*Printed in the FR of Germany*

Mit der monatlich erscheinenden Veröffentlichung *Eurostatistik - Daten zur Konjunkturanalyse* werden innerhalb kürzester Frist die neuesten statistischen Daten über die Europäische Gemeinschaft als Ganzes (EUR12), über jedes Mitgliedsland sowie über die Vereinigten Staaten und Japan bekanntgegeben.

*Eurostatistik* enthält nicht die Gesamtheit des bei Eurostat verfügbaren statistischen Materials, sondern eine Auswahl der relevantesten Reihen über die konjunkturelle Entwicklung.

Schnelligkeit und Pünktlichkeit sind die wichtigsten Vorzüge dieser Veröffentlichung.

Aus diesem Grunde wurde sie im Umfang bewußt klein gehalten und enthält keine Anmerkungen zur Methodik, die im übrigen in den spezialisierten Veröffentlichungen von Eurostat zu finden sind.

Die in *Eurostatistik* veröffentlichten Daten stammen aus dem ICG -Bereich der On-line-Datenbank Cronos von Eurostat.

Wer Zugang zu Cronos besitzt, kann jederzeit die Tabellen dieser Veröffentlichung abfragen, wobei die Daten täglich auf den neuesten Stand gebracht werden (Hinweise zur On-line -Benutzung finden sich auf der letzten Seite). Darüber hinaus sind die Daten in der Datenbank Eurocron verfügbar, die vom Host Eurobases der Kommission angeboten wird.

## EUROSTATISTIK : kurz notiert

Soweit nicht anders angegeben, beziehen sich die Angaben auf den Gebietsstand der Bundesrepublik Deutschland vor dem 03.10.1990; sie schließen Berlin (West) ein.

### WECHSELKURSE: Nach Zinssenkungen Beruhigung an den Devisenmärkten

Nachdem Ende Oktober verschiedene Zinssenkungen vorgenommen wurden, hat sich der Handel mit den am Wechselkursmechanismus teilnehmenden Währungen in den letzten Wochen etwas beruhigt. Die Bundesbank nahm am 22. Oktober sowohl den Diskontsatz als auch den Lombardsatz um jeweils einen halben Prozentpunkt zurück. Diesem Beispiel folgten kurz darauf die Zentralbanken aller am Wechselkursmechanismus teilnehmenden Länder. In zwei Fällen war dies die erste Senkung der betreffenden Zinssätze seit Juli. So senkte die Banque de France ihren Zinssatz für Wertpapierpensionsgeschäfte im Wege des Tenderverfahrens, der die Untergrenze für die Geldmarktsätze angibt, von 6,75 % auf 6,45 %, und die irische Zentralbank nahm ihren kurzfristigen Ausleihesatz, der das wichtigste geldpolitische Instrument in Irland ist, von 7,5 % auf 7 % zurück. Sowohl der französische Franc als auch das irische Pfund reagierten positiv auf diese Zinssenkungen. Der französische Franc näherte sich Ende November seinem früheren unteren Interventionspunkt im Wechselkursmechanismus und wurde am 29. November gegenüber der D-Mark zu 3,457 FF gehandelt, und das irische Pfund hat beinahe den gesamten Boden zurückgewonnen, den es im August gegenüber der D-Mark verloren hatte.

Im Feld dieser spürbaren Beruhigung war es Mitte Oktober, als vor allem der belgische Franc unter Druck geriet und gegenüber der D-Mark einen neuen Tiefstand erreichte, zu weiteren Spannungen auf den Devisenmärkten gekommen. Der Druck ließ etwas nach, nachdem die belgische Zentralbank am 22. Oktober und erneut Mitte November ihre Zinsen senkte. Der belgische Diskontsatz hat nunmehr mit 5,5 % seinen tiefsten Stand seit Juni 1978 erreicht.

Die dänische Krone hat seit Anfang September gegenüber der D-Mark kontinuierlich an Wert gewonnen. Am 22. Oktober senkte die dänische Zentralbank ihre Leitzinsen um 0,5 %, und am 4. und 16. November jeweils um 0,25 %. Der dänische Diskontsatz liegt nunmehr bei 6,75 % und hat damit seinen tiefsten Stand seit Jahren erreicht.

Sowohl die spanische als auch die portugiesische Zentralbank nahmen im Oktober ihre Zinssätze zurück, während sich die Währungen beider Länder seit Ende August gegenüber der D-Mark recht gut behaupten konnten.

Auch in Griechenland, Italien und dem Vereinigten Königreich waren die Zinsen rückläufig. In Griechenland wurden am 26. Oktober der Diskontsatz und der Lombardsatz um jeweils 0,5 % zurückgenommen; sie liegen derzeit bei 21,5 % bzw. 25,5 %. Die griechische Drachme, die gegenüber der D-Mark in diesem Jahr überwiegend an Wert verloren hat, festigte sich seit Ende Oktober wieder etwas. Dagegen entwickelte sich der Kurs der italienischen Währung in den letzten Wochen uneinheitlich. Zwar verbesserte sich die Position der Lira Mitte Oktober ungefähr zeitgleich mit der Senkung des italienischen Diskontsatzes um 0,5 %, seither ist jedoch wieder eine leichte Abschwächung festzustellen. Am 23. November wurden im Vereinigten Königreich die Basisausleihesätze der britischen Banken von 6 % auf 5,5 % zurückgenommen. Dies war die erste Zinssenkung seit Januar.

Nach einem Wertverlust in der ersten Oktoberhälfte erholte sich der US-Dollar Ende Oktober und im November erneut. Ende November lag der Kurs der amerikanischen Währung bei 1,70 DM für 1 USD und damit um 10 Pfennige über dem Mitte Oktober verzeichneten Stand. Gegenüber dem Yen wurde der US-Dollar fast den ganzen November hindurch zu 108 Y gehandelt.

### RENDITEN VON STAALSANLEIHEN: Weiterhin rückläufige Renditen

In mehreren Ländern waren die Renditen von Staatsanleihen im Oktober rückläufig. Der stärkste Rückgang war in Italien zu verzeichnen, wo die Renditen seit Ende 1992 um gut 5 % gefallen sind. Die spanischen Renditen sind beinahe im gleichen Maß zurückgegangen, womit die Renditen von Staatsanleihen in diesen beiden Ländern gegenwärtig einen historischen Tiefstand erreicht haben oder nicht weit davon entfernt sind.

In Deutschland fielen die Renditen im Oktober zum ersten Mal seit November 1988 auf unter 6 %; mit 5,8 % sind die deutschen Renditen die niedrigsten der Gemeinschaft und liegen gegenwärtig etwas unter den US-amerikanischen Renditen. Die kurzfristigen Zinsen liegen in Deutschland allerdings um mehr als 3 % über denjenigen in den Vereinigten Staaten, so daß die deutsche Zinsertragskurve relativ flach verläuft, wohingegen die der Vereinigten Staaten eine positive Steigung aufweist. In Japan werden gegenwärtig Anleiherrenditen von unter 4 % verzeichnet, gegenüber kurzfristigen Zinssätzen von 2,5 %.

### GELDVOLUMEN: Langsameres Geldmengenwachstum in Deutschland

Die M3-Zuwachsrate in Deutschland betrug im September, auf Jahresbasis umgerechnet, 6,6 % und erreichte damit nach einer Wachstumsrate von 7,8 % im August ihren niedrigsten Stand seit vielen Monaten. Damit nähert sich das Geldmengenwachstum dem für 1993 angestrebten Zielkorridor von 4,5 %-6,5 %.

In Italien hat sich das Geldmengenwachstum dagegen weiter beschleunigt. Mit 8,8 % lag die auf ein Jahr umgerechnete M2-Zuwachsrate im September oberhalb der angestrebten 5 %-7 %. Auch in Spanien weitet sich die Geldmenge schneller aus. Im August betrug das Wachstum der Geldmenge ALP auf Jahresbasis umgerechnet 9,4 % und erhöhte sich damit im vierten Monat hintereinander. Die Obergrenze des vom Banco de Espana festgelegten ALP-Zielkorridors liegt bei 7,5 %.

Im Vereinigten Königreich hat sich das Wachstum des Geldmengenaggregats M4 in den letzten Monaten ebenfalls beschleunigt. Mit 3,9 % wurde im September die höchste, auf ein Jahr umgerechnete Wachstumsrate seit Oktober 1992 verzeichnet; sie liegt knapp unterhalb der von den Behörden des Vereinigten Königreichs für die Geldmenge M4 vorgegebenen Zielwerte von 3 %-9 %.

