Las publicaciones de Eurostat están clasificadas por temas y por series. La clasificación se encuentra al final de la obra. Para mayor información sobre las publicaciones, rogamos se pongan en contacto con Eurostat. Para los pedidos, dirijanse a las oficinas de venta cuyas direcciones figuran en la página interior de la contracubierta.

Eurostats publikationer er klassificeret efter emne og serie. En oversigt herover findes bag i hæftet. Yderligere oplysninger om publikationerne kan fås ved henvendelse til Eurostat. Bestilling kan afgives til de salgssteder, der er anført på omslagets side 3.

Die Veröffentlichungen von Eurostat sind nach Themenkreisen und Reihen gegliedert. Die Gliederung ist hinten in jedem Band aufgeführt. Genauere Auskünfte über die Veröffentlichungen erteilt Eurostat. Ihre Bestellungen richten Sie bitte an die Verkaufsbüros, deren Anschriften jeweils auf der dritten Umschlagseite der Veröffentlichungen zu finden sind.

Οι εκδόσεις της Eurostat ταξινομούνται κατά θέμα και κατά σειρά. Η ακριβής ταξινόμηση αναφέρεται στο τέλος κάθε έκδοσης. Για λεπτομερέστερες πληροφορίες σχετικά με τις εκδόσεις, μπορείτε να απευθύνεσθε στην Eurostat.

Για τις παραγγελίες μπορείτε να απευθύνεσθε στα γραφεία πώλησης, των οποίων οι διευθύνσεις αναγράφονται στη σελίδα 3 του εξωφύλλου.

Eurostat's publications are classified according to themes and series. This classification is indicated at the end of the publication. For more detailed information on publications, contact Eurostat. Orders are obtainable from the sales offices mentioned on the inside back cover.

Les publications d'Eurostat sont classées par thème et par série. Cette classification est précisée à la fin de l'ouvrage. Pour des informations plus détaillées sur les publications, contactez Eurostat. Pour les commandes, adressez-vous aux bureaux de vente dont les adresses sont indiquées à la page 3 de la couverture.

Le pubblicazioni dell'Eurostat sono classificate per tema e per serie. Tale classificazione è precisata alla fine dell'opera. Per informazioni più dettagliate sulle pubblicazioni rivolgersi all'Eurostat. Per eventuali ordinazioni rivolgersi a uno degli uffici di vendita i cui indirizzi figurano nella 3^a pagina della copertina.

De publikaties van Eurostat zijn ingedeeld naar onderwerp en serie. Deze indeling is achter in het boek opgenomen. Voor nadere informatie over de publikaties kunt u zich wenden tot Eurostat. Gelieve bestellingen op te geven bij de verkoopbureaus, waarvan de adressen op bladzijde 3 van de omslag zijn vermeld.

As publicações do Eurostat estão classificadas por tema e por série. Esta classificação está indicada no fim da obra. Para mais informações sobre as publicações é favor contactar Eurostat. Encomendas: serviços de venda cujos endereços estão indicados na contracapa.

Mit der monatlich erscheinenden Veröffentlichung *Eurostatistik - Daten zur Konjunkturanalyse* werden innerhalb kürzester Frist die neuesten statistischen Daten über die Europäische Gemeinschaft als Ganzes (EUR12), über jedes Mitgliedsland sowie über die Vereinigten Staaten und Japan bekanntgegeben.

Eurostatistik enthält nicht die Gesamtheit des bei Eurostat verfügbaren statistischen Materials, sondern eine Auswahl der relevantesten Reihen über die konjunkturelle Entwicklung.

Schnelligkeit und Pünktlichkeit sind die wichtigsten Vorzüge dieser Veröffentlichung.

Aus diesem Grunde wurde sie im Umfang bewußt klein gehalten und enthält keine Anmerkungen zur Methodik, die im übrigen in den spezialisierten Veröffentlichungen von Eurostat zu finden sind.

Die in *Eurostatistik* veröffentlichten Daten stammen aus dem ICG -Bereich der On-line-Datenbank Cronos von Eurostat.

Wer Zugang zu Cronos besitzt, kann jederzeit die Tabellen dieser Veröffentlichung abfragen, wobei die Daten täglich auf den neuesten Stand gebracht werden (Hinweise zur On-line -Benutzung finden sich auf der letzten Seite). Darüber hinaus sind die Daten in der Datenbank Eurocron verfügbar, die vom Host Eurobases der Kommission angeboten wird.

WECHSELKURSE: Allgemeiner Zinsrückgang

Zusätzlich zu der im Vormonat gemeldeten Senkung des Diskontsatzes wurden am 22. April die Zinsen in Deutschland erneut zurückgenommen. Der Zentralbankrat der Deutschen Bundesbank beschloß eine Senkung des Diskontsatzes auf 7,25 % (-0,25 %) und des Lombardsatzes auf 8,5 % (-0,5 %).

Unmittelbar im Anschluß an diese Zinssenkungen nahmen auch die dänische, die niederländische, die belgische, die italienische und die österreichische Zentralbank ihre Leitzinsen zurück. Die belgischen Zinsen waren, nachdem sie zuvor mehrfach heraufgesetzt wurden, bereits Anfang des Monats – allerdings in geringerem Umfang – gesenkt worden, da eine Lösung des Problems im Zusammenhang mit den Kürzungen im Staatshaushalt gefunden werden konnte.

Am 23. April wurden die Zinsen in Frankreich (siehe unten) und in Irland zurückgenommen. Damit hat die irische Notenbank die kurzfristigen Zinsen seit der Abwertung der irischen Währung Ende Januar stetig gesenkt; sie liegen heute bei 8,75 % und haben damit ihren niedrigsten Stand seit mehr als vier Jahren erreicht. Auch in Schweden und Norwegen wurden die Leitzinsen zurückgenommen.

Sechs Tage nach der Senkung des Diskont- und des Lombardsatzes nahm die Bundesbank auch ihren Zinssatz für Wertpapierpensionsgeschäfte von 8,09 % auf 7,75 %, und damit stärker als erwartet, zurück.

Der französische Franc gewann nach den französischen Parlamentswahlen an Wert, woraufhin die französische Zentralbank ihre beiden Leitzinssätze mehrfach zurücknehmen konnte. Am 13. April wurde der Zinssatz für fünfjährige Wertpapierpensionsgeschäfte in Höhe von 12 % durch den Satz für fünf- bis zehntägige Pensionsgeschäfte in Höhe von 10 % ersetzt. In den darauffolgenden Wochen wurden die Leitzinsen dreimal gesenkt, und zwar am 19. April der Zinssatz für Pensionsgeschäfte im Ausschreibungsverfahren („appel d'offres“) von 9,1 % auf 8,75 % und der Satz für fünf- bis zehntägige Pensionsgeschäfte um 0,25 % auf 9,75 %. Am 23. und am 29. April wurden diese beiden Sätze in vergleichbarem Umfang zurückgenommen, so daß sie nach der zweiten Senkung bei 8,25 % bzw. 9,25 % lagen.

Der Kurs der spanischen Peseta gegenüber den anderen europäischen Währungen ging in der Woche bis zum 23. April zurück und fiel zum ersten Mal seit der Peseta-Abwertung im November 1992 unter den Leitkurs gegenüber der D-Mark. Der Banco de Espana setzte seinen Interventionssatz zweimal herauf, so daß dieser nach der zweiten Erhöhung am 23. April 15 % erreichte; zusätzlich intervenierten mehrere EG-Notenbanken, um die spanische Währung zu stützen, die sich in der darauffolgenden Woche leicht erholte.

Das Pfund Sterling und die Lira, die beide im vorigen September aus dem Wechselkursmechanismus des EWS ausgeschieden waren, gewannen in den letzten Wochen an Wert. Das Pfund Sterling stand am 28. April bei knapp 2,50 DM; damit lag es einerseits zwar noch immer erheblich unter seinem früheren EWS-Leitkurs von 2,95 DM, andererseits jedoch um rund 6 % über seinem Anfang des Jahres verzeichneten Tiefstand. Die italienische Währung, deren DM-Kurs Ende März die Marke von 1 004 Lire erreicht hatte, gewann wieder an Wert und stand am 28. April nach der Meldung, daß der derzeitige Zentralbankpräsident zum Ministerpräsidenten ernannt werden soll, gegenüber der D-Mark bei 930 Lire.

Der Dollarkurs reagierte auf die Zinssenkungen in Europa nicht wie zu erwarten gewesen wäre, sondern ging in den letzten Aprilwochen zurück. Problematisch waren in diesem Zusammenhang vor allem die enttäuschenden Wirtschaftsindikatoren für den Monat März sowie politische Unsicherheiten. Im April erreichte der Kurs des Dollar gegenüber dem Yen mehrfach einen historischen Tiefstand, und gegen Ende des Monats intervenierte die amerikanische Notenbank zur Stützung ihrer Währung.

RENDITEN VON STAATSANLEIHEN: Renditen weiter rückläufig

Der in den letzten Monaten zu verzeichnende Rückgang der Renditen von Staatsanleihen setzte sich im März fort, als die Renditen in elf der dreizehn hier betrachteten Länder, für die Märzdaten vorliegen, rückläufig waren.

In sechs der elf EG-Mitgliedstaaten, für die Daten zu den Renditen von Staatsanleihen verfügbar sind, liegen die Renditen nunmehr bei unter 8 %.⁽¹⁾ Die Durchschnittsrendite von Staatsanleihen ging in diesen Mitgliedstaaten von 10,0 % im September 1992 auf 8,8 % im Februar 1993 zurück. In den am Wechselkursmechanismus teilnehmenden Ländern waren die Renditen etwas höher und lagen im Februar bei durchschnittlich 8,5 %.

Die realen (inflationbereinigten) Renditen von Staatsanleihen sind der folgenden Tabelle zu entnehmen:

Reale langfristige Zinssätze (Monatsdurchschnitte)

	9/92	12/92	3/93
Belgien	6,5	5,5	4,5
Dänemark	7,5	7,4	6,9
Deutschland	4,4	3,6	2,2
Spanien	7,3	7,7	7,6
Frankreich	6,4	6,1	5,6
Italien	10,5	9,0	7,8
Luxemburg	5,0	5,2	3,5
Niederlande	4,7	4,5	4,0
Portugal	1,8	3,0	2,6
Vereinigtes Königreich	5,6	6,2	6,4
USA	4,1	4,4	3,6
Japan	3,0	3,6	3,1

Der Rückgang der nominalen Renditen ging in den letzten sechs Monaten in vielen Ländern mit einem Rückgang der realen Renditen von Staatsanleihen einher.

