλου.

Eurostat's publications are classified according to themes and series. This classification is indicated at the end of the publication. For more detailed information on publications, contact Eurostat. Orders are obtainable from the sales offices mentioned on the inside back cover.

Les publications d'Eurostat sont classées par thème et par série. Cette classification est précisée à la fin de l'ouvrage. Pour des informations plus détaillées sur les publications, contactez Eurostat.

Pour les commandes, adressez-vous aux bureaux de vente dont les adresses sont indiquées à la page 3 de la couverture.

Le pubblicazioni dell'Eurostat sono classificate per tema e per serie. Tale classificazione è precisata alla fine dell'opera. Per informazioni più dettagliate sulle pubblicazioni rivolgersi all'Eurostat.

Per eventuali ordinazioni rivolgersi a uno degli uffici di vendita i cui indirizzi figurano nella 3ª pagina della copertina.

De publikaties van Eurostat zijn ingedeeld naar onderwerp en serie. Deze indeling is achter in het boek opgenomen. Voor nadere informatie over de publikaties kunt u zich wenden tot Eurostat.

Gelieve bestellingen op te geven bij de verkoopbureaus, waarvan de adressen op bladzijde 3 van de omslag zijn vermeld.

As publicações do Eurostat estão classificadas por tema e por série. Esta classificação está indicada no fim da obra. Para mais informações sobre as publicações é favor contactar Eurostat.

Mit der monatlich erscheinenden Veröffentlichung *Eurostatistik - Daten zur Konjunkturanalyse* werden innerhalb kürzester Frist die neuesten statistischen Daten über die Europäische Gemeinschaft als Ganzes (EUR12), über jedes Mitgliedsland sowie über die Vereinigten Staaten und Japan bekanntgegeben.

Eurostatistik enthält nicht die Gesamtheit des bei Eurostat verfügbaren statistischen Materials, sondern eine Auswahl der relevantesten Reihen über die konjunkturelle Entwicklung.

Schnelligkeit und Pünktlichkeit sind die wichtigsten Vorzüge dieser Veröffentlichung.

Aus diesem Grunde wurde sie im Umfang bewußt klein gehalten und enthält keine Anmerkungen zur Methodik, die im übrigen in den spezialisierten Veröffentlichungen von Eurostat zu finden sind.

Die in *Eurostatistik* veröffentlichten Daten stammen aus dem ICG -Bereich der On-line-Datenbank Cronos von Eurostat.

Wer Zugang zu Cronos besitzt, kann jederzeit die Tabellen dieser Veröffentlichung abfragen, wobei die Daten täglich auf den neuesten Stand gebracht werden (Hinweise zur On-line -Benutzung finden sich auf der letzten Seite). Darüber hinaus sind die Daten in der Datenbank Eurocron verfügbar, die vom Host Eurobases der Kommission angeboten wird.

WECHSELKURSE: Irisches Pfund abgewertet

Die Spekulationen um das irische Pfund, auf die im vergangenen Monat an gleicher Stelle hingewiesen wurde, führten schließlich am 30. Januar 1993 zu einer Abwertung um 10 %. Diese Entwicklung ist auf eine Abschwächung des irischen Pfundes als Reaktion auf eine weitere Abschwächung des Pfund Sterling zurückzuführen, nachdem die Zinssätze im Vereinigten Königreich in der Vorwoche gesenkt worden waren. Irland, das 30 % seines Außenhandels mit dem Vereinigten Königreich abwickelt, ist besonders stark von der Entwicklung der britischen Währung abhängig.

Anschließend konzentrierte sich die Aufmerksamkeit innerhalb des Wechselkursmechanismus des EWS auf die dänische Krone, die in der ersten Februarwoche relativ schwach war. Die dänische Zentralbank erhöhte ihren Diskontsatz am 3. Februar um 2 % auf 11,5 %. Der Druck auf die dänische Krone ließ jedoch einen Tag später nach, als die Bundesbank ihre wichtigsten Zinssätze zurücknahm: der Diskontsatz wurde um 1/4 % auf 8 % und der Lombardsatz um 1/2 % auf 9 % gesenkt. Das hatte auch eine leichte Aufwertung des französischen Franc zur Folge. Am 22. Februar konnte die dänische Zentralbank ihren Diskontsatz um 1 % senken.

Neben den oben erwähnten Zinssatzänderungen in Dänemark und Deutschland gerieten auch in anderen EG-Ländern die kurzfristigen Zinsen in Bewegung. Die Banque de France senkte ihre Ausleihesätze am Monatsanfang, und die französischen Geldmarktsätze gingen anschließend leicht zurück. Der Banco de España nahm seinen Interventionsatz Mitte des Monats zurück, und am 3. Februar senkte die Banca d'Italia ihren Diskontsatz um 1/2 % auf 11,5 %.

In Italien wurden die Zinssätze trotz der Schwäche der italienischen Lira auf den Devisenmärkten gesenkt. Seit September letzten Jahres verlor die Lira etwa 30 % ihres Wertes; der DM-Kurs steht heute, am 24. Februar, bei Lit 985, gegenüber dem bis September 1992 geltenden EWS-Leitkurs von 1 DM = 748 Lit. Ein Grund für die anhaltende Schwäche der Lira dürfte die unsichere politische Lage in Italien sein. Das Pfund Sterling, das aus dem Wechselkursmechanismus im Herbst 1992 zur gleichen Zeit wie die italienische Lira ausschied, war in den vergangenen Wochen ebenfalls schwach. Es erreichte gegenüber der DM einen historischen Tiefstand, das Pfund Sterling schloß am 24. Februar mit DM 2,3125. Es steht wegen der Befürchtungen, daß die britische Regierung die gegenwärtig bei 6 % liegenden Zinssätze aufgrund der schlechten Wirtschaftslage im Vereinigten Königreich erneut zurücknehmen muß, weiterhin unter Druck. Da die Inflationsrate im Vereinigten Königreich derzeit ihren tiefsten Stand seit Ende der sechziger Jahre erreicht hat, sorgt man sich eher um die anhaltende Rezession als um einen Anstieg der Inflation.

Der US-Dollar konnte seine Position Ende Januar und Anfang Februar festigen, gegenüber der DM stieg der Kurs der amerikanischen Währung infolge der Bekanntgabe positiver US-Wirtschaftsdaten leicht an. Er schloß am 12. Februar mit einem Höchststand von DM 1,6625, verlor in der folgenden Woche jedoch wieder leicht an Wert. Der Dollar notierte gegenüber dem japanischen Yen allerdings schwächer, letzterer stieg kräftig bis auf einen neuen Höchststand an. Im Vergleich zu Mitte 1992 hat der Yen gegenüber dem amerikanischen Dollar etwa 10 % an Wert gewonnen.

RENDITEN VON STAATSANLEIHEN: Rückläufige Renditen

In fünf der sechs Länder, für die die Januar-Daten zur Verfügung stehen, waren die Renditen rückläufig. Die stärksten Rückgänge waren in Portugal und in Spanien zu verzeichnen. In Portugal fielen die Renditen von Staatsanleihen um 1 % auf 10,5 %, in Spanien gingen die Renditen von 13,0 % auf 12,5 % zurück, auf den tiefsten Stand seit Juli 1992.

In Dänemark, Italien und Belgien gingen die Renditen jeweils um 0,4 % zurück; in Dänemark wurde der niedrigste Wert seit 11 Monaten erreicht und in Belgien waren die Renditen zuletzt Anfang 1988 so niedrig. Eine Ausnahme bildete das Vereinigte Königreich, dort stiegen die Renditen von Staatsanleihen im Januar von 8,8 % auf 8,9 %.

GELDVOLUMEN: Daten über die Ergebnisse des Jahres 1992 aus Irland, Italien, den Niederlanden und dem Vereinigten Königreich

Die nunmehr für die oben genannten Länder zur Verfügung stehenden Daten über die Geldmengen für Dezember 1992 deuten auf ein unterschiedliches Geldmengenwachstum hin. Im Laufe des Jahres gingen die Wachstumsraten der Geldmenge M2 in Italien und der Geldmenge M4 im Vereinigten Königreich deutlich zurück, während sich die Wachstumsraten der Geldmenge M3 in Irland und der Geldmenge M2 in den Niederlanden nicht so einheitlich entwickelten.

Zu Beginn des Jahres 1992 lag das auf Jahresbasis umgerechnete Wachstum der Geldmenge M2 in Italien bei 9,4 % und bis Mitte des Jahres wurden in etwa die gleichen Wachstumsraten erzielt. In der zweiten Jahreshälfte ging das Wachstum stetig zurück, am Jahresende lag das auf Jahresbasis umgerechnete Wachstum bei 4,6 %, das war die niedrigste Wachstumsrate seit Jahren. Im Vereinigten Königreich nahm die M4-Wachstumsrate im Verlauf des Jahres 1992 konstant ab, sie lag am Jahresende bei 3,4 %; dies war die niedrigste Wachstumsrate seit Beginn der Aufzeichnungen Mitte der sechziger Jahre.

In Irland entwickelte sich die Geldmenge M3 im Verlauf des Jahres 1992 uneinheitlich: Im dritten Quartal wurden äußerst niedrige Wachstumsraten erzielt (auf Jahresbasis umgerechnet unter 1 %); danach beschleunigte sich das Wachstum erheblich und die Geldmenge stieg in den 12 Monaten bis Dezember 1992 um etwas mehr als 7 %. Auch wenn sich die Geldmenge M2 in den Niederlanden nicht ganz so uneinheitlich entwickelte, zeichnete sich für dieses Aggregat kein klarer Trend ab.

Mit Beginn dieses Monats werden sich die Erläuterungen und Daten in den Tabellen für Frankreich auf die Geldmenge M3 beziehen, d. h. auf die Geldmenge, für die die Banque de France Zieldaten vorgibt. In den 12 Monaten bis November wuchs die Geldmenge M3 in Frankreich um 5,7 %, das Wachstum lag damit gerade unterhalb der Obergrenze des für 1992 vorgegebenen Zielkorridors von 4 – 6 %. Für 1993 wurde die Obergrenze leicht auf 6,5 % angehoben, die Untergrenze bleibt unverändert.