Dagegen weitet sich die irische Geldmenge mit einer jährlichen M3-Zuwachsrate von 30 % weiterhin extrem schnell aus. Dies läßt sich jedoch durch eine Mittelumschichtung zugunsten von Anlageformen erklären, die in den Geldmengenaggregaten enthalten sind, sowie durch die Rückführung von offiziell im Ausland angelegten Geldern. Deshalb werden diese hohen Zuwachsrate nicht als inflationär angesehen.

### AMTLICHE WÄHRUNGSRESERVEN: Im September Umkehr des im August in Deutschland verzeichneten Anstiegs der Währungsreserven

Der starke Anstieg der deutschen Währungsreserven im August, über den im vergangenen Monat an dieser Stelle berichtet wurde, kehrte sich im September in einen Rückgang der Reserven um knapp 20 % um. Die deutschen Währungsreserven belaufen sich derzeit auf

beinahe 73 Mrd. ECU. Sie liegen damit zwar immer noch erheblich über den Werten der übrigen EG-Mitgliedstaaten, jedoch unter ihrem Vorjahresniveau.

Demgegenüber konnten die Niederlande, die ebenfalls im August einen Anstieg ihrer Währungsreserven zu verzeichnen hatten, dieses höhere Niveau im September aufrechterhalten. Die amtlichen Währungsreserven der Niederlande erhöhten sich in den ersten neun Monaten des Jahres 1993 um gut 50 % und liegen derzeit bei knapp 28 Mrd. ECU. Die italienischen Währungsreserven erhöhten sich im September um fast 15 % und belaufen sich gegenwärtig auf rund 26 Mrd. ECU. Damit sind sie zwar höher als vor Jahresfrist auf dem Höhepunkt der Wechselkursturbulenzen, liegen aber immer noch erheblich unter dem Stand von Anfang 1992.

### VIERTELJÄHRLICHE GESAMTRECHNUNGEN: Zweites Quartal 1993: Schwaches Wirtschaftswachstum in der Gemeinschaft (BIP +0,3%); leichtes Nachlassen der Inflation (+0,6%).

Im zweiten Quartal 1993 war die Wirtschaft der Gemeinschaft insgesamt durch eine wenngleich schwache Zunahme der Produktion (BIP +0,3%) gekennzeichnet. Allerdings ist dieses Ergebnis nach zwei Quartalen negativer Entwicklung mit großer Vorsicht zu interpretieren, denn das auf vierteljährlicher Ebene verzeichnete leichte Wirtschaftswachstum dürfte eher die Folge einer Konsolidierung der vorangegangenen Situation sein als ein echtes Signal für eine Erholung. Dies wird deutlich, wenn man die Entwicklung der Wirtschaftstendenzen analysiert, wo ein erneuter Wachstumsrückgang festzustellen ist (BIP -0,4%). Diese Ergebnisse dürften darauf hinweisen, daß für die Wirtschaft der Gemeinschaft kurzfristig nicht mit einer Tendenzzumkehr zu rechnen ist. Im übrigen bestätigen sowohl die wichtigsten Wirtschaftsindikatoren als auch die neuen Prognosen der GD II, daß ein Aufschwung im Jahre 1993 unrealistisch sein dürfte. Überdies sind die Anzeichen für eine Erholung der amerikanischen Wirtschaft stets widersprüchlich und geben keine konkreten Anhaltspunkte dafür, daß die Volkswirtschaft dieses großen Landes in der Lage wäre, zum Motor für eine Erholung der Weltwirtschaft zu werden. Ein solcher Aufschwung hängt in erster Linie von drei aufs engste miteinander verknüpften Faktoren ab: positive Entwicklung der GATT-Verhandlungen, Wiederbelebung der Inlandsnachfrage, vor allem nach Gütern des letzten Verbrauchs, Abbau der staatlichen Defizite in allen Ländern. Für die Gemeinschaft ist darüber hinaus ein Abbau der monetären Spannungen erforderlich, die noch immer innerhalb des EWS herrschen. Und schließlich ist darauf hinzuweisen, daß die von den meisten Mitgliedstaaten während des Jahres geführte Zinspolitik, die bereits zu einem deutlichen Nachgeben der Zinssätze geführt hat, bislang ohne größere Auswirkungen auf die Realwirtschaft geblieben ist.

Was die anhand des impliziten BIP-Deflators gemessene Preisentwicklung betrifft, so ist ein leichter Rückgang sowohl der vierteljährlichen als auch der jährlichen Inflationsrate festzustellen (+0,6 % bzw. +2,8 %).

Bei den Bestandteilen des BIP muß auf den fünften aufeinanderfolgenden Rückgang der Investitionstätigkeit (-1,3 %) hingewiesen werden. Der private Verbrauch ebenso wie der Staatsverbrauch wiesen hingegen einen leichten Anstieg aus (-0,4 % bzw. -0,5 %).

Was die Situation in den einzelnen Mitgliedstaaten angeht, so ist in allen Ländern eine Zunahme des Wirtschaftswachstums festzustellen, mit Ausnahme von Dänemark, wo ein erneuter Rückgang zu verzeichnen ist (BIP -1,1 %). Am stärksten fiel die Zunahme in Italien aus (BIP +0,8 %), am schwächsten war die Entwicklung in Frankreich und in den Niederlanden (BIP +0,3 %). Was die Niederlande betrifft, so liegt bereits eine BIP-Schätzung für das dritte Quartal vor, die die Zunahme bestätigt (+0,7 %).

In den Vereinigten Staaten, für die die bereits Daten für das dritte Quartal 1993 vorliegen, ist eine leichte Beschleunigung des Wirtschaftswachstums (BIP +0,7 %) festzustellen. Gleichzeitig ging die vierteljährige Inflationsrate erneut zurück (+0,4 %), während die jährliche Inflationsrate leicht anstieg (+2,7 %). Bei den Komponenten des BIP ist auf die positive Entwicklung des privaten Verbrauchs (+1,0 %) und der Investitionen (+1,8 %) hinzuweisen; der Staatsverbrauch dagegen war erneut rückläufig (-0,3 %).

In Japan lassen die Zahlen für das zweite Quartal 1993 einen Rückgang des Wirtschaftswachstums (BIP -0,5 %) erkennen. Gleichzeitig stieg die vierteljährige Inflationsrate (+0,7 %), während bei der jährlichen Inflationsrate eine deutliche Verringerung festzustellen war (+0,7 %). Von den Komponenten der Inlandsnachfrage ist die Abschwächung der Investitionstätigkeit (-0,3 %) und vor allem des privaten Verbrauchs (-0,6 %) hervorzuheben.

### PREISE : Die Jahresinflation blieb unverändert bei 3,3% im Oktober 6 Mitgliedstaaten erfüllen die Konvergenzkriterien

Die Jahresinflationsrate der EG gemessen mit dem Verbraucherpreisindex, blieb unverändert bei 3,3 % zwischen September und Oktober, womit die Stabilität der Inflation bestätigt wird: seit Anfang dieses Jahres lagen die Inflationsraten dauernd zwischen 3,6 % und 3,3 %.

In aufsteigender Reihenfolge geordnet nach der derzeitigen Inflation sind die Raten der einzelnen Mitgliedstaaten für die nachstehenden Zeiträume wie folgt:

	OKT. '93 OKT. '92	OKT. '92 OKT. '91	OKT. '93 OKT. '92	OKT. '92 OKT. '91
Irland**	1,3 %	2,8 %	Luxemburg	3,5 %
Ver. Königreich	1,4 %	3,6 %	Deutschland*	3,9 %
Dänemark	1,5 %	1,6 %	Spanien	4,6 %
Niederlande	1,8 %	3,3 %	Italien	4,6 %p
Frankreich	2,2 %p	1,9 %	Portugal	6,3 %
Belgien	2,7 %	2,2 %	Griechenland	12,3 %
				15,9 %

\* Der Verbraucherpreisindex der Bundesrepublik Deutschland bezieht sich weiterhin auf den Gebietsstand vor dem 3. Oktober 1990

\*\* August-Zahlen

p = Vorläufig

Der Vertrag über die Europäische Union, der am 1.11.1993 in Kraft trat, sieht als eines der Kriterien der wirtschaftlichen Konvergenz vor, dass die Inflationsraten der Mitgliedstaaten nicht mehr als 1,5 Prozentpunkte über den Durchschnitt der drei Länder mit der niedrigsten Inflation liegen dürfen.

Im Oktober 1993 erfüllten Irland, das Vereinigte Königreich, Dänemark, die Niederlande, Frankreich und Belgien diese Bedingung (der Durchschnitt der drei niedrigsten Raten war 1,4 %, so daß diese Grenze bei 2,9 % lag). Diese Zahlen beziehen sich auf die nationalen Verbraucherpreisindizes, deren Berechnungsmethoden noch nicht harmonisiert sind.

