*Printed in the FR of Germany*

Mit der monatlich erscheinenden Veröffentlichung *Eurostatistik - Daten zur Konjunkturanalyse* werden innerhalb kürzester Frist die neuesten statistischen Daten über die Europäische Gemeinschaft als Ganzes (EUR12), über jedes Mitgliedsland sowie über die Vereinigten Staaten und Japan bekanntgegeben.

*Eurostatistik* enthält nicht die Gesamtheit des bei Eurostat verfügbaren statistischen Materials, sondern eine Auswahl der relevantesten Reihen über die konjunkturelle Entwicklung.

Schnelligkeit und Pünktlichkeit sind die wichtigsten Vorzüge dieser Veröffentlichung.

Aus diesem Grunde wurde sie im Umfang bewußt klein gehalten und enthält keine Anmerkungen zur Methodik, die im übrigen in den spezialisierten Veröffentlichungen von Eurostat zu finden sind.

Die in *Eurostatistik* veröffentlichten Daten stammen aus dem ICG -Bereich der On-line-Datenbank Cronos von Eurostat.

Wer Zugang zu Cronos besitzt, kann jederzeit die Tabellen dieser Veröffentlichung abfragen, wobei die Daten täglich auf den neuesten Stand gebracht werden (Hinweise zur On-line -Benutzung finden sich auf der letzten Seite). Darüber hinaus sind die Daten in der Datenbank Eurocron verfügbar, die vom Host Eurobases der Kommission angeboten wird.

### WECHSELKURSE: Erweiterung der Bandbreiten innerhalb des Wechselkursmechanismus

Nach starken Spannungen an den Devisenmärkten beschlossen die EG-Finanzminister auf ihrer Sitzung am 1. August in Brüssel, die innerhalb des Wechselkursmechanismus des EWS geltenden Bandbreiten vorübergehend auf 15 % auszuweiten (1).

Nachdem der Handel mit den europäischen Währungen zwei Monate lang relativ ruhig verlaufen war, geriet der französische Franc Anfang Juli zunehmend unter Druck. Im Vorfeld der Sitzung des Zentralbankrates der Deutschen Bundesbank vom 29. Juli hatten die Finanzmärkte mit einer Senkung der deutschen Zinssätze gerechnet, die auch eine Rücknahme der Zinsen in den anderen EG-Ländern erlaubt und damit zur Verringerung der Spannungen an den Devisenmärkten beigetragen hätte. Die Bundesbank senkte dann jedoch lediglich den Lombardsatz und ließ den Diskontsatz unverändert, der faktisch die Untergrenze für die Zinssätze der anderen EG-Länder angibt.

Am Nachmittag des 29. Juli und während des gesamten 30. Juli kam es zu heftigen Spekulationen gegen den französischen und den belgischen Franc, die dänische Krone, die spanische Peseta und den portugiesischen Escudo, und es wurde deutlich, daß die Paritäten weder mit Hilfe einer Anhebung der kurzfristigen Zinssätze noch durch konzertierte Zentralbankinterventionen aufrechterhalten werden konnten. Am darauffolgenden Wochenende wurde die Erweiterung der Bandbreiten beschlossen.

Während des Handels am nächsten Tag bewegten sich die Wechselkurse mehrerer Währungen außerhalb der früheren Bandbreiten, doch entgegen den Erwartungen des Marktes nahmen die meisten europäischen Zentralbanken die Zinssätze, die in der Vorwoche heraufgesetzt worden waren, nicht sofort zurück. Lediglich die spanische Zentralbank senkte ihren Zinssatz für kurzfristige Interbankkredite um 0,5 % auf 10 %. Eine Woche später jedoch nahm die Banque de France die erste von mehreren Zinssenkungen vor. Am 6. August führte sie erneut einen Tagesgeldsatz von 10 % ein, der in den folgenden drei Wochen schrittweise zurückgenommen wurde, bis er am 24. August bei 7,75 % ausgesetzt wurde. Der Interventionsatz der Banque de France wurde während der gesamten Zeit unverändert bei 6,75 % gehalten. Der Kurs des französischen Franc, der Anfang des Monats nachgegeben hatte, zog im Anschluß an die Zinssenkungen erneut an, lag jedoch weiterhin unter dem früheren unteren Interventionspunkt.

Die Kurse anderer am Wechselkursmechanismus teilnehmender Währungen gingen nach der Erweiterung der Bandbreiten zunächst zurück, stabilisierten sich dann jedoch erneut, als deutlich wurde, daß nicht mit sofortigen Zinssenkungen zu rechnen war. Der Pesetakurs ist seit Ende Juli trotz der Senkung der spanischen Zinssätze sogar gestiegen. Der Kurs des US-Dollar gegenüber dem Yen sank Mitte August erneut mehrfach auf einen historischen Tiefstand und schien sich auf die Marke von 100 Yen für 1 Dollar zuzubewegen. An diesem Punkt griff jedoch die amerikanische Notenbank ein, um den Dollar zu stützen, was eine Abkehr von ihrer bisherigen Politik der Nichtintervention bedeutete. Der Rückgang des Dollarkurses konnte aufgehalten werden, und am 26. August schloß der Yen in London bei 104,4 Yen für 1 Dollar.

Der ungarische Forint, der an einen zu gleichen Teilen aus Ecu und US-Dollar bestehenden Währungskorb gekoppelt ist, wurde am 8. Juli um 3 % abgewertet, nachdem er im Juni bereits um 1,9 % abgewertet worden war. Gleichzeitig mit der Abwertung erhöhte die ungarische Zentralbank ihren Zinssatz für Wertpapierpensionsgeschäfte um 3 %.

### RENDITEN VON STAATSANLEIHEN: Renditen in den meisten Ländern rückläufig

Im Juli gingen die Renditen in den meisten der hier betrachteten Länder zurück, womit sich in vielen Fällen der in den Vormonaten beobachtete Renditerückgang fortsetzte.

Die Renditen von Staatsanleihen sind damit in allen EG-Ländern deutlich niedriger als zum Jahresbeginn, und in einigen Fällen haben sie annähernd oder bereits einen historischen Tiefstand erreicht. Dies gilt insbesondere für Spanien, wo die Renditen im Juni und Juli erneut nachgaben und jetzt zum erstmalig seit mindestens neun Jahren unter 10 % liegen.

EG-weit am niedrigsten sind die Renditen derzeit in Deutschland und den Niederlanden, am höchsten dagegen in Portugal. Die Zinsstruktur ist in den Ländern, deren Währungen in letzter Zeit unter Druck geraten waren, weiterhin invers (d. h. die langfristigen Zinsen liegen unter den kurzfristigen).

### GELDVOLUMEN: In Dänemark, Japan und den USA weiterhin langsames Geldmengenwachstum

In Dänemark, Japan und den USA weitet sich die Geldmenge weiterhin äußerst langsam aus. In den USA betrug die auf das Jahr umgerechnete Zuwachsrate von M2 im Februar, März und April weniger als 0,5 % und lag damit deutlich unter den von der amerikanischen Notenbank vorgegebenen Werten.

In Frankreich und Italien liegt das Geldmengenwachstum nach wie vor innerhalb des jeweiligen Zielkorridors, in Spanien wurden die vom Banco d'España für das ALP-Wachstum vorgegebenen 4,5 %–7,5 % im Mai knapp überschritten.

In Deutschland liegt die Zuwachsrate von M3 allerdings weiterhin oberhalb der angestrebten 4,5 %–6,5 %.

### AMTLICHE WÄHRUNGSRESERVEN :Anstieg der Währungsreserven in Dänemark und Spanien

Die jetzt für die meisten EG-Länder vorliegenden Juni-Daten lassen eine unterschiedliche Entwicklung der amtlichen Währungsreserven erkennen. Während sich die irischen Reserven in den ersten sechs Monaten des Jahres 1993 fast verdoppelten, erhöhten sich

die belgischen und die niederländischen Reserven um 35 % bzw. 18 %. In Deutschland war während des gleichen Zeitraums dagegen ein umfangreicher Reservenabfluß zu verzeichnen.

Der Rückgang der deutschen Währungsreserven folgt auf ihren massiven Anstieg während der Wechselkursunruhen im Herbst 1992. Im September 1992 hatte die Bundesbank an den Devisenmärkten in großem Umfang D-Mark gegen die unter Druck geratenen Währungen verkauft. Ende September 1992 verfügte Deutschland über Währungsreserven in Höhe von rund 86 Milliarden ECU, und trotz des seither erfolgten Reservenabflusses waren die deutschen Währungsreserven Ende Juni 1993 noch immer um rund 25 % höher als im August 1992, d. h. vor den Wechselkursunruhen.

In den letzten Monaten haben mehrere Länder Fremdwährungsanleihen aufgelegt, um ihre Währungsreserven aufzufüllen oder, wie in einigen Fällen, um Haushaltsdefizite zu finanzieren. Die Italienische Republik gab im Mai eine Euroanleihe im Betrag von 300 Millionen US-Dollar, Anfang Juni eine Floating-Rate-Note-Emission über 1,5 Milliarden US-Dollar und anschließend eine Euroanleihe im Betrag von 150 Millionen Yen. Dänemark beschaffte sich am Euromarkt ebenfalls verschiedene Währungen, nachdem die jüngsten Interventionen zur Verteidigung der Krone die Währungsreserven des Landes stark in Anspruch genommen hatten.