Der stärkste Renditerückgang war in Italien zu verzeichnen, wobei jedoch zu berücksichtigen ist, daß die italienischen Renditen im September während der Turbulenzen auf den Devisenmärkten drastisch gestiegen waren. Verglichen mit August 1992 sind die Renditen im März 1993 sogar noch geringfügig angestiegen.

Auch in Deutschland, wo rückläufige nominale Renditen mit einer steigenden Inflationsrate einhergingen, gaben die realen Renditen deutlich nach, so daß sie hier jetzt, verglichen mit den anderen betrachteten Ländern, am niedrigsten sind.

Im Vereinigten Königreich, Portugal und Spanien war dagegen ein Anstieg der realen Renditen zu beobachten, der in allen drei Ländern auf eine deutliche Verlangsamung der Inflation zurückzuführen war, durch die der Rückgang der nominalen Renditen mehr als kompensiert wurde.

GELDVOLUMEN: Unterschiedliche Wachstumsraten

Die seit kurzem verfügbaren Februardaten für Griechenland, Irland, die Niederlande und das Vereinigte Königreich lassen ein unterschiedliches Geldmengenwachstum in diesen Ländern erkennen.

Mit rund 3 % lag das auf Jahresbasis umgerechnete Wachstum der Geldmenge M4 im Vereinigten Königreich gerade noch innerhalb des Zielkorridors von 3 %-9 %; verglichen mit früheren Werten war dies jedoch immer noch eine sehr niedrige Wachstumsrate. In Griechenland und in den Niederlanden war ebenfalls weiterhin ein relativ langsames Geldmengenwachstum zu verzeichnen.

Dagegen weitete sich die irische Geldmenge auf Jahresbasis umgerechnet um mehr als 20 % aus. In dieser Entwicklung spiegeln sich allerdings gewisse strukturelle Veränderungen wider; so fand aufgrund der kürzlich eingeführten Steuer auf Spareinlagen eine Mittelverlagerung von Spareinlagen hin zu anderen, im Geldmengenaggregat M3 enthaltenen Anlageformen statt. Zudem wurde Anfang des Jahres, als die irische Währung unter Druck stand, aufgrund der hohen kurzfristigen Zinsen vermehrt auf bestimmte Geldmarktinstrumente zurückgegriffen, die unter die Geldmenge M3 fallen.

AMTLICHE WÄHRUNGSRESERVEN: Zufluß von Reserven in Dänemark

Dänemark hatte im Februar 1993 einen starken Zufluß von Währungsreserven zu verzeichnen. Mit knapp 10,4 Mrd. ECU haben die dänischen Reserven derzeit ihren höchsten Stand seit geraumer Zeit erreicht. Zurückzuführen ist dies auf den Erlös einer Euroanleihe über 1 Mrd. USD, die das Königreich Dänemark im Februar begeben hat. Die eingegangenen US-Dollar wurden in D-Mark umgetauscht, um die dänischen Währungsreserven wieder aufzufüllen.

In Irland wurde, ebenfalls im Februar, eine ähnliche Transaktion durchgeführt, als über eine Euroanleihe 1,5 Mrd. DM, allerdings in diesem Fall direkt, aufgenommen wurden.

Auch in den Niederlanden, Belgien und Japan stiegen die Währungsreserven im Februar an.

VIERTELJÄHRLICHE GESAMTRECHNUNGEN: Im 4. Quartal 1992 trat die Wirtschaft der Gemeinschaft in eine noch ausgeprägtere Stagnationsphase ein (BIP +0,0 %)

Im 4. Quartal 1992 erlebte die Wirtschaft der Gemeinschaft in ihrer Gesamtheit eine noch stärkere Phase der Stagnation des Wirtschaftswachstums (BIP +0,0 %). Bedingt durch den wiederum negativen Verlauf auch dieses Quartals beträgt das Wachstum des Jahres 1992 gegenüber dem Vorjahr lediglich +1,0 %. Dies ist das schlechteste Ergebnis seit 1982. Das jährliche Wachstum liegt damit genau auf der Linie der von der GD II gemachten Vorausschätzungen. Nach Auffassung der Wirtschaftssachverständigen lassen sich für die Wirtschaft der Gemeinschaft kurzfristig nur sehr schwer Anzeichen einer Erholung erkennen. Signale für einen Wiederaufschwung erreichen uns jedoch von der amerikanischen Wirtschaft. Der größte Unsicherheitsfaktor in dieser Phase ist jedoch die Frage, ob die Wirtschaft der Gemeinschaft angesichts ihrer internen Probleme von dieser neuen Wirtschaftsphase in den Vereinigten Staaten profitieren kann.

Unter den Faktoren, die diese Stagnationsphase kennzeichnen, ist es unserer Auffassung nach nützlich, kurz auf die Spannungen im Wirtschafts- und Währungsbereich einzugehen, von denen die zweite Jahreshälfte geprägt war. Diese Spannungen führten zu einem Anziehen der Zinsen, mit dem Ziel, das Gleichgewicht der Wechselkurse innerhalb des EWS aufrechtzuerhalten. Zweifelsohne nachteilige Auswirkungen hatte diese Politik auf die Wirtschaftsleistung der Gemeinschaft, insbesondere diejenige der Schwachwährungsländer wie Italien, Vereinigtes Königreich und Spanien. Die nachlassenden Spannungen bei den Wechselkursen und der geminderte Inflationsdruck ließen die Zinsen jedoch im letzten Jahresmonat leicht sinken, insbesondere mit Blick auf die angestrebte Wiederbelebung im Wirtschaftsbereich. Bezüglich der Preisentwicklung liegen keine Daten für die Gemeinschaft insgesamt vor. Die verfügbaren Daten lassen jedoch eine Tendenz zur Verlangsamung des Preisauftriebs erkennen.

Was die Komponenten des BIP angeht, liegen Angaben für die vier großen Mitgliedsländer vor. Auf der Grundlage dieser Daten erscheint uns das Quartal vor allem durch folgende Entwicklungen gekennzeichnet: neuer starker Rückgang der Investitionen und fortdauernde Stagnation des privaten Verbrauchs.

Betrachtet man die Lage in den Mitgliedstaaten, so fällt im 4. Quartal ins Auge, daß das Wirtschaftswachstum in Frankreich zum ersten Mal im Jahr zurückging (BIP -0,3 %), und daß die Produktion in Italien zum zweiten Mal hintereinander schrumpfte (BIP -0,6 %). In den Vereinigten Staaten stieg die Produktion im vierten Quartal (BIP +0,9 %) bei leicht anziehender vierteljährlicher Inflationsrate (+0,5 %) wieder an. Die Jahresinflationsrate ging jedoch leicht zurück (+2,4 %). Unter den Komponenten der Binnennachfrage erscheint im vierten Quartal der beträchtliche Zuwachs bei den Investitionen bemerkenswert (+3,5 %). Der private Verbrauch entwickelte sich ebenfalls positiv (+1,1 %), während der Staatsverbrauch leicht nachgab (-0,4 %).

In Japan stagnierte das Wirtschaftswachstum im vierten Quartal (BIP +0,1 %) bei leicht anziehender vierteljährlicher Inflationsrate (+0,2 %). Die Jahresinflationsrate ging hingegen deutlich zurück (+1,4 %). Unter den BIP-Komponenten sind als herausragende Entwicklungen des Quartals der Rückgang des Investitionsvolumens (-1,7 %) – übrigens zum zweiten Mal in der Folge – sowie des privaten Verbrauchs (-0,6 %) im Laufe des Quartals hervorzuheben.

PREISE: Jahresinflationsrate der EG unverändert bei 3,5 % in März

Die Jahresinflationsrate für die EG gemessen mit dem Verbraucherpreisindex für EUR 12 blieb unverändert bei 3,5 % von Februar auf März und zeigt damit die Stabilität der Inflation der Gemeinschaft insgesamt während den letzten 4 Monate: Dezember 3,6 %, Januar 3,6 %, Februar 3,5 %, März 3,5 %.

⁽¹⁾ Langfristige Staatsanleihen sind in Griechenland seit 1988 nicht aufgelegt worden.

In aufsteigender Reihenfolge geordnet sind die aktuellen Inflationsraten und die entsprechenden Zahlen des Vorjahres für die einzelnen Mitgliedstaaten wie folgt:

	März '93	März '92		März '93	März '92
	März '92	März '91		März '92	März '91
Dänemark	1,1 %	2,6 %	Luxemburg	3,7 %	3,0 %
Ver. Königreich	1,9 %	4,0 %	Spanien	4,0 %	6,8 %
Irland	1,9 %**	3,7 %**	Deutschland*	4,2 %	4,8 %
Frankreich	2,2 %p	3,2 %	Italien	4,2 %p	5,4 %
Niederlande	2,4 %	4,3 %	Portugal	7,3 %	8,5 %
Belgien	2,9 %	2,7 %	Griechenland	16,4 %	18,3 %

* Der Verbraucherpreisindex der Bundesrepublik Deutschland bezieht sich weiterhin auf den Gebietsstand vor dem 3. Oktober 1990.

** Irland: Februar/Februar.

p = vorläufig.

Zur Zeit liegt die Jahresinflation in 10 der 12 Mitgliedstaaten unter 5 %; die Inflationsraten der Beitrittskandidaten liegen ebenfalls unter 5 %: Norwegen 2,5 %, Finnland 2,7 %, Österreich 3,9 %, Schweden 4,9 %.

Die entsprechenden Raten für die Vereinigten Staaten und Japan betragen 3,1 % bzw. 1,5 %.

Zwischen Februar und März stieg der monatliche Preisindex für die Gemeinschaft insgesamt um 0,4 %.

Die monatlichen Steigerungsraten waren relativ niedrig in fast allen Mitgliedstaaten: 0,2 % in Belgien, Dänemark und Italien, 0,3 % in Deutschland und Luxemburg, 0,4 % in den Niederlanden, im Vereinigten Königreich, in Spanien und Portugal.

Die einzige Ausnahme bildet Griechenland, wo die Einführung neuer Artikel nach dem Winterschlussverkauf die Preise für Bekleidung und Schuhe um 17,5 % sowie die für dauerhafte Gebrauchsgüter um 7,5 % emporschnellen ließ.

Zusammen mit geringeren Preisteigerungen für eine breite Reihe sonstiger Waren und Dienstleistungen führte dies zu einem sprunghaften Preisanstieg vom 3,7 % des Gesamtindex zwischen Februar und März.