Unter den Beitrittskandidaten erfüllen zur Zeit nur Finnland (1,6 %) und Norwegen (2,0 %) diese Voraussetzung, während die Inflationen für Österreich (3,4% im September) und Schweden ausserhalb dieser Grenzen liegen.

Die Jahresinflation der Vereinigten Staaten und Japans betrug im Oktober 2,8% bzw. 1,3 %.

Der Monatsindex für die Gemeinschaft stieg zwischen September und Oktober wie im Vormonat um 0,3 %.

Ein starke Preissteigerung war in Griechenland (1,9 %) zu verzeichnen; Italien (0,7 %) und Portugal (0,6 %) verzeichneten ebenfalls erhebliche Steigerungen ihrer Indizes. In den übrigen Mitgliedstaaten war der Preisanstieg niedrig bis gemässigt: 0,1 % in Belgien, 0,2 % in Deutschland, Frankreich und den Niederlanden, 0,3 % in Dänemark und Luxemburg, 0,4 % in Spanien, während der Index im Vereinigten Königreich um 0,1 % zurückging.

#### INDUSTRIEPRODUKTION: Keine Erholung im Sommer 1993

Im Industriesektor der europäischen Gemeinschaft fällt die Produktion weiterhin, eine Stabilisierung ist nicht in Sicht, wobei diese Diagnose insbesondere für die Investitionsgüterindustrie gilt.

Für die Europäische Gemeinschaft (EUR12) betrug die Veränderungsrate des arbeitstäglich bereinigten Produktionsindex der Industrie gegenüber dem Wert des gleichen Monats ein Jahr zuvor im August 1993 -2,3 %, im Juli waren es -4,3 %. Für die Investitionsgüterindustrie beträgt die entsprechende Veränderungsrate im August -5,5 %.

Betrachtet man die letzten drei verfügbaren Monate Juni bis August 1993, so beläuft sich für EUR12 die Veränderungsrate des saisonbereinigten Produktionsindex gegenüber den drei davor liegenden Monaten März bis Mai auf -0,4 %.

In Japan ist die Rezession noch stärker ausgeprägt, hier beträgt die entsprechende Veränderungsrate -0,7 % (geschätzt). In den USA ist mit +0,5 % auch kein markanter Aufschwung zu verzeichnen.

Für die einzelnen Mitgliedstaaten der EG ergeben sich für die saisonbereinigte Industrieproduktion folgende Veränderungsraten der letzten drei Monate gegenüber den Vormonaten: Dänemark +4,6 %, Griechenland +1,5 %, Spanien +1,6 %, Vereinigtes Königreich +1,1 %, Niederlande 0,0 %, Deutschland -0,3 %, Frankreich -0,6 %, Italien -1,2 %, Irland -2,3 % (geschätzt), Belgien -3,6 % (geschätzt). Demnach sank auch in den Sommermonaten in vielen Mitgliedstaaten die Produktion oder sie stagnierte bei geringen positiven Änderungsraten.

In den einzelnen Branchen der EG-Industrie sank die Produktion besonders in der Erzeugung von Metallen [NACE 22], der Herstellung von Metallwaren [NACE 31], der Automobilindustrie [NACE 35] und der Textilindustrie [NACE 43].

#### AUSSENHANDEL

Das Defizit des Handels der Gemeinschaft mit Drittländern belief sich in den ersten fünf Monaten des Jahres 1993 auf 14,8 Mrd. ECU, gegenüber 31,3 Mrd. ECU im gleichen Vorjahreszeitraum. Die Entwicklungsrate der Ausfuhren von Januar bis Mai 1993 verglichen mit der entsprechenden Vorjahresperiode lag um 9 Prozentpunkte über derjenigen der Einfuhren. Die Einfuhren der Gemeinschaft aus Drittländern gingen um 4,7 % zurück, während die Ausfuhren gegenüber den ersten fünf Monaten des Vorjahrs um fast 4 % anstiegen.

Das Handelsbilanzdefizit der Vereinigten Staaten verdoppelte sich gegenüber dem Zeitraum Januar bis Mai 1992 auf 49,1 %. Die Einfuhren der Vereinigten Staaten verzeichneten in den ersten fünf Monaten des Jahres 1993 in Ecu ausgedrückt mit 15,4 % einen leichten Anstieg, in Dollar ausgedrückt fiel das Wachstum mit 10,2 % etwas geringer aus. Die Ausfuhren der Vereinigten Staaten entwickelten sich langsamer als die Einfuhren: +9,2 % in Ecu und +4,3 % in Dollar.

Der kumulierte Überschuss des japanischen Außenhandels belief sich in den ersten fünf Monaten des Jahres 1993 auf 42,4 Mrd. ECU und war damit um 7,7 Mrd. ECU höher als im gleichen Vorjahreszeitraum. In Ecu ausgedrückt nahmen die japanischen Ausfuhren mit einem Plus von 11,4 % kräftig zu, während der Anstieg in Dollar mit 6,3 % etwas bescheidener ausfiel. Der starke Zuwachs in Ecu ist auf den Wechselkurs des Yen gegenüber dem Ecu zurückzuführen; in Yen ausgedrückt gingen die Ausfuhren um 3,2 % zurück. Die Einfuhren Japans nahmen in Ecu um 6,5 % und in Dollar um 1,7 % zu, während sie sich in Yen um 7,1 % abschwächten.

Der Extra-EG-Handel Deutschlands schloß in den ersten fünf Monaten des Jahres 1993 mit einem Defizit von 6,2 Mrd. ECU ab, das sind 4,8 Mrd. ECU mehr als im gleichen Zeitraum des Jahres 1992. Italien erzielte von Januar bis Mai 1993 einen Überschuss von 1,4 Mrd. ECU, während im gleichen Vorjahreszeitraum ein Defizit von 3 Mrd. ECU zu verzeichnen war. Die Handelsbilanz Irlands war in den ersten fünf Monaten des Jahres 1993 beinahe ausgeglichen. Der Extra-EG-Handel Portugals und der BLWU schloß mit einem Defizit von jeweils knapp 1 Mrd. ECU ab, was im Falle der BLWU einer Verbesserung um 2,3 Mrd. ECU gegenüber den ersten fünf Monaten des Vorjahrs entspricht. Frankreich und Griechenland verbuchten im außergemeinschaftlichen Handel jeweils ein Defizit von 1,6 Mrd. ECU und blieben damit in etwa auf dem Niveau des entsprechenden Vorjahreszeitraums. Trotz einer Verbesserung um 3,3 Mrd. ECU schloß der außergemeinschaftliche Handel Spaniens von Januar bis Mai 1993 mit einem Defizit von 2,4 Mrd. ECU ab. Das Handelsbilanzdefizit der Niederlande belief sich auf 6 Mrd. ECU, gegenüber fast 8 Mrd. ECU in den ersten fünf Monaten des Jahres 1992. Den größten Negativsaldo in den ersten fünf Monaten des Jahres 1993 verzeichnete das Vereinigte Königreich mit 9,5 Mrd. ECU und erzielte damit in etwa das gleiche Ergebnis wie im gleichen Zeitraum des Vorjahrs.

*Eurostatistics - data for short-term economic analysis* is a monthly publication aimed at providing, as rapidly as possible, the latest statistical data on the European Community as a whole (EUR 12), each Member State, the United States and Japan.

*Eurostatistics* does not present all the statistics held by Eurostat, but a selection of the most relevant series on the economic situation.

Speed of publication and punctuality are the main features of this publication; that is why it is deliberately streamlined and does not contain any methodological notes, which are given in Eurostat's specialized publications.

The data published in *Eurostatistics* are taken from the ICG domain of Eurostat's on-line database, Cronos (the notes regarding on-line consultation may be found at the end of this publication). They are also available via the Commission host Eurobases in the Eurocron database.

Further information on *Eurostatistics* can be obtained from the following addresses:

Unless otherwise stated, data for the Federal Republic of Germany, including West Berlin, as constituted prior to 3 October 1990.

#### **EXCHANGE RATES: Calmer period in foreign exchange markets following interest rate reductions**

There has been less turbulence in trading in ERM currencies in recent weeks following various interest rate reductions in late October. The Bundesbank reduced both its discount and Lombard rates by half a percentage point on October 22, a move which was followed by all other ERM central banks in the following days. In two cases these were the first reductions in certain key rates since July: the Banque de France reduced the auction rate, which sets the floor for money market rates, from 6.75 to 6.45%, and the Irish short-term facility rate, which is the Irish central bank's main monetary policy instrument, was reduced from 7.5 to 7%. Both the French franc and the Irish punt reacted positively to these cuts: by the end of November the franc was approaching its former ERM floor, closing at FF 3,457 against the Deutschemark on November 29. The punt has regained almost all of the ground it lost against the Deutschemark during August.