### VIERTELJÄHRLICHE GESAMTRECHNUNGEN: Erstes Quartal 1993: rückläufige Entwicklung des Wirtschaftswachstums (BIP -0,9 %); Zunahme der Inflation (+0,7 %).

Im ersten Quartal 1993 war für die Wirtschaft der Gemeinschaft insgesamt ein weiterer Wachstumsrückgang zu verzeichnen (BIP -0,9 %). Dieses Ergebnis, das im übrigen mit den makroökonomischen Wirtschaftsprognosen für das Jahr 1993 übereinstimmt, läßt auf die zu erwartende wirtschaftliche Lage im Jahresverlauf schließen, die noch ungünstiger sein dürfte als 1992. Nach Aussage der meisten Wirtschaftswissenschaftler sind in der Gemeinschaft Anzeichen für einen kurzfristigen Wirtschaftsaufschwung kaum auszumachen. Demgegenüber gehen – wenn auch recht schwache und bisweilen kontradiktorische – Signale für einen Aufschwung von der amerikanischen Wirtschaft aus. Die große Unbekannte in dieser Phase ist die Fähigkeit der Volkswirtschaften der Gemeinschaft, trotz ihrer internen Probleme aus dieser neuen wirtschaftlichen Phase in den Vereinigten Staaten Nutzen zu ziehen. Wie auf der letzten Sitzung der G7 betont wurde, ist die Erholung der Weltwirtschaft von folgenden drei Hauptfaktoren abhängig: der mit einer positiven Entwicklung der GATT-Verhandlungen eng verknüpften Wiederbelebung des Außenhandels; der Erholung der Binnennachfrage vor allem nach Gütern des Endverbrauchs sowie dem Abbau des primären Defizits des Staatssektors in allen Ländern. Für die Gemeinschaft kommt noch der Abbau der währungspolitischen Spannungen hinzu, welche die Stabilität des Währungssystems stark in Mitleidenschaft gezogen haben. Um eine gewisse Erholung der Binnennachfrage zu unterstützen, wurde damit begonnen, die Zinssätze zu Beginn dieses Jahres im Gefolge abnehmender Spannungen am Devisenmarkt sowie eines geringeren Inflationsdrucks allmählich herabzusetzen.

Was die Preisentwicklung angeht, so ist eine leichte Zunahme der vierteljährlichen Inflationsrate (+0,7 %) festzustellen, während die jährliche Inflationsrate weiterhin zurückgefallen ist (+2,6 %). Diese günstige Preisentwicklung wurde zweifellos durch die schwache Binnennachfrage gefördert, aufgrund derer die Preise selbst in den Ländern, deren Währungen einen Wertverlust zu verzeichnen hatten, weiterhin zurückgegangen sind.

Bei den Bestandteilen des BIP muß auf den dritten aufeinanderfolgenden Rückgang der Investitionen (-0,4 %) hingewiesen werden. Die Entwicklung des privaten ebenso wie des öffentlichen Verbrauchs ist eher schwach (+0,4 % bzw. +0,2 %).

Was die Situation in den einzelnen Mitgliedstaaten angeht, so liegen für Deutschland Ergebnisse für das erste Quartal und für die Niederlande eine erste Schätzung des BIP vor. Auf der Grundlage dieser Angaben ist eine Verschärfung der negativen Phase für das Wirtschaftswachstum in den Niederlanden (BIP -1,0 %), vor allem aber in Deutschland (BIP -2,3 %) festzustellen. Was die Inflation anbelangt, so ist in Deutschland sowohl auf vierteljährlicher als auch auf jährlicher Basis ein deutlicher Rückgang zu verzeichnen (+0,2 % bzw. +3,4 %). Von den Komponenten der Inlandsnachfrage sei auf den bemerkenswerten Einbruch bei den Investitionen in Deutschland (-4,6 %) hingewiesen.

In den Vereinigten Staaten ist für das erste Quartal 1993 ein Stillstand des Wirtschaftswachstums (BIP +0,2 %) bei einem leichten Anstieg der Inflation (+0,9 %) zu verzeichnen. Bei den Komponenten der Inlandsnachfrage war die Zunahme der Investitionstätigkeit (+2,3 %) der bedeutendste Aspekt dieses Quartals. Dagegen ist der öffentliche Verbrauch zum zweiten Mal hintereinander zurückgegangen (-1,8 %), während sich beim privaten Verbrauch eine deutliche Verlangsamung (+0,2 %) bemerkbar gemacht hat.

Für Japan war das erste Quartal 1993 durch eine positive Entwicklung des Wirtschaftswachstums (BIP +0,6 %) bei gleichzeitiger leichter Deflation (-0,3 %) gekennzeichnet. Bei den Komponenten der Inlandsnachfrage ist, nach zwei negativen Quartalen, die kräftige Erholung der Investitionstätigkeit (+1,0 %) hervorzuheben. Ferner hat sich der private Verbrauch, nach einer Phase der Unsicherheit, deutlich erhöht (+1,2 %).

### PREISE: Jahresinflationsrate der EG im Juli angestiegen auf 3,5 %

Die Jahresinflationsrate für die Gemeinschaft insgesamt gemessen am Verbraucherpreisindex stieg von 3,3 % im Juni auf 3,5 % im Juli an. Vor Jahresfrist betrug die Rate 3,9 %.

Der Zuwachs im Juli wurde hauptsächlich verursacht durch starkes Ansteigen der monatlichen Indizes in Belgien, in den Niederlanden und in Portugal (0,7 %).

Gemäßigte Zuwachsraten wurden in Luxemburg, Italien und Spanien festgestellt (0,4 %), während Deutschland (0,2 %) und Frankreich (0,1 %) nur geringe Änderungen ihrer Indizes verzeichneten. Für Dänemark und das Vereinigte Königreich war die Entwicklung rückläufig: beide -0,2 %.

Der Index Griechenlands fiel sehr stark (1,9 %) als Folge des gewöhnlichen Saisoneffekts des Sommerschlußverkaufs mit Preisreduzierungen für eine große Anzahl von Waren, hauptsächlich für Bekleidung und Schuhe (-6 %) sowie für Gebrauchs- und Verbrauchsgüter (-5 %).

Der Vierteljahresindex für Irland wird in der nächsten Ausgabe dieses Bulletins erscheinen.

Das Ergebnis der obengenannten Preisänderungen in den einzelnen Mitgliedstaaten ist ein moderater Anstieg von 0,2 % des EUR-12 Indexes. Die derzeitige Inflationsrate und die des Vorjahres beträgt für die einzelnen Mitgliedstaaten in ansteigender Rangfolge:

(1) Gemäß einer bilateralen Vereinbarung zwischen den deutschen und den niederländischen Währungsbehörden gelten zwischen der D-Mark und dem niederländischen Gulden weiterhin die früheren Bandbreiten.

	JULI '93 JULI '92	JULI '92 JULI '91		JULI '93 JULI '92	JULI '92 JULI '91
Irland*	0,9 %	3,6 %	Luxemburg	3,5 %	3,3 %
Dänemark	1,2 %	2,2 %	Deutschland**	4,3 %	3,3 %
Ver. Königreich	1,4 %	3,7 %	Italien	4,9 % <sup>p</sup>	5,2 %
Frankreich	2,1 %	2,2 %	Spanien	4,9 %	5,2 %

\* Mai 1993/Mai 1992

\*\* Der Verbraucherpreisindex der Bundesrepublik Deutschland bezieht sich weiterhin auf den Gebietsstand vor dem 3. Oktober 1990.

p = vorläufig

Die entsprechenden Daten für die Beitrittskandidaten sind: Finnland 2,1 % (2,6 %), Norwegen 2,2 % (2,5 %), Österreich 3,5 % (4,0 %), und Schweden 4,6 % (1,9 %). Für die Vereinigten Staaten und Japan betragen sie 2,8 % (3,2 %) bzw. 2,0 % (1,7 %).

### ARBEITSLOSIGKEIT IN DER GEMEINSCHAFT

Eurostat schätzt die saisonbereinigte Arbeitslosenquote in der Gemeinschaft für April 1993 auf 10,4 %. Sie liegt damit um 0,1 Prozentpunkt höher als im Vormonat, über das Jahr ist sie um einen ganzen Prozentpunkt gestiegen.

Der Anstieg der Arbeitslosenquote im Vergleich zum Vorjahr ist in allen Mitgliedstaaten festzustellen. Hervorzuheben sind Spanien (+3,0 Punkte), Belgien (+1,2 Punkte), Deutschland im Gebietsstand vor dem 3.10.1990 (+1,1 Punkte) und die Niederlande (+1,0 Punkte).

Die Männer sind von der wachsenden Arbeitslosigkeit mit +1,2 Punkten etwas stärker betroffen als die Frauen (+0,8 Punkte). Die Arbeitslosenquote der Jugendlichen unter 25 Jahren insgesamt stieg um +1,1 Punkte, bei den jungen Männern mit +1,6 Punkten ebenfalls ausgeprägter als bei den jungen Frauen (+0,6 Punkte).

Diese Schätzung der Arbeitslosenquoten und der Zahl der Arbeitslosen schaltet die unterschiedlichen nationalen Methoden zur Erfassung der Arbeitslosigkeit weitgehend aus.

Die Einbeziehung der neuesten verfügbaren Angaben aus der Arbeitskräfteerhebung in Spanien (1. Vierteljahr 1993) führt zu Revisionen früher veröffentlichter Daten.