ARBEITSLOSIGKEIT IN DER GEMEINSCHAFT

Eurostat schätzt die saisonbereinigte Arbeitslosenquote in der Gemeinschaft für März 1993 auf 10,2 %. Sie liegt damit um 0,1 Prozentpunkt höher als im Vormonat.

Im Laufe der letzten drei Monate hat die Arbeitslosenquote in der Gemeinschaft insgesamt um 0,3 Prozentpunkte zugenommen, und zwar in den meisten Mitgliedstaaten in vergleichbarer Weise. Im Vereinigten Königreich hingegen hat die Arbeitslosenquote abgenommen, in Irland ist sie konstant geblieben und in Spanien erhöhte sie sich beträchtlich (+ 1,0 Punkte).

Über das Jahr ist die Arbeitslosenquote der Gemeinschaft um 1,0 Punkte von 9,2 % auf 10,2 % gestiegen, mit +1,1 Punkten bei den Männern stärker als bei den Frauen (0,8 Punkte).

In diesen zwölf Monaten hat die Arbeitslosenquote der Frauen von unter 25 Jahren deutlich weniger stark zugenommen (+0,7 Punkte) als die der anderen Kategorien (Männer der gleichen Altersklasse: +1,7 Punkte). In Dänemark, Italien und Luxemburg hat sie sich sogar leicht verringert.

Dennoch ist die Arbeitslosenquote der Frauen von unter 25 Jahren in der Gemeinschaft mit 20,4 im März 1993 doppelt so hoch wie die Arbeitslosenquote insgesamt. In den meisten Mitgliedstaaten sind die jungen Frauen die am härtesten von der Arbeitslosigkeit getroffene Gruppe. In vier Mitgliedstaaten jedoch liegt die Arbeitslosenquote der jungen Männer höher als die der jungen Frauen: In Deutschland (Gebietsstand vor dem 3.10.1990) und Luxemburg, die zu den Mitgliedstaaten mit relativ niedriger Arbeitslosigkeit zählen, in Irland, das zu den Mitgliedstaaten mit relativ hoher Arbeitslosigkeit zählt, sowie im Vereinigten Königreich.

Diese Schätzung der Arbeitslosenquote und der Zahl der Arbeitslosen schaltet die unterschiedlichen nationalen Methoden zur Erfassung der Arbeitslosigkeit weitgehend aus. Die Arbeitslosenquote wird geschätzt durch Extrapolation der 1991er Ergebnisse der EG-Arbeitskräfteerhebung in allen Mitgliedstaaten. Die Einbeziehung der 1992er Ergebnisse, sobald verfügbar, kann zu Revisionen der Schätzungen führen.

INDUSTRIEPRODUKTION Talsohle der Rezession noch nicht erreicht

Im Industriebereich (NACE 1-4) fällt die Produktion weiterhin, eine Stabilisierung ist noch nicht in Sicht. Für die Europäische Gemeinschaft (EUR12) beträgt die Veränderungsrate des arbeitstäglich bereinigten Produktionsindex gegenüber dem Wert des gleichen Monats ein Jahr zuvor im November 92: -3,5 %, im Dezember -4,1 % und die letzte verfügbare Zahl im Januar 93: -4,4 %. Betrachtet man die letzten drei verfügbaren Monate November bis Januar, so beläuft sich die für EUR12 Veränderungsrate des saisonbereinigten Produktionsindex gegenüber den drei davor liegenden Monaten August bis Oktober auf -2,2 %. In den USA ist die entsprechende Änderungsrate bei +1,2 %, dort ist also eine leichte Erholung spürbar.

Für die einzelnen großen Güterkategorien ist das Bild recht homogen (Änderung der letzten drei Monate gegenüber den drei Vormonaten):

- Grundstoffindustrie: EUR12 -2,8 %, USA + 1,0 %
- Investitionsgüterindustrie: EUR12 -2,0 %, USA + 1,9 %
- Konsumgüterindustrie: EUR12 -1,6 %, USA + 1,9 %

In den Mitgliedstaaten stellt sich die Situation wie folgt dar: überall sinkt oder stagniert die Produktion. Die entsprechenden Veränderungsrate lauten: Vereinigtes Königreich: 0,0 %, Irland -1,5 % (geschätzt), Belgien: -1,5 % (geschätzt), Italien -1,4 %, Niederlande -2,0 % (geschätzt), Griechenland -1,0 % (geschätzt), Frankreich -3,1 %, Spanien -2,0 % (geschätzt), Deutschland (West) -3,6 %, Dänemark -5,0 % (geschätzt).

Im Bausektor (NACE5) stagniert oder sinkt der Produktionsindex in allen verfügbaren Mitgliedstaaten bis auf Deutschland (+3,5 % Wachstumsrate der letzten drei Monate (saisonbereinigt) gegenüber den Vormonaten). Wegen des hohen Gewichts dieses Mitgliedstaates in der EG steigt auch in EUR 12 der Produktionsindex des Bausektors um 2,0 % (drei Monate gegenüber den Vormonaten).

Die Steigerungsraten der Erzeugerpreise sind in der Europäischen Gemeinschaft nach wie vor recht unterschiedlich, allgemein ist auf der Herstellerseite der Preisdruck allerdings gering, in der Hälfte aller Mitgliedstaaten sinken sogar die Erzeugerpreise. Die jeweils letzte verfügbare Änderungsrate (Januar oder Dezember) gegenüber dem Vorjahreswert lautet für den gesamten Industriebereich: EUR 12 1,6 %, Griechenland 13,9 %, Vereinigtes Königreich 3,5 %, Italien 2,6 %, Irland 2,1 %, Spanien 1,4 %, Deutschland (West) 0,8 %, Frankreich -0,4 %, Belgien -0,5 %, Niederlande -1,1 %, Dänemark -2,7 % und Luxemburg -3,1 %.

ZAHLUNGSBILANZ – Gesamttendenzen – vorläufige Zahlen für das dritte Quartal 1992:

Die Leistungsbilanz der Gemeinschaft verschlechterte sich im dritten Quartal 1992 gegenüber dem entsprechenden Vorjahreszeitraum um 4,8 Mrd. ECU und schloß mit einem Defizit von 13 Mrd. ECU ab. Die Leistungsbilanz der Vereinigten Staaten verzeichnete ein Defizit von 15,2 Mrd. ECU, was eine Verschlechterung um 1,1 Mrd. ECU bedeutet. In Japan stieg der Überschuß um 3,7 Mrd. ECU auf 20,4 Mrd. ECU.

Nach den vorläufigen Zahlen schloß die Leistungsbilanz der Gemeinschaft im dritten Quartal 1992 mit einem Defizit in Höhe von 13 Mrd. ECU ab, das bedeutet eine Verschlechterung um 4,8 Mrd. ECU gegenüber dem entsprechenden Vorjahreszeitraum. Diese Entwicklung ist auf das um 12,8 Mrd. ECU gestiegene Defizit der Dienstleistungs- und Übertragungsbilanz zurückzuführen, bei einer Verbesserung der Handelsbilanz um 8 Mrd. ECU. Diese war – nach zwei Quartalen mit negativen Ergebnissen – nunmehr ausgeglichen. Die Veränderungen sind vor allem auf die deutsche Leistungsbilanz zurückzuführen: Dort stieg der Handelsbilanzüberschuß im dritten Quartal 1992 um 3,5 Mrd. ECU, während sich der Saldo der Dienstleistungsbilanz um 5,1 Mrd. ECU verschlechterte. Das gleiche gilt für Italien: Verbesserung des Handelsbilanzüberschusses um 2 Mrd. ECU und Verschlechterung der Dienstleistungsbilanz um 3,6 Mrd. ECU. Im übrigen verbesserte sich die französische Handelsbilanz um 1,8 Mrd. ECU, während sich die des Vereinigten Königreichs um 1,1 Mrd. ECU verschlechterte.

In den Vereinigten Staaten schloß die Leistungsbilanz im dritten Quartal 1992 mit einem Defizit von 15,2 Mrd. ECU ab, nachdem sie im gleichen Vorjahreszeitraum ein Defizit von 14 Mrd. ECU ausgewiesen hatte. Das Handelsbilanzdefizit stieg von 20,6 Mrd. ECU auf 22,9 Mrd. ECU. Der Überschuß der Dienstleistungs- und Übertragungsbilanz stieg um 1,2 Mrd. ECU auf 7,7 Mrd. ECU.

In Japan betrug der Leistungsbilanzüberschuß im dritten Quartal 1992 20,4 Mrd. ECU gegenüber 16,7 Mrd. ECU im gleichen Vorjahreszeitraum. Der Handelsbilanzüberschuß nahm um 0,9 Mrd. ECU zu; das Defizit der Dienstleistungs- und Übertragungsbilanz verringerte sich um 2,8 Mrd. ECU.

AUSSENHANDEL

Das Defizit im außergemeinschaftlichen Handel betrug im Jahr 1992 52,1 Mrd. ECU, gegenüber -70,5 Mrd. ECU im Jahr 1991. Die Differenz zwischen der Entwicklungsrate der Ausfuhren und der der Einfuhren, die 1991 bei -6 Prozentpunkten lag, stieg 1992 auf über 4 Prozentpunkte. Die Ausfuhren der Gemeinschaft stiegen 1992 gegenüber dem Vorjahr um fast 3 %, während die Einfuhren um 1,3 % zurückgingen. Diese Entwicklung bei den Einfuhren ist auf den Rückgang der Kosten für die Rohölversorgung der Gemeinschaft zurückzuführen, der zwischen 1991 und 1992 -5 % in Dollar je Barrel und -9 % in ECU je Barrel erreichte. Im Dezember 1992 war der Saldo des außergemeinschaftlichen Handels mit 0,4 Mrd. ECU leicht positiv, das sind 0,3 Mrd. ECU mehr als im Dezember 1991. Die Ausfuhren der Gemeinschaft sind um 6,4 % gestiegen, eine Steigerungsrate, die leicht über der der Einfuhren (5,6 %) liegt. Die Kosten für die Rohölversorgung der Gemeinschaft nahmen um 2,5 % in Dollar je Barrel ab, in ECU stiegen sie jedoch um 2,4 % an, eine Entwicklung, die zum Wachstum der Einfuhren beigetragen hat.

Das Defizit der Vereinigten Staaten betrug 1992 81 Mrd. ECU, das sind 12 Mrd. ECU mehr als 1991. Die Einfuhren stiegen gegenüber dem Vorjahr um 4,4 % in ECU und um über 9 % in Dollar. Die Ausfuhren der Vereinigten Staaten nahmen in ECU ausgedrückt um 1,7 % zu und in Dollar ausgedrückt um 6 %.