This apparent calm has appeared after further exchange rate market tensions became evident in the middle of October, when the Belgian franc in particular came under pressure, touching new lows against the Deutschemark. These pressures subsided somewhat after the Belgian central bank reduced its interest rates on October 22 and again in mid-November. At 5.5%, the Belgian discount rate now stands at its lowest level since June 1978. The Danish krone has appreciated steadily against the DM since early September. The Danish central bank reduced its headline interest rates on October 22 by 0.5%, and on November 4 and November 16 by 0.25%. The discount rate now stands at 6.75%, its lowest level for some years.

Both the Spanish and the Portuguese central banks reduced interest rates in October; both currencies have remained fairly stable against the Deutschemark since the end of August.

Interest rates have also fallen in Greece, Italy and the UK. In Greece, both the discount and Lombard rates were reduced by 0.5% on October 26, to stand at 21.5 and 25.5% respectively. The drachma has depreciated against the Deutschemark for much of this year, although since the end of October it has been slightly stronger. The Italian lire has had a mixed performance in recent weeks: it strengthened in mid October around the time of a half point cut in the Italian discount rate, but has since weakened slightly. In the UK, the first cut in interest rates since January occurred on November 23, when bank base rates were reduced from 6 to 5.5%.

After weakening in the first half of October, the US dollar appreciated once again in late October and November. In late November it stood at just over DM1.70, around 10 pfennigs higher than in mid October. Against the Japanese yen it traded at around 108 for much of November.

#### **GOVERNMENT BOND YIELDS: Yields continue to fall**

The yield on government bonds fell in several countries in October. The largest fall occurred in Italy, where yields have fallen by over 5% since the end of 1992. Yields in Spain have fallen by almost as much; in both countries the yield on government bonds currently stands at or close to all-time lows.

In Germany, yields fell below 6% in October for the first time since November 1988; at 5.8% they remain the lowest in the EC and are currently slightly lower than those of the United States. It should be noted however that overnight interest rates in Germany are over 3% higher than those in the US: the German yield curve is fairly flat, whereas that of the US is positively sloped. In Japan, bond yields are currently less than 4%, as compared to overnight rates of 2.5%.

#### **MONEY SUPPLY: German monetary growth slows**

The annualised growth rate of German M3 in September was 6.6%, its lowest growth rate for many months, down from 7.8% in August. Monetary growth is thus approaching its target range of 4.5-6.5% for 1993.

By contrast, monetary growth in Italy continues to quicken: M2 growth in the 12 months to September was 8.8%, above the upper limit of its target range of 5-7%. In Spain monetary growth is also accelerating: the annualised growth rate of ALP in August was 9.4%, the fourth successive month of increase. The upper limit of the Banco de Espana's target range for ALP growth is 7.5%.

In the United Kingdom growth in the aggregate M4 has been edging up in recent months: in September the annualised growth rate was 3.9%, the highest since October 1992. This is just inside the UK authorities' monitoring range for M4 of 3-9%.

In Ireland monetary growth remains extremely high, with M3 growing at a rate of over 30% annually. This can be explained however by the reallocation of financial assets in favour of items included in monetary aggregates, and by the repatriation of deposits formally held outside Ireland. For this reason, such high growth rates are not regarded as being inflationary.

#### **FOREIGN OFFICIAL RESERVES: reversal of August inflows into Germany in September**

The large inflow of foreign official reserves into Germany in August which was commented on here last month was reversed in September, with Germany experiencing a fall of almost 20% in its reserves. They now stand at just under 73 thousand million ecu, which, although far larger than any other EC country, is less than their level of a year ago.

However, the Netherlands, the other country which experienced an inflow of reserves in August, maintained this higher level in September. The Netherlands foreign official reserves increased by over 50% in the first nine months of 1993 and now stand at almost 28 thousand million ecu.

Italy experienced an inflow of reserves in September of almost 15%. Its reserves now stand at around 26 thousand million ecu, higher than 12 months ago at the peak of the period of exchange rate turbulence, but significantly lower than their level at the beginning of 1992.

#### **QUARTERLY ACCOUNTS: Slight growth in the Community economy (GDP +0.3%) and slight reduction in inflation (+0.6%) during the second quarter of 1993**

For the Community economy as a whole, the second quarter of 1993 was marked by growth, albeit very slight, in production (GDP +0.3%). This result has to be viewed with

caution after two quarters of negative growth. The slight growth recorded during the quarterly period seems to indicate consolidation of the previous situation rather than any genuine recovery. This becomes clear when trends in the economy are analysed and it can be seen that there has been a further reduction in economic growth (GDP -0.4%). These figures seem to show that any change in trend for the Community economy is unlikely in the short term. Furthermore, the major economic indicators, together with the new forecasts by DG II, confirm that it is unrealistic to think in terms of an economic recovery during 1993. In addition, the signs of recovery in the United States are still contradictory and do not suggest that the economy of this major power can lead any recovery of the world economy. Recovery is linked to three factors which are closely interrelated: the positive outcome of the GATT talks, a revival of domestic demand (especially for final consumption goods) and a reduction in the primary government deficit in every country. In the case of the Community, these must also be accompanied by an easing of the monetary pressures which continue to affect the EMS. Lastly, it has to be stressed that the changes in interest rates which most of the Member States have introduced during the year and which have resulted in a noticeable lowering of rates have not as yet had any significant effect on the actual economy.

Prices, measured by the implicit deflator of GDP, revealed a slight drop in the inflation rate, both quarterly (+0.6%) and annual (+2.8%).

As for the components of GDP, investment was down (-1.3%) for the fifth quarter in a row, whereas both private and public consumption showed a slight recovery (-0.4% and -0.5% respectively).

The situation in the individual Member States was marked by a general recovery in economic growth. The exception was Denmark, where there was again a downturn in GDP (-1.1%). Recovery was greater in Italy (GDP +0.8%) and less marked in France and the Netherlands (GDP +0.3%). In the case of the Netherlands, the estimated figures for the third quarter of the year confirm the trend towards recovery (+0.7%).

The figures for the third quarter in the United States are already available. There was a slight acceleration in economic growth (GDP +0.7%), together with a new drop in the quarterly inflation rate (+0.4%), although the annual figure indicated a slight upturn (+2.7%). As for the components of GDP, private consumption (+1.0%) and investment (+1.8%) went up, but government consumption was down again (-0.3%).

The second quarter brought a downturn in economic growth in Japan (GDP -0.5%). This was accompanied by a rise in the quarterly inflation rate (+0.7%), but the annual rate showed a marked reduction (+0.7%). Among the components of domestic demand, there was a downturn in investment (-0.3%) and a more marked drop in private consumption (-0.6%).

#### **PRICES : EC annual inflation unchanged at 3.3% in October 1993**

##### **6 Member States meet inflation convergence criteria**

The EC annual inflation rate as measured by the CPI remained unchanged from September at 3.3%, confirming the near stability of inflation; since the beginning of this year the annual rates for the Community as a whole have remained between 3.6% and 3.3%.

In ascending order of current inflation, the rates for the Member States over the last 12 months and those for the corresponding period of last year are as follows:

	OCT. '93	OCT. '92	OCT. '93	OCT. '92
Ireland**	1.3%	2.8%	Luxembourg	3.5%
United Kingdom	1.4%	3.6%	Germany*	3.9%
Denmark	1.5%	1.6%	Spain	4.6%
Netherlands	1.8%	3.3%	Italy	4.6% <sup>p</sup>
France	2.2% <sup>p</sup>	1.9%	Portugal	6.3%
Belgium	2.7%	2.2%	Greece	12.3%
				15.9%

\* The CPI for the Federal Republic of Germany continues to reflect borders prior to 3 October 1990.

\*\* August figures

p = Provisional

The Treaty on European Union which came into effect on 11.11.1993, requires that, as one of the criteria of economic convergence, annual inflation rates of the Member States must not exceed by more than 1.5 percentage points the average of the three lowest national rates.

On this basis for the month of October 1993, Ireland, the United Kingdom, Denmark, the Netherlands, France and Belgium fulfilled this requirement (the average of the three lowest rates was 1.4%, thus the differential should be within 2.9%). These figures are based on national consumer price indices, unadjusted for differences in compilation methods.

Of the applicant Member States at present only Finland (1.6%) and Norway (2.0%) meet these criteria, whereas inflation rates in Austria (3.4% in September) and Sweden (4.3%) are outside the limits mentioned above.

The annual rates for the United States and Japan were respectively 2.8% and 1.3% in October.

On a monthly basis the CPI for the Community rose by 0.3%, the same rise as last month.