AMTLICHE WÄHRUNGSRESERVEN: Zufluß von Währungsreserven im Dezember

Alle Länder, für die Daten vorliegen, verzeichneten im Dezember 1992 Zuflüsse von Währungsreserven.

Der größte Reservezufluß wird aus Dänemark gemeldet, dort stiegen die Reserven um mehr als 30 %; damit kehrte sich die Tendenz der letzten Monate, in denen Abflüsse verzeichnet wurden, zum Teil um. Die dänischen Währungsreserven haben nunmehr den höchsten Stand seit dem letzten Quartal 1988 erreicht.

Ein starker Zufluß von Reserven wird auch aus den Niederlanden (+12 %), Deutschland, Italien (jeweils +9 %), Belgien (+6 %) und Irland (+4 %) gemeldet. In Deutschland lagen die Reserven damit Ende 1992 mehr als 60 % über ihrem Vorjahresniveau.

Dänemark und Irland haben im Februar Staatsanleihen in Fremdwährung aufgelegt, deren Erlös zur Erhöhung der Fremdwährungsreserven verwendet werden soll. Dänemark begab eine Euroanleihe über 1 Mrd. US-Dollar, die dann im Rahmen eines Swaps in DM umgetauscht wurde. Irland legte eine DM-Anleihe auf (Wert: 1,5 Mrd. DM). Die irischen Reserven waren Ende 1992 erheblich niedriger als vor Jahresfrist; dabei ist die jüngste Spekulation gegenüber dem irischen Pfund Ende Januar 1993 noch nicht berücksichtigt.

VIERTELJÄHRLICHE GESAMTRECHNUNGEN: Im dritten Quartal 1992 war die Wirtschaft der Gemeinschaft bei unveränderter Inflationsrate (+0,9 %) durch Stagnation gekennzeichnet (BIP +0,1 %).

Im dritten Quartal 1992 erlebte die Wirtschaft der Gemeinschaft in ihrer Gesamtheit eine weitere Phase der Stagnation des Wirtschaftswachstums (BIP +0,1 %). Bedingt durch den wiederum negativen Verlauf auch dieses Quartals liegt das Wachstum in den ersten neun Monaten des Jahres 1992 mit +1,1 % weit unter den Vorhersagen. Die negative Entwicklung führte zu einer Berichtigung sämtlicher Jahresprognosen nach unten. Angesichts dieser Sachlage geht man davon aus, daß das Wachstum des BIP im Jahre 1992 nurmehr +1,0 % beträgt, was die geringste Wachstumsrate seit 1982 darstellt. Die meisten Wirtschaftsfachleute sind der Auffassung, daß für die Wirtschaft der Gemeinschaft kurzfristig nur sehr schwer Signale für einen Wiederanbruch zu erkennen sind, auch wenn die amerikanische Wirtschaft von einem gewissen Optimismus geprägt zu sein scheint. Der größte Unsicherheitsfaktor in dieser Phase ist die Frage, ob die Wirtschaft der Gemeinschaft angesichts ihrer internen Probleme von dem bereits wahrscheinlichen Wirtschaftsaufschwung in den Vereinigten Staaten profitieren kann. Was die Grundströmungen der gegenwärtigen Stagnationsphase angeht, sollten wir kurz bei den in der ersten Hälfte des Jahres aufgetretenen Spannungen im Währungs- und Finanzbereich verharren. Diese waren der bestimmende Faktor für das Anziehen der Zinsen, mit dem Ziel, das Gleichgewicht der Wechselkurse innerhalb des EWS aufrechtzuerhalten. Diese Politik hatte zweifelsohne nachteilige Auswirkungen auf die Wirtschaftsleistung der Gemeinschaft, insbesondere in den Schwachwährungsländern Italien, Vereinigtes Königreich und Spanien.

Bei der durch den impliziten BIP-Deflator gemessenen Preisentwicklung stellt man auf Quartalebene eine unveränderte Inflationsrate (+0,9 %) fest, während die Jahresinflationsrate leicht zurückging (+3,8 %). Die in diesem Zeitraum verabschiedeten restriktiven Maßnahmen im Bereich der Währungspolitik haben zusammen mit einer gewissen Schwäche der Binnennachfrage mit Sicherheit dazu beigetragen, die Inflationsstendenzen unter Kontrolle zu halten.

In Bezug auf die Komponenten des BIP war dieses Quartal durch folgende beiden gegenläufigen Entwicklungen gekennzeichnet: einerseits einem weiteren Einbruch bei den Investitionen (-0,2 %) und andererseits dem Anstieg des privaten Verbrauchs (+0,7 %).

Betrachtet man die Lage in den Mitgliedstaaten, so fällt der deutliche Rückgang des Wirtschaftswachstums in Dänemark und Italien (Rückgang des BIP jeweils um -1,9 % bzw. -0,6 %) ins Auge, während in Deutschland und in den Niederlanden nach einem zweiten rückläufigen Quartal eine Wiederbelebung (Wachstum des BIP um +0,5 % bzw. 0,9 %) zu beobachten war. Im Vereinigten Königreich kam es nach drei Quartalen mit schrumpfender Wirtschaftsleistung zu einer – wenn auch sehr schwachen – Aufwärtsentwicklung (Wachstum des BIP um 0,1 %). Einziges Land mit recht gleichmäßiger Entwicklung, wenn auch nicht mit sehr großer Wachstumsrate (BIP +0,4 %), war Frankreich.

In den Vereinigten Staaten, für die Angaben über das vierte Quartal vorliegen, wurde ein Produktionswachstum beobachtet (BIP +1,0 %); dabei stieg zwar die vierteljährliche Inflationsrate geringfügig (+0,5 %), wohingegen die Jahresinflationsrate etwas zurückging (+2,4 %). Bei den Komponenten der Binnennachfrage lauteten die wichtigsten Faktoren des vierten Quartals: beträchtliche Zunahme der Investitionen (+3,5 %) bei ebenfalls positiver Entwicklung des privaten Verbrauchs (+1,1 %) und leichtem Rückgang des Staatsverbrauchs (-0,4 %).

In Japan war das dritte Quartal durch einen Produktionsrückgang (BIP -0,4 %) sowie eine kleine Deflation (-0,2 %) gekennzeichnet, die für das geringfügige Nachgeben der jährlichen Inflationsrate (-2,0 %) ausschlaggebend war. Bei den Komponenten des BIP war die bemerkenswerteste Entwicklung dieses Quartals der beträchtliche Einbruch bei den Investitionen (-2,1 %), während sowohl für den privaten Verbrauch als auch den Staatsverbrauch eine Aufwärtsentwicklung verzeichnet wurde (+0,7 % bzw. +0,5 %).

PREISE: Jahresinflationsrate für die EG im Januar rückläufig: 3,5 %.

Die Jahresinflationsrate für die Gemeinschaft insgesamt ging von 3,7 % im Dezember auf 3,5 % im Januar zurück; dies ist der niedrigste Stand seit Juni 1988.

Der Rückgang ist hauptsächlich auf eine spektakuläre Senkung der monatlichen Inflationsrate im Vereinigten Königreich zurückzuführen (0,9 % im Januar); dies war die größte Abnahme seit etwa 35 Jahren. Eine grosse Anzahl von Waren und Dienstleistungen hat zu dieser Entwicklung beigetragen: Wohnkosten, Haushaltsgüter, Freizeitgüter, Bekleidung und Schuhe, Ausgaben für Kraftfahrzeuge sowie für Heizung und Beleuchtung.

Preisrückgänge wurden ebenfalls in den Niederlanden (0,5 %) und in Dänemark (0,2 %) verzeichnet, hauptsächlich beeinflusst durch den Winterschlussverkauf. Die Preisrückgänge in diesen drei Ländern wurden allerdings mehr als kompensiert

durch kräftige Preisanstiege in Deutschland (1,1 %), Luxemburg (1,0 %), Portugal (0,9 %) und Belgien (0,7 %) sowie durch geringere Steigerungen in Italien (0,4 %) und Griechenland (0,2 %). Wegen Ueberarbeitung ihrer Verbraucherpreisindizes waren die Januarzahlen von Frankreich und Spanien bei Redaktionschluss noch nicht vorhanden. Sie wurden deshalb von Eurostat geschätzt, um die Ermittlung des EUR 12 Index zu ermöglichen.

Das Ergebnis der monatlichen Veränderungsrate in den Ländern der Gemeinschaft ergibt ein mässiger Anstieg um 0,3% gegenüber Dezember.

Zur Zeit liegen die Jahresinflationsraten in 10 der 12 Mitgliedstaaten innerhalb von 2 Prozentpunkten des EG-Durchschnitts. Trotzdem ist die Inflation momentan in Griechenland etwa 10 mal und in Portugal etwa 6 mal höher als die in Dänemark, dem Land mit der niedrigsten Inflation in der EG.

Gegliedert nach der derzeitigen Inflation in aufsteigender Reihenfolge ergeben die Jahresinflationsraten folgendes Bild:

	JAN.93	JAN.92		JAN.93	JAN.92
	JAN.92	JAN.91		JAN.92	JAN.91
Dänemark	1,5% ^p	2,1%	Luxemburg	3,5%	2,9%
Ver.Königreich	1,7%	4,1%	Italien	4,3% ^p	6,1%
Frankreich	k.A.	2,9%	Deutschland**	4,4%	4,0%
Irland*	2,3%	3,6%	Spanien	k.A.	5,9%
Niederlande	2,6%	4,1%	Portugal	8,5%	8,6%
Belgien	2,8%	2,3%	Griechenland	14,5%	18,1%

Die entsprechende Rate für die Vereinigten Staaten ist noch nicht verfügbar; die vorläufige Zahl für Japan beträgt 1,3%.