In Portugal wird derzeit das Verfahren zur Einschreibung beim Arbeitsamt geändert. Die letzten verfügbaren Angaben beziehen sich auf Februar 1993.

Die Arbeitslosenquoten werden geschätzt durch Extrapolation der 1991er Ergebnisse der EG-Arbeitskräfteerhebung in allen Mitgliedstaaten. Die Einbeziehung der 1992er Ergebnisse, sobald verfügbar, kann zu Revisionen der Schätzungen führen.

### INDUSTRIEPRODUKTION Talsohle der Rezession noch nicht erreicht

Im Industriebereich (NACE 1-4) fällt die Produktion weiterhin, eine Stabilisierung ist noch nicht in Sicht. Für die Europäische Gemeinschaft (EUR12) beträgt die Veränderungsrate des arbeitstätig bereinigten Produktionsindex gegenüber dem Wert des gleichen Monats ein Jahr zuvor im Februar 93: -5,0 %, im März 93: -4,0 %. Betrachtet man die letzten drei Monate Januar bis März, so beläuft sich die für EUR12 Veränderungsrate des saisonbereinigten Produktionsindex gegenüber den drei davor liegenden Monaten Oktober bis Dezember auf -0,9 %. In den USA ist die entsprechende Änderungsrate bei +1,3 %, dort ist also eine leichte Erholung spürbar, in Japan dagegen -0,5 % (geschätzt).

Für die einzelnen großen Güterkategorien ist das Bild recht homogen (Änderung der letzten drei verfügbaren Monate gegenüber den drei Vormonaten):

- Grundstoffindustrie: EUR12 +0,2 %, USA +1,1 %, Japan -2,8 %
- Investitionsgüterindustrie: EUR12 -1,3 %, USA +2,2 %, Japan -4,1 %
- Konsumgüterindustrie: EUR12 -0,5 %, USA +1,1 %, Japan -3,0 %

In den Mitgliedstaaten stellt sich die Situation wie folgt dar: überall sinkt oder stagniert die Produktion. Die entsprechenden Veränderungsraten lauten: Italien 0,9 %, Luxemburg 0,6 %, Vereinigtes Königreich 0,3 %, Portugal 0,3 %, Dänemark -0,9 %, Niederlande -1,5 %, Belgien: -1,9 %, Irland -2,0 %, Frankreich -2,1 %, Spanien -2,8 %, Griechenland -3,8 %, Deutschland (West) -4,5 %.

Die Steigerungsraten der Erzeugerpreise sind in der Europäischen Gemeinschaft nach wie vor recht unterschiedlich, allgemein ist auf der Herstellerseite der Preisdruck allerdings gering, in der Hälfte aller Mitgliedstaaten sinken sogar die Erzeugerpreise. Die jeweils letzte verfügbare Änderungsrate gegenüber dem Vorjahreswert lautet für den gesamten Industriebereich: EUR12 1,6 %, Griechenland 13,1 %, Vereinigtes Königreich 3,6 %, Italien 3,4 %, Irland 2,1 %, Spanien 1,6 %, Deutschland (West) 0,1 %, Frankreich -0,4 %, Dänemark -0,9 %, Belgien -1,0 %, Niederlande -1,1 % und Luxemburg -3,2 %.

### ZAHLUNGSBILANZ – Gesamttendenzen – vorläufige Zahlen für das vierte Quartal 1992:

Die Leistungsbilanz der Gemeinschaft verbesserte sich im vierten Quartal 1992 gegenüber dem entsprechenden Vorjahreszeitraum um 2 Mrd. ECU und schloß mit einem Defizit von 4,8 Mrd. ECU. Die Leistungsbilanz der Vereinigten Staaten verzeichnete ein Defizit von 18,8 Mrd. ECU, was eine Verschlechterung um 11,4 Mrd. ECU bedeutet. In Japan stieg der Leistungsbilanzüberschuß um 6,5 Mrd. ECU auf 26 Mrd. ECU.

Den vorläufigen Zahlen zufolge schloß die Leistungsbilanz der Gemeinschaft im vierten Quartal 1992 mit einem Defizit in Höhe von 4,8 Mrd. ECU und verbesserte sich damit gegenüber dem entsprechenden Vorjahreszeitraum um 2 Mrd. ECU. Bei der Dienstleistungs- und Übertragungsbilanz ist ein leichter Rückgang des Defizits um 0,2 Mrd. ECU auf -7 Mrd. ECU festzustellen, während sich die Handelsbilanz um 2,1 Mrd. ECU verbesserte und damit erstmals nach drei Quartalen mit negativen Ergebnissen wieder einen Überschuß, und zwar in Höhe von 2,2 Mrd. ECU, auswies. In Deutschland und im Vereinigten Königreich stieg das Leistungsbilanzdefizit um 2,5 Mrd. bzw. 1,8 Mrd. ECU. Die französische Leistungsbilanz verbesserte sich um 2,9 Mrd. ECU und wies einen Überschuß von 2,7 Mrd. ECU aus. In Spanien verringerte sich das Defizit um 2 Mrd. ECU auf 2 Mrd. ECU. Diese Veränderungen der Leistungsbilanz sind in erster Linie auf die Entwicklung der Handelsbilanz zurückzuführen: Frankreich +1,4 Mrd. ECU, Spanien +1,7 Mrd. ECU, Deutschland -1,7 Mrd. ECU, Vereinigtes Königreich -1,6 Mrd. ECU. Bei der Dienstleistungs- und Übertragungsbilanz hatte nur Frankreich eine nennenswerte Veränderung, nämlich eine Verbesserung um 1,5 Mrd. ECU, zu verzeichnen.

In den Vereinigten Staaten belief sich das Leistungsbilanzdefizit im vierten Quartal 1992 auf 18,8 Mrd. ECU (23,9 Mrd. USD) gegenüber 7,4 Mrd. ECU (9,3 Mrd. USD) im Vergleichszeitraum des Vorjahres. Die Handelsbilanz schloß mit einem Defizit von 23,1 Mrd. ECU (29,2 Mrd. USD) gegenüber 17,4 Mrd. ECU (21,8 Mrd. USD), während der Überschuß der Dienstleistungs- und Übertragungsbilanz um 5,8 Mrd. ECU auf 4,2 Mrd. ECU (5,4 Mrd. USD) zurückging. Für 1,3 Mrd. ECU des Rückgangs ist der Posten Kapitalerträge und für 4,4 Mrd. ECU der Posten unentgeltliche Regierungsübertragungen verantwortlich.

Den vorläufigen Zahlen zufolge betrug der Leistungsbilanzüberschuß Japans im vierten Quartal 1992 26 Mrd. ECU (33 Mrd. USD, 4048 Mrd. YEN) gegenüber 19,4 Mrd. ECU (24,4 Mrd. USD, 3961 Mrd. YEN) im entsprechenden Zeitraum des Vorjahres. Der Handelsbilanzüberschuß stieg um 3,1 Mrd. ECU auf 28 Mrd. ECU (35,5 Mrd. USD, 4369 Mrd. YEN), nachdem er zuvor fünf Quartale lang unverändert bei 25 Mrd. ECU gelegen hatte. Das Defizit der Dienstleistungs- und Übertragungsbilanz ging um 3,4 Mrd. ECU auf 2,2 Mrd. ECU (2,8 Mrd. USD, 343 Mrd. YEN) zurück. Die Währungsreserven Japans haben sich in diesem Quartal um 0,3 Mrd. ECU (0,5 Mrd. USD, 59 Mrd. YEN) erhöht.

### AUSSENHANDEL – Ergebnisse für februar 1993

In den ersten beiden Monaten des Jahres 1993 erreichte das außergemeinschaftliche Defizit -9,6 Mrd. ECU und lag damit um 4,6 Mrd. ECU über dem des gleichen Vorjahreszeitraums. Die außergemeinschaftlichen Einfuhren gingen drastisch zurück (-6,5 %), während die Ausfuhren stagnierten (-1,1 %).

Das in den ersten beiden Monaten 1993 kumulierte Handelsdefizit (-12,8 Mrd. ECU) schwoll gegenüber dem Vergleichszeitraum 1992 um nahezu 4 Mrd. ECU an. Der Unterschied zwischen der Veränderungsrate bei den Einfuhren der Vereinigten Staaten und den Ausfuhren lag bei über 5 Punkten: Die Warenströme in die Vereinigten Staaten wuchsen um 13,2 % in Ecu und um 6 % in Dollar gegenüber 7,7 % in Ecu und 0,8 % in Dollar bei den Ausfuhren.

Im Januar-Februar 1993 erzielte Japan einen Handelsüberschuß von 16,7 Mrd. ECU verglichen mit 14,3 Mrd. ECU im Januar-Februar 1992. Die japanischen Ausfuhren weiteten sich um 6,2 % in Ecu aus, während sie in Dollar stagnierten und in Yen um 2 % abnahmen. Die japanischen Einfuhren legten um 1,2 % in Ecu zu, schrumpften allerdings in Dollar (-5,3 %) und in Yen.