A sharp rise was recorded in Greece (1.9%), and there were also marked increases in the indices of Italy (0.7%) and Portugal (0.6%). Increases were low to moderate in all the other Member States: Belgium 0.1%, Germany, France and the Netherlands 0.2%, Denmark and Luxembourg 0.3%, Spain 0.4%, while there was a decrease of 0.1% in the index of the United Kingdom.

#### **INDUSTRIAL PRODUCTION: No recovery in the summer of 1993**

Production continues to fall in European industry, and there is no sign of it bottoming out. This applies in particular to the capital goods industry.

The rate of change in the industrial production index, adjusted for working days, was 2.3% down for the Community (EUR12) in August 1993 over the corresponding month of the previous year; the figure for July was -4.3%. The corresponding rate of change in August for capital goods was -5.5%.

If one takes the figures for the last three available months, June to August 1993, the rate of change in the seasonally-adjusted production index for EUR12 was -0.4% compared with that of the three preceding months, March to May.

The recession is even more pronounced in Japan, where the corresponding rate of change is -0.7% (estimated). Nor is there any noticeable upswing in the USA, where the figure is +0.5%.

At Member State level, the rates of change for the last three months compared with the previous months are as follows for the seasonally-adjusted industrial production index: Denmark +4.6%, Greece +1.5%, Spain +1.6%, United Kingdom +1.1%, Netherlands 0.0%, Germany -0.3%, France -0.6%, Italy -1.2%, Ireland -2.3% (estimated), Belgium -3.6% (estimated). Production thus fell or remained at a low level with slight positive rates of change in many Member States in the summer. Industrial production fell particularly in the following sectors of EC industry: the production of metals [NACE 22], the manufacture of metal articles [NACE 31], the motor vehicle industry [NACE 35] and the textile industry [NACE 43].

#### EXTERNAL TRADE

The Community's deficit for the first five months of 1993 was ECU -14.8 billion, as against ECU 31.3 billion for the corresponding period of 1992. The rate of change for exports between January-May 1992 and January-May 1993 was 9 points higher than for imports. Extra-Community imports were down by only 4.7%, whereas exports showed a rise – almost 4% – compared with the first five months of 1992.

The US trade deficit, at ECU 49.1 billion, was twice as high as in January-May 1992. US imports rose sharply in January-May 1993 in ecu terms (15.4%), but less steeply in dollar terms at 10.2%. US exports rose more slowly than imports, at 9.2% in ecu terms and 4.3% in dollars.

Japan's cumulative surplus over the first five months of 1993 was ECU 42.4 billion, ECU 7.7 billion up on the January-May 1992 figure. Its exports were steady in ecu terms at 11.4%, but less strong in dollar terms at 6.3%. The yen-ecu parity caused the upward thrust in ecu terms: exports were 3.2% down in yen terms. Considered in ecus, Japanese imports were 6.5% higher and in dollars 1.7% higher but in yen 7.1% lower.

For the first five months of 1993, Germany's extra-Community balance was ECU 6.2 billion, 4.8 billion higher than over the same period of 1992. Italy ran an ECU 1.4 billion surplus for the reference period, as against an ECU 3 billion deficit in the corresponding period of 1992. Ireland's extra-Community trade remained evenly balanced but Portugal and the BLEU each turned in a deficit of almost ECU 1 billion. The BLEU's extra-Community balance showed an ECU 2.3 billion improvement over the equivalent period of the previous year. France and Greece each had an extra-Community trade deficit of ECU 1.6 billion, close to the 1992 levels for the same period. Spain reported an ECU 2.4 billion deficit in January-May 1993 – although this was an improvement of ECU 3.3 billion. The Netherlands' extra-Community trade was in the red to the tune of ECU 6 billion, as against nearly ECU 8 billion in the first five months of 1992. The United Kingdom had the biggest deficit for January-May 1993: ECU 9.5 billion, almost as large as for the first five months of 1992.

#### TAUX DE CHANGE: période d'acalmie sur les marchés des change à la suite des réductions de taux d'intérêt

Il y a eu moins de turbulences sur le marché des monnaies du MTC ces dernières semaines à la suite de diverses réductions de taux d'intérêt à la fin octobre. La Bundesbank a réduit ses taux d'escompte et lombard d'un demi-point de pourcentage le 22 octobre, une décision qui a été suivie par toutes les autres banques centrales du MTC les jours suivants. Dans deux cas, il s'agissait des premières réductions de certains taux clés depuis juillet: la Banque de France a réduit son taux d'appel d'offres qui fixe le plancher des taux du marché monétaire, de 6,75 à 6,45 %, et le taux de facilités de prêt à court terme irlandais, qui est l'instrument principal de politique monétaire de la banque centrale irlandaise, a été abaissé de 7,5 à 7 %. La franc français et la livre irlandaise ont réagi positivement à ces deux baisses: fin novembre, le franc se rapprochait de son précédent cours plancher MTC, clôturant à FF 3,457 contre le deutschemark le 29 novembre. La livre irlandaise a regagné presque tout le terrain perdu contre le deutschemark au mois d'août.

Ce calme apparent s'est établi après que d'autres tensions sur le marché des changes se soient produites à la mi-octobre lorsque le franc belge en particulier a été chahuté, touchant de nouveaux bas contre le deutschemark. Ces pressions se sont encore fait sentir après que la banque centrale de Belgique ait réduit ses taux d'intérêt d'abord le 22 octobre et de nouveau à la mi-novembre, 5,5 %, le taux d'escompte belge se trouve désormais à son plus bas niveau depuis juin 1978.

La couronne danoise s'est régulièrement appréciée contre le DM depuis le début de septembre. La banque centrale danoise a réduit ses taux d'intérêt directeurs de 0,5 % le 22 octobre, puis de 0,25 % les 4 et 16 novembre de 0,25 %. Le taux d'escompte s'est établi désormais à 6,75 %, son plus bas niveau depuis plusieurs années. Les banques centrales d'Espagne et du Portugal ont baissé leurs taux d'intérêt en octobre. Ces deux monnaies sont restées relativement stables contre le deutschemark depuis la fin d'août.

Tous taux d'intérêt ont également chuté en Grèce, en Italie et au RU. En Grèce, les taux d'escompte et lombard ont été réduits de 0,5 % le 26 octobre pour s'établir à 21,5 et 25,5 % respectivement. La drachme s'est dépréciée contre le deutschemark pendant la plus grande partie de l'année, bien que depuis la fin d'octobre, elle se soit légèrement raffermie. La lire italienne a affiché un parcours mitigé ces dernières semaines: elle s'est raffermie à la mi-octobre au moment où le taux d'escompte a été baissé d'un demi-point, mais s'est légèrement affaiblie depuis. Au RU, la première baisse des taux d'intérêt depuis janvier a eu lieu le 23 novembre lorsque les taux de base bancaires ont été ramené de 6 à 5,5 %.

Après une glissement dans la première moitié d'octobre, l'US dollar s'est de nouveau apprécié à la fin d'octobre et en novembre. — la fin novembre, il s'est établi juste au-dessus de DM 1,70, environ 10 pfennigs plus haut qu'à la mi-octobre. Contre le yen japonais, il s'est traité aux environs de — 108 durant la plus grande partie de novembre.

#### RENDEMENTS DES OBLIGATIONS D'ÉTAT: la chute des rendements se poursuit

Le rendement des obligations d'État a chuté dans plusieurs pays en octobre. La plus forte dégringolade a eu lieu en Italie où les rendements ont perdu plus de 5% depuis le début de 1992. Les rendements en Espagne ont au moins chuté d'autant; dans ces deux pays, le rendement des obligations d'État se situe actuellement tout près, sinon à leurs plus bas historiques.

En Allemagne, les rendements sont tombés au-dessous de 6% en octobre pour la première fois depuis novembre 1988; à 5,8 %, ils demeurent les plus bas de la CE et sont actuellement légèrement inférieurs à ceux pratiqués aux États-Unis. Il faut cependant noter que les taux d'intérêt au jour le jour en Allemagne sont de 3 % supérieurs à ceux des États-Unis: la courbe des rendements allemands est franchement plate, tandis que celle des US s'est positivement redressée. Au Japon, les rendements des obligations sont actuellement inférieurs à 4% comparés aux taux au jour le jour de 2,5 %.

#### MASSE MONÉTAIRE: La croissance monétaire se ralentit en Allemagne

Le taux de croissance annualisé de M3 en Allemagne en septembre était de 6,6 %, son taux de croissance le plus bas depuis de nombreux mois, revenant de 7,8 % en août. La croissance monétaire se rapproche ainsi de la fourchette fixée entre 4,5 et 6,5% pour 1993.

