Las publicaciones de Eurostat están clasificadas por temas y por series. La clasificación se encuentra al final de la obra. Para mayor información sobre las publicaciones, rogamos se pongan en contacto con Eurostat. Para los pedidos, diríjense a las oficinas de venta cuyas direcciones figuran en la página interior de la contracubierta.

Eurostats publikationer er klassificeret efter emne og serie. En oversigt herover findes bag i hæftet. Yderligere oplysninger om publikationerne kan fås ved henvendelse til Eurostat. Bestilling kan afgives til de salgssteder, der er anført på omslagets side 3.

Die Veröffentlichungen von Eurostat sind nach Themenkreisen und Reihen gegliedert. Die Gliederung ist hinten in jedem Band aufgeführt. Genauere Auskünfte über die Veröffentlichungen erteilt Eurostat. Ihre Bestellungen richten Sie bitte an die Verkaufsbüros, deren Anschriften jeweils auf der dritten Umschlagseite der Veröffentlichungen zu finden sind.

Οι εκδόσεις της Eurostat ταξινομούνται κατά θέμα και κατά σειρά. Η ακριβής ταξινόμηση αναφέρεται στο τέλος κάθε έκδοσης. Για λεπτομερέστερες πληροφορίες σχετικά με τις εκδόσεις, μπορείτε να απευθύνεσθε στην Eurostat. Για τις παραγγελίες μπορείτε να απευθύνεσθε στα γραφεία πώλησης, των οποίων οι διευθύνσεις αναγράφονται στη σελίδα 3 του εξωφύλλου.

Eurostat's publications are classified according to themes and series. This classification is indicated at the end of the publication. For more detailed information on publications, contact Eurostat. Orders are obtainable from the sales offices mentioned on the inside back cover.

Les publications d'Eurostat sont classées par thème et par série. Cette classification est précisée à la fin de l'ouvrage. Pour des informations plus détaillées sur les publications, contactez Eurostat. Pour les commandes, adressez-vous aux bureaux de vente dont les adresses sont indiquées à la page 3 de la couverture.

Le pubblicazioni dell'Eurostat sono classificate per tema e per serie. Tale classificazione è precisata alla fine dell'opera. Per informazioni più dettagliate sulle pubblicazioni rivolgersi all'Eurostat. Per eventuali ordinazioni rivolgersi a uno degli uffici di vendita i cui indirizzi figurano nella 3^a pagina della copertina.

De publikaties van Eurostat zijn ingedeeld naar onderwerp en serie. Deze indeling is achter in het boek opgenomen. Voor nadere informatie over de publikaties kunt u zich wenden tot Eurostat. Gelieve bestellingen op te geven bij de verkoopbureaus, waarvan de adressen op bladzijde 3 van de omslag zijn vermeld.

Mit der monatlich erscheinenden Veröffentlichung *Eurostatistik - Daten zur Konjunkturanalyse* werden innerhalb kürzester Frist die neuesten statistischen Daten über die Europäische Gemeinschaft als Ganzes (EUR12), über jedes Mitgliedsland sowie über die Vereinigten Staaten und Japan bekanntgegeben.

Eurostatistik enthält nicht die Gesamtheit des bei Eurostat verfügbaren statistischen Materials, sondern eine Auswahl der relevantesten Reihen über die konjunkturelle Entwicklung.

Schnelligkeit und Pünktlichkeit sind die wichtigsten Vorzüge dieser Veröffentlichung.

Aus diesem Grunde wurde sie im Umfang bewußt klein gehalten und enthält keine Anmerkungen zur Methodik, die im übrigen in den spezialisierten Veröffentlichungen von Eurostat zu finden sind.

Die in *Eurostatistik* veröffentlichten Daten stammen aus dem ICG -Bereich der On-line-Datenbank Cronos von Eurostat.

Wer Zugang zu Cronos besitzt, kann jederzeit die Tabellen dieser Veröffentlichung abfragen, wobei die Daten täglich auf den neuesten Stand gebracht werden (Hinweise zur On-line -Benutzung finden sich auf der letzten Seite). Darüber hinaus sind die Daten in der Datenbank Eurocron verfügbar, die vom Host Eurobases der Kommission angeboten wird.

WECHSELKURSE: Bundesbank senkt Diskontsatz

Der Zentralbankrat der Deutschen Bundesbank beschloß auf seiner Sitzung vom 18. März eine Senkung des Diskontsatzes um 0,5 % auf 7,5 %. Von den Finanzmärkten, die auf eine Senkung des international wichtigen Lombardsatzes (1) gehofft hatte, wurde dieser Schritt mit einer gewissen Enttäuschung aufgenommen. Die Zentralbanken Österreichs, Belgiens, Dänemarks, der Niederlande und der Schweiz nahmen ihre amtlichen Ausleihsätze ebenfalls zurück.

Der Senkung des deutschen Diskontsatzes war am 5. März eine Änderung des Zinssatzes für Wertpapierpensionsgeschäfte der Bundesbank mit einer Laufzeit von 14 Tagen vorangegangen. Da der Zentralbankrat auf seiner Sitzung vom Vortag noch beschlossen hatte, die Leitzätze der Bundesbank unverändert zu lassen, wurden die Finanzmärkte von diesem Schritt überrascht. Die unmittelbare Folge war ein Rückgang des Wechselkurses der D-Mark gegenüber anderen EG-Währungen, insbesondere dem Pfund Sterling, sowie dem US-Dollar, die am selben Tag rund 3 Pfennig gutmachen konnten.

Am 25. März wurden die deutschen Zinssätze für sehr kurzfristige Papiere erneut geändert, als die Bundesbank die Senkung des Zinssatzes für Dreitägesschatzwechsel von 8,4 % auf 7,5 % bekanntgab.

Im Vorfeld der französischen Parlamentswahlen, deren erster Wahlgang am 21. März stattfand, gab der französische Franc leicht nach. Der Kurs des belgischen Franc wurde in der Woche vom 22. März durch politische Entwicklungen beeinflusst, als Meinungsverschiedenheiten in Fragen geplanter Haushaltsersparungen ein Rücktrittsangebot des belgischen Premierministers nach sich zogen. Der Franc geriet zunächst unter Druck, konnte sich dann jedoch erneut festigen, nachdem die belgische Notenbank zwei ihrer Zinssätze erhöht hatte.

Der Escudo mußte Mitte März einen Kursrückgang hinnehmen, nachdem der Vizepräsident des Banco de Portugal am 12. März zurückgetreten war. Im Anschluß an Interventionen der portugiesischen Zentralbank konnte er sich dann jedoch wieder festigen.

Der Anfang März zu verzeichnende Anstieg des Dollarkurses gegenüber der D-Mark setzte sich im weiteren Verlauf des Monats nicht fort, obwohl erwartet worden war, daß der Dollar infolge der zunehmenden Instabilität in Rußland als „Fluchtwährung“ an Attraktivität gewinnen würde, und obwohl weitere positive Meldungen über die amerikanische Wirtschaft bekannt wurden. Der Dollarkurs stieg nicht über seinen über 30 Tage berechneten gleitenden Durchschnitt von 1,645 DM. Gegenüber dem Yen fiel er Anfang März erneut auf einen historischen Tiefststand.

RENDITEN VON STAATSANLEIHEN: Allgemeiner Renditerückgang

In acht der elf Länder, für die Daten vorliegen, waren die Renditen von Staatsanleihen im Februar rückläufig, nachdem sie bereits im Januar in mehreren Ländern nachgegeben hatten.

Innerhalb der EG war der stärkste Renditerückgang in Spanien zu verzeichnen, wo sich die Renditen in den letzten sechs Monaten sehr uneinheitlich entwickelt haben. Im Vereinigten Königreich gingen die Renditen um 0,3 % auf 8,6 % zurück und erreichten damit ihren niedrigsten Stand seit vielen Jahren. In Deutschland lagen die Renditen nach ihrem im Februar verzeichneten leichten Rückgang zum ersten Mal seit August 1989 unter 7 %.

In den USA und Japan waren die Renditen ebenfalls rückläufig. Die Renditen von amerikanischen Staatsanleihen haben gegenwärtig mit knapp 7 % zwar ihr niedrigstes Niveau seit Anfang 1977 erreicht, liegen damit jedoch jetzt über den deutschen Renditen. Die Renditen von japanischen Staatsanleihen gingen im Februar um 0,6 % zurück, nachdem der japanische Diskontsatz am 4. Februar um 0,75 % gesenkt worden war. Er liegt jetzt bei 2,5 %, so daß trotz des niedrigen Zinsniveaus nach wie vor eine normale Zinsstruktur gegeben ist.

Den Daten für Luxemburg liegt ab Januar 1993 ein neues Berechnungsverfahren zugrunde, das es ermöglicht, die Renditen der Staatsanleihen, die tatsächlich gehandelt werden, angemessener zu berücksichtigen.

GELDVOLUMEN: Angaben zum Geldmengenwachstum 1992

Für die meisten EG-Mitgliedstaaten liegen jetzt Daten zum Geldmengenwachstum im Jahre 1992 vor. Sie lassen erkennen, daß sich das Geldvolumen in den meisten Ländern nur langsam ausgeweitet hat und daß die Zielvorgaben nur in einem Fall (Deutschland) überschritten wurden.

In zwei Ländern lag das Geldmengenwachstum 1992 sogar unter den Zielwerten: In Italien betrug die Zuwachsrate von ALP 4,8 %, bei einem Zielkorridor von 8 %-11 %, in Italien weitete sich M2 um 4,6 % aus, während 5 %-7 % vorgegeben waren.

In Griechenland, Portugal und dem Vereinigten Königreich lag das Geldmengenwachstum klar innerhalb des Zielkorridors der jeweiligen Währungsbehörden, wobei die M3-Zuwachsrate in Griechenland allerdings erst im Dezember wieder den angestrebten Werten entsprach, nachdem sie einen Großteil des Jahres wesentlich höher gewesen war. In Portugal verlangsamte sich die Ausweitung von L- im vierten Quartal 1992, so daß sich für das Jahr insgesamt eine innerhalb des Zielkorridors der Bank von Portugal (12 %-16 %) liegende Zuwachsrate von 13,7 % ergab. Im Vereinigten Königreich waren 1992 lediglich für M0 Zielwerte vorgegeben worden (0 %-4 %), die mit einer auf das Jahr umgerechneten Zuwachsrate von 2,6 % erreicht wurden.

AMTLICHE WÄHRUNGSRESERVEN: Geänderte Verteilung der Währungsreserven der EG

Die Verteilung der Währungsreserven von EUR 12 hat sich im zweiten Halbjahr 1992 deutlich verändert. Ende Juni 1992 entfiel der größte Teil der amtlichen Währungsreserven von EUR 12 auf Spanien (22,4 %) und Deutschland (19,9 %). Die im Herbst 1992 zu verzeichnenden Wechselkursstürbungen hatten in den Ländern, deren Währungen als eher schwach beurteilt wurden, jedoch beträchtliche Reserveabflüsse zur Folge, während sich die Reserven der Länder mit den stärkeren Währungen (insbesondere Deutschland und die Niederlande) erhöhten.