* November 92/November 91
 ** Der Verbraucherpreisindex der Bundesrepublik Deutschland bezieht sich weiterhin auf den Gebietsstand vor dem 3. Oktober 1990.
 P = Provisorisch.

INDUSTRIEPRODUKTION: Düsteres Konjunkturklima hält an

Die Entwicklung der Industrieproduktion der Europäischen Gemeinschaft (EUR 12) bis November 1992 zeigt, daß die Rezession noch keineswegs zu Ende ist. Die konjunkturelle Schwächephase hält an. Nach wie vor ist in allen Industriegüterklassen eine abnehmende Produktionstätigkeit beobachtbar. Der arbeitstäglich bereinigte Produktionsindex der Industrie (NACE 1-4) belief sich im November für die Europäische Gemeinschaft auf 119,3 (1985=100). Dies entspricht einer Veränderungsrate des Index gegenüber dem Novemberwert des letzten Jahres von -3,6%. Für die Investitionsgüterindustrie beträgt die entsprechende Veränderungsrate -6,5%. Nach Saisonbereinigung beträgt der Produktionsindex für November 111,8, im Oktober war er bei 114,4, im Januar '92 bei 117,4. Verglichen mit dem kumulierten Wert von Juni, Juli und August veränderte sich die saisonbereinigte Industrieproduktion in der EG in den letzten drei Monaten September, Oktober und November um -0,7%.

Für die einzelnen Mitgliedstaaten der EG ergibt sich für die saisonbereinigte Industrieproduktion folgende Veränderungsrate der letzten drei Monate gegenüber den Vormonaten: (in Klammern: Investitionsgüterindustrie) Dänemark -2,8% (-5,3%), Griechenland -1,9% (-8,7%), Italien -1,7% (-3,0%), Belgien -1,4% (geschätzt) (+3,0%), Deutschland (West) -1,1% (-1,4%), Frankreich -0,6% (-1,6%), Niederlande -0,5% (-2,1%), Vereinigtes Königreich +1,1% (+0,1%), Irland +3,1% (geschätzt) (+4,2%). Demnach sinkt in sehr vielen Mitgliedstaaten die Produktion.

In den USA stagnierte die Industrieproduktion mit +0,1% (Veränderungsrate der letzten drei Monate gegenüber den Vormonaten); in Japan sinkt sie leicht mit +0,2% (geschätzt).

Betrachtet man die Produktion in den verschiedenen Bereichen der Industriegüterarten, so ergibt sich für die Europäische Gemeinschaft folgendes Bild (Änderungsrate der letzten drei Monate gegenüber dem Vormonat):

- Grundstoffe und Produktionsgüter -0,6% (USA: -0,2%),
- Investitionsgüter -0,5% (USA: +0,7%),
- Konsumgüter -0,5% (USA: +0,5%).

Demnach ist die konjunkturelle Schwäche in der EG gleichförmig in allen Bereichen anzutreffen, während in den USA die Investitionsgüterindustrie an Fahrt gewinnt. Für das Baugewerbe liegen Eurostat erstmals EG Zahlen vor. Der Produktionsindex des Baugewerbes läßt dabei verhaltenen Optimismus zu. Die Veränderungsrate der (saisonbereinigten) letzten drei Monate gegenüber den drei Vormonaten sind eher heterogen: EUR 12 +0,4%, Dänemark -5,8%, Italien -1,0%, Belgien -0,6%, Frankreich +0,1%, Vereinigtes Königreich +1,2%, Deutschland (West) +2,9%, Luxemburg +4,5%.

ZAHLUNGSBILANZ—Gesamt Tendenzen—vorläufige Zahlen für das dritte Quartal 1992:

Die Leistungsbilanz der Gemeinschaft verschlechterte sich im dritten Quartal 1992 gegenüber dem entsprechenden Vorjahreszeitraum um 4,8 Mrd. ECU und schloß mit

einem Defizit von 12,8 Mrd. ECU ab. Die Leistungsbilanz der Vereinigten Staaten verzeichnete ein Defizit von 15,2 Mrd. ECU, was eine Verschlechterung um 1,2 Mrd. ECU bedeutet. In Japan stieg der Überschuß um 4,1 Mrd. ECU auf 20,8 Mrd. ECU.

Nach den vorläufigen Zahlen schloß die Leistungsbilanz der Gemeinschaft im dritten Quartal 1992 mit einem Defizit in Höhe von 12,8 Mrd. ECU, das bedeutet eine Verschlechterung um 4,8 Mrd. ECU gegenüber dem entsprechenden Vorjahreszeitraum. Diese Entwicklung ist auf das um 12,5 Mrd. ECU gestiegene Defizit der Dienstleistungs- und Übertragungsbilanz zurückzuführen, bei einer Verbesserung der Handelsbilanz um 7,5 Mrd. ECU. Diese wies—nach zwei Quartalen mit negativen Ergebnissen—einen leichten Überschuß (0,1 Mrd. ECU) aus. Die Veränderungen sind vor allem auf die deutsche Leistungsbilanz zurückzuführen: Dort stieg der Handelsbilanzüberschuß im dritten Quartal 1992 um 3,5 Mrd. ECU, während sich der Saldo der Dienstleistungsbilanz um 5,1 Mrd. ECU verschlechterte. Das gleiche gilt für Italien; Verbesserung des Handelsbilanzüberschusses um 2 Mrd. ECU und Verschlechterung der Dienstleistungsbilanz um 5,1 Mrd. ECU. Im übrigen verbesserte sich die französische Handelsbilanz um 1,9 Mrd. ECU, während sich die des Vereinigten Königreichs um 1,1 Mrd. ECU verschlechterte.

In den Vereinigten Staaten schloß die Leistungsbilanz im dritten Quartal 1992 mit einem Defizit von 15,2 Mrd. ECU ab, nachdem sie im gleichen Vorjahreszeitraum ein Defizit von 14 Mrd. ECU ausgewiesen hatte. Das Handelsbilanzdefizit stieg von 20,6 Mrd. ECU auf 22,9 Mrd. ECU. Der Überschuß der Dienstleistungs- und Übertragungsbilanz stieg um 1,2 Mrd. ECU auf 7,7 Mrd. ECU.

In Japan betrug der Leistungsbilanzüberschuß im dritten Quartal 1992 20,8 Mrd. ECU gegenüber 16,7 Mrd. ECU im gleichen Vorjahreszeitraum. Der Handelsbilanzüberschuß nahm um 1,5 Mrd. ECU zu; das Defizit der Dienstleistungs- und Übertragungsbilanz verringerte sich um 2,3 Mrd. ECU.

AUSSENHANDEL

Die zusammengefaßte Bilanz des außergemeinschaftlichen Handels der Monate Januar bis Oktober 1992 schloß mit einem Defizit von 47,6 Mrd. ECU ab und verbesserte sich damit um 18 Mrd. ECU gegenüber dem gleichen Zeitraum von 1991. Die Einfuhren gingen leicht zurück (-1,8 %), während die Ausfuhren um 3 % anstiegen.

Im Monat Oktober 1992 wurde im außergemeinschaftlichen Handel ein Defizit in Höhe von 1,7 Mrd. ECU verzeichnet, gegenüber einem Defizit von 4,4 Mrd. ECU im Oktober 1991. Diese positive Entwicklung ist auf den starken Rückgang der Einfuhren im Vergleich zu Oktober 1991 (-6,8 %) zurückzuführen, während die Ausfuhren im gleichen Zeitraum stagnierten (-0,7 %). Der Preis für Rohöllieferungen in die Gemeinschaft ist zwischen Oktober 1991 und Oktober 1992 in Dollar je Barrel um 8 % gesunken. Aufgrund der Schwäche des Dollars gegenüber dem Ecu ergibt sich, in Ecu ausgedrückt, ein Preisrückgang um fast 17 % je Barrel.

In den ersten zehn Monaten des Jahres 1992 belief sich das Handelsbilanzdefizit der Vereinigten Staaten auf beinahe 65 Mrd. ECU, das sind 6,6 Mrd. ECU mehr als im entsprechenden Vorjahreszeitraum. Zwischen Oktober 1991 und Oktober 1992 sind die Einfuhren kaum (0,2 %), die Ausfuhren um 2,1 % gestiegen.

Im Oktober 1992 wies die Handelsbilanz der Vereinigten Staaten einen Fehlbetrag von 8,8 Mrd. ECU auf, das entspricht in etwa dem Niveau des Vorjahresmonats. In Ecu ausgedrückt gingen die Einfuhren um 2,2 % zurück, in Dollar gerechnet nahmen sie jedoch um nahezu 7 % zu. Die Ausfuhren gingen in Ecu ausgedrückt um 3,2 % zurück, stiegen jedoch in Dollar um 6 %.

Die zusammengefaßte Handelsbilanz Japans weist für den Zeitraum Januar bis Oktober 1992 einen Überschuß in Höhe von 71 Mrd. ECU aus und verbessert sich damit um 20,4 Mrd. ECU gegenüber dem entsprechenden Vorjahreszeitraum. Die japanischen Ausfuhren sind in Ecu gerechnet um 3 % gestiegen, während die Einfuhren deutlich zurückgegangen sind (-8,9 %).

Im Oktober 1992 schloß die japanische Handelsbilanz mit einem Überschuß von 7,9 Mrd. ECU ab, gegenüber 5,7 Mrd. ECU im Oktober 1991. Die Ausfuhren stagnierten in Ecu (-0,3 %), nahmen jedoch in Dollar gerechnet um 9 % und in Yen um 0,5 % zu. Die Einfuhren sind in Ecu um 13,3 %, in Dollar um 5 % und in Yen um 12 % zurückgegangen.