Im Zeitraum Januar-Februar 1993 erzielte die Bundesrepublik Deutschland im außergemeinschaftlichen Handel einen Überschuß in Höhe von 2,2 Mrd. ECU, der einem Defizit von 0,4 Mrd. ECU im Januar-Februar 1992 gegenübersteht. Dänemark kann für die ersten beiden Monate 1993 mit einer kumulierten positiven Bilanz (0,3 Mrd. ECU) in nahezu derselben Höhe wie im gleichen Zeitraum 1992 aufwarten. In Irland, Italien, Portugal und Griechenland waren die Defizite mit weniger als 0,5 Mrd. ECU extrem gering. Das italienische Außenhandelsdefizit schmolz um 1,3 Mrd. ECU verglichen mit den beiden ersten Monaten des Jahres 1992. Die Salden der BLWU sowie Spaniens und der Niederlande verbesserten sich zwischen Januar-Februar 1992 und 1993 um nahezu 1 Mrd. ECU, wenn auch weiterhin Defizite in Höhe von 0,6, 1,1 bzw. 2,4 Mrd. ECU hingenommen werden mußten. In Frankreich verschlechterte sich die Bilanz des außergemeinschaftlichen Handels im Januar-Februar 1993 um 2,7 Mrd. ECU gegenüber 1,6 Mrd. ECU im Januar-Februar 1992. Im außergemeinschaftlichen Handel des Vereinigten Königreichs wurde für die ersten beiden Monate 1993 ein Defizit in Höhe von 4,1 Mrd. ECU festgestellt; es lag um 0,3 Mrd. ECU über dem des gleichen Zeitraums 1992.

*Eurostatistics - data for short-term economic analysis* is a monthly publication aimed at providing, as rapidly as possible, the latest statistical data on the European Community as a whole (EUR 12), each Member State, the United States and Japan.

*Eurostatistics* does not present all the statistics held by Eurostat, but a selection of the most relevant series on the economic situation.

Speed of publication and punctuality are the main features of this publication; that is why it is deliberately streamlined and does not contain any methodological notes, which are given in Eurostat's specialized publications.

The data published in *Eurostatistics* are taken from the ICG domain of Eurostat's on-line database, Cronos (the notes regarding on-line consultation may be found at the end of this publication). They are also available via the Commission host Eurobases in the Eurocron database.

Further information on *Eurostatistics* can be obtained from the following addresses:

### EXCHANGE RATES: Widening of ERM bands

Following a period of intense pressure in the foreign exchange markets, the EC finance ministers, meeting in Brussels on August 1, decided to temporarily widen the fluctuation bands of the exchange rate mechanism of the EMS to 15% either side of the existing central rates (1).

After two months of relatively quiet trading in European currencies, pressure against the French franc mounted in early July. Prior to the Bundesbank's council meeting on July 29, financial markets had discounted a fall in German interest rates, which would allow other European rates to fall and thus ease exchange rate pressures. However, only the Lombard rate was cut, the Bundesbank leaving its discount rate, which effectively sets the floor for other European rates, unchanged.

On the afternoon of Thursday July 29 and all day July 30 there was heavy speculation against the French and Belgian franc, the Danish krone the Spanish peseta and the Portuguese escudo, but it became obvious that neither increases in short-term interest rate nor concerted central bank intervention would maintain parities. Over the subsequent weekend, the widening of the parity bands was agreed on.

In the following day's trading several currencies moved outside their previous ERM bands, but contrary to market expectations most EC central banks did not immediately cut interest rates, which had been increased the previous week. The only exception to this was the Spanish central bank, which reduced its rate on short-term credits to banks by 0.5% to 10%. However, a week later the Banque de France announced the first in a series of interest rate reductions: on August 6 it reintroduced an overnight lending rate at 10%, which was then progressively reduced over the following three weeks to 7.75% on August 24, at which point it was suspended. Its intervention rate has remained unchanged throughout at 6.75%. The franc meanwhile, having depreciated at the start of the month, strengthened following the interest rate reductions, although remaining below its previous lower limit.

Having depreciated in the aftermath of the widening of fluctuation bands, other ERM currencies stabilised once more when it became clear that there were to be no immediate cuts in interest rates. The peseta meanwhile has actually strengthened since the end of July, despite the reduction in Spanish interest rates.

The US dollar touched further all-time lows against the yen in mid-August, and seemed at one point to be heading towards the 100 per dollar mark. However, the Federal Reserve then intervened to support the dollar, in a reversal of its previous policy of non-intervention. The dollar's depreciation was stemmed, and on August 26 the yen closed in London at 104.4 against the dollar.

The Hungarian forint, which is linked to a basket of currencies made up of equal parts of the ecu and the US dollar, was devalued by 3% on July 8, following a 1.9% devaluation in June. The devaluation was accompanied by a 3% increase in the central bank's open market security repurchase rate.

### GOVERNMENT BOND YIELDS: fall in yields in most countries surveyed

In July, yields fell in most countries surveyed. In many cases, these falls were the continuation of falls which had occurred in earlier months.

Government bond yields are now significantly lower than at the start of the year in all EC economies, and in some cases yields are at or near all-time lows. This is the case in particular for Spain, where yields fell again in June and July, to stand at less than 10% for the first time for at least nine years.

Yields in Germany and the Netherlands are currently the lowest in the EC, and those in Portugal the highest. The yield curve in the EC countries whose currencies have recently been under pressure remains downward sloping (long-term rates lower than short-term rates).

### MONEY SUPPLY: slow growth continues in Denmark, Japan and the US

Monetary growth in Denmark, Japan and the US remains extremely slow. In the US, the annualised growth rate of M2 has been less than 0.5% in February, March and April, well below the Federal Reserve's target range.

Monetary growth in France and Italy remains within their respective target ranges, and in Spain the growth rate of ALP in May was just above the upper limit of the Banco d'Espana's 4.5–7.5%.

However, M3 growth rate in Germany continues to exceed its 4.5–6.5% target range.

### FOREIGN OFFICIAL RESERVES: inflows into Denmark and Spain

Data now available for June for most EC countries indicate differing patterns of changes in foreign official reserves. In the first six months of 1993, Ireland has almost doubled its reserves, and those of Belgium and the Netherlands have increased by 35% and 18%

respectively. However, Germany experienced a large outflow of reserves in the same period.

Germany's outflow of reserves can be explained as a result of the reversal of the large build-up of the foreign reserve position during the period of exchange rate tensions in the autumn of 1992. During September 1992, the Bundesbank intervened heavily in the foreign exchange markets, selling Deutschemarks and buying the currencies under pressure. By the end of that month, Germany's reserves stood at around 86 billion ecu, and despite the fall in reserves since then, at the end of June 1993 they remain around 25% higher than in August 1992, before the exchange rate tensions.

Several countries have launched bond issues in foreign currencies in recent months, aimed at replenishing their reserves of foreign currencies and in some cases at helping to fund budget deficits. The Republic of Italy launched a US\$300m eurobond in May, followed in early June by a US\$1.5 billion floating rate note and then a 150m eurobond. Denmark too has been active in several currencies in the euromarkets, since its reserves were heavily utilised in the recent battles to defend the krone.

### QUARTERLY ACCOUNTS: In the first quarter of 1993 economic growth declined its upward trend (GDP -0.9%) and inflation resumed (+0.7%).

The first quarter of 1993 saw another decline in economic growth in the Community (GDP -0.9%). This result is in line with macro-economic forecasts for 1993 and presages an even less favourable economic situation throughout the year than in 1992. Most economists agree that it is very difficult to pinpoint any signs of short-term recovery in the Community economy. Moreover, the signs of recovery which are evident, though rather weak and sometimes contradictory, originate in the American economy. The real unknown factor at this stage is the capacity of the Community economies, given their internal problems, to profit from this new economic trend in the United States. As underlined at the last G7 meeting, world economic recovery is linked to three main factors: a recovery in external trade, closely linked to the positive outcome of the GATT negotiations; a recovery in domestic demand, particularly in terms of final consumption; a reduction in the primary public deficit in all countries. For the Community, a further condition is a reduction in the monetary tensions which have created enormous problems for the stability of the monetary system. To stimulate some recovery in internal demand, interest rates began to fall slowly in the first part of the year, owing to a reduction in tension on the foreign exchange markets and to weaker inflationary pressure.

Prices showed a slight inflationary trend over the quarter (0.7%), while the annual rate continued to fall (+2.6%). This favourable price trend was probably influenced by a low level of internal demand which caused prices to continue falling, even in countries which had devalued their currency.

With regard to the components of GDP, attention should be drawn to the third consecutive downturn in investment (-0.6%), while both private and public consumption rose slightly (+0.4% and +0.2% respectively).

As regards the situation in the Member States, results are available for the first quarter in Germany, as well as a rapid estimate of GDP for the Netherlands. On the basis of these figures, it would appear that the slump in economic growth is worsening in the Netherlands (GDP -1.0%) and especially in Germany (GDP -2.3%). As for inflation, there is a marked drop in both the quarterly and annual rates in Germany (+0.2% and +3.4% respectively). With regard to the components of domestic demand, it is worth highlighting the substantial fall in investment in Germany (-4.6%).

In the United States there was little sign of economic growth in the first quarter of 1993 (GDP +0.2%) and a slight increase in inflation (+0.9%). As regards the components of domestic demand, the most striking feature of this quarter was the increase in investment (+2.3%). On the other hand, public consumption was down for the second time in a row (-1.8%), while there was a marked slowdown in private consumption (+0.2%).

In Japan, the first quarter of 1993 was marked by the development of economic growth (GDP +0.6%) combined with slight deflation (-0.3%). As regards the components of GDP, there are two developments of note: the healthy recovery in investment (+1.0%) after two quarters of negative growth, and the appreciable increase in private consumption (+1.2%) after a period of uncertainty.