Ende Dezember 1992 entfielen 27 % der Währungsreserven von EUR 12 auf Deutschland, 14 % auf Spanien und 11 % auf das Vereinigte Königreich. Irland war das EG-Land mit den geringsten Währungsreserven. Die Währungsreserven der Vereinigten Staaten, die 1989 dank derausgeprägten Dollarstärke aufgestockt werden konnten, sind seitdem mehr oder weniger konstant geblieben. Die japanischen Reserven haben sich 1992 zwar erhöht, sind mit rund 60 Milliarden Ecu jedoch nicht so umfangreich wie Ende der 80er Jahre.

VIERTELJÄHRLICHE GESAMTRECHNUNGEN: Drittes Quartal 1992: Stagnation der Wirtschaftsentwicklung in der Gemeinschaft (BIP +0,2 %) bei gleichbleibender Inflation (+0,8 %)

Im dritten Quartal 1992 war die Wirtschaft der Gemeinschaft insgesamt durch eine anhaltende Stagnation des Wirtschaftswachstums (BIP +0,2 %) gekennzeichnet. Da in diesem Quartal erneut keine positive Entwicklung zu verzeichnen war, betrug das Wirtschaftswachstum in den ersten neun Monaten des Jahres im Vergleich zum entsprechenden Vorjahreszeitraum lediglich +1,1 % und lag damit weit unter den Vorhersagen. Ausgehend von dieser negativen Entwicklung wurden sämtliche jährliche Prognosen nach unten korrigiert. Beim derzeitigen Stand der Dinge wird für das Jahr 1992 lediglich ein BIP-Wachstum von 1,0 % vorhergesagt, das wäre die niedrigste Wachstumsrate seit 1982. Den meisten Wirtschaftswissenschaftlern zufolge sind nur schwer Anzeichen für eine kurzfristige Erholung der Wirtschaft in der Gemeinschaft auszumachen. Demgegenüber deutet einiges auf einen Wirtschaftsaufschwung in den Vereinigten Staaten hin. Als große Unbekannte gilt zur Zeit jedoch die Frage, inwieweit die Volkswirtschaften der Gemeinschaft angesichts ihrer internen Probleme von diesem neuen Aufwärtstrend in den Vereinigten Staaten profitieren können. Wir wollen an dieser Stelle kurz auf einen der Faktoren eingehen, die für die gegenwärtige Stagnationsphase charakteristisch sind: die währungspolitischen und finanziellen Spannungen in der zweiten Jahreshälfte. Diese Spannungen waren ausschlaggebend für die Aufwärtsbewegung der Zinsen mit dem Ziel, das Gleichgewicht der Wechselkurse innerhalb des EWS aufrechtzuerhalten. Diese Politik hat sich zweifellos nachteilig auf das Wirtschaftswachstum in der Gemeinschaft ausgewirkt, insbesondere in den Weichwährungsländern wie Italien, Vereinigtes Königreich und Spanien.

Bei der anhand des impliziten BIP-Deflators gemessenen Preisentwicklung ist festzustellen, daß die vierteljährliche Inflationsrate (+0,8 %) stabil, die jährliche Rate (+3,7 %) dagegen leicht rückläufig ist. Die straffe Geldpolitik im Betrachtungszeitraum sowie eine gewisse Schwäche der Inlandsnachfrage haben sicher dazu beigetragen, daß die Inflation unter Kontrolle gehalten werden konnte.

Charakteristisch für die Entwicklung der Bestandteile des BIP ist in diesem Quartal zum einen eine geringe Zunahme der Investitionstätigkeit (+0,2 %) und zum anderen eine leichte Erholung des privaten Verbrauchs (+0,7 %).

Was die Situation in den Mitgliedstaaten angeht, so liegen Daten für das vierte Quartal lediglich für Frankreich (nur mengenmäßig), Deutschland, das Vereinigte Königreich und die Niederlande (nur für das BIP) vor. Diesen Angaben zufolge ist das Wirtschaftswachstum in Frankreich (-0,3 %) rückläufig, während ein schwacher Aufwärtstrend im Vereinigten Königreich, in den Niederlanden und insbesondere in Deutschland zu verzeichnen ist (BIP +0,3 %, +0,4 % bzw. +0,1 %).

In den Vereinigten Staaten ist im vierten Quartal ein Produktionswachstum (BIP +0,9 %) zu erkennen, das mit einem leichten Anstieg der vierteljährlichen Inflationsrate (+0,5 %) einhergeht, während die jährliche Inflationsrate (+2,4 %) geringfügig zurückgegangen ist. Charakteristisch für die Komponenten der Inlandsnachfrage ist im vierten Quartal eine spürbare Zunahme der Investitionstätigkeit (+3,5 %). Auch der private Verbrauch (+1,1 %) verzeichnet eine positive Entwicklung, während der Staatsverbrauch (-0,4 %) leicht rückläufig ist.

Für Japan ist das vierte Quartal durch ein stagnierendes Wirtschaftswachstum (BIP +0,1 %) und einen geringfügigen Anstieg der vierteljährlichen Inflationsrate (+0,3 %) gekennzeichnet, während die jährliche Inflationsrate (+1,4 %) spürbar nachgegeben hat. Charakteristisch für die Entwicklung der Bestandteile des BIP war im dritten Quartal ein Rückgang der Investitionstätigkeit (-1,7 %), zum zweiten Mal in Folge, sowie des privaten Verbrauchs (-0,6 %).

PREISE: Die Jahresinflationsrate für die EG geht weiter zurück: 3,5 % im Februar

Die Jahresinflationsrate für die EG insgesamt gemessen mit dem Verbraucherpreisindex ging von 3,6 % in Januar (revidiert) auf 3,5 % in Februar zurück. Vor einem Jahr lag diese Rate bei 4,7 %; zur Zeit sind die Inflationsraten in 10 der 12 Mitgliedstaaten niedriger als im Vorjahr. Ausnahmen bilden Belgien und Luxemburg wo sie über dem Vorjahresniveau liegen.

In aufsteigender Reihenfolge geordnet sind die Jahresinflationsraten der einzelnen Mitgliedstaaten wie folgt:

	FEBR. 93 FEBR. 92	FEBR. 92 FEBR. 91		FEBR. 93 FEBR. 92	FEBR. 92 FEBR. 91
Dänemark	1,3 %	2,3 %	Luxemburg	3,8 %	2,8 %
Ver. Königreich	1,8 %	4,1 %	Deutschland*	4,2 %	4,3 %
Irland	1,9 %	3,7 %	Italien	4,4 % ^p	5,7 %
Frankreich	2,2 % ^p	3,0 %	Spanien	4,7 % ^{**}	6,7 %
Niederlande	2,6 %	4,3 %	Portugal	8,0 %	8,0 %
Belgien	2,8 %	2,3 %	Griechenland	14,5 %	18,2 %

* Der Verbraucherpreisindex der Bundesrepublik Deutschland bezieht sich weiterhin auf den Gebietsstand vor dem 3. Oktober 1990.

** Januarzahl
p = vorläufig

Die entsprechenden Raten für die Vereinigten Staaten und Japan betragen 3,2 % (2,8 %) bzw. 1,4 % (2,0 %).

Der monatliche Preisindex für EUR 12 stieg zwischen Januar und Februar um 0,4 %; die Mehrzahl der Mitgliedstaaten trugen zu diesem guten Ergebnis bei mit gemäßigten Preissteigerungen von 0,3 % im Belgien, Dänemark, Griechenland und Luxemburg und 0,4 % in Deutschland, Frankreich, Italien und den Niederlanden.

(1) Zinssatz, zu dem die Bundesbank Kredite gegen Verpfändung von Wertpapieren gewährt.

Ein bedeutender Anstieg von 0,7 % dagegen verzeichnete das Vereinigte Königreich infolge Preiserhöhungen für Bekleidung, Schuhe, Nahrungsmittel, Haushaltsgüter und Personenkraftwagen. Auch in Portugal wurde ein wichtiger Anstieg von 0,8 % festgestellt, zum größten Teil verursacht durch starke Preissteigerungen für Wasserverbrauch (3,0 %), Verkehr (2,0 %) und Gaststättenverzehr (1,5 %).

Der vierteljährliche Index für Irland stieg zwischen Mitte November 1992 und Mitte Februar 1993 um 0,4 %, d.h. etwas mehr wie 0,1 % im Monat. Schliesslich wurde der Verbraucherpreisindex von Spanien, der im vorigen Monat nicht verfügbar war, veröffentlicht; er zeigt einen starken Zuwachs von 0,9 % im Januar, hauptsächlich wegen eines Anstiegs der Preise für Lebensmittel (1,4 %) Wohnkosten (1,5 %) sowie für sonstige Haushaltsgüter und Dienste (1,3 %). Der spanische Preisindex für Februar lag bei Redaktionsschluss noch nicht vor; er wurde deshalb von Eurostat geschätzt um die Berechnung des EUR-12 Index zu ermöglichen.

ARBEITSLOSIGKEIT IN DER GEMEINSCHAFT Eurostat schätzt die saisonbereinigte Arbeitslosenquote in der Gemeinschaft für Februar 1993 auf 10,1 %

Sie ist damit im Vergleich zum Vormonat um 0,1 und über das Jahr um 0,9 Prozentpunkte gestiegen.

In den vergangenen zehn Jahren war eine Arbeitslosenquote von 10,1 % für die Gemeinschaft zweimal zu verzeichnen: Im vierten Quartal 1983 in einer Anstiegsphase und im vierten Quartal 1987 in einer Abstiegsphase der Arbeitslosigkeit.

Die gleich hohen Arbeitslosenquoten zu drei unterschiedlichen Zeitpunkten ergeben sich jedoch aufgrund unterschiedlicher Strukturen bei Abnahme der Disparitäten unter den verschiedenen Gruppen der Arbeitslosen. Ende 1984 war das Risiko, arbeitslos zu sein, für die am stärksten gefährdete Gruppe, nämlich die Frauen von unter 25 Jahren, bei einer Arbeitslosenquote von 24,8 % 4 mal so hoch wie für die am wenigsten gefährdete Gruppe, d.h. die Männer von 25 Jahren und darüber, mit einer Arbeitslosenquote von 6,2 %. Ende 1987 war dieser Abstand nur geringfügig zurückgegangen (3,7 mal so hoch statt 4 mal). Im Februar 1993 ist dieses Risiko für die jungen Frauen nur noch knapp 3 mal so hoch wie das der Männer von 25 Jahren und darüber. Die Quoten liegen nun bei 20,2 % und 7,0 %. Insgesamt ist die Arbeitslosenquote der Jugendlichen unter 25 Jahre in den letzten 10 Jahren kontinuierlich zurückgegangen: Von 23,1 % Ende 1984 über 20,7 % Ende 1987 auf 19,2 % im Februar 1993. Sie liegt jeweils deutlich höher als die der Personen von 25 Jahren und darüber. Die Arbeitslosenquote der Frauen stieg dagegen zwischen Ende 1983 und Ende 1987 von 12,1 % auf 12,9 % zu, fiel dann aber auf 12,0 % im Februar 1993. Die Arbeitslosigkeit der Frauen ist seit 1990 weniger stark gewachsen als die der Männer.