Im Dezember 1992 belief sich das Außenhandelsdefizit der USA auf 7,5 Mrd. ECU gegenüber 5,7 Mrd. im Dezember 1991. Die Einfuhren haben gegenüber 1991 deutlich zugenommen: 18,2 % in ECU und 13 % in Dollar. Die Ausfuhren sind etwas langsamer angestiegen als die Einfuhren; 15,4 % in ECU und 10 % in Dollar.

Der Überschuß der japanischen Handelsbilanz lag 1992 um fast 20 Mrd. ECU über dem Niveau von 1991, und zwar bei 82,2 Mrd. ECU. Gegenüber 1991 nahmen die Ausfuhren Japans in ECU um 3,4 % und in Dollar um 8 % zu. In Yen ausgedrückt haben die Ausfuhren stagniert (1 %). Die Einfuhren Japans sind in ECU und Yen ausgedrückt deutlich gesunken (-5,6 % bzw. -8 %) während sie in Dollar ausgedrückt nur geringfügig abgenommen haben (-1 %). Der Außenhandelsüberschuß Japans belief sich im Dezember 1992 auf 7,7 Mrd. ECU gegenüber 6,1 Mrd. im Dezember 1991. Die Ausfuhren haben gegenüber Dezember 1991 in ECU um 10,7 % zugenommen, in Dollar um 5 %. In Yen ausgedrückt sind die Ausfuhren stabil geblieben. Die Einfuhren sind in ECU um 4,5 % gestiegen, während sie in Dollar ausgedrückt stagnierten und in Yen ausgedrückt um 8 % gesunken sind.

Der Handelsbilanzüberschuß Deutschlands belief sich 1992 auf insgesamt 15,3 Mrd. ECU, das sind 6 Mrd. mehr als 1991. Irland und Dänemark schlossen mit einem Überschuß von 5 Mrd. bzw. 4,3 Mrd. ECU ab, das sind jeweils fast 2 Mrd. mehr als 1991. Der Saldo der Niederlande hat sich um 2,7 Mrd. ECU auf -5,4 ECU Mrd. verbessert. Die BLWU und Frankreich verzeichneten 1992 jeweils Defizite von annähernd 7 Mrd. ECU, das ist im Falle der BLWU eine Verbesserung um weniger als 1 Mrd., im Falle Frankreichs eine Verbesserung um 8 Mrd. ECU gegenüber dem Vorjahr. Italien schloß mit einem Defizit von 8,2 Mrd. ECU ab, das sind 2 Mrd. mehr als im Vorjahr. Die Handelsbilanz Portugals schloß insgesamt mit einem Defizit von 9 Mrd. ab und hat sich damit gegenüber dem Vorjahr um 1 Mrd. ECU verschlechtert. Die Defizite Griechenlands und Spaniens wiesen etwa das gleiche Niveau auf wie 1991 (-10,6 Mrd. bzw. -21,8 Mrd. ECU). Das höchste Defizit war im Vereinigten Königreich zu verzeichnen, es belief sich auf 26,9 Mrd. ECU und war damit um 4,6 Mrd. höher als 1991.

Eurostatistics - data for short-term economic analysis is a monthly publication aimed at providing, as rapidly as possible, the latest statistical data on the European Community as a whole (EUR12), each Member State, the United States and Japan.

Eurostatistics does not present all the statistics held by Eurostat, but a selection of the most relevant series on the economic situation.

Speed of publication and punctuality are the main features of this publication; that is why it is deliberately streamlined and does not contain any methodological notes, which are given in Eurostat's specialized publications.

The data published in *Eurostatistics* are taken from the ICG domain of Eurostat's on-line database, Cronos (the notes regarding on-line consultation may be found at the end of this publication). They are also available via the Commission host Eurobases in the Eurocron database.

Further information on *Eurostatistics* can be obtained from the following addresses:

EXCHANGE RATES: Reductions in short-term in interest rates

In addition to the reduction in the discount rate reported last month, there was a further reduction in German interest rates on April 22. At its policy-making council meeting the Deutsche Bundesbank decided to reduce its discount rate by ¼% to 7.25%, and its Lombard rate by ½% to 8.5%.

These reductions in rates were followed immediately by reductions by the key interest rates of the Danish, Dutch, Belgian, Italian and Austrian central banks. The reduction in Belgian rates had been preceded by a smaller reduction at the start of the month, which reversed previous increases, following the resolution of the problem concerning cuts in the government's budget.

The following day, rates were reduced in France (see below) and Ireland, where the Central Bank of Ireland has been steadily reducing its short-term facility rate since the punt was devalued at the end of January. At 8.75%, this rate now stands at its lowest level for over four years. Official interest rates were also reduced in Sweden and Norway.

Six days after the reduction in the discount and Lombard rate, the Bundesbank reduced its repo rate from 8.09 to 7.75%; a larger than expected fall.

The French franc strengthened following the French legislative elections, which allowed the Banque de France to reduce its two key interest rates several times. On April 13, it replaced its five-day repurchase rate with a 5-10 day rate, which was set at a level of 10%, as compared to the previous rate of 12%. In the weeks that followed, there were three other sets of reductions in official rates: on April 19 the auction rate ('appel d'offres') was reduced from 9.1 to 8.75% and the 5-10 day repo rate by ¼% to 9.75%, and on April 23 and April 29 there were similar reductions in both rates, such that after the second of these changes the two rates stood at 8¼ and 9¼% respectively.

The Spanish peseta weakened against other European currencies in the week ending April 23, falling below its central rate against the Deutschmark for the first time since before its devaluation in November 1992. The Banco de Espana twice increased its intervention rate, the second time on April 23 to 15%, and several EC central banks intervened to support the currency. The peseta strengthened slightly the following week.

Sterling and the lire, the two currencies which left the exchange rate mechanism (ERM) of the EMS last September, have both appreciated in recent weeks. On April 28 Sterling stood at almost DM 2.50, still much lower than its previous ERM central rate of DM 2.95, but around 6% higher than its lows earlier in 1993. Having touched L 1004 against the Deutschmark at the end of March, the lire appreciated to around L 930 on April 28, following the announcement that the current governor of the Banca d'Italia was to be appointed Prime Minister.

The dollar did not react as might have been expected to the reductions in European interest rates, depreciating in the last weeks of April. Worries centred on disappointing economic indicators for March and on political uncertainties. The dollar touched several all time lows against the yen in April, and towards the end of the month the Federal Reserve intervened in order to stem its weakness.

GOVERNMENT BOND YIELDS: decline in yields continues

The decline in government bond yields that has occurred in the last few months continued in March when 11 out of the 13 countries surveyed for whom March data are available experienced falls.

Yields now stand at 8% or below in six of the 11 EC Member States for whom data on government bond yields are available.⁽¹⁾ The average level of government bond yields in these Member States fell from 10.0% in September 1992 to 8.8% in February 1993. Yields in those countries whose currencies participate in the ERM are slightly lower, averaging 8.5% in February.

The real (inflation adjusted) yield on government bonds can be seen in the following table:

Real Long term Interest Rates (monthly averages)

	9/92	12/92	3/93
Belgium	6.5	5.5	4.5
Denmark	7.5	7.4	6.9
Germany	4.4	3.6	2.2
Spain	7.3	7.7	7.6
France	6.4	6.1	5.6
Italy	10.5	9.0	7.8
Luxembourg	5.0	5.2	3.5
Netherlands	4.7	4.5	4.0
Portugal	1.8	3.0	2.6
UK	5.6	6.2	6.4
US	4.1	4.4	3.6
Japan	3.0	3.6	3.1

There has been a fall in real government bond yields in many countries over the last six months, concurrent with the fall in nominal yields.

The largest falls occurred in Italy, but it should be noted that Italian government bond yields increased dramatically in September during the period of upheaval on the currency markets, and thus if August 1992 is compared with March 1993, real yields have actually increased slightly.

Real yields also fell significantly in Germany, where the fall in the level of nominal yields has been combined with an increase in inflation. They are now the lowest of the countries surveyed.

By contrast, the UK, Portugal and Spain have experienced rises in real yields. In all three countries this was as a result of sharp falls in inflation outweighing the falls in nominal yields.

⁽¹⁾ Long-term government bonds have not been issued in Greece since 1988.

MONEY SUPPLY: Differing growth rates

February data recently available for Greece, Ireland, Netherlands and the UK indicate differing patterns of monetary growth.

At around 3%, the annualised rate of M4 growth in the UK is just inside its 'monitoring range' of 3-9%, but is still very slow on a historical basis. In Greece and the Netherlands too monetary growth continues at a relatively slow pace.

In contrast, M3 growth in Ireland is growing at over 20% per year. This however reflects certain structural changes that have taken place: a recently implemented tax on savings deposits has meant that there has been a shift from savings deposits to deposits which are included in M3. In addition, the high short-term interest rates which occurred in Ireland at the beginning of the year during the period of pressure on the punt meant that there was a move into certain money market instruments which are included in M3.

FOREIGN OFFICIAL RESERVES: Inflow of reserves into Denmark

There was a large inflow of foreign official reserves into Denmark in February 1993. At almost 10.4 billion ecu, Denmark's reserves are now higher than they have been for some time. The inflow was as a result of the proceeds of a 1 billion US dollar eurobond that the Kingdom of Denmark issued in February, the dollars received being swapped into Deutschmarks in order to replenish Denmark's foreign reserves.

A similar operation was carried out by Ireland, which issued directly in Deutschmarks, also in February. In this case a DM 1.5 billion eurobond was issued.

The Netherlands, Belgium and Japan also experienced inflows of reserves in February.

QUARTERLY ACCOUNTS: fourth quarter of 1992: stagnation of Community economy worsens (GDP +0.0%)

In the Community as a whole, the fourth quarter of 1992 was marked by a worsening of economic stagnation (GDP +0.0%). With yet another negative quarter, growth in 1992 was only 1.0% up on the previous year, the worst result since 1982. This annual growth figure is totally in line with DG II's forecasts. According to most economists, it is very difficult to point to any signs of a short-term upturn in the Community economy. On the other hand, there are signs of revival in the US economy. The real unknown factor at this stage is the capacity of the Community economies, given their domestic problems, to take advantage of this new economic phase in the United States. Of the features marking this period of stagnation, it is useful to mention briefly the monetary and financial tensions which have dominated the second part of the year. These tensions have led to an upward trend in interest rates, the purpose of which was to maintain a balance between the exchange rates within the EMS. This policy has no doubt had a negative effect on the performance of the Community economies, particularly in the countries with weak currencies, such as Italy, the United Kingdom and Spain. In the final month, following a reduction in tension on the exchange market and an easing of inflationary pressures, interest rates gradually began to fall, mainly in order to foster an upturn in economic growth.