### PRICES: EC annual inflation rises to 3.5% in July

The annual inflation rate for the Community as a whole as measured by the CPI rose slightly from 3.3% in June to 3.5% in July; a year ago this rate was 3.9%. The upward movement in July was mainly a result of marked increases over the month in the indices for Belgium, the Netherlands and Portugal (all 0.7%).

Lesser rises were registered in Luxembourg, Italy and Spain (all 0.4%), whereas Germany (0.2%) and France (0.1%) showed little change in their indices and those for Denmark and the United Kingdom both fell by (0.2%).

There was a sharp fall in the index for Greece (1.9%), caused by the usual seasonal effect of the summer sales for a wide range of goods, mainly for clothing and footwear (-6%) as well as for durable and consumable goods (-5%).

The quarterly index of Ireland for August will be available in the next issue of this bulletin.

As a result of the above movements in the indices in the different Member States there was a modest 0.2% rise in the EUR-12 index.

The current inflation rates for the individual Member States in ascending order and those a year ago are as follows:

(1) In a bilateral agreement between the German and Dutch monetary authorities, the new fluctuation bands are not operational; the previous bands continue to apply.

	JULY '93	JULY '92		JULY '93	JULY '92
	JULY '92	JULY '91		JULY '92	JULY '91
Ireland*	0.9%	3.6%	Luxembourg	3.5%	3.3%
Denmark	1.2%	2.2%	Germany**	4.3%	3.3%
United Kingdom	1.4%	3.7%	Italy	4.9% <sup>p</sup>	5.2%
France	2.1%	2.2%	Spain	4.9%	5.2%
Netherlands	2.3%	3.1%	Portugal	5.7%	9.6%
Belgium	2.6%	2.6%	Greece	15.7%	13.6%

\* May figures

\*\* The CPI for the Federal Republic of Germany continues to reflect borders prior to 3 October 1990.

<sup>p</sup> = provisional

The corresponding rates for the applicant Member States were: Finland 2.1% (2.6%), Norway 2.2% (2.5%), Austria 3.5% (4.0%), and Sweden 4.6% (1.9%)

For the United States and Japan they were 2.8% (3.2%) and 2.0% (1.7%) respectively.

## UNEMPLOYMENT IN THE COMMUNITY

Eurostat estimates that the seasonally-adjusted unemployment rate in the European Community was 10.4% for the month of April 1993, representing an increase of +0.1 percentage points in comparison with the month of March 1993 and +1.0 points in comparison with the month of April 1992.

In every Member State the unemployment rate increased in comparison with the previous year. The largest increases took place in Spain (+3.0 points), Belgium (+1.2 points), Germany (+1.1 points in the old Länder) and the Netherlands (+1.0 points).

The increase in the unemployment rate was slightly greater for men (+1.2 points) than for women (+0.8 points). For young persons aged under 25 (where the increase for men and women together was +1.1 points), the increase was again greater for men (+1.6 points) than for women (+0.6 points).

The unemployment rate and the number of unemployed persons are estimated after taking account of the differences between national methods of recording unemployment.

The inclusion of the most recently available data from the labour force survey in Spain (first quarter of 1993) has resulted in the revision of the results published previously.

In Portugal, the procedures for registering at employment offices are under review; the most recent figures available relate to February 1993.

The rate of unemployment is estimated by extrapolating the 1991 results of the labour force surveys for all the Member States. The introduction of the 1992 results, as soon as they become available, will probably lead to a revision of the estimates.

## INDUSTRIAL PRODUCTION Recession has not yet bottomed out

Production in industry (NACE 1-4) is still falling, with no signs of levelling off. The rate of change of the production index adjusted for the number of working days for the European Community (EUR12) was 5.0% down in February 1993, 4.0% down in March 1993, compared with the same month in 1992. The figures for the most recent three-month period, i.e. January to March, show a rate of change in the seasonally-adjusted production index for EUR12 which is 0.9% down on the previous three months, October to December. This figure is +1.3% in the United States, i.e. there are signs of slight recovery, in Japan however this figure is -0.5% (estimated).

The picture is much the same across the board for the individual types of goods (change in the last three months available compared with the previous three months):

- Intermediate goods: EUR12 +0.2%; USA +1.1%, Japan -2.8%
- Capital goods: EUR12 -1.3%; USA +2.2%, Japan -4.1%
- Consumer goods: EUR12 -0.5%; USA +1.1%, Japan -3.0%

Throughout the Member States production is falling or stagnating, with the following rates of change: Italy 0.9%, Luxembourg 0.6%, United Kingdom 0.3%, Portugal 0.3%, Denmark -0.9%, Netherlands -1.5%, Belgium: -1.9%, Ireland -2.0%, France -2.1%, Spain -2.8%, Greece -3.8%, Germany (West) -4.5%.

The rates of increase in producer prices have again varied very widely from one Member State to another but in general price pressure on the producer side is small and producer prices are even falling in half of the Member States. The most recent figures available show the following changes over the value for the previous year for industry as a whole: EUR12

1.6%, Greece 13.1%, United Kingdom 3.6%, Italy 3.4%, Ireland 2.1%, Spain 1.6%, Germany (West) 0.1%, France -0.4%, Denmark -0.9%, Belgium -1.0%, Netherlands -1.1% and Luxembourg -3.2%.

## BALANCE OF PAYMENTS – world trends – provisional figures for fourth quarter of 1992.

Improvement of ECU 2 billion in the Community current-account balance compared with fourth quarter of 1991, with a deficit of ECU 4.8 billion. Deficit of ECU 18.8 billion in the American current-account balance, a deterioration of ECU 11.4 billion. Improvement of ECU 6.5 billion in the Japanese current-account balance to a surplus of ECU 26 billion.

According to provisional figures, the Community current-account balance in the fourth quarter of 1992 showed a deficit of 4.8 billion, which represents an improvement of 2 billion compared with the fourth quarter of 1991. The invisibles deficit showed a very slight drop of ECU 200 million to ECU 7 billion. The trade balance was up by ECU 2.1 billion compared with 1991, with a surplus of ECU 2.2 billion after being in deficit for three successive quarters. There was a notable worsening of the situation in Germany and the United Kingdom, with deficits of ECU 2.5 billion and 1.8 billion respectively. France had a surplus of ECU 2.7 billion, an improvement of 2.9 billion. Spain saw its deficit fall by 2 billion to ECU 2 billion. These changes on current account are mainly due to changes in the trade balance:

France +1.4 billion, Spain +1.7 billion, Germany -1.7 billion, United Kingdom -1.6 billion. As regards invisibles, only France recorded any significant change, with +1.5 billion.

In the United States, the current account showed a deficit of ECU 18.8 billion (USD 23.9 billion) in the fourth quarter of 1992 compared with ECU 7.4 billion (USD 9.3 billion) in the same quarter of 1991. The trade deficit was ECU 23.1 billion (USD 29.2 billion) compared with ECU 17.4 billion (USD 21.8 billion), while the surplus on invisibles showed a drop of ECU 5.8 billion to ECU 4.2 billion (USD 5.4 billion). This drop is attributable above all to the items investment income (down ECU 1.3 billion) and unrequited official transfers (up ECU 4.4 billion).

Provisional figures for the fourth quarter of 1992 give Japan a current-account surplus of ECU 26 billion (USD 33 billion, 4048 billion) against ECU 19.4 billion (USD 24.4 billion, 3961 billion) in the same period of 1991. The trade surplus improved by ECU 3.1 billion to ECU 28 billion (USD 35.5 billion, 4369 billion) after stagnating at around ECU 25 billion for five successive quarters. The invisibles deficit was ECU 2.2 billion (USD 2.8 billion, 343 billion), down by ECU 3.4 billion. Japan's reserves rose over the quarter by ECU 0.3 billion (USD 0.5 billion, 59 billion).

## EXTERNAL TRADE Results for February 1993

For the first two months of 1993, the extra-Community deficit was ECU -9.6 billion, representing a recovery of ECU 4.6 billion over the same period in 1992. Extra-Community imports showed a marked fall (-6.5%), whilst exports stagnated (-1.1%).

The US cumulative trade deficit for the first two months of 1993 was

ECU -12.8 billion, representing a deterioration of ECU 4 billion over the same period in 1992. There was a gap of over five points between imports and exports in the United States: imports into the US rose by 13.2% in ecu terms and by 6% in dollar terms, compared with 7.7% for exports in ecu terms and 0.8% in dollar terms. Japan's trade surplus for January/February 1993 was ECU 16.7 billion, compared with ECU 14.3 billion for the same period in 1992. Japanese exports were up 6.2% in ecu terms, stagnated in dollar terms and fell 2% in yen. Japanese imports rose 1.2% in ecu terms, and fell 5.3% in both dollar and yen terms.

Germany's extra-Community trade surplus for January/February 1992 was ECU 2.2 billion, compared with a deficit of ECU -0.4 billion for the same period last year. Denmark recorded a cumulative surplus for the first two months of 1993 (ECU 0.3 billion), which was close to the 1992 figure for the same period. Ireland, Italy, Portugal and Greece recorded slight extra-Community deficits at just under ECU -0.5 billion. Italy's extra-Community trade deficit was ECU 1.3 billion down on the first two months of 1992. The balances of the BLEU, Spain and the Netherlands were up almost ECU 1 billion on January/February 1992 but remained negative at ECU -0.6, -1.1 and -2.4 billion respectively. France's extra-Community trade balance deteriorated in January/February 1993 (ECU -2.7 billion, compared with ECU -1.6 billion in January/February 1992). The United Kingdom recorded a trade deficit of ECU -4.1 billion for the first two months of 1993, representing a deterioration of ECU 0.3 billion over the same period in 1992.