Diese Schätzung der Arbeitslosenquote und der Zahl der Arbeitslosen schaltet die unterschiedlichen nationalen Methoden zur Erfassung der Arbeitslosigkeit weitgehend aus. Die Arbeitslosenquote wird geschätzt durch Extrapolation der 1991er Ergebnisse der EG-Arbeitskräfteerhebung in den Mitgliedstaaten. Die Einbeziehung der 1992er Ergebnisse, sobald verfügbar, kann zu Revisionen der Schätzungen führen.

INDUSTRIEPRODUKTION SINKT WEITERHIN

Die Entwicklung der Industrieproduktion der Europäischen Gemeinschaft (EUR 12) bis Dezember 1992 zeigt, daß die Rezession noch keineswegs zu Ende ist. Die konjunkturelle Schwächephase hält an. Nach wie vor ist in allen Industriegüterklassen eine abnehmende Produktionsstärkung beobachtbar. Der arbeitstäglich bereinigte Produktionsindex der Industrie (NACE 1-4) belief sich im Dezember für die Europäische Gemeinschaft auf 107,6 (1985=100). Dies entspricht einer Veränderungsrate des Index gegenüber dem Dezemberwert des letzten Jahres von -3,6 %. Für die Investitionsgüterindustrie beträgt die entsprechende Veränderungsrate -4,5 %. Nach Saisonbereinigung beträgt der Produktionsindex für Dezember 109,9, im November war er bei 111,3, im Januar '92 bei 115,0. Verglichen mit dem kumulierten Wert des dritten Quartals veränderte sich die saisonbereinigte Industrieproduktion in der EG im vierten Quartal 1992 um -1,6 %.

Für die einzelnen Mitgliedstaaten der EG ergibt sich für die saisonbereinigte Industrieproduktion folgende Veränderungsrate der letzten drei Monate gegenüber den Vormonaten: (in Klammern: Investitionsgüterindustrie) Dänemark -5,9 % (-5,0 %), Griechenland -1,9 % (-8,7 %), Italien -1,7 % (-3,8 %), Belgien -0,8 % (geschätzt) (+4,3 %), Deutschland (West) -2,9 % (-3,4 %), Frankreich -1,4 % (-2,7 %), Niederlande -1,2 % (-3,6 %), Vereinigtes Königreich +0,9 % (+0,5 %), Irland +4,8 % (geschätzt) (+8,0 %). Demnach sinkt in sehr vielen Mitgliedstaaten die Produktion.

In den USA steigt die Industrieproduktion leicht an mit +0,9 % (Veränderungsrate der letzten drei Monate gegenüber den Vormonaten); in Japan sinkt sie leicht mit -0,2 % (geschätzt).

Betrachtet man die Produktion in den verschiedenen Bereichen der Industriegüterarten, so ergibt sich für die Europäische Gemeinschaft folgendes Bild (Änderungsrate der letzten drei Monate gegenüber den Vormonaten):

- Grundstoffe und Produktionsgüter -1,6 % (USA: +0,6 %),
- Investitionsgüter -1,6 % (USA: +1,7 %),
- Konsumgüter -1,0 % (USA: +1,3 %).

Demnach ist die konjunkturelle Schwäche in der EG gleichförmig in allen Bereichen anzutreffen, während in den USA die Investitionsgüterindustrie an Fahrt gewinnt.

Die Jahreswachstumsrate 1992 gegenüber 1991 wird für die Industrieproduktion (NACE 1-4) zur Zeit für die einzelnen Mitgliedsstaaten und die Europäische Gemeinschaft wie folgt berechnet: EUR12: -1,1 %; Irland: 10,1 %; Dänemark: 1,4 %; Belgien: 0,5 %; Niederlande: 0,1 %; Vereinigtes Königreich: -0,3 %; Frankreich: -0,9 %; Griechenland: -1,0 %; Spanien: -1,3 %; Italien: -1,6 %; Luxemburg: -1,8 %; Deutschland (West): -2,0 %; Portugal: -2,2 %.

ZAHLUNGSBILANZ — Gesamttendenzen — vorläufige Zahlen für das dritte Quartal 1992:

Die Leistungsbilanz der Gemeinschaft verschlechterte sich im dritten Quartal 1992 gegenüber dem entsprechenden Vorjahreszeitraum um 4,8 Mrd. ECU und schloß mit einem Defizit von 13 Mrd. ECU ab. Die Leistungsbilanz der Vereinigten Staaten verzeichnete ein Defizit von 15,2 Mrd. ECU, was eine Verschlechterung um 1,1 Mrd. ECU bedeutet. In Japan stieg der Überschub um 3,7 Mrd. ECU auf 20,4 Mrd. ECU.

Nach den vorläufigen Zahlen schloß die Leistungsbilanz der Gemeinschaft im dritten Quartal 1992 mit einem Defizit in Höhe von 13 Mrd. ECU ab, das bedeutet eine Verschlechterung um 4,8 Mrd. ECU gegenüber dem entsprechenden Vorjahreszeitraum. Diese Entwicklung ist auf das um 12,8 Mrd. ECU gestiegene Defizit der Dienstleistungs- und Übertragungsbilanz zurückzuführen, bei einer Verbesserung der Handelsbilanz um 8 Mrd. ECU. Diese war — nach zwei Quartalen mit negativen Ergebnissen — nunmehr ausgeglichen. Die Veränderungen sind vor allem auf die deutsche Leistungsbilanz zurückzuführen: Dort stieg der Handelsbilanzüberschub im dritten Quartal 1992 um 3,5 Mrd. ECU, während sich der Saldo der Dienstleistungsbilanz um 5,1 Mrd. ECU verschlechterte. Das gleiche gilt für Italien: Verbesserung des Handelsbilanzüberschusses um 2 Mrd. ECU und Verschlechterung der Dienstleistungsbilanz um 3,6 Mrd. ECU. Im übrigen verbesserte sich die französische Handelsbilanz um 1,8 Mrd. ECU, während sich die des Vereinigten Königreichs um 1,1 Mrd. ECU verschlechterte.

In den Vereinigten Staaten schloß die Leistungsbilanz im dritten Quartal 1992 mit einem Defizit von 15,2 Mrd. ECU ab, nachdem sie im gleichen Vorjahreszeitraum ein Defizit von 14 Mrd. ECU ausgewiesen hatte. Das Handelsbilanzdefizit stieg von 20,6 Mrd. ECU auf 22,9 Mrd. ECU. Der Überschub der Dienstleistungs- und Übertragungsbilanz stieg um 1,2 Mrd. ECU auf 7,7 Mrd. ECU.

In Japan betrug der Leistungsbilanzüberschub im dritten Quartal 1992 20,4 Mrd. ECU gegenüber 16,7 Mrd. ECU im gleichen Vorjahreszeitraum. Der Handelsbilanzüberschub nahm um 0,9 Mrd. ECU zu; das Defizit der Dienstleistungs- und Übertragungsbilanz verringerte sich um 2,8 Mrd. ECU.

AUSSENHANDEL

Die Bilanz des außergemeinschaftlichen Handels für die ersten elf Monate des Jahres 1992 schloß mit einem Defizit von 50,4 Mrd. ECU ab, das sind 20 Mrd. ECU weniger als im entsprechenden Vorjahreszeitraum. Die Differenz zwischen der Entwicklungsrate der Ausfuhren und der der Einfuhren, die von Januar bis November 1991 bei -6,5 Prozentpunkten lag, wurde im entsprechenden Zeitraum des Jahres 1992 wieder positiv und erreichte +5 Prozentpunkte.

Im November 1992 betrug das Defizit des außergemeinschaftlichen Handels 2,9 Mrd. ECU und erhöhte sich damit um 1,8 Mrd. ECU gegenüber November 1991. Die Einfuhren in die Gemeinschaft nahmen gegenüber November 1991 um 6,6 % zu, während die Ausfuhren um 2,5 % zurückgingen. Der Preis für Rohöllieferungen in die Gemeinschaft gab zwischen November 1991 und November 1992 in Dollar je Barrel um 9 % und in Ecu je Barrel um 7,5 % nach, was mit zum Rückgang der Einfuhren im November 1992 gegenüber dem entsprechenden Vorjahresmonat beigetragen hat.

In den ersten elf Monaten des Jahres 1992 zusammengenommen wies die Handelsbilanz der Vereinigten Staaten einen Fehlbetrag von 73,4 Mrd. ECU auf, gegenüber -63,2 Mrd. ECU im entsprechenden Zeitraum des Jahres 1991. Zwischen November 1991 und November 1992 nahmen die Einfuhren in Ecu gerechnet um 3,2 % und in Dollar um 9 % zu, während die Ausfuhren in Ecu stagnierten, in Dollar hingegen um beinahe 6 % stiegen.

Im November 1992 schloß die Handelsbilanz der Vereinigten Staaten mit einem Defizit von 8,4 Mrd. ECU ab und verschlechterte sich damit gegenüber November 1991 um 3 Mrd. ECU. Die Einfuhren in die Vereinigten Staaten nahmen in Ecu ausgedrückt deutlich (um 12,4 %) zu, in Dollar ausgedrückt betrug der Anstieg 10,7 %. Die Ausfuhren erhöhten sich gegenüber November 1991 in Ecu um 3,7 % und in Dollar um 2,1 %.

Die zusammengefaßte Handelsbilanz Japans weist für die ersten elf Monate des Jahres 1992 einen Überschub von mehr als 78 Mrd. ECU aus und verbesserte sich damit um 21 Mrd. ECU gegenüber dem entsprechenden Vorjahreszeitraum. Die Differenz zwischen der Entwicklungsrate der Ausfuhren und der der Einfuhren von Januar bis November 1991 und 1992 lag bei rund +10 Prozentpunkten. Die Ausfuhren haben in Ecu um 2,8 % und in Yen um 1,7 % zugenommen, während sie in Dollar ausgedrückt kräftig angestiegen sind (8,4 %). Die japanischen Einfuhren gaben in Ecu um 8,4 %, in Dollar um knapp 4 % und in Yen um 8 % nach.