Die Handelsbilanz Deutschlands schloß im Oktober 1992 insgesamt mit einem Überschuß von 2,7 Mrd. ECU ab, das sind 1,7 Mrd. ECU mehr als im Oktober 1991. Die Handelsbilanz Dänemarks weist einen Überschuß in Höhe von 0,5 Mrd. ECU gegenüber 0,1 Mrd. ECU im Oktober 1991 aus. Aus der BLWU, den Niederlanden und Italien werden leichte Überschüsse gemeldet (0,2 Mrd., 0,1 Mrd. bzw. 0,1 Mrd. ECU). Die Salden verbesserten sich damit um 0,3 Mrd., 0,3 Mrd. bzw. 1 Mrd. ECU. Portugal, Griechenland und Frankreich weisen jeweils einen Fehlbetrag von 0,7 Mrd. ECU aus. Gegenüber Oktober 1991 verschlechterte sich der Gesamtsaldo des französischen Außenhandels um 0,8 Mrd. ECU. In Spanien belief sich das Handelsbilanzdefizit im Oktober 1992 auf 1,3 Mrd. ECU gegenüber 1,8 Mrd. ECU im Oktober 1991. Aus dem Vereinigten Königreich wird im Oktober 1992 ein Handelsbilanzdefizit in Höhe von 1,9 Mrd. ECU gemeldet, ein ähnliches Ergebnis wie im Oktober 1991.

Eurostatistics - data for short-term economic analysis is a monthly publication aimed at providing, as rapidly as possible, the latest statistical data on the European Community as a whole (EUR 12), each Member State, the United States and Japan.

Eurostatistics does not present all the statistics held by Eurostat, but a selection of the most relevant series on the economic situation.

Speed of publication and punctuality are the main features of this publication; that is why it is deliberately streamlined and does not contain any methodological notes, which are given in Eurostat's specialized publications.

The data published in *Eurostatistics* are taken from the ICG domain of Eurostat's on-line database, Cronos (the notes regarding on-line consultation may be found at the end of this publication). They are also available via the Commission host Eurobases in the Eurocron database.

Further information on *Eurostatistics* can be obtained from the following addresses:

Unless otherwise stated, data for the Federal Republic of Germany, including West Berlin, as constituted prior to 3 October 1990.

EXCHANGE RATES: Irish punt devalued

The speculation against the Irish punt, mentioned here last month, finally resulted in its devaluation by 10% on January 30 1993. It came after the punt had weakened as a result of a further weakening in sterling after UK interest rates had been reduced the previous week; Ireland, which transacts around 30% of its foreign trade with the UK, is particularly vulnerable to weakness of the British currency.

The focus of attention within the exchange rate mechanism (ERM) of the EMS then switched to the Danish krona, which was itself weak in the first week of February; the central bank of Denmark increased its discount rate by 2% to 11.5% on February 3. However, the pressure against the krona eased a day later when the Bundesbank reduced its main lending rates: the discount rate by ¼% to 8% and the Lombard rate by ½% to 9%. This also had the effect of bringing about a slight appreciation of the French franc. On February 22, the Danish central bank was able to reduce its discount rate by 1%.

In addition to the changes in Danish and German interest rates noted above, there were changes in short-term interest rates in several other EC countries. The Banque de France reduced its lending rates at the beginning of the month, and French money market rates later fell slightly. The Banco de Espana reduced its intervention rate in the middle of the month, and on February 3 the Banca d'Italia reduced its discount rate by ½% to 11½%.

The reduction in Italian official interest rates came despite the weakness of the lire in the foreign exchange markets. It has depreciated by around 30% since September last year, and now (February 24) stands at around LIT 985 to the Deutschmark, as compared to its ERM DM central rate before September of LIT 748. One reason for the lire's continued weakness is the uncertainty surrounding the Italian political situation.

Sterling, which left the ERM in the autumn of 1992 at the same time as the lire, has also remained weak in recent weeks. It reached all-time lows against the Deutschmark, closing at DM 2.3125 on February 24, and continues to suffer from fears that the UK government will be forced to further reduce British interest rates (currently 6%) due to the weakness of the UK economy. Since UK price inflation is currently at its lowest levels since the late 1960's, the main fear is one of continued recession rather than of a resurgence in inflation.

The US dollar consolidated its position in late January and early February, appreciating slightly against the Deutschmark following the release of positive U.S. economic data. It peaked at DM 1.6625 (closing) on February 12, before falling back slightly the following week. It was however weaker against the Japanese yen, which appreciated strongly, reaching new highs. The yen is now around 10% higher against the dollar than in the middle of 1992.

GOVERNMENT BOND YIELDS: decline in yields

Yields fell in five out of the six countries for which January data are available. The largest falls were in Portugal, where government bond yields fell by 1% to 10.5%, and in Spain, where they fell from 13.0 to 12.5%, their lowest level since July 1992.

Yields in Denmark, Italy and Belgium all fell by 0.4%: in Denmark, yields in January were at an 11 month low, and in Belgium yields were last at these levels at the beginning of 1988.

The exception was the UK, where the yield on government bonds rose from 8.8 to 8.9% in January.

MONEY SUPPLY: Data available on 1992 outturn for Ireland, Italy, Netherlands and the UK

Data now available on monetary aggregates for December 1992 for the above countries indicate differing patterns of monetary growth. The growth rate of M2 in Italy and M4 in the UK fell significantly over the year, whilst that of Ireland's M3 and the Netherlands M2 was rather more variable.

Having started 1992 with an 12-month growth rate of 9.4%, M2 in Italy fluctuated around roughly the same growth rates until the middle of the year. In the second 6 months however it declined steadily, to end the year growing at an annualised rate of 4.6%, the lowest achieved for many years. The growth rate of UK M4 declined steadily throughout 1992, to end at 3.4%, the lowest recorded growth rate since records began in the mid-1960s.

The behaviour of M3 in Ireland was rather volatile throughout the year, reaching extremely low levels of growth in the third quarter (less than 1% on an annualised basis), but then accelerating steeply once more to slightly over 7% for the 12 months to December 1992. Whilst not displaying quite the same level of volatility, Dutch M2 growth displayed no clear trend in 1992.

From this month onwards, the commentary here and data given in the accompanying table will refer to M3 for France, the monetary aggregate that is currently targetted by the Banque de France. In the 12 months to November, M3 in France grew by 5.7%, just under the upper boundary of the 4-6% 1992 target range. For 1993, the upper boundary of the range has been set at a slightly higher level of 6.5%, with the lower boundary remaining the same.

FOREIGN OFFICIAL RESERVES: inflows in December

All countries surveyed for which data are available experienced inflows of foreign official reserves in December 1992.

The largest increase in reserves occurred in Denmark, where reserves increased by over 30%, reversing some of the outflows in recent months. Danish foreign official reserves now stand at their highest level since the fourth quarter of 1988.

There were also large inflows of reserves into the Netherlands (+12%), Germany, Italy (both +9%), Belgium (+6%) and Ireland (+4%). The inflow into Germany means that its reserves at the end of 1992 were over 60% higher than their level a year previously.

Both Denmark and Ireland launched foreign currency sovereign bond issues in February with the intention of using the proceeds to increase their foreign exchange reserves. Denmark issued a \$1 billion eurobond, which was then swapped into Deutschmarks. Ireland issued directly in Deutschmarks to the value of DM 1.5

billion. Ireland's reserves at the end of 1992 were far lower than a year previously, and this was of course before the most recent speculation against the punt at the end of January 1993.

QUARTERLY ACCOUNTS: During the third quarter of 1992, the Community's economy stagnated (GDP +0.1%), with inflation unchanged (+0.9%).

With very little movement still in the economy of the Community as a whole during the third quarter of 1992 (GDP +0.1%), the growth rate for the first nine months of the year was 1.1%, way below what had been forecast. In view of this negative trend, all annual forecasts have been revised downwards, and current performances suggest only 1.0% growth in GDP in 1992, the lowest figure since 1982. Most economists are finding it very difficult to detect any signs of recovery in the Community in the short term, despite a certain amount of optimism about the American economy. At the moment, the Member States' internal problems are placing a question mark over their ability to profit from the probable upturn in the United States. Characteristic of this period of stagnation – and worthy, perhaps, of brief consideration – are the monetary and financial tensions which dominated the second half of the year and drove interest rates up in an attempt to maintain exchange rate equilibrium within the EMS. This policy undoubtedly had an adverse effect on the performance of the Member States' economies, especially those of countries with weak currencies such as Italy, the United Kingdom and Spain.

Moving on to prices: as measured by the implicit GDP deflator, quarterly inflation remained unchanged at +0.9%, whilst the annual rate fell slightly (+3.8%). There is little doubt that the restrictive monetary policies adopted during this period combined with the rather low level of domestic demand to help keep inflation under control.

There are two points to be made about the components of GDP during this quarter: investment continued to fall (-0.2%) and private consumption began to rise (+0.7%).

Where the individual Member States are concerned, there was a noticeable decline in economic growth in Denmark (GDP -1.9%) and Italy (-0.6%), while Germany and the Netherlands, after a negative second quarter, turned in improved figures (GDP +0.5% and +0.9% respectively). After three quarters on a downward slope, there was some indication – albeit a very slight one (GDP +0.1%) – that the UK economy was beginning to pick up again. France is still the only country whose GDP is growing fairly steadily, if not spectacularly, at +0.4%.

In the United States, where final-quarter figures are already available, output improved, with GDP up 1.9%, whilst quarterly inflation began to creep up again (+0.5%) despite the slight fall in the annual rate (+2.4%). The most striking feature of fourth-quarter domestic demand was a sharp increase in investment (+3.5%). The rise in private consumption (+1.1%) contrasted with a slight drop in public consumption (-0.4%).

In Japan, where third-quarter output was down (GDP -0.4%), -0.2% quarterly deflation led in turn to -0.2% annual disinflation. The most noticeable movement in GDP components was the substantial fall in investment (-2.1%), which accompanied increases in both private and public consumption (+0.7% and +0.5% respectively).

PRICES: EC annual inflation rate down to 3.5% in January.

The annual inflation rate for the EC as a whole fell from 3.7% in December to 3.5% in January, the lowest level since June 1988.