*Eurostatistiques - Données pour l'analyse de la conjoncture* est une publication mensuelle qui a pour but de fournir dans les meilleurs délais les données statistiques les plus récentes pour la Communauté européenne en tant qu'ensemble (EUR12), pour les pays membres ainsi que pour leurs principaux partenaires extra-communautaires (États-Unis d'Amérique et Japon).

*Eurostatistiques* ne publie pas d'une manière exhaustive toutes les statistiques disponibles auprès d'Eurostat, mais les plus importantes parmi celles-ci.

Cette publication se veut rapide et facilement maniable. Pour cette raison, elle ne comporte pas de notes méthodologiques, qui sont par ailleurs disponibles dans les publications spécialisées d'Eurostat.

Les données publiées dans *Eurostatistiques* proviennent du domaine ICG de la base de données Cronos (les instructions pour le mode de consultation on-line se trouvent à la fin de cette publication). Elles sont aussi disponibles dans la base de données Eurocron, accessible par l'intermédiaire du serveur Eurobases de la Commission.

### TAUX DE CHANGE: élargissement des marges du mécanisme de change

Face à la vive tension sur les marchés des changes, les ministres de finances de la Communauté, réunis à Bruxelles le 1<sup>er</sup> août, ont décidé d'élargir temporairement les marges de fluctuation du mécanisme de change du SME à  $\pm 15\%$  des taux centraux actuels.<sup>(1)</sup>

Après une période de deux mois marquée par le calme relatif sur les marchés des changes européens, la pression contre le franc français est montée au début du mois de juillet. Avant la réunion du conseil de direction de la Bundesbank du 29 juillet, les marchés financiers ont anticipé une baisse des taux d'intérêt allemands, ce qui aurait permis de réduire d'autres taux européens et de détendre ainsi les taux de change. Cependant, seul le taux Lombard a été réduit, alors que la Bundesbank a maintenu inchangé son taux d'escompte qui détermine en pratique le niveau des autres taux européens.

Au cours de l'après-midi du jeudi 29 juillet et de la journée du 30 juillet, une vive spéculation s'est manifestée contre le franc français, le franc belge, la couronne danoise, la peseta espagnole et l'escudo portugais, cependant qu'il ne faisait plus de doute que ni les baisses des taux d'intérêt à court terme ni l'intervention concertée des banques centrales ne pouvaient maintenir les parités. Le week-end suivant, l'élargissement des marges de parité a été convenu.

Le lendemain, plusieurs devises sont sorties de leurs parités antérieures du mécanisme de change, mais contrairement aux attentes du marché, la plupart des banques centrales européennes n'ont pas immédiatement baissé leurs taux d'intérêt relevés la semaine précédente. Seule la banque centrale espagnole a fait exception à la règle en réduisant son taux interbancaire à court terme de 0,5 % à 10 %. Cependant, une semaine plus tard, la Banque de France a annoncé la première d'une série de baisses de taux d'intérêt: le 6 août, elle a réintroduit un taux au jour le jour de 10 % qui a ensuite été progressivement réduit au cours des trois semaines suivantes pour se fixer à 7,75 % le 24 août. Tout au long de cette période, son taux d'intervention est demeuré inchangé à 6,75 %. Entretemps, après avoir baissé au début du mois, le franc s'est redressé sous l'effet des baisses de taux d'intérêt, bien qu'il soit demeuré en deçà de son plancher précédent.

Après avoir déprécié à la suite de l'élargissement des marges de fluctuation, d'autres devises du mécanisme de change se sont à nouveau stabilisées dès qu'il était évident qu'il n'y aurait pas de baisse immédiate des taux d'intérêt. Entretemps, la peseta s'est effectivement redressée depuis la fin du mois de juillet, en dépit de la baisse des taux d'intérêt espagnols.

Le dollar américain a enregistré de nouveaux records historiques à la baisse par rapport au yen à la mi-août, semblant même s'orienter vers la barre des 100 yens par dollar-mark. Cependant, la Réserve fédérale est intervenue pour soutenir le billet vert dérogeant ainsi à sa politique antérieure de non-intervention. La baisse du dollar a été enrayée et, le 26 août, le yen a clôturé à Londres à 104,4 yens par rapport à la devise américaine.

Le forint hongrois qui est lié à un panier de monnaies constitué à parts égales de l'écu et du dollar américain a été dévalué de 3 % le 8 juillet après avoir été dévalué de 1,9 % en juin. La dévaluation s'est accompagnée d'une hausse de 3 % du taux de réméré sur le marché libre de la banque centrale.

### RENDEMENT DES EMPRUNTS D'ETAT: baisse des rendements dans la plupart des pays observés

En juillet, les rendements ont baissé dans la plupart des pays observés. Souvent, ces baisses ont suivi des baisses enregistrées au cours des mois précédents.

Les rendements des obligations d'Etat sont actuellement sensiblement inférieurs à ceux du début de l'année dans toutes les économies de la Communauté et, dans certains cas, ont atteint ou presque des planchers historiques. Tel est le cas notamment de l'Espagne où les rendements ont à nouveau chuté en juin et juillet pour atteindre moins de 10 % pour la première fois depuis au moins neuf ans.

En Allemagne et aux Pays-Bas, les rendements sont actuellement les plus bas dans la Communauté et ceux du Portugal sont les plus élevés. Dans les Etats membres de la Communauté dont les monnaies ont été récemment attaquées, la courbe de rendement demeure à la baisse (taux à long terme inférieurs aux taux à court terme).

### MASSE MONETAIRE: poursuite de la faible croissance au Danemark, au Japon et aux Etats-Unis

La croissance de la masse monétaire demeure extrêmement faible au Danemark, au Japon et aux Etats-Unis. Aux Etats-Unis, le taux de croissance annualisé de M2 a été inférieur à 0,5 % en février, mars et avril, soit loin sous l'objectif visé par la Réserve fédérale.

En France et en Italie, la croissance de la masse monétaire est conforme à l'objectif et, en Espagne, le taux de croissance d'ALP en mai était juste audessus de la limite supérieure de 4,5-7,5 % de la Banco de España.

Cependant, le taux de croissance de M3 en Allemagne continue de dépasser l'objectif visé de 4,5-6,5 %.

### RESERVES DE CHANGE OFFICIELLES: entrées de réserves au Danemark et en Espagne

Les données de juin actuellement disponibles pour la plupart des Etats membres de la Communauté montrent une évolution disparate des réserves de change. Au cours des six

premiers mois de 1993, l'Irlande a presque doublé ses réserves et celles de la Belgique et des Pays-Bas ont augmenté respectivement de 35 % et 18 %. Cependant, l'Allemagne a enregistré d'importantes sorties de réserves au cours de la même période.

Les sorties de réserves de l'Allemagne peuvent s'expliquer par le revirement par rapport à la constitution massive de réserves de change intervenue lors des turbulences monétaires de l'automne 1992. En septembre 1992, la Bundesbank est massivement intervenue sur les marchés des changes en vendant des marks et en achetant des devises faibles. A la fin du mois, les réserves allemandes ont atteint un niveau d'environ 86 milliards d'écus et, malgré la baisse des réserves intervenue depuis lors, elles ont été, à la fin du mois de juin 1993, de 25 % environ supérieures à celles d'août 1992, avant les tensions monétaires.

Au cours des derniers mois, plusieurs pays ont émis des emprunts en devises étrangères en vue de reconstituer leurs réserves de change et, parfois, de financer leurs déficits budgétaires. La République italienne a lancé une émission de 300 millions de USD en mai, suivie au début du mois de juin d'une émission d'obligations à taux variable de 1,5 milliard de USD, puis d'une émission de 150 millions de yens. Le Danemark lui aussi a été actif dans diverses devises sur les euromarchés, ses réserves ayant été largement entamées par les récentes interventions en faveur de la couronne.

### COMPTES TRIMESTRIELS: Au cours du premier trimestre 1993: fléchissement de la croissance économique (PIB -0,9 %); reprise de l'inflation (+0,7 %).

Le premier trimestre 1993 a été caractérisé, pour l'économie communautaire dans son ensemble, par un nouveau fléchissement de la croissance économique (PIB -0,9 %). Ce résultat, d'ailleurs en ligne avec les prévisions macro-économiques pour l'année 1993, indique comment, au cours de l'année la situation économique devrait se présenter avec des caractéristiques encore moins favorables qu'en 1992. Selon la plupart des économistes, il est très difficile d'identifier des signaux de reprise à court terme pour l'économie communautaire. D'autre part, des signaux de reprise, même si assez faibles et parfois contradictoires viennent de l'économie américaine. La vraie inconnue de cette phase est représentée par la capacité des économies communautaires, étant donné leurs problèmes internes, de profiter de cette nouvelle phase économique aux Etats-Unis. Comme souligné dans la dernière réunion des G7 la reprise de l'économie mondiale est liée à trois facteurs principaux: la reprise du commerce extérieur strictement liée au développement positif des négociés GATT; la reprise de la demande interne, surtout des biens de consommation finale; la réduction du déficit primaire public dans tous les pays. A ces conditions il faut rajouter, pour la Communauté, une réduction des tensions monétaires qui ont créé des gros problèmes à la stabilité du système monétaire. Dans le but de favoriser une certaine reprise de la demande interne, dans la première partie de l'année en cours, grâce d'un côté à une réduction de tension sur le marché des changes, et de l'autre côté à une plus faible pression inflationniste, les taux d'intérêt ont commencé lentement à descendre.