Im November 1992 belief sich das Handelsbilanzdefizit Japans auf 7,1 Mrd. ECU, gegenüber 6,1 Mrd. ECU im November 1991. Die japanischen Ausfuhren sind in Ecu gerechnet um 2,2 % gestiegen, in Dollar stagnierten sie (+0,6 %) und in Yen sind sie um 5,2 % zurückgegangen. Bei den japanischen Einfuhren war im November 1992 gegenüber dem Niveau vom November 1991 in Ecu ein Rückgang um 3,6 %, in Dollar um 5,1 % und in Yen um 10,5 % zu verzeichnen.

Der Handelsbilanzüberschub Deutschlands belief sich im November 1992 auf insgesamt 0,8 Mrd. ECU und fiel damit um die Hälfte niedriger aus als im entsprechenden Vorjahresmonat, lag damit allerdings immer noch über dem Saldo der übrigen Mitgliedstaaten. Die dänische Handelsbilanz wies im November 1992 einen Überschub von 0,5 Mrd. ECU aus. Die Handelsbilanz der Niederlande war insgesamt ausgeglichen und verschlechterte sich damit gegenüber November 1991 um 0,4 Mrd. ECU. In der BLWU und in Frankreich waren geringe Defizite in Höhe von 0,3 bzw. 0,5 Mrd. ECU zu verzeichnen. Das griechische Defizit hat sich zwischen November 1991 und November 1992 um 0,5 Mrd. ECU verringert und beläuft sich nunmehr auf 0,6 Mrd. ECU. Die Handelsbilanz Portugals schloß insgesamt mit einem Defizit von 0,8 Mrd. ECU ab, das sind 0,3 Mrd. ECU weniger als im November 1991. Die italienische und die spanische Handelsbilanz wiesen trotz einer Verbesserung um 0,4 bzw. 0,8 Mrd. ECU annähernd gleich hohe Defizite von jeweils 1,2 Mrd. ECU aus. Das größte Defizit war im Vereinigten Königreich zu verzeichnen: es belief sich auf 2,1 Mrd. ECU, gegenüber -1,7 Mrd. ECU im November 1991.

Eurostatistics - data for short-term economic analysis is a monthly publication aimed at providing, as rapidly as possible, the latest statistical data on the European Community as a whole (EUR12), each Member State, the United States and Japan.

Eurostatistics does not present all the statistics held by Eurostat, but a selection of the most relevant series on the economic situation.

Speed of publication and punctuality are the main features of this publication; that is why it is deliberately streamlined and does not contain any methodological notes, which are given in Eurostat's specialized publications.

The data published in *Eurostatistics* are taken from the ICG domain of Eurostat's on-line database, Cronos (the notes regarding on-line consultation may be found at the end of this publication). They are also available via the Commission host Eurobases in the Eurocron database.

Further information on *Eurostatistics* can be obtained from the following addresses:

Unless otherwise stated, data for the Federal Republic of Germany, including West Berlin, as constituted prior to 3 October 1990.

EXCHANGE RATES: Bundesbank reduces discount rate

At its policy-making council meeting on March 18, the Deutsche Bundesbank decided to reduce its discount rate by 1/4% to 7 1/4%. This reduction was received with some disappointment by financial markets, which had been hoping for a reduction in the internationally important Lombard rate¹. The central banks of Austria, Belgium, Denmark, the Netherlands and Switzerland also reduced their official lending rates.

The reduction in the discount rate came after a change in the Bundesbank's 14-day repo rate on March 5. This occurred the day after the previous council meeting had decided that there would be no changes in the Bundesbank's headline rates, and therefore came as a surprise to financial markets. The immediate effect was a weakening of the Deutschemerk against other EC currencies, and especially against sterling and the dollar, both of which gained around 3 pfennigs on the day.

There was a further change in German very short-term interest rates on March 25 when the Bundesbank announced that the 3-day Treasury bill rate was to be reduced from 8.4 to 7.5%.

The French franc weakened slightly ahead of the French legislative elections, the first round of which took place on March 21. The Belgian franc suffered from political problem in the week of March 22, when disagreement over budget cuts brought about an offer of resignation from the Belgian Prime Minister. The franc weakened initially, but later strengthened once more after the National Bank of Belgium increased two of its interest rates.

The escudo was weaker in the middle of March following the resignation on March 12 of the Vice-President of the Banco de Portugal. Intervention by the Portuguese central bank later led to the escudo's strengthening however.

The dollar's appreciation against the Deutschemerk at the beginning of March referred to above was not sustained later in the month, despite both the expectation that the developing instability in Russia would add to the dollar's attraction as a 'safe haven' and further positive news on the US economy. The dollar has failed to break through its 30-day moving average of DM1.645. Against the yen, it again reached all-time lows in early March.

GOVERNMENT BOND YIELDS: general decline in yields

In February, government bond yields declined in 8 out of the 11 countries for which data are available. This follows a similar decline in many countries in January.

Within the EC, the largest fall occurred in Spain, where yields have been very variable in the last 6 months. In the UK, yields fell by 0.3% to stand at 8.6%, the lowest level for many years. In Germany, the slight fall in February brought yields down below 7% for the first time since August 1989.

Yields also fell in the US and in Japan. Although US government bond yields are now just below 7%, their lowest level since the beginning of 1977, they are now higher than those of Germany. Japanese government bond yields fell by 0.6% in February, following the 0.75% reduction in the Japanese discount rate which occurred on February 4. The discount rate now stands at 2 1/2%, and thus despite the low level of interest rates the yield curve is still positively sloped.

From January 1993 onwards, data for Luxembourg reflect a new method of calculation, which reflects more closely the yield on those government bonds which are actively traded.

MONEY SUPPLY: Data on 1992 outturn

Data are now available on the outturn for 1992 for most EC Member States. These data indicate that monetary growth in most cases was sluggish, with the target range, where existing, exceeded in only one case (Germany).

In two cases the outcome for 1992 was even beneath the target range: in Spain, the outcome for the growth in ALP in the 12 months to December was 4.8%, as compared to a target range of 8-11%; in Italy, growth of M2 was 4.6% as compared to a range of 5-7%.

In Greece, Portugal and the UK growth was well within the range set by the relevant monetary authorities, although in the case of Greece, the growth rate of M3 only moved back within its target range of 9-12% in the last month of the year, having grown rather faster for much of the year. The growth of L- in Portugal slowed in the fourth quarter of 1992, to end the year growing at an annualised rate of 13.7%, within the Bank of Portugal's target of 12-16%. In the UK the only targetted monetary variable in 1992 was M0, the monetary base, which grew by 2.6% in the 12 months to December, below its target range of 0-4%.

FOREIGN OFFICIAL RESERVES: change in the composition of EC's reserves

There was a significant change in the distribution of EUR 12's reserves in the second half of 1992. At the end of the June 1992, the largest part of EUR 12 foreign official reserves was held by Spain (22.4%), followed by Germany (19.9%). However, the exchange rate upheavals in the autumn of 1992 led to the countries judged to have weaker currencies experiencing serious outflows of reserves, with those with stronger currencies, notably Germany and the Netherlands, experiencing inflows.

At the end of December, Germany held 27% of EUR 12's reserves, with Spain holding 14% and the UK 11%. Ireland's reserves are the lowest in the EC.

The US, having built up its reserves during 1989 when the dollar was particularly strong, has maintained them at around those levels. However, although Japan experienced an inflow of reserves in 1992, at around 60 billion ecu they are rather lower than at the end of the 1980s.

QUARTERLY ACCOUNTS: The Community economy stagnated in the third quarter of 1992 (GDP +0.2%), while inflation remained stable (+0.8%).

In the Community as a whole, the third quarter of 1992 saw continuing stagnation of economic growth (GDP +0.2%). This further poor quarter reduced growth for the first nine months of the year to +1.1% compared with the same period the previous year, which was

well down on the forecast figure. Consequently, all the annual forecasts have been revised downwards. GDP growth for 1992 is expected to be only +1.0%, the lowest rate since 1982. According to most economists, there are few signs of an early upturn in the Community economy. On the other hand, the American economy is showing signs of recovery. What is not known is whether the Community economies, with the internal problems they are facing, will be able to benefit from that upturn. A significant feature of this period of stagnation has been the financial and monetary tensions that marked the second half of the year. The effect of these strains was to push interest rates upwards to maintain exchange-rate stability within the EMS. This policy undoubtedly had a negative influence on the performance of the Community economies, especially in countries with weak currencies such as Italy, the United Kingdom and Spain.

Prices as measured by the implicit GDP deflator show inflation to be stable over the quarter (+0.8%), with a slight fall in annual inflation (+3.7%). The restrictive monetary policies adopted during the period, coupled with some weakness in domestic demand, helped keep inflation under control.

As regards the components of GDP, the quarter saw marginal growth in investments (+0.2%) but rising private consumption (+0.7%).

For the Member States we have fourth-quarter data for France (volume only), Germany, the United Kingdom and the Netherlands (GDP only). They show a downturn in France (GDP -0.3%), and relatively weak growth in the United Kingdom, the Netherlands and particularly Germany (GDP +0.3%, +0.4% and +0.1% respectively).

In the United States, the fourth quarter saw positive growth in output (+0.9%), accompanied by a slight rise in quarterly inflation (+0.5%) but a small drop in annual inflation (+2.4%). The main feature of domestic demand in the fourth quarter was the remarkable increase in investments (+3.5%). Private consumption also improved (+1.1%), whereas public consumption declined slightly (-0.4%).

The fourth quarter in Japan was marked by stagnating economic growth (GDP +0.1%), with a slight rise in quarterly inflation (+0.3%) but a substantial fall in annual inflation (+1.4%). As regards the components of GDP, the quarter was marked by a second consecutive slowdown in investments (-1.7%) and lower private consumption (-0.6%).

PRICES: Deceleration of the EC annual inflation rate: 3.5% in February

The annual inflation rate for the EC as a whole as measured by the CPI fell to 3.5% in February from 3.6% in January (revised up from last months estimated 3.5%). A year ago this rate was 4.7%: at present 10 of the 12 Member States have inflation rates lower than last year. Exceptions are Belgium and Luxembourg where the annual rates are now higher.

In order of increasing current inflation the annual rates of the EC Member States are as follows:

	FEB. 93	FEB. 92		FEB. 93	FEB. 92
	FEB. 92	FEB. 91		FEB. 92	FEB. 91
Denmark	1.3%	2.3%	Luxembourg	3.8%	2.8%
United Kingdom	1.8%	4.1%	Germany*	4.2%	4.3%
Ireland	1.9%	3.7%	Italy	4.4%p	5.7%
France	2.2%p	3.0%	Spain	4.7%**	6.7%
Netherlands	2.6%	4.3%	Portugal	8.0%	8.0%
Belgium	2.8%	2.3%	Greece	14.5%	18.2%

* The CPI for the Federal Republic of Germany continues to reflect the geographic borders prior to 3 October 1990.