En revanche, la croissance monétaire en Italie continue de s'accélérer: la croissance de M2 au cours des douze mois s'achevant en septembre était de 8,8 % au-dessus de la limite supérieure de sa fourchette fixée entre 5 et 7 %. La croissance monétaire en Espagne s'accélère également. Le taux de croissance annualisé de ALP en août était de 9,4%, quatrième mois consécutif de hausse. La limite supérieure de la fourchette de la Banque d'Espagne pour la croissance d'ALP est de 7,5 %.

Au Royaume-Uni, la croissance de l'agrégat M4 s'est redressée au cours des derniers mois: en septembre, le taux de croissance annualisé était de 3,9 %, le plus élevé depuis octobre 1992. Ce chiffre s'inscrit parfaitement dans le couloir fixé par les autorités du RU pour M4 entre 3 et 9 %.

La croissance monétaire de l'Irlande demeure extrêmement élevée avec un M3 progressant au rythme de plus de 30 % par an. Cependant, ceci peut être expliqué par la réaffectation d'avoirs financiers en faveur de postes inclus dans les agrégats monétaires et par le rapatriement de dépôts officiellement détenus en dehors de l'Irlande. Pour cette raison, des taux de croissance aussi élevés ne sont pas considérés comme inflationnistes.

#### RÉSERVES OFFICIELLES SUR L'ÉTRANGER: les flux d'août vers l'Allemagne se sont inversés en septembre

Le fort flux de réserves officielles sur l'étranger vers l'Allemagne en août qui a fait l'objet d'un commentaire dans ce bulletin le mois dernier, s'est inversé en septembre avec une chute pour l'Allemagne de près de 20% de ses réserves. Elles s'établissent actuellement juste au-dessous de 73.000 millions d'écus, montant qui, bien que nettement plus élevé que celui de n'importe quel autre pays CE, est inférieur au niveau de l'année dernière.

Cependant, les Pays-Bas, l'autre pays ayant bénéficié d'un afflux de réserves en août, a maintenu son niveau élevé de rentrées en septembre. Les réserves officielles sur l'étranger des Pays-Bas se sont accrues de plus de 50% au cours des neuf premiers mois de 1993 et s'élèvent actuellement à près de 28.000 millions d'écus.

En Italie, les réserves en septembre se sont accrues de près de 15 %. Elles s'élèvent désormais aux environs de 26.000 millions d'écus, c'est-à-dire à un niveau plus élevé que douze mois auparavant, au plus fort de la période de turbulence des taux de change, mais nettement au-dessous du niveau atteint au début de 1992.

FR

#### COMPTES TRIMESTRIELS: Au cours du deuxième trimestre 1993: faible croissance de l'économie communautaire (PIB +0,3 %); légère réduction de l'inflation (+0,6 %)

Le deuxième trimestre 1993 a été caractérisé, pour l'économie communautaire dans son ensemble, par une croissance, même si faible de la production (PIB +0,3 %). Ce résultat, après deux trimestres négatifs, doit être considéré avec beaucoup de prudence. En effet, la légère croissance constatée en terme trimestriel semble plutôt être la conséquence d'une consolidation de la situation précédente plutôt qu'un véritable signal de reprise. Ceci devient clair si on analyse l'évolution de l'économie en termes tendanciels où on peut constater un nouveau fléchissement de la croissance économique (PIB -0,4 %). Ces résultats semblent indiquer qu'une inversion de tendance pour l'économie communautaire ne semble pas être envisageable à court terme. D'ailleurs les indicateurs économiques les plus importants, ainsi que les nouvelles prévisions de la DG II confirment qu'une reprise économique au cours de 1993 semble non réaliste. D'autre part, les signaux de reprise de l'économie américaine sont toujours contradictoires et ne permettent pas d'identifier dans l'économie de ce grand pays une capacité de guilde dans la reprise de l'économie mondiale. Cette reprise reste surtout liée à trois facteurs strictement interdépendants: les développements positifs des négociations du GATT, la reprise de la demande interne, surtout des biens de consommation finale, la réduction du déficit primaire public dans tous les pays. A ces conditions, il faut rajouter, pour la Communauté, une réduction des tensions monétaires qui continuent à caractériser le SME. Enfin il faudra souligner que la manœuvre sur les taux d'intérêt, entreprise par la plupart des Etats membres au cours de l'année et qui a déjà déterminé une baisse importante de ceux-ci, n'a pas encore eu des répercussions remarquables sur l'économie réelle.

En ce qui concerne l'évolution des prix, mesurée par le déflateur implicite du PIB, on enregistre une légère baisse de l'inflation, tant en rythme trimestriel qu'annuel (+0,6 % et +2,8 % respectivement).

En ce qui concerne les composantes du PIB, il faut souligner le cinquième fléchissement consécutif des investissements (-1,3 %). Par contre, la consommation, tant privée que publique, présente une légère reprise (-0,4 % et -0,5 % respectivement).

En ce qui concerne la situation dans les Etats membres, on observe que tous les pays sont caractérisés par une reprise de la croissance économique, sauf pour le Danemark où l'on constate un nouveau fléchissement (PIB -1,1 %). La reprise semble être plus forte en Italie (PIB +0,8%), tandis que la France et les Pays-Bas évoluent de manière plus faible (PIB +0,3%). En ce qui concerne les Pays-Bas, il faut remarquer que l'on dispose d'une estimation du PIB pour le troisième trimestre qui confirme la reprise (+0,7 %).

Aux Etats-Unis, dont on dispose des données pour le troisième trimestre 1993, on constate une légère accélération de la croissance économique (PIB +0,7%) accompagnée par une nouvelle baisse de l'inflation trimestrielle (+0,4 %), tandis qu'en rythme annuel on constate une légère reprise (+2,7 %). Parmi les composantes du PIB, il faut mettre en évidence l'évolution positive de la consommation privée (+1,0%) et des investissements (+1,8 %), tandis que la consommation publique présente un nouveau fléchissement (-0,3 %).

Pour le Japon, au cours du deuxième trimestre 1993, on constate le nfluéchissement de la croissance économique (PIB -0,5 %) accompagné par une reprise de l'inflation trimestrielle (+0,7 %), tandis qu'en rythme annuel, on constate une considérable réduction (+0,7 %). Parmi les composantes de la demande interne, on constate le fléchissement des investissements (-0,3 %) et surtout de la consommation privée (-0,6 %).

#### PRIX : L'inflation annuelle de la CE se maintient à 3,3 % en octobre. 6 Etats membres remplissent les critères de convergence pour l'inflation

Le taux d'inflation annuelle mesuré par l'IPC est resté inchangé au niveau de 3,3 % entre septembre et octobre, confirmant ainsi la quasi-stabilité de l'inflation : depuis le début de cette année, les taux annuels sont toujours restés entre 3,6 % et 3,3 %.

Dans l'ordre croissant de l'inflation actuelle, les taux pour les Etats membres sur les 12 derniers mois et ceux de la période correspondante de l'année passée sont les suivants:

OCT. '93 OCT. '92	OCT. '93 OCT. '91	OCT. '93 OCT. '92	OCT. '93 OCT. '91		
Irlande **	1,3 %	2,8 %	Luxembourg	3,5 %	3,2 %
Royaume-Uni	1,4 %	3,6 %	Allemagne*	3,9 %	3,7 %
Danemark	1,5 %	1,6 %	Espagne	4,6 %	5,2 %
Pays-Bas	1,8 %	3,3 %	Italie	4,6 %p	4,8 %
France	2,2 %p	1,9 %	Portugal	6,3 %	8,9 %
Belgique	2,7 %	2,2 %	Grèce	12,3 %	15,9 %

\* IPC pour la R.F. D'Allemagne continue à se rapporter à la situation territoriale avant le 3 octobre 1990

\*\* Chiffres pour août

p = Provisoire

Le Traité de Maastricht sur l'Union Européenne, qui est entré en vigueur au 1.11.1993, prévoit comme un des critères de convergence économique, que les taux d'inflation annuelle des Etats membres ne doivent pas dépasser plus de 1,5 % la moyenne des trois pays avec les taux les plus bas.

Sur cette base, en octobre 1993, l'Irlande, le Royaume-Uni, le Danemark, les Pays-Bas, la France et la Belgique remplissaient ces conditions (la moyenne des trois pays avec les taux les plus bas étant de 1,4 %, donc le différentiel doit se situer en dessous de 2,9 %). Ces chiffres sont basés sur les indices nationaux des prix à la consommation non harmonisés.

Quant aux Etats candidats à l'adhésion seulement la Finlande (1,6 %) et la Norvège (2,0 %) remplissent à présent ces critères, tandis que l'Autriche (3,4 % en septembre) et la Suède (4,3 %) ont des taux qui sont hors des limites sus-mentionnées.