En ce qui concerne l'évolution des prix, on enregistre une légère reprise de l'inflation, en rythme trimestriel (+0,7 %) tandis qu'en rythme annuel on constate la poursuite de la baisse (+2,6 %). Cette évolution favorable des prix a été sans doute influencée par la faiblesse de la demande interne grâce à laquelle, même dans les pays où il y a eu une dévaluation des devises, les prix ont continué à baisser.

En ce qui concerne les composantes du PIB, il faut souligner le troisième fléchissement consécutif des investissements (-0,6 %). Tandis que la consommation, tant privée que publique, présente une évolution plutôt faible (+0,4 % et +0,2 % respectivement).

En ce qui concerne la situation dans les Etats membres, on dispose des résultats pour le premier trimestre en Allemagne et d'une estimation rapide du PIB aux Pays-Bas. Sur la base de ces éléments, on constate une accentuation de la phase négative pour la croissance économique aux Pays-Bas (PIB -1,0 %) mais surtout en Allemagne (PIB -2,3 %). Du côté de l'inflation, en Allemagne on constate une baisse sensible tant en rythme trimestriel qu'annual (+0,2 % et +3,4 % respectivement). Parmi les composantes de la demande interne il nous semble utile de souligner pour l'Allemagne la chute remarquable des investissements (-4,6 %).

Aux Etats-Unis on observe, pour le premier trimestre 1993, un temps d'arrêt dans la croissance économique (PIB +0,2 %) accompagné par une légère reprise de l'inflation (+0,9 %). Parmi les composantes de la demande interne, le fait marquant de ce trimestre a été représenté par la progression des investissements (+2,3 %). Par contre, la consommation publique est caractérisée par le deuxième fléchissement consécutif (-1,8 %), tandis que la consommation privée l'est par un sensible ralentissement (+0,2 %).

Pour le Japon, le premier trimestre 1993 a été caractérisé par une évolution positive de la croissance économique (PIB +0,6 %) accompagnée par une légère déflation (-0,3 %). Parmi les composantes du PIB, il faut souligner, après deux trimestres négatifs, la bonne reprise des investissements (+1,0 %). D'ailleurs, la consommation privée, après une phase d'incertitude, se caractérise par une sensible accentuation (+1,2 %).

### PRIX: L'inflation annuelle de la CE monte à 3,5 % en juillet.

Le taux d'inflation annuelle pour l'ensemble de la Communauté mesuré par l'IPC a augmenté légèrement de 3,3 en juin à 3,5 % en juillet; il y a un an ce taux était de 3,9 %.

La hausse en juillet a été principalement causée par les forts accroissements des indices de la Belgique, les Pays-Bas et le Portugal (tous 0,7 %). Des augmentations moins fortes ont été enregistrées au Luxembourg, en Italie et en Espagne (tous 0,4 %), tandis que l'Allemagne (0,2 %) et la France (0,1 %) ont connu des faibles variations de leurs indices et que le Danemark et le Royaume-Uni ont connu des reculs (-0,2 %).

En Grèce, suite à l'effet saisonnier habituel des soldes d'été, l'indice est tombé de 1,9 %, surtout influencé par les fortes réductions de l'habillement et des chaussures (-6 %) ainsi que pour ceux des biens de ménage durable (-5 %).

L'indice trimestriel de l'Irlande sera disponible au prochain numéro de ce bulletin.

Le résultat de toutes les variations dans les indices des différents Etats Membres a été un accroissement modéré de 0,2 % de l'indice EUR-12.

Par ordre croissant les taux actuels d'inflation et ceux d'il y a un an pour les Etats Membres sont les suivants:

<sup>(1)</sup> Selon un accord bilatéral passé entre les autorités monétaires allemandes et néerlandaises, les nouvelles marges de fluctuation ne sont pas opérationnelles; les marges antérieures demeurent d'application.

\* L'IPC pour la R.F. d'Allemagne continue à se rapporter à la situation territoriale avant le 3 octobre 1990.

\*\* Chiffres pour Mai.

p = provisoire.

Les taux correspondants pour les Etats candidats à l'adhésion à la CE sont: Finlande 2,1 % (2,6 %), Norvège 2,2 % (2,5 %), Autriche 3,5 % (4,0 %) et la Suède 4,6 % (1,9 %).

Pour les Etats-Unis et le Japon ces taux sont 2,8 % (3,2 %) respectivement 2,0 % (1,7 %).

## LE CHOMAGE DANS LA COMMUNAUTE:

Eurostat estime que, dans la Communauté européenne, le taux de chômage corrigé des variations saisonnières atteint 10,4 % au mois d'avril 1993, en hausse de +0,1 point de pourcentage par rapport au mois de mars 1993 et de +1,0 point par rapport au mois d'avril 1992.

PAGE1 = Dans tous les Etats membres, le taux de chômage augmente par rapport à l'année précédente. Les hausses les plus importantes se sont produites en Espagne (+3,0 points), Belgique (+1,2 point), Allemagne (+1,1 point dans les anciens Länder) et aux Pays Bas (+1,0 point).

La hausse du taux de chômage est légèrement plus forte chez les hommes (+1,2 point) que chez les femmes (+0,8 point). Pour les jeunes de moins de 25 ans (+1,1 point pour l'ensemble des hommes et des femmes) l'augmentation est également plus importante chez les hommes (+1,6 point) que chez les femmes (+0,6 point).

Le taux de chômage et le nombre de chômeurs sont estimés après correction des différences dans les méthodes nationales de recensement du chômage. L'introduction des dernières données disponibles de l'Enquête sur les forces du travail (1er trimestre 1993) en Espagne a entraîné la révision des résultats publiés les mois précédents.

Au Portugal, une révision des procédures relatives à l'inscription aux bureaux de placement est en cours; le dernier chiffre connu concerne février 1993.

Le taux de chômage est estimé en extrapolant les résultats 1991 des enquêtes sur les forces de travail pour tous les Etats membres. L'introduction des résultats de l'année 1992, dès qu'ils seront disponibles, entraînera probablement une révision des estimations.

## PRODUCTION INDUSTRIELLE La récession n'a pas encore touché le fond du gouffre

Dans le secteur industriel (NACE 1-4), la baisse de la production se poursuit et rien ne laisse présager une stabilisation. Pour la Communauté européenne (EUR12), le taux de variation de l'indice de la production industrielle corrigé du nombre de jours ouvrables est, par rapport à la valeur du même mois de l'année précédente, en février 93: -5,0 %, en mars 93: -4,0 %. Les chiffres des trois derniers mois (de décembre à février) montrent que le taux de variation de l'indice de production corrigé des variations saisonnières pour EUR12 est de -0,9 % par rapport aux trois mois précédents (d'octobre à décembre). Aux Etats-Unis, le même taux de variation s'élève à +1,3 %, ce qui préfigure une légère reprise, au Japon au contraire le taux de variation s'élève à -0,5 % (estimation).

En ce qui concerne les grandes catégories de marchandises, la situation est assez homogène (variation des trois derniers mois disponibles par rapport aux trois mois précédents):

- Industrie des biens intermédiaires: EUR12 +0,2 %, USA +1,1 %, Japon -2,8 %
- Industrie des biens d'investissement: EUR12 -1,3 %, USA +2,2 %, Japon -4,1 %
- Industrie des biens de consommation: EUR12 -0,5 %, USA +1,1 %, Japon -3,0 %

La situation dans les Etats membres se résume ainsi: la production baisse ou stagne partout. Les taux de variation correspondants ont évolué comme suit: Italie 0,9 %, Luxembourg 0,6 %, Royaume Uni 0,3 %, Portugal 0,3 %, Danemark -0,9 %, Pays-Bas -1,5 %, Belgique: -1,9 %, Irlande -2,0 %, France -2,1 %, Espagne -2,8 %, Grèce -3,8 %, Allemagne (Ouest) -4,5 %.

Dans la Communauté européenne, les taux d'augmentation des prix à la production sont toujours très variables. En général, la pression sur les prix exercée par les producteurs est faible et on assiste même à une baisse des prix à la production dans la moitié des Etats membres. Pour l'ensemble du secteur industriel, les derniers taux de variation disponibles par rapport à la valeur de l'année dernière ont évolué comme suit: EUR12 1,6 %, Grèce 13,1 %, Royaume-Uni 3,6 %, Italie 3,4 %, Irlande 2,1 %, Espagne 1,6 %, Allemagne (Ouest) 0,1 %, France -0,4 %, Danemark -0,9 %, Belgique -1,0 %, Pays-Bas -1,1 % et Luxembourg -3,2 %.

## BALANCE DES PAIEMENTS – tendances mondiales – chiffres préliminaires pour le quatrième trimestre de 1992:

Amélioration de 2 mrd d'écus de la balance courante communautaire par rapport au quatrième trimestre de 1991: la balance accuse un déficit de 4,8 mrd d'écus. La balance courante américaine enregistre un déficit de 18,8 mrd d'écus correspondant à une détérioration de 11,4 mrd d'écus. La balance courante japonaise s'améliore de 6,5 mrd pour atteindre un excédent de 26 mrd d'écus.