As regards price trends, we do not have any data for the Community as a whole. However, on the basis of the data available it is possible to detect a downward trend in the rate of price increases.

With regard to the components of GDP, we have data only on the four large countries. On the basis of these data the most salient features of this quarter appear to be the further fall in investment and the continued stagnation of private consumption.

As regards the situation in the Member States, the fourth quarter saw the first downturn in economic growth in France in 1992 (GDP -0.3%) and the second consecutive fall in production in Italy (GDP -0.6%).

In the United States production was up (GDP +0.9%) in quarter four and there was a slight increase in the quarterly inflation figure (+0.5%), while the annual rate fell slightly (+2.4%). As regards the components of domestic demand, the most striking feature of the fourth quarter was the marked increase in investment (+3.5%). Private consumption was up (+1.1%), while public consumption was slightly down (-0.4%).

In Japan, the fourth quarter was marked by a period of stagnation in economic growth (GDP +0.1%) combined with a slight increase in the quarterly inflation figure (+0.3%), while the annual inflation rate fell appreciably (+1.4%). As regards the components of GDP, the most striking features of this quarter were the second reduction in a row in investment (-1.7%) and the reduction in private consumption (-0.6%).

PRICES: EC Annual inflation rate remains at 3.5% in March

Between February and March the average inflation rate for the EC as measured by the CPI for EUR-12 remained unchanged at a level of 3.5%, thus showing near stability of inflation for the Community as a whole over four consecutive months: December 3.6%, January 3.6%, February 3.5%, March 3.5%.

In ascending order the current annual inflation rates and the corresponding figures a year ago for the individual Member States are as follows:

	MAR. '93	MAR. '92	MAR. '93	MAR. '92	
	MAR. '92	MAR. '91	MAR. '92	MAR. '91	
Denmark	1.1%	2.6%	Luxembourg	3.7%	3.0%
United Kingdom	1.9%	4.0%	Spain	4.0%	6.8%
Ireland	1.9%**	3.7%**	Germany*	4.2%	4.8%
France	2.2%p	3.2%	Italy	4.2%p	5.4%
Netherlands	2.4%	4.3%	Portugal	7.3%	8.5%
Belgium	2.9%	2.7%	Greece	16.4%	18.3%

* The CPI for the Federal Republic of Germany continues to reflect the geographic borders prior to 3 October 1990.

** Ireland: February compared February
p = Provisional

At present 10 of the 12 Member States have annual inflation rates below 5% ; the rates for the applicant Member States are also below 5% : Norway 2.5% , Finland 2.7%, Austria 3.9%, Sweden 4.9%.

The corresponding figures for the United States and Japan are 3.1% and 1.5% . The monthly index for EUR 12 rose by 0.4% between February and March. Monthly increases were relatively low in nearly all member States : 0.2% in Belgium, Denmark and Italy, 0.3% in Germany and Luxembourg, 0.4% in the Netherlands, the United Kingdom, Spain and Portugal, 0.5% in France.

The only exception was Greece where as a result of the introduction of new items after the winter sales prices for clothing and footwear rose by 17.5% and those for durable goods by 7.5%. Together with lesser increases for a large range of other goods and services this led to a sharp rise in the overall index of 3.7% between February and March.

UNEMPLOYMENT IN THE COMMUNITY

Eurostat estimates that the seasonally-adjusted unemployment rate in the European Community was 10.2% for the month of February 1993, representing an increase of 0.1 percentage points in comparison with the February 1993.

During the last three months, the Community unemployment rate has risen by 0.3 percentage points. There has been a similar rise in most of the Member States, the exceptions being the United Kingdom (where there has been a slight decrease of 0.2 percentage points), Ireland (where the situation has remained unchanged), and Spain (where the rise has been more considerable at 1.0 percentage point).

During the last twelve months, the Community unemployment rate has increased by 1 percentage point, rising from 9.2% to 10.2%. The increase for men (1.1 points) has been more marked than for women (0.8 points).

The unemployment rate for women aged under 25 has risen by 0.7 percentage points, which represents a less marked increase than that for men of this age-group (1.7 percentage points), and there has even been a slight decrease for women under 25 in Denmark, Italy and Luxembourg.

Nevertheless, at 20.4% the unemployment rate for women under 25 remains twice the figure for unemployment generally. Young women represent, in most Member States, the category most severely affected by unemployment. In four Member States, however, the unemployment rate for men under 25 is greater than for women under 25; this is true in the old Länder of the German Federal Republic, in Luxembourg (two of the Member States where unemployment remains relatively low), in Ireland (one where it is very high) and in the United Kingdom.

The unemployment rate and the number of unemployed persons are estimated after taking account of the differences between national methods of recording unemployment. The rate of unemployment is estimated by extrapolating the 1991 results of the labour force surveys for all the Member States. The introduction of the 1992 results, as soon as become available, will probably lead to a revision of the estimates.

INDUSTRIAL PRODUCTION Recession has not yet bottomed out

Production in industry (NACE 1-4) is still falling, with no signs of levelling off. The rate of change of the production index adjusted for the number of working days for the European Community (EUR12) was 3.5% down in November 1992 compared with the same month in the previous year, 4.1% down in December and, the most recent figure available, 4.4% down in January 1993 compared with January 1992. The figures for the most recent three-month period available, i.e. November to January, show a rate of change in the seasonally-adjusted production index for EUR 12 which is 2.2% down on the previous three months, August to October. This figure is +1.2% in the United States, i.e. there are signs of slight recovery.

The picture is much the same across the board for the individual types of goods (change in the last three months compared with the previous three months):

- Intermediate goods: EUR12: -2.8%; USA +1.0%
- Capital goods: EUR12: -2.0%; USA +1.9%
- Consumer goods: EUR12: -1.6%; USA +1.9%

Throughout the Member States production is falling or stagnating, with the following rates of change - United Kingdom: 0.0%; Ireland: -1.5% (estimated); Belgium: -1.5% (estimated); Italy: -1.4%; Netherlands: -2.0% (estimated); Greece: -1.0% (estimated); France: -3.1%; Spain: -2.0% (estimated); Germany (West): -3.6%; Denmark: -5.0% (estimated).

In the construction sector (NACE 5) the production index is falling or stagnating in all the Member States for which figures are available, except Germany (+3.5% growth in the last three months (seasonally-adjusted) compared with the previous three months). Given the importance of this Member State for the European Community as a whole, the production index for the construction sector has increased in EUR 12 by 2.0% (last three months compared with the previous three months).

The rates of increase in producer prices have again varied very widely from one Member State to another but in general price pressure on the producer side is small and producer prices are even falling in half of the Member States. The most recent figures available for January or December show the following changes over the value for the previous year for industry as a whole: EUR 12: 1.6%; Greece: 13.9%; United Kingdom: 3.5%; Italy: 2.6%;

Ireland: 2.1%; Spain: 1.4%; Germany (West): 0.8%; France: -0.4%; Belgium: -0.5%; Netherlands: -1.1%; Denmark: -2.7%; Luxembourg: -3.1%.

BALANCE OF PAYMENTS - global trends - preliminary figures for the third quarter of 1992:

Deterioration of ECU 4.8 billion in the Community current account balance compared with the third quarter of 1991; the balance shows a deficit of ECU 13 billion. The American current account deficit of ECU 15.2 billion represents a deterioration of ECU 1.1 billion. The Japanese current account balance improved by ECU 3.7 billion to a surplus of ECU 20.4 billion.

In the third quarter of 1992, according to the preliminary figures, the Community current account deficit of ECU 13 billion represented a worsening of 4.8 billion on the third quarter of 1991. This decline reflected the ECU 12.8 billion deterioration in the invisibles deficit, partly offset by an improvement of ECU 8 billion in the balance of trade in goods, which achieved equilibrium after two quarters in the red. These variations are largely due to the German balance, which recorded an increase of ECU 3.5 billion in its trade surplus and a deterioration of ECU 5.1 billion in its invisibles deficit in the third quarter of 1992. The same phenomenon was recorded in Italy, with an ECU 2 billion improvement in the trade surplus and a deterioration of ECU 3.6 billion in the invisible deficit. France's balance of trade improved by ECU 1.8 billion and the United Kingdom's declined by ECU 1.1 billion.

In the United States, the current account balance showed a deficit of ECU 15.2 billion in the third quarter of 1992, as compared with ECU 14 billion in the same quarter of 1991. The trade deficit was ECU 22.9 billion as against ECU 20.6 billion, and the surplus on invisibles improved by ECU 1.2 billion to ECU 7.7 billion.

In the third quarter of 1992, the Japanese current account produced a surplus of ECU 20.4 billion, up from ECU 16.7 billion in the same period of 1991. The trade surplus was up ECU 0.9 billion and the invisibles deficit shrank by ECU 2.8 billion.

EXTERNAL TRADE

The Community's trade deficit with the rest of the world for 1992 was ECU 52.1 billion compared with ECU 70.5 billion in 1991. The gap between exports and imports moved from -6 points in 1991 to over 4 points in 1992. In 1992, exports to the rest of the world increased by almost 3% compared with 1991, whereas imports fell by 1.3%. The latter were helped by the reduced cost of supplying the Community with crude oil which fell by 5% in dollars per barrel and 9% in ecus per barrel between 1991 and 1992.

In December 1992, the balance of extra-Community trade was slightly positive (ECU 0.4 billion), or ECU 0.3 billion higher than in December 1991. Extra-Community exports increased by 6.4%, which is slightly higher than for imports (5.6%). The cost of supplying the Community with crude oil declined by 2.5% in dollars per barrel, but increased by 2.4% in ecus, thus contributing to the increase in imports.

In 1992, the United States' deficit was ECU -81 billion, or ECU 12 billion more than in 1991. Imports increased by 4.4% in ecus compared with 1991, and by over 9% in dollars. The United States' exports increased by 1.7% in ecus and by 6% in dollars.

In December 1992, the United States' trade had a deficit of ECU 7.5 billion compared with 5.7 billion in December 1991. Imports increased sharply compared with 1991: by 18.2% in ecus and by 13% in dollars. Exports grew slightly less sharply than imports: by 15.4% in ecus and 10% in dollars.

In 1992, the Japanese surplus was over ECU 20 billion higher than in 1991, reaching ECU 82.2 billion. Japanese exports increased by 3.4% in ecus and by 8% in dollars compared with 1991, but stagnated in yen (1%). Imports from Japan fell sharply in ecus (-5.6%) and yen (-8%) but only slightly in dollars (-1%).