En octobre, les taux annuels des Etats-Unis et le Japon ont été respectivement de 2,8 % et 1,3 %.

L'indice mensuel pour l'ensemble de la Communauté a augmenté de 0,3 % entre septembre et octobre, le même taux que celui du mois dernier. Une très forte hausse de 1,9 % a été enregistrée en Grèce, tandis que les indices de l'Italie (0,7 %) et du Portugal (0,6 %) ont également connu des hausses sensibles. Dans tous les autres Etats membres, les accroissements ont été bas à modérés : Belgique 0,1 %, Allemagne, France et Pays-Bas 0,2 %, Danemark et Luxembourg 0,3 %, Espagne 0,4 %, pendant que le Royaume-Uni a enregistré un recul de son indice de 0,1 %.

#### **PRODUCTION INDUSTRIELLE : Pas de reprise au cours de l'été 1993**

Dans le secteur industriel européen, la production continue de baisser et aucune stabilisation n'est en vue, ce diagnostic valant en particulier pour l'industrie des biens d'investissement.

Pour la Communauté européenne (EUR12), le taux de variation de l'indice de la production industrielle corrigé du nombre de jours ouvrables par rapport à la valeur du mois correspondant de l'année précédente a été de -2,3 % en août 1993 et de -4,3 % en juillet. Pour l'industrie des biens d'investissement, le taux de variation correspondant est de -5,5 % en août.

Si l'on considère les chiffres des trois derniers mois disponibles (juin à août 1993), on constate que pour EUR12, le taux de variation de l'indice de production corrigé des variations saisonnières est de -0,4 % par rapport aux trois mois précédents (mars à mai).

Au Japon, la récession a été encore plus forte et le taux de variation correspondant est de -0,7 % (estimation). Aux Etats-Unis, on ne constate aucune relance marquante (+0,5 %).

Dans les différents Etats membres de la Communauté européenne, les taux de variation corrigés des variations saisonnières de la production industrielle des trois derniers mois par rapport aux mois précédents sont les suivants : Danemark +4,6 %, Grèce +1,5 %, Espagne +1,6 %, Royaume-Uni +1,1 %, Pays-Bas 0,0 %, Allemagne -0,3 %, France -0,6 %, Italie -1,2 %, Irlande -2,3 % (estimation), Belgique -3,6 % (estimation). On constate donc que dans de nombreux Etats membres, la production a également baissé au cours des mois d'été ou a stagné, avec de faibles taux de variation positifs.

Dans les différentes branches économiques de l'industrie de la Communauté, la production a baissé particulièrement dans le secteur de la production de métaux [NACE 22], des

ouvrages en métaux [NACE 31], dans la construction automobile [NACE 35] et dans l'industrie textile [NACE 43].

#### **COMMERCE EXTERIEUR**

Le déficit communautaire des cinq premiers mois de 1993 atteint -14,8 Mrds d'écus, contre -31,3 Mrds d'écus pour la période correspondante de 1992. Le taux d'évolution des exportations entre janvier-mai 1992 et 1993 est supérieur de 9 points à celui des importations. Les importations extra-communautaires se replient de 4,7 %. Les exportations progressent de près de 4 %, par rapport aux cinq premiers mois de 1992.

Le bilan commercial des Etats-Unis se solde par un déficit de 49,1 Mrds d'écus soit le double de celui de janvier-mai 1992. Les importations des Etats-Unis connaissent une vive augmentation en janvier-mai 1993 en termes d'écus (15,4 %), moins forte en dollars: 10,2 %. Les exportations des Etats-Unis progressent moins vite que les importations: 9,2 % en écus et 4,3 % en dollars.