Au quatrième trimestre de 1992, selon les chiffres préliminaires, la balance courante communautaire atteindrait un déficit de 4,8 mrd d'écus soit une amélioration de 2 mrd par rapport au quatrième trimestre de 1991. Le déficit des invisibles accuserait une très légère baisse de 0,2 mrd d'écus pour atteindre -7 mrd d'écus. Le solde des marchandises serait en amélioration de 2,1 mrd d'écus et atteindrait ainsi 2,2 mrd d'écus redevenant positif après 3 trimestres de déficit. On notera l'aggravation du déficit de l'Allemagne et du Royaume-Uni de respectivement -2,5 mrd et -1,8 mrd d'écus. La France enregistre un excédent de 2,7 mrd d'écus en augmentation de 2,9 mrd. L'Espagne voit son déficit diminuer de 2 mrd pour atteindre 2 mrd d'écus. Ces variations sur le solde courant sont dues principalement aux variations sur le solde des marchandises: France +1,4 mrd, Espagne +1,7 mrd, Allemagne -1,7 mrd, Royaume-Uni -1,6 mrd. Au niveau des invisibles, seule la France enregistre une variation notable de +1,5 mrd.

Aux Etats-Unis, le solde courant atteint un déficit de 18,8 mrd d'écus au quatrième trimestre de 1992 (USD 23,9 mrd) à comparer aux 7,4 mrd d'écus au cours du même trimestre de 1991 (USD 9,3 mrd). Le déficit commercial atteint 23,1 mrd d'écus (USD 29,2 mrd) après 17,4 mrd d'écus (USD 21,8 mrd), l'excédent des invisibles accuse une baisse de 5,8 mrd d'écus pour tomber à 4,2 mrd d'écus (USD 5,4 mrd). Cette baisse est surtout imputable aux postes revenus des investissements pour 1,3 mrd d'écus et transferts unilatéraux officiels pour 4,4 mrd d'écus.

Au quatrième trimestre de 1992, selon les chiffres préliminaires, l'excédent courant japonais atteindrait 26 mrd d'écus (USD 33 mrd, YEN 4048 Mrds) après 19,4 mrd d'écus (USD 24,4 mrd, YEN 3961 mrd) pour la même période de 1991. L'excédent commercial se serait amélioré de 3,1 mrd d'écus pour atteindre 28 mrd d'écus (USD 35,5 mrd, YEN 4369 mrd) après avoir stagné pendant cinq trimestres autour de 25 mrd d'écus. Le déficit des invisibles atteindrait 2,2 mrd d'écus (USD 2,8 mrd, YEN 343 mrd) en baisse de 3,4 mrd d'écus. Au cours de ce trimestre, les réserves du Japon auraient enregistré une hausse de 0,3 mrd d'écus (USD 0,5 mrd, YEN 59 mrd).

## COMMERCE EXTERIEUR – Résultats de février 1993.

Pour les deux premiers mois de l'année 1993 le déficit extra-communautaire est de -9,6 Mrds d'écus, il se relève de 4,6 Mrds d'écus par rapport à la même période en 1992. Les importations extra-communautaires observent un recul prononcé (-6,5 %), tandis que les exportations stagnent (-1,1 %).

Le déficit commercial des Etats-Unis, cumulé pour les deux premiers mois de 1993 (-12,8 Mrds d'écus) se creuse de près de 4 Mrds d'écus par rapport à la période correspondante de 1992. L'écart entre taux d'évolution des importations des Etats-Unis et des exportations est supérieur à 5 points: les flux importés aux Etats-Unis croissent de 13,2 % en écus et de 6 % en dollars, contre 7,7 % pour les exportations en termes d'écus et 0,8 % en dollars.

En janvier-février 1993 le Japon dégage un excédent commercial de 16,7 Mrds d'écus, contre 14,3 Mrds d'écus en janvier-février 1992. Les exportations japonaises sont en progrès de 6,2 % en écus, elles stagnent en dollars, mais baissent de 2 % en yens. Les importations du Japon augmentent de 1,2 % en écus, elles observent un repli de 5,3 % en dollars, et en yens.

En janvier-février 1993 l'Allemagne dégage un excédent de 2,2 Mrds d'écus pour le commerce extra-communautaire, contre un déficit de 0,4 Mrd d'écus en janvier-février 1992. Le Danemark présente un bilan cumulé positif pour les deux premiers mois de 1993 (0,3 Mrd d'écus), proche de celui de la même période de 1992. L'Irlande, l'Italie, le Portugal et la Grèce connaissent des déficits extra contenus, moins lourds qu'un demi-milliard d'écus. Le déficit extra de l'Italie s'amenuise de 1,3 Mrd d'écus par rapport aux deux premiers mois de 1992. Les soldes de l'UEBL, de l'Espagne et des Pays-Bas affichent des progrès proches du milliard d'écus entre janvier-février 1992 et 1993, mais restent déficitaires respectivement de 0,6, 1,1 et 2,4 Mrds d'écus. Le bilan des échanges extra-communautaires français se dégrade en janvier-février 1993 (-2,7 Mrds d'écus, contre -1,6 Mrd en janvier-février 1992). Les échanges du Royaume-Uni sont déficitaires de 4,1 Mrds d'écus pour les deux premiers mois de 1993. Ce bilan est alourdi de 0,3 Mrd d'écus rapporté à la même période de 1992.

## „On line“-Abfrage

Jede Zeitreihe ist durch einen neunstelligen numerischen Kode gekennzeichnet, der seinerseits in Unterkodes gegliedert ist, welche – im Falle von „Eurostatistik“ – das Land, den Sektor, die Tabelle, die Einheit und die Periodizität bezeichnen.

Die Bedeutung der einzelnen Unterkodes ist der nachstehend aufgeführten Tabelle zu entnehmen.

Land XX	Sektor XX	Tabelle XXXX	Periodizität und Einheit X
06 EUR 12* 03 EUR 10 11 D* 14 F 18 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Variablen Tabellen  XXXX vierstelliger Wert, der im Titel jeder Tabelle erscheint	0 jährlich, Angaben in Prozent 1 vierteljährlich, Angaben in Prozent 2 monatlich, Angaben in Prozent 3 jährlich, Indexangaben (1985 = 100) 4 vierteljährlich, Indexangaben (1985 = 100) 5 monatlich, Indexangaben (1985 = 100) 6 jährlich, Angaben in absoluten Werten 7 vierteljährlich, Angaben in absoluten Werten 8 monatlich, Angaben in absoluten Werten 9 Gewicht, EUR 10 = 100 bzw. EUR 12 = 100

\* Territoriale Aufteilung vor dem 3. 10. 90: 02 für EUR 12, 12 für D.

Beispiele: Will man die monatliche Arbeitslosigkeit (in absoluten Zahlen) von Frankreich gemäß Tabelle 0304 dieser Veröffentlichung erfahren, so braucht man nur den Kode 14 93 0304 8 einzugeben.

## 'On-line' consultation

Each time series is identified by a nine-digit code broken down into subcodes, which in the case of Eurostatistics, represent the country, sector, table unit and periodicity. The significance of the different subcodes may be found in the table below.

Country XX	Sector XX	Table XXXX	Periodicity and unit X
06 EUR 12* 03 EUR 10 11 D* 14 F 18 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Table by Indicator  XXXX 4-digit value quoted in the title of each table	0 annual in % 1 quarterly in % 2 monthly in % 3 annual index 1985 = 100 4 quarterly index 1985 = 100 5 monthly index 1985 = 100 6 annual absolute value 7 quarterly absolute value 8 monthly absolute value 9 weighting EUR 10 = 100 or EUR 12 = 100

\* data for the territorial situation before 3. 10. 90: 02 for EUR 12, 12 for D.

Consultation example: to know the monthly unemployment (absolute figures) of France as is shown in Table 0304 of this publication, the code 14 93 0304 8 should be formed.

## Mode de consultation «on-line»

Chaque série chronologique est identifiée par un code à neuf chiffres structuré en sous-codes représentant, dans le cas d'Eurostatistiques, le pays, le secteur, le tableau, l'unité et la périodicité. On trouvera dans le tableau ci-dessous la signification des différents sous-codes.

Pays XX	Secteur XX	Tableau XXXX	Périodicité et unité X
06 EUR 12* 03 EUR 10 11 D* 14 F 18 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Tableaux par variable  XXXX valeur à 4 chiffres figurant dans le titre de chaque tableau	0 annuelle exprimée en pourcentage 1 trimestrielle exprimée en pourcentage 2 mensuelle exprimée en pourcentage 3 annuelle exprimée en indice 1985 = 100 4 trimestrielle exprimée en indice 1985 = 100 5 mensuelle exprimée en indice 1985 = 100 6 annuelle exprimée en valeur absolue 7 trimestrielle exprimée en valeur absolue 8 mensuelle exprimée en valeur absolue 9 pondération EUR 10 = 100 ou EUR 12 = 100

\* données pour la situation territoriale avant le 3. 10. 90: 02 pour EUR 12, 12 pour D.

Exemple de consultation: pour connaître le chômage mensuel (chiffres absolus) de la France, tel qu'il figure au tableau 0304 de cette publication, il suffit d'appeler le code 14 93 0304 8;