** January figure.

p = provisional.

The corresponding rates for the USA and Japan were 3.2% (2.8%) and 1.4% (2.0%) respectively.

Between January and February the EUR 12 index rose by 0.4%. Most of the Member States contributed to this result with moderate increases of 0.3% in Belgium, Denmark, Greece and Luxembourg and 0.4% in Germany, France, Italy and the Netherlands.

A marked increase was recorded however in the UK where higher prices for clothing, footwear, food, household goods and motoring pushed up the index by 0.7%. Another important rise of 0.8% was reported from Portugal, as a result of sharp increases of water charges (3.0%), transport (2.0%) and meals out (1.5%).

The quarterly index for Ireland rose by 0.4% between mid-November 1992 and mid-February 1993, which corresponds to a monthly average of about 0.1%. Finally the CPI for Spain, which was not available last month has been published; it shows a relatively large increase of 0.9% in January, mainly caused by higher prices for food (1.4%) housing (1.5%) and for various other goods and services (1.3%).

The February index for Spain was not available at the closing date of this bulletin; it has been estimated by Eurostat to allow the calculation of the EUR 12 index.

UNEMPLOYMENT IN THE COMMUNITY

Eurostat estimates that the seasonally-adjusted unemployment rate in the European Community was 10.1% for the month of February 1993, representing a rise of 0.1 points in comparison with January 1993 and 0.9 points in comparison with February 1992.

This rate of 10.1% for the Community has been recorded on two previous occasions in the last ten years: in the 4th quarter of 1983, when unemployment was rising towards its peak, and in the 4th quarter of 1987, when it was again falling.

The fact that the average rates were the same at these three points in time conceals considerable differences in the structure of unemployment, in particular the reduced inequality on the labour market between different groups of the population. At the end of 1983, the risk of unemployment for the most vulnerable group, women aged under 25 (24.8% unemployment), was four times as great as for the least vulnerable, men aged 25 or more (6.2% unemployment). At the end of 1987, women under 25 were only 3.7 times as likely to be unemployed as men over 25, and in February 1993, 2.9 times as likely (20.2% and 7%).

Unemployment among young people aged under 25 remains considerably higher than among persons aged 25 and over, but nevertheless shows a tendency over the last ten years to decrease towards the general average. It fell from 23.1% at the end of 1983 to 20.7% at the end of 1987 and 19.2% in February 1993.

¹ The rate at which the Bundesbank lends against securities.

The trend of unemployment among women has been less consistent; between the end of 1983 and the end of 1987 it rose from 12.1% to 12.9% but has dropped again to 12% in February 1993; the general development since 1990 shows a more rapid increase among men than among women.

The unemployment rate and the number of unemployed persons are estimated after taking account of the differences between national methods of recording unemployment. The rate of unemployment is estimated by extrapolating the 1991 results of the labour force surveys for all the Member States. The introduction of the 1992 results, as soon as they become available, will probably lead to a revision of the estimates.

INDUSTRIAL PRODUCTION CONTINUES TO DECREASE

Industrial production trends in the European Community (EUR 12) up to December 1992 show that the recession is by no means over. The slump is continuing. Production has continued to fall in all sectors of manufacturing industry. In December the index of industrial production (NACE 1-4), adjusted for the number of working days, stood at 107.6 (1985=100) for the Community as a whole, 3.6% down on the previous December's figure. For the capital goods industries, the index fell 4.5%, giving a seasonally-adjusted production index for December of 109.9, whereas in November it had stood at 111.3 and in January 1992 at 115.0. The seasonally-adjusted EC production index fell by 1.6% in the fourth quarter of 1992 compared with the third quarter.

The seasonally-adjusted figures for industrial output in the EC Member States are as follows (rate of change for the past three months compared with previous three months, with the capital goods industries in brackets): Denmark -5.9% (-5.0%); Greece -1.9% (-8.7%); Italy -1.7% (-3.8%); Belgium -0.8% (estimated) (+4.3%); Germany (West) -2.9% (-3.4%); France -1.4% (-2.7%); Netherlands -1.2% (-3.6%); United Kingdom +0.9% (+0.5%); Ireland +4.8% (estimated) (+8.0%). Production is therefore falling in very many Member States.

In the USA, industrial production saw a slight increase of 0.9% (rate of change for the past three months compared with the previous three months); in Japan it fell slightly (an estimated 0.2%).

Production of the various types of goods was as follows in the European Community (rate of change for the past three months compared with the previous three months):

- Intermediate goods: -1.6% (USA: +0.6%),
- Capital goods: -1.6% (USA: +1.7%),
- Consumer goods: -1.0% (USA: +1.3%).

It can be seen that the downturn in the EC economy is reflected equally in all sectors, whilst in the USA the capital goods industries are gaining momentum.

* * *

The year-on-year rates of change (1992/1991) for industrial production (NACE 1-4) in the EC Member States and in the European Community as a whole currently stand as follows: EUR12: -1.1%; Ireland 10.1%; Denmark 1.4%; Belgium 0.5%; Netherlands 0.1%; United Kingdom -0.3%; France -0.9%; Greece -1.0%; Spain -1.3%; Italy -1.6%; Luxembourg -1.8%; Germany (West) -2.0%; Portugal -2.2%.

BALANCE OF PAYMENTS – global trends – preliminary figures for the third quarter of 1992:

Deterioration of ECU 4.8 billion in the Community current account balance compared with the third quarter of 1991: the balance shows a deficit of ECU 13 billion. The American current account deficit of ECU 15.2 billion represents a deterioration of ECU 1.1 billion. The Japanese current account balance improved by ECU 3.7 billion to a surplus of ECU 20.4 billion.

In the third quarter of 1992, according to the preliminary figures, the Community current account deficit of ECU 13 billion represented a worsening of 4.8 billion on the third quarter

of 1991. This decline reflected the ECU 12.8 billion deterioration in the invisibles deficit, partly offset by an improvement of ECU 8 billion in the balance of trade in goods, which achieved equilibrium after two quarters in the red. These variations are largely due to the German balance, which recorded an increase of ECU 3.5 billion in its trade surplus and a deterioration of ECU 5.1 billion in its invisibles deficit in the third quarter of 1992. The same phenomenon was recorded in Italy, with an ECU 2 billion improvement in the trade surplus and a deterioration of ECU 3.6 billion in the invisible deficit. France's balance of trade improved by ECU 1.8 billion and the United Kingdom's declined by ECU 1.1 billion. In the United States, the current account balance showed a deficit of ECU 15.2 billion in the third quarter of 1992, as compared with ECU 14 billion in the same quarter of 1991. The trade deficit was ECU 22.9 billion as against ECU 20.6 billion, and the surplus on invisibles improved by ECU 1.2 billion to ECU 7.7 billion.

In the third quarter of 1992, the Japanese current account produced a surplus of ECU 20.4 billion, up from ECU 16.7 billion in the same period of 1991. The trade surplus was up ECU 0.9 billion and the invisibles deficit shrank by ECU 2.8 billion.

EXTERNAL TRADE

Extra-Community trade for the first 11 months of 1992 was in deficit by ECU 50.4 billion, 20 billion less than for the corresponding period in 1991. The differential in the development of exports and imports, which was -6.5 points for the period January to November 1991, became positive for the same period in 1992 at +5 points.

In November 1992, the extra-Community balance was ECU -2.9 billion, an improvement of 1.8 billion compared with November 1991. Extra-Community imports fell by 6.6% compared with November 1991 while exports gave ground by 2.5%. The cost of supplying the Community with crude oil fell by 9% in dollars per barrel between November 1991 and 1992 and by 7.5% in ecus. This reduction contributed to the decline in imports in November 1992 compared with November 1991.

The US trade balance, in cumulative terms for the first eleven months of 1992, stood at ECU -73.4 billion as opposed to -63.2 billion for the corresponding period in 1991. Imports moved up 3.2% in ecu terms between these two periods and 9% in dollar terms. Exports levelled off in ecu terms (0.6%) but went up by almost 6% in dollar terms.

In November 1992, the US balance was ECU -8.4 billion, 3 billion more than in November 1991. Imports were clearly up as measured in ecus (12.4%) and in dollars (10.7%). Exports were 3.7% higher in ecus over November 1991 and 2.1% in dollars.

The trade surplus in Japan, in cumulative terms for the first eleven months of 1992, exceeded ECU 78 billion, 21 billion higher than in the corresponding period in 1991. The differential in the development of exports and imports between January-November 1992 and 1991 was around +10 points. Exports, up 2.8% in ecu terms and 1.7% in yen, rose clearly in dollars (8.4%). Japanese imports were down 8.4% in ecus, almost 4% in dollars and 8% in yen.

In November 1992, the Japanese balance was ECU 7.1 billion as opposed to 6.1 billion in November 1991. Japanese exports rose 2.2% in ecus, remained level in dollars (0.6%) and fell by 5.2% in yen. Japanese imports in November 1992 were down 3.6% in ecus, 5.1% in dollars and 10.5% in yen compared with the November 1991 level.

Overall trade in Germany in November 1992 was ECU 0.8 billion in surplus. This balance, only half that of November 1991, was still the highest of the Member States. Denmark was in surplus by half a billion ecus in November 1992. The total balance of trade in the Netherlands was in equilibrium, falling by ECU 0.4 billion over November 1991; the BLEU and France had small deficits of ECU -0.3 billion and ECU -0.5 billion respectively. Greece reduced its deficit by 1 billion between November 1991 and 1992 to attain ECU -0.6 billion. The total balance of trade in Portugal was ECU -0.8 billion, 0.3 billion down on November 1991. Italy and Spain recorded deficits of around ECU -1.2 billion despite improvements of 0.4 and 0.8 billion respectively over November 1991. The deficit in the United Kingdom was the heaviest: ECU -2.1 billion as opposed to -1.7 billion in November 1991.

Eurostatistiques - Données pour l'analyse de la conjoncture est une publication mensuelle qui a pour but de fournir dans les meilleurs délais les données statistiques les plus récentes pour la Communauté européenne en tant qu'ensemble (EUR12), pour les pays membres ainsi que pour leurs principaux partenaires extra-communautaires (États-Unis d'Amérique et Japon).

Eurostatistiques ne publie pas d'une manière exhaustive toutes les statistiques disponibles auprès d'Eurostat, mais les plus importantes parmi celles-ci.

Cette publication se veut rapide et facilement maniable. Pour cette raison, elle ne comporte pas de notes méthodologiques, qui sont par ailleurs disponibles dans les publications spécialisées d'Eurostat.