In December 1992, there was a surplus of Japan's trade of ECU 7.7 billion compared with 6.1 billion in December 1991. Exports grew by 10.7% in ecus compared with their level in December 1991, and by 5% in dollars. They remained stable in yen. Imports increased by 4.5% in ecus but stagnated in dollars and fell by 8% in yen.

Germany's total balance of external trade was ECU 15.3 billion in 1992, or 6 billion higher than in 1991. Ireland and Denmark also had a surplus of ECU 5 billion and 4.3 billion respectively, each being some ECU 2 billion higher than in 1991. The balance of the Netherlands improved by ECU 2.7 billion to reach ECU -5.4 billion. The BLEU and France recorded deficits of about ECU 7 billion each in 1992, representing an improvement of less than ECU 1 billion for the BLEU, and 8 billion for France. Italy recorded a deficit of ECU 8.2 billion, representing an increase of ECU 2 billion. Portugal's total balance fell by ECU 1 billion to -9 billion. The Greek and Spanish deficits remained close to their 1991 levels, at ECU 10.6 and 21.8 billion respectively. The United Kingdom's balance was the most negative: ECU -26.9 billion, or 4.6 billion lower than in 1991.

Avant-propos

FR

Eurostatistiques - Données pour l'analyse de la conjoncture est une publication mensuelle qui a pour but de fournir dans les meilleurs délais les données statistiques les plus récentes pour la Communauté européenne en tant qu'ensemble (EUR12), pour les pays membres ainsi que pour leurs principaux partenaires extra-communautaires (États-Unis d'Amérique et Japon).

Eurostatistiques ne publie pas d'une manière exhaustive toutes les statistiques disponibles auprès d'Eurostat, mais les plus importantes parmi celles-ci.

Cette publication se veut rapide et facilement maniable. Pour cette raison, elle ne comporte pas de notes méthodologiques, qui sont par ailleurs disponibles dans les publications spécialisées d'Eurostat.

Les données publiées dans *Eurostatistiques* proviennent du domaine ICG de la base de données Cronos (les instructions pour le mode de consultation on-line se trouvent à la fin de cette publication). Elles sont aussi disponibles dans la base de données Eurocron, accessible par l'intermédiaire du serveur Eurobases de la Commission.

Sauf indications contraires, les données portent sur le territoire de la République fédérale d'Allemagne avant le 3.10.1990, Berlin-Ouest inclus.

TAUX DE CHANGE: Baisse généralisée des taux d'intérêt

A la suite de la réduction du taux d'escompte enregistrée le mois dernier, une nouvelle réduction des taux d'intérêt allemands a été opérée le 22 avril. Le conseil de direction de la Bundesbank a en effet décidé d'abaisser son taux d'escompte d'1/4 de point à 7,25 %, et son taux Lombard d'1/2 point à 8,5 %.

Les banques centrales danoise, néerlandaise, belge, italienne et autrichienne emboîterent le pas à la Bundesbank, réduisant immédiatement leurs taux directeurs. Dans le cas de la Belgique, cette baisse avait été précédée d'une réduction de plus faible ampleur au début du mois, qui allait à contre-courant des augmentations précédentes, après résolution du problème concernant les réductions du train de vie de l'Etat.

Le lendemain, les taux furent abaissés en France (voir ci-dessous) et en Irlande, la Banque centrale de ce dernier pays ayant systématiquement abaissé ses taux courts depuis la dévaluation de la punt fin janvier. A 8,75 %, ce taux s'établit à présent à son minimum historique depuis plus de quatre ans. La Suède et la Norvège ont également abaissé leurs taux d'intérêt officiels.

Six jours après la réduction de ces taux d'escompte et Lombard, la Bundesbank a ramené son taux de prise en pension de 8,09 à 7,75 %, soit une baisse supérieure aux prévisions.

Le franc français s'est raffermi à la suite des élections législatives, ce qui a permis à la Banque de France de réduire à plusieurs reprises ses deux taux d'intérêt directeurs. Le 13 avril, elle a remplacé son taux de rachat à cinq jours par un taux à 5-10 jours, qui a été fixé à un niveau de 10 %, comparé au taux précédent de 12 %. Dans les semaines qui suivirent, on assista à une réduction en cascade des taux officiels: le 19 avril, le taux d'appel d'offres fut ramené de 9,1 à 8,75 %, et le taux de prise en pension à 5-10 jours abaissé d'1/4 de point à 9,75 %; les 23 et 29 avril, ces deux taux subirent un repli de la même ampleur, de sorte qu'à l'issue de ces ajustements, ils s'établissaient à 8 1/4 et 9 1/4 respectivement.

La peseta espagnole s'est affaiblie par rapport aux autres devises européennes au cours de la semaine s'achevant le 23 avril, tombant en-deçà de son cours pivot par rapport au Deutschemark pour la première fois depuis sa dévaluation de novembre 1992. La Banque d'Espagne a augmenté à deux reprises son taux d'intervention, celui-ci étant porté la deuxième fois à 15 %, le 23 avril, et plusieurs banques centrales européennes sont intervenues pour soutenir la monnaie espagnole. Celle-ci s'est quelque peu redressée la semaine suivante.

La livre sterling et la lire, à savoir les deux devises à être sorties du mécanisme de change (MTC) du SME en septembre dernier, se sont toutes deux rétablies au cours des semaines récentes. Le 28 avril, la livre s'échangeait à près de 2,50 DM, soit bien en-deçà de son précédent cours pivot de 2,95 DM, mais quelque 6 % au-dessus de ses cours planchers de début 1993. Après avoir plongé à 1004 liras pour 1 DM fin mars, la devise italienne a repris position à près de 930 liras le 28 avril, suite à l'annonce de la prochaine nomination au poste de premier ministre de l'actuel gouverneur de la Banque d'Italie.

Le dollar a déjoué les pronostics face aux réductions des taux européens, s'inscrivant à la baisse au cours des dernières semaines d'avril. Les inquiétudes liées au billet vert s'expliquaient par des indicateurs économiques décevants pour le mois de mars et par les incertitudes politiques. La devise américaine a enfoncé plusieurs planchers historiques vis-à-vis du yen en avril, et vers la fin du mois la Réserve fédérale est intervenue pour enrayer sa faiblesse.

RENDEMENT DES EMPRUNTS D'ETAT: la baisse des taux se poursuit

La chute des rendements des emprunts d'Etat observée au cours de ces derniers mois ne s'est pas démentie en avril, des reculs étant signalés dans 11 des 13 pays enquêtés pour lesquels on dispose des données du mois de mars.

Les rendements s'établissent à présent à 8 % – voire plus bas – dans six des 11 Etats membres de la Communauté européenne pour lesquels on dispose de données sur les emprunts d'Etat. (*) Le taux moyen de rendement des emprunts d'Etat dans ces Etats membres s'est effrité de 10 % en septembre 1992 à 8,8 % en février 1993. Les taux des pays dont les monnaies participent au mécanisme de change sont légèrement inférieurs, s'établissant à 8,5 % en moyenne en février.

Le tableau suivant rend compte des rendements réels (après inflation) des emprunts d'Etat:

Taux d'intérêt réels à long terme (moyennes mensuelles)	9/92	12/92	3/93
Belgique	6,5	5,5	4,5
Danemark	7,5	7,4	6,9
Allemagne	4,4	3,6	2,2
Espagne	7,3	7,7	7,6
France	6,4	6,1	5,6
Italie	10,5	9,0	7,8
Luxembourg	5,0	5,2	3,5
Pays-Bas	4,7	4,5	4,0
Portugal	1,8	3,0	2,6
Royaume-Uni	5,6	6,2	6,4
Etats-Unis	4,1	4,4	3,6
Japon	3,0	3,6	3,1

Les rendements réels des emprunts d'Etat sont orientés à la baisse dans de nombreux pays au cours du dernier semestre, parallèlement à la chute des rendements nominaux.

Les plus fortes baisses ont été observées en Italie, mais il est à noter que les taux des emprunts d'Etat italiens ont explosé en septembre durant la période de tourmente sur les marchés monétaires, de sorte que si l'on compare août 1992 à mars 1993, les rendements réels ont en fait légèrement progressé.

Ces derniers sont également en nette décline en Allemagne, la décélération des rendements nominaux se conjuguant à la poussée inflationniste. Ces taux sont actuellement les plus bas parmi ceux des pays enquêtés.

(*) La Grèce n'a pas émis d'emprunts d'Etat à long terme depuis 1988.

Par contraste, le Royaume-Uni, le Portugal et l'Espagne ont connu une remontée des rendements réels. Dans ces trois pays, ce résultat est imputable à la forte désinflation qui a eu raison des chutes de rendements nominaux.

MASSE MONETAIRE: des taux de croissance disparates

Les statistiques de février récemment disponibles pour la Grèce, l'Irlande, les Pays-Bas et le Royaume-Uni font apparaître un paysage contrasté sur le plan de la masse monétaire.

A quelque 3 %, le taux annualisé de la croissance du M4 au Royaume-Uni se situe juste à l'intérieur de sa «fourchette» de 3-9 %, mais demeure très bas sur une base historique. En Grèce et aux Pays-Bas également, la masse monétaire continue de croître à un rythme relativement lent.

A l'inverse, la croissance de M3 en Irlande dépasse 20 % par an. Ceci reflète toutefois certains changements structurels intervenus: une taxe récemment entrée en vigueur sur les dépôts d'épargne a donné le signal d'un transfert de cette épargne sur des dépôts englobés dans M3. De surcroît, les taux d'intérêt élevés à court terme pratiqués en Irlande au début de l'année pendant la période où la livre irlandaise était sous pression ont rendu attractif un certain nombre d'instruments du marché monétaire comptabilisés dans M3.

RESERVES DE CHANGE OFFICIELLES: entrées de réserves au Danemark

Le Danemark a enregistré un important afflux de réserves de change officielles en février 1993. Avec près de 10,4 milliards d'écus, les réserves danoises s'établissent actuellement à un niveau historique. Cet afflux est à mettre au compte du produit d'une euro-émission d'un milliard de dollars US à laquelle le Royaume de Danemark a procédé en février, les dollars reçus étant convertis en Deutschemarks de façon à reconstituer les réserves de change du Danemark.

Une opération similaire a été effectuée par l'Irlande qui a réalisé également en février une émission directement en Deutschemark. Il s'agissait d'une euro-émission d'1,5 milliard de DM.