This deceleration at the Community level was mainly due to a spectacular fall of the UK monthly inflation rate by 0.9% in January, the biggest monthly fall for nearly 35 years. A wide range of categories contributed to this drop: housing costs, household goods, leisure goods, clothing and footwear, expenses for motoring as well as for fuel and light.

There were also decreases in the indices of the Netherlands (0.5%) and Denmark (0.2%) mainly due to the continued winter sales. Decreases in these three countries were more than offset by marked increases in Germany (1.1%), Luxembourg (1.0%), Portugal (0.9%) and Belgium (0.7%), and by smaller increases in Italy (0.4%) and Greece (0.2%).

Because of structural changes in their indices, the CPI's for France and Spain were not available at the closing date of this bulletin. They have been estimated by Eurostat in order to allow the calculation of the EUR-12 index.

The result of the above variations was a modest 0.3% increase in the EUR-12 index for January.

At present the inflation rates of 10 out of the 12 Member States are within 2 percentage points of the EC average (3.5%). However inflation in Greece is about 10 times higher and that in Portugal about 6 times higher than in Denmark, the country with the lowest annual inflation within the EC.

In order of increasing inflation the figures for the individual Member States are as follows:

	JAN.93 JAN.92	JAN.92 JAN.91		JAN.93 JAN.92	JAN.92 JAN.91
Denmark	1.5%p	2.1%	Luxembourg	3.5%	2.9%
United Kingdom	1.7%	4.1%	Italy	4.3%p	6.1%
France	n.a.	2.9%	Germany**	4.4%	4.0%
Ireland*	2.3%	3.6%	Spain	n.a.	5.9%
Netherlands	2.6%	4.1%	Portugal	8.5%	8.6%
Belgium	2.8%	2.3%	Greece	14.5%	18.1%

The corresponding rate for the USA is not yet available; the provisional figure for Japan is 1.3%.

* November '92/November '91.
 ** The CPI for the Federal Republic of Germany continues to reflect the geographic borders prior to 3 October 1990.
 P = Provisional

INDUSTRIAL PRODUCTION: No change in somber economic climate

Industrial production trends in the European Community (EUR 12) up to November 1992 show that the recession is by no means over. The slump is continuing. Production has continued to fall in all sectors of manufacturing industry. In November the index of industrial production (NACE 1-4), adjusted for the number of working days, stood at 119.3 (1985=100) for the Community as a whole. 3.6% down on the previous November's figure. For the capital goods industries, the index fell 6.5%, giving a seasonally-adjusted production index for November of 111.8, whereas in October it had stood at 114.4 and in January 1992 at 117.4. The seasonally-adjusted EC production index fell by 0.7% in the past three months (September, October and November) compared with the previous three months (June, July and August).

The seasonally-adjusted figures for industrial output in the EC Member States are as follows (rate of change for the past three months compared with the previous three months, with the capital goods industries in brackets): Denmark -2.8% (-5.3%); Greece -1.9% (-8.7%); Italy -1.7% (-3%), Belgium -1.4% (estimated) (+3.0%); Germany (West) -1.1% (-1.4%), France -0.6% (-1.6%), Netherlands -0.5% (-2.1%), United Kingdom +1.1% (+0.1%), Ireland +3.1% (estimated) (+4.2%). Production is therefore falling in very many Member States.

In the USA, industrial production stagnated at +0.1% (rate of change for the past three months compared with the previous three months); in Japan it fell slightly (an estimated +0.2%).

An examination of production in the various sectors reveals the following picture for the European Community as a whole (rate of change for the past three months compared with the previous month).

- Intermediate goods -0.6% (USA: -0.2%)
- Capital goods -0.5% (USA: +0.7%)
- Consumer goods -0.5% (USA: +0.5%)

These figures indicate that the recession is across the board in the European Community, while in the United States there are signs of recovery in the capital goods sector.

Eurostat has EC figures for the construction industry for the first time. The production index for the construction industry gives a slightly more cheerful picture. The seasonally-adjusted figures (rates of change for the past three months compared with the previous three months) varied fairly widely however: EUR 12 +0.4%, Denmark -5.8%, Italy -1.0%, Belgium -0.6%, France +0.1%, United Kingdom +1.2%, Germany (West) +2.9%, Luxembourg +4.5%.

BALANCE OF PAYMENTS – world trends – preliminary figures for the third quarter of 1992

The Community's current balance was ECU 4 800 million down on the third quarter of 1991 with a deficit of ECU 12 800 million. The American current balance had a deficit of ECU 15 200 million, which is ECU 1 200 million down. The Japanese current balance is up ECU 4 100 million, representing a surplus of ECU 20 800 million.

In the third quarter of 1992, according to preliminary figures, the Community's current balance had a deficit of ECU 12 800 million, which is 4 800 million down on the third quarter of 1991. This deterioration stems from the ECU 12 500 million increase in the invisibles deficit, partly offset by a ECU 7 500 million improvement in the goods balance. The latter has become slightly positive again (ECU 100 million)

after being in deficit for two quarters. These changes are mainly due to the German balance which in the third quarter of 1992 recorded an increase in its trade surplus of 3 500 million and a worsening in its invisible trade deficit of 5 100 million. The same was recorded for Italy: an increase of 2 000 million in the trade balance and a deterioration in the invisibles deficit of 5 100 million. France's trade balance improved by 1 900 million, whereas the United Kingdom's worsened by 1100 million.

In the United States, a deficit of ECU -15 200 million was recorded for the current balance in the third quarter of 1992 compared with ECU -14000 million for the same quarter of 1991. The trade deficit totalled ECU -22 900 million compared with the previous -20 600 million, whereas the invisibles surplus improved by ECU 1 200 million to a total of ECU 7 700 million.

In the third quarter of 1992, the Japanese current surplus was ECU20800 million after 16 700 million for the same period of 1991. The trade surplus improved by ECU 1 500 million and the invisibles deficit was reduced by ECU 2 300 million.

EXTERNAL TRADE

The cumulative extra-Community trade deficit for January-October 1992 was ECU 47.6 billion, an improvement of ECU 18.0 billion over the same period in 1991. Imports were slightly down (-1.8%), whereas exports were up by 3%.

In October 1992 the deficit on extra-Community trade was ECU 1.7 billion, compared with ECU 4.4 billion in October 1991. The improvement in this deficit is due to the substantial drop in imports compared with October 1991 (-6.8%), while exports remained steady (-0.7%). The cost of the Community's crude oil supplies went down by 8% in terms of dollars per barrel between October 1991 and October 1992. This reduction was enhanced by the fall of the dollar against the ecu, giving a price reduction of nearly 17% in ecus per barrel.

The United States' external trade deficit was nearly ECU 65 billion for the first ten months of 1992, a deterioration of ECU 6.6 billion compared with the first ten months of 1991. Exports hardly rose between the two periods (+0.2%), and imports increased by 2.1%.

In October 1992 the United States' external trade balance was ECU 8.8 billion in the red, close to the October 1991 level. Imports fell by 2.2% in ecu terms, but rose by almost 7% in dollar terms. Exports fell by 3.2% in ecu terms, but rose by 6% in dollar terms.

Japan had a surplus of ECU 71 billion for January-October 1992, ECU 20.4 billion higher than for the corresponding period in 1991. Exports increased by almost 3% in ecu terms, while there was a substantial fall in imports (-8.9%).

Japan's surplus for October 1992 was ECU 7.9 billion, compared with ECU 5.7 billion for October 1991. Exports were steady in ecu terms (-0.3%), increasing by 9% in dollar terms and 0.5% in yen terms. Imports into Japan fell by 13.3% in ecu terms, 5% in dollar terms and 12% in yen terms.

In October 1992 Germany had a total trade surplus of ECU 2.7 billion, an increase of ECU 1.7 billion over October 1991. Denmark had a surplus of ECU 0.5 billion, compared with ECU 0.1 billion in October 1991. The BLEU, the Netherlands and Italy all had slight surpluses (ECU 0.2 billion, ECU 0.1 billion and ECU 0.1 billion respectively). These improved by ECU 0.3 billion, ECU 0.3 billion and ECU 1.0 billion respectively. Portugal, Greece and France each had a deficit of ECU 0.7 billion. France's total trade balance deteriorated by ECU 0.8 billion compared with October 1991. Spain's deficit was ECU 1.3 billion in October 1992, compared with ECU 1.8 billion in October 1991. The United Kingdom had a deficit of ECU 1.9 billion in October 1992, which was close to the figure for October 1991.

Eurostatistiques - Données pour l'analyse de la conjoncture est une publication mensuelle qui a pour but de fournir dans les meilleurs délais les données statistiques les plus récentes pour la Communauté européenne en tant qu'ensemble (EUR12), pour les pays membres ainsi que pour leurs principaux partenaires extra-communautaires (États-Unis d'Amérique et Japon).

Eurostatistiques ne publie pas d'une manière exhaustive toutes les statistiques disponibles auprès d'Eurostat, mais les plus importantes parmi celles-ci.

Cette publication se veut rapide et facilement maniable. Pour cette raison, elle ne comporte pas de notes méthodologiques, qui sont par ailleurs disponibles dans les publications spécialisées d'Eurostat.

Les données publiées dans *Eurostatistiques* proviennent du domaine ICG de la base de données Cronos (les instructions pour le mode de consultation on-line se trouvent à la fin de cette publication). Elles sont aussi disponibles dans la base de données Eurocron, accessible par l'intermédiaire du serveur Eurobases de la Commission.

TAUX DE CHANGE: la livre irlandaise dévaluée

La spéculation contre la livre irlandaise, mentionnée ici le mois dernier, s'est finalement terminée par une dévaluation de 10 % le 30 janvier 1993. Elle s'est produite après que la livre se soit affaiblie à la suite d'un nouvel accès de faiblesse du sterling après la baisse des taux d'intérêt RU la semaine précédente; l'Irlande qui effectue environ 30 % de son commerce extérieur avec le RU, est particulièrement vulnérable à la faiblesse de la devise britannique.