Les données publiées dans *Eurostatistiques* proviennent du domaine ICG de la base de données Cronos (les instructions pour le mode de consultation on-line se trouvent à la fin de cette publication). Elles sont aussi disponibles dans la base de données Eurocron, accessible par l'intermédiaire du serveur Eurobases de la Commission.

TAUX DE CHANGE: la Bundesbank réduit son taux d'escompte

Lors de son conseil du 18 mars, la Deutsche Bundesbank a décidé de réduire son taux d'escompte de 0,5 % à 7,5 %. Cette décision a quelque peu déçu les marchés financiers qui s'attendaient à une réduction du taux Lombard (1), important sur le plan international. Les banques centrales d'Autriche, Belgique, Danemark, Pays-Bas et Suisse ont également réduit leurs taux de refinancement.

La réduction du taux d'escompte est venue après une modification du taux de prise en pension à quatorze jours de la Bundesbank le 5 mars. Cette modification a eu lieu le jour suivant la dernière réunion du conseil au cours duquel avait été décidé qu'il n'y aurait aucune modification des taux directeurs de la Bundesbank, et a donc surpris les marchés financiers. L'effet immédiat a été un affaiblissement du Deutschemark contre d'autres monnaies CE, et en particulier contre le sterling et le dollar qui toutes les deux ont gagné environ 3 pennings au cours de la journée.

Une autre modification a eu lieu sur les taux d'intérêt allemands à très court terme le 25 mars lorsque la Bundesbank a annoncé que les bons du Trésor à trois jours seraient réduits de 8,4 à 7,5 %.

Le franc français a légèrement faibli avant les élections législatives dont le premier tour a eu lieu le 21 mars. Le franc belge a souffert un problème politique dans la semaine du 22 mars lorsqu'un désaccord sur les réductions budgétaires a amené le Premier ministre belge à offrir sa démission. Le franc a d'abord faibli, puis s'est redressé plus tard lorsque la Banque nationale de Belgique a relevé deux de ses taux d'intérêt.

L'escudo s'est montré plus faible vers la mi-mars à la suite de la démission le 12 mars du vice-président de la Banque du Portugal. Cependant, l'intervention de la Banque centrale a ensuite permis à l'escudo de se raffermir.

L'appréciation du dollar contre le Deutschemark au début de mars à laquelle il est fait référence plus haut, ne s'est pas confirmée au cours du mois bien que l'on s'attendait d'abord à ce que l'instabilité qui se développe en Russie, renforce l'attraction du dollar en tant que «havre de sécurité», et ensuite à de nouveaux signaux positifs sur l'économie US. Le dollar a failli casser à la baisse sa moyenne sur 30 jours de DM 1,645. Contre le yen, il a de nouveau atteint des plus bas historiques au début mars.

RENDEMENTS DES EMPRUNTS D'ÉTAT: baisse générale des rendements

En février, les rendements des emprunts d'État ont baissé dans huit des onze pays pour lesquels on dispose de données. Cette situation a entraîné une baisse identique dans de nombreux pays en janvier.

Dans la CE, le plus fort repli s'est produit en Espagne où les rendements ont fortement varié au cours des six derniers mois. Au RU, les rendements ont baissé de 0,3 % pour s'établir à 8,6 %, le niveau le plus bas depuis de nombreuses années. En Allemagne, la légère contraction de février a fait reculer les taux au-dessous de 7 % pour la première fois depuis août 1989.

Les taux ont également reflué aux US et au Japon. Bien que les rendements des emprunts d'État US soient désormais juste au-dessous de 7 %, leur plus bas niveau depuis le début de 1977, ils sont maintenant supérieurs à ceux de l'Allemagne. Les rendements des emprunts d'État japonais ont régressé de 0,6 % en février, suivant une réduction de 0,75 % du taux d'escompte japonais décidée le 4 février. Le taux d'escompte se situe actuellement à 2,5 %, et en dépit du bas niveau des taux d'intérêt, la courbe de rendement est toujours positivement orientée.

A partir de janvier 1993, les données pour Luxembourg sont calculées selon une nouvelle méthode qui reflète plus fidèlement le rendement des emprunts d'État activement traités.

MASSE MONÉTAIRE: données sur 1992

Des données sont désormais disponibles sur le chiffre effectif de 1992 pour la plupart des États membres de la CE. Ces données indiquent que la croissance monétaire était dans la plupart des cas faible en restant, le cas échéant, à l'intérieur de la fourchette fixée, avec un seul cas de dépassement, l'Allemagne.

Dans deux cas, le chiffre effectif pour 1992 a même été inférieur à l'objectif fixé: en Espagne, le chiffre effectif de la croissance de ALP pour les douze mois se terminant en décembre n'a été que de 4,8 % par rapport à la fourchette fixée de 8-11 %; en Italie, la croissance de M2 a été de 4,6 % comparée à la fourchette de 5-7 %.

En Grèce, au Portugal et au RU, la croissance a été bien contenue à l'intérieur des valeurs fixées par les autorités monétaires responsables bien que dans le cas de la Grèce, le taux de croissance de M3 soit revenu dans la fourchette de 9-12 % au cours du dernier mois de l'année après avoir progressé plus rapidement la plus grande partie de l'année. La croissance de L au Portugal s'est ralentie au cours du quatrième trimestre de 1992 pour terminer l'année en progressant à un taux annualisé de 13,7 %, dans les limites de la fourchette de la Banque du Portugal de 12-16 %. Au RU, la seule variable monétaire ciblée en 1992 était M0, la base monétaire qui a progressé de 2,6 % au cours des douze mois se terminant en décembre, soit en-deçà de la fourchette retenue de 0-4 %.

RÉSERVES OFFICIELLES SUR L'ÉTRANGER: modification de la composition des réserves CE

La répartition des réserves d'EUR 12 s'est modifiée de manière significative au cours du deuxième semestre de 1992. A la fin du mois de juin 1992, la plus grande partie des réserves officielles sur l'étranger EUR 12 était détenue par l'Espagne (22,4 %), suivie par l'Allemagne (19,9 %). Cependant, les tensions sur les taux de change en automne 1992 ont provoqué de sérieuses sorties de réserves dans les pays jugés comme ayant des monnaies plus faibles et à des rentrées pour les pays à monnaie plus forte, notamment en Allemagne et aux Pays-Bas.

A la fin de décembre, l'Allemagne détenait 27 % des réserves EUR 12, l'Espagne 14 % et le Royaume-Uni 11 %. Les réserves de l'Irlande sont les plus basses de la CE.

(1) Le taux auquel la Bundesbank prête contre des titres.

Les États-Unis qui ont reconstitué leurs réserves en 1989 lorsque le dollar était particulièrement vigoureux, ont réussi à les maintenir à peu près au même niveau. Cependant, le Japon qui a pourtant bénéficié d'une rentrée de réserves en 1992 de l'ordre de 60 milliards d'Ecus, voit ses réserves inférieures à ce qu'elles étaient à la fin des années 1980.

COMPTES TRIMESTRIELS: Au cours du troisième trimestre 1992: phase de stagnation de l'économie communautaire (PIB +0,2 %), inflation stable (+0,8 %)

Le troisième trimestre 1992 a été caractérisé, pour l'économie communautaire dans son ensemble, par la poursuite de la phase de stagnation de la croissance économique (PIB +0,2 %). A cause de ce nouveau trimestre négatif, la croissance au cours des neuf premiers mois de l'année a été de +1,1 % par rapport à la période correspondante de l'année précédente, ce qui est largement au-dessous des prévisions. Sur la base de cette évolution négative, toutes les prévisions annuelles ont été révisées vers le bas. Vu l'état actuel des choses, on prévoit, pour l'année 1992, seulement +1,0 % de croissance du PIB, la plus basse depuis 1982. Selon la plupart des économistes il est très difficile d'identifier des signaux de reprise à court terme pour l'économie communautaire. D'autre part, des signaux de reprise viennent de l'économie américaine. La vraie inconnue de cette phase est représentée par la capacité des économies communautaires, étant donné leurs problèmes internes, de profiter de cette nouvelle phase économique aux États-Unis. Parmi les éléments qui caractérisent cette phase de stagnation, il nous semble utile de nous arrêter brièvement sur les tensions monétaires et financières qui ont caractérisé la deuxième partie de l'année. Ces tensions ont déterminé une tendance à la hausse des taux d'intérêt, dans le but de maintenir l'équilibre du taux de change à l'intérieur du SME. Cette politique a sans doute influencé de manière négative la performance des économies communautaires, surtout dans les pays à devises faibles comme, par exemple, l'Italie, le Royaume-Uni et l'Espagne.

En ce qui concerne l'évolution des prix, mesurée par le déflateur implicite du PIB, on constate une inflation stable au niveau trimestriel (+0,8 %), tandis qu'en rythme annuel on observe une légère baisse (+3,7 %). Les politiques monétaires restrictives adoptées pendant cette période, ainsi qu'une certaine faiblesse de la demande interne, ont sûrement contribué à maintenir l'inflation sous contrôle.

En ce qui concerne les composantes du PIB, ce trimestre a été caractérisé par deux éléments: d'une part la faible croissance des investissements (+0,2 %), et d'autre part la reprise de la consommation privée (+0,7 %).

En ce qui concerne la situation dans les États membres, nous disposons des données pour le quatrième trimestre pour la France (seulement en volume), l'Allemagne, le Royaume-Uni et les Pays-Bas (seulement pour le PIB). Ces données indiquent un fléchissement de la croissance en France (PIB -0,3 %), une croissance assez faible au Royaume-Uni, aux Pays-Bas et surtout en Allemagne (PIB +0,3 %, +0,4 % et +0,1 % respectivement).

Aux États-Unis, on observe, pour le quatrième trimestre, une croissance positive de la production (PIB +0,9 %) accompagnée par une légère reprise de l'inflation trimestrielle (+0,5 %), tandis qu'en rythme annuel on constate une légère réduction (+2,4 %). Parmi les composantes de la demande interne, le fait marquant du quatrième trimestre a été représenté par la remarquable progression des investissements (+3,5 %). La consommation privée se caractérise par son évolution positive (+1,1 %), tandis que pour la consommation publique on constate un léger fléchissement (-0,4 %).

Pour le Japon, le quatrième trimestre a été caractérisé par une phase de stagnation de la croissance économique (PIB +0,1 %) accompagnée par une légère reprise de l'inflation trimestrielle (+0,3 %), tandis qu'en rythme annuel on observe une sensible réduction (+1,4 %). Parmi les composantes du PIB, les faits marquants de ce trimestre ont été représentés par les fléchissements des investissements (-1,7 %), qui est le deuxième consécutif, ainsi que de la consommation privée (-0,6 %).