Les Pays-Bas, la Belgique et le Japon ont également enregistré des entrées de réserves en février.

COMPTE TRIMESTRIELS: Au cours du quatrième trimestre 1992: accentuation de la phase de stagnation de l'économie communautaire (PIB +0,0 %)

Le quatrième trimestre 1992 a été caractérisé, pour l'économie communautaire dans son ensemble, par une accentuation de la phase de stagnation de la croissance économique (PIB +0,0 %). A cause de ce nouveau trimestre négatif, la croissance au cours de l'année 1992 a été seulement de +1,0 % par rapport à l'année précédente, le résultat le plus négatif depuis 1982. Cette croissance annuelle est tout à fait en ligne avec les prévisions de la DG II. Selon la plupart des économistes il est très difficile d'identifier des signaux de reprise à court terme pour l'économie communautaire. D'autre part, des signaux de reprise viennent de l'économie américaine. La vraie inconnue de cette phase est représentée par la capacité des économies communautaires, étant donné leurs problèmes internes, de profiter de cette nouvelle phase économique aux Etats-Unis. Parmi les éléments qui caractérisent cette phase de stagnation, il nous semble utile de nous arrêter brièvement sur les tensions monétaires et financières qui ont caractérisé la deuxième partie de l'année. Ces tensions ont déterminé une tendance à la hausse des taux d'intérêt, dans le but de maintenir l'équilibre du taux de change à l'intérieur du SME. Cette politique a sans doute influencé de manière négative la performance des économies communautaires, surtout dans les pays à devises faibles comme, par exemple, l'Italie, le Royaume-Uni et l'Espagne. Dans le dernier mois, grâce d'un côté à une réduction de tension sur le marché des changes et de l'autre côté à une plus faible pression inflationniste, les taux d'intérêt ont commencé lentement à descendre surtout dans le but de favoriser la reprise de la croissance économique.

En ce qui concerne l'évolution des prix, nous ne disposons pas de données pour la Communauté dans son ensemble. Mais sur la base des données disponibles, on peut affirmer qu'il y a une tendance à la réduction du rythme de croissance des prix.

En ce qui concerne les composantes du PIB, nous disposons des données que pour les quatre grands pays. Sur la base de ces données il nous semble que le fait marquant de ce trimestre est représenté d'un côté par la nouvelle chute des investissements et de l'autre côté par la poursuite de la phase de stagnation pour la consommation privée.

En ce qui concerne la situation dans les Etats membres, le quatrième trimestre a été caractérisé par le premier fléchissement de la croissance économique en France au cours de l'année (PIB -0,3 %) et par le deuxième fléchissement consécutif de la production en Italie (PIB -0,6 %).

Aux Etats-Unis, on observe, pour le quatrième trimestre, une croissance positive de la production (PIB +0,9 %) accompagnée par une légère reprise de l'inflation trimestrielle (+0,5 %), tandis qu'en rythme annuel on constate une légère réduction (+2,4 %). Parmi les composantes de la demande interne, le fait marquant du quatrième trimestre a été représenté par la remarquable progression des investissements (+3,5 %). La consommation privée se caractérise par son évolution positive (+1,1 %), tandis que pour la consommation publique on constate un léger fléchissement (-0,4 %).

Pour le Japon, le quatrième trimestre a été caractérisé par une phase de stagnation de la croissance économique (PIB +0,1 %) accompagnée par une légère reprise de l'inflation trimestrielle (+0,3 %), tandis qu'en rythme annuel on observe une sensible réduction (+1,4 %). Parmi les composantes du PIB, les faits marquants de ce trimestre ont été représentés par les fléchissements des investissements (-1,7 %), qui est le deuxième consécutif, ainsi que de la consommation privée (-0,6 %).

PRIX : L'inflation annuelle de la CE se maintient à 3,5 % en mars

Entre février et mars le taux d'inflation de la CE mesuré par l'IPC pour EUR 12 est resté inchangé, montrant ainsi une presque stabilité de l'inflation pour l'ensemble de la Communauté au cours des quatre derniers mois: décembre 3,6 %, janvier 3,6 %, février 3,5 %, mars 3,5 %.

Par ordre croissant des taux actuels les inflations annuelles par Etat membre sont les suivantes :

	MAR. '93	MAR. '92	MAR. '93	MAR. '92	
	MAR. '92	MAR. '91	MAR. '92	MAR. '91	
Danemark	1,1 %	2,6 %	Luxembourg	3,7 %	3,0 %
Royaume-Uni	1,9 %	4,0 %	Espagne	4,0 %	6,8 %
Irlande	1,9 %**	3,7 %**	R.F.d'Allemagne*	4,2 %	4,8 %
France	2,2 %p	3,2 %	Italie	4,2 %p	5,4 %
Pays-Bas	2,4 %	4,3 %	Portugal	7,3 %	8,5 %
Belgique	2,9 %	2,7 %	Grèce	16,4 %	18,3 %

* L'IPC pour la R.F. d'Allemagne continue à se rapporter à la situation territoriale avant le 23 octobre 1990.

** Irlande : février comparé à février.

p = provisoire.

Actuellement 10 parmi les 12 Etats membres ont des taux d'inflation annuelle inférieurs à 5 % ; les taux des Etats candidats à l'adhésion sont également inférieurs à 5 % : Norvège 2,5 %, Finlande 2,7 %, Autriche 3,9 %, Suède 4,9 %.

Les taux correspondants pour les Etats-Unis et le Japon sont respectivement 3,1 % et 1,5 %.

L'indice mensuel pour EUR 12 a augmenté de 0,4 % entre février et mars.

Les accroissements mensuels ont été relativement bas dans presque tous les Etats membres: 0,2 % en Belgique, au Danemark et en Italie, 0,3 % en Allemagne et au Luxembourg, 0,4 % aux Pays-Bas, au Royaume-Uni, en Espagne et au Portugal, 0,5 % en France.

Seule la Grèce fait exception où, suite à l'introduction des nouveaux articles après les soldes d'hiver, les prix de l'habillement et des chaussures ont augmenté de 17,5 % et ceux des biens durables de 7,5 %. Combiné avec des hausses certes moins fortes pour une large gamme de biens et services il en résulte une hausse prononcée de l'indice d'ensemble de 3,7 % entre février et mars.

LE CHOMAGE DANS LA COMMUNAUTE

Eurostat estime que, dans la Communauté européenne, le taux de chômage corrigé des variations saisonnières atteint 10,2 % au mois de mars 1993, en hausse de +0,1 point de pourcentage par rapport au mois de février 1993.

Au cours des 3 derniers mois, le taux de chômage communautaire a augmenté de +0,3 points de pourcentage. Dans la plupart des Etats-membres, le taux de chômage augmente de manière comparable; il a cependant légèrement diminué au Royaume-Uni (-0,2 points), s'est stabilisé en Irlande et a nettement augmenté en Espagne (+1,0 point).

Au cours des 12 derniers mois, le taux de chômage dans la Communauté s'est accru de +1,0 point en passant de 9,2 % à 10,2 %. L'augmentation reste plus prononcée chez les hommes (+1,1 points) que chez les femmes (+0,8 points).

En douze mois, le taux de chômage des femmes de moins de 25 ans a augmenté nettement moins vite (+0,7 points en 12 mois) que celui des autres catégories (+1,7 points pour les hommes de la même classe d'âge); il a même légèrement diminué au Danemark, en Italie et au Luxembourg.

Avec 20,4 % en mars 1993 dans l'ensemble de la Communauté, le taux de chômage des femmes de moins de 25 ans reste le double du taux de chômage global. Dans la plupart des Etats-membres, les jeunes femmes sont la catégorie la plus durement touchée par le chômage. Cependant, dans quatre Etats-membres, le taux de chômage des hommes de moins de 25 ans dépasse celui des femmes du même âge: dans les anciens Länder de la République fédérale d'Allemagne et au Luxembourg, deux des Etats-membres où le chômage reste relativement faible, en Irlande, l'un de ceux où il est très élevé, et au Royaume Uni.

Le taux de chômage et le nombre de chômeurs sont estimés après correction des différences dans les méthodes nationales de recensement du chômage.

Le taux de chômage est estimé en extrapolant les résultats 1991 des enquêtes sur les forces de travail pour tous les Etats membres. L'introduction des résultats de l'année 1992, dès qu'ils seront disponibles, entraînera probablement une révision des estimations.

PRODUCTION INDUSTRIELLE - La récession n'a pas encore touché le fond du gouffre

Dans le secteur industriel (NACE 1-4), la baisse de la production se poursuit et rien ne laisse présager une stabilisation. Pour la Communauté européenne (EUR 12), le taux de variation de l'indice de la production industrielle corrigé du nombre de jours ouvrables est, par rapport à la valeur du même mois de l'année précédente, de -3,5 % en novembre 92, de -4,1 % en décembre 92 et de -4,4 % en janvier 93. Les chiffres des trois derniers mois (de novembre à janvier) montrent que le taux de variation de l'indice de production corrigé des variations saisonnières pour EUR 12 est de -2,2 % par rapport aux trois mois précédents (d'août à octobre). Aux Etats-Unis, le même taux de variation s'élève à +1,2 %, ce qui préfigure une légère reprise.

En ce qui concerne les grandes catégories de marchandises, la situation est assez homogène (variation des trois derniers mois par rapport aux trois mois précédents):

- Industrie des biens intermédiaires: EUR12 -2,8 %, USA +1,0 %
- Industrie des biens d'investissement: EUR12 -2,0 %, USA +1,9 %
- Industrie des biens de consommation: EUR12 -1,6 %, USA +1,9 %

La situation dans les Etats membres se résume ainsi: la production baisse ou stagne partout. Les taux de variation correspondants ont évolué comme suit: Royaume-Uni: 0,0 %, Irlande: -1,5 % (estimation), Belgique: -1,5 % (estimation), Italie: -1,4 %, Pays-Bas: -2,0 % (estimation), Grèce: -1,0 % (estimation), France: -3,1 %, Espagne: -2,0 % (estimation), Allemagne (de l'Ouest): -3,6 %, Danemark: -5,0 % (estimation).

Dans le secteur du bâtiment (NACE 5), l'indice de production stagne ou baisse dans tous les Etats membres disposant de chiffres, sauf en Allemagne (taux de croissance de +3,5 % pour les trois derniers mois (saisonnalisés) par rapport aux mois précédents). Le poids de cet Etat membre dans la CE est tel qu'il permet d'augmenter dans EUR 12 l'indice de production du secteur du bâtiment de 2,0 % (les trois derniers mois par rapport aux mois précédents).