L'attention à l'intérieur du mécanisme des taux de change (MTR) du SME s'est alors tournée vers la couronne danoise qui perdait du terrain au cours de la première semaine de février; la banque centrale du Danemark a alors fait passer son taux d'escompte de 2 à 11,5 % le 3 février. Cependant, la pression sur la couronne s'est amplifiée le jour suivant lorsque la Bundesbank a réduit ses principaux taux directeurs: le taux d'escompte de ¼ % à 8 % et le taux Lombard de ½ % à 9 %. Cela a eu aussi pour effet de faire légèrement s'apprécier le franc français. Le 22 février, la banque centrale danoise pouvait réduire son taux d'escompte de 1 %.

En plus de ces modifications des taux d'intérêt danois et allemands, des variations des taux d'intérêt à court terme se sont produits dans plusieurs autres pays CEE. La Banque de France a réduit ses taux directeurs au début du mois, et les taux du marché monétaire français ont ensuite légèrement baissé. La Banque d'Espagne a réduit son taux d'intervention vers la moitié du mois, et le 3 février, la Banque d'Italie a baissé son taux d'escompte de ½ % à 11 ½ %.

En dépit de la faiblesse de la lire sur les marchés des changes étrangers, les taux d'intérêt officiels italiens ont baissé. Depuis septembre dernier, la lire s'est dépréciée d'environ 30 %, et aujourd'hui (24 février), elle est à environ Lit 985 pour 1 Deutschemark, rapport à comparer avec son taux central DM MTC avant septembre de Lit 748. Une des raisons de l'affaiblissement continu de la lire réside dans l'incertitude qui entoure la situation politique en Italie.

Le sterling qui est sorti du MTC en automne 1992 au même moment que la lire, est également resté faible au cours des dernières semaines. Il a atteint son plus bas historique contre le Deutschemark, clôturant à DM 2,3125 le 24 février, et il continue de souffrir des craintes que l'on a de voir le gouvernement RU forcé de réduire davantage les taux d'intérêt britanniques (actuellement 6 %) en raison de la faiblesse de l'économie RU. Etant donné que le taux d'inflation RU est actuellement à ses plus bas niveaux depuis la fin des années 1960, on craint principalement la continuation de la récession plutôt qu'une résurgence de l'inflation.

Le dollar US a consolidé sa position fin janvier début février en s'appréciant légèrement contre le Deutschemark à la suite de la publication de données économiques US favorables. Il a culminé à DM 1.6625 (clôture) le 12 février avant de retomber légèrement la semaine suivante. Cependant il s'est montré faible contre le yen japonais qui s'est fortement apprécié en atteignant de nouveaux plus hauts. Le yen est maintenant environ 10 % plus haut contre le dollar qu'à la mi-1992.

RENDEMENTS DES OBLIGATIONS D'ETAT: baisse des rendements

Les rendements ont baissé dans cinq des six pays pour lesquels des données de janvier sont disponibles. Les plus fortes baisses sont enregistrées au Portugal où les rendements des obligations d'Etat ont baissé de 1 % à 10,5 %, et en Espagne, où ils sont revenus de 13 à 12,5 %, leur plus bas niveau depuis juillet 1992.

Les rendements au Danemark, Italie et Belgique ont tous baissé de 0,4 %: au Danemark, les rendements de janvier étaient à leur niveau inférieur d'il y a onze mois, et en Belgique à ceux du début de 1988.

L'exception a été le RU où le rendement des obligations d'Etat est passé de 8,8 à 8,9 % en janvier.

MASSE MONETAIRE: données disponibles sur 1992 pour l'Irlande, l'Italie, les Pays-Bas et le RU

Les données actuellement disponibles sur les agrégats monétaires pour décembre 1992 concernant les pays susmentionnés montrent différents schémas de croissance monétaire. Le taux de croissance de M2 en Italie et de M4 au RU a notablement baissé au cours de l'année, tandis que le taux de M3 en Irlande et de M2 aux Pays-Bas était variable.

Ayant commencé en 1992 avec un taux de croissance sur douze mois de 9,4 %, M2 en Italie a fluctué approximativement autour des mêmes taux de croissance depuis la moitié de l'année. Mais au cours des six derniers mois, il a baissé progressivement pour terminer l'année à un taux annualisé de 4,6 %, le plus bas atteint depuis plusieurs années. Le taux de croissance M4 du RU s'est contamment réduit au long de 1992 pour terminer à 3,4 %, le taux de croissance historiquement le plus bas depuis la moitié des années 1960.

Le comportement de M3 en Irlande s'est montré plutôt volatil tout au long de l'année atteignant des niveaux extrêmement bas de croissance au cours du troisième trimestre (moins de 1 % sur une base annualisée), mais il a fortement accéléré pour terminer légèrement au-dessus des 7 % pour les douze mois se terminant en décembre 1992. Sans présenter le même degré de volatilité, la croissance de M2 aux Pays-Bas n'a pas affiché une tendance claire en 1992.

A partir de ce mois, le présent commentaire et les données fournies dans le tableau d'accompagnement se réfèrent à M3 pour la France, l'agrégat monétaire actuellement ciblé par la Banque de France. Au cours des douze mois se terminant en novembre, M3, en France, s'est accru de 5,7 %, juste au-dessous de la limite supérieure de la fourchette fixée pour 1992 de 4-6 %. Pour 1993, la limite supérieure de la fourchette a été fixée à un niveau légèrement supérieur à 6,5 %, la limite inférieure restant la même.

RESERVES OFFICIELLES SUR L'ETRANGER: entrées en décembre

Tous les pays observés pour lesquels des données sont disponibles ont enregistré des entrées de réserves officielles sur l'étranger en décembre 1992.

La plus forte hausse des réserves s'est produite au Danemark, plus de 30 %, inversant la tendance des sorties des derniers mois. Les réserves officielles sur l'étranger danoises s'inscrivent maintenant à leur plus haut niveau depuis les quatre derniers trimestres de 1988.

On a enregistré aussi de fortes entrées de réserves aux Pays-Bas (+12 %), en Allemagne, en Italie (+9 % respectivement), la Belgique (+6 %) et l'Irlande (+4 %).

Les rentrées en Allemagne situent les réserves fin 1992 à plus de 60 % au-dessus de leur niveau de l'année précédente.

Le Danemark et l'Irlande ont lancé des émissions d'obligations officielles en monnaie étrangère en février avec l'intention d'utiliser ces opérations pour accroître leurs réserves de change. Le Danemark a émis pour un milliard d'euro-obligations qui ont été ensuite swappées en Deutschemarks. L'Irlande a émis directement en Deutschemarks pour une valeur de DM 1,5 milliard. Les réserves de l'Irlande à la fin de 1992 étaient nettement inférieures à celles d'une année auparavant, et ceci, naturellement, avant la toute récente spéculation contre la livre à la fin janvier 1993.

COMPTES TRIMESTRIELS: Au cours du troisième trimestre 1992: phase de stagnation de l'économie communautaire (PIB +0,1 %), inflation inchangée (+0,9 %).

Le troisième trimestre 1992 a été caractérisé, pour l'économie communautaire dans son ensemble, par la poursuite de la phase de stagnation de la croissance économique (PIB +0,1 %). A cause de ce nouveau trimestre négatif, la croissance au cours des neuf premiers mois de l'année a été de +1,1 %, largement au-dessous des prévisions. Sur la base de cette évolution négative, toutes les prévisions annuelles ont été révisées vers le bas. Vu l'état actuel des choses, on prévoit, pour l'année 1992, seulement +1,0 % de croissance du PIB, la plus basse depuis 1982. Selon la plupart des économistes il est très difficile d'identifier des signaux de reprise à court terme pour l'économie communautaire, même si un certain optimisme semble caractériser l'économie américaine. La vraie inconnue de cette phase est représentée par la capacité des économies communautaires, étant donné leurs problèmes internes, de profiter d'une probable reprise aux Etats-Unis. Parmi les éléments qui caractérisent cette phase de stagnation, il nous semble utile de nous arrêter brièvement sur les tensions monétaires et financières qui ont caractérisé la deuxième partie de l'année. Ces tensions ont déterminé une tendance à la hausse des taux d'intérêt, dans le but de maintenir l'équilibre du taux de change à l'intérieur du SME. Cette politique a sans doute influencé de manière négative la performance des économies communautaires, surtout dans les pays à devises faibles, comme par exemple, l'Italie, le Royaume-Uni et l'Espagne.

En ce qui concerne l'évolution des prix, mesurée par le déflateur implicite du PIB, on constate une inflation inchangée au niveau trimestriel (+0,9 %), tandis qu'en rythme annuel on observe une légère baisse (+3,8 %). Les politiques monétaires restrictives adoptées pendant cette période, ainsi qu'une certaine faiblesse de la demande interne, ont sûrement contribué à maintenir l'inflation sous contrôle.

En ce qui concerne les composantes du PIB, ce trimestre a été caractérisé par deux éléments: d'une part la poursuite de la chute des investissements (-0,2 %), et d'autre part une reprise de la consommation privée (+0,7 %).

En ce qui concerne la situation dans les Etats membres, on constate un sensible fléchissement de la croissance économique au Danemark et en Italie (PIB -1,9 % et -0,6 % respectivement), tandis qu'en Allemagne et aux Pays-bas, après un deuxième trimestre négatif, on observe une reprise (PIB +0,5 % et +0,9 % respectivement). Le Royaume-Uni, après trois trimestres de baisse, est marqué par un signe positif, même s'il est très faible (PIB +0,1 %). La France, par contre, reste le seul pays avec une évolution assez régulière, même si elle n'a pas un rythme extraordinaire (PIB +0,4 %).