PRIX: Décélération du taux d'inflation de la CE: 3,5 % en février

Le taux d'inflation annuelle pour l'ensemble de la CE a reculé de 3,6 % en janvier (chiffre révisé) à 3,5 % en février. Il y a un an ce taux était de 4,7 %; actuellement 10 des 12 États membres affichent des taux d'inflation plus bas que l'année dernière. Font exception la Belgique et le Luxembourg, où les taux sont maintenant plus élevés.

Dans l'ordre croissant de l'inflation actuelle les taux annuels des États membres sont les suivants:

	FEVR. 93	FEVR. 92		FEVR. 93	FEVR. 92
	FEVR. 92	FEVR. 91		FEVR. 92	FEVR. 91
Danemark	1,3 %	2,3 %	Luxembourg	3,8 %	2,8 %
Royaume Uni	1,8 %	4,1 %	R.F. d'Allemagne*	4,2 %	4,3 %
Irlande	1,9 %	3,7 %	Italie	4,4 %p	5,7 %
France	2,2 %p	3,0 %	Espagne	4,7 %**	6,7 %
Pays Bas	2,6 %	4,3 %	Portugal	8,0 %	8,0 %
Belgique	2,8 %	2,3 %	Grèce	14,5 %	18,2 %

* L'IPC pour la R.F. d'Allemagne continue à se rapporter à la situation territoriale avant le 23 octobre 1990.

** Chiffre relatif au mois de janvier.
p = provisoire.

Les taux correspondants pour les États-Unis et le Japon sont 3,2 % (2,8 %) respectivement 1,4 % (2,0 %).

En rythme mensuel l'IPC pour EUR 12 a augmenté de 0,4 % entre janvier et février; la plupart des États membres ont contribué à ce résultat avec des hausses modérées de 0,3 % en Belgique, au Danemark, en Grèce et au Luxembourg, et de 0,4 % en Allemagne, en France, en Italie et aux Pays-Bas. Pourtant une hausse sensible a été enregistrée au Royaume-Uni, où des prix plus élevés pour l'habillement, les chaussures, l'alimentation, les biens de ménage et le transport privé ont poussé l'indice en haut de 0,7 %.

Une autre hausse importante a été signalée au Portugal, suite à des majorations de prix de l'eau (3,0 %), du transport (2,0 %) et des repas dans les restaurants (1,5 %).

L'indice trimestriel de l'Irlande a progressé de 0,4 % entre mi-novembre 1992 et mi-février 1993, c.a.d. un peu plus que 0,1 % en moyenne mensuelle. Finalement l'IPC de l'Espagne, qui n'était pas disponible le mois dernier, a été publié; il montre une forte hausse de 0,9 %, principalement due à l'augmentation des prix de l'alimentation (1,4 %), du logement (1,5 %) et d'autres biens et services (1,3 %). L'indice de l'Espagne pour février n'était pas disponible à la fin de rédaction de ce bulletin; il a été estimé par Eurostat pour permettre le calcul de l'indice EUR 12.

FR

LE CHÔMAGE DANS LA COMMUNAUTÉ

Eurostat estime que, dans la Communauté européenne, le taux de chômage corrigé des variations saisonnières atteint 10,1 % au mois de février 1993, en hausse de +0,1 point de pourcentage par rapport au mois de janvier 1993 et de +0,9 point de pourcentage par rapport au mois de février 1992.

Au cours des dix dernières années, un taux de chômage de 10,1 % pour l'ensemble de la Communauté a été atteint à deux reprises: au 4^e trimestre 1983, en période de hausse du chômage et au 4^e trimestre 1987, au cours de la phase décroissante du cycle.

Mais l'identité des taux moyens masque des structures différentes et la réduction de l'inégalité des diverses catégories de la population sur le marché du travail: le risque de chômage était, fin 1984, 4 fois plus élevé pour la catégorie la plus vulnérable, les femmes de moins de 25 ans (24,8 %) que pour la moins vulnérable, les hommes de 25 ans et plus (6,2 %). Cet écart se réduit à 3,7 fois à la fin de 1987 puis à 2,9 fois en février 1993 (20,2 % et 7,0 %).

Le chômage des jeunes de moins de 25 ans, s'il reste nettement plus élevé que celui des personnes âgées de 25 ans et plus, a en effet régulièrement diminué au cours des 10 derniers années: il est passé de 23,1 % fin 1984 à 20,7 % fin 1987 puis à 19,2 % en février 1993.

Le chômage des femmes a connu une évolution plus irrégulière: il a augmenté, entre fin 1983 et fin 1987, de 12,1 à 12,9 % pour revenir à 12,0 % en février 1993; depuis 1990, on constate en effet une augmentation plus rapide du chômage chez les hommes que chez les femmes.

Le taux de chômage et le nombre de chômeurs sont estimés après correction des différences dans les méthodes nationales de recensement du chômage.

Le taux de chômage est estimé en extrapolant les résultats 1991 des enquêtes sur les forces de travail pour tous les Etats membres. L'introduction des résultats 1992, dès qu'ils seront disponibles, entraînera probablement une révision des estimations.

LA PRODUCTION INDUSTRIELLE CONTINUE DE DIMINUER

L'évolution de la production industrielle de la Communauté européenne (EUR 12) jusqu'en décembre 1992 montre que la récession n'est absolument pas terminée. Le ralentissement conjoncturel perdure. C'est encore dans le secteur des biens d'investissement que l'on continue d'observer une baisse de la production. En décembre, l'indice de la production industrielle corrigé du nombre de jours ouvrables (NACE 1-4) était de 107,6 (1985 = 100) pour la Communauté européenne, ce qui correspond à un taux de variation de -3,6 % par rapport à la valeur du mois de décembre de l'année dernière. Pour l'industrie des biens d'investissement, le taux de variation correspondant est de -4,5 %. L'indice corrigé des variations saisonnières atteint 109,9 pour décembre contre 111,3 en novembre et 115,0 en janvier 1992. Par rapport à la valeur cumulée du troisième trimestre, la production industrielle corrigée des variations saisonnières de la CE a diminué de -1,6 % au cours du quatrième trimestre de 1992.

En ce qui concerne les différents Etats membres de la CE, les taux de variation de la production industrielle corrigée des variations saisonnières ont évolué comme suit pour les trois derniers mois par rapport aux mois précédents (entre parenthèses: biens d'investissement): Danemark -5,9 % (-5,0 %), Grèce -1,9 % (-8,7 %), Italie -1,7 % (-3,8 %), Belgique -0,8 % (estimation) (+4,3 %), Allemagne (Ouest) -2,9 % (-3,4 %), France -1,4 % (-2,7 %), Pays-Bas -1,2 % (-3,6 %), Royaume-Uni +0,9 % (+0,5 %), Irlande +4,8 % (estimation) (+8,0 %). La production baisse donc dans un très grand nombre d'Etats membres.

Aux Etats-Unis, la production industrielle a un peu augmenté (+0,9 %) (taux de variation des trois derniers mois par rapport aux mois précédents) et au Japon, elle a légèrement baissé (estimation de -0,2 %).

Si l'on observe la production dans les différents secteurs des biens d'investissement, on obtient alors la ventilation suivante pour la Communauté européenne (taux de variation des trois derniers mois par rapport au mois précédent):

- Matières premières et biens de production -1,6 % (USA: +0,6 %)
- Biens d'investissement -1,6 % (USA: +1,7 %)
- Biens de consommation -1,0 % (USA: +1,3 %)

La faiblesse conjoncturelle est donc uniforme dans tous les secteurs tandis qu'aux USA, on note une reprise dans l'industrie des biens d'investissement.

Par rapport à 1991, le taux de croissance annuelle de la production industrielle (NACE 1-4) pour les différents Etats membres et pour la Communauté européenne est calculé comme suit pour 1992: EUR 12: -1,1 %; Irlande: 10,1 %; Danemark: 1,4 %; Belgique: 0,5 %;

Pays-Bas: 0,1 %; Royaume-Uni: -0,3 %; France: -0,9 %; Grèce: -1,0 %; Espagne: -1,3 %; Italie: -1,6 %; Luxembourg: -1,8 %; Allemagne (Ouest): -2,0 %; Portugal: -2,2 %.

BALANCE DES PAIEMENTS — tendances mondiales — chiffres préliminaires pour le troisième trimestre de 1992:

Détérioration de 4,8 mrd d'écus de la balance courante communautaire par rapport au troisième trimestre de 1992: la balance accuse un déficit de 13 mrd d'écus. La balance courante américaine enregistre un déficit de 15,2 mrd d'écus correspondant à une détérioration de 1,1 mrd d'écus. La balance courante japonaise s'améliore de 3,7 mrd pour atteindre un excédent de 20,4 mrd d'écus.

Au troisième trimestre de 1992, selon les chiffres préliminaires, la balance courante communautaire atteindrait un déficit de 13 mrd d'écus soit une détérioration de 4,8 milliards par rapport au troisième trimestre de 1991. Cette détérioration provient de l'aggravation de 12,8 mrd d'écus du déficit des invisibles, en partie compensée par une amélioration de 8 mrd d'écus du solde des marchandises. Celui-ci atteint l'équilibre après deux trimestres de déficit. Ces variations sont dues en grande partie à la balance allemande qui a enregistré au troisième trimestre de 1992 une augmentation de son excédent commercial de 3,5 mrd et une détérioration de son déficit des invisibles de 5,1 mrd. On note le même phénomène pour l'Italie: amélioration de 2 mrd de l'excédent commercial et une aggravation du déficit des invisibles de 3,6 mrd. Par ailleurs, la balance commerciale de la France est en amélioration de 1,8 mrd, tandis que celle du Royaume-Uni accuse une détérioration de 1,1 mrd.

Aux Etats Unis, le solde courant atteint un déficit de -15,2 mrd d'écus au troisième trimestre de 1992 comparé aux -14 mrd d'écus au cours du même trimestre de 1991. Le déficit commercial atteint -22,9 mrd d'écus après -20,6 mrd, l'excédent des invisibles s'améliore de 1,2 mrd d'écus pour atteindre 7,7 mrd d'écus.

Au troisième trimestre de 1992, l'excédent courant japonais atteint 20,4 mrd d'écus après 16,7 mrd pour la même période de 1991. L'excédent commercial s'est amélioré de 0,9 mrd d'écus et le déficit des invisibles s'est réduit de 2,8 mrd d'écus.

COMMERCE EXTERIEUR

Les échanges extra-communautaires pour les onze premiers mois de 1992 se soldent par un déficit de 50,4 Mrd d'écus, allégé de 20 Mrd par rapport à la période correspondante de 1991. La différence entre taux d'évolution des exportations et des importations qui est de -6,5 points pour la période janvier-novembre 1991, devient positive pour la même période de 1992, avec +5 points.