Dans la Communauté européenne, les taux d'augmentation des prix à la production sont toujours très variables. En général, la pression sur les prix exercée par les producteurs est faible et on assiste même à une baisse des prix à la production dans la moitié des Etats membres. Pour l'ensemble du secteur industriel, les derniers taux de variation disponibles (janvier ou décembre) par rapport à la valeur de l'année dernière ont évolué comme suit: EUR 12: 1,6 %, Grèce: 13,9 %, Royaume-Uni: 3,5 %, Italie: 2,6 %, Irlande: 2,1 %, Espagne: 1,4 %, Allemagne (de l'Ouest): 0,8 %, France: -0,4 %, Belgique: -0,5 %, Pays-Bas: -1,1 %, Danemark: -2,7 % et Luxembourg: -3,1 %.

BALANCE DES PAIEMENTS - tendances mondiales - chiffres préliminaires pour le troisième trimestre de 1992:

Détérioration de 4,8 mrds d'écus de la balance courante communautaire par rapport au troisième trimestre de 1992: la balance accuse un déficit de 13 mrds d'écus. La balance courante américaine enregistre un déficit de 15,2 mrds d'écus correspondant à une détérioration de 1,1 mrd d'écus. La balance courante japonaise s'améliore de 3,7 mrds pour atteindre un excédent de 20,4 mrds d'écus.

Au troisième trimestre de 1992, selon les chiffres préliminaires, la balance courante communautaire atteindrait un déficit de 13 mrds d'écus soit une détérioration de 4,8 milliards par rapport au troisième trimestre de 1991. Cette détérioration provient de l'aggravation de 12,8 mrds d'écus du déficit des invisibles, en partie compensée par une amélioration de 8 mrds d'écus du solde des marchandises. Celui-ci atteint l'équilibre après deux trimestres de déficit. Ces variations sont dues en grande partie à la balance allemande qui a enregistré au troisième trimestre de 1992 une augmentation de son excédent commercial de 3,5 mrds et une détérioration de son déficit des invisibles de 5,1 mrds. On note le même phénomène pour l'Italie: amélioration de 2 mrds de l'excédent commercial et une aggravation du déficit des invisibles de 3,6 mrds. Par ailleurs, la balance commerciale de la France est en amélioration de 1,8 mrd, tandis que celle du Royaume-Uni accuse une détérioration de 1,1 mrd.

Aux Etats Unis, le solde courant atteint un déficit de -15,2 mrds d'écus au troisième trimestre de 1992 comparé aux -14 mrds d'écus au cours du même trimestre de 1991. Le déficit commercial atteint -22,9 mrds d'écus après -20,6 mrds, l'excédent des invisibles s'améliore de 1,2 mrd d'écus pour atteindre 7,7 mrds d'écus.

Au troisième trimestre de 1992, l'excédent courant japonais atteint 20,4 mrds d'écus après 16,7 mrds pour la même période de 1991. L'excédent commercial s'est amélioré de 0,9 mrd d'écus et le déficit des invisibles s'est réduit de 2,8 mrds d'écus.

COMMERCE EXTERIEUR - Résultats de décembre 1992.

Le déficit extra-communautaire de l'année 1992 atteint -52,1 Mrds d'écus, contre -70,5 Mrds d'écus en 1991. L'écart entre taux d'évolution des exportations et des importations passe de -6 points en 1991 à plus de 4 points en 1992. En 1992 les exportations extra-communautaires progressent de près de 3 % par rapport à 1991, tandis que les importations baissent de 1,3 %. Ces dernières sont allégées par la chute du coût d'approvisionnement de la Communauté en pétrole brut qui atteint -5 % en dollar par baril, et -9 % en écus par baril entre 1991 et 1992.

Au mois de décembre 1992 le solde des échanges extra-communautaires est faiblement positif (0,4 Mrd d'écus), en progrès de 0,3 Mrd d'écus par rapport à décembre 1991. Les exportations extra-communautaires augmentent de 6,4 %, un peu plus fortement que les importations (5,6 %). Le coût d'approvisionnement de la Communauté en pétrole brut se replie de 2,5 % en dollars par baril, mais affiche une progression de 2,4 % en écus, qui contribue à la croissance des importations.

En 1992 le déficit des Etats-Unis est de -81 Mrds d'écus, il se creuse de 12 Mrds d'écus par rapport à 1991. Les importations sont en progrès de 4,4 % en écus par rapport à 1991, et de plus de 9 % en dollars. Les exportations des Etats-Unis connaissent une évolution de 1,7 % en écus et de 6 % en dollars.

Au mois de décembre 1992 les échanges des Etats-Unis sont déficitaires de 7,5 Mrds d'écus, contre 5,7 Mrds en décembre 1991. Les importations sont en progrès net par rapport à 1991: 18,2 % en écus, et 13 % en dollars. Les exportations croissent un peu moins vite que les importations: 15,4 % en écus, et 10 % en dollars.

En 1992 l'excédent japonais est supérieur de près de 20 Mrds d'écus à son niveau de 1991: il atteint 82,2 Mrds d'écus. Les exportations japonaises progressent de 3,4 % en écus par rapport à 1991, de 8 % en dollars. Elles stagnent en yens (1 %). Les importations du Japon affichent une baisse nette en écus (-5,6 %), en yens (-8 %), et s'infléchissent à peine en dollars (-1 %).

Au mois de décembre 1992 les échanges du Japon sont excédentaires de 7,7 Mrds d'écus, contre 6,1 Mrds en décembre 1991. Les exportations progressent de 10,7 % en écus par rapport à leur niveau de décembre 1991, de 5 % en dollars. Elles restent stables en yens. Les importations augmentent de 4,5 % en écus; elles stagnent en dollars et décroissent de 8 % en yens.

Le solde total des échanges extérieurs de l'Allemagne est de 15,3 Mrds d'écus en 1992, soit 6 Mrds de plus qu'en 1991. L'Irlande et le Danemark sont excédentaires respectivement de 5 Mrds d'écus et 4,3 Mrds d'écus, en progrès de près de 2 Mrds d'écus chacun par rapport à 1991. Le solde des Pays-Bas s'améliore de 2,7 Mrds d'écus et atteint -5,4 Mrds d'écus. L'UEBL et la France affichent des déficits proches de 7 Mrds d'écus chacun en 1992, en amélioration de moins d'un milliard d'écus pour l'UEBL, et de 8 Mrds pour la France. L'Italie affiche un déficit de 8,2 Mrds d'écus, en progrès de 2 Mrds d'écus. Le solde total du Portugal se dégrade d'un milliard d'écus pour atteindre -9 Mrds. Les déficits grec et espagnol restent proches de leur niveau de 1991, avec respectivement -10,6 Mrds et -21,8 Mrds d'écus. Le bilan du Royaume-Uni est le plus lourd: -26,9 Mrds d'écus, en dégradation de 4,6 Mrds rapporté à 1991.

„On line“-Abfrage

Jede Zeitreihe ist durch einen neunstelligen numerischen Kode gekennzeichnet, der seinerseits in Unterkodes gegliedert ist, welche – im Falle von „Eurostatistik“ – das Land, den Sektor, die Tabelle, die Einheit und die Periodizität bezeichnen.

Die Bedeutung der einzelnen Unterkodes ist der nachstehend aufgeführten Tabelle zu entnehmen.

Land XX	Sektor XX	Tabelle XXXX	Periodizität und Einheit X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBl 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Variablen Tabellen XXXX vierstelliger Wert, der im Titel jeder Tabelle erscheint	0 jährlich, Angaben in Prozent 1 vierteljährlich, Angaben in Prozent 2 monatlich, Angaben in Prozent 3 jährlich, Indexangaben (1985 = 100) 4 vierteljährlich, Indexangaben (1985 = 100) 5 monatlich, Indexangaben (1985 = 100) 6 jährlich, Angaben in absoluten Werten 7 vierteljährlich, Angaben in absoluten Werten 8 monatlich, Angaben in absoluten Werten 9 Gewicht, EUR 10 = 100 bzw. EUR 12 = 100

* Territoriale Aufteilung vor dem 3. 10. 90: 02 für EUR 12, 12 für D.

Beispiele: Will man die monatliche Arbeitslosigkeit (in absoluten Zahlen) von Frankreich gemäß Tabelle 0304 dieser Veröffentlichung erfahren, so braucht man nur den Kode 14 93 0304 8 einzugeben.

'On-line' consultation

Each time series is identified by a nine-digit code broken down into subcodes, which in the case of Eurostatistics, represent the country, sector, table unit and periodicity. The significance of the different subcodes may be found in the table below.

Country XX	Sektor XX	Table XXXX	Periodicity and unit X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBl 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 38 P 42 USA 46 JAP	93	Table by indicator XXXX 4-digit value quoted in the title of each table	0 annual in % 1 quarterly in % 2 monthly in % 3 annual index 1985 = 100 4 quarterly index 1985 = 100 5 monthly index 1985 = 100 6 annual absolute value 7 quarterly absolute value 8 monthly absolute value 9 weighting EUR 10 = 100 or EUR 12 = 100

* data for the territorial situation before 3. 10. 90: 02 for EUR 12, 12 for D.

Consultation example: to know the monthly unemployment (absolute figures) of France as is shown in Table 0304 of this publication, the code 14 93 0304 8 should be formed.

Mode de consultation «on-line»

Chaque série chronologique est identifiée par un code à neuf chiffres structuré en sous-codes représentant, dans le cas d'Eurostatistiques, le pays, le secteur, le tableau, l'unité et la périodicité. On trouvera dans le tableau ci-dessous la signification des différents sous-codes.

Pays XX	Secteur XX	Tableau XXXX	Périodicité et unité X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBl 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Tableaux par variable XXXX valeur à 4 chiffres figurant dans le titre de chaque tableau	0 annuelle exprimée en pourcentage 1 trimestrielle exprimée en pourcentage 2 mensuelle exprimée en pourcentage 3 annuelle exprimée en indice 1985 = 100 4 trimestrielle exprimée en indice 1985 = 100 5 mensuelle exprimée en indice 1985 = 100 6 annuelle exprimée en valeur absolue 7 trimestrielle exprimée en valeur absolue 8 mensuelle exprimée en valeur absolue 9 pondération EUR 10 = 100 ou EUR 12 = 100

* données pour la situation territoriale avant le 3. 10. 90: 02 pour EUR 12, 12 pour D.

Exemple de consultation: pour connaître le chômage mensuel (chiffres absolus) de la France, tel qu'il figure au tableau 0304 de cette publication, il suffit d'appeler le code 14 93 0304 8;