Aux Etats-Unis, où on dispose des données pour le quatrième trimestre, on observe une croissance positive de la production (PIB +1,9 %) accompagnée par une légère reprise de l'inflation trimestrielle (+0,5 %), tandis qu'en rythme annuel on constate une légère réduction (+2,4 %). Parmi les composantes de la demande interne, les faits marquants du quatrième trimestre ont été représentés par la remarquable progression des investissements (+3,5 %). La consommation privée se caractérise par son évolution positive (+1,1 %), tandis que pour la consommation publique on constate un léger fléchissement (-0,4 %).

Pour le Japon, le troisième trimestre est caractérisé par un fléchissement de la production (PIB -0,4 %) accompagné par une légère déflation (-0,2 %) qui détermine une légère baisse de l'inflation au niveau annuel (-2,0 %). Parmi les composantes du PIB, le fait marquant de ce trimestre est représenté par la sensible chute des investissements (-2,1 %), tandis que la consommation tant privée que publique est caractérisée par une évolution positive (+0,7 % et +0,5 % respectivement).

PRIX: En janvier le taux d'inflation annuelle de la CE descend à 3,5 %.

En janvier le taux d'inflation annuelle pour l'ensemble de la CE est passé de 3,7 % à 3,5 %. C'est le taux le plus bas depuis juin 1988.

Le ralentissement au niveau de la Communauté est dû principalement à une baisse spectaculaire de l'inflation mensuelle du Royaume-Uni. Cette baisse (0,9 % pour janvier) est la baisse mensuelle la plus forte depuis près de 35 ans. Un grand nombre de catégories a contribué à cette chute: coûts de logement, biens de ménage, articles de loisirs, habillement et chaussures, dépenses pour voitures ainsi que coûts de chauffage et d'éclairage.

On a enregistré aussi des reculs des indices aux Pays-Bas (0,5 %) et au Danemark (0,2 %) surtout à cause des soldes d'hiver. Les baisses dans ces trois pays ont été largement compensées par des hausses substantielles en R.F. d'Allemagne (1,1 %), au Luxembourg (1,0 %), au Portugal (0,9 %) et en Belgique (0,7 %), ainsi que par des accroissements plus faibles en Italie (0,4 %) et en Grèce (0,2 %).

A cause des restructurations de leurs indices les IPC de la France et de l'Espagne n'étaient pas disponibles à la fin de rédaction de ce bulletin.

Ils ont été estimés par Eurostat pour permettre le calcul de l'indice EUR 12. Le résultat de toutes ces variations mensuelles a entraîné un accroissement modéré de 0,3 % de l'indice EUR 12 en janvier.

Actuellement 10 Etats membres sur 12 affichent des taux d'inflation annuelle compris dans une fourchette de 2 points d'écart par rapport à la moyenne de la CE (3,5 %). Cependant, comparée avec l'inflation du Danemark, pays dont l'inflation est la plus basse de la CE, l'inflation de la Grèce est environ 10 fois plus élevée et celle du Portugal 6 fois.

Dans l'ordre croissant de l'inflation actuelle les taux pour les Etats membres sont les suivants:

	JAN. 93 JAN. 92	JAN. 92 JAN. 91		JAN. 93 JAN. 92	JAN. 92 JAN. 91
Danemark	1,5 %p	2,1 %	Luxembourg	3,5 %	2,9 %
Royaume-Uni	1,7 %	4,1 %	Italie	4,3 %p	6,1 %
France	n.d.	2,9 %	Allemagne**	4,4 %	4,0 %
Irlande*	2,3 %	3,6 %	Espagne	n.d.	5,9 %
Pays-Bas	2,6 %	4,1 %	Portugal	8,5 %	8,6 %
Belgique	2,8 %	2,3 %	Grèce	14,5 %	18,1 %

Le taux correspondant pour les USA n'est pas encore disponible, le chiffre provisoire pour le Japon est de 1,3 %.

* Novembre 92/Novembre 91

** L'IPC pour la R.F. d'Allemagne continue à se rapporter à la situation territoriale avant le 23 octobre 1990.

P = provisoire.

PRODUCTION INDUSTRIELLE: Morosité du climat économique inchangé

L'évolution de la production industrielle de la Communauté européenne (EUR12) jusqu'en novembre 1992 montre que la récession n'est absolument pas terminée. Le ralentissement conjoncturel perdure. C'est encore dans le secteur des biens d'investissement que l'on continue d'observer une baisse de la production. En novembre, l'indice de la production industrielle corrigé du nombre de jours ouvrables (NACE 1-4) était de 119,3 (1985=100) pour la Communauté européenne, ce qui correspond à un taux de variation de -3,6 % par rapport à la valeur du mois de novembre de l'année dernière. Pour l'industrie des biens d'investissement, le taux de variation correspondant est de -6,5 %. L'indice corrigé des variations saisonnières atteint 111,8 pour novembre contre 114,4 en octobre et 117,4 en janvier 1992. Par rapport à la valeur cumulée des mois de juin, juillet et août la production industrielle corrigée des variations saisonnières de la CE a diminué de 0,7 % dans les trois derniers mois disponibles à savoir septembre, octobre et novembre.

En ce qui concerne les différents Etats membres de la CE, les taux de variation de la production industrielle corrigée des variations saisonnières ont évolué comme suit pour les trois derniers mois par rapport aux mois précédents (entre parenthèses: biens d'investissement): Danemark -2,8 % (-5,3 %), Grèce -1,9 % (-8,7 %), Italie -1,7 % (-3,0 %), Belgique -1,4 % (estimation) (+3,0 %), Allemagne (Ouest) -1,1 % (-1,4 %), France -0,6 % (-1,6 %), Pays-Bas -0,5 % (-2,1 %), Royaume-Uni +1,1 % (+0,1 %), Irlande +3,1 % (estimation) (+4,2 %). La production baisse donc dans un très grand nombre d'Etats membres.

Aux Etats-Unis, la production industrielle a stagné avec un taux de +0,1 % (taux de variation des trois derniers mois par rapport aux mois précédents), au Japon elle a légèrement baissé avec +0,2 % (estimation).

Si l'on considère la production des différents secteurs d'activité industriels on constate l'évolution suivante pour la Communauté européenne (taux de variation des trois derniers mois par rapport au mois précédent):

- Industrie des biens intermédiaires -0,6 % (USA: -0,2 %),
- Biens d'équipement -0,5 % (USA: +0,7 %),
- Biens de consommation -0,5 % (USA: +0,5 %).

On s'aperçoit donc que le ralentissement conjoncturel dans la Communauté européenne touche uniformément tous les secteurs alors qu'aux Etats-Unis l'industrie des biens d'équipement reprend du terrain.

Eurostat dispose pour la première fois de chiffres communautaires concernant le bâtiment et le génie civil. L'indice de la production du secteur du bâtiment et du génie civil autorise un optimisme modéré. Les taux de variation des trois derniers mois (corrigés des variations saisonnières) par rapport aux trois mois précédents sont cependant relativement peu homogènes: EUR12 +0,4 %, Danemark -5,8 %, Italie -1,0 %, Belgique -0,6 %, France +0,1 %, Royaume-Uni +1,2 %, Allemagne (Ouest) +2,9 %, Luxembourg +4,5 %.

BALANCE DES PAIEMENTS - tendances mondiales- chiffres préliminaires pour le troisième trimestre de 1992

Détérioration de 4,8 milliards d'écus de la balance courante communautaire par rapport au troisième trimestre de 1992: la balance accuse un déficit de 12,8 milliards

d'écus. La balance courante américaine enregistre un déficit de 15,2 milliards d'écus correspondant à une détérioration de 1,2 milliard d'écus. La balance courante japonaise s'améliore de 4,1 milliards pour atteindre un excédent de 20,8 milliards d'écus.

Au troisième trimestre de 1992, selon les chiffres préliminaires, la balance courante communautaire atteindrait un déficit de 12,8 milliards d'écus soit une détérioration de 4,8 milliards par rapport au troisième trimestre de 1991. Cette détérioration provient de l'aggravation de 12,5 milliards d'écus du déficit des invisibles, en partie compensée par une amélioration de 7,5 milliards d'écus du solde des marchandises. Celui-ci redevient légèrement positif (0,1 milliard d'écus) après deux trimestres de déficit. Ces variations sont dues en grande partie à la balance allemande qui a enregistré au troisième trimestre de 1992 une augmentation de son excédent commercial de 3,5 milliards et une détérioration de son déficit des invisibles de 5,1 milliards. On note le même phénomène pour l'Italie: amélioration de 2 milliards de l'excédent commercial et une aggravation du déficit des invisibles de 5,1 milliards. Par ailleurs, la balance commerciale de la France est en amélioration de 1,9 milliard, tandis que celle du Royaume-Uni accuse une détérioration de 1,1 milliard.

Aux Etats Unis, le solde courant atteint un déficit de -15,2 milliards d'écus au troisième trimestre de 1992 comparé aux -14 milliards d'écus au cours du même trimestre de 1991. Le déficit commercial atteint -22,9 milliards d'écus après -20,6 milliards, l'excédent des invisibles s'améliore de 1,2 milliards d'écus pour atteindre 7,7 milliards d'écus.

Au troisième trimestre de 1992, l'excédent courant japonais atteint 20,8 milliards d'écus après 16,7 milliards pour la même période de 1991. L'excédent commercial s'est amélioré de 1,5 milliards d'écus et le déficit des invisibles s'est réduit de 2,3 milliards d'écus.

COMMERCE EXTERIEUR

Le solde extra-communautaire cumulé de janvier à octobre 1992 atteint -47,6 Mrds d'écus, il s'améliore de 18 Mrds par rapport à la même période de 1991. Les importations observent une baisse légère (-1,8 %) tandis que les exportations augmentent de 3 %.

Au mois d'octobre 1992, les échanges extra sont déficitaires de 1,7 Mrd d'écus, contre -4,4 Mrds en octobre 1991. L'allègement de ce déficit est dû au repli appuyé des importations par rapport à octobre 1991: -6,8 %, alors que les exportations stagnent (-0,7 %). Le coût d'approvisionnement de la Communauté en pétrole brut baisse de 8 % en dollars par baril entre octobre 1991 et 1992. Ce repli est amplifié par la baisse du dollar en termes d'écus: le coût chute de près de 17 % en écus par baril.