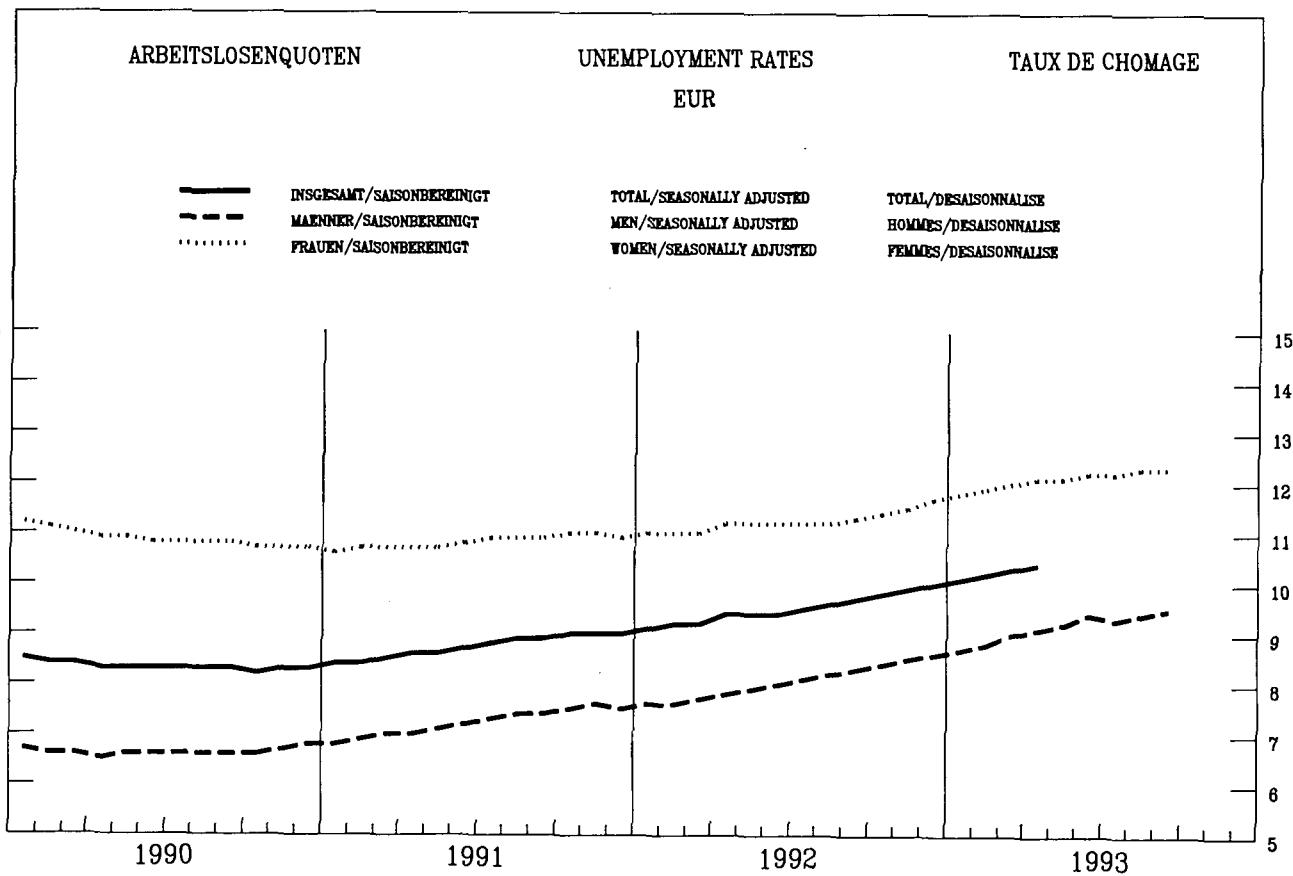

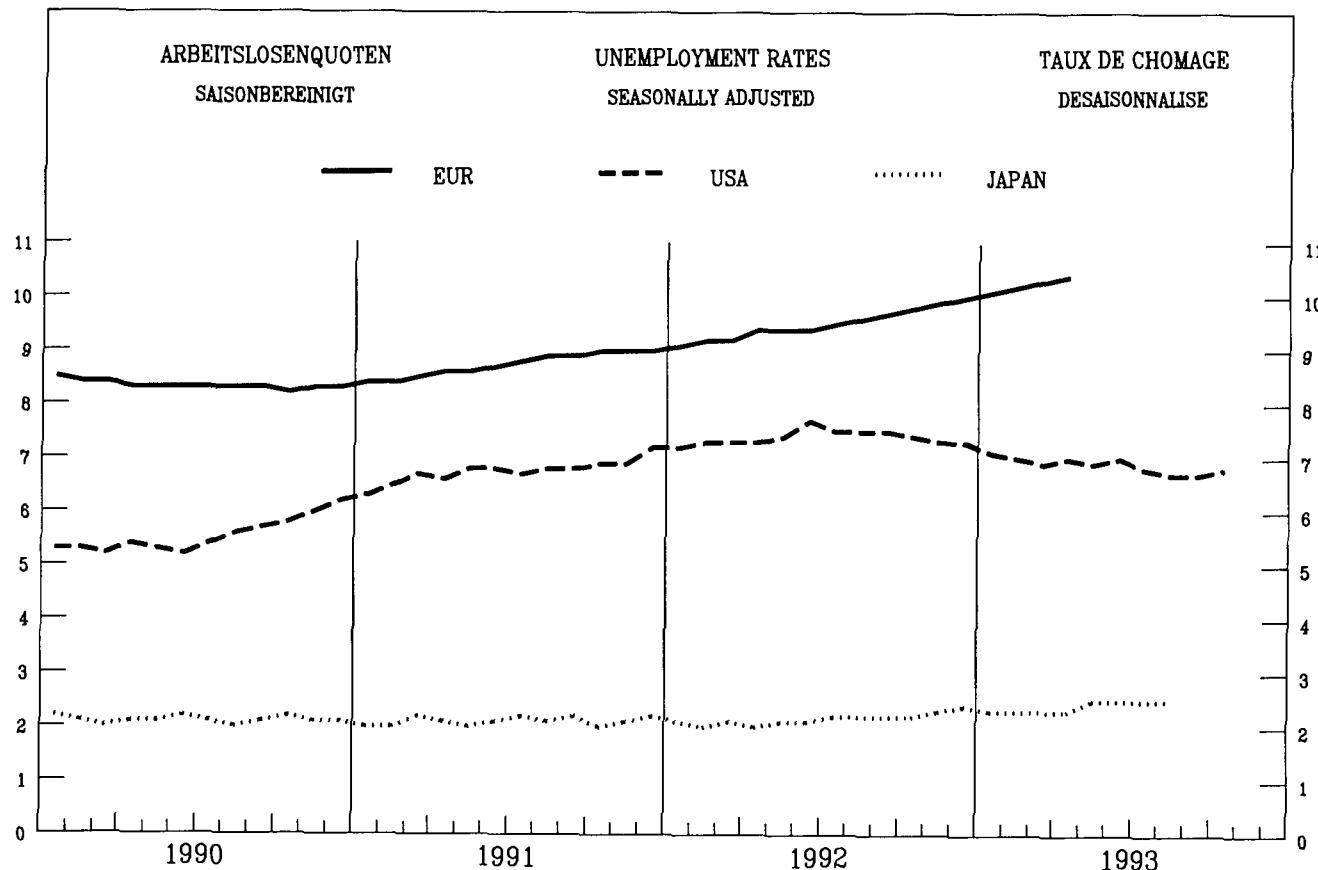

L'excédent japonais cumulé sur les cinq premiers mois de 1993 est de 42,4 Mrds d'écus, en progrès de 7,7 Mrds comparé au solde de janvier-mai 1992. Les exportations du Japon montrent une évolution ferme en écus: 11,4 %, plus tempérée en dollars: 6,3 %. Cette poussée en écus est imputable à la parité yen-écu: les exportations en yens se replient de 3,2 %. Les importations du Japon augmentent de 6,5 % en écus, de 1,7 % en dollars, et baissent de 7,1 % en yens.

Pour les cinq premiers mois de 1993 l'Allemagne dégage un solde extra-communautaire de 6,2 Mrds d'écus, soit 4,8 Mrds de plus que pour la période correspondante de 1992. L'Italie est excédentaire de 1,4 Mrd d'écus en janvier-mai 1993, alors qu'elle affiche un déficit de 3 Mrds d'écus pour les cinq premiers mois de 1992. Le solde extra de l'Irlande reste proche de l'équilibre en janvier-mai 1993. Le Portugal et l'UEBL sont déficitaires chacun de près d'un milliard d'écus. Le bilan commercial extra de l'UEBL s'améliore de 2,3 Mrds par rapport aux cinq premiers mois de 1992. Les déficits français et grecs pour le commerce extra sont de 1,6 Mrd d'écus chacun, ils restent proches de leurs niveaux de janvier-mai 1992. Malgré une amélioration de 3,3 Mrds d'écus, l'Espagne présente un déficit de 2,4 Mrds d'écus en janvier-mai 1993. Le commerce extra des Pays-Bas est déficitaire de 6 Mrds d'écus, contre près de 8 Mrds pour les cinq premiers mois de 1992. Le Royaume-Uni présente le bilan le plus fortement négatif pour la période janvier-mai 1993: -9,5 Mrds d'écus, proche de celui des cinq premiers mois de 1992.

(1) Les résultats du Danemark, non disponibles à ce jour, ont été estimés.

## „On line“-Abfrage

Jede Zeitreihe ist durch einen neunstelligen numerischen Code gekennzeichnet, der seinerseits in Unterkodes gegliedert ist, welche – im Falle von „Eurostatistik“ – das Land, den Sektor, die Tabelle, die Einheit und die Periodizität bezeichnen.  
Die Bedeutung der einzelnen Unterkodes ist der nachstehend aufgeführten Tabelle zu entnehmen.

Land XX	Sektor XX	Tabelle XXXX	Periodizität und Einheit X
06 EUR 12*	93	Varialentabellen XXXX vierstelliger Wert, der im Titel jeder Tabelle erscheint	0 jährlich, Angaben in Prozent 1 vierteljährlich, Angaben in Prozent 2 monatlich, Angaben in Prozent 3 jährlich, Indexangaben (1985 = 100) 4 vierteljährlich, Indexangaben (1985 = 100) 5 monatlich, Indexangaben (1985 = 100) 6 jährlich, Angaben in absoluten Werten 7 vierteljährlich, Angaben in absoluten Werten 8 monatlich, Angaben in absoluten Werten 9 Gewicht, EUR 10 = 100 bzw. EUR 12 = 100

24 L			
26 UK			
28 IRL			
30 DK			
32 E			
34 GR			
36 P			
42 USA			
46 JAP			

\* Territoriale Aufteilung vor dem 3. 10. 90: 02 für EUR 12, 12 für D.

Beispiele: Will man die monatliche Arbeitslosigkeit (in absoluten Zahlen) von Frankreich gemäß Tabelle 0304 dieser Veröffentlichung erfahren, so braucht man nur den Code 14 93 0304 8 einzugeben.

## ‘On-line’ consultation

Each time series is identified by a nine-digit code broken down into subcodes, which in the case of Eurostatistics, represent the country, sector, table unit and periodicity. The significance of the different subcodes may be found in the table below.

Country XX	Sector XX	Table XXXX	Periodicity and unit X
06 EUR 12*	93	Table by indicator XXXX 4-digit value quoted in the title of each table	0 annual 1 quarterly 2 monthly 3 annual 4 quarterly 5 monthly 6 annual 7 quarterly 8 monthly 9 weighting in % in % in % index 1985 = 100 index 1985 = 100 index 1985 = 100 absolute value absolute value absolute value EUR 10 = 100 or EUR 12 = 100
03 EUR 10			
11 D*			
14 F			
16 I			
18 NL

24 L			
26 UK			
28 IRL			
30 DK			
32 E			
34 GR			
36 P			
42 USA			
46 JAP			

\* data for the territorial situation before 3. 10. 90: 02 for EUR 12, 12 for D.

Consultation example: to know the monthly unemployment (absolute figures) of France as is shown in Table 0304 of this publication, the code 14 93 0304 8 should be formed.

## Mode de consultation «on-line»

Chaque série chronologique est identifiée par un code à neuf chiffres structuré en sous-codes représentant, dans le cas d'Eurostatistiques, le pays, le secteur, le tableau, l'unité et la périodicité. On trouvera dans le tableau ci-dessous la signification des différents sous-codes.

Pays XX	Secteur XX	Tableau XXXX	Périodicité et unité X
06 EUR 12*	93	Tableaux par variable XXXX valeur à 4 chiffres figurant dans le titre de chaque tableau	0 annuelle 1 trimestrielle 2 mensuelle 3 annuelle 4 trimestrielle 5 mensuelle 6 annuelle 7 trimestrielle 8 mensuelle 9 pondération exprimée en pourcentage exprimée en pourcentage exprimée en pourcentage exprimée en indice 1985 = 100 exprimée en indice 1985 = 100 exprimée en indice 1985 = 100 exprimée en valeur absolue exprimée en valeur absolue exprimée en valeur absolue EUR 10 = 100 ou EUR 12 = 100
03 EUR 10			
11 D*			
14 F			
16 I			
18 NL			
21 UEBL			
22 B			
24 L			
26 UK			
28 IRL			
30 DK			
32 E			
34 GR			
36 P			
42 USA			
46 JAP			

\* données pour la situation territoriale avant le 3. 10. 90: 02 pour EUR 12, 12 pour D.

Exemple de consultation: pour connaître le chômage mensuel (chiffres absolu)s de la France, tel qu'il figure au tableau 0304 de cette publication, il suffit d'appeler le code 14 93 0304 8;