Au mois de novembre 1992 le solde extra-communautaire atteint -2,9 Mrd d'écus, marquant un progrès de 1,8 Mrd comparé à novembre 1991. Les importations extra-communautaires chutent de 6,6 % par rapport à leur niveau de novembre 1991, tandis que les exportations se replient de 2,5 %. Le coût d'approvisionnement de la Communauté en pétrole brut baisse de 9 % en dollars par baril entre novembre 1991 et 1992, et de 7,5 % en écus. Cette réduction contribue au repli des importations en novembre 1992, comparé à novembre 1991.

Le bilan du commerce des Etats-Unis, cumulé pour les onze premiers mois de 1992, atteint -73,4 Mrd d'écus, contre -63,2 Mrd pour la période correspondante de 1991. Les importations progressent de 3,2 % en écus entre ces deux périodes, de 9 % en dollars. Les exportations stagnent en écus (0,6 %), mais augmentent de près de 6 % en dollars.

En novembre 1992 le solde des Etats-Unis est de -8,4 Mrd d'écus, alourdi de 3 Mrd par rapport à novembre 1991. Les importations des Etats-Unis affichent une nette progression en écus (12,4 %), soit 10,7 % en dollars. Les exportations croissent de 3,7 % en écus par rapport à novembre 1991, et de 2,1 % en dollars.

L'excédent commercial du Japon cumulé pour les onze premiers mois de 1992 dépasse 78 Mrd d'écus, il est supérieur de 21 Mrd au niveau de la période correspondante de 1991.

Le différentiel de taux d'évolution des exportations et des importations entre janvier-novembre 1992 et 1991 est de l'ordre de +10 points. Les exportations, en augmentation de 2,8 % en écus, et de 1,7 % en yens, progressent fermement en dollars (8,4 %). Les importations japonaises baissent de 8,4 % en écus, de près de 4 % en dollars, et de 8 % en yens.

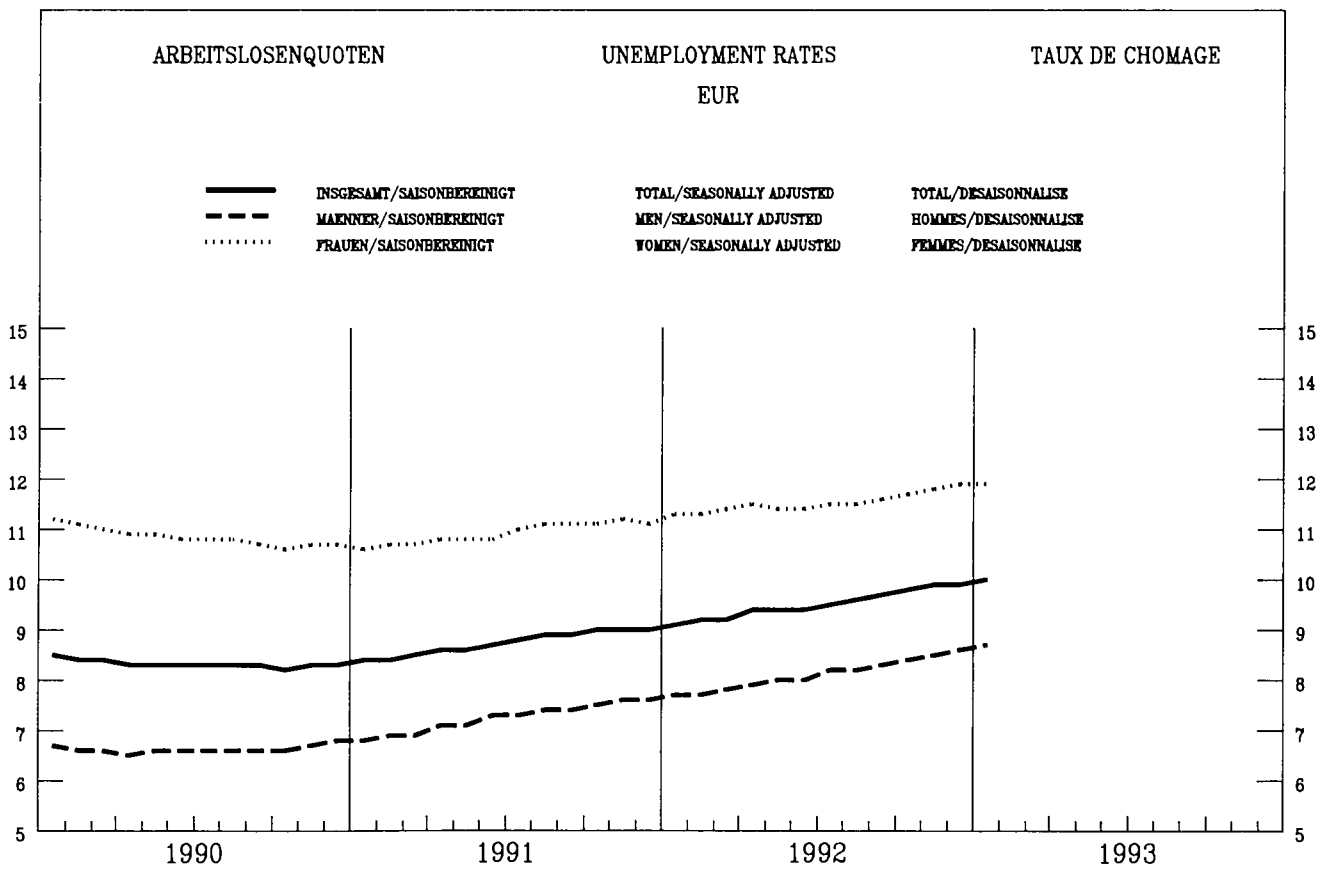

En novembre 1992 le solde du Japon est de 7,1 Mrd d'écus, contre 6,1 Mrd en novembre 1991. Les exportations du Japon croissent de 2,2 % en écus, stagnent en dollars (0,6 %), et régressent de 5,2 % en yens. Les importations japonaises de novembre 1992 affichent un recul de 3,6 % en écus, de 5,1 % en dollars et de 10,5 % en yens comparées à leur niveau de novembre 1991.

En novembre 1992 le commerce total de l'Allemagne est excédentaire de 0,8 Mrd d'écus. Ce solde, diminué de moitié par rapport à novembre 1991, reste le plus élevé des pays membres. Le Danemark est excédentaire d'un demi-milliard d'écus en novembre 1992. Le bilan des échanges totaux des Pays-Bas est équilibré, il se dégrade de 0,4 Mrd d'écus par rapport à novembre 1991. L'UEBL et la France affichent des déficits faibles: respectivement -0,3 Mrd d'écus et -0,5 Mrd d'écus. La Grèce voit son déficit se réduire d'un milliard entre novembre 1991 et 1992 pour atteindre -0,6 Mrd d'écus. Le solde total des échanges du Portugal est de -0,8 Mrd d'écus, dégradé de 0,3 Mrd comparé à novembre 1991. L'Italie et l'Espagne ont des déficits avoisinant -1,2 Mrd d'écus, malgré des améliorations respectives de 0,4 Mrd et 0,8 Mrd rapportées à novembre 1991. Le Royaume-Uni affiche le déficit le plus lourd: -2,1 Mrd d'écus, contre -1,7 Mrd en novembre 1991.

„On line“-Abfrage

Jede Zeitreihe ist durch einen neunstelligen numerischen Kode gekennzeichnet, der seinerseits in Unterkodes gegliedert ist, welche – im Falle von „Eurostatistik“ – das Land, den Sektor, die Tabelle, die Einheit und die Periodizität bezeichnen.

Die Bedeutung der einzelnen Unterkodes ist der nachstehend aufgeführten Tabelle zu entnehmen.

Land XX	Sektor XX	Tabelle XXXX	Periodizität und Einheit X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Variablen tabelle XXXX vierstelliger Wert, der im Titel jeder Tabelle erscheint	0 jährlich, Angaben in Prozent 1 vierteljährlich, Angaben in Prozent 2 monatlich, Angaben in Prozent 3 jährlich, Indexangaben (1985 = 100) 4 vierteljährlich, Indexangaben (1985 = 100) 5 monatlich, Indexangaben (1985 = 100) 6 jährlich, Angaben in absoluten Werten 7 vierteljährlich, Angaben in absoluten Werten 8 monatlich, Angaben in absoluten Werten 9 Gewicht, EUR 10 = 100 bzw. EUR 12 = 100

* Territoriale Aufteilung vor dem 3. 10. 90: 02 für EUR 12, 12 für D.

Beispiele: Will man die monatliche Arbeitslosigkeit (in absoluten Zahlen) von Frankreich gemäß Tabelle 0304 dieser Veröffentlichung erfahren, so braucht man nur den Kode 14 93 0304 8 einzugeben.

'On-line' consultation

Each time series is identified by a nine-digit code broken down into subcodes, which in the case of Eurostatistics, represent the country, sector, table unit and periodicity. The significance of the different subcodes may be found in the table below.

Country XX	Sektor XX	Table XXXX	Periodicity and unit X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Table by indicator XXXX 4-digit value quoted in the title of each table	0 annual in % 1 quarterly in % 2 monthly in % 3 annual index 1985 = 100 4 quarterly index 1985 = 100 5 monthly index 1985 = 100 6 annual absolute value 7 quarterly absolute value 8 monthly absolute value 9 weighting EUR 10 = 100 or EUR 12 = 100

* data for the territorial situation before 3. 10. 90: 02 for EUR 12, 12 for D.

Consultation example: to know the monthly unemployment (absolute figures) of France as is shown in Table 0304 of this publication, the code 14 93 0304 8 should be formed.

Mode de consultation «on-line»

Chaque série chronologique est identifiée par un code à neuf chiffres structuré en sous-codes représentant, dans le cas d'Eurostatistiques, le pays, le secteur, le tableau, l'unité et la périodicité. On trouvera dans le tableau ci-dessous la signification des différents sous-codes.

Pays XX	Secteur XX	Tableau XXXX	Périodicité et unité X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Tableaux par variable XXXX valeur à 4 chiffres figurant dans le titre de chaque tableau	0 annuelle exprimée en pourcentage 1 trimestrielle exprimée en pourcentage 2 mensuelle exprimée en pourcentage 3 annuelle exprimée en indice 1985 = 100 4 trimestrielle exprimée en indice 1985 = 100 5 mensuelle exprimée en indice 1985 = 100 6 annuelle exprimée en valeur absolue 7 trimestrielle exprimée en valeur absolue 8 mensuelle exprimée en valeur absolue 9 pondération EUR 10 = 100 ou EUR 12 = 100

* données pour la situation territoriale avant le 3. 10. 90: 02 pour EUR 12, 12 pour D.

Exemple de consultation: pour connaître le chômage mensuel (chiffres absolus) de la France, tel qu'il figure au tableau 0304 de cette publication, il suffit d'appeler le code 14 93 0304 8;