Le solde extérieur des Etats-Unis approche -65 Mrds d'écus pour les dix premiers mois de 1992, il affiche une dégradation de 6,6 Mrds par rapport aux dix premiers mois de 1991. Les exportations progressent à peine entre ces deux périodes (0,2 %), et les importations augmentent de 2,1 %.

En octobre 1992 le bilan du commerce extérieur des Etats-Unis est de -8,8 Mrds d'écus, proche du niveau d'octobre 1991. Les importations baissent de 2,2 % en écus, mais progressent de près de 7 % en dollars. Les exportations se replient de 3,2 % en écus, et augmentent de 6 % en dollars.

Le Japon est excédentaire de 71 Mrds d'écus pour la période janvier-octobre 1992, soit 20,4 Mrds de plus que pour la période correspondante de 1991. Les exportations sont en augmentation de près de 3 % en écus, alors que les importations régressent nettement (-8,9 %).

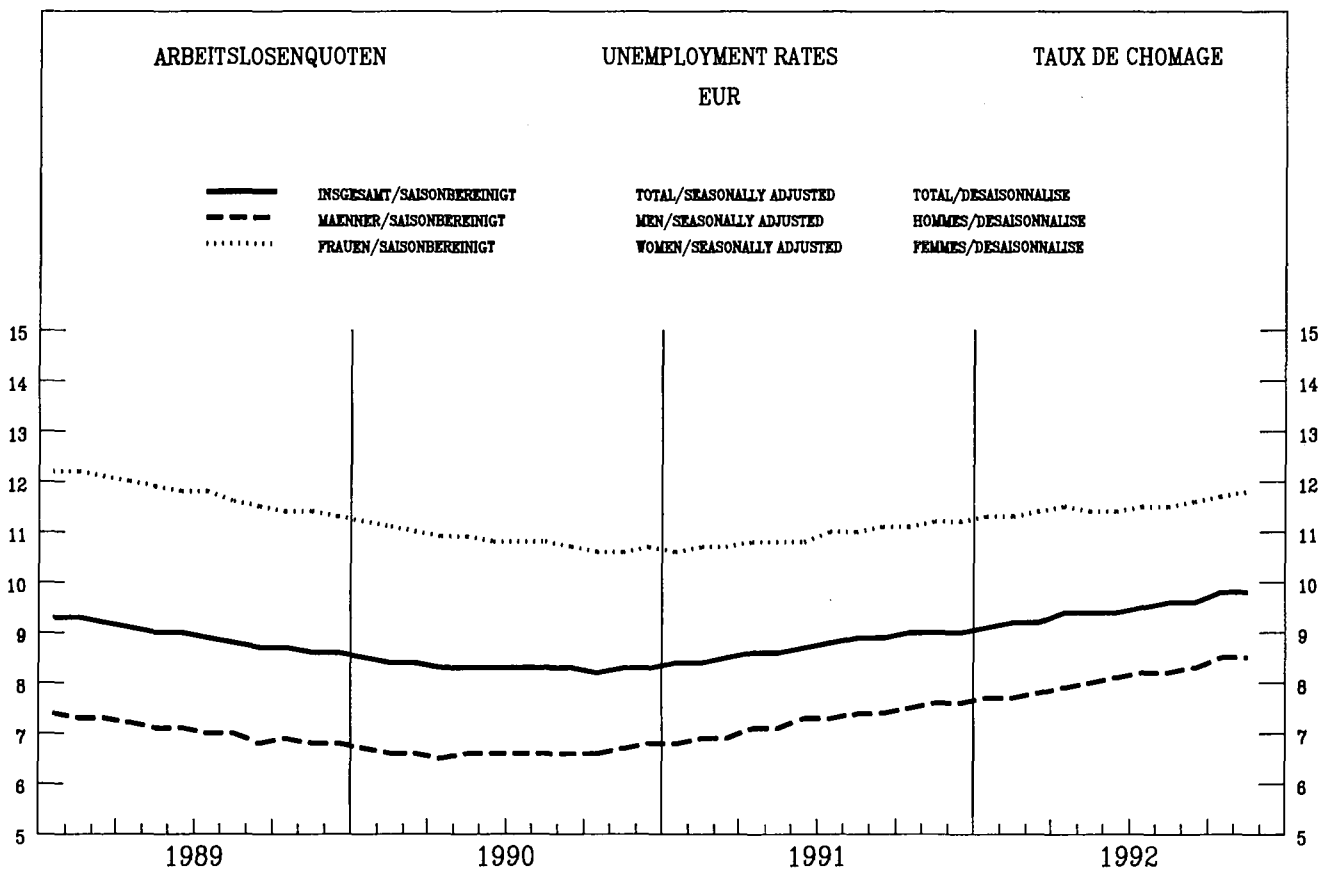

Pour le mois d'octobre 1992 l'excédent japonais est de 7,9 Mrds d'écus, contre 5,7 Mrds en octobre 1991. Les exportations stagnent en écus (-0,3 %), progressent de 9 % en dollars et de 0,5 % en yens. Les importations du Japon s'infléchissent de 13,3 % en écus, de 5 % en dollars et de 12 % en yens.

En octobre 1992 l'Allemagne dégage un solde commercial total de 2,7 Mrds d'écus, en progrès de 1,7 Mrd par rapport à octobre 1991. Le bilan du Danemark est excédentaire d'un demi milliard d'écus, contre 0,1 Mrd en octobre 1991. Les soldes de l'UEBL, des Pays-Bas et de l'Italie sont faiblement positifs (respectivement de 0,2 Mrd, 0,1 Mrd et 0,1 Mrd d'écus). Ils s'améliorent de 0,3 Mrd, 0,3 Mrd et 1 Mrd d'écus. Le Portugal, la Grèce et la France affichent des déficits de 0,7 Mrd d'écus chacun. Le solde des échanges totaux de la France se dégrade de 0,8 Mrd d'écus par rapport à octobre 1991. Le bilan des échanges de l'Espagne est de -1,3 Mrd d'écus en octobre 1992, contre -1,8 Mrd en octobre 1991. Le Royaume-Uni affiche un déficit de 1,9 Mrd d'écus en octobre 1992, proche de celui d'octobre 1991.

„On line“-Abfrage

Jede Zeitreihe ist durch einen neunstelligen numerischen Kode gekennzeichnet, der seinerseits in Unterkodes gegliedert ist, welche – im Falle von „Eurostatistik“ – das Land, den Sektor, die Tabelle, die Einheit und die Periodizität bezeichnen.

Die Bedeutung der einzelnen Unterkodes ist der nachstehend aufgeführten Tabelle zu entnehmen.

Land XX	Sektor XX	Tabelle XXXX	Periodizität und Einheit X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Variablen Tabelle XXXX vierstelliger Wert, der im Titel jeder Tabelle erscheint	0 jährlich, Angaben in Prozent 1 vierteljährlich, Angaben in Prozent 2 monatlich, Angaben in Prozent 3 jährlich, Indexangaben (1985 = 100) 4 vierteljährlich, Indexangaben (1985 = 100) 5 monatlich, Indexangaben (1985 = 100) 6 jährlich, Angaben in absoluten Werten 7 vierteljährlich, Angaben in absoluten Werten 8 monatlich, Angaben in absoluten Werten 9 Gewicht, EUR 10 = 100 bzw. EUR 12 = 100

* Territoriale Aufteilung vor dem 3. 10. 90: 02 für EUR 12, 12 für D.

Beispiele: Will man die monatliche Arbeitslosigkeit (in absoluten Zahlen) von Frankreich gemäß Tabelle 0304 dieser Veröffentlichung erfahren, so braucht man nur den Kode 14 93 0304 8 einzugeben.

'On-line' consultation

Each time series is identified by a nine-digit code broken down into subcodes, which in the case of Eurostatistics, represent the country, sector, table unit and periodicity. The significance of the different subcodes may be found in the table below.

Country XX	Sector XX	Table XXXX	Periodicity and unit X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Table by indicator XXXX 4-digit value quoted in the title of each table	0 annual in % 1 quarterly in % 2 monthly in % 3 annual index 1985 = 100 4 quarterly index 1985 = 100 5 monthly index 1985 = 100 6 annual absolute value 7 quarterly absolute value 8 monthly absolute value 9 weighting EUR 10 = 100 or EUR 12 = 100

* data for the territorial situation before 3. 10. 90: 02 for EUR 12, 12 for D.

Consultation example: to know the monthly unemployment (absolute figures) of France as is shown in Table 0304 of this publication, the code 14 93 0304 8 should be formed.

Mode de consultation «on-line»

Chaque série chronologique est identifiée par un code à neuf chiffres structuré en sous-codes représentant, dans le cas d'Eurostatistiques, le pays, le secteur, le tableau, l'unité et la périodicité. On trouvera dans le tableau ci-dessous la signification des différents sous-codes.

Pays XX	Secteur XX	Tableau XXXX	Périodicité et unité X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Tableaux par variable XXXX valeur à 4 chiffres figurant dans le titre de chaque tableau	0 annuelle exprimée en pourcentage 1 trimestrielle exprimée en pourcentage 2 mensuelle exprimée en pourcentage 3 annuelle exprimée en indice 1985 = 100 4 trimestrielle exprimée en indice 1985 = 100 5 mensuelle exprimée en indice 1985 = 100 6 annuelle exprimée en valeur absolue 7 trimestrielle exprimée en valeur absolue 8 mensuelle exprimée en valeur absolue 9 pondération EUR 10 = 100 ou EUR 12 = 100

* données pour la situation territoriale avant le 3. 10. 90: 02 pour EUR 12, 12 pour D.

Exemple de consultation: pour connaître le chômage mensuel (chiffres absolus) de la France, tel qu'il figure au tableau 0304 de cette publication, il suffit d'appeler le code 14 93 0304 8;
